PRO BONO & COMMUNITY SERVICE

For more than a century, our attorneys, paralegals and staff have volunteered time and counsel to help people in need and to make our communities stronger, more resilient, more welcoming places to live and work. We invest our pro bono resources in programs and communities around the country.

Stinson is committed to meeting the annual Law Firm Pro Bono Challenge® of dedicating 3 percent of total billable hours to pro bono efforts. Each year, our attorneys provide thousands of hours of pro bono legal representation to low-income individuals and the nonprofit organizations that serve them.

In 2017, the firm exceeded this goal, donating nearly 3.5 percent of total billable hours—for a total of 23,959 hours—to pro bono, at a value of $8.8 million in free legal services.

DECLARATION OF THOMAS P. THRASH

I, Thomas P. Thrash, declare as follows:

1. I am a partner of the Thrash Law Firm, P.A. (the "Thrash Law Firm"). Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. Since its founding in 1998, the Thrash Law Firm has litigated complex cases against some of the largest corporations in the world, including Exxon, Philip Morris, State Farm, Pfizer, Lincoln Electric, Ford Motor Company, Bridgestone/Firestone, and AT&T. Serving as Lead

Counsel in a class action against Philip Morris Incorporated filed in 2003, the firm recently recovered $45 million on behalf of Arkansans who smoked Marlboro Lights.

4. Members of the Thrash Law Firm who worked on this case are as follows:

Thomas P. Thrash: Tom Thrash graduated from Ouachita Baptist University in 1977 with a bachelor's degree in business administration, and he received his juris doctor degree, with honors, from the University of Arkansas in 1980. He then spent 18 years at the Rose Law Firm in Little Rock, where he became a Senior Partner. Mr. Thrash started the Thrash Law Firm in 1998 to specialize in Class Action, Mass Tort, and Complex Litigation. In 2000, Mr. Thrash was voted Arkansas Trial Lawyer of the Year by the Arkansas Trial Lawyers Association, and he currently serves on the Board of Trustees of Ouachita Baptist University.

Marcus Bozeman: Marcus Bozeman received his Bachelor of Arts from the University of Arkansas and his law degree from Bowen School of Law at the University of Arkansas at Little Rock. Mr. Bozeman graduated first in his class from law school and served as Editor in Chief of the UALR Law Review. Immediately after law school, Mr. Bozeman completed a two-year clerkship with the Honorable Floyd R. Gibson of the United States Court of Appeals for the Eighth Circuit. He began his private practice at Rouse Hendricks German May PC in Kansas City, Missouri before eventually returning to Little Rock to concentrate in class action and mass tort litigation.

5. The Thrash Law Firm played a critical role in this litigation on behalf of Arkansas class members. Specifically, the firm researched the underlying claims and filed an action against Defendants on behalf of the W. Edgar Willman 2000 Trust (the "Trust") and the Estate of Lloyd Willman (the "Estate"). After that Arkansas lawsuit became a part of this MDL, the Thrash Law

Firm participated in discovery on behalf of these bellwether Arkansas Plaintiffs, assisting in the collection of information necessary to prepare and serve discovery responses on behalf of the Trust and the Estate. The Thrash Law Firm also attended the deposition of Ed Willman, the representative of the Trust and the Estate.

6. The Thrash Law Firm worked with Ed Willman, the representative of the Trust and the Estate as bellwether Plaintiffs, to respond to discovery and to prepare for and appear at a deposition in this litigation. Mr. Willman expended much time and effort to assist in discovery and offer his deposition in this matter, summarized as follows:

Bellwether Deposition

- May 11, 2016 deposition in Little Rock, Arkansas
- 5.5 hours in total deposition time, day of deposition preparation, and post-deposition discussion
- Traveled 50 miles round trip from Lonoke, Arkansas to attend deposition

Deposition Preparation

- Phone prep discussions in April and May, 2016 totaling 3 hours
- In-person meeting with counsel to review documents in preparation for deposition
- In-person prep on May 10, 2016 totaling 4 hours
- Traveled 50 miles round trip from Lonoke, Arkansas to attend each deposition prep and meeting with counsel

Time Spent on Paper Discovery Responses and Collecting Documents

- 19 hours, plus travel time, spent over several time periods on collecting documents, providing original and supplemental interrogatory responses, and on providing original and supplemental responses to requests for admissions
- Traveled approximately 225 miles total on several occasions to grain elevators, accountants, FSA office, and banks to obtain documents
- Traveled several times to Little Rock from Lonoke, Arkansas to meet with counsel regarding discovery

7. Mr. Willman, prior to his selection as a bellwether plaintiff, also traveled to Little Rock several times to meet with counsel regarding his complaint and spent 8 meeting with counsel and collecting information for his complaint.

8. The Thrash Law Firm maintains contemporaneous records of its time and expenses in the ordinary course of business.

9. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

10. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients who were not either bellwether or class representative plaintiffs.

11. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

12. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time and expense information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order.

13. Based on my review of the records, the total lodestar for my law firm is $39,530. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Bozeman, Marcus	Partner	13.00	$700.00	$9,100.00
Thrash, Thomas	Partner	35.80	$850.00	$30,430.00
TOTALS		48.8		$39,530

14. The time spent by the Thrash Law Firm in this litigation prevented the firm from accepting other available work.

15. My firm seeks $ 497.10 in expenses in connection with the prosecution of the litigation. Those expenses are summarized below:

Category Code	Description of Category Code	Amounts
5	In-House Photocopying	$289.10
14	Court Fees	$180.00
17	Ground Transportation	$28.00
	TOTAL	**$497.10**

16. As part of my firm's request for an award of expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order.

17. The expenses pertaining to this case are reflected in the records of my firm. These records are contemporaneously prepared from receipts, expense vouchers, check and credit card records and other documents and are an accurate record of the expenses.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July, 2018, in Little Rock, Arkansas.

/s/ Thomas P. Thrash

DECLARATION OF I. RAY KERLICK

I, I. Ray Kerlick, declare as follows:

1. I am a partner in Wadler, Perches, Hundl & Kerlick ("WPHK") Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. WPHK is a full service firm with its principal offices in Wharton County, Texas. During the pendency of this matter we have had between 6 and 8 lawyers on staff. We have handled a variety of civil matters including complex civil litigation involving multiple claimants

and defendants, as well complex litigation in federal and state district courts. Our firm filed, to my knowledge, the first lawsuit in Texas involving the Syngenta GMO corn which was filed in the 23rd District Court in Wharton County, Texas. These Wharton County cases were transferred to the MDL. One of our initial plaintiffs, Clint Kalina, was initially identified as a bellwether claimant in the MDL litigation.

4. Attached to my declaration is my law firm's resume.

5. The following timekeepers were involved in the litigation and additional details of their background and experience are included the attachment hereto:

6. Ray Kerlick (IRK) - Partner in the firm, licensed in 1994 in Texas, 24 years of experience in civil litigation, including multi-plaintiff tort litigation, construction litigation, and real estate damage litigation, Martindale AV-rated attorney, also admitted in the Fifth Circuit, the Southern District, Eastern District and Western District of Texas.

7. Kari D. Lutringer (KDL) - Associate in the firm, licensed in 2007 in Texas, 11 years of experience in civil litigation and transactional matters. Handled multiple transactions involving purchase and sale of assets in excess of a million dollars.

8. Audra B. Smith (ABS) - Associate in firm, licensed in 2014 in Texas. Four years of experience in civil litigation, agricultural and livestock law. Handled several matters involving damage to agricultural property and livestock. Admitted to practice in the Southern District of Texas.

9. Laura Chapa (LC) - Paralegal with the firm for four years, with an additional five years experience at a litigation firm in Houston handling multi-party defense.

10. Michelle Nunley (MN) - Paralegal with the firm for four years. Also has in excess of fifteen years experience as an insurance adjuster.

11. Matthew Jirkovsky (MJ) - Paralegal with the firm for three years while attending law school, now a licensed attorney in Texas.

12. Our firm was the attorney of record and drafted the initial pleadings two of the first cases filed in Texas: *Clint Kalina, et al v. Syngenta Corporation, et al*, C.A. No. 47,911, in the 23rd Judicial District Court of Wharton County, Texas and *Derrick Lutringer v. Syngenta Corporation, et al*, C.A. No. 47,853, in the 23rd Judicial District of Wharton County, Texas. We handled the removal of these cases to the Southern District of Texas, Houston Division (Judge Gray Miller), before the cases were transferred to the MDL. Our firm coordinated ongoing discovery responses for our 48 clients throughout the process, as well as coordinated all communications and physical pickup and delivery from the seed companies, the crop insurance agents, and the local FSA office. In addition, we coordinated the bellwether discovery for our client, Clint Kalina, for the MDL case. Details of our activities, including dates and times and tasks, our included in our time entry submissions herewith.

13. In March, 2016, our client Clint Kalina was initially designated as a bellwether client in the MDL litigation. We assisted MDL counsel by taking the lead in completing answers to interrogatories, responses to requests for admission and two sets of requests for production and took the lead on preparing these responses and gathering the documents. In addition, we met with our client in preparation for his deposition on several occasions. The total common benefit hours was approximately 70 hours of attorney time. However, prior to completion of his deposition in April, 2016, Mr. Kalina was de-designated by MDL counsel.

14. Our firm keeps daily and contemporaneous time records using the TimeSlips program for each matter in office. Each timekeeper is required to keep daily time records for all

billable time. The submission herewith is based on a printout of each timekeeper from our TimeSlips program based on time entries contemporaneous to the time spent.

15. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

16. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients who were not either bellwether or class representative plaintiffs.

17. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

18. I have reviewed the time entry and removed entries for strictly clerical or administrative time, including "file review," "making copies," or other similar entries. This is consistent with the practice we have with all of our clients.

19. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order.

20. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm for the bellwether work is $15,186.00. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Smith, Audra B.	Associate	32.40	$195.00	$6,318.00
Kerlick, Ray	Partner	31.60	$250.00	$7,900.00
Lutringer, Kari	Associate	4.00	$200.00	$800.00
Chapa, Laura	Paralegal	1.60	$105.00	$168.00
TOTALS		69.60		$15,186.00

21. Because our firm's standard business is taken on an hourly basis, every hour spent on the Syngenta litigation was an hour that was not spent working on other billable time files. Specifically, the workload of Audra B. Smith on the Syngenta matter prevented our firm from taking other transactional and/or litigation matters which would have been assigned to her.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July 2018, in Wharton County, Texas.

DECLARATION OF STEPHEN M. WAGNER

I, Stephen M. Wagner, declare as follows:

1. I am a partner of Wagner Reese, LLP ("Wagner Reese"). Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. Wagner Reese, LLP was founded by partners Stephen M Wagner and Jason R. Reese in 2000. The Firm handles personal injury, product liability, complex litigation, and class action matters throughout Indiana and Illinois. Mr. Wagner was admitted to the Indiana bar in

1994 and has taken numerous cases to jury trial throughout his career. He was named the Trial Lawyer of the Year by the Indiana Trial Lawyers' Association (ITLA) in 2006 and is an elected member of the ITLA Board of Directors. Jason R. Reese was admitted to the bar in 1997 and is currently licensed in Indiana and Illinois. Mr. Reese has extensive jury trial experience throughout his career and has been repeatedly recognized by his peers as one the best trial lawyers in Indiana. His recognition began in 2003 when the Indiana State Bar Association named him "Outstanding Young Lawyer of the Year." In 2016 and 2018, Mr. Reese's peers voted him a Top 50 Super Lawyer for the State of Indiana.

4. See Firm History referenced above, and timekeeper background below.

5. The following is background information on the Firm's timekeepers:

Stephen Wagner

6. Obtained bachelor's degree, *cum laude*, from the University of Notre Dame in 1991

7. Obtained law degree, *cum laude*, from Indiana School of Law – Bloomington in 1994

8. Has been admitted to practice law since 1994

9. Areas of practice: complex litigation, personal injury, civil rights, class action, and business litigation

10. Accepted into the U.S. Attorney General's Honors Program and worked as an attorney for the Department of Justice in 1994-1995

11. Selected by his peers as an "Indiana Super Lawyer" from 2004-present

12. In 2006, was selected as the Indiana Trial Lawyer of the Year by Indiana Trial Lawyers Association (ITLA)

13. Elected member of the ITLA Board of Directors

Jason Reese

14. Obtained bachelor's degree, *cum laude*, from University of Arizona in 1994

15. Obtained law degree from Indiana University School of Law – Bloomington in 1997

16. Has been admitted to practice law since 1997

17. In 2003, named "Outstanding Young Lawyer of the Year" by the Indiana State Bar Association

18. In 2007, selected as one of the prestigious "Forty Under Forty" by the *Indianapolis Business Journal*

19. In 2013, named as one of the "Top 100 Trial Lawyers" by the *National Trial Lawyers*

20. Selected by his peers as an "Indiana Super Lawyer" from 2004-present

21. In 2016, recognized as "Top 50 Indiana Lawyer" by *Super Lawyer* magazine

Jamie Polk – Senior Paralegal

22. Obtained Paralegal Studies associates degree from University of Indianapolis in 1982

23. Has been working in the legal field since 1978

24. Areas of Practice: Environmental class actions, complex wrongful death, personal injury, and civil rights, complex mergers and acquisitions, and corporate law

Jessie Wolfe – Syngenta Litigation Coordinator

25. Obtained business bachelor's degree from Butler University in 2012

26. Has been working in the legal field since 2012

27. Areas of practice include personal injury and mass tort litigation support

28. The Firm filed a class action case against Syngenta on behalf of all Indiana farmers in the U.S. District Court for the Southern District of Indiana (OREBAUGH, et al v. SYNGENTA AG et al, Case No. 2:15-cv-09922-JWL-JPO). The undersigned helped prepare that class action complaint, traveled to personally meet with the class representative, Keith Orebaugh, and kept in regular communication with him.

29. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), our firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

30. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

31. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time and expense information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order.

32. After exercising billing judgment and conducting this re-review, I hereby confirm the total lodestar for my law firm is $35,240. A breakdown of the lodestar is provided below.

	Name	**Title**	**Total Hours**	**Hourly Rate**	**Lodestar**
1.	Wagner, Steve	Partner	29.80	$700.00	$20,860.00
2.	Reese, Jason	Partner	19.80	$700.00	$13,860.00
3.	Polk, Jamie	Paralegal	4.00	$100.00	$400.00
4.	Wolfe, Jessie	Paralegal	1.20	$100.00	$120.00
	TOTALS		54.80		$35,240.00

33. My firm seeks $711.50 in expenses in connection with the prosecution of the litigation. Those expenses are summarized below:

Category Code	Description of Category Code	Amounts
2	Postage Charges	$34.75
6	Outside Photocopying	$45.75
12	Lexis/Westlaw/Bloomberg	$425.00
15	Service of Process Fees	$206.00
	TOTAL	**$711.50**

34. As part of my firm's request for an award of expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order.

35. The Firm did not make capital contributions to the litigation fund.

36. The expenses pertaining to this case are reflected in the records of my firm. These records are contemporaneously prepared from receipts, expense vouchers, check and credit card records and other documents and are an accurate record of the expenses.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July, 2018, in Carmel, Indiana.

Stephen M. Wagner

DECLARATION OF MARK A. WALLER

I, Mark A. Waller, declare as follows:

1. I am the managing member of Waller Jorgenson Warzynski, PLLC ("WJW"). Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. WJW attorneys have litigated class action oil and gas cases, class actions against banks for abusive overdraft practices, Fair Labor Standards Act collective actions on behalf of a

national class, a mass tort action against directors and officers of a failed aircraft manufacturer, and been involved in complex commercial litigation matters over the last two decades.

4. Mark A. Waller performed the work at WJW in the referenced case. I graduated from The University of Tulsa with a Bachelors of Science degree in Economics in 1980. I graduated from The University of Tulsa, College of Law, in 1991. I was significantly involved, from 1990-1991, in defending a group of individual defendants in two large depositor class actions involving the Republic Bancorp financial institutions. In 1995 I was a founding partner with Inhofe, Jorgensen, Balman & Waller, where I worked primarily in the areas of complex commercial litigation and employment law. In 1998 I was hired by a Fortune 500 energy and communications company headquartered in Tulsa, Oklahoma -- The Williams Companies, Inc. ("Williams") -- to handle Williams' and its subsidiaries' labor and employment matters, both nationally and internationally. I re-entered private practice in 2003 with Herrold Herrold & Co., Lawyers, and this firm merged with Sneed Lang in 2009. I currently practice primarily in the areas of commercial litigation, business torts, class action, mass action and multi-plaintiff litigation, and employment litigation representing both plaintiffs and employers.

5. At WJW, and after Sneed Lang PC ceased operations in the referenced case, I was primarily responsible for working with the class representative plaintiffs for the states of South Dakota and Colorado and interfacing with and between these representatives and the Gray Ritter Graham firm.

6. At WJW I worked with (i) Richard Bieber of Bieber Farm and Rolling Ridge Ranch, LLC, which were class representative for South Dakota, and (ii) Lyle Ravenkamp and Scott Ravenkamp, both of Ravenkamp Farms Partnership, the class representative for Colorado. Each of these individuals was extremely cooperative and prompt in providing requested information and

documentation during the discovery process. Mr. Bieber was extensively prepared for his deposition and then deposed on March 8, 2016. WJW's time records reflect the hours spent working with Mr. Bieber on discovery and related matters.. Similarly, WJW's time records reflect the time spent with Mr. Ravenkamp in producing documents and responding to Syngenta's discovery requests.

7. At WJW, I regularly record and contemporaneously maintain records of time spent on each matter, and those records are recorded on time sheets and maintained at the WJW offices.

8. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

9. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients who were not either bellwether or class representative plaintiffs.

10. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment. In that regard, and subsequent to a teleconference with Don Downing, I reviewed time I incurred at WJW.

11. With respect to billing judgment, I used that judgment each time I contemporaneously recorded time. In that regard, I incurred significant time reviewing select pleadings that kept me apprised of how the case was progressing, and for which I recorded no time. My time records reflect my work in the referenced case as directed by Co-Lead Counsel and in the performance of tasks that I was asked by Co-Lead Counsel to perform.

12. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time information submitted on behalf of WJW is accurate and in compliance with the Court's Common Benefit Order.

13. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for WJW is $4,000.00. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Mark A. Waller	Shareholder	10.00	$400.00	$4,000.00
TOTALS				$4,000.00

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July 2018, in Tulsa, Oklahoma.

/s/ *Mark A. Waller*
Managing Member of Waller Jorgenson Warzynski, PLLC

DECLARATION OF THOMAS V. BENDER

I, Thomas V. Bender, declare as follows:

1. I was a shareholder in the former firm of Walters Bender Strohbehn & Vaughan, P.C. and am currently a member in the firm of Horn Aylward & Bandy, LLC. I am authorized to submit this declaration on behalf of both firms.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. Walters Bender Strohbehn & Vaughan, P.C. was involved in complex litigation,

including MDL litigation and national and state class actions, for over 20 years. It handled complex litigation cases involving predatory lending and mortgage fraud, life insurance fraud, antitrust matters and consumer fraud, serving as lead counsel or in steering committee capacities in many of those cases, including:

a. Thomas v. U.S. Bank National Association, Case No 1216-CV20561, involving a $92,000,000 class action settlement to 2,400 class members.

b. Mitchell v. Residential Funding Company, LLC, et al, Case NoCV-220489, a verdict of $5,100,000 in actual damages and $99,000,000 in punitive damages, which was ultimately settled in part.

c. A history of seventeen verdicts or settlements of $5,000,000 or more, and 4 verdicts or settlements of over $50,000,000, with over $750 Million recovered since 2007.

d. Defense of multidistrict national class actions involving annuity sales practices, vanishing premiums and funding of multiple employer welfare benefit plans.

Attached is a copy of that law firm's resume.

4. Horn Aylward & Bandy, LLC and its members have been lead counsel in numerous class action cases on behalf of consumers and others involving motor fuel, life insurance products, cable television services, actions against the United States, and other complex cases, including:

a. Counsel for various State Treasurers or Attorneys General in actions seeking the return of billions in unclaimed and abandoned US Savings Bond proceeds to various states and their citizens, with the value of judgments obtained being in excess of 4.2 billion dollars.

b. Byrd v. Sprint and Network 2000, involving defense of claims of 100,000

independent sales representatives alleging underpayment of commissions and fraud, with successful cross-claim in arbitration resulting in an arbitration award of over $60,000,000.

c. In re Motor Fuel Temperature Litigation, Case No , co-lead counsel in MDL action involving many years of litigation, appeals, a bellwether trial, and ultimately settlements with more than two dozen motor fuel refiners and retailers.

d. City of Moberly, Missouri/Mamtek litigation, involving a series of complex investor securities lawsuits brought under state blue sky laws against a large bond underwriter, stemming from the collapse of a multimillion dollar municipal bond offering.

e. Block v. Ohio State Life Insurance Company, involving an action brought by policy holders across the country against an insurer and several corporate parent companies, resolved for a total value in excess of $20,000,000.

f. Rockhill Orthopedics v. Humana, an action against a health insurance company for breach of contract, brought by thousands of physicians in Kansas and Missouri, alleging breaches of agreements with physicians for reimbursements.

g. In re Bisphenol A litigation, co-lead counsel in MDL action brought against manufactures of baby bottles containing BPA for damages and injunctive relief

h. In re Multi-Piece Rim Liability Litigation, MDL 362, involving defense of class action litigation for a major manufacturer.

5. The timekeepers involved in the Syngenta litigation were partners or partner equivalents, Tom Bender, Brett Milbourn and Dirk Hubbard. Associates working on the case were Patrick McAndrews and Brooke Edenfield. Paralegals were Sarah Varney Stevens and Melissa Woods Williamson.

Partners/partner equivalents:

a. Tom Bender began his career as an accountant for Price Waterhouse in 1975 before returning to law school. He became a partner at Linde Thomson Fairchild Langworthy Kohn and VanDyke, and worked there until he left to help form the firm of Walters Bender Strohbehn & Vaughan in 1991. During his more than 38 years of trial work, he has been involved in representing both plaintiffs and defendants in a variety of litigation matters. He began his career doing medical negligence, product liability and personal injury defense for a number of local and national insurance carriers. He also assisted in the defense of a Texas real estate syndicator and served as general trial counsel for a large trucking company located in Joplin, Missouri. Over time, he became more active in the representation of plaintiffs, handling cases involving minority shareholders or limited partners in breaches of fiduciary claims, medical negligence suits, vexatious refusal to pay and fraud actions, including numerous class action matters. He has served as co-lead or liaison counsel in MDL actions, including as co-lead in the In re Bisphenol A Litigation; and as Liaison Counsel in the In re Motor Fuel Litigation as well as in in the Monsanto Genetically-Engineered Wheat Litigation, MDL No: 2473. He has also served in various committee positions including on the discovery committees in the pending In re Blue Cross Blue Shield Litigation, Case No 2:13 –CV-20000 and In re Disposable Lens, Case No: 3:15-MD-2626-J-20JRK

Mr. Bender has been recognized for his expertise by Best Lawyers, Super Lawyers for Kansas and Missouri, Best of the Bar of the Kansas City Business Journal, National Trial Lawyers Top 100 and a consistent AV Premier and Judicial Edition rating by Martindale Hubbell. He has been an active member of the Bar, serving as President of the Kansas City Metropolitan Bar Association and as President of the Kansas City Metropolitan Bar Foundation

(receiving president awards from both of those organizations for prior service) as well as currently serving as the Vice-President of the Missouri Bar.

b. Brett Milbourn began his practice at Linde Thomson Fairchild Langworthy & Van Dyke in 1986 before leaving to help co-found Walters Bender Strohbehn & Vaughan in 1991. Since then, he has been involved as lead and co-counsel in several multi-million dollar local and national lawsuits for individuals and businesses. In state and federal courts, he has represented a diverse clientele in complex cases involving business and commercial litigation, class action consumer fraud, property disputes with constitutional implications, and breach of contract actions. He and his legal team have been retained by the Kansas State Treasurer and 11 other states in cutting-edge, unclaimed property litigation against the U.S. Treasury in the "*US Savings Bond Litigation*". Additionally, Mr. Milbourn was involved in complex litigation that involved, among other parties, the National Collegiate Athletic Association (NCAA).

Mr. Milbourn was retained as local counsel in the Vitamins Antitrust Litigation; United States District Court for the District of Columbia in a nationwide vitamin antitrust case against the world's leading manufacturers of vitamins. The state anti-trust claims for Kansas producers involved vitamins for livestock located within the state, resulting in a multi-million dollar settlement for his large hog producer clients before trial. Likewise, in a separate matter, Mr. Milbourn represented several large hog farmers whose high-value breeder boars and market pigs were poisoned from feed mix containing excessive amounts of selenium, resulting in a confidential but very favorable monetary settlement.

Mr. Milbourn has been recognized by Best of the Bar by the Kansas City Business Journal, as a Super Lawyer Kansas and Missouri, and carries the AV Premier and Judicial Edition rating from Martindale Hubbell. He has been an active member of the Bar, serving as

President of the Johnson County Bar Association, President of the Johnson County Bar Foundation and President of the Young Lawyers Section of the Kansas Bar Association. He has been recognized as the Recipient of the Outstanding Service Award to the Legal Profession and Public by the Kansas Bar Association as well as the Legacy Award recipient of the Johnson County Bar Foundation.

c. Dirk Hubbard graduated from the University of Missouri, where he was President of the Student Body, and then attended law school at the University of Missouri at Kansas City. Upon graduation in 1990, he began his career at Payne and Jones where he worked until 1997. He then worked with John Klamm at a firm that became Klamann & Hubbard, where he remained until 2009, and then transitioned to Hubbard & Ardebili until 2014. He began with Walters Bender Strohbehn & Vaughan in 2015 before joining Horn Aylward & Bandy in 2018. Mr. Hubbard is a member of the Bar in Kansas and Missouri, and he is admitted to practice before U.S. District Courts for Kansas and the Western District of Missouri. Mr. Hubbard has extensive litigation experience over the past 27 years, and he is rated "AV Preeminent" by Martindale-Hubbell. He has served as class counsel in the following insurance and consumer class actions: American Family Vanishing Premiums Life Insurance Litigation, a class action venued in Minnesota; the Silver Creek Subdivision litigation venued in Joplin Missouri involving groundwater contamination; and payday lender class actions, ***Jennifer Lundy v. Mid-America Credit, Inc.***, Case No. 1116-CV02060, Jackson County Circuit Court (final class settlement approval on 10/11/11); and, ***Jennifer Lundy v. Check Into Cash of Missouri,*** Case No. 1216-CV10150, Jackson County Circuit Court, final class settlement approval on 3/15/13. He has also served as counsel in several multiple-plaintiff joinder actions brought by former students against various for-profit colleges. He has also been class counsel in various employment discrimination class actions/collective

actions including national gender and regional gender discrimination class actions against Rent-A-Center and Dillard's, as well as aregional race discrimination class action and a nationwide age discrimination collective action against Sprint.

Associates:

a. Patrick McAndrew graduated from Michigan State University School of Law, with honors, in 2009. He clerked with the Honorable Vernon Schoville before beginning to work with Walters Bender Strohbehn & Vaughan. While there, he worked on numerous class action cases involving claims against financial and lending institutions and nationwide retailers, as well as biotech companies. Since 2014, he has been recognized by his peers for inclusion in the Kansas and Missouri Super Lawyers Rising Stars. Mr. McAndrew's involvement in the Syngenta included document review and analysis as well as communication with bellwethers and class representatives.

b. Brooke Edenfield graduated from Washington University in 2004 and later decided to return to law school, graduating from Kansas University in 2011, where she was a member of the Jessup International and the National Environmental Law Moot Court teams. She began work with Walters Bender Strohbehn & Vaughan in October 2011 and worked there until April of 2016. Her involvement in the Syngenta case, included document review and analysis as well as obtaining and analyzing farmer records.

Paralegals

a. Sarah Varney Stevens, obtained her undergraduate degree from Scripps College 2013 and her Masters from University of Illinois in 2015. During the time she was pursuing her graduate degree, Sarah worked as a legal assistant with Torricelli & Limentato in Urbana, Illinois, while also working as a freelance translator. Sarah then joined Walters Bender Strohbehn &

Vaughan in 2015. Sarah Stevens involvement in the Syngenta case included document review and analysis, communication with bellwethers and class representatives, and coordination of discovery responses and deposition of class representatives and bellwethers.

b. Melissa Woods Williamson graduated from the University of Missouri, with a bachelor's degree in English and Creative Writing. She joined Walters Bender Strohbehn & Vaughan in 2009, and has been involved in numerous class actions as a legal assistant in both plaintiff and defense cases, including several MDL matters involving predatory lending and life insurance and annuity cases. Melissa Williamson's involvement in the Syngenta case included document review and analysis.

6. As a summary of the work done by our firms, Tom Bender served on the Plaintiff Executive Committee and provided general oversight and participation in that capacity, including initial discussions on strategy, experts, industry groups to be consulted and similar matters. Tom Bender and Dirk Hubbard were initially tasked with preparing the proposed trial plan for the overall litigation, and the draft that was prepared was generally followed in the course of the litigation. Patrick McAndrews and Brooke Edenfield were assigned to assist in the review of documents produced by Syngenta. Thereafter, we were assigned responsibilities with identifying potential class representatives and bellwethers, as well as the background work associated with reviewing qualifications, adequacy of recordkeeping and the like. As discovery commenced, we were asked to oversee producer discovery for the MDL class representatives and bellwether plaintiffs. In addition to coordinating the efforts of several law firms with regard with regard to class representative and bellwether plaintiffs discovery, we worked with the farmers to get their records produced and worked with opposing counsel on meet and confer issues as the scope of discovery evolved. We worked with co-counsel to develop deposition preparation materials and

met with numerous plaintiffs to again determine suitability as class representatives or bellwethers. We coordinated the deposition scheduling and preparation for all class representatives and bellwethers in the Kansas MDL, and we also prepared twenty-two of those farmers in Iowa, Illinois, South Dakota, Nebraska, Kansas, Missouri and Arkansas for deposition. That preparation was most often in person, and then also involved again traveling to their locations to actually produce those farmers. As expert reports were prepared, we assisted in providing requested financial and economic information for the experts as well as that information needed to challenge opposing experts' data. We assisted in producer fact citing and checked multiple briefs filed on expert and summary judgment issues. We also helped co-counsel Chris Ellis with the notice plan, meeting with the provider in Minneapolis to insure that notice was properly sent and opt outs properly captured, as well as responding to class member calls.

7. As reflected in paragraph 6 above, we worked extensively with class representatives and bellwethers in numerous states, coordinating discovery responses and producing 22 of the farmers for their depositions. My firm and I worked with the following 22 class representative and bellwether plaintiffs: (1) B-F James & Sons, Inc. (Frank James); (2) Bieber Farm/Rolling Ridge Ranch, LLC (Rick Bieber); (3) Glenn Bix; (4) Steven and John S. Cap; (5) Claas Farms (Howard and Luke Claas); (6) Crandall Farms/Three Guys Farming, Inc. (Morris and Dulane Crandall); (7) Dierking Farms (Les Dierking); (8) Eagle Lake (Kenny Falwell); (9) Five Star Farms (Brett Kendrick and Gary Kendrick); (10) Richard Glanzer; (11) Hadden Farms (Dale Hadden); (12) Greg Harris; (13) Henderson Farms Partnership (Tyler Henderson); (14) J. Anderson Farm, Inc.; (15) Chad Murphy; (16) Richard Oswald; (17) Randy Overgard; (18) Pat Skarda; (19) State Line Farm Co. (Ivan Woltemath); (20)Volnek Farms (Eugene and Deborah

Volnek); (21) Ross Ulmer; and, (22) W. Edgar Willman Trust and Lloyd C. Willman Estate (Ed Willman).

8. All of these plaintiffs provided discovery in addition to plaintiff fact sheets.

9. Of the 22 plaintiffs noted above, seven were class representative plaintiffs from the bellwether discovery pool states as follows: B-F James & Sons, Inc. and Bieber Farm/Rolling Ridge Ranch, LLC – South Dakota; Five Star Farms – Kansas; Hadden Farms – Illinois; Richard Oswald – Missouri; Henderson Farms Partnership – Arkansas; and, Volnek Farms – Nebraska. These class representative plaintiffs responded to, and produced documents responsive to, a first and second set of requests for production, answered three sets of interrogatories and answered requests for admission. My firm assisted in responding to this discovery. These six class representative plaintiffs were each deposed as well, and my firm assisted in preparing for and defending these depositions.

10. Of the 22 plaintiffs noted above, 15 were bellwether plaintiffs from the bellwether discovery pool states as follows: Glenn Bix, Claas Farms, Dierking Farms, LLC, Greg Harris, and State Line Farm Co. – Missouri Bellwethers; Steven and John S. Cap, Richard Glanzer, J. Anderson Farm, Inc., Chad Murphy, Randy Overgard, and Ross Ulmer – South Dakota Bellwethers; Crandall Farms/Three Guys Farming, Inc., Eagle Lake, Pat Skarda, and Willman Trust and Estate – Arkansas Bellwethers. These 16 bellwether plaintiffs responded to and produced documents in response to requests for production, answered interrogatories, and answered requests for admission. My firm assisted in responding to this discovery. These 16 bellwether plaintiffs were each deposed as well, and my firm assisted in preparing for and defending these depositions.

11. My firm and I spent considerable time and effort responding to Syngenta's discovery

requests. As described below, each of these individuals also spent many hours doing so, and where applicable, preparing for and providing deposition testimony.

12. B-F James & Sons, Inc. (Frank James):

a. B-F James & Sons, Inc. was selected and agreed to serve as a South Dakota class representative plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about B-F James & Sons, Inc.'s farming operation and other information over significant time periods, and which also called for personal financial information. B-F James & Sons, Inc. conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at B-F James & Sons, Inc.'s farm, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. B-F James & Sons, Inc. traveled 200 miles total on several occasions in obtaining these documents. B-F James & Sons, Inc. also incurred $150 in postage costs in forwarding various documents to counsel. B-F James & Sons, Inc. also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with B-F James & Sons, Inc., approximately 28 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. B-F James & Sons, Inc. also prepared for and provided deposition testimony. To prepare for this deposition, B-F James & Sons, Inc. reviewed materials, participated in phone call preparations, and attended in-person meetings. B-F James & Sons, Inc. traveled 300 miles round trip for in-person deposition preparation and another 300 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with B-F James

& Sons, Inc., approximately 21 additional hours (not including travel time) were devoted to these deposition efforts by B-F James & Sons, Inc., for a total of 49 hours in pursuit of this litigation.

13. **Bieber Farm/Rolling Ridge Ranch, LLC (Rick Bieber):**

a. Bieber Farm and Rolling Ridge Ranch, LLC. were selected and agreed to serve as South Dakota class representative plaintiffs and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Bieber Farm/Rolling Ridge Ranch, LLC.'s farming operation and other information over significant time periods, and which also called for personal financial information. Bieber Farm/Rolling Ridge Ranch, LLC. conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Bieber Farm/Rolling Ridge Ranch, LLC.'s farm, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Bieber Farm/Rolling Ridge Ranch, LLC. traveled numerous miles on several occasions in obtaining these documents. Bieber Farm/Rolling Ridge Ranch, LLC. also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Bieber Farm/Rolling Ridge Ranch, LLC. approximately 32 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents. Additional time was also spent by Bieber Farm/Rolling Ridge Ranch, LLC with its counsel on these tasks.

b. Bieber Farm/Rolling Ridge Ranch, LLC. also prepared for and provided deposition testimony. To prepare for this deposition, Bieber Farm/Rolling Ridge Ranch, LLC. reviewed materials, participated in phone call preparations, and attended in-person meetings. Bieber Farm/Rolling Ridge Ranch, LLC. traveled from South Dakota to Kansas City for in-person

deposition preparation and for his deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Bieber Farm/Rolling Ridge Ranch, LLC. approximately 16 additional hours (not including travel time) were devoted to these deposition efforts by Bieber Farm/Rolling Ridge Ranch, LLC., for a total of 48 hours in pursuit of this litigation.

14. **Glenn Bix**:

a. Glenn Bix was selected and agreed to serve as a Missouri bellwether and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Glenn Bix's farming operation and other information over significant time periods, and which also called for personal financial information. Glenn Bix conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Glenn Bix's farm, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Glenn Bix traveled numerous miles on several occasions in obtaining these documents. Glenn Bix also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Glenn Bix, approximately 16 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Glenn Bix also prepared for and provided deposition testimony. To prepare for this deposition, Glenn Bix reviewed materials, participated in phone call preparations, and attended in-person meetings. Glenn Bix traveled 30 miles round trip for his deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Glenn Bix,

approximately 14 additional hours were devoted to these deposition efforts by Glenn Bix, for a total of 30 hours in pursuit of this litigation.

15. **Steven and John S. Cap**:

a. Steven and John S. Cap were selected and agreed to serve as South Dakota bellwethers and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Steven and John S. Cap's farming operation and other information over significant time periods, and which also called for personal financial information. Steven and John S. Cap conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Steven and John S. Cap's farm, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Steven and John S. Cap traveled 275 miles total on several occasions in obtaining these documents. Steven and John S. Cap also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Steven and John S. Cap, approximately 33 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Steven and John S. Cap also prepared for and provided deposition testimony. To prepare for this deposition, Steven and John S. Cap reviewed materials, participated in phone call preparations, and attended in-person meetings. Steven and John S. Cap traveled 175 miles round trip for in-person deposition preparation and then another 175 miles round trip for their depositions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Steven and John S. Cap, approximately 20 additional hours (not including travel

time) were devoted to these deposition efforts by Glenn Bix, for a total of 53 hours in pursuit of this litigation.

16. **Claas Farms (Howard and Luke Claas):**

a. Claas Farms was selected and agreed to serve as a Missouri bellwether and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Claas Farms' farming operation and other information over significant time periods, and which also called for personal financial information. Claas Farms conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Claas Farms' location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Claas Farms traveled numerous miles on several occasions in obtaining these documents. Claas Farms also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Claas Farms, approximately 22 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Claas Farms also prepared for and provided deposition testimony. To prepare for this deposition, Claas Farms reviewed materials, participated in phone call preparations, and attended in-person meetings. Claas Farms traveled 260 miles round trip for in-person deposition preparation and then another 260 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Claas Farms, approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by Claas Farms, for a total of 39 hours in pursuit of this litigation.

17. **Crandall Farms/Three Guys Farming, Inc. (Morris and Dulane Crandall):**

a. Crandall Farms/Three Guys Farming, Inc. were selected and agreed to serve as Arkansas bellwethers and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Crandall Farms/Three Guys Farming, Inc.'s farming operation and other information over significant time periods, and which also called for personal financial information. Crandall Farms/Three Guys Farming, Inc. conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Crandall Farms/Three Guys Farming, Inc.'s location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Crandall Farms/Three Guys Farming, Inc. traveled numerous miles on several occasions in obtaining these documents. Crandall Farms/Three Guys Farming, Inc. also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Crandall Farms/Three Guys Farming, Inc., approximately 30 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Crandall Farms/Three Guys Farming, Inc. also prepared for and provided deposition testimony. To prepare for this deposition, Crandall Farms/Three Guys Farming, Inc. reviewed materials, participated in phone call preparations, and attended in-person meetings. Crandall Farms/Three Guys Farming, Inc. traveled 200 miles round trip for in-person deposition preparation and then another 200 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Crandall Farms/Three Guys Farming, Inc., approximately 20 additional hours (not including travel time) were devoted to these

deposition efforts by Crandall Farms/Three Guys Farming, Inc., for a total of 50 hours in pursuit of this litigation.

18. **Dierking Farms (Les Dierking):**

a. Dierking Farms was selected and agreed to serve as a Missouri bellwether and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Dierking Farms' farming operation and other information over significant time periods, and which also called for personal financial information. Dierking Farms conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Dierking Farms' location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Dierking Farms traveled 120 miles total on several occasions in obtaining these documents. Dierking Farms also spent $100 on postage in forwarding documents to counsel. Dierking Farms also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Dierking Farms, approximately 32 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Dierking Farms also prepared for and provided deposition testimony. To prepare for this deposition, Dierking Farms reviewed materials, participated in phone call preparations, and attended in-person meetings. Dierking Farms traveled 170 miles round trip for in-person deposition preparation and then another 170 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Dierking Farms,

approximately 20 additional hours (not including travel time) were devoted to these deposition efforts by Dierking Farms, for a total of 52 hours in pursuit of this litigation.

19. **Eagle Lake Farm Partnership (Kenny Falwell):**

a. Eagle Lake Farm Partnership was selected and agreed to serve as an Arkansas bellwether and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Eagle Lake Farm Partnership's farming operation and other information over significant time periods, and which also called for personal financial information. Eagle Lake Farm Partnership conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Eagle Lake Farm Partnership's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Eagle Lake Farm Partnership traveled 386 miles total on several occasions in obtaining these documents. Eagle Lake Farm Partnership also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Eagle Lake Farm Partnership, approximately 35 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents. An additional 12 hours was also spent by Eagle Lake Farm Partnership in working with its attorney regarding various tasks associated with service as a bellwether plaintiff.

b. Eagle Lake Farm Partnership also prepared for and provided deposition testimony. To prepare for this deposition, Eagle Lake Farm Partnership reviewed materials, participated in phone call preparations, and attended in-person meetings. Eagle Lake Farm Partnership traveled 180 miles round trip for in-person deposition preparation and then another 180 miles round trip

for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Eagle Lake Farm Partnership, approximately 23 additional hours (not including travel time) were devoted to these deposition efforts by Eagle Lake Farm Partnership, for a total of 70 hours in pursuit of this litigation.

20. **Five Star Farms (Brett Kendrick and Gary Kendrick):**

a. Five Star Farms was selected and agreed to serve as a Kansas class representative plaintiff, attending each day of trial and testifying at trial. Five Star Farms responded to Syngenta's requests for production which sought documents pertaining to numerous details about Five Star Farms' farming operation and other information over significant time periods, and which also called for personal financial information. Five Star Farms conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Five Star Farms' location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Five Star Farms traveled numerous miles on several occasions in obtaining these documents. Five Star Farms also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Five Star Farms, approximately 50 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Five Star Farms also prepared for and provided deposition testimony. To prepare for this deposition, Five Star Farms reviewed materials, participated in phone call preparations, and attended in-person meetings. Five Star Farms traveled 200 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with

Five Star Farms, approximately 20 additional hours (not including travel time) were devoted to the deposition testimony efforts by Five Star Farms.

c. Five Star Farms worked with counsel to prepare for its participation in the Kansas Trial, including spending at least 15 hours in April, 2017 reviewing documents and providing information to counsel, a significant portion of which occurred during a visit by counsel to Five Star Farms' farming operation over significant parts of a two day period. Five Star Farms also attended the Kansas trial from June 5, 2017 to June 23, 2017, testifying at the Kansas trial on June 8, 2017. Brett Kendrick of Five Star Farms attended every day of trial and provided assistance and input to counsel whenever possible. Mr. Kendrick spent approximately 120 hours at trial over three weeks. To prepare for trial testimony, Five Star Farms reviewed materials and attended in-person meetings, including a meeting that occurred the weekend before trial. Mr. Kendrick spent at least 10 hours preparing for Five Star Farms' testimony. Five Star Farms traveled 800 miles round trip to attend and testify at trial. Five Star Farms devoted a total of approximately 145 hours in preparing for, attending and testifying at the Kansas trial, for a total of at least 215 hours in pursuit of this litigation. Additional time was also spent by Five Star Farms in working with its attorney regarding the various tasks associated with service as a class representative.

d. In addition to the time devoted to this litigation, the Kansas trial occurred during planting season for Five Star Farms. In order to timely complete its necessary farming operations during the time of trial, Five Star Farms hired one additional full-time laborer to perform work that would have been performed by Brett Kendrick. Five Star Farms paid this additional person approximately $12 per hour for over 40 hours of work a week during trial.

21. **Richard Glanzer:**

a. Richard Glanzer was selected and agreed to serve as a South Dakota bellwether and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Richard Glanzer's farming operation and other information over significant time periods, and which also called for personal financial information. Richard Glanzer conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Richard Glanzer's farm, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Richard Glanzer traveled numerous miles on several occasions in obtaining these documents. Richard Glanzer also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Richard Glanzer, approximately 20 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Richard Glanzer also prepared for and provided deposition testimony. To prepare for this deposition, Richard Glanzer reviewed materials, participated in phone call preparations, and attended in-person meetings. Richard Glanzer traveled 250 miles round trip for in-person deposition preparation and then another 250 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Richard Glanzer, approximately 18 additional hours (not including travel time) were devoted to these deposition efforts by Richard Glanzer, for a total of 38 hours in pursuit of this litigation.

22. **Hadden Farms (Dale Hadden):**

a. Hadden Farms was selected and agreed to serve as an Illinois class representative plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Hadden Farms' farming operation and other information over significant time periods, and which also called for personal financial information. Hadden Farms conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Hadden Farms' location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Hadden Farms traveled a total of 120 miles on several occasions in obtaining these documents. Hadden Farms also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Hadden Farms, approximately 85 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Hadden Farms also prepared for and provided deposition testimony. To prepare for this deposition, Hadden Farms reviewed materials, participated in phone call preparations, and attended in-person meetings. Hadden Farms traveled 90 miles round trip for in-person deposition preparation and then another 90 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Hadden Farms, approximately 18 additional hours (not including travel time) were devoted to these deposition efforts by Hadden Farms, for a total of 103 hours in pursuit of this litigation.

23. **Greg Harris:**

a. Greg Harris was selected and agreed to serve as a Missouri bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Greg Harris's farming operation and other information over significant time periods, and which also called for personal financial information. Greg Harris conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Greg Harris's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Greg Harris traveled numerous miles on several occasions in obtaining these documents. Greg Harris also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Greg Harris, approximately 27 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Greg Harris also prepared for and provided deposition testimony. To prepare for this deposition, Greg Harris reviewed materials, participated in phone call preparations, and attended in-person meetings. Greg Harris traveled 280 miles round trip for in-person deposition preparation and then another 280 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Greg Harris, approximately 20 additional hours (not including travel time) were devoted to these deposition efforts by Hadden Farms, for a total of 47 hours in pursuit of this litigation. Additional time was spent by Greg Harris with his counsel in numerous tasks associated with his service as a bellwether plaintiff.

24. **Henderson Farms Partnership**:

a. Henderson Farms Partnership was selected and agreed to serve as an Arkansas class representative plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Henderson Farms Partnership's farming operation and other information over significant time periods, and which also called for personal financial information. Henderson Farms Partnership conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Henderson Farms Partnership's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Henderson Farms Partnership traveled numerous miles on several occasions in obtaining these documents. Henderson Farms Partnership also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Henderson Farms Partnership, approximately 16 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Henderson Farms Partnership also prepared for and provided deposition testimony. To prepare for this deposition, Henderson Farms Partnership reviewed materials, participated in phone call preparations, and attended in-person meetings. Henderson Farms Partnership traveled 60 miles round trip for in-person deposition preparation and then another 60 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Henderson Farms Partnership, approximately 14 additional hours (not including travel time) were devoted to these deposition efforts by Henderson Farms Partnership, for a total

of 30 hours in pursuit of this litigation. Additional time was spent by Henderson Farms Partnership with his counsel on numerous tasks associated with his service as a class representative.

25. **J. Anderson Farm, Inc. (Jon Anderson)**:

a. J. Anderson Farm, Inc. was selected and agreed to serve as a South Dakota bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about J. Anderson Farm, Inc.'s farming operation and other information over significant time periods, and which also called for personal financial information. J. Anderson Farm, Inc. conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at J. Anderson Farm, Inc.'s location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. J. Anderson Farm, Inc. traveled numerous miles on several occasions in obtaining these documents. J. Anderson Farm, Inc. also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with J. Anderson Farm, Inc., approximately 28 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. J. Anderson Farm, Inc. also prepared for and provided deposition testimony. To prepare for this deposition, J. Anderson Farm, Inc. reviewed materials, participated in phone call preparations, and attended in-person meetings. J. Anderson Farm, Inc. traveled 220 miles round trip for in-person deposition preparation and then another 220 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with J. Anderson Farm, Inc., approximately 19 additional hours (not including travel time) were devoted

to these deposition efforts by J. Anderson Farm, Inc., for a total of 47 hours in pursuit of this litigation. Additional time was spent by J. Anderson Farm, Inc. with his counsel on numerous tasks associated with his service as a bellwether plaintiff.

26. **Chad Murphy:**

a. Chad Murphy was selected and agreed to serve as a South Dakota bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Chad Murphy's farming operation and other information over significant time periods, and which also called for personal financial information. Chad Murphy conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Chad Murphy's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Chad Murphy traveled numerous miles on several occasions in obtaining these documents. Chad Murphy also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Chad Murphy, approximately 25 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Chad Murphy also prepared for and provided deposition testimony. To prepare for this deposition, Chad Murphy reviewed materials, participated in phone call preparations, and attended in-person meetings. Chad Murphy traveled 150 miles round trip for in-person deposition preparation and then another 150 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Chad Murphy, approximately 18 additional hours (not including travel time) were devoted to these deposition

efforts by Chad Murphy, for a total of 43 hours in pursuit of this litigation. Additional time was spent by Chad Murphy with his counsel on numerous tasks associated with his service as a bellwether plaintiff.

27. **Richard Oswald:**

a. Richard Oswald was selected and agreed to serve as a Missouri class representative plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Richard Oswald's farming operation and other information over significant time periods, and which also called for personal financial information. Richard Oswald conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Richard Oswald's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Richard Oswald traveled numerous miles on several occasions in obtaining these documents. Richard Oswald also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Richard Oswald, approximately 42 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Richard Oswald also prepared for and provided deposition testimony. To prepare for this deposition, Richard Oswald reviewed materials, participated in phone call preparations, and attended in-person meetings. Richard Oswald traveled 230 miles round trip on two occasions for in-person deposition preparation and then another 230 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Richard Oswald, approximately 22 additional hours (not including travel time) were devoted to

these deposition efforts by Richard Oswald, for a total of 64 hours in pursuit of this litigation. Additional time was spent by Richard Oswald with his counsel on numerous tasks associated with his service as a class representative.

28. **Randy Overgard:**

a. Randy Overgard was selected and agreed to serve as a South Dakota bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Randy Overgard's farming operation and other information over significant time periods, and which also called for personal financial information. Randy Overgard conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Randy Overgard's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Randy Overgard traveled numerous miles on several occasions in obtaining these documents. Randy Overgard also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Randy Overgard, approximately 20 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Randy Overgard also prepared for and provided deposition testimony. To prepare for this deposition, Randy Overgard reviewed materials, participated in phone call preparations, and attended in-person meetings. Randy Overgard traveled 70 miles round trip for in-person deposition preparation and then another 70 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Randy Overgard,

approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by Randy Overgard, for a total of 37 hours in pursuit of this litigation.

29. **Pat Skarda:**

a. Pat Skarda was selected and agreed to serve as an Arkansas bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Pat Skarda's farming operation and other information over significant time periods, and which also called for personal financial information. Pat Skarda conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Pat Skarda's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Pat Skarda traveled numerous miles on several occasions in obtaining these documents. Pat Skarda also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Pat Skarda, approximately 20 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Pat Skarda also prepared for and provided deposition testimony. To prepare for this deposition, Pat Skarda reviewed materials, participated in phone call preparations, and attended in-person meetings. Pat Skarda traveled 120 miles round trip for in-person deposition preparation and then another 120 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Pat Skarda, approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by Pat

Skarda, for a total of 37 hours in pursuit of this litigation. Additional time was spent by Pat Skarda with his counsel on numerous tasks associated with his service as a bellwether plaintiff.

30. **State Line Farm Co. (Ivan Woltemath):**

a. State Line Farm Co. was selected and agreed to serve as a Missouri bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about State Line Farm Co.'s farming operation and other information over significant time periods, and which also called for personal financial information. State Line Farm Co. conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at State Line Farm Co.'s location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. State Line Farm Co. traveled numerous miles on several occasions in obtaining these documents. State Line Farm Co. also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with State Line Farm Co., approximately 28 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. State Line Farm Co. also prepared for and provided deposition testimony. To prepare for this deposition, State Line Farm Co. reviewed materials, participated in phone call preparations, and attended in-person meetings. State Line Farm Co. traveled 120 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with State Line Farm Co., approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by State Line Farm Co., for a total of 45 hours in pursuit of this litigation.

31. **Volnek Farms (Eugene and Deborah Volnek):**

a. Volnek Farms was selected and agreed to serve as a Nebraska class representative plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about Volnek Farms' farming operation and other information over significant time periods, and which also called for personal financial information. Volnek Farms conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Volnek Farms' location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Volnek Farms traveled numerous miles on several occasions in obtaining these documents. Volnek Farms also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Volnek Farms, approximately 28 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Volnek Farms also prepared for and provided deposition testimony. To prepare for this deposition, Volnek Farms reviewed materials, participated in phone call preparations, and attended in-person meetings. Volnek Farms traveled 110 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Volnek Farms, approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by Volnek Farms, for a total of 45 hours in pursuit of this litigation.

32. **Ross Ulmer:**

a. Ross Ulmer was selected and agreed to serve as a South Dakota bellwether plaintiff and, in that capacity, responded to Syngenta's requests for production which sought documents

pertaining to numerous details about Ross Ulmer's farming operation and other information over significant time periods, and which also called for personal financial information. Ross Ulmer conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at Ross Ulmer's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. Ross Ulmer traveled numerous miles on several occasions in obtaining these documents. Ross Ulmer also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with Ross Ulmer, approximately 25 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. Ross Ulmer also prepared for and provided deposition testimony. To prepare for this deposition, Ross Ulmer reviewed materials, participated in phone call preparations, and attended in-person meetings. Ross Ulmer traveled 70 miles round trip for in-person preparation and then another 70 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with Ross Ulmer, approximately 17 additional hours (not including travel time) were devoted to these deposition efforts by Ross Ulmer, for a total of 42 hours in pursuit of this litigation.

33. **W. Edgar Willman Trust/Lloyd C. Willman Estate (Ed Willman):**

a. W. Edgard Willman Trust/Lloyd C. Willman Estate were selected and agreed to serve as Arkansas bellwether plaintiffs and, in that capacity, responded to Syngenta's requests for production which sought documents pertaining to numerous details about W. Edgard Willman Trust/Lloyd C. Willman Estate's farming operation and other information over significant time

periods, and which also called for personal financial information. W. Edgard Willman Trust/Lloyd C. Willman Estate conducted an extensive search to locate records, reviewed records, and had several discussions with attorneys at my firm in order to understand the requests and properly respond. Some of the records were housed at W. Edgard Willman Trust/Lloyd C. Willman Estate's location, but some were in possession of third parties, including grain elevators, accountants, and the FSA office. W. Edgard Willman Trust/Lloyd C. Willman Estate traveled numerous miles on several occasions in obtaining these documents. W. Edgard Willman Trust/Lloyd C. Willman Estate also answered Syngenta's interrogatories, which requested detailed information, as well as a request for admissions. Based on my firm's time records, my own contemporaneous involvement, and discussion with W. Edgard Willman Trust/Lloyd C. Willman Estate, approximately 19 total hours were devoted to these tasks of responding to paper discovery and obtaining and providing documents.

b. W. Edgard Willman Trust/Lloyd C. Willman Estate also prepared for and provided deposition testimony. To prepare for this deposition, W. Edgard Willman Trust/Lloyd C. Willman Estate reviewed materials, participated in phone call preparations, and attended in-person meetings. W. Edgard Willman Trust/Lloyd C. Willman Estate traveled 50 miles round trip for in-person preparation and then another 50 miles round trip for the deposition. Based on my firm's time records, my own contemporaneous involvement, and discussion with W. Edgard Willman Trust/Lloyd C. Willman Estate, approximately 13 additional hours (not including travel time) were devoted to these deposition efforts by W. Edgard Willman Trust/Lloyd C. Willman Estate, for a total of 32 hours in pursuit of this litigation. Additional time was spent by W. Edgard Willman Trust/Lloyd C. Willman Estate with its counsel on numerous tasks associated with its service as a bellwether plaintiff.

34. Both Walters Bender Strohbehn & Vaughan, P.C. and Horn Aylward & Bandy, LLC timely record and maintain contemporaneous records of their time and expenses in the ordinary course of their businesses as complex litigation firms.

35. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), both firms submitted their common benefit time and expense submissions to Co-Lead Counsel in the MDL.

36. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients, who were not either bellwether or class representative plaintiffs.

37. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment. Any time entries that related to matters I felt involved clients who were not either bellwethers or class representative plaintiffs were not submitted to co-lead counsel. Further, as the time entries were later discussed with reviewing counsel, for those few entries that were difficult to identify as being related to work done in respect to a bellwether or class representative as opposed to an individual, I readily agreed to remove those from the bill.

38. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time and expense information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order.

39. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm is $2,573,422.50. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Hubbard, Dirk	Of Counsel	1,958.10	$525.00	$1,028,002.50
Bender, Thomas	Partner	1,739.10	$725.00	$1,260,847.50
Varney, Sarah	Paralegal	1,264.30	$125.00	$158,037.50
McAndrews, Patrick	Associate	224.80	$250.00	$56,200.00
Blake, Brooke	Associate	118.60	$250.00	$29,650.00
Milbourn, J. Brett	Partner	98.70	$400.00	$39,480.00
Stevens, Sarah	Paralegal	8.60	$125.00	$1,075.00
Renwick, Karen	Partner	0.20	$400.00	$80.00
Sichter, Michael	Associate	0.20	$250.00	$50.00
TOTALS		5,412.60		$2,573,422.50

40. In connection with this work, our firm dedicated large blocks of time to the common benefit of the class, particularly during the vetting and production of farmers for their depositions, along with all the associated discovery and document related issues. During this time, it was difficult to take on new cases or to take assignments of additional work in existing cases in which other counsel were available to accept the work if we declined.

41. My firm seeks $219,345.88 in expenses in connection with the prosecution of the litigation. Those expenses are summarized below:

Category Code	Description of Category Code	Amounts
1	Federal Express / Local Courier	$152.12
2	Postage Charges	$545.15
4	Long Distance Calls	$243.67
5	In-House Photocopying	$188.30
7	Hotels	$11,428.33

Category Code	Description of Category Code	Amounts
8	Meals	$374.58
9	Mileage	$4,139.69
10	Air Travel	$1,412.66
11	Deposition Costs	$1,693.89
12	Lexis/Westlaw/Bloomberg	$378.60
14	Court Fees	$400.00
17	Ground Transportation	$164.00
18	Miscellaneous	$3,224.89
19	Litigation Fund Assessment	$195,000.00
	TOTAL	**$219,345.88**

42. As part of my firm's request for expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order.

43. As a member of the Executive Committee, we did contribute capital contributions to the litigation fund for which we seek reimbursement. The amount we contributed was $195,000.00.

44. The expenses pertaining to this case are reflected in the records of my firm. These records are contemporaneously prepared from receipts, expense vouchers, check and credit card records and other documents and are an accurate record of the expenses.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 9th day of July, 2018, in Kansas City, Missouri.

Walters Bender Strohbehn & Vaughan, P.C. is a Kansas City based firm with a nationwide practice and reputation. We specialize only in trial work, including, particularly, class action cases and complex litigation involving predatory lending and other consumer protection issues. We also work in the areas of commercial litigation, insurance law, securities litigation and we handle catastrophic injury cases. Since our inception in 1991, we have been involved in representing both plaintiffs and defendants throughout the United States. Our efforts on behalf of plaintiffs have resulted in settlements and verdicts valued well in excess of $930 million dollars. The profiles of the talented attorneys and staff that make up our Firm can be viewed at www.wbsvlaw.com.

COMPLEX AND CLASS ACTION LITIGATION

The 15 attorneys in our Firm have been involved in a number of complex, multi-district and class action lawsuits during their respective careers, representing both plaintiffs and defendants. Our class action work includes cases concerning predatory lending, unlawful mortgage loan fees, securities fraud, life insurance premiums, shareholder derivative suits, products liability, deceptive trade and merchandising practices, anti-trust practices, commercial code violations, motor vehicle repossessions and employment benefits. Beyond these class cases, our Firm has been involved in nationwide litigation concerning hundreds of millions of dollars invested in allegedly abusive tax shelters, and we have obtained multiple million dollar settlements in cases involving sexual abuse by an athletic coach, the breach of a shareholder agreement and severe electrical shock injuries. We are always investigating new cases, exploring new and developing areas of the law, and incorporating the latest technology into our practice.

In the class action arena, on behalf of thousands of individuals, our Firm has achieved some truly extraordinary results as class counsel. For example, in 2007, as class counsel we successfully prosecuted and settled a consumer class action involving over 4,100 second mortgage loans that resulted in a $36.3 million dollar settlement. In 2008, we took to trial and achieved a jury awarded of $104 million dollars in favor of the plaintiffs' class of victimized second mortgage borrowers. In August 2012, we settled a number of class action cases involving over 3,200 second mortgage loans for over $160 million dollars. In 2013, we settled class claims in connection with more than 44,000 predatory loans made to borrowers throughout the United States and obtained an allowed claim in the amount of $300 million for these borrowers. In all, since 2007, our Firm has successfully obtained and gained court approval of no fewer than 28 class action settlements in various consumer protection cases. As a result, more than $690 million have been recovered on behalf of more than 82,000 class members that make up the various classes in the cases prosecuted by our Firm.

A listing of our representative complex and class action cases is set forth below.

AUGUST 2017

PREDATORY LENDING

Syngenta AG, et al., No. 16-2788-JWL-JPO*** ***Trans Coastal Supply Company, Inc. v. Syngenta AG, et al., No. 2:14-cv-02637-JWL-JPO*** ***The Delong Co., Inc. v. Syngenta AG et al., No. 2:17-cv-02614-JWL-JPO*** ***Agribase International Inc. v. Syngenta AG, et al., No. 2:15-cv-02279-JWL-JPO***	**Master File No. 2:14-MD-02591-JWL-JPO** **MDL No. 2591**

DECLARATION OF WARREN BELL

I, Warren Bell, declare as follows:

1. I am a partner of Westerfield, Janoush & Bell, P.A. Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. I have been practicing in the State of Mississippi for approximately 13 years. I have been involved in the following complex litigations: *In Re Genetically Modified Rice*

Litigation 4:06 MD 1811 CDP; *In Re: Oil Spill by the Oil Rig "Deepwater Horizon" in the Gulf of Mexico* MDL No. 2179; as well as this litigation with Syngenta.

4. My involvement with this litigation was working with class representative discovery including the Tennessee class representative in this litigation. I worked with class representative Jamerson Farms, including travelling to its farms to review documents necessary to respond to all information requested by the defendants, answering the interrogatories and requests for production, extensive communications to coordinate the responses, and all other work that was required of me.

5. Jamerson Farms also spent many hours working on responses to discovery requests. Jamerson Farms was selected and agreed to serve as a Tennessee class representative and in that capacity, responded to Syngenta's requests for production, which sought documents pertaining to numerous details about Jamerson Farms' farming operation and other information over significant time periods, and also called for personal financial information. The partners of Jamerson Farms, Gary and Larry Jamerson, conducted an extensive search to locate, and reviewed records, and had several discussions with me in order to understand the requests and properly respond. Gary made numerous trips to three different county FSA Offices, trips to the crop insurance agent, several trips to various third parties to obtain the seed records as well as the grain sales records at the elevators. The Jamersons spent a significant amount of time sorting through records at the office in order to respond to the interrogatories and the requests for production. Based on my time records, my own contemporaneous involvement, and discussion with the Jamersons, approximately 25-30 total hours were devoted to these tasks.

6. Our firm maintains contemporaneous records of its time and expenses in the ordinary course of business.

7. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

8. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients who were not either bellwether or class representative plaintiffs.

9. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

10. My billing is based upon actual time spent on representing the class representative in this litigation. My re-review of time spent was compared to all of the emails, letters and travel time spent.

11. After this re-review, I can confirm that this time was undertaken by me personally. I believe that the common benefit time and expense information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order.

12. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm is $23,560.00. A breakdown of the lodestar is provided below.

	Name	**Title**	**Total Hours**	**Hourly Rate**	**Lodestar**
1.	Bell, Warren	Partner	58.90	$400.00	$23,560.00
	TOTALS		58.90		$23,560.00

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July, 2018.

/s/ Warren Bell
Partner, Westerfield, Janoush & Bell P.A.

DECLARATION OF HART L. ROBINOVITCH

I, Hart L. Robinovitch, declare as follows:

1. I am a partner of Zimmerman Reed LLP ("Zimmerman Reed"). I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. I am a 1992 graduate of the University of Toronto Law School in Toronto, Ontario, Canada. I have been a member in good standing of the State Bar of Minnesota since 1993 and the State Bar of Arizona since 2001. I am also admitted to practice before the

following courts: the United States District Court for the District of Arizona, the District of Minnesota, and the Eastern District of Michigan; the United States Court of Appeals for the Sixth Circuit, the Eighth Circuit, the Ninth Circuit, and the Eleventh Circuit; and the United States Supreme Court. I started working at Zimmerman Reed as an associate attorney in 1994. I have been a partner at Zimmerman Reed since approximately 2003.

4. Since 1994, my practice has continuously focused on serving as class counsel in a variety of different types of class actions including, but not limited to, those involving consumer fraud, breach of contract, wage and hour law violations, deceptive trade practices, and mortgage and banking law violations, among other cases.

5. With offices in Minneapolis, Scottsdale, Arizona and Los Angeles, the law firm of Zimmerman Reed has extensive experience in the prosecution, trial, and settlement administration of a broad range of class actions and other types of complex litigation. Attached hereto is Zimmerman Reed's firm resume reflecting its role as lead or liaison counsel in MDLs, steering committee or sub-committee positions in MDLs, and lead counsel in class action lawsuits. Further details about the firm, its partners, and associates can be found on our website, www.zimmreed.com.

6. I have been found to be qualified to serve as lead and/or class counsel by numerous federal and state courts. By way of example, in 2016 I was appointed Interim Lead Counsel by United States District Judge R. Gary Klausner in *In Re Pacquiao-Mayweather Boxing Match Pay-Per-View Litigation*, MDL No. 2639 (C.D. Cal.).

7. In January 2017, along with my partners Carolyn Anderson and Brian Gudmundson, I was appointed co-lead counsel by United States District Judge Michael J. Davis

in *In re CenturyLink Residential Customer Billing Disputes Litigation*, MDL No. 2522 (D. Minn.).

8. In February 2018, I was appointed class counsel in *Park v. Zuffa, LLC, et al.*, No. 2:17-cv-02282-APG-VCF by United States District Judge Andrew P. Gordon when he preliminarily approved the class action settlement reached in that case.

9. I was also named class counsel in a consumer class action involving defective recreational vehicle refrigerators that eventually settled for $36 million. *See*, *Etter v. Norcold, Inc.*, No. SACV1300081JLSRNB [Doc. 539] (C.D. Cal. Oct. 24, 2016), and *Etter v. Thetford Corp*., No. SACV1300081JLSRNB, 2017 WL 1433312, at *1 (C.D. Cal. Apr. 14, 2017).

10. I recently served as counsel in *Longest v. Green Tree Servicing LLC,* No. 2:14-cv-08150 (C.D. Cal.), a case where we were able to negotiate a $46 million global settlement against Green Tree Servicing and Assurant with counsel in a related case in Florida. *See*, *Circeo-Loudon v. Green Tree Servicing, LLC*, No. 14-21384-CIV-MORENO (S.D. Fla.).

11. I was involved in litigating each of the following consumer class action lawsuits, certain of which were successfully resolved as class actions:

Gallant v. Gen. Mills, et al., Los Angeles County Superior Court, State of California, No. BC481325;

Tamas v. Gen. Mills, et al., Riverside County Superior Court, State of California, No. RIC1206341;

DeGrise v. Ensign Grp., Inc., et al., Sonoma County Superior Court, State of California, No. SCV248896 (settled as class action);

Monteuil v. Ensign Grp., Inc., et al., Los Angeles County Superior Court, State of California, No. BC449162 (settled); and

Pistilli v. Life Time Fitness, Hennepin County District Court, State of Minnesota, No. 27-CV-07-2300 (settled as class action).

12. I was one of the court-appointed class counsel in the following consumer class actions contending deceptive practices in relation to real estate financing and settlement practices:

Mitchell v. Chicago Title Ins. Co., Hennepin County District Court, State of Minnesota, No. 02-107299, 2003 WL 23786983 (Dec. 22, 2003.);

Schlink v. Edina Realty Title, Hennepin County District Court, State of Minnesota, No. 02-18380, 2003 WL 23786984 (Sept. 9, 2003);

Boschee v. Burnet Title Co., United States District Court, District of Minnesota, No. 0:00-cv-00194;

Boschee v. Burnet Title Co., Hennepin County District Court, State of Minnesota, No. 03-016986

Lund v. Universal Title Co., Hennepin County District Court, State of Minnesota, No. 05-00411;

Edwards v. Long Beach Mortg. Co., Hennepin County District Court, State of Minnesota, No. 02-16446, consolidated with *White. v. Wash. Mutual, Inc., et al.*, No. 03-1282, 2003 WL 22176087 (Sept. 16, 2003);

Nobles v. Countrywide Home Loans, Alameda County Superior Court, State of California, No. RG04138349;

Mahoney v. Fidelity Nat'l Title Co., United States District Court, Central District of California, No. SACV 08-0561; and

Lang v. Town and Country Credit, United States District Court, District of Minnesota, No. 00-CV-243.

13. I was also one of the plaintiffs' counsel handling over 50 class actions challenging distinct mortgage lender's escrow account servicing practices. Many of these class actions were consolidated before The Honorable James B. Zagel under *In re Mortgage Escrow Litigation*, MDL No. 899 (N.D. Ill.). The cases that I was involved in representing the class on include but were not limited to the following:

De Boer v. Mellon Mortg. Co., United States District Court, District of Minnesota, Court File No. 4-92-822, 64 F.3d 1171 (8th Cir. 1995);

Graham v. Knutson Mortg. Corp., Hennepin County District Court, State of Minnesota, No. 94-11043, 1996 WL 407491 (June 18, 1996);

Calkins vs. Fidelity Bond & Mortg. Co., United States District Court, Northern District of Illinois, No. 94-C-5971, 1998 WL 719569 (Oct. 8, 1998);

Miller v. Chevy Chase Bank, F.S.B., United States District Court, Northern District of Illinois, No. 97-CV-4494, 1998 WL 142394 (Mar. 24, 1998);

Mark v. KeyCorp Mortg., Inc., United States District Court, Northern District of Illinois, No. 95-C-4878, 1996 WL 465400 (Aug. 8, 1996); and

Goss v. Alliance Mortg., United States District Court, Northern District of Illinois, No. 95-CV-7324, 1997 WL 119918 (Mar. 4, 1997).

14. I was one of the class counsel in the following actions challenging mortgage lenders' practices paying yield spread premiums to borrower's mortgage brokers when interest rates were inflated above "par" rates:

Glover v. Standard Federal Bank, United States District Court, District of Minnesota, No. 97-2068;

Wilson v. Commercial Federal Mortg. Corp., United States District Court, Northern District of Alabama, No. 98-J-0184-S;

McBride v. Reliastar, United States District Court, Northern District of Georgia, No. 98-00215-1-CV; and

Schuetz v. Banc One, United States District Court, District of Arizona, No. 97-01295.

While those cases were initially certified for litigation purposes after extremely hard-fought class certification motions, those actions were subsequently decertified for reasons completely apart from satisfaction of the adequacy of counsel requirement, *i.e.*, the applicable legal standard for such claims changed. *Compare Culpepper v. Irwin Mortg. Corp.*, 253 F.3d 1324 (11th Cir. 2001), *cert. denied*, 534 U.S. 1118 (2002) *with Heimmermann v. First Union Mortg. Corp.*, 305 F.3d 1257 (11th Cir. 2002). *See also*, *Glover v. Standard Fed. Bank*, 283 F.3d 953 (8th Cir. 2002); *McBride v. Reliastar*, 58 Fed. App'x 835 (11th Cir. 2003); *Schuetz v. Banc One Mortg. Corp.*, 292 F.3d 1004 (9th Cir. 2002).

15. The courts in certain of the above-referenced actions have specifically commented on my abilities and qualifications to serve as class counsel. For instance, in *Edwards*, *supra*,

Judge Isabel Gomez certified a national class appointed me class counsel and later remarked at the Final Approval hearing:

> Here, there *is no doubt that the class has had competent counsel and, in fact, both sides have had counsel well beyond competent.* It's been a pleasure, so far as it can be a pleasure, to deal with such a complex case, which it can be, it's been a pleasure to have counsel of this quality on both sides.
>
> I wish you would together go out and teach seminars about class action litigation. It would make my life a lot easier.

Edwards, No. 02-16446, Excerpts from Transcript of Proceedings, p. 10:4-12 (Minn. Dist. Ct. July 19, 2005) (Final Approval Hearing). Similarly, in *Boschee*, *supra*, United States District Court Judge James M. Rosenbaum remarked in granting the plaintiff's motion for class certification from the bench and appointing me class counsel:

> There is no question that the counsel in this case have previously had experience in these kinds of cases and can adequately represent the class which they seek to certify.
>
> * * *
>
> The desirability of concentrating the suit in a particular forum, and it seems to the Court most appropriate that it be in a single form and this is now it, and the difficulties of managing a class. If the Court were to listen to some of the plaintive cries of the protectors who array themselves among the defense bar, this Court would be sheltered, coddled and cosseted beyond the dreams of a madman. I can handle this case and so can the lawyers on both sides, and I'm confident we'll be able to do so.

Boschee, No. 0:00-cv-00194, Excerpts from Transcript of Proceedings, pp. 37:11-13; 39:5-14 (D. Minn. May 22, 2001) (Motion for Class Certification).

16. Most recently, in my appointment as class counsel in *Park v. Zuffa, LLC*, the Honorable Andrew P. Gordon remarked:

> I want to congratulate all the counsel that's involved in this case for diligently working to achieve a reasonable and realistic settlement. I have, in my practice and time on the bench, seen too many I won't say frivolous but questionable lawsuits filed on cases, class action matters when things go bad… I applaud the plaintiffs' side for being realistic in evaluating and agreeing to mediation and trying to resolve cases and doing the preliminary investigation with an expert and -- and kind of setting this up right away. So I applaud everyone in this courtroom for their good efforts to get this resolved quickly and efficiently and ultimately

> assisting the consumers with a reasonable settlement that also is appropriate for the defense.

Park, No. 2:17-cv-02282-APG-VCF, Excerpt from Transcript of Proceedings, p. 23:11-25. (D. Nev. Feb. 22, 2018) (Motion for Preliminary Approval).

17. At that same hearing, counsel for defendants commented:

> I cannot say enough positive things about my adversaries. They were adversarial, don't get me wrong, and it was a very hard-fought mediation, but what they didn't do was prolong vexatiously litigation when it made much more sense for us to get together and resolve a problem that we knew our customers had and we wanted to make right as much as they wanted to make it right.

Id. at p. 19:2-9.

18. Since the inception of this case, I have worked closely with other professionals and paraprofessionals at my firm to litigate the claims of Rail Transfer, Inc. including, but not limited to Charles S. Zimmerman, senior partner and founder of Zimmerman Reed; Caleb L. Marker, a partner in our firm's California office; Alyssa J. Leary, an associate attorney in our Minneapolis office; associate attorney Brad Buhrow; and Sabine Asser King, a senior paralegal. Mr. Zimmerman is a 1972 graduate of the University of Minnesota Law School and has extensive experience leading class actions and MDL cases. Mr. Marker is a 2007 graduate of the Michigan State University College of Law and has significant experience litigating class action and consumer fraud cases. Alyssa J. Leary graduated magna cum laude from Tulane University Law School in New Orleans, Louisiana in 2015. Brad Buhrow was formerly an associate at Zimmerman Reed before leaving to join a family business in late 2016. Mr. Buhrow graduated cum laude from California Western School of Law in 2011. Sabine Asser King is a graduate from the George Washington University with a B.A. Ms. Asser King has over twenty years' experience as a Paralegal. I have also consulted and worked closely with members of the lead-MDL counsel's firms, including William Chaney and Drew York, throughout the process.

19. With respect to this case, Zimmerman Reed represented Rail Transfer, Inc., a transloading company based in St. Paul, Minnesota that was initially one of the putative Non-Producer class representatives named on the Non-Producer Plaintiffs' Amended Master Class Action Complaint (Doc. 1377). Rail Transfer was subsequently selected as a bellwether Plaintiff for the Non-Producer class. Further details about Rail Transfer's business operations can be found on its website at http://www.railtransfer.com.

20. In its role as a putative class representative and then as a bellwether Plaintiff, Rail Transfer and our firm engaged in significant work to help prosecute the claims of non-producers like Rail Transfer and to demonstrate the financial loss suffered from the Defendants' activities complained of. As outlined in Zimmerman Reed's contemporaneous time and expense records, throughout the course of the litigation, our firm assisted Rail Transfer in responding to discovery, including numerous requests for production and interrogatories that were served upon it. Many of the discovery requests served on Rail Transfer resulted in disputes that led to numerous meet and confer sessions with counsel for Defendants in effort to compromise and avoid motion practice. Ultimately, Rail Transfer's principal, Todd Nimmo, was deposed by Defendants' counsel for three full days (April 20-21, 2016 and August 24, 2016).

21. Our firm was also involved in dispositive motion practice, working diligently to successfully seek the dismissal of counterclaims that Defendants filed against Rail Transfer and other non-producers. (Doc. 1224, 1437, 1803)

22. Our firm was also involved in expert discovery as Rail Transfer retained an expert economist, James D. Woods, Ph.D. of BDO Consulting, a Division of BDO USA, LLP ("BDO"), who prepared a detailed expert report quantifying Rail Transfers' damages. Mr. Woods was

deposed in December 2016 in Dallas. I then took the deposition of Defendants' rebuttal expert, Quintin Mimms in April 2017 in Los Angeles.

23. From the outset of the case, Rail Transfer, along with our firm, sought to assist the larger group of non-producers in addressing wrongs complained of in the Non-Producer Plaintiffs Amended Master Class Action Complaint. Through the class certification filing deadline in mid-2016, our efforts aimed to benefit not only Rail Transfer, but the putative class of non-producers defined in the Non-Producer Plaintiffs Amended Master Class Action Complaint. Thereafter, Rail Transfer assumed the role of a court-selected bellwether plaintiff and through its continuing efforts continued to benefit the larger group of non-producers by prosecuting its individual claim as a test case representative of more widely contested issues. *See generally Bellwether Trials in Multidistrict Litigation*, 82 TUL. L. REV. 2323 (2008). All of this work, for which compensation is now sought, was conducted for the common benefit of the class.

24. As a putative class representative and then-bellwether plaintiff, Rail Transfer and its principal, Todd Nimmo, were intimately involved in the forgoing processes spending well over 100 hours working with our firm to respond to discovery and to help prosecute the case not only for its own interest, but for the benefit of the broader group of non-producers.

25. The work that the professionals at my firm performed in furtherance of the forgoing tasks are listed in detail on the contemporaneous time records that my firm maintains in the ordinary course of business. These records also list the expenses that our firm incurred with respect to the foregoing tasks, the most significant being the costs related to expert discovery.

26. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its

common benefit time and expense submissions to Co-Lead Counsel in the MDL. We also separately submitted our contemporaneous time and expense records relating to our representation of class representative Roger Ward to lead counsel in the Minnesota consolidated action, consistent with adopted protocols in that case.

27. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to any individual clients who were neither bellwether or class representative plaintiffs in the federal MDL proceedings. Time spent by Zimmerman Reed attorneys and staff performing litigation tasks for class representatives and related expenses in the Minnesota action have been segregated, separately submitted, and are not reflected in this declaration.

28. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment. I have personally reviewed the detailed, work-in-progress reports/time records kept contemporaneously by my firm and have verified that the information contained in such records is accurate. The billable rates for attorneys, paralegals, and legal assistants reflected on the report are the regular and customary rates charged by our firm at the time the work was performed.

29. Care was taken to bill only actual time devoted to the matter and, where possible, we utilized associate attorneys such as Ms. Leary and Mr. Buhrow with lower billable rates; tasks that did not require an attorney were performed by a paralegal such as Ms. King. Still, not all professional time devoted by Zimmerman Reed to this case has been submitted. In order to be reasonable and conservative, time entries for certain tasks and/or expenses were reduced or eliminated. For example, time spent keeping apprised of general developments in the litigation was not billed for and any duplicative time entries were eliminated.

30. After this re-review, I can confirm that the time submitted was undertaken by the members of my firm at my direction. I believe that the common benefit time and expense information submitted on behalf of my firm is accurate, reasonable, and in compliance with the Court's Common Benefit Order.

31. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for Zimmerman Reed LLP is $496,720.50. A breakdown of the lodestar is provided below:

	Name	Title	Total Hours	Hourly Rate	Lodestar
1.	Robinovitch, Hart L.	Partner	361.60	$795.00	$287,472.00
2.	Buhrow, Bradley C.	Associate	332.00	$375.00	$124,500.00
3.	King, Sabine A.	Paralegal	129.80	$275.00	$35,695.00
4.	Leary, Alyssa J.	Associate	96.70	$375.00	$36,262.50
5.	Marker, Caleb L.	Partner	9.70	$505.00	$4,898.50
6.	Zimmerman, Charles S.	Partner	5.90	$900.00	$5,310.00
7.	Harms, Leslie A.	Paralegal	3.40	$150.00	$510.00
8.	Cialkowski, David M.	Partner	3.00	$595.00	$1,785.00
9.	Cuppy, Heidi S.	Paralegal	1.00	$150.00	$150.00
10.	Colt, Karen M.	Paralegal	0.50	$275.00	$137.50
	TOTALS		943.60		$496,720.50

32. All partners and associates at Zimmerman Reed maintain very full caseloads. In performing the work in this case, as reflected above, Zimmerman Reed attorneys precluded themselves from taking on additional work in other cases.

33. My firm seeks $120,043.57 in expenses in connection with the prosecution of the litigation. Those expenses are summarized below:

Description of Costs	***Amount***
Category 1 – Federal Express Charges	$444.84
Category 2 – Postage Charges	$45.12
Category 4 – Long Distance Phone Charges	$36.63
Category 5 – Photocopying Charges – In House	$2,917.80
Category 6 – Outside Photocopying Charges	$158.74
Category 7 – Hotels	$2,845.05
Category 8 – Meals	$1,749.60
Category 10 – Air Travel	$3,252.53
Category 11 – Deposition Costs	$3,343.21
Category 12 – Lexis/Westlaw/Bloomberg/Pacer	$72.10
Category 13 – Expert Expenses	$103,028.94
Category 14 – Court Fees	$150.00
Category 17 – Ground Transportation	$1,449.46
Category 18 – Miscellaneous	$549.55
TOTAL	**$120,043.57**

34. As part of my firm's request for an award of expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order.

35. The expenses pertaining to this case are reflected in the records of my firm. These records are contemporaneously prepared from receipts, expense vouchers, check and credit card records, and other documents and are an accurate record of the expenses.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July, 2018, in Scottsdale, Arizona.

FIRM PRACTICE AND ACHIEVEMENTS

Zimmerman Reed is a nationally recognized leader in complex and class action litigation and has been appointed as lead counsel in some of the largest and most complex cases in federal and state courts across the country. The firm was founded in 1983 and has successfully represented thousands of consumers and injured individuals nationwide in significant and demanding cases. The firm's practice includes a wide range of legal issues and complex cases involving consumer fraud, ERISA, shareholder actions, environmental torts, pharmaceutical drugs, dangerous or defective products, human rights violations, and privacy litigation. Since 2010, Zimmerman Reed has earned a first-tier "Best Law Firm" ranking released by U.S. News & World Report.

ZIMMERMAN REED ATTORNEYS

Alia M. Abdi is an associate at Zimmerman Reed concentrating her practice on complex litigation involving consumer protection, and securities and financial fraud in state and federal courts. She is currently representing consumers alleging violations of the Telephone Consumer Protection Act.

Prior to joining the firm, Alia externed for the Honorable John R. Tunheim, Chief Judge of the United States District Court for the District of Minnesota. She lent her expertise as a summer law clerk at Arthur, Chapman, Kettering, Smetak and Pikala, P.A., conducting research on railroad, workers' compensation, and construction law. Alia graduated from the University of Minnesota Law School, where she served as the student managing director for the Maynard Pirsig Moot Court and was mock trial team captain for Phi Alpha Delta. Alia is admitted to the state courts of Minnesota and the U.S. District Courts for the District of Minnesota.

Carolyn G. Anderson is a Managing Partner at Zimmerman Reed and leads the firm's Securities & Financial Fraud, Antitrust, and Public & Attorney General practice groups.

Carolyn has successfully represented small investors, institutional clients, and states in individual and nationwide securities fraud, ERISA, and antitrust actions. She has served in a leadership role in obtaining significant recoveries in both individual actions and multi-state actions.

Carolyn is co-leading the legal team representing the State of Indiana in its investigation into pharmaceutical manufacturers, drug distributors, and pharmacies for their roles in the ongoing opioid crisis.
She is a member of the Lead Counsel Committee in nationwide litigation involving CenturyLink customers alleging they were overcharged and billed for services they didn't request or authorize. Carolyn is currently serving as Lead Counsel in a case representing the State of New Mexico. In that case, the State is alleging antitrust and unfair practices against Visa and MasterCard. Carolyn also served as Lead Counsel in an antitrust action, working with a coalition of four Attorneys General, against manufacturers of LCD displays. The case was filed in state court but removed to federal court under the Class Action Fairness Act (CAFA). After opposing this removal at the district court and the Fifth Circuit, the State petitioned the U.S. Supreme Court. The Supreme Court ruled unanimously in favor of

Mississippi, reversing the Fifth Circuit's decision and clarifying the standard for removal of state actions under CAFA. *Mississippi ex rel. Hood v. AU Optronics*, 134 S. Ct. 736 (2014).

Carolyn also represents the Office of Attorney General for the State of Mississippi, defending that Office in an action brought by Google, challenging the State's authority to issue a Civil Investigative Demand (CID). Google attempted to enjoin the Attorney General's CID authority and the district court granted that motion. In April, 2016, the State prevailed and the district court's decision was reversed by the Fifth Circuit.

Carolyn was also appointed Co-Lead Counsel on behalf of investors alleging losses due to Wells Fargo's securities lending program. The case settled for $62 million, two days before trial was set to commence. She serves as Interim Co-Lead Counsel in an ERISA matter pending in the District of Minnesota, against fiduciaries of U.S. Bancorp Pension Plan for violations of ERISA. Carolyn also served as Class Counsel on behalf of investors who had purchased bond funds from Morgan Keegan in a lawsuit that arose from the collapse of three mutual funds. The case also involved the auditor as a defendant. In 2016, a $125 million settlement was reached with the assistance of mediator Layn Phillips, a former U.S. Attorney and former United States District Judge.

In prior representation, Carolyn represented large groups of investors with significant losses involving Merrill Lynch, AIG, Boston Scientific, and Lehman Brothers. Carolyn also led a legal team in a case brought by investors against American Express Financial Advisors, challenging that company's practices and breaches of fiduciary duty with its investing customers. The case, brought under the Investment Advisor Act, resulted in a $100 million settlement. Carolyn also successfully represented Midwest farmers/shareholders who challenged an ethanol plant's merger with Archer Daniels Midland; she was appointed Class Counsel in that matter. The case was resolved weeks prior to trial. Carolyn was also appointed Lead Counsel in a securities fraud lawsuit involving Boston Scientific, representing a public pension fund and a certified class.

In addition to serving in positions of leadership in investor protection litigation, Carolyn currently represents *pro bono* one hundred not-for-profit organizations related to their losses from the $3.6 billion Petters Ponzi scheme, centered in Minnesota. She was appointed by the federal judge to serve as Assistant Liquidating Trustee under the supervision of the Court and the Liquidating Trustee for assets being distributed to some of those investors. In *U.S. v. Petters*, No. 08-cv-05348 (D. Minn.), the Firm worked with the Department of Justice and the court-appointed receiver, to successfully recover and distribute millions of dollars to victims pursuant to a settlement with one of the Petters financiers.

Carolyn maintains strong ties with the National Association of Attorneys General, individual state Attorneys General, state pension fund officers, and other institutional investors. She is a frequent lecturer at colleges and law schools, and has served as a legal education faculty member on the topics of complex litigation, legal ethics, the 2008 financial crisis, and securities law.

Carolyn currently serves as a board member and Chairperson for Children's Shelter of Cebu, an interdenominational ministry for abandoned and neglected children. She also serves as a board member with Bloomberg Law on its Litigation Innovation Board.

Carolyn graduated cum laude from Trinity College, where she received a Bachelor of Arts degree in Psychology. She received her law degree cum laude from Hamline University School of Law where she was a Dean's Scholar, received the Cali Award for Excellence in Constitutional Law, and served on Hamline Law Review, where her case note article was selected for publication. Carolyn also studied law at Hebrew University in Jerusalem, Israel in course-work focusing on Law, Religion, & Ethics. Carolyn was previously honored as Rising Star of Law, and since 2014 she has been recognized as a Super Lawyer by her peers in Minnesota.

Carolyn is admitted to practice before, and is a member in good standing of, the Bar of the State of Minnesota, the United States District Court for the District of Minnesota, the Court of Appeals for the Eighth Circuit and the First Circuit, and the U.S. Supreme Court. In addition to these courts, Carolyn works on cases with local counsel nationwide. She is a member of the Federal Bar Association, the American Association for Justice, the Minnesota Bar Association, and the Hennepin County Bar Association.

David M. Cialkowski is a partner with Zimmerman Reed, and dedicates a substantial portion of his practice to the area of complex and mass tort litigation, with a primary focus on consumer protection and products liability litigation.

David was a member of the legal team that represented the Mississippi Attorney General's Office in Mississippi ex rel. Hood v. AU Optronics, 134 S. Ct. 736 (2014), an antitrust case against manufacturers of LCD displays in which the Court held that an attorney general's parens patriae case is not a "mass action" under the Class Action Fairness Act. The Supreme Court ruled unanimously in Mississippi's favor. He served as a member of the Plaintiffs' Steering Committee in In re Apple iPhone 3G and 3GS "MMS" Marketing and Sales Practices Litigation, a consumer protection class action, MDL 2116, based in New Orleans, Louisiana. He worked extensively on the Levaquin MDL trial team on behalf of clients who experienced tendon ruptures and tears after taking the popular Johnson & Johnson antibiotic. He also served as court-appointed co-lead counsel in In re Dockers Roundtrip Airfare Promotion Sales Practices Litigation, a consumer protection class action based in the U.S. District Court for the Central District of California. David has worked extensively on behalf of plaintiffs in In re St. Jude Silzone Heart Valves Product Liability Litigation, MDL 1396. He has also contributed substantially to pretrial summary judgment and class certification briefing in the Fedex Ground Package Systems employment status litigation, MDL 1700. David represented residents of Minot, North Dakota, in In re Soo Line Railroad Company Derailment of January 18, 2002 in Minot, N.D., who were injured by the toxic spill caused by the derailment of a Canadian Pacific Railway train, and helped draft federal legislation clarifying the scope, and thus reducing courts' application, of railroad preemption.

David earned his undergraduate degree from the University of Illinois's College of Liberal Arts and Sciences *cum laude* with High Distinction in the Department of English. Additionally, he participated in the honors program as a James Scholar, received the Elizabeth and Charles Ellis

Merit Scholarship, and is a member of Phi Beta Kappa. David graduated from the University of Illinois College of Law, where he participated in the civil litigation clinic, was an editor for the Poetic Justice literary magazine, and was voted one of the top ten percent of university teaching assistants.

David is licensed to practice and a member in good standing, for the Bars of the State of Minnesota and the State of Illinois. His professional associations include membership in the Minnesota State Bar Association and Hennepin County Bar Association. David has been recognized as a Rising Star of Law from 2006–2008, 2010-2013 and a Super Lawyer from 2015 to 2017.

Benjamin Gubernick is a seasoned trial attorney and entrepreneur. He takes a creative approach in obtaining the best possible outcomes for clients. His practice focuses on complex litigation and consumer class actions. Prior to joining the firm, Ben worked as a prosecutor, specializing in major financial crimes. He has successfully tried numerous cases to jury verdict. His courtroom successes include a high-profile Ponzi scheme case that resulted in convictions on all counts after a month of trial. Prior to beginning his career as a plaintiff-side litigator, he co-founded a venture-backed software startup in Ann Arbor, Michigan.

Ben received his J.D. from the University of Michigan Law School, graduating cum laude. He also holds a B.A. in English and History, graduating magna cum laude, from the University of Arizona. Ben is licensed to practice law in New Mexico.

Brian C. Gudmundson is a partner and concentrates his practice on complex litigation and commercial class actions, including the areas of Consumer, Antitrust, Securities & Financial Fraud, Intellectual Property, and Sports Law. Brian represents individuals, businesses, and public and private institutional clients in a variety of complex cases.

Brian is a member of the Lead Counsel Committee in a nationwide action challenging CenturyLink, Inc's alleged systematic and deceptive sales and overbilling practices, MDL 2795. He is appointed to Plaintiffs' Executive Committee in *In re: Fieldturf Artificial Turf Marketing Practices Litigation,* MDL 2779, representing schools, universities, municipalities, and private companies around the country that purchased allegedly defective artificial turf prone to rapid degradation. He is appointed co-lead counsel in *In re: Arby's Restaurant Group, Inc., Data Security Litig.,* 17-cv-00514, (N.D. Ga.), representing banks and credit unions who issued payment cards that were subject of alleged data breach. Brian is also a member of the Plaintiffs Executive Committee representing United Health Group insurance plan participants alleging that UHG illegally inflated and clawed back prescription copays. He is a member of the Plaintiffs Executive Committee representing consumers insured by Cigna Health Insurance Co. *In re: Negron v. Cigna Corp., et al.,* 16-cv-01702 (D. Conn.) alleging that Cigna Health illegally inflated and clawed back prescription copayments. He is a member of the Plaintiffs Executive Committee representing Humana insurance plan participants alleging that Humana illegally inflated and clawed back prescription copayments, *In re: Humana, Inc. PBM Litig.,* 16-cv-00706 (W.D. Ky.). Brian is a member of Plaintiffs Executive Committee in *In Re General Mills Glyphosate Litigation*, Case No. 16-cv-2869-MJD-BRT, asserting deceptive sales practices based upon alleged presence of glyphosate in products labeled "100% natural" and in *Vikram Bhatia, D.D.S. v. 3M Company*, 16-cv-01304-DWF-TNL, asserting claims on behalf of dentists and dental practices for

allegedly defective dental crown products. Brian is appointed to serve on the Plaintiffs' Steering Committee on behalf of financial institutions nationwide *In re: Equifax Data Breach,* MDL 2800, representing banks and credit unions in recovering losses. He is a member of the Plaintiffs' Steering Committee in *In re: Vizio, Inc. Consumer Privacy Litigation*, MDL 2693, asserting violations of state and federal law for unlawful collection and sale of private consumer data. He is co-lead counsel in *GLS Companies, et al. v. Minnesota Timberwolves Basketball LP*, challenging implementation of paperless ticketing system and restrictions on transfer of game tickets on behalf of ticketholders. Brian is also a member of the Plaintiffs' Steering Committee in the Home Depot Data Breach MDL 2583 and in *First Choice Fed. Credit Union v. The Wendy's Co.*, 16-cv-00506 (W.D. Pa.) representing banks and credit unions in recovering losses. Brian represents retired NHL players alleging the National Hockey League minimized concussion risks from its players for decades, MDL 2551. Brian is a member of the lead counsel team that achieved a $39 million settlement on behalf of banks and other financial institutions in recovering losses due to the 2013 Target data breach, MDL 2522. He is also a member of the lead counsel team that achieved a $50 million settlement on behalf of retired National Football League players in a class action against the League for the unauthorized use of former players' identities to generate revenue *In re: Dryer v. National Football League,* 09-cv-02182 (D. Minn.). He represents hundreds of individual retired NFL players in claims arising from concussive head injuries suffered while NFL players, MDL 2323. Presently, Brian represents MoneyGram Payment Systems, Inc. in claims against several Wall Street banks alleging over $400 million of losses due to the fraudulent sale of securities containing undisclosed, toxic mortgage-based assets. He also specializes in claims under the RICO Act and currently represents multiple non-profit and faith-based investors pro bono in RICO claims arising from the $3.5 billion Petters Ponzi scheme.

Brian served as court-appointed co-lead counsel in *In Re: Dockers Roundtrip Airfare Promotion Sales Practices Litigation* (C.D. Cal.), which culminated in a multimillion dollar settlement on behalf of a nationwide class of consumers. In 2005, Brian was part of a securities litigation team that achieved a $2.5 billion settlement against AOL-Time Warner on behalf of investors.

Brian received his BA from the University of Minnesota and his JD, *cum laude*, from the University of Minnesota Law School. Brian is admitted to the state courts of Minnesota, the U.S. District Courts for the District of Minnesota and the Northern District of Illinois, and the Tenth Circuit Court of Appeals. Brian has been recognized as a Rising Star of Law 2010-2016 and a Super Lawyer in 2017.

June P. Hoidal is an partner representing individuals and businesses who experienced losses as a result of securities and consumer protection and antitrust violations. Currently represents the State of Indiana in its investigation of claims related to the manufacturing, distribution, advertisement, dispensing, and marketing of opioid pain killers. She is a member of the legal team representing the State of Mississippi in an antitrust action against manufacturers of LCD screens. Her work included assisting with briefing before the U.S. Supreme Court, which unanimously ruled in favor of Mississippi by finding the State's *parens patriae* action was not removable to federal court. *Mississippi ex rel. Hood v. AU Optronics*, 134 S. Ct. 736 (2014). June also represented investors alleging losses due to Wells Fargo's securities lending program, a case that settled two days before trial was set to commence for $62 million. She currently represents the State of New Mexico in a matter against Visa and MasterCard, alleging antitrust

and unfair practices; participants of the U.S. Bancorp Pension Plan alleging violations of ERISA; and investors of Medtronic in a shareholder derivative case.

Prior to joining the firm, June served as a judicial law clerk to the Honorable Arthur J. Boylan on the United States District Court for the District of Minnesota. She gained substantial experience following law school at two law firms in Washington, D.C. and Minneapolis, practicing in diverse subject areas, including contract disputes, franchise, products liability, insurance, and employment law.

June currently serves as a board member and as the lead co-chair of the Associates Campaign for The Fund for Legal Aid. She also currently serves as a member of the Advisory Board for the Minnesota Urban Debate League and the Publications Committee for the Bench & Bar of Minnesota. Previously, she served as a Commissioner for the City of Saint Anthony Parks Commission, and a member of the Diversity Committee and the Women in the Legal Profession Committee of the Minnesota State Bar Association. In addition, June volunteered as an assistant debate coach for the Minnesota Urban Debate League and worked pro bono for Legal Assistance of Dakota County, Volunteer Lawyers Network, and The Advocates for Human Rights.

June graduated cum laude from the University of Minnesota Law School in 2003, where she was the Lead Managing Editor for the Minnesota Law Review and a member of the Dean's List. She is admitted to the state courts of Minnesota and the U.S. District Courts for the District of Minnesota. June has been recognized as a Rising Star of Law in 2007, 2015-2017.

Jason P. Johnston is a partner at our Minneapolis office, focusing primarily on complex cases involving individuals injured by defective drugs and faulty medical devices, advocating for clients both locally and nationally. Jason's personal engagement, resolute view of the law, and solid practice style make him a strong voice for his clients and an integral part of our firm.

Jason represents clients injured from defective orthopedic hip devices manufactured by DePuy, Biomet, Stryker, Smith & Nephew and other manufacturers of hip replacement systems. In the Stryker Rejuvenate and ABG II Multidistrict Litigation (MDL), Jason represents patients who experienced serious health complications as a result of a modular hip that was recalled from the market. Jason also serves as a member of the Plaintiff Steering Committee in the Stryker LFIT V40 MDL. During the Biomet M2a hip litigation, Jason was a member of the Plaintiffs' Science Committee where he reviewed technical documents and participated in depositions involving the design and development of the hip implant systems. In the Zimmer NexGen knee litigation, Jason serves as a member of the Plaintiffs' Steering Committee and has played an active role in the science and discovery phases of the litigation, as well as preparing cases for trial.

Jason's medical device litigation experience extends beyond orthopedic devices, including, representing clients injured by defibrillators and leads manufactured by St. Jude, Medtronic, and Guidant. In the Medtronic Sprint Fidelis litigation, Jason served as a member of the Claims Review Committee following a mass settlement involving Sprint Fidelis leads. He has also represented plaintiffs injured by various pharmaceutical drugs, including, Abilify, Invokana, Viagra, Avandia, Aredia/Zometa, testosterone replacement therapy drugs, and other medications.

Jason has participated in pro bono service during his career, including accepting cases in the District of Minnesota's Federal Pro Se Project which provides *pro se* plaintiffs with volunteer counsel to improve access to justice in the Federal Courts. Jason is also an active member of the American Association for Justice and the Minnesota Association for Justice. In 2016, the Minnesota Association for Justice recognized Jason as the "Member of the Year" for his contributions to the organization.

Since 2014, Jason has been selected as a Minnesota Rising Star of Law by Super Lawyers a distinction award given to only 2.5% of attorneys in the state. In addition, Jason has also been selected as a member of The National Trial Lawyers Top 100 Trial Lawyers and Top 40 Under 40. A graduate of the University of St. Thomas School of Law, he was recognized by the Minnesota Justice Foundation for his pro bono service while attending law school. Prior to law school, Jason attended Winona State University, earning his Bachelor of Science degree, magna cum laude, in Marketing.

Jason is admitted to the state courts of Minnesota and U.S. District Court for the District of Minnesota.

Andre S. LaBerge brings over twenty years of professional experience – as an attorney and as a business executive – in his advocacy for the rights of investors and consumers, providing counsel to several of the firm's practice areas. He has represented participants in Wells Fargo's securities lending program, investors with losses in Morgan Keegan open end bond funds, and the Office of Attorney General in the LCD antitrust litigation.

Andre has practiced law in Chicago and Minneapolis, and has represented clients at all court levels and in various regulatory forums. He has also served as Vice President, Chief Compliance Officer, General Counsel, and FINRA Registered Principal and Designated Supervisor in the financial services industry with companies that supervised and supported large numbers of securities brokers, financial planners, and insurance agents.

Andre is a graduate of DePaul University College of Law, where he was a Senior Editor for the Journal of Health and Hospital Law, and worked as a Mansfield Foundation Fellowship intern at Southern Minnesota Regional Legal Services. He is a member of the Minnesota State Bar Association and the Hennepin County Bar Association.

Michael J. Laird is an Associate at Zimmerman Reed focusing on the areas of sports law and consumer protection. He currently supports the firm's efforts in representing retired NHL & NFL players in separate lawsuits alleging that the chronic cumulative effects of concussions were minimized.

A magna cum laude graduate of the University of Minnesota Law School, Michael served as a member of the Journal of Law, Science & Technology, and a member of the American Bar Association Moot Court team. While in law school, Michael also started a medical-legal partnership with the Phillips Neighborhood Clinic to identify and resolve legal issues affecting patient care and well-being in under-served communities, as a member of the Community Practice and Policy Development Clinic.

While in law school, Michael externed for the Honorable Jeffrey J. Keyes of the United States District Court for the District of Minnesota. He also was a law clerk for both the Bad River Band of Chippewa Indians Natural Resources Department and the Minnesota Pollution Control Agency. Michael is licensed to practice law in Minnesota.

Alyssa J. Leary focuses her practice on environmental and consumer protection law. In environmental protection, Alyssa represents corn farmers and exporters in the Syngenta litigation who suffered economic harm from the release of Syngenta's unapproved, genetically modified corn strain. She also represents farmers whose crops have been damaged by off-target drift from dicamba herbicides in litigation against Monsanto. In consumer protection, Alyssa is part of the team representing consumers alleging Pacquiao and his promoters kept his shoulder injury secret prior to the highly publicized Pacquiao-Mayweather Pay-Per-View fight.

Alyssa graduated magna cum laude and Order of the Coif from Tulane University Law School and holds a Certificate in Environmental Law. While at Tulane, she worked as an editor for the Tulane Law Review, and studied economic and environmental issues in Brazil.

In addition to her law degree, Alyssa holds a Master of Science in Resource Conservation and a Certificate in Natural Resource Conflict Resolution from the University of Montana. She obtained a Bachelor of Science degree in Biology/Natural Science from the University of Puget Sound.

Prior to joining Zimmerman Reed, Alyssa worked as a renewable energy and construction law attorney and interned at the U.S. Attorney's Office for the Eastern District of Louisiana, the U.S. Marshals Service Office of General Counsel in Washington D.C., and also for the Cottonwood Environmental Law Center in Bozeman, Montana. She serves on the ReGenerateMN Steering Committee for the Minnesota Center for Environmental Advocacy. Alyssa is licensed to practice law in Minnesota and Texas.

Daniel T. Lindquist is an associate at Zimmerman Reed, with his practice concentrating in the firm's Public & Attorney General practice and complex and mass tort litigation practice group. He is a member of the consumer fraud litigation team representing the State of New Mexico in the Visa/MasterCard Interchange litigation, conducted case investigation in representing schools and athletic facilities in the FieldTurf litigation, is part of the drug and device team, preparing discovery, briefs, and deposition preparation, and currently is part of the firm's opioid litigation team.

Daniel received his law degree from the University of Michigan Law School, where he served as a lead Article Editor of the Michigan Business & Entrepreneurial Law Review and participated in the Henry M Campbell Moot Court. He earned his Bachelor of Arts in Economics from Wheaton College. He served as a judicial extern to the Honorable Jeffrey J. Keyes of the United States District Court for the District of Minnesota. He is admitted to practice law in Illinois, Minnesota, and Missouri.

Prior to joining Zimmerman Reed, Daniel worked at a Chicago law firm on cases involving antitrust violations, corporate law, employment, law, regulatory compliance and securities

fraud related to auction rate securities and mortgage backed securities. Daniel's extensive experience in e-discovery includes the following subject matters: Antitrust review in proposed hospital system merger; corporate law regarding alleged breach of fiduciary duties; Employment law in age discrimination and wrongful termination lawsuits; EPA/DEC environmental regarding superfund site; regulatory compliance regarding FCPA investigation; regulatory compliance regarding pseudoephedrine sales; securities fraud allegations regarding auction rate securities and mortgage-backed securities; and securities law claims regarding private-label, residential mortgage-backed securities.

Caleb LH Marker is a partner at Zimmerman Reed, working out of the firm's Los Angeles office. Caleb has dedicated a significant portion of his practice to consumer protection and employment cases, including consumers, misclassified employees, mortgage borrowers, student loan borrowers, and senior citizens.

Caleb is a creative litigator who has been a leader in the consumer protection area and has been actively involved as class counsel in cases that have provided meaningful recoveries, through trial or settlement. He has first-chair trial experience in court and arbitration, having tried several cases to verdict and award. In 2016, he tried the first merits arbitration in the United States that alleged that a "gig economy" worker was an employee as opposed to an independent contractor and has continued to try and advance such cases in arbitration and courtrooms. He has briefed and argued appeals in California, Michigan, and the Ninth Circuit.

Caleb is currently part of the ZR team representing the State of Indiana in its investigation into pharmaceutical manufacturers, drug distributors, and pharmacies for their roles in the ongoing opioid crisis. Caleb also represents tobacco consumers as a member of the plaintiffs' steering committee for *In Re: Santa Fe Natural Tobacco Company Marketing and Sales Practices Litigation* (MDL 2695) currently pending in the U.S. District Court for the District of New Mexico. The Santa Fe MDL was recently the subject of an in-depth article published by Bloomberg Businessweek in an article entitled "Nature's Cancer Sticks: American Spirits Long, Strange Trip to Court."

In recent years, Caleb's successes include leading a class action against the City of Los Angeles and Xerox that drew widespread media attention, winning a trial that now requires the City to end its decades-long outsourcing of the City's parking violations bureau in a case that will help over a hundred thousand motorists in Los Angeles in the next few years. Caleb later defended the trial court's verdict on appeal, resulting in a unanimous opinion fully affirming the trial court's verdict and award under the private attorney general doctrine. *Weiss v. City of Los Angeles*, 2 Cal. App. 5th 194 (August 8, 2016).

Caleb has been a driving force in a number of class actions that have resulted in eight-figure settlements, including actions that have involved misclassified employees, homeowners that have fallen victim to force-place insurance practices, patients at understaffed nursing homes, consumers of dangerous gas absorption refrigerators, and student loan borrowers who were overcharged for interest.

Caleb serves on the Los Angeles County Bar's Litigation Executive Committee and Access to Justice Committee, the latter of which aims to maximize the delivery of legal services to the

poor and encourage attorneys to provide free legal services to those in need. Several of his successes have been recognized as a "Top Settlement & Verdict" by the Los Angeles Daily Journal and Michigan Lawyers Weekly. He has been interviewed by numerous media outlets, including NBC, Fox Business, NPR, *The Wall Street Journal*, AP, the *Los Angeles Times*, *LA Weekly*, and Law360. He has also been recognized as a Rising Star of Law in Southern California by Super Lawyers from 2015-2018, after a peer-nomination and review process awarded to less than 2.5% of attorneys under 40.

A native of Michigan, Caleb graduated from Michigan State University's James Madison College and College of Law. He is a member of the Los Angeles County Bar Association (LACBA), Duke Law's Bolch Judicial Institute and Electronic Discovery Reference Model (EDRM), the Federal Bar Association (FBA), the American Association for Justice (AAJ), Consumer Attorneys Association of Los Angeles (CAALA), and Consumer Attorneys of California (CAOC).

Bryce D. Riddle concentrates his practice on complex litigation and commercial class actions in the areas of Sports Law, Data Breach, and Consumer Protection. Currently, Bryce works on the team representing retired NHL players alleging the National Hockey League failed to minimize concussion risks for its players for decades. In data breach litigation, he represents financial institutions in cases against The Home Depot and Wendy's to recover losses arising from breaches that compromised customer financial information. Bryce also works on the Vizio consumer privacy litigation asserting violations of state and federal law for the unauthorized collection and sale of customers' private and personal data.

Bryce graduated cum laude from the University of Minnesota Law School in 2014, where he was a member of the Minnesota Journal of International Law and a Dean's Scholarship recipient. While in law school, he participated in the Student Exchange Program in Milan, Italy at Bocconi University School of Law and also externed for the Honorable David S. Doty of the United States District Court for the District of Minnesota. He subsequently served as a judicial law clerk for the Honorable Elizabeth V. Cutter and the Honorable Bridget A. Sullivan in Minnesota's Fourth Judicial District. Bryce is licensed to practice law in Minnesota and California state courts, as well as federal court in the District of Minnesota.

Christopher P. Ridout is a partner working in the firm's Los Angeles, California office practicing in the areas of complex litigation including consumer protection, labor and employment, unfair business practices, false advertising, toxic tort, commercial and residential hazardous substance exposure.

Chris was appointed to serve on the Plaintiffs' Executive Committee in the iPhone Device Performance Litigation alleging that Apple released a software update that deliberately diminished the battery life of older devices forcing customers to spend hundreds of dollars on replacement batteries and new phones. He was appointed as co-interim lead counsel representing a class of consumers in a mislabeling lawsuit alleging that Celestial Seasonings tea products falsely claim to be "all natural" when they contain pesticide residue from the agricultural process. In consumer litigation, Chris represents classes of consumers and employees in connection with data breaches that have compromised personal, financial, medical, and employment information. He represents a class of GM diesel truck owners

alleging that the DMAX diesel engine design is defective causing a reduction in fuel efficiency by 25-30 percent. He served as class counsel reaching a $52 million settlement on behalf of customers alleging the billing practices of the Los Angeles Department of Water contained excessive fees and inflated rates, and that the charges to customers exceeded the costs of provided water and power services. Chris obtained a $36 million settlement representing RV owners in a class action lawsuit alleging that Norcold knew of a potentially dangerous RV refrigerator fire risk, but hid that information from the public. He also advocates on behalf of musicians and entertainers in Internet-related copyright and royalty disputes.

Over the last decade, Chris has been involved in the resolution of a series of class action lawsuits including a settlement of more than $24 million on behalf of misclassified employees, an $11.5 million settlement for Michigan students loan borrowers over an interest rate dispute, a $9 million settlement claiming Naked Juice violated state and federal laws regarding the marketing and sale of its product, and a multi- million dollar award for residents of various nursing home facilities alleging widespread and intentional failure to provide sufficient care to the residents due to understaffing.

Chris attended Harvard University where he received his Bachelor of Arts Degree in 1986. While focusing on his major of American History, he was a member of the Harvard Varsity Football Team and played in the historic 100th Harvard-Yale match-up commonly referred to as "The Game." In his senior year, Chris was awarded the "William Payne LeCroix Memorial Award" given to that team member exhibiting the most loyalty and dedication to the Harvard Varsity Football Team.

After graduating from the University of the Pacific McGeorge School of Law in 1989, he was admitted to the California Bar that same year. He has also been admitted to practice before the United States District Court for the Southern, Central, and Northern Districts of California; the United States District Court for the District of Colorado; the United States District Court for the District of Minnesota; the United States District Court for the Northern District of Ohio; and the United States Court of Appeals for the Ninth Circuit.

Hart L. Robinovitch is a partner with Zimmerman Reed, working in the firm's Scottsdale, Arizona office. Hart focuses his practice in the areas of consumer and shareholder actions, and sports law.

Hart currently represents corn farmers and DDGS exporters in the Syngenta Viptera Litigation who have experienced the effects of China's ban of U.S. corn and corn-derived products, suffering lower prices, decreased sales and other losses as the prices of U.S. corn has decreased. He is a member of the lead counsel team representing retired NHL players alleging the National Hockey League minimized the chronic cumulative effects of concussion risks from its players for decades. Hart also represents clients in a class action lawsuit on behalf of RV owners alleging that Norcold knew of a potentially dangerous RV refrigerator fire risk, but hid that information from the public.

Hart has been involved in numerous state and federal court lawsuits around the country challenging the misclassification of entertainers as independent contractors opposed to employees in the nightclub industry. He also represented consumers in other actions alleging

deceptive and unlawful business conduct towards customers including, but not limited to, false advertising practices, "bait and switch" tactics, altering contractual terms without valid consideration, and retailers' requests and/or requirements that their customers provide personal identification information when they complete a transaction using their credit card, in violation of state and/or federal statutes. In addition, Hart represented residents of various skilled nursing facilities alleging pervasive and intentional failure to provide sufficient direct nursing care staffing resulting in harm to the residents.

For the past decade, Hart has represented clients in a series of class action lawsuits contesting mortgage lenders' excessive billing and deposits practices for mortgage escrow accounts. Hart is now involved in numerous federal court lawsuits around the country alleging that mortgage banks and lenders have violated federal and state laws. These cases allege payment of kickbacks and/or illegal and unearned referral fees by the banks and lenders to mortgage brokers who refer mortgage clients who are then charged inflated interest rates on the mortgages. In addition, he represents consumers in other actions contesting the imposition of overcharges and improper fees or other contractual violations in various mortgage transactions. He has worked with co-counsel in state and federal courts across the country.

A native of Canada, Hart earned his degree from the University of Toronto Law School in 1992 where he served as an Associate Editor on the University of Toronto Faculty of Law Review. He received his Bachelor of Science degree in 1989 from the University of Wisconsin-Madison.

Hart is admitted to practice before, and is a member in good standing of, the Bars of the States of Arizona and Minnesota and the United States District Court for the Districts of Arizona, Minnesota, and the Eastern District of Michigan. Hart is also licensed to practice law before the United States Courts of Appeals for the Sixth, Eighth, Ninth, and Eleventh Circuits, and the United States Supreme Court. Hart's memberships include the National Association of Consumer Advocates and Canadian American Bar Association.

J. Gordon Rudd, Jr. is a managing partner at Zimmerman Reed, representing clients in the areas of mass tort, consumer protection, and employment law. Gordon has been appointed class counsel in cases venued in both state and federal courts across the country.

Gordon was recently part of the team that achieved a $50 million settlement in the complicated court fight over publicity rights for retired NFL players. In a separate lawsuit, he represents hundreds of retired NFL players suffering from concussive head injuries that occurred while playing in the league. Gordon also represented thousands of individuals injured by the largest release of anhydrous ammonia in U.S. history. Two of those individuals were awarded $1.2 million by a jury. Eventually, these trials led to a settlement on behalf of other residents of Minot, North Dakota injured by the derailment. Currently, he is representing hundreds of homeowners whose properties have been exposed to a toxic chemical vapor called trichloroethylene (TCE).

In Mass Tort litigation, Gordon leads several cases, including representing clients who experienced uncontrollable urges to gamble while taking top-selling prescription drug Abilify, representing nursing home residents sickened by a Hepatitis C outbreak (the second-largest outbreak of the disease in U.S History), men who have suffered cardiovascular injuries

following their use of testosterone therapy supplements, and clients who experienced severe bleeding problems while taking Xarelto.

Gordon is also working on a number of multi-district litigation cases. Gordon is a member of the lead counsel team representing banks and other financial institutions seeking recovery of losses from the 2013 Target data breach. He also holds leadership positions on several Plaintiffs' Steering Committees including *In re H&R Block IRS Form 8863 Litigation*, MDL 2474, *In re Life Time Fitness, Inc., Telephone Consumer Protection Act (TCPA) Litigation*, MDL 2564, *In re FedEx Ground Package System, Inc.*, MDL 1700, and *In re Building Materials Corp. of America Asphalt Roofing Shingle Products Liability Litigation*, MDL 2283.

Gordon graduated from Connecticut College, where he received a Bachelor of Arts degree in English Literature & Government. He received his law degree from the University of Cincinnati College of Law. Gordon is licensed to practice before, and is a member in good standing of, the Bar of the State of Minnesota and the United States District Court for the District of Minnesota. Gordon is admitted to the United States Court of Appeals for the Eighth Circuit. He has been admitted to appear pro hac vice in cases pending in the states of California, Oregon, Arizona, New Mexico, Texas, North Dakota, Ohio, Florida, Georgia, Tennessee, and Michigan. Since 2006, Gordon has been selected as a Super Lawyer by his peers in Minnesota.

Behdad C. Sadeghi focuses his practice on complex litigation involving consumer protection, securities fraud, and financial fraud in state and federal courts around the country.

Behdad worked on the team representing investors who sustained losses as a result of alleged federal securities law violations by Morgan Keegan and its affiliates that achieved a $125 million settlement. He also represented a class of financial institutions who suffered losses resulting from a major data breach in a class action against the Target Corporation that resulted in a $39 million dollar settlement. In consumer litigation, he successfully achieved a multi-million dollar wrongful death settlement against a major automobile manufacturer, and a settlement on behalf of a group of elderly victims of one of the largest hepatitis C outbreaks in the nation's history. He also represents a putative class of consumers alleging violations of the Telephone Consumer Protection Act by Papa Murphy's and SuperAmerica.

Behdad graduated magna *cum laude* from William Mitchell College of Law, where he was a member of the William Mitchell Journal of Law and Practice and the Niagara International Moot Court Team; he also participated in the school's Civil Advocacy Clinic. His academic honors include a CALI Excellence for the Future Award, four Dean's List honors, and a Burton Award Nomination for Excellence in Legal Writing. Behdad is licensed to practice law in Minnesota.

Charles R. Toomajian, III is an associate at Zimmerman Reed concentrating his practice in the consumer protection area and representing individuals injured by defective drugs or faulty medical devices. In the consumer protection context, Chuck represents public entities seeking recovery and finding solutions for the rampant harm caused nation-wide by the opioid crisis. He has also successfully represented individuals with claims under the TCPA. In the medical arena, he represents patients who took Abilify and experienced financial devastation as a result of compulsive gambling associated with the top-selling drug and patients who experienced

severe injuries after taking the diabetes drug, Invokana. He also supports the firm's efforts in helping patients and families affected by the Stryker LFIT V40, involving recalled femoral heads that have been associated with hip replacement failure. Prior to joining Zimmerman Reed, Chuck worked at a multi-state trial and litigation firm advocating for injured clients.

A magna cum laude graduate from the University of Minnesota Law School, Chuck was a symposium editor for Law and Inequality: A Journal of Theory and Practice. He was a three-year consecutive Dean's List recipient and received the First Amendment law Book Award, a prestigious award for having the highest score in the class. He externed for the Honorable Mark Wernick of the Hennepin County District Court where he prepared and drafted memoranda and conducted legal research. He holds a Bachelor of Arts in English from Williams College. Chuck is licensed to practice before, and is a member in good standing of, the Bar of the State of Minnesota, the Bar of the State of California, and is admitted to the U.S. District Court for the Central District of California.

Charles S. Zimmerman, founding partner of Zimmerman Reed, is a nationally recognized leader in complex and class action litigation. He frequently speaks at industry conferences and CLEs, and is the author of a newly published book on complex litigation. During more than 30 years of practice, Bucky has successfully represented thousands of clients through individual actions and nationwide class actions. His cases have involved the tobacco industry, pharmaceutical companies, and shareholder suits. Bucky has served as lead counsel, PSC member and liaison counsel in numerous major pharmaceutical and medical device cases over the last 15 years. He currently serves on the Plaintiffs' Executive Committee for the Dicamba Herbicides Litigation, Lead Counsel Committee for the Stryker Hip Litigation, was appointed to the Plaintiffs' Steering Committee in the NFL Players' Concussion Injury Litigation, and is Lead Counsel representing banks in the Target Data Breach case. He has also served as Co-Lead Plaintiffs' Counsel in the Baycol, Guidant, Levaquin, Medtronic, Zicam, NFL Retired Players Publicity Rights, and National Arbitration Forum MDLs. Through his leadership in these and other groundbreaking cases, Bucky continues to advance the interests of his clients and the legal profession.

In addition to his case work, Bucky continues to lecture on complex litigation and working with the media in high profile cases for a variety of organizations including the Minnesota State Bar Association, Minnesota Continuing Legal Education, the University of Minnesota Law School, William Mitchell College of Law, the Minnesota Association for Justice, and Mealey's Publications. He is also an adjunct professor of law teaching Mass Torts at the University of Minnesota Law School. In 2006, Bucky authored "Pharmaceutical and Medical Device Litigation," a mass tort manual published by Thompson/West.

He has been recognized by his peers in Minnesota as a Super Lawyer from 2000 - 2007, 2011-2017. He was also selected as the 2013 & 2014 Minneapolis Mass Tort Litigation / Class Actions - Plaintiffs Lawyer of the Year by The Best Lawyers in America.

Bucky is a graduate of the University of Minnesota Law School. He also received his undergraduate degree from the University of Minnesota and was a three letter winner, Williams Scholar, and captain of the varsity U of M tennis team his junior and senior years. Bucky is a member of the United States Professional Tennis Association obtaining national

ranking, and has won gold and silver medals at the world Maccabiah and Pan American Maccabiah games.

Bucky is licensed to practice law in the States of Minnesota and Arizona, and is admitted to the United States District Court for the District of Minnesota, District of Colorado, and District of North Dakota, and the United States Supreme Court. He is also admitted to the Third, Fifth, Sixth, and Eighth United States Circuit Courts of Appeals.

Bucky served as co-chairman of the Advisory Committee for Mealey's Propulsid Litigation Conference and he chaired the faculty of a Minnesota Institute for Legal Education seminar, "Dealing with Complex Litigation." Bucky has also lectured and served as a member of the faculty at Mealey's "Norplant Conference," Mealey's "Breast Implant Conferences," Andrew's Publications' "Medical Devices Litigation Conference," as well as numerous conferences on the subject of Tobacco Litigation and "Youth and Addiction." Additionally, he was a guest lecturer on the subject of Complex Litigation at the University of Minnesota School of Law in conjunction with course work prepared by Professor Robert J. Levy, and the William Mitchell College of Law in conjunction with course work prepared by the Honorable Thomas Carey.

Bucky's memberships include the Minnesota Association for Justice, American Association for Justice, the Federal Bar, the Minnesota State Bar Association, the Hennepin County Bar Association, and the Bar Associations of the Fifth and Eighth Federal District Courts.

DECLARATION OF MITCHELL A. TOUPS

Pursuant to 28 U.S.C. § 1746, I, Mitchell A. Toups, declare as follows:

1. I am a partner of Mitchell A. Toups, Ltd., ("Toups"). Based on my position with my firm, I am authorized to submit this declaration.

2. I am an attorney in good standing licensed to practice law in the States of Texas and New York. I am also admitted to practice in the United States District Courts for the Eastern, Northern, and Southern Districts of Texas, the Northern District of Illinois, the Eastern District of Wisconsin, the United States Court of Appeals for the First, Third, Fifth, Sixth, Seventh, Ninth and Tenth Circuits, the United States Court of Federal Claims, and the United States Supreme Court. I also have been, and am, admitted *pro hac vice* in various other state and federal courts.

3. I am a partner of Mitchell A. Toups, Ltd., and the law firm of Weller, Green, Toups & Terrell, L.L.P., in Beaumont, Texas. I have practiced law for over 35 years. I am Board Certified by the Texas Board of Legal Specialization in Personal Injury Law and Civil Trial Law. I am also Board Certified in Civil Trial Law and Civil Pretrial Practice by the National Board of Trial Advocacy. I am AV peer review rated by the Martindale-Hubbell Law Directory. I am an America's Top 100 High Stakes Litigators for Southern Texas (2017, 2018), a Top 100 Lawyers by the National Trial Lawyers (2011, 2014-2017), Law Dragon's Houston Region Top 100 Lawyers (2007, 2009-2017), a Texas Super Lawyer (2003-2004, 2006-2018), Law Dragon's Top Trial Lawyer (2007-2010), Texas Super Lawyer Top Attorneys in Texas (2008, 2012, 2015-2017), Texas Super Lawyer Top 100 in the State of Texas (2011-2012), Texas Super Law Excellence in Practice (2012); Law Dragon Leading Plaintiff Lawyers in America (2007), National Association of Distinguished Counsel – Top 1% (Lifetime Member) and Trial Masters (Lifetime Member). For my entire legal career, my practice has focused on business cases, consumer cases, complex commercial litigation, class actions, and mass actions in state and federal courts throughout the United States. I have served in leadership roles in MDL and non-MDL class action litigation. I also have represented opt-out plaintiffs in class action litigation. I am knowledgeable about class action and opt-out plaintiff jurisprudence. For more information about Mitchell A. Toups, Ltd, and my law practice, please refer to my resume attached hereto as Exhibit "A".

4. I, along with Richard L. Coffman, of The Coffman Law Firm, represent over 9,000 United States corn producers in forty-four states farming over 2.9 million acres of corn on the average during each year in the damages period in this litigation. We also represent 14 of the 48 designated bellwether plaintiffs. We have a signed contingent fee contract with each and every

client we represent in this litigation—including our bellwether plaintiff clients. Our clients comprise the plaintiff group commonly known as the Toups/Coffman Plaintiffs.

5. I make this declaration based on my personal knowledge, and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration for the sole purpose of supporting my Firm's application for an award of common benefit attorneys' fees and expenses in this litigation. As a partner of Mitchell A. Toups, Ltd. and Weller, Green, Toups & Terrell, L.L.P., I am authorized to submit this Declaration on behalf of Mitchell A. Toups, Ltd. and Weller, Green, Toups & Terrell, L.L.P. By submitting this Declaration, however, neither Mitchell A. Toups, Ltd., Weller, Green, Toups & Terrell, L.L.P., nor I, in any way, waive our right to (i) recover attorneys' fees and expenses under the contingent fee contracts with our clients, which we incurred on a wholly-contingent basis, assuming full risk of non-payment, and for which we have not been paid or reimbursed to date, or (ii) object to any aspect of the settlement of this litigation, including without limitation, attorneys' fees and expenses.

6. My Firm's common benefit time and expenses were incurred solely on behalf of our clients who were designated as bellwether plaintiffs and/or considered to serve as prospective replacement bellwether plaintiffs for other bellwether plaintiffs who no longer qualified to serve or decided to discontinue serving as bellwether plaintiffs. Our final group of bellwether plaintiff clients included LBJ Ventures, LLC, McKee Family Farms, Partners 5, LLC, Evelyn I. Linder Child's Trust, Linden Kaliff, B&A Riessland Farms, Sandra Boyer, Leon Taylor, Ken Kennedy, James Shortt Trust, Joseph Murname Trust, Glenn Bix, State Line Farm Co., Dierking Farms, and William Rosborough Farms, Inc. My Firm also incurred common benefit time and expenses representing and working with Vincent T. Schroeder Revocable Trust, C&S Farms, Cold Run Jersey, LLC, Springvale Stock Farms, LLC, Fulkerson Farms, and San Buhr Farms, all of which

were prospective or former bellwether plaintiffs who were identified, vetted, ultimately decided they did not want to serve as a bellwether plaintiff, did not qualify to serve as a bellwether plaintiff, were rejected by Co-Lead Counsel and/or Defendants as a bellwether plaintiff, and/or ultimately not needed to serve as a bellwether plaintiff.

7. My Firm's work with and on behalf of our bellwether plaintiff clients and prospective bellwether plaintiff clients included, without limitation, (i) working with Co-Lead Counsel to identify and vet prospective bellwether plaintiffs from our client base, (ii) numerous telephonic and email communications with multiple clients regarding serving as bellwether plaintiffs and replacement bellwether plaintiffs, (iii) working with clients chosen to serve as bellwether plaintiffs and replacement bellwether plaintiffs to complete their Plaintiff Fact Sheets, respond to written discovery (original and amended responses), and produce relevant documents, (iv) schedule and coordinate bellwether plaintiff client depositions, (v) several post-deposition bellwether plaintiff client telephonic and email communications, and (vi) numerous telephonic and email communications with co-counsel and our respective staffs to properly administer (i)-(vi), above.

8. The background of Mitchell A. Toups is contained in his resume' attached hereto as Exhibit "A". The only paralegal, Laura Castille, with time included herein only had limited time in this application of .30 hours. She is a two-year legal assistant, no longer with our firm.

9. Our firm maintains contemporaneous records on cases in which time is required. We set up time records for our work on these Bellwether Plaintiffs that were submitted for purpose of common benefit time since class counsel and/or their representative requested that we do so.

10. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common

benefit time and expense submissions to Co-Lead Counsel in the MDL for this work regarding the bellwether plaintiffs.

11. In compliance with the Common Benefit Order, I did not include time spent on behalf of my individual clients in these submissions, who were not either bellwether or class representative plaintiffs. Keeping time for my contingent fee clients (in excess of 9,000) was not required under any Common Benefit Order.

12. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

13. I spoke with William "Bill" Chaney regarding all time submitted to class counsel. He made reductions and/or cuts in my time. I reviewed and agreed with most of the changes made by Mr. Chaney. I also had a phone conference with Mr. Chaney and Scott Powell to further review my time before completing the final common benefit time product. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the common benefit time (there are no expenses submitted) on behalf of my firm is accurate, and in compliance with the Court's Common Benefit Order.

14. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm is $71,957.50. A breakdown of the lodestar is provided below. These were approved by Mr. Chaney and Mr. Powell.

Name	Title	Total Hours	Hourly Rate	Lodestar
Mitchell A. Toups	Partner	99.20	$725.00	$71,920.00
Laura Castille	Paralegal	.30	$125.00	$37.50
TOTAL				**$71,957.50**

15. My firm does not seek an award of expenses in connection with the prosecution of this litigation related to common benefit work.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on June 25, 2018, in Beaumont, Texas.

  - American Association for Justice
  - Texas Trial Lawyers Association
  - Jefferson County Bar Association
  - Houston Trial Lawyers Association
  - The Class Action Trial Lawyers
  - Million Dollar Advocates Forum

The following cases are representative of some of the matters Mr. Toups has handled during his career beginning in May, 1983.

COMPLEX / CLASS LITIGATION EXPERIENCE OF MITCHELL A. TOUPS

Experience involving mass tort litigation and class actions includes some of the following important cases:

Cook vs. Colonial - Lead Counsel for 5,000 Plaintiffs in State Court in Jefferson County, Texas. This was a consolidation of 9,000 Plaintiffs regarding the pipeline ruptures in Houston, Texas, in 1994. Class allegations were involved in this case. The case was settled for a confidential amount. This was one of the largest ruptures and leaks of two of the nation's most important pipelines of fuel, oil and gasoline.

Albright v. Aeroquip - Lead Counsel for All Plaintiffs in State Court in Jefferson County, Texas. Involved over 100 Plaintiffs and Decedents regarding the Imperial Food Fire in North Carolina where 25 people died and 80 others were injured. This case involved over 40 defendants. Class allegations were involved in this case although the case was settled for a confidential amount as a mass tort. The Imperial Food Fire was one of the worst in American history – one of the doors in the case is now in the Smithsonian Museum of American History.

Adams v. Wyeth - Lead Counsel in a consolidated action of over 1,200 Plaintiffs in State Court in Jefferson County, Texas. This case settled for a confidential amount. The case involves the Norplant Contraceptive device.

Vitek TMJ Litigation - Lead Counsel for ~700 Plaintiffs Individually & Co-Lead Class Counsel in the Federal Class Action and MDL. This litigation involves over 10 years of action in State and Federal Court in Texas and Louisiana. Part of the cause of action includes the Methodist Hospital National Class Action which settled in Federal District Court for the Southern District of Texas, Houston Division. The other part of the litigation involves class actions in Louisiana and over 700 individual cases filed in the State of Louisiana and Texas. Over $100 Million in settlements were achieved in the Class Action and individual cases.

Wesley v. Colonial - Co-Lead Counsel in this national class action in the United States District Court for the Middle District of Alabama, Northern Division. This case is settled for all property owners in thirteen (13) states which the Colonial Pipeline traverses. The settlements involved approximately $500 Million to be spent over 10 years in improvements to the pipeline nationwide to bring the pipeline up to current DOT Guidelines. Mr. Toups was class counsel that oversaw the implementation of the program each year for ten years by reviewing the Colonial's plan of action and approving same.

HCA National Class Action - Co-Lead Counsel for action in the United States District Court for the Middle District of Tennessee, Nashville Division. This case involved health care fraud and was settled by the U.S. Government for more than $1 Billion.

Washington v. Smith-Kline - Co-Lead Counsel for national class action in the United States District Court for the Northern District of Alabama, Western Division and then transferred to an MDL action in Connecticut. These cases have now settled on a national basis with millions of dollars returned to patients and healthcare funds that were overbilled for lab tests.

City of San Juan vs. CP&L - Co-Lead Class Counsel in class action in State District Court in Hidalgo County, Texas, on behalf of approximately 200 cities in South Texas against a utility company for failure to pay franchise fee taxes. This case was certified as a litigation class and then settled.

In re Hyundai - Co-Lead Counsel in a consumer class involving approximately 2 Million automobile owners whose horsepower was misrepresented over a period of ten years. This case involves 17 state class actions. The case settled and was valued at approximately $110 Million.

King v City of Austin, Texas - Co-Lead Counsel in a class action for 900 police officers for back pay owed to them and a Summary Judgment was entered on both liability and damages for the Plaintiffs. The case was settled with the City repaying all back pay and attorneys' fees.

In re: Mass Mutual (Santa Fe, New Mexico) - Co-Lead Counsel of Objector Group wherein an attempt was made to settle the litigation with no compensation to the class and $10 Million in attorney's fees to class counsel. After objections were made, the case settled for more than $180 Million in cash to the class.

In re Blockbuster - Counsel herein served as an expert on attorney's fees in the settlement of this class action in Jefferson County, Texas, which was a consolidation of cases from around the country. The attorney's fees of $9 Million were approved by the trial court and upheld on appeal by the 9th Court of Appeals in Beaumont, Texas.

Clark v. Equifax, Clark v. Transunion, and Clark v. Experian (MDL) - Co-Lead Objector Counsel was appointed co-lead counsel for a coordinated group of objecting class members who opposed the approval of proposed nationwide class settlements that would have provided only illusory benefits to the class members and would have allowed the defendants to continue to improperly report bankruptcies for consumers who had not actually filed for bankruptcy themselves (but were joint account holders with others who had filed for bankruptcy). Counsel herein was instrumental in ensuring approval of revised settlements that will provide significant relief (valued in the hundreds of millions of dollars) to many consumers nationwide by requiring the defendants to discontinue their improper bankruptcy reporting practices and providing favorable resolution provisions for breaches of the settlement by the Defendants.

In re Cosmetics (MDL) - Co-Lead Counsel for the coordinated objector's group in this class action pending in US. District Court, Oakland, California. Counsel was instrumental in making substantial changes to the settlement. Due to the objections, the Court did not approve the original settlement. After substantial changes were made to the settlement the Court approved the settlement on March 8, 2005. The settlement was valued at $175 Million.

White/Hernandez v Equifax - Counsel herein is one of the counsel for the class in a nationwide class action in the Central District of California regarding an FCRA case against all three credit reporting agencies for failure to accurately report whether a debt has been discharged in bankruptcy. The case settled for $45 Million cash and injunctive relief worth hundreds of millions and is currently on Appeal to the 9th Circuit for the third time.

Jowers v TransUnion (MDL) – Co-Counsel herein is one of the counsel for the class in a nationwide class action in the Northern District of Illinois regarding an FCRA case against credit reporting agency TransUnion for allowing confidential consumer credit information to be sold, leased and/or improperly disclosed by TransUnion in the form of target marketing lists and failure to notify said consumers that their information had been released. The case settled for $75 Million and additional relief making the settlement in excess of $100 Million. This was the largest FCRA settlement in U.S. history at the time.

Ford EMS Litigation – Co-Counsel herein is one of the counsel for the class in a nationwide class action in the Eastern District of Texas involving ambulance owners with 6.0L diesel engines for breach of warranty on the engines. The case settled and valued at approximately $40 Million for more than 20,000 ambulances nationally.

Charles vs. Kings Park – Co-counsel for over 250 tenants in a mass tort involving the improper application of Chlordane at an apartment complex, which exposed tenants to harmful levels of this pesticide. The case culminated in a confidential settlement in Harris County, Texas.

US/Woodard v DaVita - Qui Tam – Co-Lead Counsel for Relator, Ivey Woodard in the Eastern District of Texas. The Government declined intervention and the high profile and complicated *qui tam* ultimately settled for 8 figures to the U.S. Government with counsel's client receiving $14.6 Million for his efforts.

Ford/Navistar Litigation (MDL) – Co-Lead Class Counsel in a nationwide class action for approximately One Million (1,000,000) truck owners. The case settled with an estimated value by Plaintiffs' Counsel of more than $400 Million.

Ford Spark Plug Litigation (MDL) – Counsel herein was one of Five Members on the Plaintiffs' Steering Committee in the Northern District of Ohio. This case involves defective spark plugs in more than 2 Million vehicles. The case settled with an estimated value by Plaintiffs' Counsel of more than $225 Million.

In re Heartland Payment Systems, Inc. Customer Data Security Breach Litigation (MDL) - Counsel herein is one of the counsel for the Financial Institution Plaintiffs in the Southern District of Texas, who filed suit against Heartland for a massive data breach which occurred in 2009 resulting in the compromise of up to 100 million credit card numbers and affected more than 150 banks and financial institutions in 40 states. This claim was appealed and recently remanded for further proceedings on behalf of the Financial Institution Plaintiffs. The case settled as a non-class.

GM Ignition Switch Litigation – Lead Counsel for more than 200 death and injury cases filed in the MDL in Federal Court in New York. This was one of the larges coverups by any automobile manufacturer in the history of the United States. All settlements to date have been confidential.

Las Vegas Shooting – Counsel for more than 300 victims of the Las Vegas shooting wherein the shooter fired multiple weapons equipped with bump stocks through the windows of the Mandalay Bay Casino into concert goers at the Route 91 Harvest Festival.

In re Syngenta GMO Corn Litigation – Counsel for more than 9,000 U.S. Corn Farmers filed in the MDL and in Illinois related to Syngenta's bioengineered corn that was not approved in China, which caused the price of corn to plummet. The Class Action settled for $1.5 Billion.

HURRICANE LITIGATION

Toups has handled over 2,300 residential and commercial property claims in Hurricane Ike and Rita cases.

In re Hurricane Ike Litigation (MDL) – Lead Counsel. This case settled with over 1,000 individual cases and a class action with remaining class members in Galveston, Texas. The total settlement was estimated to be at least $189 Million.

Hurricane Mass Torts Settlement – Co-Lead Counsel hired by more than 1,000 property owners in Galveston, Brazoria and Jefferson County, Texas, who were paid $135 Million in 2013 for property damage missed by the original adjusting companies by Texas Windstorm Insurance Association (TWIA).

State Farm Hurricane Litigation (MDL) – Co-Lead Counsel for more than 500 State Farm Hurricane cases in the MDL. Toups tried first case where State Farm was found to have committed fraud and punitive damages were awarded to Plaintiff. All remaining cases were ultimately settled for confidential amounts.

COMMERCIAL TRANSPORTATION CASES

Commercial Transportation Cases - Toups has handled several bus crash cases against companies such as the Coach companies, Greyhound and several independent companies. These cases have included various sizes and types of buses. In addition, Toups has handled numerous other public transportation/common carrier transportation accident cases, including buses, airplanes, boats/ships, and helicopters. As a result of handling these cases and the accident reconstruction issues that they involve over the course of the past twenty-seven years, Toups has developed a specialized expertise in the unique areas of laws and regulations that apply, particularly in this case the complex rules and regulations promulgated by the United States Department of Transportation. As a result of the expertise Toups has developed, over the past five years alone Toups has been hired in this type of public transportation/common carrier accident cases by clients (typically on the recommendation of their local attorneys) in Texas, New York, New Jersey, Alabama, Connecticut, Canada, the Dominican Republic, Venezuela and Mexico.

CATASTROPHIC CASES

Catastrophic Cases - Over his career, Toups has handled hundreds of cases involving explosions; premises liability; brain damage caused by medical negligence or accident; as well as death cases from various accidents and medical negligence cases. These cases are too numerous to list. Examples are as follows:

BP Oil Spill Litigation – Toups represented more than 6,000 fishermen and businesses affected by the Oil Spill in the Gulf of Mexico over five years.

Grant v Union Pacific – Railroad Death case. Confidential Settlement for 22-year-old involved as a bystander; killed by flying debris.

Jones Plant Accident– Lead Counsel for family of man that fell through a rusty roof on an oil storage unit. Settled individual case for $6.75 Million.

Ranolls v Pilot – Eighteen Wheeler/Automobile Accident resulting in death of 39-year-old woman. Ranolls' vehicle hit an 18 wheeler. Confidential Settlement.

Biloxi Bus Crash – 2017 – Co-Lead Counsel for more than 50 victims including four deaths and over 35 serious injuries related to a bus that high-centered on a railroad crossing and was struck by a train in Biloxi, Mississippi.

Drunk Driver Case – This case involved the sale of alcohol to an obviously intoxicated individual resulting in the death of the client's husband and only child. The total verdict was more than $100 Million.

Refinery Case – This case arose out of an explosion at a Houston Refinery resulting in the client being rendered a quadriplegic. This case settled for a seven figure confidential amount.

Day Care Case – This case arose out of an incident at a day care resulting in the death of a baby, which the day care then tried to cover up. A verdict was rendered in excess of $8 Million after a month-long trial.

Nursing Home Case – This case arose out of the death of a nursing home resident due to decubitus ulcers, starvation allegations. This case settled for approximately $7.5 Million.

Rollover Case – This case involved an automobile rollover resulting in the driver being rendered a quadriplegic. The case settled for a confidential amount.

Automobile Accident – This case arose out of an automobile accident resulting in the death of a young woman. This case settled for approximately $3 Million.

Hotel Case – This case arose when several guests of a hotel became intoxicated, brought a gun into the hotel, which went off, resulting in the death of another hotel guest in the adjacent room. This case settled for a confidential amount.

Sexual Abuse Case – This case arose out of improper actions of a member of the clergy with a minor. This case settled for a confidential amount.

Apartment Building – This case involved a diving injury at an apartment complex swimming pool resulting in the client being rendered a quadriplegic. The total value of all settlements was in excess of $5 Million.

Oilfield Case – This case involved severe burns resulting from an explosion. This case settled for approximately $3.5 Million.

COMMERCIAL LITIGATION / CONTRACT DISPUTES

HeatEx Industries v. Vardell - Counsel herein is lead counsel for HeatEx for a contract dispute in excess of $5 Million in Jefferson County, Texas. The dispute involves a contract between two companies concerning the sale of one company to the other company and tortious interference claims. The case was settled for a confidential amount.

Fee Dispute - This case involves a contract dispute concerning Millions in fees between several law firms. The case was settled during trial for a judgment with more than $10 Million being paid to the Plaintiffs.

Naidu v Brask – This case involved a minority shareholder being frozen out by the majority shareholder in Louisiana. The case settled for a confidential amount.

INTERNATIONAL LITIGATION

Firestone Tire/Ford Litigation - Co-Lead Counsel in more than 50 death cases in Mexico and Venezuela related to product liability filed in Texas State Court. This case settled for a confidential amount.

Valdez - Co-Lead Counsel in case in the Southern District of Texas wherein Venezuelan flagged ship sank in the Gulf of Mexico. All Plaintiffs (11 families) were Venezuelan nationals. This case settled for a confidential amount.

Venezuela Fireman Litigation - Lead Counsel in case in Texas State Court involving the death of four Venezuelan firemen and the catastrophic injuries of a fifth fireman involving not only personal injuries, but contractual disputes with Leasing/Rental company in the U.S. This case settled for a confidential amount.

Quebec Lac-Megantic Quebec Train Derailment (MMA) – Counsel for hundreds of people that died or lost businesses related to train that exploded and destroyed an entire town – the worst accident in the history of Quebec, Canada, involving a runaway train. Ultimately 50 individuals died and the entire downtown area was destroyed. This case has partially settled for more than $400 Million.

Coach Canada Litigation –Lead Counsel for more than 50 passengers in three accidents related to busses traveling from Canada to the United States.

GM Ignition Switch Canada Litigation – Lead Counsel for 9 deaths that occurred in the various provinces of Canada related to the GM Ignition Switch Recall.

Dubois v Autobus Fleur de Lys – Lead counsel for 40 passengers on a bus traveling to New York from Quebec, Canada, resulting in injuries or the death of all passengers when the bus rolled off the roadway in North Hudson, New York. Case ongoing.

DECLARATION OF RICHARD L. COFFMAN IN SUPPORT OF THE COFFMAN LAW FIRM'S APPLICATION FOR COMMON BENEFIT ATTORNEYS' FEES AND EXPENSES

Pursuant to 28 U.S.C. § 1746, I, Richard L. Coffman, declare as follows:

1. I am an attorney in good standing licensed to practice law in the State of Texas. I am also admitted to practice in the United States District Courts for the Eastern, Western, Northern, and Southern Districts of Texas, the Central and Southern Districts of Illinois, the Eastern District of Michigan, the United States Court of Appeals for the First, Third, Fifth, Sixth, Seventh, and Ninth Circuits, the United States Court of Federal Claims, and the United States Supreme Court. I also have been, and am, admitted *pro hac vice* in various other state and federal courts.

2. I am a shareholder in, and President of, the Coffman Law Firm in Beaumont, Texas. I have practiced law for over twenty-eight (28) years. I am AV peer review rated by the Martindale-Hubbell Law Directory and a Texas Super Lawyer (Class Actions and Mass Torts) (2016-2018). I also have a Master of Professional Accounting and am a Certified Public Accountant. For my entire legal career, my practice has focused on business cases, consumer cases, agriculture cases, securities cases, complex commercial litigation, class actions, and mass actions in state and federal courts throughout the United States and in FINRA arbitrations. I have served in leadership roles in MDL and non-MDL class action litigation. I also have represented (and am representing) opt-out plaintiffs in class action litigation. I am knowledgeable about class action and opt-out plaintiff jurisprudence. For more information about the Coffman Law Firm and my law practice, please refer to my Firm website, www.coffmanlawfirm.com.

3. I, along with Mitchell A. Toups of Weller, Green, Toups & Terrell, LLP, represent over 9000 United States corn producers in forty-four states farming over 2.9 million acres of corn on the average during each year in the damages period in this litigation. We also represent 14 of the 48 designated bellwether plaintiffs. We have a signed contingent fee contract with each and every client we represent in this litigation—including our bellwether plaintiff clients. Our clients comprise the plaintiff group commonly known as the Toups/Coffman Plaintiffs.

4. I have personal knowledge of the statements in this Declaration and, if called as a witness, I could, and would, testify competently about them. I make this Declaration for the sole purpose of supporting my Firm's application for an award of common benefit attorneys' fees and expenses in this litigation. As a shareholder in, and President of, the Coffman Law Firm, I am authorized to submit this Declaration on behalf of the Coffman Law Firm. By submitting this Declaration, however, my Firm and I do not in any way waive our right to (i) recover attorneys'

fees and expenses under the contingent fee contracts with our clients, which we incurred on a wholly-contingent basis, assuming full risk of non-payment, and for which we have not been paid or reimbursed to date, or (ii) object to any aspect of the settlement of this litigation, including, without limitation, attorneys' fees and expenses.

5. My Firm's common benefit time and expenses were incurred solely on behalf of our clients who were designated as bellwether plaintiffs and/or considered to serve as prospective replacement bellwether plaintiffs for other bellwether plaintiffs who no longer qualified to serve or decided to discontinue serving as bellwether plaintiffs. Our final group of bellwether plaintiff clients included LBJ Ventures, LLC, McKee Family Farms, Partners 5, LLC, Evelyn I. Linder Child's Trust, Linden Kaliff, B&A Riessland Farms, Sandra Boyer, Leon Taylor, Ken Kennedy, James Shortt Trust, Joseph Murname Trust, Glenn Bix, State Line Farm Co., Dierking Farms, and William Rosborough Farms, Inc. My Firm also incurred common benefit time and expenses representing and working with Vincent T. Schroeder Revocable Trust, C&S Farms, Cold Run Jersey, LLC, Springvale Stock Farms, LLC, Fulkerson Farms, and San Buhr Farms, all of which were prospective or former bellwether plaintiffs who were identified, vetted, ultimately decided they did not want to serve as a bellwether plaintiff, did not qualify to serve as a bellwether plaintiff, were rejected by Co-Lead Counsel and/or Defendants as a bellwether plaintiff, and/or ultimately not needed to serve as a bellwether plaintiff.

6. My Firm's work with and on behalf of our bellwether plaintiff clients and prospective bellwether plaintiff clients included, without limitation, (i) working with Co-Lead Counsel to identify and vet prospective bellwether plaintiffs from our client base, (ii) numerous telephonic and email communications with multiple clients regarding serving as bellwether plaintiffs and replacement bellwether plaintiffs, (iii) working with clients chosen to serve as bellwether

plaintiffs and replacement bellwether plaintiffs to complete their Plaintiff Fact Sheets, respond to written discovery (original and amended responses), and produce relevant documents, (iv) schedule and coordinate bellwether plaintiff client depositions (including, without limitation, LBJ Ventures, LLC, Dierking Farms, William Rosborough Farms, Inc., Glenn Bix, B&A Riessland Farms, and Linden Kaliff), (v) schedule and coordinate deposition preparation sessions, (vi) assist with preparing certain bellwether plaintiff clients for deposition, (vii) attend certain bellwether plaintiff client depositions (Dierking Farms, William Rosborough Farms, Inc., and Glenn Bix) (viii) multiple post-deposition bellwether plaintiff client telephonic and email communications, (ix) numerous telephonic and email communications with Co-Lead Counsel and/or their designated subordinate counsel regarding (i)-(viii), above, and (x) numerous telephonic and email communications with co-counsel and our respective staffs to properly administer (i)-(ix), above.

7. The only Firm employee other than myself who incurred time on behalf of our bellwether plaintiff clients and prospective bellwether plaintiff clients was Heather McAdams, a paralegal with over ten years' of experience at the time who worked under my direction. Ms. McAdams no longer works for the Firm.

8. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses (Doc. #936) (the "Common Benefit Order"), my Firm contemporaneously maintained and submitted its common benefit time and expenses to Co-Lead Counsel in the MDL proceeding. My Firm's common benefit time and expense submission was compiled from contemporaneous time and expense records maintained by my Firm in the ordinary course of business. In fact, my Firm's common benefit time and expenses were recorded and maintained under a separate billing code specifically established to record common benefit time and

expenses. In compliance with the Common Benefit Order, I did not include in my Firm's common benefit time and expense submission any time and expenses spent on behalf of our contingent fee, non-bellwether plaintiff clients. Nor does the Common Benefit Order require my Firm to record and maintain the time incurred on behalf of our other 9000+ contingent fee, non-bellwether plaintiff clients.

9. In preparing this Declaration, I exercised billing judgment by re-reviewing my Firm's common benefit time and expenses originally submitted in this litigation. I also conferred with Co-Lead Counsel, William Chaney and Scott Powell, about my Firm's original common benefit time and expense submission via numerous emails and during a June 8, 2018 conference call. As a result of these consultations, I made certain minor adjustments and re-submitted my common benefit time and expenses to Messrs. Chaney and Powell. In a June 14, 2018 email, Mr. Chaney stated that both he and Scott Powell approved my re-submitted common benefit time and expenses (as set forth below), which are accurate and comply with the Common Benefit Order.

10. After exercising billing judgment, consulting with Co-Lead Counsel, and making the above-referenced adjustments, the total common benefit lodestar for my Firm approved by Co-Lead Counsel, for which I seek an award (including an appropriate multiplier to be determined by the Court), is $117,300, broken down as follows:

Name	Title	Total Hours	Hourly Rate	Lodestar
Richard L. Coffman	Partner	139.70	$750	$104,775
Heather McAdams	Paralegal	83.50	$150	12,525
TOTALS	**-**	**223.20**	**-**	**$117,300**

11. My Firm also seeks an award of $2,371.22 as reimbursement of the common benefit expenses incurred in connection with representing our bellwether plaintiff clients and prospective bellwether plaintiff clients, as follows:

Description of Costs	Amount
Hotels	$734.55
Meals	140.77
Mileage	216.00
Airline tickets	811.59
Ground transportation	354.31
Parking and misc. expenses	114.00
TOTAL	**$2,371.22**

12. These common benefit expenses are reflected in my Firm's books and records, and compiled from contemporaneously maintained receipts, expense vouchers, check and credit card records, and other documents, all of which comprise an accurate record of such expenses. As part of my Firm's request for an award of these common benefit expenses, I reviewed Section III (B) of the Common Benefit Order. The requested common benefit expense award conforms to the Common Benefit Order and, in fact, also was approved by Co-Lead Counsel William Chaney and Scott Powell.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on June 24, 2018, in Beaumont, Texas.

DECLARATION OF JAMES E. CECCHI

I, JAMES E. CECCHI, declare as follows:

1. I am a partner of Carella Byrne Cecchi Olstein Brody & Agnello, P.C. ("Carella Byrne"). Based on my position with my firm, I am authorized on behalf of my firm to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. My firm, Carella, Byrne, Cecchi, Olstein, Brody & Agnello, P.C., is a 38-lawyer law firm with significant experience in complex litigation and federal class action litigation,

including consumer fraud claims, antitrust claims, securities claims, and product defect cases. We have been privileged to serve in an executive capacity in many large plaintiffs' class actions in the nation over the past ten years. By way of example, we are Lead Counsel in *In re: Liquid Aluminum Sulfate Antitrust Litigation*, MDL 2687 (D.N.J.), an important national MDL involving bid rigging and price fixing in the market for Liquid Aluminum Sulfate, a coagulant utilized in water treatment and paper production. In *In Re: Takata Airbag Prod. Liab. Litig.*, MDL No. 2599 (S.D. Fla.), we were appointed to the Plaintiffs' Steering Committee to prosecute, along with Co-Lead Counsel, this national MDL involving defective airbag litigation against Takata Corporation and many vehicle manufacturers. We also served on the Plaintiffs' Steering Committee in *In re: Volkswagen "Clean Diesel" Marketing, Sales Practices, and Prods. Liab. Litig.* 15-MD-2672-CRB (N.D. Cal.), an MDL, and are currently Co-Lead counsel in *In Re Mercedes Benz Emissions Litig.*, Civ. No. 16-881 (D.N.J.), and were Co-Lead Counsel in *In re: Caterpillar, Inc. C13 and C15 Engine Prods. Liab. Litig.*, MDL No. 2540 (D.N.J.), which, in 2016, successfully resolved claims that Caterpillar's diesel emissions systems were defective and de-rated and shut down at unacceptably high rates.

4. Backgrounds of Timekeepers at Carella Byrne:

A. JAMES E. CECCHI is partner in the firm's litigation department and a member of his firm's executive committee. He specializes in complex federal class actions, and has extensive experience litigating and resolving complex class actions both in the Multi-District Litigation context as well as otherwise. Mr. Cecchi is currently prosecuting numerous consumer fraud and other plaintiff-side related class actions on behalf of the firm. Mr. Cecchi served in the United States Department of Justice as an Assistant United States Attorney for the District of New Jersey. In that capacity, Mr. Cecchi participated in numerous significant criminal prosecutions involving money laundering, narcotics smuggling and violations of federal firearms laws. Mr. Cecchi graduated from Colgate University in 1989 with honors, majoring in History and Political Science. Mr. Cecchi was Executive Editor of the Colgate News. In 1989 he graduated from Fordham University School of Law and was a member of the International Law Journal. Mr. Cecchi served as Law Clerk to the Honorable

Nicholas H. Politan in the United States District Court, District of New Jersey from 1989-1991.

B. LINDSEY H. TAYLOR, a partner in the firm's litigation department, specializes in complex commercial litigation in federal court. He graduated received a bachelor's degree with honors from the University of North Carolina at Chapel Hill in 1983 and a juris doctor degree in 1986. He joined Carella, Byrne, Cecchi, Olstein, Brody & Agnello as of counsel in 2002 and became a partner in 2008. Mr. Taylor was a merit selection to the 2005, 2008, 2009 and 2010 New Jersey "Super Lawyers."

C. DONALD E. ECKLUND, a partner in the firm's litigation department, Mr. Ecklund focuses his practice on all aspects of complex commercial disputes, including consumer fraud, and class action litigation. Mr. Ecklund obtained a B.S. degree in Environmental Science from Rutgers University in1998, and a juris doctor degree from Rutgers School of Law in 2001. Prior to joining the firm, Donald was an associate at a prestigious New York law firm for four years where he represented clients in complex products liability litigation, as well as various environmental contamination cases and other matters. Donald has served on committees in several multi-district litigations (MDLs) involving pharmaceutical drugs and medical devices. Most recently, he has been extensively involved in class action litigation arising from deceptive sales practices and engaged in commercial litigation relating to direct broadcast satellite television. He is a former law clerk for the Honorable Marina Corodemus, Mass Tort Judge for the State of New Jersey (Retired), where he focused on complex mass tort and environmental litigation, and for the Honorable Joseph C. Messina, Presiding Judge Chancery Division, General Equity Part, Superior Court of New Jersey (Retired) where he focused on business and commercial litigation.

D. JAMES A. O'BRIEN III, of counsel at the firm and employed as part of the firm's litigation department, graduated with a Bachelor of Arts in Economics from the University of Massachusetts at Amherst in 1984 and received his J.D. in 1988 from the New England Law School of Law. He was a symposium editor for the New England Law Review, After receiving his J.D., Mr. O'Brien served as an attorney advisor with the U.S. Department of Labor, Office of Administrative Law Judges, in Washington, D.C., from 1988 to 1989. Subsequently, Mr. O'Brien was accepted into the Attorney General's Honors Program of the U.S. Department of Justice. He served as a Special Assistant U.S. Attorney with civil division of the U.S. Attorney's Office, Southern District of New York, from 1990 to 2001. Between 2001 and 2017, Mr. O'Brien was employed as of counsel at the law firm of Seeger Weiss LLP in New York City. His practice there focused on complex litigation including false claims act cases, class actions, mass torts, and multidistrict litigation. Mr. O'Brien co-authored an article, Administrative Housekeeping and Ethical Matters in Mass Tort MDLs and Class Actions, published in the Sedona

Conference Journal in 2012, and a chapter for MDL Standards and Best Practices published by the Duke Law Center for Judicial Studies in 2014. Mr. O'Brien joined Carella, Byrne, Cecchi, Olstein, Brody & Agnello as of counsel in June 2017.

E. MARY ELLEN RAGO has been an administrative assistant at Carella Byrne for ten years.

5. My firm engaged in common benefit work and work related to the bellwether cases. In particular, we were responsible for researching, drafting, and editing a significant portion of the Plaintiffs' ten-page supplemental memorandum of law in further support of the plaintiffs' motion for consolidation of state classes for trial (filed on June 30, 2017, ECF 3081). James O'Brien, of counsel at this firm, was responsible for this work, and was asked by co-lead counsel to assist in the drafting of this memorandum of law, along with Diogenes Kekatos of Seeger Weiss. The memorandum was filed at the request of the Court, in order to assist the Court in making an important determination as to how many bellwether trials the Court should hold and how many of those trials could involve combined cases from different states. The memorandum successfully argued that the number of bellwether trials should be limited, as the defendants request seven such trials, the plaintiffs requested three such trials, and the Court, on July 6, 2017, ultimately ordered that four such trials to take place (ECF 3319). The limitation to four such trials was a significant victory for the plaintiffs, as, from the plaintiffs' perspective, the less bellwether trials that took place, the chances of a settlement favorable to plaintiffs being reached were increased.

6. My firm also served as sub-class counsel for the Ethanol producer plaintiffs ("Ethanol Plaintiffs") in the above-captioned litigation. Specifically, in or about January 2018, I was advised by Class Counsel that I would be tasked with representing the Ethanol producers and that my function as sub-class counsel would be to negotiate an appropriate allocation for the

Ethanol producers from the overall settlement fund. I was advised that my principal contact would be Christopher Seeger.

7. I have been actively involved in negotiating an allocation of the settlement fund to the Ethanol sub-class and I have a comprehensive understanding to the strengths and weaknesses of the Ethanol sub-classes potential claims if the Ethanol sub-class were to pursue litigation instead of supporting this settlement.

8. Prior to my engagement and to ensure that I had a fulsome understanding of the claims, defenses, pertinent rulings, and potential issues that an Ethanol Plaintiffs would need to overcome, I reviewed relevant pleadings, motions filed before this Court, including the motion for class certification, and key motions filed in the state court. I also reviewed and analyzed the decisions issued by this Court and the state court on these various motions.

9. Upon my formal engagement to represent the ethanol producers, I obtained extensive materials from class counsel concerning the merits of the claims including all of the expert reports filed in the action (both plaintiff and defense) and all substantive motions. I began my work by reviewing and studying the expert reports which were, as the Court knows, voluminous.

10. In order to effectively represent the Ethanol sub-class, I knew that I would have to gain an understanding of not only how the corn market functioned but, just as importantly, the Ethanol market. Toward that end, I researched and reviewed extensive academic literature on the Ethanol industry and the correlation (if at all) between corn prices and Ethanol prices. As the Court also knows, this is not a straightforward area of study.

11. Most importantly, I knew that in order to negotiate effectively, I would need the assistance of a noted expert who could give me a defensible report on the theoretical damages

suffered by the Ethanol sub-class. Toward that end, I retained Colin A. Carter, a Professor of Agricultural and Resource Economics at the University of California, Davis. He drafted a report for me showing the impact of the de-facto Chinese embargo on the Ethanol sub-class. I engaged in discussions with Professor Carter. This was, obviously, an essential component of my work.

12. After educating myself fully and obtaining Professor Carter's report, I began my negotiations with Mr. Seeger in earnest. It is not an exaggeration to say that we had dozens and dozens of phone calls in an effort to reach a sensible solution here.

13. It is also important to note that I also interacted extensively with counsel for other Ethanol producers who often had different views of the strengths and weaknesses of the Ethanol claims. Those conversations were also extensive.

14. Finally, I also engaged directly with direct counsel for Al-Corn, and explained to him my theories and the ultimate resolution I reached with Class Counsel. I also engaged in review of damage models.

15. Ultimately, the negotiations resulted in a settlement proposal that I and counsel for my client agreed would represent and excellent outcome, namely, a gross allocation of $19,500,000 for the Ethanol sub-class.

16. Donald Ecklund, a partner at my office, assisted in drafting my declaration for this fee application, and in preparation of that reviewed the underlying documents and assembled any supporting papers that might be helpful.

17. Lindsey Graham, a partner at my office, prepared my notice of appearance in this matter, and had communications with the clerk of the district court in connection with my admission to the Court for this litigation.

18. Mary Ellen Rago, an administrative assistant at my office, obtained the necessary

documents for my review in preparing this declaration and processed administrative matters.

19. A1-Corn Clean Fuel, LLC ("A1-Corn") agreed to serve the named plaintiff for the Ethanol Plaintiffs subclass. A1-Corn's participation for settlement purposes was instrumental to achieving the result for the Ethanol Plaintiffs subclass. A1-Corn was responsive to my questions and its answers helped me formulate my understanding of several damages issues. Given the role A1-Corn Corn assumed and fulfilled as the named plaintiff for the Ethanol Plaintiffs subclass, I respectfully request that A1-Corn be granted an incentive award of $2,500.

20. My firm maintains contemporaneous records of its time and expenses in the ordinary course of business.

21. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), my firm submitted its common benefit time and expense submissions to Co-Lead Counsel in the MDL.

22. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to my individual clients who were not either bellwether or class representative plaintiffs.

23. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

24. I exercised billing judgment in the re-review of common benefit time and expenses, including any cuts that were made.

25. After this re-review, I can confirm that this time was undertaken by the members of my firm at my direction. I believe that the time and expense information submitted on behalf of my firm is accurate and in compliance with the Court's Common Benefit Order, with the caveat that a substantial portion of this firm's time was dedicated to representation of the ethanol producer

subclass.

26. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm is $139,680.00. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
James E. Cecchi	Partner	133.90	$850.00	$113,815.00
Donald E. Ecklund	Partner	4.70	$650.00	$3055.00
Lindsey H. Taylor	Partner	.40	$650.00	$260.00
James A. O'Brien	Counsel	34.50	$650.00	$22,425.00
Mary Ellen Rago	Admin. Assist.	1.0	$125.00	125.00
TOTALS		174.50		$139,680.00

27. My firm seeks $15,046.20 in expenses in connection with the prosecution of the litigation. Those expenses are summarized below:

Description of Costs	Amount
Disbursements:	
Costs Advanced for April 5, 2018 hearing transcript	$46.20
Costs Advanced to Prof. Colin Carter, PhD	$15,000.00
TOTAL	**$15,046.20**

28. As part of my firm's request for an award of expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order, with the caveat that a substantial portion of these expenses related to my firm's representation of the ethanol producer subclass.

29. The expenses pertaining to this case are reflected in the records of my firm. These records are contemporaneously prepared from receipts, expense vouchers, check and credit card records and other documents and are an accurate record of the expenses.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 7th day of July, 2018, in Roseland, New Jersey.

DECLARATION OF KENNETH A. WEXLER

I, Kenneth A. Wexler, declare as follows:

1. I am the managing partner of Wexler Wallace LLP ("WW"). Based on my position with WW, I am authorized on behalf of WW to submit this declaration.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees, expenses, and incentive awards in this litigation.

3. I have been a lawyer for 37 years. I have served and am serving as lead counsel in multiple complex cases. My experience is more detailed in our firm resume, a copy of which

accompanies this declaration. Additional information is located at www.wexlerwallace.com. In sum, WW is a complex litigation firm with an excellent national reputation. We have a strong antitrust and consumer fraud practice, together with a specialization in mass tort litigation. We have tried class action and mass tort cases to verdict. We are well-versed in all aspects of the kind of litigation that is the subject of this declaration.

4. I served as allocation counsel for Subclass 3. While I asked another attorney at WW to test my thinking on certain matters related to that role, as WW's hours reflect, I essentially handled the engagement myself.

5. I have been familiar with the Syngenta litigation for quite some time. In September 2015, WW made a producer client referral in connection with the case. We are waiving our right to our referral fee because of my responsibilities described below.

6. In January 2018, I received a call from co-lead counsel asking if I would be interested in serving as allocation counsel on behalf of grain handlers in connection with the global settlement of the litigation. I was ultimately retained by a grain elevator - Kruseman Fertilzer Company – and undertook my best efforts to perform the function of allocation counsel for the grain handler settlement subclass.

7. Not having had substantive involvement with the litigation, I set out educating myself about the procedural postures of the various cases, the competing interests involved, the significant orders that had been entered, and the issues that had arisen in the settlement process. I felt I needed to understand what I could about the course of the litigation, including points of contention between Syngenta and the various plaintiff subclasses, how certain arguments had been received by the judges involved, inherent differences among subclass members and how those differences would likely be perceived by fact-finders (with regard to pre-trial summary

proceedings, trial, and post-trial summary proceedings), how the experts would be received, and the strength of Syngenta's legal arguments with regard to grain handlers in particular.

8. Among other pleadings, I read the Third Amended Minnesota Class Action Master Complaint For Producers (Court File No.: 27-CV-15-3785); Syngenta's Memorandum of Law in Support of Rule 12.03 Motion for Judgment on the Pleadings (File No.: 27-CV-15-3785); the Preliminary Expert Report of Stephen J. Lucas – with its supporting materials – submitted in the Minnesota non-producer case (File No.: 27-CV-15-3785); the rebuttal report and supporting tables, charts, and graphs of Syngenta's expert – Quentin L. Mimms -- in the same case; selected (by me) portions of the deposition of Mr. Lucas taken in the MDL (MDL 2591, case no.: 2:14-MD-02591-JWL-JPO); selected (by me) portions of various sessions of the deposition of Mr. Mimms taken in the same case; the Petition for Damages filed by Archer Daniels Midland Company in the Parish of St. Charles, Louisiana (case no.: 79219); the Louisiana Petition for Damages and Second Amended Petition for Damages filed in the Parish of St. John the Baptist by Cargill companies (docket no.: 67061); the expert damages report of Colin A. Carter submitted for the producers in the MDL; the expert report of Bruce Babcock also submitted for the producers in the MDL; selected (by me) portions of the Colin Carter and Bruce Babcock depositions taken in the MDL; selected (by me) portions of the Mimms deposition taken in the MDL; and selected (by me) portions of the Lucas deposition taken in the MDL.

9. As part of gaining an understanding of the litigation landscape, I personally engaged in literature and legal research into agricultural economics, including the ways in which the various parties in the supply chain make and/or lose money, and how disruptions at various points in the supply chain affect, if at all, profitability. I read economic literature on grain pricing and futures trading I located on the internet and from the CBOT. I spoke at length with a former

trader on the CBOT to understand certain economic mechanics relating to risks and profitability along the grain supply chain. I spoke telephonically with Colin Carter, who had provided expert reports for the producers, and asked for and read specific literature he recommended with an eye on the economics of and related to grain handling.

10. During this process, I flew to New York and, on February 7, 2018, met with Chris Seeger, Steve Weiss, and Pat Stueve from the lead counsel team. Dan Gustafson could not make that meeting but we spoke by telephone at various other times. My purpose in speaking to them was to gain more insight as to the competing positions of the subclasses, including what was being perceived as their strengths and weaknesses – both by the courts and counsel. I understood my role was to maximize the recovery for the grain handlers, and I thereafter tested what I heard in these conversations in my own analysis of the competing and compelling issues.

11. At the February 7, 2018 meeting, I asked to be put in touch with Colin Carter, and, on February 20, 2018, I met with Mr. Carter in his office at the University of California at Davis. I had asked him to review the Lucas report that had been submitted for grain handlers and to discuss with me the financial impacts of the Chinese embargo on grain handlers. Through various questions, I tested various theories I had developed on damages to grain handlers. Although I retained (and paid) him for this purpose, I knew Mr. Carter had advocated for the producers, and I conducted myself with that in mind. I believe our session helped me to more fully understand certain economic facts, and after the meeting, I was better able to assess the various damages scenarios I had been contemplating and working on with respect to the grain handlers. As it turned out, this was the last step I took before making an allocation demand for the grain handlers and negotiating a result.

12. The negotiations for the allocation to Subclass 3 were always arms-length and vigorous. The final allocation to Subclass 3 was achieved after numerous offers and counteroffers, disagreements, and narrowing of differences. In my view, the result was and is a good one.

13. Kruseman Fertilizer Company ("Kruseman") retained WW and volunteered to be the named plaintiff for Subclass 3. Kruseman has been involved in this litigation since 2016, filing case No. 27-CV-16-18209 in Minnesota. Although Kruseman was not deposed as part of that case, its participation for settlement purposes was instrumental to achieving the result for Subclass 3. Kruseman was responsive to my questions and its answers helped me formulate my understanding of several damages issues. Kruseman also authorized its litigation counsel to provide me with pleadings and expert reports they had available. Kruseman's litigation counsel likewise answered my inquiries or directed me to others as I endeavored to arrive at a negotiating position. Given the role Kruseman assumed and fulfilled as the named plaintiff for Subclass 3, I respectfully request that Kruseman be granted an incentive award of $2,500.

14. Below is a detailed summary indicating the amount of time spent by each of the attorneys in WW who worked on this litigation and lodestar calculation based on WW's current billing rates. The summary was prepared from computerized records that were contemporaneously generated and kept by WW in the ordinary course of business. Time expended in preparing the application for fees and reimbursement of expenses has not been included in this lodestar. As reflected below, all the time WW expended in this matter was dedicated to common benefit work. Of course, the time spent on tasks related to representation of Subclass 3 was in lieu of performing other work that was available to WW.

15. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), WW submitted to Co-Lead Counsel in the MDL its time and expense submissions related to its WW's representation of Subclass 3.

16. As part of the preparation of my declaration, I re-reviewed all the time entries and expenses previously submitted in this litigation to exercise billing judgment.

17. After this re-review, I can confirm that this time was undertaken by the members of WW at my direction. I believe that the benefit time and expense information submitted on behalf of WW is accurate and in compliance with the Court's Common Benefit Order, with the caveat that these time and expenses related solely to the representation of Subclass 3 only.

18. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my law firm is $63,890. A breakdown of the lodestar is provided below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Kenneth A. Wexler	Partner	72.7	$850	$61,795
Justin N. Boley	Partner	2.9	$675	$1,957.50
Rose Campo	Paralegal	.5	$275	$137.50
TOTALS		76.1		$63,890

19. In addition, WW expended and seeks reimbursement of a total of $5,621.16 in expenses in connection with the prosecution of this litigation. WW recorded these expenses as they were incurred, and they are reflected in its computerized bookkeeping records that were created from invoices, receipts, and other proofs of the charges and payments.

20. The expenses incurred by WW are summarized as follows:

Description of Costs	Amount
Experts	$2,700.00

Description of Costs	Amount
Delivery services/messengers	$75.63
Copying	$0.09
Online research	$0.26
Out-of-town travel	$2,407.22
Out-of-town meals	$437.96
TOTAL	**$5,621.16**

21. As part of WW's request for expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order, with the caveat that the expenses incurred related to the representation of Subclass 3 only.

22. Except insofar as the Court or co-lead counsel determine that a multiplier is warranted for the value created by WW's work for Subclass 3, WW seeks an award of $63,890 in fees and reimbursement of expenses in the amount of $5,621.16.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 6th day of July 2018, in Chicago, IL.

Our Professionals....17

The Firm

WHO WE ARE.

Wexler Wallace LLP is nationally recognized as a leading firm in complex class action and multidistrict litigation, from investigation to trial and appeals, within the following legal areas:

// Antitrust

// Business and Commercial Litigation

// Consumer Protection

// Government Representation

// Healthcare Litigation

// Mass Torts

// Securities and Corporate Governance

// Whistleblower and False Claims

WE WORK FOR ALL.

At Wexler Wallace, we rely on the justice system to hold the powerful accountable for conduct that harms others. We are dedicated to protecting the rights and interests of all and, in this pursuit, represent shareholders, consumers, pension plans, institutional investors, businesses, governments, and organizations from all over the world. We act with the utmost integrity in our determination to achieve the most meaningful relief for our clients.

WE GET RESULTS.

Wexler Wallace is frequently retained by clients to pursue high-stakes litigation – often against some of the largest corporations represented by the most renowned law firms in the country. We regularly are asked by co-counsel to work with them and their clients on cases of wide-ranging importance. Through this work, we have helped shape the law and continue to pave the way for future successes for those aggrieved by fraud, antitrust violations, unfair competition, and other types of unlawful conduct.

OUR WORK IS RECOGNIZED.

Wexler Wallace attorneys have been recognized by their peers as well as by legal organizations for their outstanding level of service and commitment to the firm's cases and clients. Partners Ken Wexler and Ed Wallace each have an **AV Preeminent** rating from Martindale-Hubbell – the highest peer review rating. Ken has been named an **Illinois Super Lawyer** since 2008, Ed was named a Super Lawyer in 2014 and 2015, and other attorneys have been named Rising Stars.

Wexler Wallace was named a highly recommended Illinois litigation firm in the 2012 inaugural edition of **Benchmark Plaintiff**, with both partners named local litigation stars. The firm and its named partners have received the same honors every year since.

"Despite a small roster of attorneys, (Wexler Wallace LLP) regularly goes toe-to-toe with some of the largest companies and corporations in the world."
Benchmark Plaintiff, 2012

"I admire very much the work that you have done in this case, and you have taught me something. I think I'm more knowledgeable and a better judge because I've had contact with you. And thank you very much."
Hon. G. Patrick Murphy, *Clancy-Gernon Funeral Homes, Inc. v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, No. 09 Civ. 1008 (S.D. Ill.)

"I wanted to express appreciation again to class counsel for taking this case. I believe these are the kind of cases Federal Courts should do and are appropriate for class resolution."
Hon. Patti B. Saris, *In re Pharmaceutical Industry Average Wholesale Price Litig.*, MDL No. 1456, No. 01-cv-12257-PBS (D. Mass.) (final settlement hearing, with defendant GlaxoSmithKline, July 19, 2007)

"[T]his multiplier is justified by the risk of non-recovery in this case and the need to reward counsel for their significant achievement on behalf of the End-Payor Class . . . End-Payor Plaintiffs' counsel are highly experienced in complex antitrust class action litigation . . . . they have obtained a significant settlement for the Class despite the complexity and difficulties of this case."
Hon. John R. Padova, *Nichols v. SmithKline Beecham Corp.*, No. 00 Civ. 6222, 2005 U.S. Dist. LEXIS 7061, at *71-72, 79 (E.D. Pa. Apr. 22, 2005)

Leadership Positions

Wexler Wallace is frequently appointed as lead counsel and to plaintiff steering committees in complex, high-stakes litigation. Some of those appointments include:

CASE	COURT	APPOINTMENT
Coordinated Essure® Litigation	TBD	Plaintiffs' Executive Committee
Wolosyzn v. General Mills Inc., No: 0:16-cv-02869	D. Minn.	Plaintiffs' Executive Committee
In re Broiler Chicken Antitrust Litigation No. 16-cv-8637	N.D. Ill.	Liaison Class Counsel
Gibson v. The Quaker Oats Co., No. 1:16-cv-04853	N.D.Ill.	Interim Liaison Class Counsel
Edward Shapiro and Pacific Holistic Dental, INC., v. 3M Company, No. 0:16-cv-02606	D. Minn.	Plaintiffs' Executive Committee
Pension Trust Fund for Operating Engineers v. DeVry Education Group, Inc., et al., No. 16-cv-05198	N.D.Ill.	Interim Liaison Class Counsel

Vista Healthplan, Inc. v. Bristol-Myers Squibb Co., Case No. 01-cv-01295	D.D.C.	$135M settlement
Nichols v. Smithkline Beecham Corp. ("Paxil"), Case No. 00-cv-6222	E.D. Pa.	$65M

Practice Areas

Wexler Wallace is a nationally-recognized leader in complex class action and multidistrict litigation, with a commitment to excellence and achieving meaningful relief for its clients. The firm's diverse litigation practice spans the areas of antitrust, business and commercial litigation, consumer fraud litigation, government representation, healthcare litigation, mass torts, securities and corporate governance, and whistleblower and false claims litigation.

ANTITRUST

Unfortunately, individuals and businesses sometimes violate the rules of our market-based system, imposing artificially inflated prices on market participants. Conduct prohibited by state and federal antitrust laws can take the form of illegally-maintained monopolies, price fixing, the improper exchange of competitive information, patent abuses, and other forms of unfair competition.

Wexler Wallace is a leader in private antitrust enforcement, litigating a wide variety of class action cases involving many prominent industries, including the pharmaceutical, entertainment, service rental, lumber, energy, and electronic products industries.

Representative cases in the firm's antitrust practice area include:

IN RE BROILER CHICKEN ANTITRUST LITIGATION, 16-CV-8637 (N.D. ILL.)

Wexler Wallace, along with co-counsel, filed this class action alleging that the nation's largest chicken producers (such as Tyson and Pilgrims) agreed with each other to limit the supply of broiler chickens, in order to raise the prices on chicken and chicken products. The Court appointed Wexler Wallace as Liaison Counsel on behalf of a class of restaurants (and institutions, such as prisons and nursing homes) that purchased the defendants' chicken from a wholesaler. The plaintiffs are seeking to recover damages suffered when they overpaid on purchases of the defendants' chicken. The defendants filed motions to dismiss the case, but in November of 2017 the Court denied those motions almost entirely, issuing a 92-page opinion. The parties are in the discovery phase of the case, which will last into 2019.

FOREST RIVER FARMS V. MONSANTO COMPANY, NO. 4:18-CV-00181 (E.D. MO.)

Wexler Wallace and co-counsel filed this class action case against Monsanto in February 2018, alleging that Monsanto's rollout of genetically modified seeds that are resistant to the herbicide dicamba has created a distorted and monopolized market, manipulated by and susceptible to Monsanto's domination. Genetically-modified ("GM") crops and food are often touted to farmers and the public as miracle products. But when patented GM technology so changes the economics of agriculture that farmers have no choice but to use it, thus allowing biotech companies to charge monopoly prices and unfairly control the market, it is illegal conduct as alleged in the complaint. Monsanto knew that commercializing

dicamba-resistant technology would cause a spike in the use of dicamba, and conspired, agreed, and combined with other major biotech firms to unlawfully dominate the soy and cotton seed market.

UNITED FOOD AND COMMERCIAL WORKERS UNIONS AND EMPLOYERS MIDWEST HEALTH BENEFITS FUND, ET. AL. V. ALLERGAN, PLC NO.: 15-CV-12731 (D.C. MASS.)

Wexler Wallace filed this case against Allergan in June 2015 on behalf of a putative class of end-payors alleging that Plaintiffs and all Asacol end-payors were harmed by defendants' conduct in engaging in an unlawful "product hop." Patients had always paid for the brand name version of Asacol. In July 2013, a generic version was planned for release on the market, but because of the defendant's withdrawal of the drug from the market, a generic version does not exist and consumers are still paying higher prices for similar brand name versions. Wexler Wallace was appointed co-lead counsel. The Hon. Judge Denise J. Casper of the United States District Court District of Massachusetts granted plaintiffs' motion for class certification and denied the defendants' motion for summary judgement. The First Circuit stayed the trial set to begin on January 22, 2018 pending the resolution of Defendants' appeal of the District Court's class certification decision.

IN RE NEXIUM ANTITRUST LITIG., MDL NO. 2409 (D. MASS.)

Wexler Wallace, along with co-counsel, filed this antitrust class action, alleging that defendant AstraZeneca entered into non-competition agreements with a number of generic pharmaceutical manufacturers in order to delay marketing entry of generic versions of its blockbuster drug Nexium. Starting in October 2014, Wexler Wallace participated in a six-week jury trial in the action; it was the first trial of a "reverse payment" antitrust action since the Supreme Court's *Actavis* decision. While the jury made several key findings in favor of the Plaintiffs, it ultimately returned a verdict in favor of defendants AstraZeneca and Ranbaxy. Plaintiffs have since moved for a new trial, and end-payor plaintiffs (represented by Wexler Wallace and others) have moved for injunctive relief.

IN RE LIPITOR ANTITRUST LITIG., MDL. NO. 2332 (D.N.J.)

Wexler Wallace filed this class action against Pfizer Inc. and Ranbaxy Pharmaceuticals Inc., among others, seeking damages and equitable relief on behalf of end-payors of Lipitor and/or its generic bioequivalents for violations of antitrust and consumer protection laws. Plaintiffs allege that, among other things, defendants fraudulently procured a patent covering Lipitor and entered into an anticompetitive settlement with Ranbaxy in order to keep generic versions of the blockbuster drug off of the market.

NICHOLS V. SMITHKLINE BEECHAM CORP. ("PAXIL"), NO. 00-CV-6222 (E.D. PA.)

Wexler Wallace served as co-lead counsel in this case involving alleged efforts by GlaxoSmithKline, including "sham" patent litigation, to keep generic versions of Paxil off the market. This case is believed to be one of the first, if not the first, to allege misuse of patents to delay generic competition in a pharmaceutical market brought under Section 2 of the Sherman Act (rather than Section 1). The case settled for $65 million.

IN RE EFFEXOR XR ANTITRUST LITIG., NO. 11-CV-5661 (D.N.J.)

Wexler Wallace was appointed to the Indirect Purchaser Class Executive Committee in this antitrust litigation against pharmaceutical manufacturer Wyeth, Inc. regarding its antidepressant Effexor XR. The complaint alleges that Wyeth fraudulently obtained a number of method-of-use patents for Effexor XR and engaged in sham litigation against sixteen potential generic competitors in an effort to protect the Effexor XR monopoly. Plaintiffs further allege that Wyeth entered into an anticompetitive settlement with the first generic ANDA filer, Teva Pharmaceutical Industries, Ltd., and its US subsidiary Teva Pharmaceuticals USA, Inc., which delayed the entry of generic Effexor XR competitors for more than two years.

For more information about the firm's Antitrust Litigation practice, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/antitrust-litigation/.

BUSINESS AND COMMERCIAL LITIGATION

Confronting well-heeled and well-represented adversaries, Wexler Wallace attorneys represent businesses throughout the country in complex disputes ranging from breach of contract claims to business torts, including fraud, unfair competition, and breaches of fiduciary duty. The firm has represented small businesses on a contingency basis when those businesses were faced with litigating against larger adversaries that engaged in unfair and unlawful conduct.

Although Wexler Wallace attorneys are always prepared to offer zealous advocacy for the firm's clients in state or federal courts, they also have employed creative approaches to successfully handle difficult cases through alternative dispute resolution such as mediation or arbitration. The firm's willingness to extend its services in cases that other firms are unwilling or unable to handle is just another testament to its commitment to positive change.

For more information about the firm's Business and Commercial Litigation practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/business-commercial-litigation/.

CONSUMER PROTECTION

Wexler Wallace is a national leader in prosecuting consumer protection claims on behalf of both businesses and individuals in state and federal courts throughout the country. The firm has successfully prosecuted cases involving, but not limited to:

// unlawful environmental dumping
// improper Internet "lead generation" practices

// unfair billing practices of telecommunications companies

// mislabeling of dietary supplements

// the sale of defective drugs and household appliances

// unfair payment policies of health insurance companies

// false advertising by Internet service providers

// deceptive practices of social networking sites

// unlawful debt reduction scams

For more information about the firm's Consumer Protection practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/consumer-protection/.

GOVERNMENT REPRESENTATION

Our state, local, and federal governments are often victims of the same securities and healthcare frauds that are inflicted on businesses and individuals in the private sector. The government is an insurer through Medicare or Medicaid, and therefore overpays when brand name pharmaceutical manufacturers unlawfully suppress generic competition for their drugs. Similarly, government entities are investors with respect to their treasuries and pension plans. Thus, when false and misleading statements are issued by public companies, government entities are entitled to the same securities fraud damages that are available to private investors. Governments are also owed fiduciary duties in certain circumstances, and are often parties to multi-million-dollar contracts, the breach of which can result in significant damages.

Wexler Wallace helps government entities recover the funds taken from them through the unlawful conduct of others. Ultimately, those funds belong to taxpayers, who are the intended beneficiaries of government services. Wexler Wallace believes that government officials have not only the right, but also the obligation, to try to recover these assets for their constituents.

For more information about the firm's Government Representation practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/government-representation/.

HEALTHCARE LITIGATION

In the wake of ever-rising healthcare costs, Wexler Wallace is at the forefront of legal action being taken nationwide to challenge wide-ranging fraudulent and unfair conduct in the healthcare industry. Wexler Wallace has prosecuted claims for:

// reporting of fraudulent pharmaceutical prices

// failures to recall defective health devices

// an industry-wide conspiracy to increase the prices of over 400 brand name drugs

// the filing of baseless lawsuits and administrative actions to delay generic drug entry

// a pharmacy's illegal substitution of more expensive versions of generic drugs

Bringing claims under RICO, the antitrust laws, state consumer protection statutes, and more, Wexler Wallace has successfully prosecuted cases against some of the largest companies in the healthcare industry, including McKesson Corp., Becton Dickinson, AstraZeneca, GlaxoSmithKline, Abbott Laboratories, Bristol-Myers Squibb, Johnson & Johnson, and Bayer Corporation.

Wexler Wallace's case against McKesson Corp. for manipulating the reimbursement benchmark for drug purchases resulted in one of the largest, if not the largest, RICO settlements ever.

For more information about the firm's Healthcare Litigation practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/healthcare-litigation/.

MASS TORT LITIGATION

Wexler Wallace is a nationally-recognized leader in complex mass tort litigation involving defective drugs and medical devices that have injured hundreds or even hundreds of thousands of individuals. The firm investigates and aggressively pursues mass tort claims to promote industry-wide changes intended to benefit the public, prevent future lawsuits, and provide the maximum remedies under the law for those

who have been harmed. The firm's lawyers and staff are intimately familiar with the nuances of this complicated practice area and continually track the impact of new technological and scientific developments on mass tort litigation.

To deepen the legal team's medical knowledge and resources and to support those clients who have suffered injuries, Wexler Wallace employs a full-time registered nurse with certification as a Legal Nurse Consultant (LNC). Debbie A. Pritts, RN, LNCC has over twenty-five years of experience and works directly with the firm's clients throughout each stage of the legal process.

For more information about the firm's Mass Torts practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/mass-tort-litigation/.

SECURITIES AND CORPORATE GOVERNANCE

Over the last few years, we have learned all too well that lack of regulation and oversight can lead to corrupt corporate leadership, lack of transparency regarding the risks of significant investments, and the repeated securitization of the same bad investments.

Wexler Wallace has committed its resources to helping pension plans, governments, and others recover assets lost as a result of the weakness of mortgage-backed securities, auction rate securities, credit swaps, derivative swaps, and overextended securities lending programs. Through its membership in the National Association of State Treasurers, and its increased involvement in institutional finance and investment conferences, Wexler Wallace has catapulted itself to the forefront of this area of litigation, seeking redress and the recovery of assets lost through gross negligence and breaches of fiduciary duties by those in whom institutional investors placed their trust and confidence.

Securities litigation can often result in changes to corporate governance and policies designed to prevent future misconduct. Wexler Wallace believes the importance of this work cannot be overstated. The firm seeks to ensure that corporate officers and directors fulfill their responsibilities and provide full disclosure and transparency to those buying and selling securities, helping to ensure that our capital markets truly reflect the accurate information that should underlie every commercial transaction.

For more information about the firm's Securities and Corporate Governance practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/securities-corp-governance/

WHISTLEBLOWER AND FALSE CLAIMS LITIGATION

Under the Federal False Claims Act and state law counterparts, private citizens or "whistleblowers" may sue on behalf of the government for fraud committed against it. This type of fraud costs taxpayers billions of dollars each year. If a case is successful, the government may be able to recover treble damages and civil penalties for each violation and the private citizen or "relator" can receive his or her attorneys' fees and costs, as well as a portion of the funds awarded by the court.

Wexler Wallace is committed to seeing companies and individuals held responsible for fraud against the government and to representing private citizens willing to come forward and expose fraud.

For more information about the firm's Whistleblower and False Claims Litigation practice, including summaries of representative cases, please visit the firm's website, at http://www.wexlerwallace.com/practice-areas/whistleblower-false-claims-litigation/.

Our Professionals

Our legal team consists of professionals with a broad range of experiences and diverse backgrounds. Many of our lawyers serve as leaders in charitable institutions, teach at universities, and are members of national, state, and local bar associations. All of our professionals have earned the respect and admiration of our clients, judges, and co-counsel by the strength of their experience, diverse backgrounds, and overall commitment to excellence.

OUR PARTNERS

The partners of Wexler Wallace have been selected 15 times as "Super Lawyers" and "Rising Stars" in Illinois. Named partners, Kenneth A. Wexler and Edward A. Wallace, are each rated AV® Preeminent™ by Martindale-Hubbell, the highest rating in legal ability and ethics a lawyer can obtain. In addition, they have been named Illinois Local Litigation Stars by Benchmark Plaintiff every year since 2012.

OUR ASSOCIATES

Our associates hail from some of the top schools in the nation and have been recognized for outstanding academic achievement. As law students, Wexler Wallace associates served on the editorial boards of law reviews and journals, received academic honors, acted as student leaders, and participated in a variety of clinical programs to receive real-world legal experience before entering practice. Combined, our associates garnered 17 top of the class CALI awards for the highest grades in their courses and graduated with GPAs that placed them near the top of their respective law school classes.

KENNETH A. WEXLER

MANAGER AND FOUNDING PARTNER

Kenneth A. Wexler, the founder of the firm, is a 1980 graduate of the Georgetown University Law Center. He received a Bachelor of Arts degree in 1977, *summa cum laude*, from Washington University in St. Louis, Missouri.

For over 30 years, Ken has devoted himself to helping those whose rights have been denied, or who have been victims of the unscrupulous or fraudulent actions of others, typically more powerful persons or entities. Founder of Wexler Wallace, Ken was also a founding partner of the firm formerly known as Miller Faucher Cafferty and Wexler LLP. He began his career and was a partner in the Chicago law firm now known as Much Shelist Dennenberg Ament & Rubenstein, PC.

Ken has been in leadership positions in cases with far-ranging subject matters, including brand name manufacturer suppression of competition from generic drugs, fraudulent and deceptive product overcharges, discrimination and harassment, corporate waste and mismanagement, cost recovery for defective medical devices, false advertising, and government fraud. Ken's practice is devoted to complex class action and commercial litigation, which includes a substantial amount of health care litigation, claims brought under federal and state false claims statutes, and cases alleging violations of the securities and antitrust laws. At present, Ken is particularly focused on protecting issuers of municipal bonds, recovering losses for pension funds and other investors that were victimized by unlawful and improvident securities lending practices, and cost-recovery for victims of health care fraud, including Taft-Hartley Funds, self-insured employers, and government entities.

Ken is a member of the Chicago Bar Association, Illinois State Bar Association, Federal Bar Association, American Bar Association, Chicago Council of Lawyers, American Association for Justice, and the Illinois Trial Lawyers Association. He is admitted to the bar in Illinois and is licensed to practice before the Illinois Supreme Court, United States District Court for the Northern and Southern Districts of Illinois, the United States Court of Appeals for the First, Second, Third, Sixth, and Seventh Circuits, and the United States Court of Appeals for the District of Columbia. With so many of the firm's cases pending in jurisdictions across the country, Ken has also been admitted to practice *pro hac vice* in United States District Courts of California, Connecticut, the

District of Columbia, Florida, Maine, Maryland, Massachusetts, Minnesota, Missouri, New Jersey, New Mexico, New York, Ohio, Pennsylvania, South Dakota, Tennessee, Virginia, and Wisconsin.

Along with bar activities, Ken is a fellow of The Roscoe Pound Institute and is a member of the American Constitution Society for Law and Policy, the Center for International Legal Studies, the National Association of State Treasurers, and the Executive Committee of the Civil Rights for the Anti-Defamation League. Ken also volunteers with the Chicago coalition for the Homeless and is a lifetime member of the 100 Club of Chicago.

EDWARD A. WALLACE

PARTNER

Ed joined the firm in February 2000, a little over a month after its founding. Since then, he has helped lead the firm to national prominence. He became a partner of the firm in 2003 and joined Ken Wexler as an equity partner in 2006.

Ed focuses his practice on large scale multi-party complex litigation, and has been asked to serve in leadership positions in numerous high-profile cases, including recent appointments in securities litigation and mass torts. In August 2014, Ed led a trial team that achieved the first verdict involving a transvaginal sling mesh (a device used to treat stress urinary incontinence) in federal court. Wexler Wallace, along with co-counsel, tried this defective mesh product case, securing a $3.27 million verdict for Plaintiff Jo Huskey, a 52-year-old woman who was implanted with the mesh in 2011. Ed has been critical in the development of the firm's mass tort practice, and, in the process, he has gained a national reputation for integrity, efficiency, strategic planning, understanding the relevant science, and achieving success.

Ed's hard work led to his recognition as an Illinois Super Lawyer in 2014 and 2015, an award given annually to no more than 5 percent of lawyers in the state. Ed has an AV® Preeminent™ rating by Martindale-Hubbell, the highest rating a lawyer can obtain, indicating a very high to preeminent legal ability and exceptional ethical standards. Every year since its inaugural edition in 2012, Ed also has been named an Illinois Local Litigation Star by Benchmark Plaintiff.

He is admitted to the bar in Illinois and is licensed to practice before the Illinois Supreme Court, the United States District Court for the Northern and Southern Districts of Illinois, the United States District Court for the Western District of Michigan, the United States District Court for the District of Colorado, and the United States Court of Appeals for the Third and Seventh Circuits. He also has been admitted *pro hac vice* in many courts around the country.

Ed is a member of the American Bar Association and is a former Consumer Protection Law Subcommittee Newsletter Co-Chair. He also is a member of the Chicago Bar Association, where he is a member of the Class Action Committee, the Illinois State Bar Association, the National Association of Shareholder and Consumer Attorneys, Public

Justice, and the American Association for Justice ("AAJ"). Within AAJ, he belongs to the Commercial Law Section, the Product Liability Section, and the Section on Toxic, Environmental and Pharmaceutical Torts. At the AAJ's recent annual convention, Ed was re-elected co-chair for the Kugel Mesh Litigation Group.

Ed is a 1995 graduate of DePaul University College of Law. He received a Bachelor of Arts degree in 1991 from Eastern Illinois University.

KARA A. ELGERSMA

PARTNER

Kara A. Elgersma is a 2000 graduate of Georgetown University Law Center, with Bachelor of Arts Degrees in English and History obtained from the University of Kansas in 1997.

Kara came to Wexler Wallace from K&L Gates LLP, where she was a partner. At K&L Gates, Kara was a member of the Antitrust and Trade Regulation Department, focusing on antitrust litigation, franchising and dealership disputes, class actions and other complex commercial litigation, as well as advising clients on a variety of regulatory matters, including antitrust, FCC, and energy regulatory policies.

Kara's experience includes all aspects of complex commercial litigation. In addition, she is well-versed in arbitration, including pre-hearing case development and management, as well as the conduct of full hearings.

For six months in 2004, Kara was "on loan" to Kraft Foods Global, Inc., Northfield, Illinois, where she directly assisted the Chief Litigation Counsel for the company and handled a wide variety of litigation matters, including small and large product liability claims, general commercial litigation, civil investigative demands, business subpoenas, labor and employment litigation, and bankruptcy matters.

She is admitted to the bars of the Supreme Court of Illinois and Wisconsin, the District of Columbia Court of Appeals, the United States District Courts for the Northern District of Illinois, the District of Columbia, the District of Colorado and the Western District of Wisconsin, the United States Courts of Appeals for the Third, Fourth, Sixth, Seventh, and Tenth Circuits, and the Supreme Court of the United States.

Kara is a member of the American Bar Association, the Illinois State Bar Association, and the District of Columbia Bar Association. She was a Board Member of the Competition Law360 Advisory Board for 2009 to 2010, and she was involved as a Board Member for Girls On The Run of Northern Virginia, as well as a volunteer with Chicago Volunteer Legal Services.

MARK R. MILLER

PARTNER

Mark R. Miller received his J.D. from Loyola University Chicago School of Law in 2004 after graduating from Central Michigan University with a Bachelor of Science in History in 2001.

Over the last decade, Mark has represented both plaintiffs and defendants in all phases of complex litigation—from the investigation and filing of the complaint through discovery, motion practice, class certification, summary judgment, and trial or settlement. Since joining Wexler Wallace in 2006, his practice has included handling a wide variety of consumer protection, antitrust, securities, banking regulation, business, and contractual class action cases. In addition to his background in commercial and consumer litigation, his practice has evolved to focus on products liability mass torts; and he has recently played pivotal roles in the jury trials of several mass tort MDL cases. His work in those cases included working with experts, taking fact and expert witness depositions, participating on bellwether trial teams, and drafting much of the briefing addressing complex discovery, pre-trial, and post-trial motions. In doing so, he has enhanced the firm's reputation and developed solid relationships with judges, co-counsel, and clients alike.

Mark is admitted to the bar of the State of Illinois, the United States Court of Appeals for the First Circuit, and the United States District Courts for the Northern District of Illinois, Southern District of Illinois, and Eastern District of Michigan.

BETHANY R. TURKE

PARTNER

Bethany R. Turke joined Wexler Wallace after practicing in the New York and Chicago offices of Latham & Watkins LLP. Bethany's practice at Latham involved a wide range of civil and criminal litigation matters, including securities litigation, contract disputes, government investigations, and employment matters. She was also very active in Latham's *pro bono* practice, working tirelessly on behalf of clients facing various immigration, employment, and housing discrimination issues. Before joining Latham & Watkins, Bethany served as a law clerk to the Honorable Cheryl L. Pollak of the United States District Court for the Eastern District of New York. She received her J.D. from Harvard Law School in 2006.

Bethany is actively involved on cases in a number of Wexler

Wallace's practice specialties, including the firm's antitrust, healthcare, and consumer protection practice areas.

JUSTIN N. BOLEY

PARTNER

Justin's principal area of practice is complex class action litigation in antitrust matters. Since joining the firm, he has been heavily involved with virtually all of the firm's pharmaceutical antitrust cases, including, among others: In re Nexium (Esomeprazole) Antitrust Litigation, In re Wellbutrin XL Antitrust Litigation; In re Prograf Antitrust Litigation, In re Lipitor Antitrust Litigation, In re Effexor Antitrust Litigation, In re Androgel Antitrust Litigation, and In re Skelaxin (Metaxalone) Antitrust Litigation. He has also worked on antitrust cases involving price-fixing in international commodities markets and manipulation of benchmark interest rates, and he has taken the lead on investigations into the cartelization of the credit derivatives market and price-fixing among online travel sites and hotels.

Justin came to the firm after attending school abroad and obtaining a Master's Degree in International Relations. During law school, Justin's focus on corporate law, finance, and complex litigation earned him numerous top-of-the-class academic honors; he was awarded CALI Awards in Antitrust, Contracts, Legal Analysis, Research, and Writing III, Commercial Arbitration, Natural Resource Law, and Legal Profession (Ethics). Justin was a member of the Public Interest Law Committee at DePaul College of Law for three years. He also worked as a member of the New Media Team in President Obama's Presidential campaign headquarters in Chicago, where he helped facilitate the online organizing efforts of grassroots groups nationwide.

Justin is admitted to the bar of the State of Illinois, Western District of Wisconsin, United State Court of Appeals, Seventh Circuit, and the United States District Court for the Northern District of Illinois.

THOMAS A. DOYLE

OF COUNSEL

Thomas A. Doyle came to Wexler Wallace in the spring of 2012. Prior to joining Wexler Wallace, Tom was a principal of Thomas A. Doyle Ltd., where he focused his practice on antitrust and employment litigation. He has litigated class

and other complex litigation in state and federal courts throughout the United States, recovering millions of dollars for his clients.

Tom has been able to pursue claims efficiently and effectively, helping large groups of people recover for injuries that they have suffered from unlawful conduct by others. His appointed positions and representative matters include *In re TFT-LCD (Flat Panel) Antitrust Litigation*, *In re TransUnion Corp. Privacy Litigation*, and *Gomez v. PNC Bank.*

As a result of his work, he is often asked to lecture and write articles on topics relating to class litigation as well as alternative dispute resolution. Tom has been a lecturer, moderator, and panelist at several conferences, including the Annual Meetings of the ABA's Committee on Alternative Dispute Resolution, The University of Louisville's 29th Annual Labor & Employment Law Institute, and the ABA Section of Labor & Employment Law's National CLE Conferences.

He is admitted to the bars of the Supreme Court of Illinois, the United States District Court for the Northern District of Illinois (including the Trial Bar), the United States Court of Appeals for the Seventh Circuit, and the Supreme Court of the United States.

Tom is a member of the American Bar Association and recent co-chair of the Committee on Alternative Dispute Resolution, Section of Labor & Employment. He is also a member of the Chicago Bar Association and the Illinois State Bar Association. He recently served as a Director of the Chicago Bar Foundation, and he is an active member of the CBF's *Cy Pres* Committee. He serves on the Board of Directors of Latinos Progresando (a community service agency in Chicago's Little Village neighborhood).

He is a 1990 graduate of the University of Illinois College of Law, with a Bachelor of Science Degree obtained from Bradley University.

TIMOTHY E. JACKSON

ASSOCIATE

Timothy E. Jackson began work at Wexler Wallace as a summer associate while in law school. Tim received his J.D. from The Ohio State University Michael E. Moritz College of Law in 2010, where he was a Managing Editor on The Ohio State Journal on Dispute Resolution. He received his M.S. in

Psychology from Tulane University in 2007 and his B.S. in Psychology from Tulane in 2006. Tim's primary practice areas at Wexler Wallace are medical device litigation, product liability law and mass tort litigation.

TYLER J. STORY

ASSOCIATE

Beginning in law school, Tyler has focused his attention towards antitrust litigation. While a student at Pennsylvania State University, he held two antitrust research assistant positions: one in which he explored issues of indirect purchaser standing in state antitrust suits, the other in which he focused specifically on the application of antitrust law and economics in the pharmaceutical industry

Since joining Wexler Wallace, Tyler has been actively involved in various aspects of litigation concerning brand name manufacturer suppression of competition from generic drugs.

TANIA E. YUSAF

ASSOCIATE

Tania practices in the area of mass tort litigation, focusing primarily on transvaginal mesh multidistrict litigation. She has prepared deposition examinations for high-level company witnesses, drafted a number of pre-trial briefs, and implemented trial strategy as part of the transvaginal mesh trial team.

Tania joined Wexler Wallace after working as a health care regulatory analyst, a position in which she assisted hospitals and health plans in complying with Medicare, Medicaid, the Health Insurance Portability and Accountability Act (HIPAA), and the Affordable Care Act. She also previously worked at the American Academy of Pediatrics (AAP) helping AAP state chapters further anti-tobacco initiatives, including restrictions and bans involving electronic cigarettes, smokeless tobacco, tobacco sales, and smoking in cars with children. During her time as an LL.M. student, Tania externed with the American Medical Association (AMA), where she drafted white papers and issue briefs on a number of topics, including a brief on state health insurance exchanges featured at the 2010 AMA State Legislative Strategy Conference.

BRYAN D. PASCIAK

ASSOCIATE

Bryan received his J.D. from Notre Dame Law School, where he graduated with honors and was the recipient of the International Academy of Trial Lawyers Award. Prior to joining Wexler Wallace, Bryan practiced at a civil litigation law firm in Pittsburgh, where he assisted in representing clients in all stages of complex civil litigation. Before practicing law, Bryan gained valuable experience and insight as an intern for state and federal court judges, the Financial Industry Regulatory Authority, and plaintiff and defense law firms.

At Wexler Wallace, Bryan applies his skills and experience toward assisting with cases that span many of the firm's practice areas, including antitrust litigation, business and commercial litigation, securities and corporate governance, and whistleblower-false claims litigation.

ANDREW D. WELKER

ASSOCIATE

Andrew joined Wexler Wallace in the spring of 2017, from Katten Muchin Rosenman LLP, bringing with him a deep background in commercial litigation, healthcare fraud, and Corrupt Organizations Act (RICO) matters. Andrew has extensive experience representing multi-billion dollar corporations, mid-sized companies, and individuals in complex legal matters of fraud, class actions, contract disputes, copyright infringement, and product liability litigation. His contributions to the firm include work on numerous antitrust, mass tort, business and commercial, and healthcare litigation cases.

Andrew received his J.D. from Washington University in St. Louis School of law. He also attended the University of Missouri for his B.A., where he graduated cum laude.

LAUREN C. KAPLAN

ASSOCIATE

Lauren joined Wexler Wallace in the fall of 2017, where she uses her experience in medical malpractice, professional negligence, and commercial litigation to assist with the firm's numerous mass tort cases.

Lauren received a Bachelor's of Science in Public Affairs from Indiana University in 2011. Since receiving her J.D. from Chicago-Kent College of Law in 2014, Lauren has focused her career on helping clients who had been the victims of negligence, medical and professional carelessness, fraud, and similar legal disputes.

Lauren has been deeply involved with all aspects of the legal process throughout her career. From co-drafting an Illinois Supreme Court brief to sitting second chair in a negligence trial that secured a multi-million dollar jury verdict, Lauren possesses a keen legal mind and a desire to seek justice for her clients.

RICHARD L. MILLER II

OF COUNSEL

Richard L. Miller II specializes in commercial litigation and class action cases. He has advised multi-billion dollar clients and litigated disputes involving contracts, real estate, insurance coverage, creditors' rights, products liability, trademarks, and employment law. He has also represented consumers in various cases that resulted in tens of millions of dollars being distributed to class members.

Early in his career, Richard served as a prosecutor for Champaign County, Illinois. In a little over two years, he litigated approximately 50 jury trials, as well as innumerable bench trials. He prosecuted four murder cases, two of which resulted in pleas and two of which went to trial, resulting in guilty verdicts and sentences of 45 and 55 years. Richard once conducted five jury trials, back-to-back, and obtained guilty verdicts in all five cases.

Richard is an Adjunct Professor at the Northwestern School of Law where he has taught Trial Advocacy since 2005 and Advanced Trial Advocacy since 2013. Further, in his role as an arbitrator, Richard presides over proceedings litigated by

others. Richard was an arbitrator for the Cook County Mandatory Arbitration program for two years. Since 2008, Richard has considered evidence and arguments, and decided cases, as an arbitrator for the American Arbitration Association.

DEBBIE A. PRITTS

LEGAL NURSE CONSULTANT

Debbie A. Pritts, R.N., LNCC is a Registered Nurse with more than 20 years of clinical experience in Oncology, Med-Surg, Endoscopy, Ambulatory/Outpatient Care, Orthopedics, Ophthalmic Laser, Home Health and Utilization Review. She has been certified in BLS (Basic Life Support), ACLS (Advanced Cardiac Life Support) and Chemotherapy Administration. Debbie achieved the status as Legal Nurse Consultant Certified (LNCC) through the American Association of Legal Nurse Consultants (AALNC) in November 2005. LNCC certification is designated after successfully meeting the requirements through examination and experience that validate qualifications, knowledge, and practice in the field of legal nurse consulting. LNCC is the only legal nurse consulting credential recognized by American Association of Legal Nurse Consultants and accredited by the American Board of Nursing Specialties (ABNS).

Debbie has experience in Product Liability, Medical Malpractice, Personal Injury, and Workers Compensation. Debbie is a member of the American Association of Legal Nurse Consultants and the West Virginia Upper Ohio Valley Chapter of the AALNC, presently serving as the chapter's president. She has been a Member of the Board of Directors since 2005, serving as a past Treasurer and is Chair of the Website Committee. Additionally she is a founding member of the WV Bar Association, Legal Nurse Consultant Section.

She works directly with clients of Wexler Wallace, from the first time they contact the firm, through trial. Her expertise and passion for the job has provided the firm's clients with the service they deserve.

FOR THE DISTRICT OF KANSAS

IN RE SYNGENTA AG MIR162 CORN LITIGATION **THIS DOCUMENT RELATES TO ALL CASES EXCEPT:** *Louis Dreyfus Company Grains Merchandising LLC v. Syngenta AG, et al.,* No. 16-2788-JWL-JPO *Trans Coastal Supply Company, Inc. v. Syngenta AG, et al.,* No. 2:14-cv-02637-JWL-JPO *The Delong Co., Inc. v. Syngenta AG, et al.,* No. 2:17-cv-02614-JWL-JPO *Agribase International Inc. v. Syngenta AG, et al.,* No. 2:15-cv-02279-JWL-JPO	**Master File No. 2:14-MD-02591-JWL-JPO** **MDL No. 2591**

DECLARATION OF LYNN R. JOHNSON

I, Lynn R. Johnson, declare as follows:

1. I am a member of the Kansas and Missouri bars and am a partner at Shamberg, Johnson, and Bergman in Kansas City, Missouri.

2. I make this declaration based on my personal knowledge and if called to testify to the contents hereof, I could and would competently do so. I respectfully submit this declaration in support of Plaintiffs' request for attorneys' fees and expenses in this litigation.

3. I obtained by undergraduate degree in accounting from Kansas State University in 1967 and obtained by J.D., with honors, from Washburn University School of Law in 1970. I joined my firm as an associate in 1970 and became a partner in 1974. I have been listed in the

Best Lawyers in America, have been recognized multiple times by *Super Lawyers* as one of the top fifty lawyers in the Kansas City Area, am a member of the Inner Circle of Advocates, and am a fellow of both the International Academy of Trial Lawyers and the American College of Trial Lawyers.

4. I served as settlement counsel for the subclass defined in the Settlement Agreement as "Subclass 2," a subclass of U.S. corn producers that purchased Viptera or Duracade seed and produced corn from Viptera or Duracade seed. *See* ECF No. 3507-2 § 1.2.2. In fulfilling my duties as counsel for Subclass 2, I

a. Reviewed Syngenta's and the plaintiffs' briefing on dispositive motions;

b. Reviewed the reports submitted by the plaintiffs' experts;

c. Attended two settlement conferences in Washington, D.C. and one settlement conference in New York;

d. Negotiated the terms of the settlement for Subclass 2.

5. In compliance with the Court's Order Establishing Protocols for Common Benefit Work and Expenses, ECF No. 936 (the "Common Benefit Order"), I submitted my time and expense submissions to Co-Lead Counsel in the MDL.

6. In compliance with the Common Benefit Order, I did not include in these submissions time and expenses spent in respect to any individual clients who were not either bellwether or class representative plaintiffs.

7. As part of the preparation of my declaration, I re-reviewed all of the time entries and expenses previously submitted in this litigation to exercise billing judgment.

8. My billing is based upon actual time spent on representing Subclass 2 in this litigation. My re-review of time spent was compared to all of the emails, letters and travel time

spent.

9. After this re-review, I can confirm that this time was undertaken by me personally.

10. After exercising billing judgment and making billing reductions based on my review of the records, the total lodestar for my work is $55,100 as shown in the chart below.

Name	Title	Total Hours	Hourly Rate	Lodestar
Lynn Johnson	Attorney	76	$725	$55,100

11. I seek $4,910.16 in expenses in connection with the prosecution of the litigation, most of which are related to my trips to settlement conferences in Washington and New York. Those expenses are summarized below:

Description of Costs	Amount
Travel to settlement conference in Washington, March 2017	$1,543.63
Travel to settlement conference in Washington, May 2017	$1,450.29
Travel to settlement conference in New York, February 2018	$1,777.84
Parking, postage, copies	$138.40
TOTAL	$4,910.16

12. As part of my request for an award of expenses, I have reviewed Section III(B) of the Court's Order Establishing Protocols for Common Benefit Work and Expenses and Establishing the Common Benefit Fee and Expense Funds (Doc. 936) (the "Common Benefit Order"). The requested award is in conformity with the Common Benefit Order, with the caveat that these amounts were incurred in the course of my representation of Subclass 2, rather than in

representing the general class.

13. The expenses pertaining to this case are reflected in my records. These records are contemporaneously prepared from receipts; expense vouchers, check and credit card records and other documents and are an accurate record of the expenses.

14. Custom Farm Services, LLC, Marvin Miller, and CE Cobb Farms agreed to serve as class representatives for Subclass 2. Custom Farm Services, LLC, Marvin Miller, and CE Cobb Farm's participation for settlement purposes was instrumental to achieving the result for Subclass 2. These plaintiffs were responsive to my questions and their answers helped me formulate my understanding of several damages issues. Given the role Custom Farm Services, LLC, Marvin Miller, and CE Cobb Farms assumed and fulfilled as the class representatives for Subclass 2, I respectfully request that they each be granted an incentive award of $2,500.

I declare under penalty of perjury pursuant to 28 U.S.C. § 1746 that the foregoing is true and correct.

Executed on this 10th day of July, 2018, in Kansas City, Missouri.

Hennepin County, MN

INTRODUCTION

Non-Producer Plaintiff and Producer Plaintiffs (collectively "Plaintiffs") bring their claims individually and on behalf of two proposed classes of persons and entities harmed by Syngenta's conduct at issue: (1) Minnesota "Producers" (i.e. corn growers), and (2) Minnesota "Non-Producers" (e.g. entities that purchased, stored, transported, and/or exported corn grown in the U.S.). Syngenta is a multibillion-dollar global agribusiness enterprise that develops and sells genetically modified corn seeds. Plaintiffs and Syngenta are part of an interconnected industry and market that demands and expects all market participants to act, at least in part, for the mutual benefit of all others in their interconnected web.

Biotechnology sits at the heart of this industry. It holds great promise but can also cause great harm. Biotechnology companies such as Syngenta must act responsibly when commercializing new products containing genetically modified traits. All industry participants, including Syngenta, understand that irresponsible commercialization of a new genetically modified product can cause major trade disruption and massive harm to both Producers and Non-Producers. That is why industry leaders, including Syngenta, have pledged to all other stakeholders that they will act responsibly in introducing new genetically modified traits.

Syngenta broke that pledge. Starting in 2010, it took unreasonable and irresponsible actions to launch two new products containing genetically modified traits before obtaining approval from China, a key export market. These actions caused the Chinese market to be effectively closed to U.S. corn shipments starting in November 2013.

After a period of development, Syngenta petitioned the United States Department of Agriculture ("USDA") in 2007 for deregulation of its Agrisure Viptera® branded cornseed in 2007, which contains the genetically modified MIR162 trait. The USDA approved Viptera for sale

27-CV-15-13285
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

in 2010. Syngenta recognized that China had not approved MIR162. Syngenta further knew that China's approval was important, as a large and growing export market. In fact, Syngenta had recently sought regulatory approval in China, which on average takes two to three years. Syngenta had previously been warned by industry participants not to introduce the MIR162 genetic trait without key export market approval because of the devastating consequences that were likely to occur from premature commercialization. But Syngenta had a limited patent life for this genetic trait. Every year that passed without commercialization resulted in lost monopoly profits for Syngenta.

Syngenta had a choice. It could gamble, or it could wait. Syngenta decided to gamble and immediately brought Viptera to market. Syngenta knew that China would not approve MIR162 until sometime after that trait had entered export channels, which, in turn, created a huge risk that the U.S. corn industry could lose one of their large and growing export markets. Thus, Syngenta knew that Producers and Non-Producers were likely to be adversely impacted by a sudden loss of China as a market for U.S. corn.

From 2011 through 2013, Syngenta was asked by industry participants to stop its aggressive commercialization of Viptera. China's importance as a purchaser of U.S. corn was growing rapidly, and China still had not approved MIR162. Syngenta ignored these pleas. It expanded sales for the 2012 and 2013 growing seasons. By then, Viptera corn had infiltrated the general domestic corn supply.

In November 2013, Syngenta's gamble went bust. China did exactly what everyone in the industry, including Syngenta, knew would happen if China found U.S. shipments contaminated with MIR162: China began rejecting entire shipments of corn from the United States. Industry participants reacted in early 2014 by demanding that Syngenta halt commercialization of Viptera,

27-CV-15-13285
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

as well as a new product, Agrisure Duracade. Duracade contained both MIR162 and a new trait called Event 5307, which was also not approved by China and other key export markets. Syngenta had petitioned the USDA for deregulation of Duracade in 2011, and approval was granted for that product in 2013. Industry participants raised "grave concerns about the serious economic harm" to those in the industry, including farmers, from the loss of the Chinese market. The National Grain and Feed Association quantified the harm at that time as ranging from $1 billion to $2.9 billion.

Syngenta again ignored the pleas. Instead, it continued to sell Viptera and launched Duracade for the 2014 crop year. These actions prolonged the problem and expanded the economic loss to Producers and Non-Producers. Corn grown by farmers who did not purchase Syngenta's products had become contaminated with the MIR162 and Event 5307 traits through cross-pollination from neighboring fields. In addition, Viptera- and Duracade-grown corn was commingled with other corn in grain elevators and other storage facilities.

During this process, Syngenta actively misled Producers and Non-Producers. For instance, Syngenta represented repeatedly that China would approve MIR162 in March 2012, even though it knew that approval in that time-frame was extremely unlikely. Syngenta also made false representations about the effect of the Chinese market on the global corn market and about measures it would take to prevent genetically-altered crops from contaminating other crops. Syngenta went so far as to represent to the USDA and the public that "there should be no effects on the U.S. maize export market" from deregulation, and that it would impose stewardship and channeling requirements to steer Viptera corn away from unapproved export markets. Syngenta, however, did not follow through in any meaningful way on these commitments. In fact, Syngenta actually increased the risk of contamination and commingling of Viptera. For example, when Bunge North America, Inc. ("Bunge") refused to accept Viptera corn, hoping to minimize the risk

27-CV-15-13285
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

of MIR162 contaminating shipments bound for China, Syngenta sued in an attempt to force Bunge to accept its unapproved product.

Syngenta's actions foreclosed the China market for U.S. corn exports for an extended term and with a lasting, material impact since it reopened. The loss and subsequent restricted growth of this market, which the USDA had predicted to be the largest export market for corn by 2020, has caused enormous harm to Producers and Non-Producers. That harm continues to grow. China approved MIR162 in December 2014; however, it still has not approved Event 5307. U.S. corn exports to China have not yet begun to recover, and it remains to be seen whether they will ever regain the levels they would have attained if not for the Syngenta trade disruption.

This action seeks compensation for thousands of U.S. corn Producers and Non-Producers, who have suffered substantial losses as a direct result of Syngenta's irresponsible conduct, as well as punitive damages for Syngenta's willful harm to the U.S. corn industry.

I. JURISDICTION AND VENUE

1. This is a civil case in which the Court has original jurisdiction under the Constitution of the State of Minnesota, Article 6, §3.

2. Plaintiffs do not assert any claims arising under federal law.

3. The Court has personal jurisdiction over defendant Syngenta Seeds, Inc. because Syngenta Seeds, Inc. maintains its principal place of business in Minnesota, transacts business here, and uses real or personal property situated in Minnesota. Minn. Stat. § 543.19. Syngenta Seeds, Inc., has used or possessed real or personal property in Minnesota, has transacted business in Minnesota, and has committed acts outside of Minnesota that have caused injury or property damage in Minnesota.

4. Venue is proper in Hennepin County under Minn. Stat. §§ 542.01, 542.02, and 542.11

because Defendants have marketed, sold, or otherwise disseminated, and continue to market, sell, or disseminate Viptera and Duracade corn in Hennepin County, and throughout Minnesota.

5. Venue is also proper in this district pursuant to the Minnesota Supreme Court's orders of May 22, 2015, A15-0758 and A15-0764, appointing this Court and the Honorable Thomas M. Sipkins "to hear and decide all matters, including pretrial and trial proceedings, in the cases currently filed in any Minnesota state district court, or filed in the future in any Minnesota state district court, against Syngenta Corporation, Syngenta Seeds, Inc., or any related Syngenta entities, and asserting claims alleging that Syngenta unlawfully released or launched a genetically modified corn seed."

II. PARTIES

A. Plaintiffs

6. Leroy Edlund ("Edlund") is a citizen of Minnesota residing in Cyrus, Minnesota. Edlund is engaged in the business of planting, growing, harvesting and selling corn. Edlund does not buy corn seed with Syngenta's MIR162 event. Rather, Edlund only buys corn seed that has either not been genetically modified or corn seed genetically modified with traits that have been approved by all major corn importing countries, including China. At all times relevant to this action, Edlund has been engaged in farming in the State of Minnesota. Edlund's income results from the ultimate sale of corn grown on his farmland.

7. Douglas A. Redman ("Redman") is a citizen of Minnesota residing in Wells, Minnesota. Redman is engaged in the business of planting, growing, harvesting and selling corn. Redman does not buy corn seed with Syngenta's MIR162 event. Rather, Redman only buys corn seed that has either not been genetically modified or corn seed genetically modified with traits that have been approved by all major corn importing countries, including China. At all times relevant to

27-CV-15-13285
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

this action, Redman has been engaged in farming in the State of Minnesota. Redman's income results from the ultimate sale of corn grown on his farmland.

8. Marvin Jensen ("Jensen") is a citizen of Minnesota residing in Kensington, Minnesota. Jensen is engaged in the business of planting, growing, harvesting and selling corn. Jensen does not buy corn seed with Syngenta's MIR162 event. Rather, Jensen only buys corn seed that has either not been genetically modified or corn seed genetically modified with traits that have been approved by all major corn importing countries, including China. At all times relevant to this action, Jensen has been engaged in farming in the State of Minnesota. Jensen's income results from the ultimate sale of corn grown on his farmland.

9. Roger Ward ("Ward") is a citizen of Minnesota residing in Mapleton, Minnesota. Ward is engaged in the business of planting, growing, harvesting and selling corn. Ward does not buy corn seed with Syngenta's MIR162 event. Rather, Ward only buys corn seed that has either not been genetically modified or corn seed genetically modified with traits that have been approved by all major corn importing countries, including China. At all times relevant to this action, Ward has been engaged in farming in the State of Minnesota. Ward's income results from the ultimate sale of corn grown on his farmland.

10. Plaintiff Matawan Grain and Feed, Inc. ("Matawan") is a Minnesota corporation with its principal place of business in Minnesota. Matawan operates a grain elevator at which it bought, stored, and sold grain, including corn. Matawan's income results from the sale of corn and other grains.

B. Defendant

11. Syngenta Seeds is a Delaware corporation with its principal place of business at 11055 Wayzata Boulevard, Minnetonka, Minnesota 55305-1526. Syngenta Seeds is a direct subsidiary of

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

Syngenta Corporation and described itself in its Complaint filed in *Syngenta Seeds, Inc. v. Bunge North America, Inc.*, No. 5:11-cv-04074-MWB, United States District Court, Northern District of Iowa ("*Syngenta v. Bunge*"), as

> a leading agribusiness company committed to sustainable agriculture through research and technology. Syngenta is, among other things, in the commercial seed business. It develops, produces, and sells, through dealers and distributors or directly to growers, a wide range of agricultural products, including corn and soybean seed exhibiting useful traits that have been developed with the techniques of modern biotechnology. The seed products are then grown and harvested as raw materials for the production of biofuels or grain for livestock feed; or are milled and processed for food products.

Among Syngenta Seeds' products that it has sold in the State of Minnesota are the Viptera and Duracade variety of corn seeds that are at issue here. These seeds express, or contain, genetically-engineered traits that were designed to confer resistance to insects.

12. Syngenta Seeds is liable for the actions of those with whom it acted in concert through agreements or other arrangements to act in a collective manner and/or as a joint venture, including Syngenta Corporation ("Syngenta Corp."), Syngenta AG, Syngenta Crop Protection AG ("Crop Protection AG"), Syngenta Crop Protection, LLC ("Crop Protection LLC"), and Syngenta Biotechnology, Inc. ("Syngenta Biotech"). Syngenta AG wholly owns, directly or indirectly, each of Syngenta Seeds, Crop Protection AG, Syngenta Corp., Crop Protection LLC, and Syngenta Biotech (hereinafter, collectively "Syngenta").

III. FACTUAL ALLEGATIONS

13. Biotechnology firms such as Syngenta develop and obtain patents on their bio- engineered products, in this instance seeds. These products are also referred to as genetically-modified organisms, or "GMOs." A patent gives the biotechnology firm the exclusive right to sell its bio-engineered products; however, those patents eventually expire. Biotechnology firms have an

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

economic incentive to "commercialize" (i.e. bring their products to market for planting and harvest) as soon as possible after filing a patent application to maximize profitability.

14. Syngenta set a market share goal for MIR162 by 2014 and sought to achieve commercialization as soon as possible.

15. Premature commercialization poses a well-known and significant risk of harm to Producers and Non-Producers if bio-engineered commodity products are commercialized before they are approved by key importing nations. Certain importing nations, such as China, have a "zero tolerance" policy and will reject grain imports from the United States if they detect the presence of even trace amounts of an unapproved bio-engineered genetic trait in grain shipments. This was well known in the biotechnology industry, including Syngenta, by 2007 at the latest.

16. Syngenta commercialized MIR162 and Event 5307 despite clear risk of harm to its stakeholders, including the Plaintiffs, despite Syngenta's knowledge of that risk, and despite Syngenta's own professed commitment to responsible management.

17. Moreover, Syngenta commercialized MIR162 by consistently misrepresenting the importance and status of China's approval, and without adequate systems in place to isolate or channel MIR162, virtually assuring that MIR162 would contaminate the U.S. corn supply.

A. Recognized Risk of Irresponsible Commercialization

18. As recognized within the industry, including by Syngenta, the harm threatened by irresponsible commercialization is very real.

19. "There have been a number of high-profile cases involving genetically modified varieties ... and disruption of international shipments of commodity grains such as corn, wheat, and rice." http://www.syngentafoundation.org/index.cfm?pageID=703.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

20. For example, bio-engineered corn contaminated the U.S. corn supply in 2000 and disrupted international trade causing loss to producers and non-producers. *See In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828 (N.D. Ill. 2002).

21. In 2006, bio-engineered rice contaminated the U.S. rice supply, again disrupting trade and causing massive damages to U.S. rice producers and non-producers. *See In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d 1004 (E.D. Mo. 2009); *Bayer CropScience LP v. Schafer*, 385 S.W.3d 822 (Ark. 2011).

22. In addition to being aware of these and other well-publicized incidents at the time it commercialized MIR162, Syngenta had (and has been) continuously warned by stakeholders about the importance of, and need for, responsible commercialization.

23. For example, when Syngenta commercialized MIR604 (Agrisure® RW) in 2007, the National Grain and Feed Association ("NGFA") (of which Syngenta is a member) and the North American Export Grain Association ("NAEGA") warned against an "'ill-conceived' plan to commercialize" Syngenta's Agrisure biotechnology-enhanced corn as endangering U.S. corn and corn-product exports, because Syngenta had not obtained regulatory approval for food and feed use in Japan and other U.S. export markets. *See* Houin, "Feed and grain organizations warn growers of limited export markets," Farm World (4/25/2007).

24. The International Grain Trade Coalition also chastised Syngenta, stating that Syngenta "did not respect the responsibility of importing governments to perform necessary risk assessments as demanded by their legislation," that the introduction of Agrisure® RW "was not done in an open transparent manner," and that Syngenta "did not complete authorization in major international markets possessing scientifically sound approval systems prior to commercialization." Letter from International Grain Trade Coalition to Michael Pragnell, CEO

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

Syngenta dated April 18, 2007, p2. The International Grain Trade Coalition further stated that Syngenta's conduct "[e]xposed downstream members of the value chain including producers, handlers, exporters, importers, food processors and distributors to significant liability as currently all countries employ a zero threshold policy for an event not authorized by the importing country" and strongly urged Syngenta to "reverse immediately its decision to commercialize Agrisure RW at this time." *Id.*

25. The Biotechnology Industry Organization ("BIO") is the world's largest biotechnology trade association, of which Syngenta is or was a member. BIO has expressly recognized that "[a]synchronous authorizations combined with importing countries maintaining 'zero tolerance' for recombinant-DNA products not yet authorized results in the potential for major trade disruptions." BIO Product Launch Stewardship Policy, May 21, 2007, at Annex 1 Introduction; *see also* BIO Product Launch Stewardship, December 10, 2009, at Annex 1 Introduction (same); BIO "Stewardship: Actions to be Taken Prior to Launching Special Traits," October 4, 2010, at Annex 1 Introduction (same); BIO Product Launch Stewardship: Food and Agriculture Section, November 27, 2012, at Annex 1 Introduction (same).

26. As stated in BIO's December 10, 2009 "Product Stewardship Policy":

> Since the commercial introduction of biotechnology-derived plant products in 1996, an increasing number of biotechnology-derived plant products intended for food or feed use are authorized for commercial production in many countries throughout the world; however, authorizations in importing countries vary depending on the timing of submissions for import authorization as well as the duration of the authorization process in each country. As a consequence of these asynchronous authorizations, low levels of recombinant-DNA plant materials that have completed full safety assessments in accordance with national and international standards in one or more countries may, on occasion, be present in food or feed in countries in which the authorization process of the relevant recombinant-DNA plant material has not been completed. Asynchronous authorizations combined with importing countries maintaining 'zero tolerance' for recombinant-DNA products not yet authorized results in the potential for major trade disruptions.

http://www.bio.org/sites/default/files/Product_Launch_Stewarship_12_10_09.pdf.

B. Syngenta Recognizes Its Stewardship Obligation

27. Under the "Corporate Responsibility" section of its website, Syngenta acknowledges the integrated nature of the commodity market and its responsibility to stakeholders affected by its business, including but not limited to Producers and Non-Producers:

> Our stakeholders are the people who can affect our business or who are affected by it. They include the following groups:
>
> Growers
>
> Industry
>
> Non-governmental organizations and international agencies
>
> Investors Employees Government

28. Syngenta has committed to "respond to feedback from its stakeholders" and "to implement high standards of stewardship for the safe, effective and environmentally responsible use of its products." http://www.syngenta.com/global/corporate/en/about-syngenta/corporate-responsibility/Pages/cr-policy-and-commitments.aspx.

29. Syngenta represents that "it prioritize[s] the issues that are most relevant to our business and most important to our stakeholders." http://www.syngenta.com/global/corporate/en/about-syngenta/corporate-responsibility/pages/focus-areas.aspx

30. Syngenta also represented that it maintains high standards and even eclipses regulatory requirements.

31. In Syngenta's "Code of Conduct," posted on its website for all stakeholders to read, Syngenta represents:

- "The trust and confidence of Syngenta's stakeholders is critical to our continuing success and will only be sustained if the company acts and is seen to act in accordance with the highest standards of ethics and integrity.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

> To ensure we meet the standards which our stakeholders expect, we have produced this new Syngenta Code of Conduct . . . ."

- "We provide innovative, reliable, high-quality products and have safeguards to protect stakeholders."
- "The creativity of our people provides products which help growers meet the global challenges to agriculture."
- "We will work closely with customers, contractors, users and all other stakeholders to ensure proper and responsible use of our products and understanding of the precautions that apply ...."

32. In November 2007, Syngenta adopted its own "Bio Product Launch Policy." The Syngenta Bio Product Launch Policy incorporates BIO's Product Launch Policy and requires Syngenta to perform a market and trade assessment to identify key importing nations and obtain those nations' approval before commercializing a new bio-engineered product. http://www.syngentabiotech.com/biopolicy.aspx.

33. On its website, Syngenta also suggests that it complies with the stewardship standards adopted by CropLife International and Excellence Through Stewardship, advising farmers that they may learn more about "stewardship" by visiting the provided links. *See* http://www.syngentabiotech.com/BioStewardshipLinks.aspx.

34. It is clear that the importance of obtaining import approval from key markets was well known and recognized within the biotechnology industry and by Syngenta before Syngenta commercialized MIR162 under the Viptera brand name and trademark for the 2011 crop year.

35. Syngenta committed to not commercializing new genetically modified traits that had not been approved by key import markets. *See, e.g.*, BIO Product Launch Policy, Syngenta Implementation Principles (Nov. 2007). Syngenta clearly knew the risks of premature commercialization and knew that without stringent containment and channeling procedures, MIR162 would contaminate the U.S. corn supply and move to export markets, causing significant

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

trade disruption, as set out below. Based on clear warnings and its own knowledge, Syngenta knew, or plainly should have known that China was a key and growing market. Responsible practice dictated that Syngenta not commercialize Viptera, and certainly not do so without adequate containment and effective channeling measures in place, before obtaining import approval. Syngenta, however, did just the reverse.

C. Regulation, Testing, and Deregulation of MIR162

36. The process of commercialization begins with obtaining approvals from U.S. agencies, including but not limited to deregulation from the Animal, Plant, and Health Inspection Service ("APHIS") of the USDA.

37. The regulations in 7 C.F.R. part 340 (the "GMO Regulations") regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe may be plant pests. Such genetically-engineered organisms and products are considered "regulated articles." The GMO Regulations were promulgated under the Plant Protection Act (the "PPA"), 7 U.S.C. § 7701, *et seq*., or its predecessor statutes.

38. MIR162 is a genetically modified trait that before its deregulation, was regulated by the USDA under the PPA and GMO Regulations.

39. The GMO Regulations at 7 C.F.R. §§ 340.3 and 340.4 allow release into the environment of regulated, genetically modified traits, such as MIR162, before their deregulation, through field trials conducted under permits issued by, or notifications to, APHIS. Developers who field test genetically modified traits, such as Syngenta Biotech in its field testing of MIR162, are required to adhere to certain performance standards in the GMO Regulations to ensure the regulated genetically modified organism does not persist in the environment or enter the food or feed

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

supply. Similarly, at the end of all field tests, developers must destroy or properly contain any viable plant material in the field and ensure no regulated material persists in the environment beyond the duration of the trial.

40. Syngenta is no stranger to release of regulated GMO events. In 2005, Syngenta entered into a settlement with the USDA ($375,000 fine plus a required training program) stemming from its release of still-regulated Bt10 corn, which Syngenta supplied as deregulated Bt11 corn between 2001 and 2004. About 14,000 bags of Bt10 seeds were sold from 2001 to 2004, mainly to U.S. farmers but also in Canada and Argentina. The Bt10 event was found in at least five Bt corn breeding lines in the U.S, and it was estimated that the seeds could have been planted on 37,000 acres in the U.S, producing "an estimated 150,000 tons of corn from this area" and accounting for approximately .01% of the total U.S. corn acreage. *See* New York Times, "U.S. Fines Swiss Company Over Sale of Altered Seed," (Apr. 9, 2005); PR Newswire, "Syngenta Agrees to Settlement With USDA on Unintended Bt10 Corn" (http://www.prnewswire.com/news-releases/syngenta-agrees-to-settlement-with-usda-on-unintended-bt10-corn-54220787.html). Syngenta later paid a $1.5 million fine to the EPA, which conducted an investigation confirming the distribution of unregistered Bt10 corn on "over 1000 occasions." EPA News Release "EPA Fines Syngenta $1.5 Million for Distributing Unregistered Genetically Engineered Pesticide." (Dec. 21, 2006).

41. Between 1999 and 2007, Syngenta Biotech conducted at least 119 field trials of MIR162 corn under at least 20 permits issued by, or notifications to, APHIS under the GMO Regulations at sites in 31 states, including multiple field tests in Minnesota.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

42. The GMO Regulations in 7 C.F.R. § 340.6(a) provide that any person may submit a petition to APHIS seeking a determination that an article should not be regulated under 7 C.F.R. §340.

43. On May 24, 2007, Syngenta filed a patent application for MIR162 to secure its exclusive right to market that corn trait, pending regulatory approval by the USDA.

44. On or about September 10, 2007, Syngenta Biotech submitted a petition (the "MIR162 Deregulation Petition") seeking a determination of nonregulated status (APHIS Petition Number 07-253-01p) for corn (Zea mays L.) designated as transformation event MIR162, which has been genetically engineered for insect resistance, stating that the corn line MIR162 is unlikely to pose a plant pest risk and, therefore, should not be a regulated article under the GMO Regulations.

45. On information and belief, Syngenta Biotech continued its field tests of MIR162 under the GMO Regulations during the approximately 31-month period after filing the MIR162 Deregulation Petition and the USDA decision deregulating MIR162 in April 2010.

46. Syngenta Biotech stated in the MIR162 Deregulation Petition that it understood "that a copy of the MIR162 Deregulation Petition may be made available to the public as part of the public comment process." MIR162 Deregulation Petition at 3 of 268. APHIS's notice, published in the Federal Register on January 13, 2010 (75 Fed. Reg. 1749) (the "MIR162 Deregulation Notice"), expressly invited public comment regarding the MIR162 Deregulation Petition and further provided instructions as to how copies of the petition and accompanying draft environmental assessment and plant pest risk assessment could be obtained either by placing a phone call or accessing them on the internet.

47. In a preliminary observation to Section IX of the MIR162 Deregulation Petition, entitled "Adverse Consequences of Introduction" (the "Adverse Consequences Discussion"), Syngenta

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

Biotech represented that it knew "of no data or observations that indicate [that] MIR162 would adversely impact the quality of the human environment, directly, indirectly, or cumulatively. This includes a lack of anticipated effects on ... the economy, either within or outside the U.S."

48. Specifically, among the matters addressed in the Adverse Consequences Discussion were "Economic Impacts" at Section IX.D. In the introduction to that section, at pages 108-09, Syngenta Biotech stated:

> Economic considerations are not explicitly described in the factors listed in 40 CFR § 1508.27. However, economic impacts do relate to the significance of the requested action and have been considered by some courts in reviewing NEPA [National Environmental Policy Act] compliance.

49. The economic impacts discussed included the "Effects on the Export Market," at Subsection IX.D.4, page 111, which included Syngenta Biotech's representation that "there should be no effects on the U.S. maize export markets" and advised that applications for approval of MIR162 maize were in process in a number of such export markets with "functioning regulatory systems," including China, stating:

> There should be no effects on the U.S. maize export market since **Syngenta is actively pursuing regulatory approvals** for MIR162 maize in countries with functioning regulatory systems for genetically modified organisms and that import maize from the U.S. or Canada. Regulatory filings for MIR162 maize are in process for Colombia, Japan, South Korea, Taiwan, China, the Philippines, Australia and New Zealand, South Africa, the European Union, Russia, and Switzerland. (Emphasis added).

50. Other portions of the MIR162 Deregulation Petition made similar representations regarding China.

51. Syngenta Biotech also stated in Subsection IX.D. of the MIR162 Deregulation Petition that stewardship agreements with growers would require channeling of MIR162 away from export markets that had not approved import of MIR162 maize, that Syngenta would undertake "a wide-

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

ranging grower education campaign" respecting channeling, and that channeling would be effective based on prior experiences with the specialty maize market:

> Syngenta's stewardship agreements with growers will include a term requiring growers to divert this product away from export markets (i.e. channeling) where the grain has not yet received regulatory approval for import. Syngenta will communicate these requirements to growers using a wide-ranging grower education campaign (e.g., grower Stewardship Guide). As noted in the context of the IRM program, these procedures are not hypothetical.
>
> The ability to channel particular types of maize for particular uses, such as the export market, is demonstrated by the continuing success of the specialty maize market. Use of identity preservation measures has enabled growers to maintain a wide variety of specialized maize products, including white food maize, waxy maize, hard endosperm maize, high oil maize, nutritionally enhanced maize, high extractable starch maize, non GMO maize, and organic maize (U.S. Grains Council, 2006). Channeling programs are well established for separating each of these maize varieties. As set out above, these practices have continued successfully long after the introduction of numerous varieties of transgenic maize.

52. The stewardship agreements to which Syngenta Biotech referred were later used between growers and Syngenta Seeds.

53. In December 2009, based on its review of the MIR162 Deregulation Petition, APHIS prepared a Draft Environmental Assessment that parroted what Syngenta Biotech had represented in the MIR162 Deregulation Petition:

> There should be no effects on the U.S. corn export market since Syngenta is actively pursuing regulatory approvals for the MIR162 corn in countries with functioning regulatory systems for genetically modified organisms and that import corn from the U.S. or Canada. Regulatory filings for the MIR162 corn are in process for ... China.

54. The Draft Environmental Assessment was among the documents publicly available under the MIR162 Deregulation Notice.

55. On April 12, 2010, APHIS concluded that MIR162 corn should be deregulated. *See* Determination of Nonregulated Status for MIR162 Corn (Apr. 12, 2010); *see also* Syngenta

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

Biotechnology, Inc. Determination of Nonregulated Status for Corn Genetically Engineered for Insect Resistance, 75 Fed. Reg. 20560 (Apr. 20, 2010).

56. Before making that determination, APHIS, on April 9, 2010, issued its National Environmental Policy Act Decision and Finding of No Significant Impact and, in March 2010, issued its Final Environmental Assessment. APHIS compared the anticipated impact by taking no action (i.e., keeping MIR162 as a regulated article) with deregulating MIR162 and concluded in the Finding of No Significant Impact that in each instance the impact on the "Export Market" would remain "unchanged." Similarly, in the Final Environmental Assessment dated March 2010, APHIS adopted and repeated Syngenta's representations that it did not expect any effects on the U.S. corn export market "by the cultivation of the MIR162 corn cultivars" and that applications to countries with functioning regulatory systems, including China, were in process.

57. Thereafter, on April 21, 2010, Syngenta issued its press release, "Syngenta receives approval for breakthrough corn trait technology in the U.S." (Apr. 21, 2010). In making the announcement that MIR162 had been deregulated, Syngenta noted the plans for its imminent commercialization, stating that "[t]he trait will be combined with the Agrisure 3000GT trait stack to provide corn growers with broad-spectrum, insect control and glyphosate tolerance for maximum convenience and productivity" and that "Syngenta plans to commercialize hybrids containing the Agrisure Viptera trait for the 2011 growing season."

58. The April 21, 2010 press release confirms that the MIR162 Deregulation Petition was a document prepared and published by Syngenta for the sole purpose of facilitating, promoting, and inducing the commercial sale of its products containing the MIR162 trait. The MIR162 Deregulation Petition contained statements and representations to induce APHIS to deregulate MIR162, thereby beginning the commercialization of the product. Further, the MIR162

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

Deregulation Petition was filed with full knowledge that the statements and representations therein would be published to stakeholders, including Producers and Non-Producers. The commercial nature of the statements in the MIR162 Deregulation Petition is clear: In explaining the rationale of the MIR162 Deregulation Petition, Syngenta stated that "[t]ransformation event MIR162 maize has been developed by Syngenta to provide growers with maize varieties that are resistant to feeding damage caused by a number of significant lepidopteran insect pests. This trait will be offered to growers in combination with other deregulated maize traits." MIR162 Deregulation Petition at 11. The MIR162 Deregulation Petition espoused the sale of the product to growers, and was rife with representations about the commercial benefits of Syngenta's product and expected market impact. The following further indicates that Syngenta made commercial representations in the MIR162 Deregulation Petition:

a. "Transformation event MIR162 has been developed by Syngenta to provide U.S. growers with maize hybrids that are resistant to feeding damage caused by a number of lepidopteran insect pests. … Commercialization of this new trait has the potential to reduce conventional insecticide use in maize, increase grower profits, and improve grain quality." (p.13);

b. "[I]t [MIR162] will be commercialized as a combined-trait hybrid with Syngenta's Bt11 maize event." (p.96);

c. Syngenta's numerous references to and representations regarding the commercial benefits to farmers from introduction of MIR162. (*see, e.g.*, pp. 5, 97, 109 (enhanced productivity), p.110 (increased competition and farmer and consumer choice));

d. Syngenta's repeated observations that no adverse consequences should occur to the economy, either within or outside the United States (*see e.g.*, p.5) and the statements regarding the lack of impact on exports and intended channeling away from export markets that had yet to approve MIR162 as alleged above;

e. An appendix report regarding the economic implications of the introduction of MIR162; and

f. Syngenta's acknowledgement that the MIR162 Deregulation Petition would be made available to the public as previously alleged (p.3).

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

59. Contrary to Syngenta's representations that its regulatory filings were "in process" in China, Syngenta first sought regulatory approval for MIR162 from China's Ministry of Agriculture three years later, in or around March 2010. *See* http://www.syngenta-us.com/viptera_exports/images/MIR162-Regulatory-Timeline-9-2014.pdf.

60. Consistent with its statements to the USDA in the MIR162 Deregulation Petition, Syngenta considered China to have a functioning and predictable regulatory system.

D. Syngenta's Initial Commercialization

61. As Syngenta knows, nothing about USDA deregulation requires a developer such as Syngenta to commercialize.

62. Responsible practice dictated Syngenta obtain import approval from key market countries before commercialization (or at minimum, before first planting). *See, e.g.*, BIO Product Launch Stewardship, December 10, 2009, at p.4.

63. As early as 2009, Syngenta acknowledged that China was a key export country.

64. In a presentation to the NGFA in 2010, Syngenta listed China as among "key import approvals" it was or would be seeking. *See* Powerpoint titled "2010 Syngenta Pipeline," Presentation to the National Grain and Feed Association.

65. Syngenta, however, knew well that it would not have import approval from China for the 2011 crop year.

66. The typical time period for import approval from China at that time was approximately 2-3 years.

67. Syngenta was not even projecting approval from China for the 2011 crop year but rather, was hoping for approval by the 2012 crop year.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

68. Syngenta privately planned from the outset to commercialize Viptera with or without China's regulatory approval, notwithstanding the commitments it had made to stakeholders and industry participants not to commercialize genetically modified traits until after approval from key export markets.

69. Syngenta commercialized Viptera for the 2011 growing season despite the lack of regulatory approval from China, and despite Syngenta's knowledge that China was a key (and growing) export market for U.S. corn.

70. Syngenta did not disclose these facts to Producers or Non-Producers.

71. Syngenta was well aware in 2010 of the strong likelihood that China would be a significant import market by 2011.

72. It was well known at least by August 2010 that China was an important and growing export market for US corn. As reflected in a trade publication at the time:

> China is entering a 'new era' of corn buying. The world's most populous country may import as much as 15 million tons of corn in 2015, according to the U.S. Grains Council. ... Chinese imports of corn will grow from 1.7 million tons in 2010 to 5.8 million tons in 2011, and to 15 million tons in 2014-15, according to Hanver Li, Chairman of Shanghai JC, speaking to the U.S. Grains Council.... Where will China import all this corn from? The first place they will turn is the U.S., which is the world's largest corn exporter, accounting for 60% of global corn exports in 2009.... If China imports an incremental 600 million bushels of corn in 2014 from the U.S., using the USDA's baseline projections, U.S. corn ending stocks would be 960 million bushels. This would put the Ending Stocks to Use Ratio at 6.3%, the lowest level since 1995. 2010 is a major turning point in the grain market. The Chinese transition to becoming a net importer of corn will have a substantial implication on the world's corn supply.

http://www.farmlandforecast.com/2010/08/chinese-imports-to-change-grain-markets/.

73. Syngenta was, and continues to be, a member of the U.S. Grains Council. Indeed, Syngenta's Rex Martin has, on information and belief, actively participated as a member of the Council's Biotechnology Advisory Team.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

74. In addition, NAEGA warned Syngenta of the importance of obtaining Chinese regulatory approval before launch during a meeting in or around August 2010 with NGFA's Biotechnology Committee. *See* July 14, 2011 NGFA Newsletter. The same issue was discussed at the subsequent NGFA Biotechnology Committee meetings – during the March 2011 convention and another meeting on June 29, 2011 in Washington.

75. Syngenta knew of NAEGA's warning by the summer of 2010 and also knew of NAEGA's position that import approval should be obtained from China before marketing MIR162.

76. Nevertheless, Syngenta refused to stop its commercialization of Viptera in 2010 for planting and harvest in 2011.

77. In the fall of 2010, NGFA, in a private meeting with David Morgan, Regional Director of North America and President of Syngenta Seeds, also urged Syngenta to delay commercialization of Viptera, emphasizing the risk of trade disruption with China.

78. On October 29, 2010, a Reuters article was circulated among Syngenta executives stating: "Chinese corn imports have rocketed this year and are expected to continue growing next year, after China's own harvest couldn't keep up with a boom in demand...."

79. Evidence of China's importance continued to mount before planting in 2011.

80. In January 2011, Syngenta knew that China had become the second most important market for U.S. corn.

81. The USDA's long-term projections, compiled in November 2010 and issued in February 2011, forecast dramatic increases in China's imports of corn from the USDA's prior year's projections. As stated by the USDA, the "increase in China's imports account for one-third of the growth in world corn trade."

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

82. As early as 2011, Syngenta knew that China's import requirements influenced global commodity prices and understood the risk of proceeding with commercialization without approval from China.

83. At the time it was marketing and selling Viptera – and before planting in 2011 – Syngenta clearly knew of China's importance.

84. In a June 2010 Risk Management Report," Syngenta recognized that MIR162 [would be] detected as unapproved trait" as a consequence of large scale production "before all import approvals are in place." The report recognized that increased production in 2010 of corn containing MIR162 increased the "likelihood of MIR162 being detected as [adventitious presence] in an export channel." Syngenta classified the impact of this risk as "high." Risk Management Report, dated June 2010; *see also* MIR162 & EU approvals Powerpoint attached to e-mail from David O'Reilly, dated Oct. 21 2009.

85. On February 25, 2011, Syngenta's Head of Industry Relations corresponded with the Head of Syngenta's Southeast Asian Territory as follows:

> I believe I have discussed with you several times about our risk with MIR162 and not having approval in EU and China. I have been getting more questions from traders … lately and [Charles Lee, Head of Corn for North America] wanted me to be sure you understood the potential risk for China.

86. Syngenta could, and should, have waited to market Viptera. It also could, and should, have withdrawn it from the market before planting. But it did not.

87. To the contrary, and despite the risks, Syngenta Seeds sold Viptera to approximately 12,000 Producers with a projected yield estimated in September 2011 of 250 million bushels. *See Syngenta v. Bunge*, 820 F. Supp. 2d 953, 958 (N.D. Iowa 2011). Viptera growers could be found in nearly every state such that the market for Viptera products was very broad across the U.S. *See*

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

id. at 963. Syngenta projected that Viptera seed sales would exceed twenty percent (20%) of the U.S. corn seed market in future years. *See id.* at 958.

88. Other published estimates indicate that during the 2011 crop year, Viptera had been planted on 1.1% of the acres in the U.S. on which corn was grown.

E. Syngenta's Continuing Irresponsibility After 2011 Planting

89. After planting, but before harvest in 2011, the importance of China, and the risk of MIR162 contamination and market disruption, continued to grow.

90. A 2011 news article projected that China "will probably buy 5 million metric tons this year from 2 million tons in 2010."

91. On July 22, 2011, Syngenta's CEO Michael Mack stated: "The need to improve yield and quality is present across all emerging markets in the region, although it's China which continues to have the greatest impact on world markets, with increasing imports not just of soybeans but also now of corn." July 22, 2011 Transcript of Remarks (http://www.syngenta.com/global/corporate/SiteCollectionDocuments/pdf/transcripts/H1-2011-results-transcript.pdf).

92. In fact, Syngenta had known for some time that China would be a significant importer of corn in 2011.

93. In August 2011, still before the first commercially-grown corn planted with the MIR162 trait had been harvested, NGFA and NAEGA issued a Joint Statement warning Syngenta about MIR162:

> U.S. farmers, as well as the commercial grain handling and export industry, depend heavily upon biotechnology providers voluntarily exercising corporate responsibility in the timing of product launch as part of their product stewardship obligation.... The negative consequences of overly aggressive commercialization of biotech-enhanced events by technology providers are numerous, and include exposing exporting companies to financial losses because of cargo rejection,

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

> reducing access to some export markets, and diminishing the United States' reputation as a reliable, often-preferred supplier of grains, oilseeds and grain products. Premature commercialization can reduce significantly U.S. agriculture's contribution to global food security and economic growth.
>
> Putting the Chinese and other markets at risk with such aggressive commercialization of biotech-enhanced events is not in the best interest of U.S. agriculture or the U.S. economy.

94. As stated by these associations: "The grain handling and export industry have communicated consistently, clearly and in good faith with biotechnology providers and seed companies about the importance of biotech-enhanced events in commodity crops receiving regulatory approvals or authorizations – prior to commercialization – in key export markets where foreign governments have functioning regulatory systems that approve biotech-enhanced traits. These communications regarding key export markets, identified through market and trade assessments, have been conveyed through industry trade associations and in direct communications by individual companies." *Id.*

95. Not only did Syngenta commercialize Viptera prematurely, it did so without adequate systems in place to either isolate MIR162 or channel it away from markets, including China, from which approval was not obtained.

F. Transgenic Contamination

96. Corn, or maize, has staminate (male) and pistillate (female) flowers on the same plant and is wind pollinated. While there is some possibility of self-fertilization, corn generally is considered an outcrossing species. Under normal field conditions, some 95% of the ovules are fertilized by pollen from other plants. Pollen is released in large quantities. "Individual corn plants produce 4 to 5 million pollen grains. Therefore, even if only a small percentage of the total pollen shed by a field of corn drifts into a neighboring field, there is considerable potential for

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

contamination through cross pollination." Thomison, "Managing 'Pollen Drift' to Minimize Contamination of Non-GMO Corn," Ohio State University Extension Fact Sheet.

97. "Once released from the tassels into the air, pollen grains can travel as far as 1/2 mile (800 m) in 2 minutes in a wind of 15 miles per hour (27 km/h) (Nielsen 2003b)." Kent Brittan, "Methods to Enable the Coexistence of Diverse Corn Production Systems," University of California. Studies indicate that "cross-pollination between cornfields could be limited to 1% or less by a separation distance of 660 feet (200 m), and to 0.5% or less by a separation distance of 984 feet (300 m). However, cross-pollination frequencies could not be reduced to 0.1% consistently, even with isolation distances of 1,640 feet (500 m)." *Id.*

98. The Association of Official Seed Certifying Agencies (AOSCA) recognizes that "[a]lthough most corn pollen is deposited near its origin, isolation by very long distance (several miles) from any other corn is probably the only means of assuring complete confinement other than assuring complete asynchrony of flowering." However, "[t]he matter of whom or what entity controls the area constituting a proposed isolation zone and beyond could be crucial and/or problematic to successful confinement. AOSCA Report at 62. Assuring "complete asynchrony of flowering" also is fraught with shortcomings. For example, "[d]ifferences in maturity between the early and late hybrid may not be large enough to ensure that the flowering periods of each hybrid will not overlap, especially when certain climatic conditions may accelerate or delay flowering. Moreover this strategy will only work if [the farmer] control[s] the adjacent fields or can closely coordinate [his] corn planting operations with those of [his] neighbors." Thomison, "Managing 'Pollen Drift' to Minimize Contamination of Non-GMO Corn," Ohio State University Extension Fact Sheet.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

99. In addition, "[p]lanting operations to control pollen drift are only part of the process of producing an IP corn grain crop." *Id.* Other major issues include harvesting, storage, and commingling within the production and supply chain.

100. "Different corn breeds within an individual farm are commingled at the harvesting stage. Corn from hundreds of thousands of farms is then further commingled as it is gathered, stored and shipped through a system of local, regional and terminal grain elevators. Elevators, storage and transportation facilities are generally not equipped to test and segregate corn varieties. The commingled corn is then marketed and traded as a fungible commodity." *In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828, 834 (N.D. Ill. 2002).

101. As a developer of genetic events, including genetically engineered corn, Syngenta knew or certainly should have known the very high likelihood that if commercialized, MIR162 would disseminate throughout the supply chain – in fields, storage and transportation – via the numerous routes that transgenic contamination occurs.

102. Syngenta knew that enough commingling of Viptera with non-Viptera corn would occur at harvest in the fall of 2011 to be detectable in export channels, and that as a result there was a risk that China would reject shipments of corn due to the presence of Viptera.

103. Before commercializing MIR162, Syngenta also knew the risk that MIR162 would move into export channels from planting and harvest of MIR162, knew that risk was significant, and knew that detection of MIR162 in markets lacking approval created significant risk of trade disruption.

104. Syngenta, however, took few to no steps to assure that MIR162 would not enter the U.S. corn supply through cross-pollination and/or commingling in fields, and took wholly inadequate steps to prevent commingling within grain elevators or otherwise within the supply

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

chain as described below, virtually assuring that MIR162 would contaminate the U.S. corn supply in every way possible.

G. Syngenta's Nonsensical and Ineffective "Stewardship" Program

105. Syngenta's representation in its MIR162 Deregulation Petition that the "ability to channel particular types of maize for particular uses such as the export market" is demonstrated by success in the "specialty maize market" is grossly misleading. In specialty markets like organic farming, the grower receives a premium and, as such, takes the onus on himself to isolate his specialty corn crop from transgenic contamination from neighboring fields (such as spatial and temporal isolation and detasseling). *See* Thomison, "Managing Pollen Drift in Maize Seed Production," Department Horticulture and Crop Science, Ohio State University ("Growers of value added identity preserved (IP) grains need to control pollen contamination in order to optimize expression of value added traits in specialty maize and thereby obtain premiums."). The specialty seller also markets to a specialty buyer to whom he channels. Both have incentive to take all measures necessary to avoid contamination by non-specialty corn. The growing, marketing, and distribution system of commodity corn is vastly different. A "Commodity Crop" is "a crop which in the ordinary course is grown using common agricultural practices and is commingled and not segregated for special handling or use when it enters the chain of commerce." Biotechnology Industry Organization, "Product Launch Stewardship: Food and Agriculture Section," November 27, 2012, at Annex 1 Introduction n.3.

106. Syngenta knew that the commodity market is different from the specialty market.

107. The difficulties with channeling are illustrated by the infamous "StarLink" contamination in 2000 that was the subject of significant litigation. *See In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828 (N.D. Ill. 2002). That is particularly so where millions of acres

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

of the commodity to be channeled – MIR162 corn – were planted all across the U.S. Syngenta did not make even minimally reasonable efforts to prevent transgenic contamination.

108. Syngenta's representations to the USDA illustrate Syngenta's awareness of the kind of system designed to avoid contamination. Well-known measures in specialty markets include specifying strict containment protocols by contract (e.g., cleaning combines and storage areas, isolation distances, dedicated facilities, and inspections) and tracing the product through the supply chain.

109. Syngenta, however, did not take meaningful steps to even minimize the risk of pollen-mediated gene flow and commingling of Viptera with non-Viptera corn.

110. Responsible stewardship procedures include, at minimum, "generally accepted best seed quality practices designed to prevent low level presence of unauthorized products and [to] minimize unintended incidental presence of products authorized in the county of production" and "[m]ak[ing] available prior to commercialization a reliable detection method or test for use by growers, processors and buyers that enables crop identity verification for intended use." *See* BIO "Product Launch Stewardship," dated December 10, 2009 Annex 1, Policy Guidance; BIO "Stewardship Actions to be Taken Prior to Launching Special Traits," dated October 4, 2010, Annex 1, Policy Guidance; BIO "Product Launch Stewardship: Food and Agriculture Section," dated November 27, 2010, Annex 1 Policy Guidance.

111. Syngenta stated that it would make available a reliable detection method or test for MIR162 before commercializing Viptera.

112. In July 2010, Syngenta executives discussed methods for detecting genetically modified traits.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

113. Syngenta did not provide a test method to farmers or grain handlers as part of a required stewardship program.

114. Syngenta also could have contractually required that Viptera growers adhere to stringent practices that would have decreased the likelihood of contamination. Syngenta did not do so, however, because to do so would have drastically reduced sales of that product.

115. Instead, and contrary to requiring isolation, Syngenta Seeds gave away free bags of Viptera to farmers as part of a campaign to encourage growers to grow Viptera side-by-side with other corn to compare performance. *See Syngenta*, 820 F. Supp. 2d at 958.

116. Syngenta expected Viptera corn to cross-pollinate with non-Viptera corn and told farmers to consider the adjacent corn Viptera corn. Yet, there was no contractual requirement for growers to take measures to prevent such cross-pollination in their own fields, to segregate Viptera from non-Viptera corn, or to prevent contamination of other farmers' fields.

117. In fact, Syngenta advised at least one grower that he had no obligation to tell neighboring corn farmers or grain originators that he had planted Viptera. This advice was in response to the farmer's concern that he might be liable if his Viptera corn cross-pollinated with his neighbor's corn.

118. Moreover, on information and belief, in addition to the acreage on which Viptera (and later Duracade) have been grown from sales of those products, Syngenta has grown on land within the U.S. corn containing the MIR162 trait for purposes of seed increase and to develop inventories of product to sell to farmers. This additional growth further increased the presence of MIR162 within U.S. agriculture and the widespread, pervasive contamination that has caused disruption of trade in U.S. corn with China.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

119. Syngenta's commercial sales of Viptera for planting, growing, and harvest in 2011 reached across the U.S., covering nine hundred nineteen (919) counties and thirty-eight (38) states. *See* "Unit Stats by State and County, Viptera Only" (Lee Bunge deposition exhibit); *see also Syngenta v. Bunge*, 820 F. Supp. 2d at 958, 963. Despite the pervasive presence of Viptera and Syngenta's knowledge of the risks, Syngenta did not require growers to comply with the kind of strict measures Syngenta knew were minimally necessary to even have a chance at containment.

120. Syngenta's professed "channeling" efforts, which could and should have been in place well before harvest to direct Viptera away from markets lacking import approval, also were wholly—and purposefully—inadequate.

121. In its 2007 MIR162 Deregulation Petition, Syngenta represented that a lack of Chinese approval would not pose a problem for Producers and Non-Producers because:

> Syngenta's stewardship agreements with growers will include a term requiring growers to divert this product away from export markets (i.e. channeling) where the grain has not yet received regulatory approval for import. Syngenta will communicate these requirements to growers using a wide-ranging grower education campaign (e.g., grower Stewardship Guide) ... [T]hese procedures are not hypothetical.

122. Syngenta's "stewardship" program, however, presented "hypothetical" and ineffective procedures, which made contamination of the U.S. corn supply virtually certain.

123. Contrary to representations in its MIR162 Deregulation Petition, Syngenta did not, on information and belief, institute a "wide ranging grower education campaign" through its Stewardship Agreements, Stewardship Guides or otherwise. Syngenta certainly did not do so in a manner that would be meaningful and effective.

124. On information and belief, none of Syngenta Seeds' Stewardship Agreements with growers contained any details on Syngenta's stewardship program. Instead, the agreement

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

provided that growers should comply with the "most current" version of a "Stewardship Guide," which might or might not be given to them when they received the product, and was subject to unilateral change at any time via modification to a website. *See* Syngenta Seeds, Inc. Stewardship Agreement (Revised 08/2009) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 03/14/2011) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 05/11/2011) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 06/05/2013) at 1.

125. In other words, Syngenta's "stewardship" program for Viptera depended, at the outset, on thousands of individual farmers across the country locating and understanding a Stewardship Guide that they may not have been provided at the time of signing the Stewardship Agreement or receiving the product.

126. Moreover, while the Stewardship Agreements contained a provision for "channeling," they made no mention of China.

127. The 2009 version of the Stewardship Agreement provided that the grower "agrees to: Channel grain produced from seed to appropriate markets to prevent movement to markets where the grain has not received regulatory approval for import." It does not, however, identify China as one of those markets. Rather, the agreement states that: "Grain harvested from corn hybrids containing Agrisure Technologies ... may not be fully approved for grain export to **Japan or the European Union**" and that "grain from hybrids that do not have the appropriate import approvals from **Japan and the European Union** must be directed to domestic uses and away from export channels." Syngenta Seeds, Inc. Stewardship Agreement (Revised 08/2009) at 2 (emphasis added). There is no reference to any other unapproved markets, including China.

128. The March and May 2011 versions of Syngenta Seeds' Stewardship Agreement said—and did not say—the same thing. *See* Syngenta Seeds, Inc. Stewardship Agreement

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

(Revised 03/14.2011) at 1, 2; Syngenta Seeds, Inc. Stewardship Agreement (Revised 05/11/2011) at 1, 2.

129. Syngenta Seeds' 2013 version of the Stewardship Agreement removed the reference to Japan and the European Union but even then did not mention China.

130. None of the agreements contain any instruction on how the grower was supposed to "channel."

131. Syngenta knew or should have known that bare reference to channeling (and at that, without reference to China) would be ineffective.

132. To the extent that other versions of the Stewardship Agreement (or Stewardship Guide) reference China, the concept of "channeling" by thousands of individual corn farmers under Syngenta's non-existent— or, at minimum, inadequate— "stewardship" program, was certain to fail.

133. "Channeling" can only work if all grain handlers and others in the supply chain are engaged in that endeavor. For example, BIO recognizes that a realistic assessment of conditions related to handling, distributing, processing, and testing products must engage the various stakeholders. *See* BIO Product Launch Stewardship, December 10, 2009 at Introduction.

134. On information and belief, Syngenta did not obtain channeling commitments from supply chain participants, and took no further action to create a marketing plan or channeling mechanism. Syngenta also failed to coordinate with grain handling, export, and other post-harvest firms, to ensure that Viptera corn was not directed to markets for which regulatory approval had not been received, including China.

135. This failure was purposeful. Syngenta made a decision that no special provisions would be made for grain redirection.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

136. Not only did Syngenta decide it would take no measures for channeling Viptera, Syngenta sought to stop exporters and grain elevator operators from attempting to "channel" Viptera away from China. Specifically, Syngenta brought a lawsuit against Bunge, a grain elevator operator, who refused to accept Viptera corn because that operator exported corn to China.

137. On August 17, 2011, Syngenta issued a letter to Viptera growers expressing disappointment that Bunge and Consolidated Grain & Barge reportedly would "not be accepting grain with the Agrisure Viptera trait." Syngenta recommended to growers that they simply "[d]eliver[] to elevators accepting grain with the Agrisure Viptera trait." Syngenta made no mention that these elevators should channel the grain to markets in which that trait had been approved.

138. Syngenta Seeds sued Bunge, complaining that Bunge could not refuse to accept Viptera corn at its grain elevators. Bunge had posted notices at its grain elevators that it would not accept Viptera corn because the MIR162 trait was not then approved in China, China had a zero tolerance policy regarding non-approved GMO events such as MIR162, and Bunge has significant contracts with Chinese markets that it wanted to fulfill.

139. Syngenta Seeds sought an injunction requiring Bunge to accept the Viptera corn despite: (i) its earlier representations in the MIR162 Deregulation Petition that corn grown with its MIR162 trait would be channeled away from export markets that had not yet approved of its importation; (ii) the requirement in its Stewardship Agreement with growers who had purchased Viptera seed requiring them to channel their harvested grain away from export markets that had not yet approved the importation of MIR162 corn; and (iii) the protocols referenced above approved by BIO and other organizations, of which Syngenta was/is a member, requiring

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

consultation with industry stakeholders and not commercializing approved traits without major market approval.

140. At the end of the 2010 crop year in August 2010, China had already become the seventh-largest importer of U.S. corn. *See Syngenta*, 820 F. Supp. 2d at 860-61. Thereafter, in the spring of 2011, Bunge had sold millions of dollars of U.S. corn for delivery to China between September 2011 and January 2012. *Id.*

141. The Court in *Syngenta v. Bunge* denied Syngenta Seeds' requested injunction on September 26, 2011. In denying the requested injunction, the Court found that it was foreseeable that China would not approve importation of MIR162 during the 2010-2011 crop year, that during that year U.S. exports to China might be significant, and that Syngenta Seeds had caused the very harm of which it complained. The Court refused to shift the risk to Bunge for Syngenta's commercializing of Viptera before receipt of approval from China. Specifically, the Court in that case concluded that:

> [a]t least to some extent, Syngenta's reputational injuries [allegedly caused by Bunge's refusal to accept Agrisure Viptera], though significant, are the result of Syngenta's decision to commercialize Viptera corn before obtaining import approval from significant import markets, including China, where Bunge's rejection of unapproved traits was not wholly unforeseen or unforeseeable.

Syngenta, 820 F. Supp. 2d at 988.

142. The Court also concluded that:

> no reasonable balance of equities would impose upon Bunge the prodigious additional expense of segregating Viptera corn (or segregating non-Viptera corn earmarked for Chinese export), where Bunge did not create the situation in Viptera corn has not been yet approved for import to China. That situation arises entirely because Syngenta decided to commercialize Viptera corn knowing that it did not yet have Chinese and some other import approvals and would not have them for the 2011 crop year, and under circumstances in which Syngenta should have reasonably recognized that Chinese imports of United States corn for the 2011 crop year might well be very significant. Syngenta accepted the risk of commercializing Viptera corn, albeit with more than the required or recommended import approvals,

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

> but without import approval from all of the reasonably likely foreign markets. I reject Syngenta's request that I shift that risk, instead, to Bunge....

Id. at 990.

143. In addressing the public interest element for injunctive relief, the Court declined to shift the risk of the decision to commercialize MIR162 away from Syngenta: "I find that the public interest strongly favors allocating the risks of a decision to introduce a new transgenic grain into the commercial market on the company that decided to commercialize that grain before obtaining all import approvals." *Id.* at 992.

144. The Court also found that in the late summer and fall of 2011, exporters other than Bunge, including Cargill and Archer Daniels Midland ("ADM"), had also refused to accept Viptera at some of their facilities due to export market issues such as the failure of Syngenta to receive approval from the European Union. *Id.* at 962.

H. Syngenta's Irresponsibility and Misrepresentations Moving into the 2012 Crop Year

145. Despite the risk of contamination and movement of Viptera into export markets, Syngenta continued its course and sold even more Viptera for planting in 2012, further increasing those risks.

146. Syngenta expanded sales of Viptera even as China was dramatically increasing imports of U.S. corn and was projected to be the largest importer of U.S. corn by the year 2020.

147. In 2011, Syngenta was selling Viptera for the 2012 growing season.

148. Syngenta was concerned. If grain handlers like Bunge refused to take Viptera, the lack of approval from China might reduce its sales.

149. As reflected in internal correspondence, Syngenta also knew by July 2011 that China would not change its zero-tolerance policy.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

150. Syngenta, however, chose not to inform Producers and Non-Producers of the growing danger. Instead, it crafted a plan to mislead Producers and Non-Producers to believe that Syngenta would have import approval from China by the time Viptera was harvested, despite all indications to the contrary. For instance, one e-mail from Sarah Hull, Head of Global External Affairs, stated that it was "most important" to get grain traders "comfortable that the approval is close," so that they did not tell farmers to avoid MIR162 corn.

151. The purpose of this plan was to sell more Viptera.

152. United States Grains Council President, Tom Dorr, in a memorandum dated August 2, 2011 to "Seed Technology Members" and e-mailed to Syngenta, stated that "the current situation regarding the commercialization of unapproved events in China has raised industry-wide concern about potential near and longer-term disruption to US corn exports in China." In the same memorandum, he referred to China as a "major corn importer."

153. By at least early July 2011, Syngenta was already managing its message and had scripted its responses.

154. Among other things, Syngenta launched a "blame the grain trade" campaign. Another e-mail from Sarah Hull stated, in pertinent part: "I think we have to find the right balance of making this a 162 problem versus an evolutionary challenge of global grain trade and adjust our actions to reflect the latter."

155. Syngenta remained focused on its bottom line in commercializing MIR162. For instance, Syngenta internally communicated its "Yields Without Borders Program" and its "Top 10 Tactics to Energize Sales Force and Leverage Grain Marketing Channel to Secure Sales." See Syngenta document entitled: "The Role of Grain Marketing for Future Trait Technologies." Part

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

of this program was to provide regular (and misleading) updates "on progress and plans for China trait approval and to drive trait acceptance."

156. To encourage further sales and planting of Viptera, Syngenta, by at least August 2011, was representing to stakeholders, including corn Producers and Non-Producers, that Syngenta would obtain China's approval by March 2012.

157. As one of Syngenta's business partners wrote, "[i]f we say March enough, there should be no issue in ordering seed stock and seed companies will have confidence in the March date."

158. Syngenta, however, did not have a reasonable basis to believe that approval from China would be received in March 2012 and did not itself expect approval by that time.

159. Indeed, Syngenta's approval submissions to China included insufficient, incorrect, and/or incomplete information, resulting in multiple additional submissions, and also included significant delays by Syngenta in providing standard information. For example, Syngenta did not submit PCR detection methods until January 10, 2011, and had to redeliver the PCR detection method on May 16, 2011, because the first submission was unclear. This information was a required precursor to testing in China, which may take—and is expected to take—months. On June 22, 2011, Syngenta sent a letter of correction regarding mislabeling of samples. Testing did not begin in China until June 24, 2011. Testing results are known requirements of completed applications. Even after an application is complete, review and deficiency notices requiring correction are not atypical but expected.

160. No later than July 2011, and likely before that time, Syngenta knew it could not expect approval by March 2012.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

161. Syngenta's own employees recognized that approval would take significantly longer. For instance, a July 1, 2011 e-mail from Syngenta's Brian Walsh indicated that Viptera would not receive approval in China "for a few years yet."

162. Syngenta received field trial and safety test results in October and November 2011, respectively. Syngenta submitted these results in a now-completed application on November 9, 2011. At that point, Syngenta knew or clearly should have known that it would not have approval by March 2012.

163. As of May 2012, China's Ministry of Agriculture had reviewed Syngenta's application and had rejected it for deficiencies including all applicable safety analyses. Syngenta submitted another application in June 2012.

164. In addition, on information and belief, Syngenta sought approval to cultivate MIR162 in, as well as import MIR162 to, China. *See* Reuters "Update 1 – Syngenta confirms it applied to cultivate GMO corn in China" (Oct. 8, 2014) (http://www.reuters.com/article/2014/10/08/china-gmo-syngenta-idUSL3N0S317520141008).

165. China has more severely restricted the right to cultivate bio-engineered crops than to import them, has not previously allowed any such cultivation by a foreign firm without Chinese participation, and has taken significantly longer to approve cultivation applications than importation applications, all of which may have materially delayed import approval.

166. Syngenta was projecting that cultivation approval would not be obtained until 2016.

167. Syngenta continued to downplay the importance of China and misrepresent the status of China's approval for the purpose of increasing sales of Viptera.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

168. Syngenta was far more focused on a potential loss of profits than it was on the risk of trade disruption caused by Viptera. For instance, Syngenta's project lead for Commercial Traits noted a seed shortage, saying it "will work in our favor. … Hence key business is more the black-eye we now have, vs. actual impact on sales."

169. Syngenta e-mails reveal that executives were plotting strategies to try to get China to expedite its review, including strategies to try to convince U.S. government officials to tell China that failing to approve MIR162 would "put US corn trade at serious risk."

I. Syngenta's Continued Deception Regarding China's Approval of MIR162

170. Syngenta continued its deception regarding the status of approval from China throughout 2012.

171. Despite knowing that its incomplete and delayed regulatory filings with China assured that Syngenta would not obtain import approval for Viptera by March 2012, Syngenta nevertheless instructed employees in January 2012 to tell grain handlers that Syngenta would obtain approval from China by March of 2012.

172. After the first quarter passed without approval from China, Syngenta told employees to "**verbally**" communicate that Syngenta "continue[s] to anticipate that this approval will be received shortly." (Emphasis in original).

173. During Syngenta's first quarter 2012 earnings conference call on April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, publicly stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." http://www.morningstar.com/earnings/37715637-syngenta-ag-adrsyt-q1-2012-earnings-call-transcript.aspx. This, of course, was a year after Syngenta had already sold large quantities of Viptera to farmers across the country.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

174. On information and belief, however, Syngenta did not as of April 2012 have a reasonable basis to believe China's approval was "done," or for its representation that approval was imminent. Syngenta certainly did not have any sort of official approval.

175. Indeed, Syngenta received a rejection and deficiency letter from China's Ministry of Agriculture on May 15, 2012.

176. Syngenta also distributed misleading written materials indicating that Viptera **could** be exported to China.

177. For example, Syngenta distributed a "Request Form for Bio-Safety Certificates Issued by the Chinese Ministry of Agriculture" for Viptera. In China, "Bio-Safety Authorizations" are required for the issuance of shipment-specific "Bio-Safety Certificates." However, applying for shipment-specific Bio-Safety Certificates was, and is, pointless because MIR162 had not been approved for importation in China.

178. Syngenta knew that its Request for Bio-Safety Certificates Forms was pointless but distributed it in an effort to mislead U.S. corn Producers and Non-Producers.

179. Syngenta also distributed a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf.

180. For example, the "Plant with Confidence Fact Sheet" states:

> The vast majority of corn produced in the U.S. is used domestically. There is a misconception that China imports more grain than it actually does from the U.S. China has imported, on average, a little more than half of one percent – 0.5% – of all U.S. corn produced in the past five years....
>
> Since very few U.S. grain outlets actually export to China, most have no reason to restrict your right to plant the latest technologies.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf (emphasis removed).

181. Contrary to the Plant with Confidence Fact Sheet, the NGFA reported:

> The U.S. Department of Agriculture (USDA) forecasts that China will become the world's largest corn importer by 2020. China is projected to increase its corn imports to 22 million metric tons (866 million bushels) by 2023, up from 2.7 million metric tons (106 million bushels) in 2012. For 2013, USDA had projected that the United States would export 37 million metric tons (1.457 million bushels) of corn, and that China would import an estimated 7 million metric tons (276 million bushels) – virtually all of it from the United States.

http://www.ngfa.org/wp-content/uploads/NGFA-Flyer-for-Farmer-Customers-on-Potential-Market-Impacts-of-Commercializing-Biotech-Enhanced-Seeds-Not-Approved-for-Import-into-U.S.-Export-Markets.pdf.

182. In other words, for 2013, the USDA estimated that China represented nearly 20% of the U.S. export market.

183. Before China's discovery in November 2013 of MIR162 in U.S. corn shipments, China was the third-largest market for U.S. corn, and its share of our market was projected to grow substantially. China is by far the largest potential growth market for U.S. corn.

J. Syngenta Expanded Sales of Viptera Acreage Despite Having No Approval from China, Even While the Importance of the Chinese Market Continued to Increase.

184. China continued to be a major and growing market for U.S. corn and corn products during the 2012 and 2013 crop years.

185. However, during that period, China still had not yet approved the import of MIR162. Syngenta was still in the approval process and was correcting deficiencies identified by the Chinese Ministry of Agriculture. It had no assurance that approval would be conferred by the 2013 crop year. In fact, as of October 2013, Syngenta was still completing required research for its application.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

186. Corn industry groups continued to object to Syngenta Seeds' commercialization of Viptera.

187. In fact, during 2012-2013, China had become the third largest export market for U.S. corn. As reported by Iowa Corn Growers Association, "[i]n 2012/13, China was the third largest export market for U.S. corn and up until the recent issue [the rejections beginning in November 2013] [China] was on track to meet or exceed that position." China and MIR162, 2-2014, Iowa Corn Growers Association (Feb. 6, 2014).

188. Nevertheless, Syngenta continued to market Viptera during the 2012 and 2013 crop years. Estimates were that during this period Syngenta had increased the market share of Viptera to well more than 2%, and, by some estimates as high as 3.5%, of the corn area grown in the U.S.

189. This increase further ensured that Viptera would disseminate throughout the U.S. corn supply and that it could not— and would not—be channeled away from export markets, such as China, which had not approved MIR162.

K. China's Rejection of U.S. Corn

190. In November 2013, China began rejecting shipments of U.S. corn that tested positive for the presence of MIR162.

191. On December 24, 2013, the General Administration of Quality Supervision, Inspection, and Quarantine of China issued a warning notification strengthening the inspection and supervision for the import of GMO feed materials. The December 24 notification indicated that all batches of corn would now be tested at the Chinese ports for MIR162, and that any cargo that tested positive for MIR162 would be returned or destroyed.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

192. Before this notification, statements from the seller/exporter that the products were tested and negative for MIR162 were sufficient. The December 24 notification thus substantially altered the conditions for export of U.S. corn into China.

193. It was not possible to ensure a "zero" level of MIR162 in the Chinese testing (i.e., a negative test of a container in the U.S. could still result in a positive test in China).

194. The uncertainty associated with the possibility that a shipment might test positive for MIR162 when tested in China caused Chinese customers to walk away from their contracts for U.S. corn and added a great deal of uncertainty to the market. Not surprisingly, prices for corn and distillers dried grains with solubles ("DDGS") fell.

195. In December 2014, China finally approved MIR162 for importation into China. By then, however, Syngenta had already begun commercializing another unapproved bio-engineered corn trait. U.S. corn exports to China have not yet begun to recover, and this approval is not likely to lessen the impact of Syngenta's conduct and the resulting embargo in the near future, if ever.

L. Regulation, Testing, and Deregulation of Event 5307

196. Despite China's rejection of U.S. corn because of the presence of MIR162, Syngenta nonetheless pressed on with commercialization of yet another GMO corn seed product.

197. On April 22, 2011, just months after Syngenta Seeds released Viptera for the 2011 crop year, Syngenta Biotech filed with APHIS a petition seeking the deregulation of another insect resistant, genetically-modified trait known as Event 5307. Event 5307 was ultimately deregulated by APHIS on January 29, 2013.

198. Between 2005 and 2011, Syngenta Biotech conducted at least 101 field trials of Event 5307 corn under at least 22 notifications made to APHIS under the GMO Regulations at sites in 23 states.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

199. At least some of the field trials of Event 5307 included tests of corn stacked with multiple traits, including both Event 5307 and MIR162. Further, on information and belief, field tests conducted under the GMO Regulations of Event 5307, either singly or together with other traits (including MIR162), continued during the period after the filing of the Event 5307 Deregulation Petition and the January 29, 2013 decision to deregulate Event 5307.

200. In its deregulation petition for Event 5307, Syngenta Biotech disclosed that upon deregulation of Event 5307, Syngenta Seeds did not intend to market Event 5307 as a stand-alone product, but intended to combine it with other traits, including MIR162. It also stated that it intended to seek approval of products containing Event 5307 in countries that had functioning regulatory systems and that "Syngenta is also pursuing regulatory approvals for importation of corn commodities and processed goods containing 5307 corn in key export markets for U.S. and Canadian corn" and that applications were currently planned for a number of additional countries, including China. In the discussion of "Adverse Consequences of Introduction," Syngenta Biotech stated that an upcoming Environmental Report would discuss a range of issues related to the deregulation of Event 5307 corn, "including any potential direct, indirect or cumulative impacts on ... the economy, either within or outside the U.S." Petition for Determination of Nonregulated Status for Rootworm-Resistant Event 5307 Corn, at 156 (Apr. 22, 2011) (http://www.aphis.usda.gov/biotechnology/petitions_table_pending.shtml).

201. Following approval of Event 5307, Syngenta Seeds announced that it would commercialize Duracade for the 2014 crop year, containing both Event 5307 and MIR162, despite the continued failure to obtain approval from China for MIR162 and the fact that Event 5307 also had not been approved.

M. Commercialization of Duracade Despite MIR162's Continued Disruption of the U.S. Corn Trade

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

202. In November 2013, China began rejecting shipments of U.S. corn that tested positive for MIR162. Syngenta has, nevertheless, continued its false statements and misrepresentations, as alleged herein, including through its decision to market Duracade in the 2014 crop year.

203. The NGFA has detailed the disastrous results of China's rejection of U.S. corn based on the presence of MIR162:

> This development resulted in a series of trade disruptions – including testing; delays in vessel discharge; and deferrals, diversion and rejections of cargoes – when MIR162 subsequently was detected in U.S. shipments of corn and distillers dried grains with solubles (DDGS). These disruptions effectively shut U.S. corn farmers out of China's feed grain import market, which previously almost exclusively had been supplied by the United States. China subsequently has taken actions to utilize domestic, as well as international alternatives to U.S. corn. For instance, China's imports of U.S. grain sorghum have increased significantly. China also has sourced corn from Ukraine. And most recently, Brazil and Argentina each were granted approval to begin exporting corn to China....
>
> This disruption, tied to positive detections of MIR162 that began in November 2013, has virtually halted U.S. corn trade with China.
>
> . . .
>
> USDA currently is projecting Chinese corn imports will reach 22 mmt [million metric tons] by 2023, which if realized would account for nearly half of the projected growth in total world corn trade. However, if the MIR162-related trade disruption continues, other corn exporting nations, such as Ukraine, are capable of replacing the United States as the principal corn exporter to China....
>
> [T]he MIR162-induced trade disruption has resulted in market price loss on unfulfilled export sales, price loss on diverted sales because of the compromised economic negotiating position of U.S. exporters, demurrage costs, and lower market prices for U.S. commodities and products. The total loss for these sectors of the U.S. grain industry is estimated to range from $1 billion to $2.9 billion.

http://ngfa.org/wp-content/uploads/Agrisure-Viptera-MIR-162-Case-Study-An-Economic-Impact-Analysis.pdf.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

204. Syngenta nevertheless moved forward with commercialization of Duracade for the 2014 planting season.

205. On January 23, 2014, the NGFA and the NAEGA issued another Joint Statement imploring Syngenta to stop its heedless and irresponsible commercialization:

> On Jan. 22, 2014, the National Grain and Feed Association (NGFA) and North American Export Grain Association (NAEGA) sent a letter to Syngenta asking the company to immediately halt commercialization in the United States of its Agrisure Viptera corn and Agrisure Duracade corn until such time as China and certain other U.S. export markets have granted required regulatory approvals/authorizations.
>
> The NGFA and NAEGA ... are gravely concerned about the serious economic harm to exporters, grain handlers and, ultimately, agricultural producers – as well as the United States' reputation to meet its customers' needs – that has resulted from Syngenta's current approach to stewardship of Viptera. Further, the same concerns now transcend to Syngenta's intended product launch plans for Duracade, which risk repeating and extending the damage. Immediate action is required by Syngenta to halt such damage.
>
> There are numerous negative consequences incurred when the Chinese and other U.S. export markets are put at risk through commercialization of biotechnology-enhanced seeds before approvals for import into foreign markets are obtained. Such consequences may include reducing the value and demand for the U.S. farmers' products, preventing foreign consumer access to much-needed supplies, shutting off or increasing the cost of U.S. producers' access to some export markets for their crops, exposing exporting companies to financial losses because of cargo rejections and contract cancellations, and ultimately diminishing the United States' reputation as a reliable, often-preferred supplier of grains, oilseeds and grain products in world markets. Commercialization prior to foreign regulatory approvals also has a negative impact on the overall U.S. corn and other grain value chains, and reduces significantly U.S. agriculture's contribution to global food security and economic growth.
>
> Within the U.S. grain and oilseed handling and marketing system, each purchaser or handler makes its own determination as to whether to accept various commodity crops – including those produced from biotechnology-enhanced seeds. Such a decision likely is driven by customer preferences, infrastructure and operational limitations, regulatory regimes and contractual commitments, as well as meeting regulatory requirements in the respective markets they serve. Given the nature of the U.S. grain marketing system, these business decisions extend to the first point of sale or transfer from the producer.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

> As a matter of policy, NGFA and NAEGA have communicated consistently, clearly and in good faith with biotechnology providers and seed companies about the importance of biotechnology providers actually obtaining regulatory approvals/authorizations for import in foreign markets before such traits are commercialized in the United States. Individual grain handler, processor, service provider and exporter member companies of our Associations represent further system-wide support and advocacy for this policy.
>
> U.S. farmers, as well as the commercial grain handling and export industry, depend heavily upon the exercise of due corporate responsibility by biotechnology providers with respect to the timing of product launch and commercialization. We therefore seek assurances from Syngenta that it will follow suit by publicly announcing that it will suspend immediately its commercialization of Viptera and Duracade products in the United States until such time as China and other U.S. export markets have granted required regulatory approvals and authorizations.

http://www.ngfa.org/wp-content/uploads/NAEGA-NGFA-Joint-Public-Statement-on-Syngenta-Agrisure-Viptera-and-Duracade-Biotech-Traits-Jan-23-2014.pdf.

206. Syngenta spokesman, Paul Minehart, responded by stating: "Changing our marketing plan in the U.S. now **would have no effect on grain in the system** or Chinese acceptance of corn imports." Reuters, "U.S. Groups urge Syngenta to hold back on GM corn barred by China" (Jan. 23, 2014) (emphasis added).

207. This pronouncement recognizes that MIR162 has indeed contaminated the U.S. corn supply to an extent that it cannot be undone. This is particularly true given that Syngenta continues to market and sell Duracade in addition to Viptera.

208. In March 2014, in meetings with the NGFA, Syngenta advised that its introductory launch of Duracade would likely extend to 250,000 to 300,000 acres in a launch zone that included portions of each of the ten states that grow the largest amounts of corn. In the same meetings, Syngenta refused to accept responsibility or liability if and when Duracade becomes present in countries that had not approved it. NGFA, Latest News, "Syngenta Provides Additional Details on Plans for 'Introductory launch' of Duracade, Biotech Corn in 2014" (March 7, 2014)

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

(http://www.ngfa.org/2014/2014/03/07/Syngenta-provides-additional-details-on-plans-for-introductory-launch-of-duracade-biotech-corn-in-2014/).

209. In launching Duracade, Syngenta stated that growers would be required to sign a stewardship agreement requiring the grower to either feed the corn to livestock or poultry on the farm, or deliver it to a grain handling facility, feed mill, feed lot, or ethanol plant not exporting corn or corn co-products to China or the European Union. *See* National Grain and Feed Association Newsletter Vol. 66, No. 5 at 2 (dated March 7, 2014).

210. The version of the stewardship agreement at launch, and referencing Duracade, did not do so. *See* Syngenta Seeds Inc. Stewardship Agreement (Rev. 6/05/2013). This version is, even now, the agreement Syngenta posts on its website. *See* http://www3.syngenta.com/country/us/en/agriculture/Stewardship/Documents/SyngentaStewardshipAgreement.pdf.

211. Syngenta also did not require planting or harvesting protocols, but only made "recommendations" that the grower: (1) select fields for planting Duracade surrounded by the grower's own corn fields or planted next to a non-corn field; (2) place signs to notify others that Duracade was planted in the field; (3) plant buffer rows; (4) clean planters; (5) properly dispose of unused seed and return unopened seed units to the seed provider; (6) separately harvest Duracade; (7) flush the combine; (8) deliver corn containing Duracade to a previously arranged delivery point; (9) store Duracade in a separate bin on the grower's farm; and (10) clean the bin floor.

212. Syngenta officials stated that while Syngenta would apprise growers of such "recommendations," it "declined to incorporate the recommendations into the stewardship agreement because they did not want to dictate such practices to producers." National Grain and Feed Association Newsletter Vol. 66, No. 5 at 2 (March 7, 2014).

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

213. Syngenta was and is well aware that such measures are minimally necessary to an adequate stewardship program. Yet, Syngenta did not require such measures in connection with either Viptera or Duracade.

214. The NGFA issued a dire forecast of the damage Duracade's premature commercialization would cause:

> For the 2014 planting season, Syngenta has introduced another trait called Agrisure Duracade 5307 (hereafter referred to as 5307) that currently lacks Chinese import approval, potentially prolonging the U.S. loss of the large, growing Chinese feed grain import market....
>
> China is roughly one year into its semi-regular, two-year process of evaluating the authorization of 5307 for import in food, feed and for further processing. Since Chinese authorization of 5307 is not expected for at least another year, China is expected to continue enforcing a zero-tolerance policy for unapproved biotech-enhanced traits in 2014/15, as occurred in marketing year 2013/14 for MIR162. Thus, the commercialization in the United States of 5307 is expected to prolong the economic impact on U.S. corn and other commodities that began in mid-November 2013.
>
> Similarly to 2013/14, when the United States lost access to the Chinese corn import market, the 2014/15 market price impact caused by the presence of 5307 in U.S. commodity exports is expected to extend beyond the corn market and potentially affect other commodities, such as DDGS, soybean meal and soybeans, because of the substitutability of corn for these commodities in domestic feed rations....
>
> [A]fter accounting for projected benefits and costs, the net economic impact of the 5307 commercial launch is estimated to result in a loss to the U.S. grain value chain ranging from $1.2 billion to $3.4 billion, with a mid-point estimated net economic loss of $2.3 billion.

http://www.ngfa.org/wp-content/uploads/Agrisure-Duracade-5307-Economic-Impact-Analysis.pdf.

215. In March 2014, Syngenta pulled Duracade from the Canadian market for the 2014 growing season because China and the European Union had not yet approved MIR162.

216. Syngenta said in a notice to Canadian growers: "While the vast majority of the Canadian corn crop is typically directed to domestic markets in North America, some corn may be

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

destined for these markets." Reuters, "Syngenta halts sales of new GMO corn seed in Canada" (Mar. 10, 2014). "Accordingly, we want to ensure the acceptance of any trait technology grown in Canada meets end-market destination requirements." *Id.*

217. As illustrated by the statements of its own representatives and this action, Syngenta knew that China was and is a key corn importer and that responsible management requires that its approval be obtained before commercialization of a bio-engineered corn trait.

218. As further illustrated, Syngenta knows how to withdraw an unapproved GMO trait from the market when it wants to do so.

219. Nevertheless, Syngenta continued to market and sell MIR162 corn in the U.S.

220. Compounding its irresponsibility, Syngenta then decided to commercialize Duracade in 2014, even though it contains MIR162 Event 5307.

221. In September 2014, Syngenta announced 52 new corn hybrids for the 2015 growing season. MIR162 was in 23 new Viptera products and 18 new Duracade products. See "Syngenta Announces 52 New Corn Hybrids for 2015 Season" (Sept. 17, 2014) (http://www.agprofessional.com/news/Syngenta-announces-52-new-corn-hybrids-for-2015-season-275494841.html).

222. In December 2014, China finally approved MIR162 for importation into China. By then, however, Syngenta already had begun commercializing yet another GMO corn seed product as discussed above. In addition, China's December 2014 approval is not likely to lessen the impact of Syngenta's conduct anytime soon.

223. Syngenta affirmatively and purposefully engaged in all the actions and inactions described above to increase its own profits, ignoring the tremendous risks its profit-driven strategy imposed on U.S. corn Producers and Non-Producers.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

224. Syngenta knew, or should have known, before its commercialization of Viptera and at all times since then of the high likelihood that Viptera would contaminate the U.S. corn supply and that channeling in the circumstance of its clearly inadequate "stewardship" program would not work. It was inevitable that Viptera corn would move into export channels, including China, and cause trade disruption, as Syngenta well knew.

225. Syngenta's acts and omissions have resulted in, and will continue to result in, the pervasive contamination of the U.S. corn supply, including fields, grain elevators and other facilities of storage and transport, causing physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land.

226. The likelihood that Viptera—and Duracade—would (and will continue to) contaminate the U.S. corn supply was readily foreseeable to, and indeed foreseen by, Syngenta, as was the harm to Producers and Non-Producers, whom Syngenta describes as among its stakeholders "affected by" Syngenta's business.

227. Syngenta had the right and ability to control the timing, size, and geographic scope of its commercialization of Viptera and Duracade, as well as the extent to which adequate containment measures would be required of its customers. Syngenta also could have instituted channeling measures but did not. Syngenta also ignored repeated warnings from stakeholders and misrepresented and concealed material information, all to further its own profit.

228. Syngenta did not simply fail to take precautions against foreseen and foreseeable harm. Syngenta acted affirmatively to create such harm.

229. Syngenta's conduct has directly caused and contributed to cause significant economic harm to Producers and Non-Producers, as explained below.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

N. Economic Impact

230. The characteristics of the world corn market have important implications for understanding the market price impact of the Chinese MIR162 ban on corn from the U.S. Those include:

a. Corn is the most widely used feed grain in the world.

b. The U.S. is by far the largest producer and exporter of corn.

c. Before the import ban, virtually all of China's corn imports were from the U.S.

d. Before the import ban, China was the third largest market for U.S. corn exports.

e. The latest USDA agricultural trade projections placed China as becoming the world's largest importer of corn by 2020.

f. The import ban virtually halted U.S. corn sales to China indefinitely.

g. The world price of corn is established in Chicago, and the loss of a key market for the U.S. put downward pressure on the world price that reverberated to farmgate prices throughout the U.S.

h. Corn is a commodity and a relatively small change in the global volume of trade in a commodity market like corn will have a magnified price impact.

i. An exporter's reputational loss in an agricultural commodity market due to an event like a GMO contamination can persist for many years. Once an exporter has lost a foreign market, it is difficult to get it back.

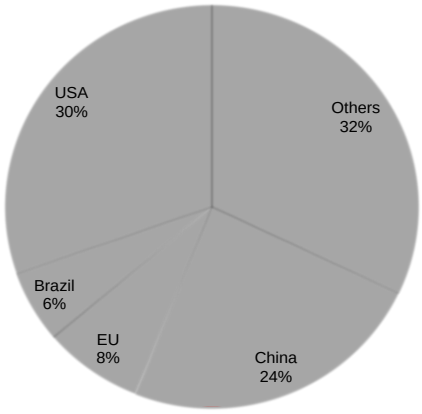
O. Global Corn Market

231. World corn production totaled 983.3 million metric tons (mmt) in 2013/14 (about 38.7 billion bushels). This supply was concentrated in a relatively small number of countries. The world's largest corn producers are the U.S. with about 36% of global production in 2013/14; China (about 22% of production); Brazil (8%), and the EU (7%).

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

232. Global usage of corn has expanded by about 37% in the last decade, due to rising population and incomes, and increased urbanization with its associated changing dietary patterns. Feed usage accounts for about 58% of total global corn use, industrial use 27%, and food 11%. The pie chart below shows corn consumption by region.

World Corn Consumption By Region



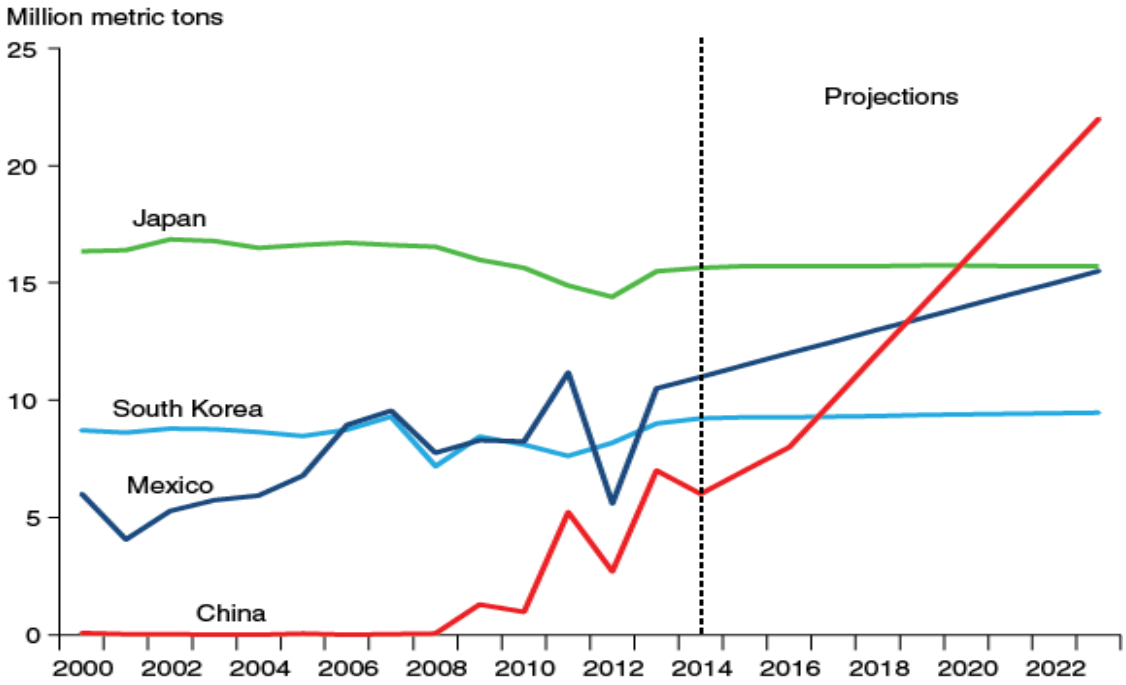
Source: International Grains Council

233. At the end of each crop year, corn inventories are carried forward in case of a short harvest. The U.S. and China are the largest holders of corn inventories. At the end of 2013/14, these two countries held 70% of the 176 mmt of global stocks.

234. Total world corn trade is about 100 to 120 mmt per year. Before the MIR162 ban, China was importing about 4% of global corn sales. That amount was projected by the USDA to increase substantially by 2020, when the USDA projects that China will be the world's largest importer of corn at 16 million metric tons.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

China expected to become largest global corn importer



Source: USDA Production, Supply and Distribution database and projections.

235. The U.S. is the dominant exporter of corn. The big exporters include the U.S. (36% of world trade), Brazil (20% of exports), the Ukraine (17%), and Argentina (10%). These four countries alone account for over 82% of global exports.

Table: Major Corn Exporters: July 2013/ June 2014

Exporting Country	**U.S.**	**Brazil**	**Ukraine**	**Argentina**	**Others**	**Total**
Exports (million metric tons)	42.8	23.5	19.9	12.0	21.8	120.0

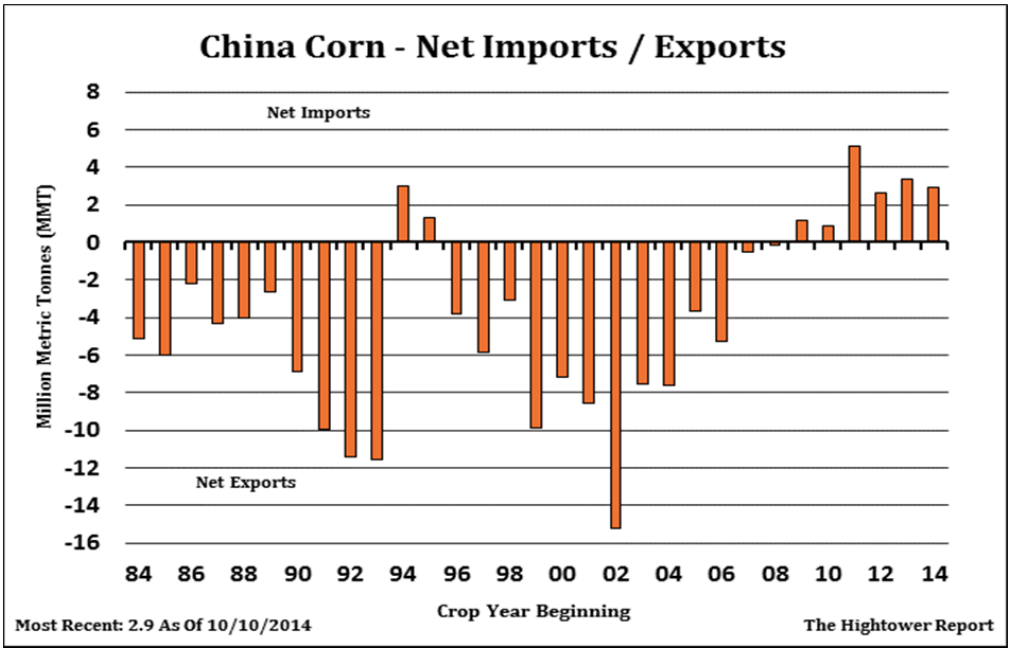
Hennepin County, MN

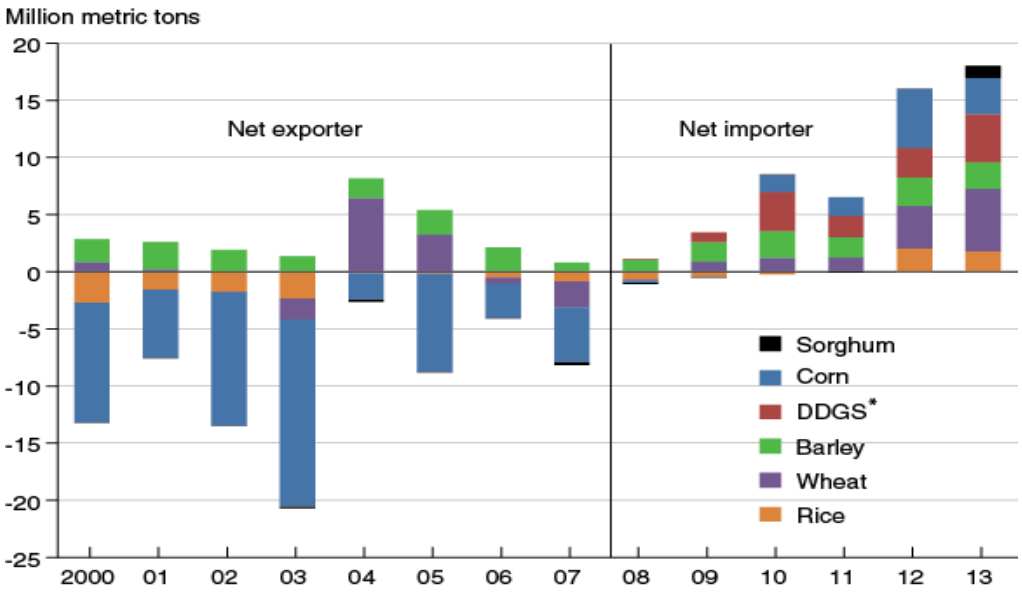
236. Just over 10 years ago, China was a significant exporter of corn (as well as all grains) with exports peaking at 15.2 million metric tons in 2002/03. China flipped from being a net corn exporter to a net corn importer in 2009/2010.



237. As the chart below shows, China turned from a net exporter to a net importer of grains in 2008. Imports of grains (including corn) surged during the 2012-13 time period, reaching 18 mmt. Most of this grain originated from the U.S.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

China's net imports of grains surged during 2012-13



Note: Net imports = imports – exports. Data for calendar years.
*DDGS= Distillers Dried Grains With Solubles.
Source: USDA, Economic Research Service analysis of China customs statistics.

238. The import side of the international trade equation is more diverse, with the major importers including the EU, Japan, Mexico, South Korea, Chinese Taipei, China, and Turkey (together accounting for 55% of imports in 2013/14). This leaves 45% of the corn imports destined for a large number of small importers.

Major Corn Importers

Hennepin County, MN

239. In its annual long-term grain trade projections, released in February 2014, the USDA projected that China's corn imports would grow from 2.7 mmt in 2012/13 to 22 mmt in 2023/24. China is by far the largest potential growth market for U.S. corn. These projections place China as the largest corn importer in the world by 2020.

P. U.S. Corn Market

240. Corn is the largest crop in the U.S. by both value of production and planted acres. In the 2013/14 September-August fiscal year, U.S. Producers produced about 13.9 billion bushels of corn, worth more than $60 billion. Corn is used for livestock feed (37% of 2013/14 crop), food, alcohol and industrial usage (46% of the 2013/14 crop), and exports (14% of the 2013/14 crop). USDA, Economic Research Service, Feedgrains Yearbook, Table 4 (http://www.ers.usda.gov/data-products/feed-grains-database.aspx#.VEJk-SiwRzo).

241. Corn production in the U.S. is concentrated in the neighboring Midwestern states comprising the "corn belt," where soil and climatic conditions are highly conducive to growing corn.[1] About 95.4 million acres of corn were planted in the U.S. in the September-August 2013/14 marketing year.

242. The U.S. corn marketing system is predominantly commodity-based. Corn grown by farmers is harvested, gathered, commingled, consolidated, and otherwise shipped from thousands of farms to local, regional, and/or terminal distribution centers. From there, it is often transported by exporters to foreign countries.

243. Grain elevators are facilities at which grains are received, stored, and then distributed for direct use, process manufacturing, or export. They can be generally referred to as either "country," "subterminal," or "terminal" elevators.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

244. "Country elevators" are a linchpin of the U.S. commodity grain handling and marketing system. Country elevators are smaller elevators that receive grain by truck directly from local farms during the harvest season. In addition to providing grain storage and drying services to farmers, country elevators buy individual loads of grain from local farmers for cash. A country elevator then will sell the grain it has purchased and stored in volume to subterminal or terminal grain elevators for further movement in the commodity corn supply chain.

245. Grain elevators thus play a crucial role in agriculture.

246. Corn prices throughout the U.S. are tied to the Chicago Board of Trade Futures (CBOT) price through the "basis" (defined as the futures price minus the local cash price). The U.S. corn market is spatially integrated and informationally efficient. Basis levels for spatially separated markets are also closely linked. Events like trade disruptions that affect the CBOT corn prices directly affect the price that U.S. corn farmers receive for their corn.

247. Grain elevators test and grade corn for weight, moisture content, and foreign materials. Grain elevators are not equipped to test and segregate corn for genetic traits due to the costs associated with such a time-consuming process. Many grain elevators are not equipped to test for the MIR162 trait in corn.

248. The terminal grain elevator receives grain via rail or truck. Terminal grain elevators have the capacity to hold larger quantities of corn, with some holding several million bushels of grain. After receiving the grain, terminal operators sell large shipments to manufacturers or continue to store the grain for later sale to domestic and foreign buyers.

[1] The top ten producing states are Iowa, Illinois, Nebraska, Minnesota, Indiana, South Dakota, Wisconsin, Kansas, Ohio, and Missouri.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

249. Some corn is sold for manufacture into corn ethanol. Ethanol manufacture results in a corn by-product known as DDGS. DDGS from the ethanol industry is commonly sold as a high protein livestock feed. In the U.S., DDGS is packed and traded as a commodity product.

250. Corn and processed grain from terminal elevators are transported by truck, rail, and/or ship to their final destination. Exporters may load the products themselves, or may contract with others for hauling and/or loading/transfer services. Corn bound for China is typically loaded into shipping containers and shipped by rail either to the West Coast or New Orleans, where the containers are loaded onto ships. Large exporters may deal in entire vessels loaded with corn, while smaller exporters ship containers of these products on container ships that may carry containers of other products, or from other exporters, as well.

251. Once the corn or DDGS arrives in China, it must be cleared for import before the counter-party who has purchased the product may take delivery.

252. Thus, the commodity supply chain for corn bound for China may involve country elevators, sub-terminal elevators, terminal elevators, truckers and other haulers, loaders and transport companies, and exporters who ship the product to China.

253. Elevators both own and store corn for sale further down the supply chain.

254. Similarly, exporters may purchase and sell corn and DDGS, or may expect these products under a variety of consignment agreements. They have incurred injury due to the loss of the Chinese export market under either arrangement.

Q. China's Corn Market

255. China has emerged as a large player in the global market for agricultural products. As of 2012, it was the fourth largest exporter and second largest importer of agricultural products in the world according to World Trade Organization trade statistics. Its import growth has been

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

driven by a shift in its domestic production mix and changing consumer diets with rising incomes and urbanization. The changing diets have especially driven strong demand growth for meat (mainly pork and chicken), which requires a large supply of feed grains including corn and soybeans.

256. China is now the largest foreign market for U.S. agricultural products. The USDA reports that U.S. agricultural exports to China have almost doubled in the last five years, totaling $28 billion in fiscal October 2013-September 2014. USDA, Outlook for U.S. Agricultural Trade, AES-83 (Aug. 28, 2014).

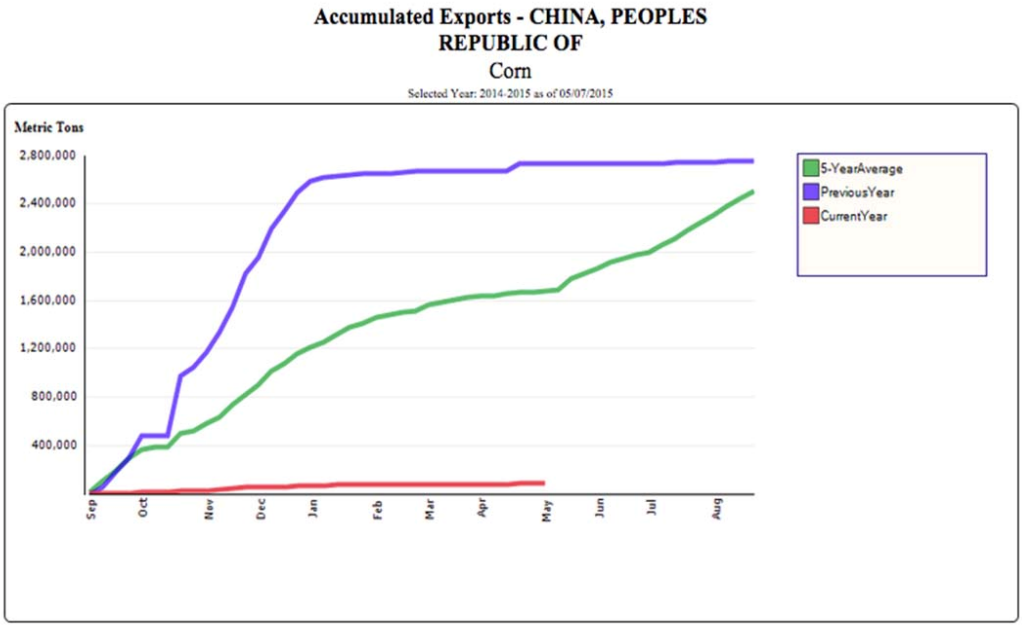
257. Before China banned the import of U.S. corn, the top three U.S. agricultural exports to China (in order of importance) were soybeans, cotton, and corn, based on value of trade. In November 2013, China started turning back cargoes containing Syngenta's MIR162 corn. While MIR162 is now approved, Event 5307 is not.

258. U.S. corn exports to China reached 5.146 mmt in 2011/12 (approximately 13% of U.S. exports that September-August marketing year) and were 2.39 mmt in 2012/13–still about 13% of exports (lower export volume due to the big U.S. drought). By contrast, due to China's import ban of U.S. corn beginning in November 2013, the absolute volume of U.S. corn exports to China in 2013/14 was not much higher than the drought year and fell to less than 6% of exports.

259. If the current trend that began after November 2013 continues, U.S. corn exports to China in the future will be negligible.

260. The following graph shows the dramatic difference in accumulated U.S. exports to China after the MIR162 ban, taking into account seasonal variations in export quantities:

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN



5/15/2015 Source: USDA/FAS/Export Sales Reporting

261. If the China market continues to deny access to U.S. corn imports, the losses will be even more significant. As the following quote explains, China was expected to be a very rapidly growing import market for corn:

> China's corn imports are projected to rise steadily and reach 22 million tons by 2023/24. China's strengthening domestic demand for corn is driven by structural change and growth in its livestock sectors, as well as by rising industrial use. The increase in China's imports accounts for nearly half of the projected growth in world corn trade. USDA Long-Term Projections at p.20 (February 2014).

USDA Agricultural Projections to 2023, www.usda.gov/oce/commodity/projections/.

262. For fiscal year 2013/2014 China was expected to import 7 mmt of corn and 6 mmt in 2014/15. Since the news of the rejected cargoes surfaced, USDA analysts have lowered projections of China's total annual imports from 7 to 3.5 mmt in 2013/14 and from 6 to 3 mmt for 2014/15. These projections obviously reflect the assumption that U.S. corn trade with China will begin again sometime in 2014/15. The damage to the U.S. corn market and the prices U.S. corn Producers and Non-Producers receive for their corn likely will be long lasting.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

263. China replaced imports from the U.S. with has increased imports from the Ukraine; and reportedly small shipments from Brazil and Argentina. In other words, the U.S. is already beginning to lose China as an important corn export market, and it will be difficult to get it back.

R. GMOs in China

264. China imports more biotech soybeans than any other country. The vast majority of China's soybean imports are biotech varieties, even though biotech soybeans (and corn) are not commercially grown in China. China imports soybeans primarily from the U.S., Brazil, and Argentina.

265. China has approved five-biotech crops for importation – canola, cotton, corn, soybeans, and sugar beets. Approximately 15 different corn biotech products have been approved by China, including "events" developed by Monsanto, Syngenta, Bayer, and DuPont. The number of approved soybean products is approximately eight and there are six cotton and seven canola products. Only one sugar beet product has been approved.

266. China started testing and rejecting cargoes of U.S. corn in November 2013.

267. By mid-December 2013, China had rejected shipments of U.S. corn totaling 545,000 metric tons. *See* http://www.reuters.com/article/2013/12/20/china-corn- idUSL3N0JZ0EZ20131220.

268. Beginning in July 2014, China's General Administration of Quality Supervision, Inspection, and Quarantine announced that it would require official government certification from the point of origin that shipments of DDGS are free of MIR162. China's rejection of U.S. DDGS due to the presence of MIR162 hurt the price of U.S. corn.

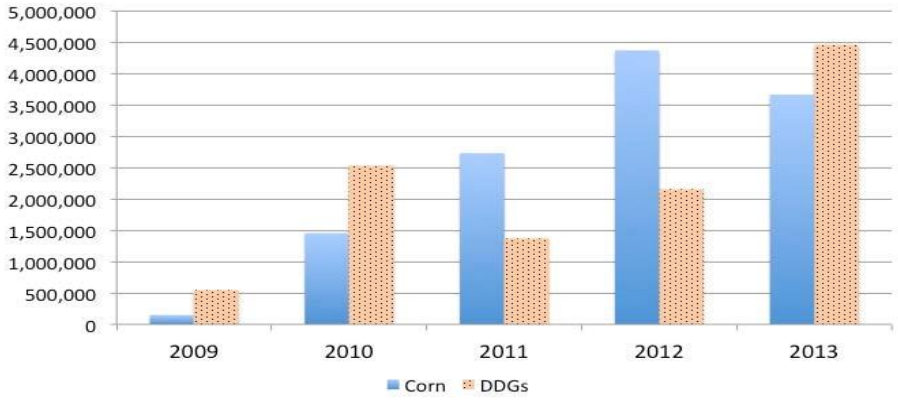
S. DDGS Trade

269. U.S. DDGS exports to China totaled 2.16 mmt in calendar year 2012 and 4.45 mmt in calendar year 2013. DDGS trade has been hit hard recently but the extent of the impact on corn prices may not show up in the trade data yet.

U.S. Exports of Corn and DDGS to China: 2009-2013 (calendar years)



Source: USDA, GATS. DDG HS code 2303300000

270. China was by far the largest market for U.S. DDGS exports accounting for approximately 50% of all exports. The U.S. exports over 20% of annual DDGS production. http://www.extension.iastate.edu/agdm/crops/outlook/dgsbalancesheet.pdf.

271. The loss of the large Chinese market for DDGS displaces corn in the U.S. domestic market, pushing corn prices down further.

272. The impact of the loss of the Chinese market for corn and corn products to U.S. corn Producers and Non-Producers likely will be long lasting. The MIR162 incident has similarities to other international GMO contamination incidents, which have had long-lasting market effects. For instance, more than eight years after the 2006 Bayer Crop Science's Liberty Link contamination of the U.S. long-grain rice supply, exports to Europe have yet to recover. Before the 2006 marketing year, the EU-27 procured approximately 25% of its rice imports from

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

the U.S. Immediately after the contamination event, the EU blocked imports of any new commercial U.S. long-grain rice imports. In fact, U.S. long grain rice farmers lost one of their most important markets, and they have yet to get it back despite considerable effort and expense. Recently, an official delegation from the U.S. rice industry visited countries in the EU (such as Germany and the United Kingdom) where they held discussions focused on the re-introduction of U.S. rice into this important market. After this visit, the USA Rice Federation reported that market re-entry faces significant hurdles:

> The U.S. has a superior product and the industry has successfully addressed environmental and social concerns of this market, but it's clear we have more work to do before our German customers return to us," said Keith Glover, president and CEO of Producers Rice Mill and chairman of USA Rice's World Market Price committee. USA Rice Federation, *USA Rice Daily* (Oct. 14, 2014).

273. In commodity markets like corn, a relatively small change in trade volume can have a significant impact on price. One of the prime examples of the operation of this basic law of economics occurred in 1973, when Middle Eastern oil producers (Iran and Arab members of OPEC) cut off exports to the U.S. to protest American military support for Israel. Even though imports from this region accounted for only about 10% of the U.S. oil supply, petroleum prices quadrupled in response to the export embargo and there were long lines for gasoline at filling stations.

274. Another more recent example of inelastic demand at work is evident from the world coffee market. Brazil produces about 35% of the world's coffee and is unfortunately in the middle of a drought that is affecting both the 2014 and 2015 coffee harvests in that country. In 2014, the Brazilian coffee harvest was down about 13% and this doubled the price of coffee. World coffee production is about 150 million bags per year, and as the following quote from the *Financial Times* indicates, a 10 million bag swing in Brazil's production over a two-year period

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

(about a 3.5% change in production) can mean the difference in coffee prices ranging between $3 and $1.50 per pound:

> Brazil is the largest coffee producer in the world, accounting for about 35 per cent of all output. Industry consensus around the 2014 Brazilian harvest seems to have settled at about 48m 60kg bags, down from the previous year's 54-55m, but the 2015 forecasts have ranged widely between 40m and 53m bags. Estimates for the cumulative Brazil supply 2014 and 2015 combined, range from 92m to 102m bags, which is the difference between $3.00 and $1.50 per pound of coffee. *Financial Times* (Sept. 17, 2014).

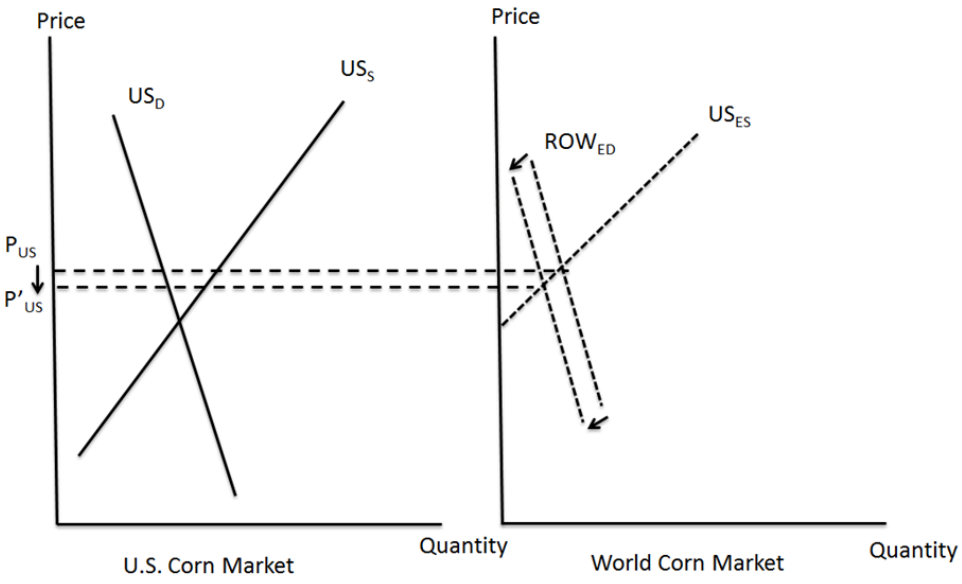
275. Based on the same economic logic, the *Wall Street Journal* reasoned that the loss of the Chinese corn market to the U.S. industry over MIR162 will have an important impact on the U.S. corn price, even though that market represented only about 12% of U.S. exports: "Exports account for only about 12% of the U.S. corn crop, but China's rapid growth gives the country an outsize influence over prices." *Wall Street Journal*, U.S. Corn Exports to China Dry Up Over GMO Concerns (Apr. 11, 2014).

276. In the U.S. corn market, both domestic demand and supply curves are relatively inelastic, especially in the short run. Elasticity measures the degree of responsiveness in supply or demand to price changes. If both the supply and demand curves are inelastic, then for each curve it will take a relatively large change in price to effect a change in quantity demanded or supplied. This is shown in the left panel of the diagram below, where the U.S. domestic demand for corn is represented as schedule US_D and the domestic supply is labeled as US_S. Both of these curves are inelastic as drawn. The horizontal difference between the supply (US_S) and demand (US_D) at world price (P_{US}) is the amount of corn exported.

277. The right hand panel of the diagram shows the market for U.S. corn exports. The U.S. export supply curve shown to the world market is labeled as US_{ES}. This curve is based on the U.S. domestic supply and demand curves in the left hand panel. For any price above the point

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

where US_D and US_S intersect in the left-hand panel, there is excess domestic corn that is supplied to the world market according to the schedule US_{ES} in the right hand panel. The world demand for U.S. corn is shown by the curve ROW_{ED} in the right hand panel. This includes demand from China. Following the MIR162 ban the ROW_{ED} curve shifts left as shown by the arrows in the right hand panel. An inward shift of the global demand for U.S. corn reduces exports from the U.S. The intersection of the shrunken ROW_{ED} curve and US_S determines the volume of trade after the MIR162 ban. U.S. corn exports are reduced by a fixed volume due to a foreign market closing, and the U.S. price falls to P'_{US}. The drop in price is relatively large, even if the shrinkage in exports is a small share of production, because the price must fall to clear a market in which supply and demand are inelastic.



278. Under the bedrock economic law of supply and demand, for an exportable good, when there is less foreign demand for a product, particularly one with relatively inelastic demand and supply curves, the price is lower than it otherwise would be.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

279. As a result, all U.S. corn Producers who priced their corn after November 2013 have received a lower price for their corn than they would have received if China's imports of U.S. corn had not effectively stopped.

280. These effects are likely to continue in the future, both because Chinese purchasers may not necessarily return to former U.S. suppliers even though MIR162 is now approved, and also because the presence of Event 5307 in Syngenta's Duracade corn may cause contamination similar to the contamination caused by MIR162 alone.

T. Losses Suffered by Non-Producers

281. Producers were not the only ones to suffer the impact of lost sales, or sales at lower prices than they would have received if China's imports of U.S. corn had not effectively stopped. Grain elevators, which buy from farmers and re-sell further down the supply chain, similarly suffered losses from the drop in corn prices, as well as reduced volumes and reduced margins. And, to the extent that exporters have purchased corn or DDGS for re-sale in the export market, they also suffered losses when the price of corn and DDGS fell.

282. When the price of corn and DDGS drops, and those products cannot be exported to China, there is far less need for the services of those who process, haul, or otherwise transport those products. Thus, transporters for the export trade have seen their business decimated with the evaporation of Chinese exports.

283. Exporters have also been hit hard. They have suffered from reduced shipments and canceled or rescinded export contracts as well as delayed payments on stalled deliveries to China. With respect to shipments held in Chinese ports, exporters have incurred huge costs for storage, moving, late customs clearance, customs checking, import taxes, and diversion fees. Delays in

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

payment on shipments to China further affected the credit of exporters and thus impaired their ability to divert their corn or DDGS to other markets.

284. Many companies seeking to import U.S. corn and DDGS who accepted shipments that later tested positive for MIR162 have been forced to default on contracts to purchase additional quantities of U.S. corn and DDGS because they are no longer able to obtain import permits. They are also unable to enter into new contracts. This has seriously affected the business of exporters.

285. These effects are likely to continue in the future, both because Chinese purchasers may not necessarily return to former U.S. suppliers even though MIR162 is now approved and because the presence of Event 5307 in Syngenta's Duracade corn may cause contamination similar to the contamination caused by MIR162 alone.

IV. CLASS ACTION ALLEGATIONS

286. **Producer Class.** Plaintiffs Leroy Edlund, Douglas A. Redman, Marvin Jensen, and Roger Ward bring this action pursuant to Rule 23 of the Minnesota Rules of Civil Procedure on behalf of themselves and a class consisting of:

> All residents of Minnesota that grew and harvested corn in Minnesota, and then sold the corn on a commercial basis (or who received revenue from or such corn under a crop-share agreement), from November 2013 to the present.

Excluded from the Class are the Court and its employees; Syngenta; any parent, subsidiary, or affiliate of Syngenta; and all employees and directors who are or have been employed by Syngenta during the relevant time period. Also excluded from the Class are any corn producers that knowingly planted corn containing the MIR162 event. Plaintiff reserves the right to amend the Class definition prior to class certification.

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

287. **Non-Producer Class.** Plaintiff Matawan Grain and Feed, LLC , brings this action under Minnesota Rule of Civil Procedure 23 on behalf of itself and a Class of similarly situated Non-Producers defined as:

> All residents of Minnesota who, since January 1, 2013, prepared, stored, transported, loaded, exported, sold, or purchased for resale, on a commercial basis, U.S. commodity corn or DDGS produced by others.

Excluded from the Class are the Court and its employees; Syngenta; any parent, subsidiary, or affiliate of Syngenta; and all employees and directors who are or have been employed by Syngenta during the relevant time period; and all Producers. Plaintiff reserves the right to amend the Class definition prior to class certification.

288. Plaintiffs seek to represent the Classes for any damages and injunctive relief. Plaintiffs assert claims against Syngenta individually and on behalf of all Class members for the violations of law alleged herein.

289. All requisite elements of Minnesota Rules of Civil Procedure 23.01 and 23.02 are satisfied, making class certification appropriate.

290. **Numerosity.** The numerosity requirement of Minnesota Rule of Civil Procedure 23.01(a) is satisfied for the proposed Producer and Non-Producer Classes, because the members of the proposed Classes are so numerous and geographically dispersed that joinder of all their members is impracticable. Although the exact number and identity of each member of each of the Classes, there are believed to be not less than thousands each of Producers and Non-Producers in Minnesota.

291. **Commonality.** The commonality requirement of Minnesota Rule of Civil Procedure 23.01(b) is satisfied because there are questions of law or fact common to Plaintiffs and the other members of the Classes. Among those common questions of law and fact are as follows:

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

a. whether the members of the Classes have sustained damages in their business or property by reason of Syngenta's violation of Minnesota law, and, if so, the proper measure and appropriate formula to be applied in determining damages;

b. whether Syngenta, through its acts or omissions, caused or contributed to cause the loss of export markets for U.S. corn and DDGS, including China;

c. whether Syngenta knew or should have known that their acts or omissions would cause or contribute to cause the loss of export markets for U.S. corn and DDGS, including China;

d. whether the loss of export markets for U.S. corn and DDGS, including China, resulted in a reduction in the price Non-Producers received for U.S. corn and DDGS;

e. whether Syngenta is legally responsible for the loss of U.S. corn and DDGS export markets and the reduction in price received for U.S. corn and DDGS, as well as lost business and increased costs associated with the loss of the Chinese export market under one or more of the legal theories asserted in this Complaint;

f. whether Plaintiffs and the members of the proposed Classes are entitled to compensatory, consequential, and exemplary damages;

g. whether Syngenta had a duty to exercise reasonable care in its commercialization of MIR162 and/or Event 5307 corn;

h. whether Syngenta breached its duty of care in its commercialization of MIR162 and/or Event 5307 corn; and

i. whether Syngenta was negligent in breaching its duty of care in its commercialization of MIR162 and/or Event 5307 corn.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

292. **Typicality.** The typicality requirement of Minnesota Rule of Civil Procedure 23.01(c) is satisfied because Plaintiffs' claims arise from the same course of conduct by Syngenta and are based on the same legal theories as the claims of the Classes. Plaintiffs and the other Class members each sustained damages arising from Defendant's wrongful conduct, as alleged more fully herein. All Class members have been the subject of Defendant's unfair and unlawful business practices as described herein. The relief sought is common, unitary, and class-wide in nature. The same material facts that Defendant withheld from Plaintiffs were withheld from the other Class members. Further, Plaintiffs seek the same forms of relief as other Class members. More specifically, Plaintiffs Edlund, Redman, Jensen, and Ward's claims are typical of the claims of members of the Producer Class; and Plaintiff Matawan Grain and Feed, LLC's claims are typical of members of the Non-Producer Class. Therefore, the "typicality" requirement of Minnesota Rule of Civil Procedure 23.01(c) is satisfied.

293. **Adequacy.** The adequacy requirement of Minnesota Rule of Civil Procedure 23.01(d) is satisfied because Plaintiffs are committed to the vigorous prosecution of this action, which is reflected in Plaintiffs' retention of competent counsel experienced in complex litigation and, for purposes of this action, agricultural biotechnology litigation. Because Plaintiffs' Edlund, Redman, Jensen, and Ward's claims are typical of the claims of members of the Producer Class, and Plaintiff Matawan Grain and Feed, LLC's claims are typical of members of the Non-Producer Class, Plaintiffs have every incentive to vigorously pursue those claims and adequately protect interest of the respective Classes they seek to represent. Plaintiffs have no conflicts with, or interests antagonistic to, the other members of the Classes they respectively seek to represent who have been damaged as a result of the conduct alleged herein.

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

294. **Class Counsel.** Plaintiffs' counsel satisfies the requirements of Minnesota Rule of Civil Procedure 23.07 to serve as Class counsel. Plaintiffs' counsel has identified and thoroughly investigated the claims set forth herein, and are highly experienced in the management and litigation of class actions and complex litigation in general and agricultural and biotechnology litigation in particular. Plaintiffs' counsel has extensive knowledge of the applicable law and possesses the resources to commit to the vigorous prosecution of this action on behalf of Plaintiffs and the other members of the Classes.

295. This action also meets the requirements of Minnesota Rule of Civil Procedure 23.02(b). Syngenta has acted, or refused to act, on grounds generally applicable to Plaintiffs and other members of the Classes, making final injunctive relief or corresponding declaratory relief with respect to the proposed Classes appropriate.

296. **Predominance.** Moreover, this action meets the requirements of Minnesota Rule of Civil Procedure 23.02(c). Common questions of law and fact, including those set forth above, exist as to all Class members' claims. These common questions predominate over questions affecting only individual Class members. A class action is superior – if not the only method – for the fair and efficient adjudication of this controversy.

297. The proposed Classes have a well-defined community of interest in the questions of fact and law to be litigated. The common questions of law and fact are predominate with respect to the liability issues, relief issues and anticipated affirmative defenses. The named Plaintiffs have claims typical of the members of the respective Classes they seek to represent. Without limitation, as a result of Defendant's conduct alleged herein, Plaintiffs and members of the Classes were: (a) injured; and, (b) sustained pecuniary loss in an ascertainable amount to be proven at the time of trial.

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

298. Class treatment will permit large numbers of Producers and Non-Producers, similarly situated, to prosecute their respective claims in a single forum simultaneously, efficiently, and without the unnecessary duplication of evidence, effort, and expense that numerous individual actions would produce. The certification of Producer and Non-Producer classes in this action is superior to the litigation of a multitude of cases by members of the putative classes. Class adjudication will conserve judicial resources and will avoid the possibility of inconsistent rulings. Moreover, there are members of the Classes who are unlikely to join or bring an action due to, among other reasons, their reluctance to sue Defendant and/or their inability to afford a separate action. Equity dictates that all persons who stand to benefit from the relief sought herein should be subject to the lawsuit and hence subject to an order spreading the costs of the litigation among the members of the Classes in relationship to the benefits received. Even if the members of the classes themselves could afford individual litigation, the court system could not. Individualized litigation presents a potential for inconsistent or contradictory judgments. Individualized litigation increases the delay and expense to all parties and the court system presented by the complex legal and factual issues of the case. By contrast, the class action device presents far fewer management difficulties, and provides the benefits of single adjudication, economy of scale, and comprehensive supervision by a single court.

299. This action is manageable as a class action. Notice may be provided to members of the Classes by First Class U.S. Mail and through alternative means, including publication. Furthermore, the claims set forth below based on Minnesota law will apply evenly to all proposed members of the Classes (as noted below). Thus, the superiority and manageability requirements Minnesota Rule of Civil Procedure 23.02(c) are satisfied.

Hennepin County, MN

V. CAUSES OF ACTION

COUNT I. VIOLATION OF MINN. STAT. §§325D.13, 325D.44 AND 325F.69

300. Plaintiffs repeat and reallege and incorporate herein by reference as though fully set forth herein all preceding paragraphs of this Complaint.

301. Plaintiffs bring this cause of action individually and on behalf of the Classes.

302. Minnesota Statutes §§325D.13, 325D.44 and 325F.69, prohibit misrepresenting the quality of goods as well as sales sounding in fraud, misrepresentation, or deceptive practices, providing in pertinent part:

> 325D.13 QUALITY, MISREPRESENTED
> No person shall, in connection with the sale of merchandise, knowingly misrepresent, directly or indirectly, the true quality, ingredients or origin of such merchandise.
>
> 325D.44 DECEPTIVE TRADE PRACTICES
> A person engages in a deceptive trade practice when, in the course of business, vocation, or occupation, the person:
>
> (2) causes likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;
>
> (3) causes likelihood of confusion or of misunderstanding as to affiliation, connection, or association with, or certification by, another;
>
> . . .
>
> (5) represents that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;
>
> . . .
>
> (7) represents that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;
>
> . . .

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

> (13) engages in any other conduct which similarly creates a likelihood of confusion or of misunderstanding.
>
> 325F.69 UNLAWFUL PRACTICES
>
> Subdivision 1.Fraud, misrepresentation, deceptive practices. The act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby, is enjoinable as provided in section 325F.70.

303. Minn. Stat. §§8.31 and 325D.45 provide private remedies for violations of these provisions.

304. Syngenta used and/or continues to use in commerce false or misleading descriptions of fact, and/or false or misleading representations of fact, which were likely to cause and/or did cause confusion and mistake.

305. Syngenta's representations, statements, and commentary have been largely disseminated, and included:

a. To APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact on export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. To APHIS and the public, that MIR162 could and would be channeled away from markets that had not yet approved MIR162;

c. To the press and to investment analysts on quarterly conference calls;

d. Through statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Through other statements indicating that approval from China for MIR162 corn was expected at times when Syngenta knew it was not.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

306. In addition, Syngenta stated in 2007 that its regulatory filings with China were "in process" when it did not actually file for approval from China until 2010.

307. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including Producers (to encourage further sales, planting, and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, and its own status within that process for MIR162, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

308. In addition to these false and misleading statements, Syngenta failed to disclose, and actively suppressed and concealed, that approval from China was not reasonably likely to occur (at least) for the 2011 and 2012 growing seasons and that purchase and planting of Viptera created at least a substantial risk of loss of the Chinese market.

309. Syngenta also has at all times made false and misleading statements regarding the ability to channel MIR162 corn, as well as the state and effectiveness of its supposed stewardship generally and in regard to MIR162.

310. Syngenta also failed to disclose, and actively suppressed and concealed, that there was not (and would not be) an effective system in place for isolation or channeling of Viptera or Duracade.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

311. As a developer of genetically modified products (including MIR162), Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Producers and Non-Producers, including Plaintiffs, do not have access.

312. Syngenta also has special knowledge regarding the systems it did and did not institute for isolation and channeling of its genetically modified products, including Viptera and Duracade, which was not available to Producers or Non-Producers, including Plaintiffs.

313. Syngenta knew but failed to disclose, suppressed, and concealed that systems were not in place to isolate or effectively channel Viptera and Duracade, and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply and into export markets, including China, which had not approved import, causing market disruption.

314. Syngenta also knew but failed to disclose, suppressed, and concealed, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolation or channeling of Viptera or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

315. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Producers and Non-Producers would be harmed.

316. Syngenta knew that Producers and Non-Producers, like Plaintiffs here, are affected by its business and depend on it for responsible commercialization practices.

317. For all these reasons, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 and 2012 growing seasons, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which it did not have approval, and that commercializing Viptera (and later Duracade) without Chinese import approval or an effective channeling system created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

318. In addition, Syngenta made numerous misrepresentations to the effect that approval from China was on track and/or would be received during time periods when Syngenta knew it was not, and that Viptera and Duracade could, and would, be channeled away from markets for which approval had not been obtained. Syngenta had a duty to prevent words it communicated from misleading others.

319. Syngenta's misrepresentations and omissions were made intentionally or recklessly.

320. Syngenta, in connection with the sale of merchandise – Viptera and Duracade – knowingly misrepresented, directly or indirectly, the true quality of that merchandise in violation of Minn. Stat. §325D.13.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

321. Syngenta's actions caused a likelihood of confusion or misunderstanding as to: the source, sponsorship, approval or certification of Viptera and Duracade; the affiliation, connection, or association with, or certification by, another in violation of Minn. Stat. §325D.44.

322. Syngenta represented that Viptera and Duracade: had sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have; were of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another in violation of Minn. Stat. §325D.44.

323. Syngenta used or employed fraud, false pretense, false promise, misrepresentation, misleading statements, or deceptive practices, with the intent that others rely thereon in connection with the sale of Viptera and Duracade in violation of Minn. Stat. § 325F.69.

324. Syngenta's violations of Minn. Stat. §§325D.13, 325D.44, and 325F.69 proximately caused harm to Producers and Non-Producers.

325. This action will serve a public benefit. Not only were Syngenta's misrepresentations made to a large segment of the public, Syngenta's conduct vitally affects a large segment of the public as well – all Producers and Non-Producers in the business of growing, selling, storing, exporting, and transporting corn and corn products– who depend on the responsible stewardship practices of developers like Syngenta when commercializing GM products. Harm to Producers and Non-Producers has a reverberating effect throughout Minnesota as the community depends, particularly the economies of rural areas, on the success of Producers and Non-Producers. The issues surrounding what duties and liabilities such developers have for irresponsible and intentional acts is not limited to corn but impact all developers and stakeholders in a similar position. Agribusinesses—notably Syngenta—routinely rush products to the market

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

prior to full regulatory approval both domestically and internationally and often fail to implement appropriate protocols to keep these unapproved products out of the market. Corn[2], Rice[3], and Wheat[4] farmers have all suffered damages related to such conduct. Defendant's history of conduct similar to that alleged here indicates that Defendant has not been, and will not be deterred, absent significant and sweeping consequences. This action should proceed under Minn. Stat. §8.31 to promote the public benefit by increasing the consequences of recklessly marketing seeds and trait stacks, and to provide the deterrence necessary to ensure similar events do not occur in the future.

326. Producers and Non-Producers are entitled to compensatory damages and attorneys' fees. (See Minn. Stat. §§ 8.31, subd. 3a and 325D.45. subd. 3).

327. As a direct and proximate result of the foregoing, Plaintiffs and the classes have been injured and suffered financial loss for which damages, injunctive, declaratory and/or other relief as may be available at law or equity is warranted.

COUNT II. COMMON LAW NEGLIGENCE

328. Plaintiffs repeat and reallege and incorporate herein by reference as though fully set forth herein all preceding paragraphs of this Complaint.

329. Plaintiffs bring this cause of action individually and on behalf of the Classes.

330. Syngenta owed a duty to Producers and Non-Producers to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

331. Syngenta breached its duties by acts and omissions including but not limited to:

[2] In 2001, Aventis settled a class action suit after failing to keep its Starlink corn, approved only for animal feed, out of the US food supply.

[3] In 2011 Bayer CropScience settled thousands of cases related to the contamination of the US long grain rice supply with its LibertyLink rice strain.

[4] In 2014, Monsanto settled three putative class actions brought after genetically engineered, unapproved, wheat was discovered in Oregon.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

a. Prematurely commercializing Viptera and Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective "stewardship" program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or "channel" those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera would lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

332. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Producers and Non-producers.

333. Producers and Non-producers are thus entitled to an award of compensatory damages, pre-judgment, and post-judgment interest.

334. Syngenta's conduct was willful, wanton, grossly negligent, and in reckless disregard of the rights of others, including Producers and Non-producers. Moreover, Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to the rights of Producers and Non-producers, and deliberately proceeded to act in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately proceeded to act with indifference to that high probability of harm. Syngenta's acts and omissions thus showed deliberate reckless disregard for the rights of Producers and Non-producers. Punitive damages are thus warranted.

Hennepin County, MN

COUNT III. STRICT LIABILITY – PRODUCTS LIABILITY

335. Plaintiffs repeat and reallege and incorporate herein by reference as though fully set forth herein all preceding paragraphs of this Complaint.

336. Plaintiffs bring this cause of action individually and on behalf of the Class.

337. Syngenta has in the past and continues to manufacture, sell, or otherwise distribute corn containing MIR162.

338. Syngenta sold Viptera and Duracade into the stream of commerce by selling it to farmers.

339. Viptera and Duracade was in a defective condition, unreasonably dangerous to users' property because it is nearly impossible to keep corn containing MIR162 from contaminating non-MIR162-containing corn.

340. The defective condition of Viptera and Duracade existed at the time the product left Syngenta's control.

341. Corn containing the MIR162 event Viptera and Duracade was used in a manner reasonably anticipated, as it was planted to grow corn, a reasonable use of which was selling the corn on the open market, both foreign and domestic.

342. Syngenta should have reasonably expected Plaintiffs, and the other members of the Classes, to be subject to the harm caused by the defective condition of corn containing the MIR162 event.

343. As a direct and proximate result of the defective and unreasonably dangerous condition of Viptera and/or Duracade as it existed when Syngenta supplied it, Plaintiffs, and the other members of the Classes, have sustained injuries and damages as alleged above.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

344. Syngenta knew, or should have known, that its conduct would result in injuries and damages to Plaintiffs and the other Class members.

345. As a direct and proximate result of the foregoing, Plaintiffs and the other Class members have been injured and suffered financial loss for which damages, injunctive, declaratory and other relief as may be available at law or equity is warranted.

COUNT IV. STRICT LIABILITY – FAILURE TO INSTRUCT AND/OR WARN

346. Plaintiffs repeat and reallege and incorporate herein by reference as though fully set forth herein all preceding paragraphs of this Complaint.

347. Plaintiffs bring this cause of action individually and on behalf of the Classes.

348. Syngenta has in the past and continues to manufacture, sell, or otherwise distribute corn containing MIR162.

349. Syngenta sold Viptera and Duracade into the stream of commerce by selling it to farmers.

350. Viptera and Duracade was used as intended.

351. Viptera and Duracade were used in a manner Syngenta could reasonably anticipate.

352. Syngenta is strictly liable to Plaintiffs and the other members of the Classes as a result of its failure to warn about the dangers of Viptera and Duracade.

353. Syngenta knew, or had reason to know, of the dangers associated with corn containing the MIR162 event.

354. Syngenta had a duty to warn and/or instruct Plaintiffs and the other members of the Classes.

355. Syngenta did not give adequate warning of the danger of Viptera and Duracade. Nor did Syngenta give adequate instructions as to the use of Viptera and Duracade.

27-CV-15-17845
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

356. Plaintiffs and the other members of the Classes suffered injury and damages as a direct and proximate result of Syngenta's failure to provide an adequate warning and/or instructions regarding the dangers of Viptera and Duracade.

357. Thus, Syngenta knew, or should have known, that its conduct would result in injuries to Plaintiffs and the other members of the Classes.

358. Nevertheless, Syngenta continued such conduct in reckless disregard of or conscious indifference to those consequences.

359. As a direct and proximate result of the foregoing, Plaintiffs and the other members of the Classes have been injured and suffered financial loss for which damages, injunctive, declaratory and other relief as may be available at law or equity is warranted.

VI. REQUEST FOR RELIEF

All Plaintiffs, on behalf of themselves and their respective Classes, respectfully request that the Court enter judgment in their favor and against Defendant, as follows:

A. That the Court certify the Classes pursuant to the Minnesota Rule of Civil Procedure 23 and designate Plaintiffs as representatives of the Classes and the undersigned Class Counsel as counsel to the Classes;

B. All monetary and compensatory relief to which they are entitled and will be entitled at the time of trial;

C. That the Court enter a judgment finding:

i. Syngenta violated Minnesota Statutes §§325D.13, 325D.44 and 325F.69.

ii. Syngenta's release of corn containing the MIR162 event was negligent.

iii. Syngenta is strictly liable for damages caused as a result of the release of corn containing the MIR162 event.

27-CV-15-17765
Filed in Fourth Judicial District Court
10/2/2015 3:05:00 PM
Hennepin County, MN

iv. Syngenta failed to adequately warn or instruct Producers and Non-Producers as to the danger of corn containing the MIR162 event.

D. That the Court award monetary damages, including compensatory relief, to which Plaintiff and the other Class members are entitled to, in an amount to be determined at trial;

E. That the Court award Plaintiff his costs incurred in this action and reasonable attorney's fees;

F. That the Court award Plaintiff prejudgment interest;

G. That the Court award such other and further relief as may be available at law or equity as the court deems just and proper.

VIII. DEMAND FOR JURY TRIAL

Plaintiffs demand a trial by jury on all issues.

Dated: October 2, 2015

Respectfully Submitted,

STATE OF MINNESOTA | DISTRICT COURT

COUNTY OF HENNEPIN | FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

This Document Relates to: ALL ACTIONS

Case Type: Civil Other

Honorable Thomas M. Sipkins

Court File No.: 27- CV-15-3785

MASTER COMPLAINT FOR PRODUCERS AND NON-PRODUCERS (NON-CLASS)

AND JURY DEMAND

Plaintiffs Brekken Farms, Terry Ahlbrecht, Red River Grain Company, and Porter Elevator, Inc. bring this action against Syngenta Seeds, Inc. ("Syngenta Seeds"), Syngenta AG, Syngenta Crop Protection AG ("Crop Protection AG"), Syngenta Corporation ("Syngenta Corp."), Syngenta Crop Protection, LLC ("Crop Protection LLC"), Syngenta Biotechnology, Inc. ("Syngenta Biotech") (collectively "Defendants" or "Syngenta"). The terms "Plaintiffs," "Producers," and "Non-Producers" are used generically to refer to any Producer or Non-Producer who has filed an action that has been or becomes related to this Court File Number 27-CV-15-3785. All Producers and Non-Producers must file an individual Notice to Conform to conform their complaints to the facts alleged herein. Plaintiffs state as follows:

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

INTRODUCTION

The Plaintiffs named herein and all those who file a Notice to Conform their actions to this Complaint (collectively "Plaintiffs") consist of thousands of corn "Producers" (U.S. corn growers) and "Non-Producers" (entities that purchased, stored, transported, and/or exported corn grown in the United States). Plaintiffs bring this action against Syngenta, a multibillion-dollar global agribusiness enterprise that develops and sells genetically modified corn seed. Plaintiffs and Syngenta are part of an interconnected industry that demands and expects all market participants to act, at least in part, for the mutual benefit of all others in their interconnected web.

Biotechnology sits at the heart of this industry. It holds great promise but can also cause great harm. Biotechnology companies such as Syngenta must act responsibly when commercializing new products containing genetically modified traits. All industry participants, including Syngenta, understand that irresponsible commercialization of a new genetically modified product can cause major trade disruption and massive harm to both Producers and Non-Producers. That is why industry leaders, including Syngenta, have pledged to all other stakeholders that they will act responsibly in introducing new genetically modified traits.

Syngenta broke that pledge. Starting in 2010, it took unreasonable and irresponsible actions to launch two new products containing genetically modified traits before obtaining approval from China, a key export market. These actions caused the Chinese market to be effectively closed to U.S. corn shipments starting in November 2013.

After a period of development, Syngenta petitioned the United States Department of Agriculture ("USDA") in 2007 for deregulation of its Agrisure Viptera® branded corn seed, which contains the genetically modified MIR162 trait. The USDA approved Viptera for sale in 2010. Syngenta recognized that China had not approved MIR162. Syngenta further knew that

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

China's approval was important, as a large and growing export market. In fact, Syngenta had recently sought regulatory approval in China, which on average takes two to three years. Syngenta had previously been warned by industry participants not to introduce MIR162 without key export market approval because of the devastating consequences that were likely to occur from premature commercialization. But Syngenta had a limited patent life for this genetic trait. Every year that passed without commercialization resulted in lost monopoly profits for Syngenta.

Syngenta had a choice. It could gamble, or it could wait. Syngenta decided to gamble and immediately brought Viptera to market. Syngenta knew that China would not approve MIR162 until sometime after that trait had entered export channels, which, in turn, created a huge risk that the U.S. corn industry could lose one of their large and growing export markets. Thus, Syngenta knew that Producers and Non-Producers were likely to be adversely impacted by a sudden loss of China as a market for U.S. corn.

From 2011 through 2013, Syngenta was asked by industry participants to stop its aggressive commercialization of Viptera. China's importance as a purchaser of U.S. corn was growing rapidly, and China still had not approved MIR162. Syngenta ignored these pleas. It expanded sales for the 2012 and 2013 growing seasons. By then, Viptera corn had infiltrated the general domestic corn supply.

In November 2013, Syngenta's gamble went bust. China did exactly what everyone in the industry, including Syngenta, knew would happen if China found U.S. shipments contaminated with MIR162: China began rejecting entire shipments of corn from the United States. Industry participants reacted in early 2014 by demanding that Syngenta halt commercialization of Viptera, as well as a new product, Agrisure Duracade™. Duracade contained both MIR162 and a new trait called Event 5307, which was also not approved by China and other key export markets. Syngenta

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

had petitioned the USDA for deregulation of Duracade in 2011, and approval was granted for that product in 2013. Industry participants raised "grave concerns about the serious economic harm" to those in the industry, including farmers, from the loss of the Chinese market. The National Grain and Feed Association quantified the harm at that time as ranging from $1 billion to $2.9 billion.

Syngenta again ignored the pleas. Instead, it continued to sell Viptera and launched Duracade for the 2014 crop year. These actions prolonged the problem and expanded the economic loss to Producers and Non-Producers. Corn grown by farmers who did not purchase Syngenta's products had become contaminated with the MIR162 and Event 5307 traits through cross-pollination from neighboring fields. In addition, Viptera- and Duracade-grown corn was commingled with other corn in grain elevators and other storage facilities.

During this process, Syngenta actively misled Producers and Non-Producers. For instance, Syngenta represented repeatedly that China would approve MIR162 in March 2012, even though it knew that approval in that time-frame was extremely unlikely. Syngenta also made false representations about the effect of the Chinese market on the global corn market and about measures it would take to prevent genetically-altered crops from contaminating other crops. Syngenta went so far as to represent to the USDA and the public that "there should be no effects on the U.S. maize export market" from deregulation, and that it would impose stewardship and channeling requirements to steer Viptera corn away from unapproved export markets. Syngenta, however, did not follow through in any meaningful way on these commitments. In fact, Syngenta actually increased the risk of contamination and commingling of Viptera. For example, when Bunge North America, Inc. ("Bunge") refused to accept Viptera corn, hoping to minimize the risk of MIR162 contaminating shipments bound for China, Syngenta sued in an attempt to force Bunge to accept its unapproved product.

27-CV-15-17845
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Syngenta's actions foreclosed the China market for U.S. corn exports for an extended term and with a lasting, material impact since it reopened. The loss and subsequent restricted growth of this market, which the USDA had predicted to be the largest export market for corn by 2020, has caused enormous harm to Producers and Non-Producers. That harm continues to grow. China approved MIR162 in December 2014; however, it still has not approved Event 5307. U.S. corn exports to China have not yet recovered, and it remains to be seen whether they will ever regain the levels they would have attained if not for the Syngenta trade disruption.

This action seeks compensation for thousands of U.S. corn Producers and Non-Producers, who have suffered substantial losses as a direct result of Syngenta's irresponsible conduct, as well as punitive damages for Syngenta's willful harm to the U.S. corn industry.

I. Jurisdiction and Venue

1. This is a civil case in which the Court has original jurisdiction under the Constitution of the State of Minnesota, Article 6, §3. Plaintiffs do not assert any claims arising under federal law.

2. The Court has personal jurisdiction over defendant Syngenta Seeds, Inc. and all other named defendants because Syngenta Seeds, Inc. maintains its principal place of business in Minnesota, transacts business here, and uses real or personal property situated in Minnesota. Minn. Stat. § 543.19. All other defendants have acted in concert with Syngenta Seeds, Inc. and with one another through agreements or other arrangements to act in a collective manner and/or as a joint venture, and thus have used or possessed real or personal property in Minnesota, have transacted business in Minnesota, and have committed acts outside of Minnesota that have caused injury or property damage in Minnesota.

27-CV-15-17855
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

3. Venue is proper in Hennepin County under Minn. Stat. §§ 542.01, 542.02, and 542.11. In addition, venue is also proper in each of the other districts in which Plaintiffs have originally filed because Defendants have marketed, sold, or otherwise disseminated, and continue to market, sell, or disseminate Viptera and Duracade corn in each of the other districts.

4. Without waiving their respective rights to request that their claims be transferred back to the court in which they were originally filed, or to the court in which they could have been originally filed before the Order to Change Venue entered on July 7, 2015, Plaintiffs assert that venue is proper in this district pursuant to the Minnesota Supreme Court's orders of May 22, 2015, A15-0758 and A15-0764, appointing this Court and the Honorable Thomas M. Sipkins "to hear and decide all matters, including pretrial and trial proceedings, in the cases currently filed in any Minnesota state district court, or filed in the future in any Minnesota state district court, against Syngenta Corporation, Syngenta Seeds, Inc., or any related Syngenta entities, and asserting claims alleging that Syngenta unlawfully released or launched a genetically modified corn seed."

II. Parties

A. Plaintiffs

5. Producer Plaintiff Brian Austin Brekken d/b/a Brekken Farms is a citizen of Minnesota that owns and/or operates a farm in Goodhue County, Minnesota. Brekken Farms has been engaged in the business of planting, growing, harvesting, and selling corn during times relevant.

6. Producer Plaintiff Terry Ahlbrecht is a citizen of Minnesota who owns and/or operates a farm in Renville County, Minnesota. Plaintiff Ahlbrecht has been engaged in the business of planting, growing, harvesting, and selling corn during times relevant.

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

7. Non-Producer Plaintiff Red River Grain Company is a Minnesota corporation with its principal place of business in Wilkin County, Minnesota. Red River Grain Company is in the business of purchasing, storing, and selling grain, including corn.

8. Non-Producer Plaintiff Porter Elevator, Inc. is a Minnesota corporation with its principal place of business in Yellow Medicine County, Minnesota. Porter Elevator is in the business of operating a country grain elevator at which it bought, stored, and sold grain, including corn.

B. Defendants

9. Syngenta Seeds is a Delaware corporation with its principal place of business at 11055 Wayzata Boulevard, Minnetonka, Minnesota 55305-1526. Syngenta Seeds is a direct subsidiary of Syngenta Corporation and described itself in its Complaint filed in *Syngenta Seeds, Inc. v. Bunge North America, Inc.*, No. 5:11-cv-04074-MWB, United States District Court, Northern District of Iowa ("*Syngenta v. Bunge*"), as

> a leading agribusiness company committed to sustainable agriculture through research and technology. Syngenta is, among other things, in the commercial seed business. It develops, produces, and sells, through dealers and distributors or directly to growers, a wide range of agricultural products, including corn and soybean seed exhibiting useful traits that have been developed with the techniques of modern biotechnology. The seed products are then grown and harvested as raw materials for the production of biofuels or grain for livestock feed; or are milled and processed for food products.

Among Syngenta Seeds' products that it has sold are the Viptera and Duracade variety of corn seeds that are at issue here. These seeds express, or contain, genetically-engineered traits that were designed to confer resistance to insects.

10. Syngenta AG is a corporation organized and existing under the laws of Switzerland with its principal place of business at Schwarzwaldallee 215, 4058 Basel-Stadt, Switzerland. Syngenta AG is a publicly-traded company on the Swiss stock exchange. American Depositary

27-CV-15-3765
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Receipts for Syngenta AG are traded on the New York Stock Exchange. Syngenta AG was formed in 2000 as a result of the merger of Novartis Agribusiness and Zeneca Agrochemicals and is the only publicly-traded company among the various Syngenta entities named as defendants in this case.

11. Syngenta Corporation is a corporation organized and existing under the laws of the State of Delaware with its principal place of business located at 3411 Silverside Road #100, Wilmington, Delaware 19810-4812. Syngenta Corporation is a subsidiary of Syngenta AG.

12. Crop Protection LLC is a limited liability company organized and operating under the laws of the State of Delaware with its principal place of business located at 410 South Swing Road, Greensboro, North Carolina 27409-2012. Crop Protection LLC is a subsidiary of Syngenta Seeds.

13. Syngenta Biotech is a corporation organized and existing under the laws of the State of Delaware with its principal place of business at P.O. Box 12257, 3054 East Cornwallis Road, Research Triangle Park, North Carolina 27709-2257. Syngenta Biotech is a subsidiary of Syngenta Seeds and traces is operations back to CIBA-Geigy Corporation, a legacy company of Syngenta. Syngenta Biotech field tested under permits issued by or notifications to, and made application for deregulation by, the USDA of the genetically modified corn traits MIR162 and Event 3507. MIR162 is used in Vitpera corn and both MIR162 and Event 5307 are used in Duracade corn.

14. Syngenta AG wholly owns, directly or indirectly, each of Crop Protection AG, Syngenta Corp., Crop Protection LLC, Syngenta Biotech, and Syngenta Seeds.

15. One or more members of Syngenta AG's Board of Directords or the Executive Committee established by the Board of Directors also serve as member(s) of the Board of

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Directors of Crop Protection AG, Syngenta Corp., Crop Protection LLC, Syngenta Biotech, and/or Syngenta Seeds.

16. Employees of the Syngenta group as a whole maintain reporting relationships that are not defined by legal, corporate relationships, but in fact cross those corporate lines. For example, Crop Protection AG maintains two separate product lines – Seeds and Crop Protection – that cross the Defendants' separate, legal corporate existences.

17. The Defendant subsidiaries are subject to additional oversight that requires them to seek approval for certain decisions from higher levels within the functional reporting structure – including in some instances Syngenta AG. Appointments of senior management personnel for the Defendant subsidiaries also may require, in certain instances, approval from individuals or governing bodies that are higher than each subsidiary's respective board of directors.

18. Moreover, Syngenta AG and Syngenta Crop Protection AG management were intimately involved in, and in some instances directed, decisions concerning the commercialization of Vipetera without Chinese approval.

19. Also, Syngenta AG maintains a central global finance function that governs all Defendants. Thus, the Defendant subsidiaries do not function independently but under the Syngenta AG umbrella.

20. Defendants regularly refer to themselves as "Syngenta" with no further description.

21. Thus, the respective jurisdictional contacts of Crop Protection AG, Syngenta Corporation, Crop Protection LLC, Syngenta Biotech, and Syngenta Seeds in the forum state are attributable to Syngenta AG because of the unusually high degree of control Syngenta AG exercises over these subsidiaries.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

22. In addition, on information and belief, Defendants acted in concert under agreements or other arrangements to act in a collective manner and/or as joint venturers regarding the actions and events made the subject of this Complaint. All Defendants, therefore, are jointly and severally liable for the acts for which the Plaintiffs make complaint.

23. Syngenta Seeds is liable for the actions of those with whom it acted in concert through agreements or other arrangements to act in a collective manner and/or as a joint venture, including Syngenta Corp., Syngenta AG, Crop Protection AG, Crop Protection LLC, and Syngenta Biotech.

C. Factual Allegations

24. Biotechnology firms such as Syngenta develop and obtain patents on their bio-engineered products, in this instance seeds. These products are also referred to as genetically-modified organisms, or "GMOs." A patent gives the biotechnology firm the exclusive right to sell its bio-engineered products; however, those patents eventually expire. Biotechnology firms have an economic incentive to "commercialize" (i.e. bring their products to market for planting and harvest) as soon as possible after filing a patent application to maximize profitability.

25. Syngenta set a market share goal for MIR162 by 2014 and sought to achieve commercialization as soon as possible.

26. Premature commercialization poses a well-known and significant risk of harm to Producers and Non-Producers if bio-engineered commodity products are commercialized before they are approved by key importing nations. Certain importing nations, such as China, have a "zero tolerance" policy and will reject grain imports from the United States if they detect the presence of even trace amounts of an unapproved bio-engineered genetic trait in grain shipments. This was well known in the biotechnology industry, including Syngenta, by 2007 at the latest.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

27. Syngenta commercialized MIR162 and Event 5307 despite clear risk of harm to its stakeholders, including Plaintiffs, despite Syngenta's knowledge of that risk, and despite Syngenta's own professed commitment to responsible management.

28. Moreover, Syngenta commercialized MIR162 by consistently misrepresenting the importance and status of China's approval, and without adequate systems in place to isolate or channel MIR162, virtually assuring that MIR162 would contaminate the U.S. corn supply.

1. *Recognized Risk of Irresponsible Commercialization*

29. The corn industry, including Syngenta, recognizes that the harm threatened by irresponsible commercialization is very real.

30. "There have been a number of high-profile cases involving genetically modified varieties ... and disruption of international shipments of commodity grains such as corn, wheat, and rice." http://www.syngentafoundation.org/index.cfm?pageID=703.

31. For example, bio-engineered corn contaminated the U.S. corn supply in 2000 and disrupted international trade causing loss to producers and non-producers. *See In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828 (N.D. Ill. 2002).

32. In 2006, bio-engineered rice contaminated the U.S. rice supply, again disrupting trade and causing massive damages to U.S. rice producers and non-producers. *See In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d 1004 (E.D. Mo. 2009); *Bayer CropScience LP v. Schafer*, 385 S.W.3d 822 (Ark. 2011).

33. In addition to being aware of these and other well-publicized incidents at the time it commercialized MIR162, Syngenta had (and has been) continuously warned by stakeholders about the importance of, and need for, responsible commercialization.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

34. For example, when Syngenta commercialized MIR604 (Agrisure® RW) in 2007, the National Grain and Feed Association ("NGFA") (of which Syngenta is a member) and the North American Export Grain Association ("NAEGA") warned against an "'ill-conceived' plan to commercialize" Syngenta's Agrisure biotechnology-enhanced corn as endangering U.S. corn and corn-product exports, because Syngenta had not obtained regulatory approval for food and feed use in Japan and other U.S. export markets. *See* Houin, "Feed and grain organizations warn growers of limited export markets," Farm World (4/25/2007).

35. The International Grain Trade Coalition also chastised Syngenta, stating that Syngenta "did not respect the responsibility of importing governments to perform necessary risk assessments as demanded by their legislation," that the introduction of Agrisure® RW "was not done in an open transparent manner," and that Syngenta "did not complete authorization in major international markets possessing scientifically sound approval systems prior to commercialization." Letter from International Grain Trade Coalition to Michael Pragnell, CEO Syngenta dated April 18, 2007, p2. The International Grain Trade Coalition further stated that Syngenta's conduct "[e]xposed downstream members of the value chain including producers, handlers, exporters, importers, food processors and distributors to significant liability as currently all countries employ a zero threshold policy for an event not authorized by the importing country" and strongly urged Syngenta to "reverse immediately its decision to commercialize Agrisure RW at this time." *Id.*

36. The Biotechnology Industry Organization ("BIO") is the world's largest biotechnology trade association, of which Syngenta is or was a member. BIO has expressly recognized that "[a]synchronous authorizations combined with importing countries maintaining 'zero tolerance' for recombinant-DNA products not yet authorized results in the potential for

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

major trade disruptions." BIO Product Launch Stewardship Policy, May 21, 2007, at Annex 1 Introduction; *see also* BIO Product Launch Stewardship, December 10, 2009, at Annex 1 Introduction (same); BIO "Stewardship: Actions to be Taken Prior to Launching Special Traits," October 4, 2010, at Annex 1 Introduction (same); BIO Product Launch Stewardship: Food and Agriculture Section, November 27, 2012, at Annex 1 Introduction (same).

37. As stated in BIO's December 10, 2009 "Product Stewardship Policy":

> Since the commercial introduction of biotechnology-derived plant products in 1996, an increasing number of biotechnology-derived plant products intended for food or feed use are authorized for commercial production in many countries throughout the world; however, authorizations in importing countries vary depending on the timing of submissions for import authorization as well as the duration of the authorization process in each country. As a consequence of these asynchronous authorizations, low levels of recombinant-DNA plant materials that have completed full safety assessments in accordance with national and international standards in one or more countries may, on occasion, be present in food or feed in countries in which the authorization process of the relevant recombinant-DNA plant material has not been completed. Asynchronous authorizations combined with importing countries maintaining 'zero tolerance' for recombinant-DNA products not yet authorized results in the potential for major trade disruptions.

http://www.bio.org/sites/default/files/Product_Launch_Stewarship_12_10_09.pdf.

2. *Syngenta Recognizes Its Stewardship Obligation*

38. Under the "Corporate Responsibility" section of its website, Syngenta acknowledges the integrated nature of the commodity market and its responsibility to stakeholders affected by its business, including but not limited to Producers and Non-Producers:

> Our stakeholders are the people who can affect our business or who are affected by it. They include the following groups:
>
> Growers
> Industry
> Non-governmental organizations and international agencies
> Investors
> Employees
> Government

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

39. Syngenta has committed to "respond to feedback from its stakeholders" and "to implement high standards of stewardship for the safe, effective and environmentally responsible use of its products." http://www.syngenta.com/global/corporate/en/about-syngenta/corporate-responsibility/Pages/cr-policy-and-commitments.aspx.

40. Syngenta represents that "it prioritize[s] the issues that are most relevant to our business and most important to our stakeholders."

41. Syngenta also represents that it "maintain[s] the highest standards across our entire business and go[es] beyond regulatory compliance."

42. In Syngenta's "Code of Conduct," posted on its website for all stakeholders to read, Syngenta represents:

- "The trust and confidence of Syngenta's stakeholders is critical to our continuing success and will only be sustained if the company acts and is seen to act in accordance with the highest standards of ethics and integrity. To ensure we meet the standards which our stakeholders expect, we have produced this new Syngenta Code of Conduct . . . ."

- "We provide innovative, reliable, high-quality products and have safeguards to protect stakeholders."

- "The creativity of our people provides products which help growers meet the global challenges to agriculture."

- "We will work closely with customers, contractors, users and all other stakeholders to ensure proper and responsible use of our products and understanding of the precautions that apply ...."

43. In November 2007, Syngenta adopted its own "Bio Product Launch Policy." The Syngenta Bio Product Launch Policy incorporates BIO's Product Launch Policy and requires Syngenta to perform a market and trade assessment to identify key importing nations and obtain those nations' approval before commercializing a new bio-engineered product. http://www.syngentabiotech.com/biopolicy.aspx.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

44. On its website, Syngenta also suggests that it complies with the stewardship standards adopted by CropLife International and Excellence Through Stewardship, advising farmers that they may learn more about "stewardship" by visiting the provided links. *See* http://www.syngentabiotech.com/BioStewardshipLinks.aspx.

45. It is clear that the importance of obtaining import approval from key markets was well known and recognized within the biotechnology industry and by Syngenta before Syngenta commercialized MIR162 under the Viptera brand name and trademark for the 2011 crop year.

46. Syngenta committed to not commercializing new genetically modified traits that had not been approved by key import markets. *See, e.g.*, BIO Product Launch Policy, Syngenta Implementation Principles (Nov. 2007). Syngenta clearly knew the risks of premature commercialization and knew that without stringent containment and channeling procedures, MIR162 would contaminate the U.S. corn supply and move to export markets, causing significant trade disruption, as set out below. Based on clear warnings and its own knowledge, Syngenta knew or plainly should have known that China was a key and growing market. Responsible practice dictated that Syngenta not commercialize Viptera, and certainly not do so without adequate containment and effective channeling measures in place, before obtaining import approval. Syngenta, however, did just the reverse.

3. *Regulation, Testing, and Deregulation of MIR162*

47. The process of commercialization begins with obtaining approvals from U.S. agencies, including but not limited to deregulation from the Animal, Plant, and Health Inspection Service ("APHIS") of the USDA.

48. The regulations in 7 C.F.R. part 340 (the "GMO Regulations") regulate, among other things, the introduction (importation, interstate movement, or release into the environment)

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe may be plant pests. Such genetically-engineered organisms and products are considered "regulated articles." The GMO Regulations were promulgated under the Plant Protection Act (the "PPA"), 7 U.S.C. § 7701, *et seq.*, or its predecessor statutes.

49. MIR162 is a genetically modified trait that before its deregulation, was regulated by the USDA under the PPA and GMO Regulations.

50. The GMO Regulations at 7 C.F.R. §§ 340.3 and 340.4 allow release into the environment of regulated, genetically modified traits, such as MIR162, before their deregulation, through field trials conducted under permits issued by, or notifications to, APHIS. Developers who field test genetically modified traits, such as Syngenta Biotech in its field testing of MIR162, are required to adhere to certain performance standards in the GMO Regulations to ensure the regulated genetically modified organism does not persist in the environment or enter the food or feed supply. Similarly, at the end of all field tests, developers must destroy or properly contain any viable plant material in the field and ensure no regulated material persists in the environment beyond the duration of the trial.

51. Syngenta is no stranger to releasing regulated GMO events. In 2005, Syngenta settled with the USDA ($375,000 fine plus a required training program) stemming from its release of still-regulated Bt10 corn, which Syngenta supplied as deregulated Bt11 corn between 2001 and 2004. About 14,000 bags of Bt10 seeds were sold from 2001 to 2004, mainly to U.S. farmers but also in Canada and Argentina. The Bt10 event was found in at least five Bt corn breeding lines in the U.S, and it was estimated that the seeds could have been planted on 37,000 acres in the U.S, producing "an estimated 150,000 tons of corn from this area" and accounting for approximately .01% of the total U.S. corn acreage. *See* New York Times, "U.S. Fines Swiss Company Over Sale

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of Altered Seed," (Apr. 9, 2005); PR Newswire, "Syngenta Agrees to Settlement With USDA on Unintended Bt10 Corn" (http://www.prnewswire.com/news-releases/syngenta-agrees-to-settlement-with-usda-on-unintended-bt10-corn-54220787.html). Syngenta later paid a $1.5 million fine to the EPA, which conducted an investigation confirming the distribution of unregistered Bt10 corn on "over 1000 occasions." EPA News Release "EPA Fines Syngenta $1.5 Million for Distributing Unregistered Genetically Engineered Pesticide." (Dec. 21, 2006).

52. Between 1999 and 2007, Syngenta Biotech conducted at least 119 field trials of MIR162 corn under at least 20 permits issued by, or notifications to, APHIS under the GMO Regulations at sites in 31 states, including multiple field tests in Minnesota.

53. The GMO Regulations in 7 C.F.R. § 340.6(a) provide that any person may petition APHIS for a determination that an article should not be regulated under 7 C.F.R. § 340.

54. On May 24, 2007, Syngenta filed a patent application for MIR162 to secure its exclusive right to market that corn trait, pending regulatory approval by the USDA.

55. On or about September 10, 2007, Syngenta Biotech submitted a petition (the "MIR162 Deregulation Petition") seeking a determination of nonregulated status (APHIS Petition Number 07-253-01p) for corn (Zea mays L.) designated as transformation event MIR162, which has been genetically engineered for insect resistance, stating that the corn line MIR162 is unlikely to pose a plant pest risk and, therefore, should not be a regulated article under the GMO Regulations.

56. On information and belief, Syngenta Biotech continued its field tests of MIR162 under the GMO Regulations during the approximately 31-month period after filing the MIR162 Deregulation Petition and the USDA decision deregulating MIR162 in April 2010.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

57. Syngenta Biotech stated in the MIR162 Deregulation Petition that it understood "that a copy of the MIR162 Deregulation Petition may be made available to the public as part of the public comment process." MIR162 Deregulation Petition at 3 of 268. APHIS's notice, published in the Federal Register on January 13, 2010 (75 Fed. Reg. 1749) (the "MIR162 Deregulation Notice"), expressly invited public comment regarding the MIR162 Deregulation Petition and further provided instructions as to how copies of the petition and accompanying draft environmental assessment and plant pest risk assessment could be obtained either by placing a phone call or accessing them on the internet.

58. In a preliminary observation to Section IX of the MIR162 Deregulation Petition, entitled "Adverse Consequences of Introduction" (the "Adverse Consequences Discussion"), Syngenta Biotech represented that it knew "of no data or observations that indicate [that] MIR162 would adversely impact the quality of the human environment, directly, indirectly, or cumulatively. This includes a lack of anticipated effects on ... the economy, either within or outside the U.S."

59. Specifically, among the matters addressed in the Adverse Consequences Discussion were "Economic Impacts" at Section IX.D. In the introduction to that section, at pages 108-09, Syngenta Biotech stated:

> Economic considerations are not explicitly described in the factors listed in 40 CFR § 1508.27. However, economic impacts do relate to the significance of the requested action and have been considered by some courts in reviewing NEPA [National Environmental Policy Act] compliance.

60. The economic impacts discussed included the "Effects on the Export Market," at Subsection IX.D.4, page 111, which included Syngenta Biotech's representation that "there should be no effects on the U.S. maize export markets" and advised that applications for approval

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of MIR162 maize were in process in a number of such export markets with "functioning regulatory systems," including China, stating:

> There should be no effects on the U.S. maize export market since **Syngenta is actively pursuing regulatory approvals** for MIR162 maize in countries with functioning regulatory systems for genetically modified organisms and that import maize from the U.S. or Canada. Regulatory filings for MIR162 maize are in process for Colombia, Japan, South Korea, Taiwan, China, the Philippines, Australia and New Zealand, South Africa, the European Union, Russia, and Switzerland. (Emphasis added).

61. Other portions of the MIR162 Deregulation Petition made similar representations regarding China.

62. Syngenta Biotech also stated in Subsection IX.D. of the MIR162 Deregulation Petition that stewardship agreements with growers would require channeling of MIR162 away from export markets that had not approved import of MIR162 maize, that Syngenta would undertake "a wide-ranging grower education campaign" respecting channeling, and that channeling would be effective based on prior experiences with the specialty maize market:

> Syngenta's stewardship agreements with growers will include a term requiring growers to divert this product away from export markets (i.e. channeling) where the grain has not yet received regulatory approval for import. Syngenta will communicate these requirements to growers using a wide-ranging grower education campaign (e.g., grower Stewardship Guide). As noted in the context of the IRM program, these procedures are not hypothetical.
>
> The ability to channel particular types of maize for particular uses, such as the export market, is demonstrated by the continuing success of the specialty maize market. Use of identity preservation measures has enabled growers to maintain a wide variety of specialized maize products, including white food maize, waxy maize, hard endosperm maize, high oil maize, nutritionally enhanced maize, high extractable starch maize, non GMO maize, and organic maize (U.S. Grains Council, 2006). Channeling programs are well established for separating each of these maize varieties. As set out above, these practices have continued successfully long after the introduction of numerous varieties of transgenic maize.

63. The stewardship agreements to which Syngenta Biotech referred were later used between growers and Syngenta Seeds.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

64. In December 2009, based on its review of the MIR162 Deregulation Petition, APHIS prepared a Draft Environmental Assessment that parroted what Syngenta Biotech had represented in the MIR162 Deregulation Petition:

> There should be no effects on the U.S. corn export market since Syngenta is actively pursuing regulatory approvals for the MIR162 corn in countries with functioning regulatory systems for genetically modified organisms and that import corn from the U.S. or Canada. Regulatory filings for the MIR162 corn are in process for ... China.

65. The Draft Environmental Assessment was among the documents publicly available under the MIR162 Deregulation Notice.

66. On April 12, 2010, APHIS concluded that MIR162 corn should be deregulated. *See* Determination of Nonregulated Status for MIR162 Corn (Apr. 12, 2010); *see also* Syngenta Biotechnology, Inc. Determination of Nonregulated Status for Corn Genetically Engineered for Insect Resistance, 75 Fed. Reg. 20560 (Apr. 20, 2010).

67. Before making that determination, APHIS, on April 9, 2010, issued its National Environmental Policy Act Decision and Finding of No Significant Impact and, in March 2010, issued its Final Environmental Assessment. APHIS compared the anticipated impact by taking no action (i.e., keeping MIR162 as a regulated article) with deregulating MIR162 and concluded in the Finding of No Significant Impact that in each instance the impact on the "Export Market" would remain "unchanged." Similarly, in the Final Environmental Assessment dated March 2010, APHIS adopted and repeated Syngenta's representations that it did not expect any effects on the U.S. corn export market "by the cultivation of the MIR162 corn cultivars" and that applications to countries with functioning regulatory systems, including China, were in process.

68. Thereafter, on April 21, 2010, Syngenta issued its press release, "Syngenta receives approval for breakthrough corn trait technology in the U.S." (Apr. 21, 2010). In making the

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

announcement that MIR162 had been deregulated, Syngenta noted the plans for its imminent commercialization, stating that "[t]he trait will be combined with the Agrisure 3000GT trait stack to provide corn growers with broad-spectrum, insect control and glyphosate tolerance for maximum convenience and productivity" and that "Syngenta plans to commercialize hybrids containing the Agrisure Viptera trait for the 2011 growing season."

69. The April 21, 2010 press release confirms that the MIR162 Deregulation Petition was a document prepared and published by Syngenta for the sole purpose of facilitating, promoting, and inducing the commercial sale of its products containing the MIR162 trait. The MIR162 Deregulation Petition contained statements and representations to induce APHIS to deregulate MIR162, thereby beginning the commercialization of the product. Further, the MIR162 Deregulation Petition was filed with full knowledge that the statements and representations therein would be published to stakeholders, including Producers and Non-Producers. The commercial nature of the statements in the MIR162 Deregulation Petition is clear: In explaining the rationale of the MIR162 Deregulation Petition, Syngenta stated that "[t]ransformation event MIR162 maize has been developed by Syngenta to provide growers with maize varieties that are resistant to feeding damage caused by a number of significant lepidopteran insect pests. This trait will be offered to growers in combination with other deregulated maize traits." MIR162 Deregulation Petition at 11. The MIR162 Deregulation Petition espoused the sale of the product to growers, and was rife with representations about the commercial benefits of Syngenta's product and expected market impact. The following further indicates that Syngenta made commercial representations in the MIR162 Deregulation Petition:

a. "Transformation event MIR162 has been developed by Syngenta to provide U.S. growers with maize hybrids that are resistant to feeding damage caused by a number of lepidopteran insect pests. … Commercialization of this new trait has the potential to reduce

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

conventional insecticide use in maize, increase grower profits, and improve grain quality." (p.13);

b. "[I]t [MIR162] will be commercialized as a combined-trait hybrid with Syngenta's Bt11 maize event." (p.96);

c. Syngenta's numerous references to and representations regarding the commercial benefits to farmers from introduction of MIR162. (*see, e.g.*, pp. 5, 97, 109 (enhanced productivity), p.110 (increased competition and farmer and consumer choice));

d. Syngenta's repeated observations that no adverse consequences should occur to the economy, either within or outside the United States (*see e.g.*, p.5) and the statements regarding the lack of impact on exports and intended channeling away from export markets that had yet to approve MIR162 as alleged above;

e. An appendix report regarding the economic implications of the introduction of MIR162; and

f. Syngenta's acknowledgement that the MIR162 Deregulation Petition would be made available to the public as previously alleged (p.3).

70. Contrary to Syngenta's representations that its regulatory filings were "in process" in China, Syngenta first sought regulatory approval for MIR162 from China's Ministry of Agriculture three years later, in or around March 2010. *See* http://www.syngenta-us.com/viptera_exports/images/MIR162-Regulatory-Timeline-9-2014.pdf.

71. Consistent with its statements to the USDA in the MIR162 Deregulation Petition, Syngenta considered China to have a functioning and predictable regulatory system.

4. *Syngenta's Initial Commercialization*

72. As Syngenta knows, nothing about USDA deregulation requires a developer such as Syngenta to commercialize.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

73. Responsible practice dictated Syngenta obtain import approval from key market countries before commercialization (or at minimum, before first planting). *See, e.g.*, BIO Product Launch Stewardship, December 10, 2009, at p.4.

74. As early as 2009, Syngenta acknowledged that China was a key export country.

75. In a presentation to the NGFA in 2010, Syngenta listed China as among "key import approvals" it was or would be seeking. *See* Powerpoint titled "2010 Syngenta Pipeline," Presentation to the National Grain and Feed Association.

76. Syngenta, however, knew well that it would not have import approval from China for the 2011 crop year.

77. The typical time period for import approval from China at that time was approximately 2-3 years.

78. Syngenta was not even projecting approval from China for the 2011 crop year but rather, was hoping for approval by the 2012 crop year.

79. Syngenta privately planned from the outset to commercialize Viptera with or without China's regulatory approval, notwithstanding the commitments it had made to stakeholders and industry participants not to commercialize genetically modified traits until after approval from key export markets.

80. Syngenta commercialized Viptera for the 2011 growing season despite the lack of regulatory approval from China, and despite Syngenta's knowledge that China was a key (and growing) export market for U.S. corn.

81. Syngenta did not disclose these facts to Producers or Non-Producers.

82. Syngenta was well aware in 2010 of the strong likelihood that China would be a significant import market by 2011.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

83. It was well known at least by August 2010 that China was an important and growing export market for US corn. As reflected in a trade publication at the time:

> China is entering a 'new era' of corn buying. The world's most populous country may import as much as 15 million tons of corn in 2015, according to the U.S. Grains Council. ... Chinese imports of corn will grow from 1.7 million tons in 2010 to 5.8 million tons in 2011, and to 15 million tons in 2014-15, according to Hanver Li, Chairman of Shanghai JC, speaking to the U.S. Grains Council.... Where will China import all this corn from? The first place they will turn is the U.S., which is the world's largest corn exporter, accounting for 60% of global corn exports in 2009.... If China imports an incremental 600 million bushels of corn in 2014 from the U.S., using the USDA's baseline projections, U.S. corn ending stocks would be 960 million bushels. This would put the Ending Stocks to Use Ratio at 6.3%, the lowest level since 1995. 2010 is a major turning point in the grain market. The Chinese transition to becoming a net importer of corn will have a substantial implication on the world's corn supply.

http://www.farmlandforecast.com/2010/08/chinese-imports-to-change-grain-markets/.

84. Syngenta was, and continues to be, a member of the U.S. Grains Council. Indeed, Syngenta's Rex Martin has, on information and belief, actively participated as a member of the Council's Biotechnology Advisory Team.

85. In addition, NAEGA warned Syngenta of the importance of obtaining Chinese regulatory approval before launch during a meeting in or around August 2010 with NGFA's Biotechnology Committee. *See* July 14, 2011 NGFA Newsletter. The same issue was discussed at the subsequent NGFA Biotechnology Committee meetings – during the March 2011 convention and another meeting on June 29, 2011 in Washington.

86. Syngenta knew of NAEGA's warning by the summer of 2010 and also knew of NAEGA's position that import approval should be obtained from China before marketing MIR162.

87. Nevertheless, Syngenta refused to stop its commercialization of Viptera in 2010 for planting and harvest in 2011.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

88. In the fall of 2010, NGFA, in a private meeting with David Morgan, Regional Director of North America and President of Syngenta Seeds, also urged Syngenta to delay commercialization of Viptera, emphasizing the risk of trade disruption with China.

89. On October 29, 2010, a Reuters article was circulated among Syngenta executives stating: "Chinese corn imports have rocketed this year and are expected to continue growing next year, after China's own harvest couldn't keep up with a boom in demand...."

90. Evidence of China's importance continued to mount before planting in 2011.

91. In January 2011, Syngenta knew that China had become the second most important market for U.S. corn.

92. The USDA's long-term projections, compiled in November 2010 and issued in February 2011, forecast dramatic increases in China's imports of corn from the USDA's prior year's projections. As stated by the USDA, the "increase in China's imports account for one-third of the growth in world corn trade."

93. Syngenta knew by 2011 that China's import requirements influenced global commodity prices and understood the risk of commercializing MIR162 without approval from China.

94. At the time it was marketing and selling Viptera – and before planting in 2011 – Syngenta clearly knew of China's importance.

95. In a June 2010 Risk Management Report," Syngenta recognized that MIR162 [would be] detected as unapproved trait" as a consequence of large scale production "before all import approvals are in place." The report recognized that increased production in 2010 of corn containing MIR162 increased the "likelihood of MIR162 being detected as [adventitious presence] in an export channel." Syngenta classified the impact of this risk as "high." Risk

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Management Report, dated June 2010; *see also* MIR162 & EU approvals Powerpoint attached to e-mail from David O'Reilly, dated Oct. 21 2009.

96. On February 25, 2011, Syngenta's Head of Industry Relations corresponded with the Head of Syngenta's Southeast Asian Territory as follows:

> I believe I have discussed with you several times about our risk with MIR162 and not having approval in EU and China. I have been getting more questions from traders … lately and [Charles Lee, Head of Corn for North America] wanted me to be sure you understood the potential risk for China.

97. Syngenta could, and should, have waited to market Viptera. It also could, and should, have withdrawn it from the market before planting. But it did not.

98. To the contrary, and despite the risks, Syngenta Seeds sold Viptera to approximately 12,000 Producers with a projected yield estimated in September 2011 of 250 million bushels. *See Syngenta v. Bunge*, 820 F. Supp. 2d 953, 958 (N.D. Iowa 2011). Viptera growers could be found in nearly every state such that the market for Viptera products was very broad across the U.S. *See id.* at 963. Syngenta projected that Viptera seed sales would exceed twenty percent (20%) of the U.S. corn seed market in future years. *See id.* at 958.

99. Other published estimates indicate that during the 2011 crop year, Viptera had been planted on 1.1% of the acres in the U.S. on which corn was grown.

5. *Syngenta's Continuing Irresponsibility After 2011 Planting*

100. After planting, but before harvest in 2011, the importance of China, and the risk of MIR162 contamination and market disruption, continued to grow.

101. A 2011 news article projected that China "will probably buy 5 million metric tons this year from 2 million tons in 2010."

102. On July 22, 2011, Syngenta's CEO Michael Mack stated: "The need to improve yield and quality is present across all emerging markets in the region, although it's China which

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

continues to have the greatest impact on world markets, with increasing imports not just of soybeans but also now of corn." July 22, 2011 Transcript of Remarks (http://www.syngenta.com/global/corporate/SiteCollectionDocuments/pdf/transcripts/H1-2011-results-transcript.pdf).

103. In fact, Syngenta had known for some time that China would be a significant importer of corn in 2011.

104. In August 2011, still before the first commercially-grown corn planted with the MIR162 trait had been harvested, NGFA and NAEGA issued a Joint Statement warning Syngenta about MIR162:

> U.S. farmers, as well as the commercial grain handling and export industry, depend heavily upon biotechnology providers voluntarily exercising corporate responsibility in the timing of product launch as part of their product stewardship obligation.... The negative consequences of overly aggressive commercialization of biotech-enhanced events by technology providers are numerous, and include exposing exporting companies to financial losses because of cargo rejection, reducing access to some export markets, and diminishing the United States' reputation as a reliable, often-preferred supplier of grains, oilseeds and grain products. Premature commercialization can reduce significantly U.S. agriculture's contribution to global food security and economic growth.
> Putting the Chinese and other markets at risk with such aggressive commercialization of biotech-enhanced events is not in the best interest of U.S. agriculture or the U.S. economy.

105. As stated by these associations: "The grain handling and export industry have communicated consistently, clearly and in good faith with biotechnology providers and seed companies about the importance of biotech-enhanced events in commodity crops receiving regulatory approvals or authorizations – prior to commercialization – in key export markets where foreign governments have functioning regulatory systems that approve biotech-enhanced traits. These communications regarding key export markets, identified through market and trade

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

assessments, have been conveyed through industry trade associations and in direct communications by individual companies." *Id.*

106. Not only did Syngenta commercialize Viptera prematurely, it did so without adequate systems in place to either isolate MIR162 or channel it away from markets, including China, from which approval was not obtained.

6. *Transgenic Contamination*

107. Corn, or maize, has staminate (male) and pistillate (female) flowers on the same plant and is wind pollinated. While there is some possibility of self-fertilization, corn generally is considered an outcrossing species. Under normal field conditions, some 95% of the ovules are fertilized by pollen from other plants. Pollen is released in large quantities. "Individual corn plants produce 4 to 5 million pollen grains. Therefore, even if only a small percentage of the total pollen shed by a field of corn drifts into a neighboring field, there is considerable potential for contamination through cross pollination." Thomison, "Managing 'Pollen Drift' to Minimize Contamination of Non-GMO Corn," Ohio State University Extension Fact Sheet.

108. "Once released from the tassels into the air, pollen grains can travel as far as 1/2 mile (800 m) in 2 minutes in a wind of 15 miles per hour (27 km/h) (Nielsen 2003b)." Kent Brittan, "Methods to Enable the Coexistence of Diverse Corn Production Systems," University of California. Studies indicate that "cross-pollination between cornfields could be limited to 1% or less by a separation distance of 660 feet (200 m), and to 0.5% or less by a separation distance of 984 feet (300 m). However, cross-pollination frequencies could not be reduced to 0.1% consistently, even with isolation distances of 1,640 feet (500 m)." *Id.*

109. The Association of Official Seed Certifying Agencies (AOSCA) recognizes that "[a]lthough most corn pollen is deposited near its origin, isolation by very long distance (several

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

miles) from any other corn is probably the only means of assuring complete confinement other than assuring complete asynchrony of flowering." However, "[t]he matter of whom or what entity controls the area constituting a proposed isolation zone and beyond could be crucial and/or problematic to successful confinement. AOSCA Report at 62. Assuring "complete asynchrony of flowering" also is fraught with shortcomings. For example, "[d]ifferences in maturity between the early and late hybrid may not be large enough to ensure that the flowering periods of each hybrid will not overlap, especially when certain climatic conditions may accelerate or delay flowering. Moreover this strategy will only work if [the farmer] control[s] the adjacent fields or can closely coordinate [his] corn planting operations with those of [his] neighbors." Thomison, "Managing 'Pollen Drift' to Minimize Contamination of Non-GMO Corn," Ohio State University Extension Fact Sheet.

110. In addition, "[p]lanting operations to control pollen drift are only part of the process of producing an IP corn grain crop." *Id.* Other major issues include harvesting, storage, and commingling within the production and supply chain.

111. "Different corn breeds within an individual farm are commingled at the harvesting stage. Corn from hundreds of thousands of farms is then further commingled as it is gathered, stored and shipped through a system of local, regional and terminal grain elevators. Elevators, storage and transportation facilities are generally not equipped to test and segregate corn varieties. The commingled corn is then marketed and traded as a fungible commodity." *In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828, 834 (N.D. Ill. 2002).

112. As a developer of genetic events, including genetically engineered corn, Syngenta knew or certainly should have known the very high likelihood that if commercialized, MIR162

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

would disseminate throughout the supply chain – in fields, storage and transportation – via the numerous routes that transgenic contamination occurs.

113. Syngenta knew that enough commingling of Viptera with non-Viptera corn would occur at harvest in the fall of 2011 to be detectable in export channels, and that as a result there was a risk that China would reject shipments of corn due to the presence of Viptera.

114. Before commercializing MIR162, Syngenta also knew the risk that MIR162 would move into export channels from planting and harvest of MIR162, knew that risk was significant, and knew that detection of MIR162 in markets lacking approval created significant risk of trade disruption.

115. Syngenta, however, took few to no steps to assure that MIR162 would not enter the U.S. corn supply through cross-pollination and/or commingling in fields, and took wholly inadequate steps to prevent commingling within grain elevators or otherwise within the supply chain as described below, virtually assuring that MIR162 would contaminate the U.S. corn supply in every way possible.

7. *Syngenta's Nonsensical and Ineffective "Stewardship" Program*

116. Syngenta's representation in its MIR162 Deregulation Petition that the "ability to channel particular types of maize for particular uses such as the export market" is demonstrated by success in the "specialty maize market" is grossly misleading. In specialty markets like organic farming, the grower receives a premium and, as such, takes the onus on himself to isolate his specialty corn crop from transgenic contamination from neighboring fields (such as spatial and temporal isolation and detasseling). *See* Thomison, "Managing Pollen Drift in Maize Seed Production," Department Horticulture and Crop Science, Ohio State University ("Growers of value added identity preserved (IP) grains need to control pollen contamination in order to

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

optimize expression of value added traits in specialty maize and thereby obtain premiums."). The specialty seller also markets to a specialty buyer to whom he channels. Both have incentive to take all measures necessary to avoid contamination by non-specialty corn. The growing, marketing, and distribution system of commodity corn is vastly different. A "Commodity Crop" is "a crop which in the ordinary course is grown using common agricultural practices and is commingled and not segregated for special handling or use when it enters the chain of commerce." Biotechnology Industry Organization, "Product Launch Stewardship: Food and Agriculture Section," November 27, 2012, at Annex 1 Introduction n.3.

117. Syngenta knew that the commodity market is different from the specialty market.

118. The difficulties with channeling are illustrated by the infamous "StarLink" contamination in 2000 that was the subject of significant litigation. *See In re StarLink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828 (N.D. Ill. 2002). That is particularly so where millions of acres of the commodity to be channeled – MIR162 corn – were planted all across the U.S. Syngenta did not make even minimally reasonable efforts to prevent transgenic contamination.

119. Syngenta's representations to the USDA illustrate Syngenta's awareness of the kind of system designed to avoid contamination. Well-known measures in specialty markets include specifying strict containment protocols by contract (e.g., cleaning combines and storage areas, isolation distances, dedicated facilities, and inspections) and tracing the product through the supply chain.

120. Syngenta, however, did not take meaningful steps to even minimize the risk of pollen-mediated gene flow and commingling of Viptera with non-Viptera corn.

121. Responsible stewardship procedures include, at minimum, "generally accepted best seed quality practices designed to prevent low level presence of unauthorized products and [to]

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

minimize unintended incidental presence of products authorized in the county of production" and "[m]ak[ing] available prior to commercialization a reliable detection method or test for use by growers, processors and buyers that enables crop identity verification for intended use." *See* BIO "Product Launch Stewardship," dated December 10, 2009 Annex 1, Policy Guidance; BIO "Stewardship Actions to be Taken Prior to Launching Special Traits," dated October 4, 2010, Annex 1, Policy Guidance; BIO "Product Launch Stewardship: Food and Agriculture Section," dated November 27, 2010, Annex 1 Policy Guidance.

122. Syngenta stated that it would make available a reliable detection method or test for MIR162 before commercializing Viptera.

123. In July 2010, Syngenta executives discussed methods for detecting genetically modified traits.

124. Syngenta did not provide a test method to farmers or grain handlers as part of a required stewardship program.

125. Syngenta also could have contractually required that Viptera growers adhere to stringent practices that would have decreased the likelihood of contamination. Syngenta did not do so, however, because to do so would have drastically reduced sales of that product.

126. Instead, and contrary to requiring isolation, Syngenta Seeds gave away free bags of Viptera to farmers as part of a campaign to encourage growers to grow Viptera side-by-side with other corn to compare performance. *See Syngenta*, 820 F. Supp. 2d at 958.

127. Syngenta expected Viptera corn to cross-pollinate with non-Viptera corn and told farmers to consider the adjacent corn Viptera corn. Yet, there was no contractual requirement for growers to take measures to prevent such cross-pollination in their own fields, to segregate Viptera from non-Viptera corn, or to prevent contamination of other farmers' fields.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

128. In fact, Syngenta advised at least one grower that he had no obligation to tell neighboring corn farmers or grain originators that he had planted Viptera. This advice was in response to the farmer's concern that he might be liable if his Viptera corn cross-pollinated with his neighbor's corn.

129. Moreover, on information and belief, in addition to the acreage on which Viptera (and later Duracade) have been grown from sales of those products, Syngenta has grown on land within the U.S. corn containing the MIR162 trait for purposes of seed increase and to develop inventories of product to sell to farmers. This additional growth further increased the presence of MIR162 within U.S. agriculture and the widespread, pervasive contamination that has caused disruption of trade in U.S. corn with China.

130. Syngenta's commercial sales of Viptera for planting, growing, and harvest in 2011 reached across the U.S., covering nine hundred nineteen (919) counties and thirty-eight (38) states. *See* "Unit Stats by State and County, Viptera Only" (Lee Bunge deposition exhibit); *see also Syngenta v. Bunge*, 820 F. Supp. 2d at 958, 963. Despite the pervasive presence of Viptera and Syngenta's knowledge of the risks, Syngenta did not require growers to comply with the kind of strict measures Syngenta knew were minimally necessary to even have a chance at containment.

131. Syngenta's professed "channeling" efforts, which could and should have been in place well before harvest to direct Viptera away from markets lacking import approval, also were wholly—and purposefully—inadequate.

132. In its 2007 MIR162 Deregulation Petition, Syngenta represented that a lack of Chinese approval would not pose a problem for Producers and Non-Producers because:

> Syngenta's stewardship agreements with growers will include a term requiring growers to divert this product away from export markets (i.e. channeling) where

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

> the grain has not yet received regulatory approval for import. Syngenta will communicate these requirements to growers using a wide-ranging grower education campaign (e.g., grower Stewardship Guide) ... [T]hese procedures are not hypothetical.

133. Syngenta's "stewardship" program, however, presented "hypothetical" and ineffective procedures, which made contamination of the U.S. corn supply virtually certain.

134. Contrary to representations in its MIR162 Deregulation Petition, Syngenta did not, on information and belief, institute a "wide ranging grower education campaign" through its Stewardship Agreements, Stewardship Guides or otherwise. Syngenta certainly did not do so in a manner that would be meaningful and effective.

135. On information and belief, none of Syngenta Seeds' Stewardship Agreements with growers contained any details on Syngenta's stewardship program. Instead, the agreement provided that growers should comply with the "most current" version of a "Stewardship Guide," which might or might not be given to them when they received the product, and was subject to unilateral change at any time via modification to a website. *See* Syngenta Seeds, Inc. Stewardship Agreement (Revised 08/2009) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 03/14/2011) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 05/11/2011) at 1; Syngenta Seeds, Inc. Stewardship Agreement (Revised 06/05/2013) at 1.

136. In other words, Syngenta's "stewardship" program for Viptera depended, at the outset, on thousands of individual farmers across the country locating and understanding a Stewardship Guide that they may not have been provided at the time of signing the Stewardship Agreement or receiving the product.

137. Moreover, while the Stewardship Agreements contained a provision for "channeling," they made no mention of China.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

138. The 2009 version of the Stewardship Agreement provided that the grower "agrees to: Channel grain produced from seed to appropriate markets to prevent movement to markets where the grain has not received regulatory approval for import." It does not, however, identify China as one of those markets. Rather, the agreement states that: "Grain harvested from corn hybrids containing Agrisure Technologies ... may not be fully approved for grain export to **Japan or the European Union**" and that "grain from hybrids that do not have the appropriate import approvals from **Japan and the European Union** must be directed to domestic uses and away from export channels." Syngenta Seeds, Inc. Stewardship Agreement (Revised 08/2009) at 2 (emphasis added). There is no reference to any other unapproved markets, including China.

139. The March and May 2011 versions of Syngenta Seeds' Stewardship Agreement said—and did not say—the same thing. *See* Syngenta Seeds, Inc. Stewardship Agreement (Revised 03/14.2011) at 1, 2; Syngenta Seeds, Inc. Stewardship Agreement (Revised 05/11/2011) at 1, 2.

140. Syngenta Seeds' 2013 version of the Stewardship Agreement removed the reference to Japan and the European Union but even then did not mention China.

141. None of the agreements contain any instruction on how the grower was supposed to "channel."

142. Syngenta knew or should have known that bare reference to channeling (and at that, without reference to China) would be ineffective.

143. To the extent that other versions of the Stewardship Agreement (or Stewardship Guide) reference China, the concept of "channeling" by thousands of individual corn farmers under Syngenta's non-existent— or, at minimum, inadequate— "stewardship" program, was certain to fail.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

144. "Channeling" can only work if all grain handlers and others in the supply chain are engaged in that endeavor. For example, BIO recognizes that a realistic assessment of conditions related to handling, distributing, processing, and testing products must engage the various stakeholders. *See* BIO Product Launch Stewardship, December 10, 2009 at Introduction.

145. On information and belief, Syngenta did not obtain channeling commitments from supply chain participants, and took no further action to create a marketing plan or channeling mechanism. Syngenta also failed to coordinate with grain handling, export, and other post-harvest firms, to ensure that Viptera corn was not directed to markets for which regulatory approval had not been received, including China.

146. This failure was purposeful. Syngenta made a decision that no special provisions would be made for grain redirection.

147. Not only did Syngenta decide it would take no measures for channeling Viptera, Syngenta sought to stop exporters and grain elevator operators from attempting to channel Viptera away from China. Specifically, Syngenta brought a lawsuit against Bunge, a grain elevator operator, who refused to accept Viptera corn because that operator exported corn to China.

148. On August 17, 2011, Syngenta issued a letter to Viptera growers expressing disappointment that Bunge and Consolidated Grain & Barge would "not be accepting grain with the Agrisure Viptera trait." Syngenta recommended to growers that they simply "[d]eliver[] to elevators accepting grain with the Agrisure Viptera trait." Syngenta made no mention that these elevators should channel the grain to markets in which that trait had been approved.

149. Syngenta Seeds sued Bunge, complaining that Bunge could not refuse to accept Viptera corn at its grain elevators. Bunge had posted notices at its grain elevators that it would not accept Viptera corn because the MIR162 trait was not then approved in China, China had a zero

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

tolerance policy regarding non-approved GMO events such as MIR162, and Bunge has significant contracts with Chinese markets that it wanted to fulfill.

150. Syngenta Seeds sought an injunction requiring Bunge to accept the Viptera corn despite: (i) its earlier representations in the MIR162 Deregulation Petition that corn grown with its MIR162 trait would be channeled away from export markets that had not yet approved of its importation; (ii) the requirement in its Stewardship Agreement with growers who had purchased Viptera seed requiring them to channel their harvested grain away from export markets that had not yet approved the importation of MIR162 corn; and (iii) the protocols referenced above approved by BIO and other organizations, of which Syngenta was/is a member, requiring consultation with industry stakeholders and not commercializing approved traits without major market approval.

151. At the end of the 2010 crop year in August 2010, China had already become the seventh-largest importer of U.S. corn. *See Syngenta*, 820 F. Supp. 2d at 860-61. Thereafter, in the spring of 2011, Bunge had sold millions of dollars of U.S. corn for delivery to China between September 2011 and January 2012. *Id.*

152. The Court in *Syngenta v. Bunge* denied Syngenta Seeds' requested injunction on September 26, 2011. In doing so, the Court found that it was foreseeable that China would not approve importation of MIR162 during the 2010-2011 crop year, that during that year U.S. exports to China might be significant, and that Syngenta Seeds had caused the very harm of which it complained. The Court refused to shift the risk to Bunge for Syngenta's commercializing of Viptera before receipt of approval from China. Specifically, the Court in that case concluded that:

> [a]t least to some extent, Syngenta's reputational injuries [allegedly caused by Bunge's refusal to accept Agrisure Viptera], though significant, are the result of Syngenta's decision to commercialize Viptera corn before obtaining import

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

> approval from significant import markets, including China, where Bunge's rejection of unapproved traits was not wholly unforeseen or unforeseeable.

Syngenta, 820 F. Supp. 2d at 988.

153. The Court also concluded that:

> no reasonable balance of equities would impose upon Bunge the prodigious additional expense of segregating Viptera corn (or segregating non-Viptera corn earmarked for Chinese export), where Bunge did not create the situation in Viptera corn has not been yet approved for import to China. That situation arises entirely because Syngenta decided to commercialize Viptera corn knowing that it did not yet have Chinese and some other import approvals and would not have them for the 2011 crop year, and under circumstances in which Syngenta should have reasonably recognized that Chinese imports of United States corn for the 2011 crop year might well be very significant. Syngenta accepted the risk of commercializing Viptera corn, albeit with more than the required or recommended import approvals, but without import approval from all of the reasonably likely foreign markets. I reject Syngenta's request that I shift that risk, instead, to Bunge....

Id. at 990.

154. In addressing the public interest element for injunctive relief, the Court declined to shift the risk of the decision to commercialize MIR162 away from Syngenta: "I find that the public interest strongly favors allocating the risks of a decision to introduce a new transgenic grain into the commercial market on the company that decided to commercialize that grain before obtaining all import approvals." *Id.* at 992.

155. The Court also found that in the late summer and fall of 2011, exporters other than Bunge, including Cargill and Archer Daniels Midland ("ADM"), had also refused to accept Viptera at some of their facilities due to export market issues such as the failure of Syngenta to receive approval from the European Union. *Id.* at 962.

8. *Syngenta's Irresponsibility and Misrepresentations Moving into the 2012 Crop Year*

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

156. Despite the risk of contamination and movement of Viptera into export markets, Syngenta continued its course and sold even more Viptera for planting in 2012, further increasing those risks.

157. Syngenta expanded sales of Viptera even as China was dramatically increasing imports of U.S. corn and was projected to be the largest importer of U.S. corn by the year 2020.

158. In 2011, Syngenta was selling Viptera for the 2012 growing season.

159. Syngenta was concerned. If grain handlers like Bunge refused to take Viptera, the lack of approval from China might reduce its sales.

160. As reflected in internal correspondence, Syngenta also knew by July 2011 that China would not change its zero-tolerance policy.

161. Syngenta, however, chose not to inform Producers and Non-Producers of the growing danger. Instead, it crafted a plan to mislead Producers and Non-Producers to believe that Syngenta would have import approval from China by the time Viptera was harvested, despite all indications to the contrary. For instance, one e-mail from Sarah Hull, Head of Global External Affairs, stated that it was "most important" to get grain traders "comfortable that the approval is close," so that they did not tell farmers to avoid MIR162 corn.

162. The purpose of this plan was to sell more Viptera.

163. United States Grains Council President, Tom Dorr, in a memorandum dated August 2, 2011 to "Seed Technology Members" and e-mailed to Syngenta, stated that "the current situation regarding the commercialization of unapproved events in China has raised industry-wide concern about potential near and longer-term disruption to US corn exports in China." In the same memorandum, he referred to China as a "major corn importer."

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

164. By at least early July 2011, Syngenta was already managing its message and had scripted its responses.

165. Among other things, Syngenta launched a "blame the grain trade" campaign. Another e-mail from Sarah Hull stated, in pertinent part: "I think we have to find the right balance of making this a 162 problem versus an evolutionary challenge of global grain trade and adjust our actions to reflect the latter."

166. Syngenta remained focused on its bottom line in commercializing MIR162. For instance, Syngenta internally communicated its "Yields Without Borders Program" and its "Top 10 Tactics to Energize Sales Force and Leverage Grain Marketing Channel to Secure Sales." *See* Syngenta document entitled: "The Role of Grain Marketing for Future Trait Technologies." Part of this program was to provide regular (and misleading) updates "on progress and plans for China trait approval and to drive trait acceptance."

167. To encourage further sales and planting of Viptera, Syngenta, by at least August 2011, was representing to stakeholders, including corn Producers and Non-Producers, that Syngenta would obtain China's approval by March 2012.

168. As one of Syngenta's business partners wrote, "[i]f we say March enough, there should be no issue in ordering seed stock and seed companies will have confidence in the March date."

169. Syngenta, however, did not have a reasonable basis to believe that approval from China would be received in March 2012 and did not itself expect approval by that time.

170. Indeed, Syngenta's approval submissions to China included insufficient, incorrect, and/or incomplete information, resulting in multiple additional submissions, and also included significant delays by Syngenta in providing standard information. For example, Syngenta did not

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

submit PCR detection methods until January 10, 2011, and had to redeliver the PCR detection method on May 16, 2011, because the first submission was unclear. This information was a required precursor to testing in China, which may take—and is expected to take—months. On June 22, 2011, Syngenta sent a letter of correction regarding mislabeling of samples. Testing did not begin in China until June 24, 2011. Testing results are known requirements of completed applications. Even after an application is complete, review and deficiency notices requiring correction are not atypical but expected.

171. No later than July 2011, and likely before that time, Syngenta knew it could not expect approval by March 2012.

172. Syngenta's own employees recognized that approval would take significantly longer. For instance, a July 1, 2011 e-mail from Syngenta's Brian Walsh indicated that Viptera would not receive approval in China "for a few years yet."

173. Syngenta received field trial and safety test results in October and November 2011. Syngenta submitted these results in an application on November 9, 2011. At that point, Syngenta knew or clearly should have known that it would not have approval by March 2012.

174. As of May 2012, China's Ministry of Agriculture had reviewed Syngenta's application and had rejected it for deficiencies including all applicable safety analyses. Syngenta submitted another application in June 2012.

175. In addition, on information and belief, Syngenta sought approval to cultivate MIR162 in, as well as import MIR162 to, China. *See* Reuters "Update 1 – Syngenta confirms it applied to cultivate GMO corn in China" (Oct. 8, 2014). (http://www.reuters.com/article/2014/10/08/china-gmo-syngenta-idUSL3N0S317520141008).

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

176. China has more severely restricted the right to cultivate bio-engineered crops than to import them, has not previously allowed any such cultivation by a foreign firm without Chinese participation, and has taken significantly longer to approve cultivation applications than importation applications, all of which may have materially delayed import approval.

177. Syngenta was projecting that cultivation approval would not be obtained until 2016.

178. Syngenta continued to downplay the importance of China and misrepresent the status of China's approval for the purpose of increasing sales of Viptera.

179. Syngenta was far more focused on a potential loss of profits than it was on the risk of trade disruption caused by Viptera. For instance, Syngenta's project lead for Commercial Traits noted a seed shortage, saying it "will work in our favor. … Hence key business is more the black-eye we now have, vs. actual impact on sales."

180. Syngenta e-mails reveal that executives were plotting strategies to try to get China to expedite its review, including strategies to try to convince U.S. government officials to tell China that failing to approve MIR162 would "put US corn trade at serious risk."

9. *Syngenta's Continued Deception Regarding China's Approval of MIR162*

181. Syngenta continued its deception regarding the status of approval from China throughout 2012.

182. Despite knowing that its incomplete and delayed regulatory filings with China assured that Syngenta would not obtain import approval for Viptera by March 2012, Syngenta nevertheless instructed employees in January 2012 to tell grain handlers that Syngenta would obtain approval from China by March of 2012.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

183. After the first quarter passed without approval from China, Syngenta told employees to "**verbally**" communicate that Syngenta "continue[s] to anticipate that this approval will be received shortly." (Emphasis in original).

184. During Syngenta's first quarter 2012 earnings conference call on April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, publicly stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." http://www.morningstar.com/earnings/37715637-syngenta-ag-adrsyt-q1-2012-earnings-call-transcript.aspx. This, of course, was a year after Syngenta had already sold large quantities of Viptera to farmers across the country.

185. On information and belief, however, Syngenta did not as of April 2012 have a reasonable basis to believe China's approval was "done," or for its representation that approval was imminent. Syngenta certainly did not have any sort of official approval.

186. Indeed, Syngenta received a rejection and deficiency letter from China's Ministry of Agriculture on May 15, 2012.

187. Syngenta also distributed misleading written materials indicating that Viptera **could** be exported to China.

188. For example, Syngenta distributed a "Request Form for Bio-Safety Certificates Issued by the Chinese Ministry of Agriculture" for Viptera. In China, "Bio-Safety Authorizations" are required for the issuance of shipment-specific "Bio-Safety Certificates." However, applying for shipment-specific Bio-Safety Certificates was, and is, pointless because MIR162 had not been approved for importation in China.

189. Syngenta knew that its Request for Bio-Safety Certificates Forms was pointless but distributed it in an effort to mislead U.S. corn Producers and Non-Producers.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

190. Syngenta also distributed a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf.

191. For example, the "Plant with Confidence Fact Sheet" states:

> The vast majority of corn produced in the U.S. is used domestically. There is a misconception that China imports more grain than it actually does from the U.S. China has imported, on average, a little more than half of one percent – 0.5% – of all U.S. corn produced in the past five years....
>
> Since very few U.S. grain outlets actually export to China, most have no reason to restrict your right to plant the latest technologies.

http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf.

192. Contrary to the Plant with Confidence Fact Sheet, the NGFA reported:

> The U.S. Department of Agriculture (USDA) forecasts that China will become the world's largest corn importer by 2020. China is projected to increase its corn imports to 22 million metric tons (866 million bushels) by 2023, up from 2.7 million metric tons (106 million bushels) in 2012. For 2013, USDA had projected that the United States would export 37 million metric tons (1.457 million bushels) of corn, and that China would import an estimated 7 million metric tons (276 million bushels) – virtually all of it from the United States.

http://www.ngfa.org/wp-content/uploads/NGFA-Flyer-for-Farmer-Customers-on-Potential-Market-Impacts-of-Commercializing-Biotech-Enhanced-Seeds-Not-Approved-for-Import-into-U.S.-Export-Markets.pdf.

193. In other words, for 2013, the USDA estimated that China represented nearly 20% of the U.S. export market.

194. Before China's discovery in November 2013 of MIR162 in U.S. corn shipments, China was the third-largest market for U.S. corn, and its share of our market was projected to grow substantially. China is by far the largest potential growth market for U.S. corn.

10. *Syngenta Expanded Sales of Viptera Acreage Despite Having No Approval from China, Even While the Importance of the Chinese Market Continued to Increase.*

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

195. China continued to be a major and growing market for U.S. corn and corn products during the 2012 and 2013 crop years.

196. However, during that period, China still had not yet approved the import of MIR162. Syngenta was still in the approval process and was correcting deficiencies identified by the Chinese Ministry of Agriculture. It had no assurance that approval would be conferred by the 2013 crop year. In fact, as of October 2013, Syngenta was still completing required research for its application.

197. Corn industry groups continued to object to Syngenta's commercialization of Viptera.

198. In fact, during 2012-2013, China had become the third largest export market for U.S. corn. As reported by Iowa Corn Growers Association, "[i]n 2012/13, China was the third largest export market for U.S. corn and up until the recent issue [the rejections beginning in November 2013] [China] was on track to meet or exceed that position." China and MIR162, 2-2014, Iowa Corn Growers Association (Feb. 6, 2014).

199. Nevertheless, Syngenta continued to market Viptera during the 2012 and 2013 crop years. Estimates were that during this period Syngenta had increased the market share of Viptera to well more than 2%, and, by some estimates as high as 3.5%, of the corn area grown in the U.S.

200. This increase further ensured that Viptera would disseminate throughout the U.S. corn supply and that it could not— and would not—be channeled away from export markets, such as China, which had not approved MIR162.

11. *China's Rejection of U.S. Corn*

201. In November 2013, China began rejecting shipments of U.S. corn that tested positive for the presence of MIR162.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

202. On December 24, 2013, the General Administration of Quality Supervision, Inspection, and Quarantine of China issued a warning notification strengthening the inspection and supervision for the import of GMO feed materials. The December 24 notification indicated that all batches of corn would now be tested at the Chinese ports for MIR162, and that any cargo that tested positive for MIR162 would be returned or destroyed.

203. Before this notification, statements from the seller/exporter that the products were tested and negative for MIR162 were sufficient. The December 24 notification thus substantially altered the conditions for export of U.S. corn into China.

204. It was not possible to ensure a "zero" level of MIR162 in the Chinese testing (i.e., a negative test of a container in the U.S. could still result in a positive test in China).

205. The uncertainty associated with the possibility that a shipment might test positive for MIR162 when tested in China caused Chinese customers to walk away from their contracts for U.S. corn and added a great deal of uncertainty to the market. The market had foreseen these events and not surprisingly, prices for corn and distillers dried grains with solubles ("DDGS") fell.

206. In December 2014, China finally approved MIR162 for importation into China. By then, however, Syngenta had already begun commercializing another unapproved bio-engineered corn trait. U.S. corn exports to China have not yet begun to recover, and this approval is not likely to lessen the impact of Syngenta's conduct and the resulting embargo in the near future, if ever.

12. *Regulation, Testing, and Deregulation of Event 5307*

207. Despite China's rejection of U.S. corn because of the presence of MIR162, Syngenta nonetheless pressed on with commercialization of yet another GMO corn seed product.

208. On April 22, 2011, just months after Syngenta Seeds released Viptera for the 2011 crop year, Syngenta Biotech filed with APHIS a petition seeking the deregulation of another

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

insect resistant, genetically-modified trait known as Event 5307. Event 5307 was ultimately deregulated by APHIS on January 29, 2013.

209. Between 2005 and 2011, Syngenta Biotech conducted at least 101 field trials of Event 5307 corn under at least 22 notifications made to APHIS under the GMO Regulations at sites in 23 states.

210. At least some of the field trials of Event 5307 included tests of corn stacked with multiple traits, including both Event 5307 and MIR162. Further, on information and belief, field tests conducted under the GMO Regulations of Event 5307, either singly or together with other traits (including MIR162), continued during the period after the filing of the Event 5307 Deregulation Petition and the January 29, 2013 decision to deregulate Event 5307.

211. In its deregulation petition for Event 5307, Syngenta Biotech disclosed that upon deregulation of Event 5307, Syngenta Seeds did not intend to market Event 5307 as a stand-alone product, but intended to combine it with other traits, including MIR162. It also stated that it intended to seek approval of products containing Event 5307 in countries that had functioning regulatory systems and that "Syngenta is also pursuing regulatory approvals for importation of corn commodities and processed goods containing 5307 corn in key export markets for U.S. and Canadian corn" and that applications were currently planned for a number of additional countries, including China. In the discussion of "Adverse Consequences of Introduction," Syngenta Biotech stated that an upcoming Environmental Report would discuss a range of issues related to the deregulation of Event 5307 corn, "including any potential direct, indirect or cumulative impacts on ... the economy, either within or outside the U.S." Petition for Determination of Nonregulated Status for Rootworm-Resistant Event 5307 Corn, at 156 (Apr. 22, 2011).

(http://www.aphis.usda.gov/biotechnology/petitions_table_pending.shtml).

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

212. Following approval of Event 5307, Syngenta Seeds announced it would commercialize Duracade for the 2014 crop year, containing both Event 5307 and MIR162, despite the continued lack of approval from China for MIR162 and the fact that Event 5307 also had not been approved.

13. *Commercialization of Duracade Despite MIR162's Continued Disruption of the U.S. Corn Trade*

213. In November 2013, China began rejecting shipments of U.S. corn that tested positive for MIR162. Syngenta has, nevertheless, continued its false statements and misrepresentations, as alleged herein, including through its decision to market Duracade in the 2014 crop year.

214. The NGFA has detailed the disastrous results of China's rejection of U.S. corn based on the presence of MIR162:

> This development resulted in a series of trade disruptions – including testing; delays in vessel discharge; and deferrals, diversion and rejections of cargoes – when MIR162 subsequently was detected in U.S. shipments of corn and distillers dried grains with solubles (DDGS). These disruptions effectively shut U.S. corn farmers out of China's feed grain import market, which previously almost exclusively had been supplied by the United States. China subsequently has taken actions to utilize domestic, as well as international alternatives to U.S. corn. For instance, China's imports of U.S. grain sorghum have increased significantly. China also has sourced corn from Ukraine. And most recently, Brazil and Argentina each were granted approval to begin exporting corn to China....
>
> This disruption, tied to positive detections of MIR162 that began in November 2013, has virtually halted U.S. corn trade with China.
>
> . . .
>
> USDA currently is projecting Chinese corn imports will reach 22 mmt [million metric tons] by 2023, which if realized would account for nearly half of the projected growth in total world corn trade. However, if the MIR162-related trade disruption continues, other corn exporting nations, such as Ukraine, are capable of replacing the United States as the principal corn exporter to China....

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

> [T]he MIR162-induced trade disruption has resulted in market price loss on unfulfilled export sales, price loss on diverted sales because of the compromised economic negotiating position of U.S. exporters, demurrage costs, and lower market prices for U.S. commodities and products. The total loss for these sectors of the U.S. grain industry is estimated to range from $1 billion to $2.9 billion.

http://ngfa.org/wp-content/uploads/Agrisure-Viptera-MIR-162-Case-Study-An-Economic-Impact-Analysis.pdf.

215. Syngenta nevertheless moved forward with commercialization of Duracade for the 2014 planting season.

216. On January 23, 2014, the NGFA and the NAEGA issued another Joint Statement imploring Syngenta to stop its heedless and irresponsible commercialization:

> On Jan. 22, 2014, the National Grain and Feed Association (NGFA) and North American Export Grain Association (NAEGA) sent a letter to Syngenta asking the company to immediately halt commercialization in the United States of its Agrisure Viptera corn and Agrisure Duracade corn until such time as China and certain other U.S. export markets have granted required regulatory approvals/authorizations.
>
> The NGFA and NAEGA ... are gravely concerned about the serious economic harm to exporters, grain handlers and, ultimately, agricultural producers – as well as the United States' reputation to meet its customers' needs – that has resulted from Syngenta's current approach to stewardship of Viptera. Further, the same concerns now transcend to Syngenta's intended product launch plans for Duracade, which risk repeating and extending the damage. Immediate action is required by Syngenta to halt such damage.
>
> There are numerous negative consequences incurred when the Chinese and other U.S. export markets are put at risk through commercialization of biotechnology-enhanced seeds before approvals for import into foreign markets are obtained. Such consequences may include reducing the value and demand for the U.S. farmers' products, preventing foreign consumer access to much-needed supplies, shutting off or increasing the cost of U.S. producers' access to some export markets for their crops, exposing exporting companies to financial losses because of cargo rejections and contract cancellations, and ultimately diminishing the United States' reputation as a reliable, often-preferred supplier of grains, oilseeds and grain products in world markets. Commercialization prior to foreign regulatory approvals also has a negative impact on the overall U.S. corn and other grain value chains, and reduces significantly U.S. agriculture's contribution to global food security and economic growth.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

> Within the U.S. grain and oilseed handling and marketing system, each purchaser or handler makes its own determination as to whether to accept various commodity crops – including those produced from biotechnology-enhanced seeds. Such a decision likely is driven by customer preferences, infrastructure and operational limitations, regulatory regimes and contractual commitments, as well as meeting regulatory requirements in the respective markets they serve. Given the nature of the U.S. grain marketing system, these business decisions extend to the first point of sale or transfer from the producer.
>
> As a matter of policy, NGFA and NAEGA have communicated consistently, clearly and in good faith with biotechnology providers and seed companies about the importance of biotechnology providers actually obtaining regulatory approvals/authorizations for import in foreign markets before such traits are commercialized in the United States. Individual grain handler, processor, service provider and exporter member companies of our Associations represent further system-wide support and advocacy for this policy.
>
> U.S. farmers, as well as the commercial grain handling and export industry, depend heavily upon the exercise of due corporate responsibility by biotechnology providers with respect to the timing of product launch and commercialization. We therefore seek assurances from Syngenta that it will follow suit by publicly announcing that it will suspend immediately its commercialization of Viptera and Duracade products in the United States until such time as China and other U.S. export markets have granted required regulatory approvals and authorizations.

http://www.ngfa.org/wp-content/uploads/NAEGA-NGFA-Joint-Public-Statement-on-Syngenta-Agrisure-Viptera-and-Duracade-Biotech-Traits-Jan-23-2014.pdf.

217. Syngenta spokesman, Paul Minehart, responded by stating: "Changing our marketing plan in the U.S. now **would have no effect on grain in the system** or Chinese acceptance of corn imports." Reuters, "U.S. Groups urge Syngenta to hold back on GM corn barred by China" (Jan. 23, 2014) (emphasis added).

218. This pronouncement recognizes that MIR162 has indeed contaminated the U.S. corn supply to an extent that it cannot be undone. This is particularly true given that Syngenta continues to market and sell Duracade in addition to Viptera.

219. In March 2014, in meetings with the NGFA, Syngenta advised that its introductory launch of Duracade would likely extend to 250,000 to 300,000 acres in a launch zone that

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

included portions of each of the ten states that grow the largest amounts of corn. In the same meetings, Syngenta refused to accept responsibility or liability if and when Duracade becomes present in countries that had not approved it. NGFA, Latest News, "Syngenta Provides Additional Details on Plans for 'Introductory launch' of Duracade, Biotech Corn in 2014" (March 7, 2014).

(http://www.ngfa.org/2014/2014/03/07/Syngenta-provides-additional-details-on-plans-for-introductory-launch-of-duracade-biotech-corn-in-2014/).

220. In launching Duracade, Syngenta stated that growers would be required to sign a stewardship agreement requiring the grower to either feed the corn to livestock or poultry on the farm, or deliver it to a grain handling facility, feed mill, feed lot, or ethanol plant not exporting corn or corn co-products to China or the European Union. *See* National Grain and Feed Association Newsletter Vol. 66, No. 5 at 2 (dated March 7, 2014).

221. The version of the stewardship agreement at launch, and referencing Duracade, did not do so. *See* Syngenta Seeds Inc. Stewardship Agreement (Rev. 6/05/2013). This version is, even now, the agreement Syngenta posts on its website. *See*

http://www3.syngenta.com/country/us/en/agriculture/Stewardship/Documents/SyngentaStewardshipAgreement.pdf.

222. Syngenta also did not require planting or harvesting protocols, but only made "recommendations" that the grower: (1) select fields for planting Duracade surrounded by the grower's own corn fields or planted next to a non-corn field; (2) place signs to notify others that Duracade was planted in the field; (3) plant buffer rows; (4) clean planters; (5) properly dispose of unused seed and return unopened seed units to the seed provider; (6) separately harvest Duracade; (7) flush the combine; (8) deliver corn containing Duracade to a previously arranged delivery point; (9) store Duracade in a separate bin on the grower's farm; and (10) clean the bin floor.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

223. Syngenta officials stated that while Syngenta would apprise growers of such "recommendations," it "declined to incorporate the recommendations into the stewardship agreement because they did not want to dictate such practices to producers." National Grain and Feed Association Newsletter Vol. 66, No. 5 at 2 (March 7, 2014).

224. Syngenta was and is well aware that such measures are minimally necessary to an adequate stewardship program. Yet, Syngenta did not require such measures in connection with either Viptera or Duracade.

225. The NGFA issued a dire forecast of the damage Duracade's premature commercialization would cause:

> For the 2014 planting season, Syngenta has introduced another trait called Agrisure Duracade 5307 (hereafter referred to as 5307) that currently lacks Chinese import approval, potentially prolonging the U.S. loss of the large, growing Chinese feed grain import market....
>
> China is roughly one year into its semi-regular, two-year process of evaluating the authorization of 5307 for import in food, feed and for further processing. Since Chinese authorization of 5307 is not expected for at least another year, China is expected to continue enforcing a zero-tolerance policy for unapproved biotech-enhanced traits in 2014/15, as occurred in marketing year 2013/14 for MIR162. Thus, the commercialization in the United States of 5307 is expected to prolong the economic impact on U.S. corn and other commodities that began in mid-November 2013.
>
> Similarly to 2013/14, when the United States lost access to the Chinese corn import market, the 2014/15 market price impact caused by the presence of 5307 in U.S. commodity exports is expected to extend beyond the corn market and potentially affect other commodities, such as DDGS, soybean meal and soybeans, because of the substitutability of corn for these commodities in domestic feed rations....
>
> [A]fter accounting for projected benefits and costs, the net economic impact of the 5307 commercial launch is estimated to result in a loss to the U.S. grain value chain ranging from $1.2 billion to $3.4 billion, with a mid-point estimated net economic loss of $2.3 billion.

http://www.ngfa.org/wp-content/uploads/Agrisure-Duracade-5307-Economic-Impact-Analysis.pdf.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

226. In March 2014, Syngenta pulled Duracade from the Canadian market for the 2014 growing season because China and the European Union had not yet approved MIR162.

227. Syngenta said in a notice to Canadian growers: "While the vast majority of the Canadian corn crop is typically directed to domestic markets in North America, some corn may be destined for these markets." Reuters, "Syngenta halts sales of new GMO corn seed in Canada" (Mar. 10, 2014). "Accordingly, we want to ensure the acceptance of any trait technology grown in Canada meets end-market destination requirements." *Id.*

228. As illustrated by the statements of its own representatives and this action, Syngenta knew that China was and is a key corn importer and that responsible management requires that its approval be obtained before commercialization of a bio-engineered corn trait.

229. As further illustrated, Syngenta knows how to withdraw an unapproved GMO trait from the market when it wants to do so.

230. Nevertheless, Syngenta continued to market and sell MIR162 corn in the U.S.

231. Compounding its irresponsibility, Syngenta then decided to commercialize Duracade in 2014, even though it contains MIR162 Event 5307.

232. In September 2014, Syngenta announced 52 new corn hybrids for the 2015 growing season. MIR162 was in 23 new Viptera products and 18 new Duracade products. See "Syngenta Announces 52 New Corn Hybrids for 2015 Season" (Sept. 17, 2014)

(http://www.agprofessional.com/news/Syngenta-announces-52-new-corn-hybrids-for-2015-season-275494841.html).

233. In December 2014, China finally approved MIR162 for importation into China. By then, however, Syngenta already had begun commercializing yet another GMO corn seed product as discussed above. In addition, China's December 2014 approval is not likely to lessen the impact of Syngenta's conduct anytime soon.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

234. Syngenta affirmatively and purposefully engaged in all the actions and inactions described above to increase its own profits, ignoring the tremendous risks its profit-driven strategy imposed on U.S. corn Producers and Non-Producers.

235. Syngenta knew, or should have known, before its commercialization of Viptera and at all times since then of the high likelihood that Viptera would contaminate the U.S. corn supply and that channeling in the circumstance of its clearly inadequate "stewardship" program would not work. It was inevitable that Viptera corn would move into export channels, including China, and cause trade disruption, as Syngenta well knew.

236. Syngenta's acts and omissions have resulted in, and will continue to result in, the pervasive contamination of the U.S. corn supply, including fields, grain elevators and other facilities of storage and transport, causing physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land.

237. The likelihood that Viptera—and Duracade—would (and will continue to) contaminate the U.S. corn supply was readily foreseeable to, and indeed foreseen by, Syngenta, as was the harm to Producers and Non-Producers, whom Syngenta describes as among its stakeholders "affected by" Syngenta's business.

238. Syngenta had the right and ability to control the timing, size, and geographic scope of its commercialization of Viptera and Duracade, as well as the extent to which adequate containment measures would be required of its customers. Syngenta also could have instituted channeling measures but did not. Syngenta also ignored repeated warnings from stakeholders and misrepresented and concealed material information, all to further its own profit.

239. Syngenta did not simply fail to take precautions against foreseen and foreseeable harm. Syngenta acted affirmatively to create such harm.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

240. Syngenta's conduct has directly caused and contributed to cause significant economic harm to Producers and Non-Producers, as explained below.

14. *Economic Impact*

241. The characteristics of the world corn market have important implications for understanding the market price impact of the Chinese MIR162 ban on corn from the U.S. Those include:

a. Corn is the most widely used feed grain in the world.

b. The U.S. is by far the largest producer and exporter of corn.

c. Before the import ban, virtually all of China's corn imports were from the U.S.

d. Before the import ban, China was the third largest market for U.S. corn exports.

e. The latest USDA agricultural trade projections placed China as becoming the world's largest importer of corn by 2020.

f. The import ban virtually halted U.S. corn sales to China indefinitely.

g. The world price of corn is established in Chicago, and the loss of a key market for the U.S. put downward pressure on the world price that reverberated to farmgate prices throughout the U.S.

h. Corn is a commodity and a relatively small change in the global volume of trade in a commodity market like corn will have a magnified price impact.

i. An exporter's reputational loss in an agricultural commodity market due to an event like a GMO contamination can persist for many years. Once an exporter has lost a foreign market, it is difficult to get it back.

15. *Global Corn Market*

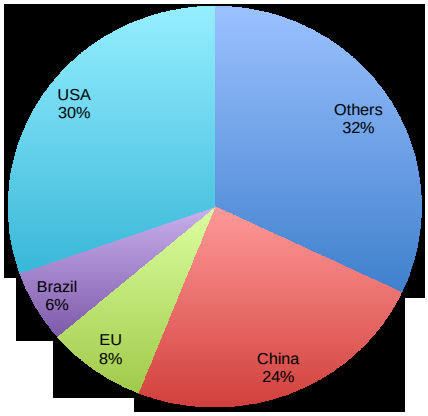
242. World corn production totaled 983.3 million metric tons (mmt) in 2013/14 (about 38.7 billion bushels). This supply was concentrated in a relatively small number of countries. The

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

world's largest corn producers are the U.S. with about 36% of global production in 2013/14; China (about 22% of production); Brazil (8%), and the EU (7%).

243. Global usage of corn has expanded by about 37% in the last decade, due to rising population and incomes, and increased urbanization with its associated changing dietary patterns. Feed usage accounts for about 58% of total global corn use, industrial use 27%, and food 11%. The pie chart below shows corn consumption by region.

World Corn Consumption By Region



Source: International Grains Council

244. At the end of each crop year, corn inventories are carried forward in case of a short harvest. The U.S. and China are the largest holders of corn inventories. At the end of 2013/14, these two countries held 70% of the 176 mmt of global stocks.

245. Total world corn trade is about 100 to 120 mmt per year. Before the MIR162 ban, China was importing about 4% of global corn sales. That amount was projected by the USDA to increase substantially by 2020, when the USDA projects that China will be the world's largest importer of corn at 16 million metric tons.

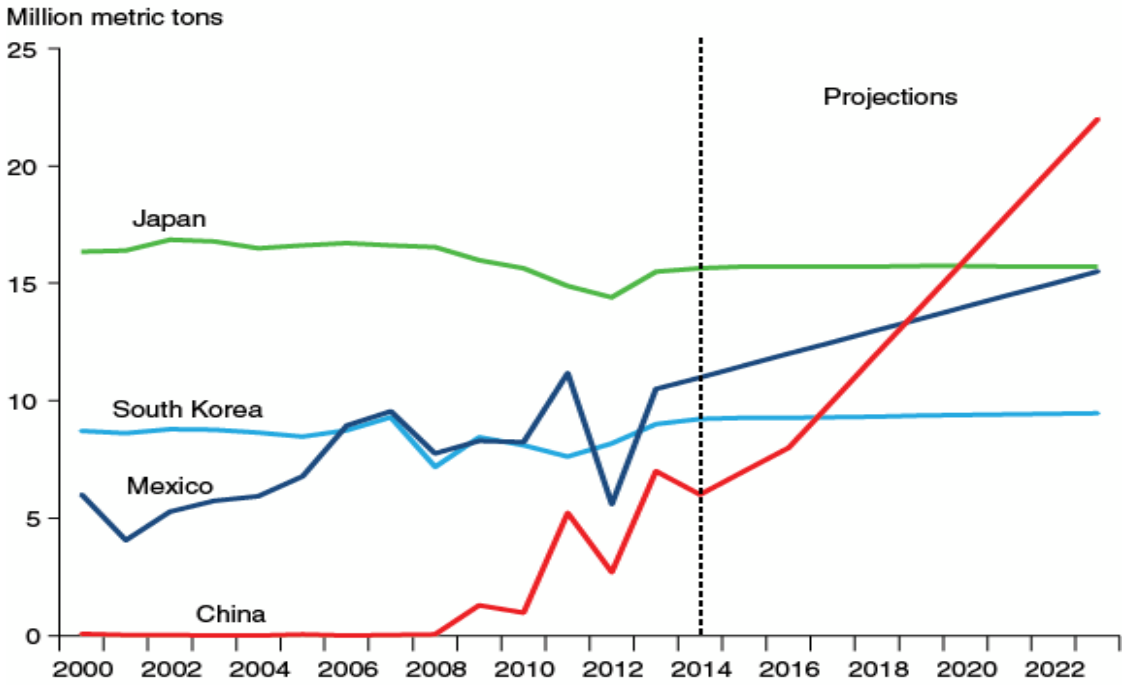
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

China expected to become largest global corn importer



Source: USDA Production, Supply and Distribution database and projections.

246. The U.S. is the dominant exporter of corn. The big exporters include the U.S. (36% of world trade), Brazil (20% of exports), the Ukraine (17%), and Argentina (10%). These four countries alone account for over 82% of global exports.

Table: Major Corn Exporters: July 2013/ June 2014

Exporting Country	**U.S.**	**Brazil**	**Ukraine**	**Argentina**	**Others**	**Total**
Exports (million metric tons)	42.8	23.5	19.9	12.0	21.8	120.0
Exports (million bushels)	1,685	925	783	472	858	4,724

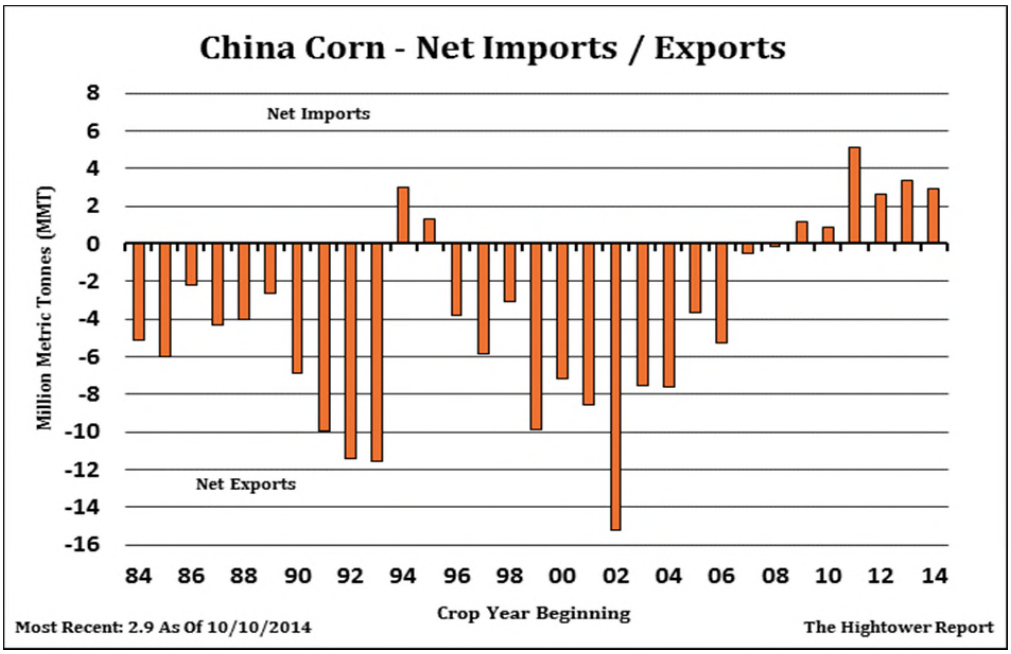
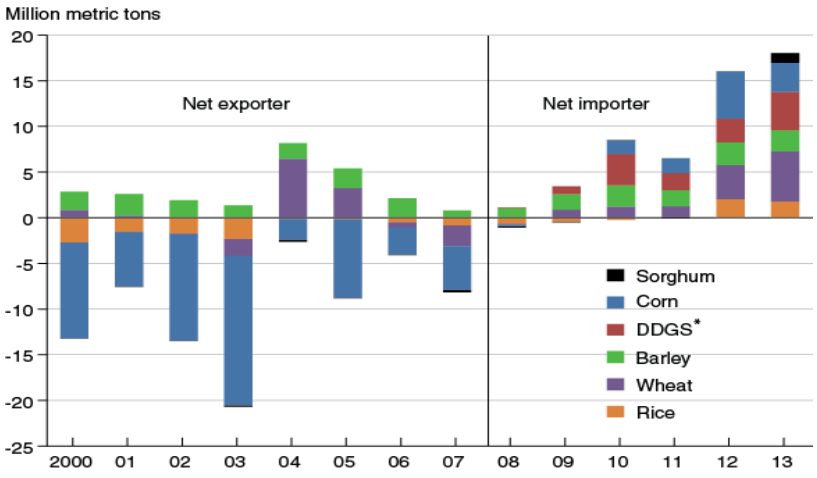
Hennepin County, MN

247. China flipped from being a significant net corn exporter (as well as all grains) to a net corn importer in 2009/2010.



248. As the chart below shows, China turned from a net exporter to a net importer of grains collectively in 2008. Imports of grains (including corn) surged during the 2012-13 time period, reaching 18 mmt. Most of this grain originated from the U.S.

China's net imports of grains surged during 2012-13



Note: Net imports = imports – exports. Data for calendar years.

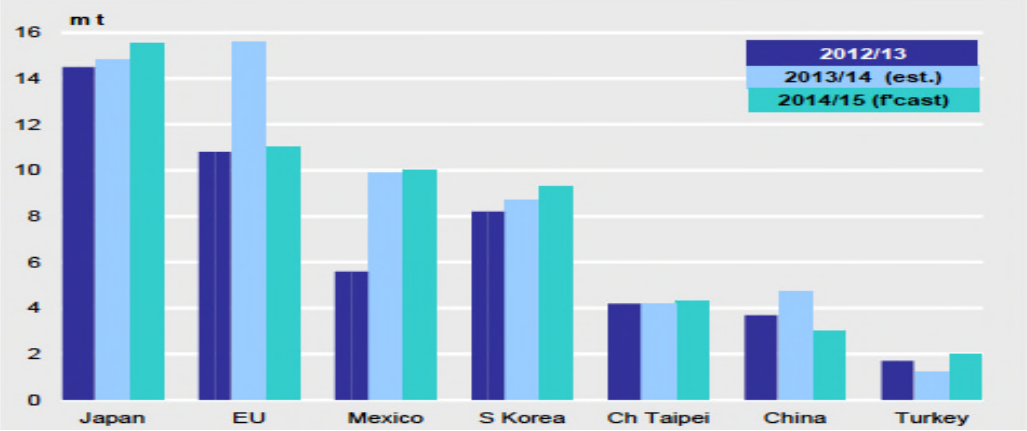
Hennepin County, MN

249. The import side of the international trade equation is more diverse, with the major importers including the EU, Japan, Mexico, South Korea, Chinese Taipei, China, and Turkey (together accounting for 55% of imports in 2013/14). This leaves 45% of the corn imports destined for a large number of small importers.

Major Corn Importers



Source: International Grains Council.

250. In its annual long-term grain trade projections, released in February 2014, the USDA projected that China's corn imports would grow from 2.7 mmt in 2012/13 to 22 mmt in 2023/24. China is by far the largest potential growth market for U.S. corn. These projections place China as the largest corn importer in the world by 2020.

16. *U.S. Corn Market*

251. Corn is the largest crop in the U.S. by both value of production and planted acres. In the 2013/14 September-August fiscal year, U.S. Producers produced about 13.9 billion bushels of corn, worth more than $60 billion. Corn is used for livestock feed (37% of 2013/14 crop), food, alcohol and industrial usage (46% of the 2013/14 crop), and exports (14% of the 2013/14 crop). USDA, Economic Research Service, Feedgrains Yearbook, Table 4 (http://www.ers.usda.gov/data-products/feed-grains-database.aspx#.VEJk-SiwRzo).

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

252. Corn production in the U.S. is concentrated in the neighboring Midwestern states comprising the "corn belt," where soil and climatic conditions are highly conducive to growing corn.[1] About 95.4 million acres of corn were planted in the U.S. in the September-August 2013/14 marketing year.

253. The U.S. corn marketing system is predominantly commodity-based. Corn grown by farmers is harvested, gathered, commingled, consolidated, and otherwise shipped from thousands of farms to local, regional, and/or terminal distribution centers. From there, it is often transported by exporters to foreign countries.

254. Grain elevators are facilities at which grains are received, stored, and then distributed for direct use, process manufacturing, or export. They can be generally referred to as either "country," "subterminal," or "terminal" elevators.

255. "Country elevators" are a linchpin of the U.S. commodity grain handling and marketing system. Country elevators are smaller elevators that receive grain by truck directly from local farms during the harvest season. In addition to providing grain storage and drying services to farmers, country elevators buy individual loads of grain from local farmers for cash. A country elevator then will sell the grain it has purchased and stored in volume to subterminal or terminal grain elevators for further movement in the commodity corn supply chain.

256. Grain elevators thus play a crucial role in agriculture. According to the USDA, there were 8,783 off-farm storage facilities in the U.S. as of January 2014. Iowa had the highest number of facilities with 900; Illinois came in second with 850 facilities. *See* USDA National Agricultural Statistics Service (Grain Stocks January 2014).

[1] The top ten producing states are Iowa, Illinois, Nebraska, Minnesota, Indiana, South Dakota, Wisconsin, Kansas, Ohio, and Missouri.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

257. Corn prices throughout the U.S. are tied to the Chicago Board of Trade Futures (CBOT) price through the "basis" (defined as the futures price minus the local cash price). The U.S. corn market is spatially integrated and informationally efficient. Basis levels for spatially separated markets are also closely linked. Events like trade disruptions that affect the CBOT corn prices directly affect the price that U.S. corn farmers receive for their corn.

258. Grain elevators test and grade corn for weight, moisture content, and foreign materials. Grain elevators are not equipped to test and segregate corn for genetic traits due to the costs associated with such a time-consuming process. Many grain elevators are not equipped to test for the MIR162 trait in corn.

259. The terminal grain elevator receives grain via rail or truck. Terminal grain elevators have the capacity to hold larger quantities of corn, with some holding several million bushels of grain. After receiving the grain, terminal operators sell large shipments to manufacturers or continue to store the grain for later sale to domestic and foreign buyers.

260. Some corn is sold for manufacture into corn ethanol. Ethanol manufacture results in a corn by-product known as DDGS. DDGS from the ethanol industry is commonly sold as a high protein livestock feed. In the U.S., DDGS is packed and traded as a commodity product.

261. Corn and processed grain from terminal elevators are transported by truck, rail, and/or ship to their final destination. Exporters may load the products themselves, or may contract with others for hauling and/or loading/transfer services. Corn bound for China is typically loaded into shipping containers and shipped by rail either to the West Coast or New Orleans, where the containers are loaded onto ships. Large exporters may deal in entire vessels loaded with corn, while smaller exporters ship containers of these products on container ships that may carry containers of other products, or from other exporters, as well.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

262. Once the corn or DDGS arrives in China, it must be cleared for import before the counter-party who has purchased the product may take delivery.

263. Thus, the commodity supply chain for corn bound for China may involve country elevators, sub-terminal elevators, terminal elevators, truckers and other haulers, loaders and transport companies, and exporters who ship the product to China.

264. Elevators both own and store corn for sale further down the supply chain.

265. Similarly, exporters may purchase and sell corn and DDGS, or may expect these products under a variety of consignment agreements. They have incurred injury due to the loss of the Chinese export market under either arrangement.

17. *China's Corn Market*

266. China has emerged as a large player in the global market for agricultural products. As of 2012, it was the fourth largest exporter and second largest importer of agricultural products in the world according to World Trade Organization trade statistics. Its import growth has been driven by a shift in its domestic production mix and changing consumer diets with rising incomes and urbanization. The changing diets have especially driven strong demand growth for meat (mainly pork and chicken), which requires a large supply of feed grains including corn and soybeans.

267. China is now the largest foreign market for U.S. agricultural products. The USDA reports that U.S. agricultural exports to China have almost doubled in the last five years, totaling $28 billion in fiscal October 2013-September 2014. USDA, Outlook for U.S. Agricultural Trade, AES-83 (Aug. 28, 2014).

268. Before China banned the import of U.S. corn, the top three U.S. agricultural exports to China (in order of importance) were soybeans, cotton, and corn, based on value of

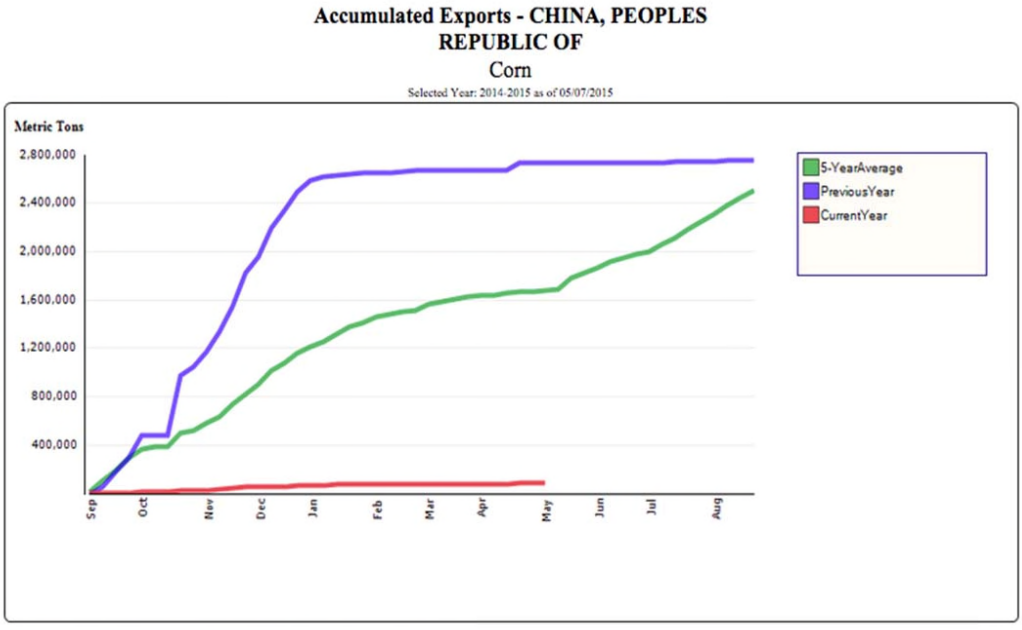
27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

trade. In November 2013, China started turning back cargoes containing Syngenta's MIR162 corn. While MIR162 is now approved, Event 5307 is not.

269. U.S. corn exports to China reached 5.146 mmt in 2011/12 (approximately 13% of U.S. exports that September-August marketing year) and were 2.39 mmt in 2012/13–still about 13% of exports (lower export volume due to the big U.S. drought). By contrast, due to China's import ban of U.S. corn beginning in November 2013, the absolute volume of U.S. corn exports to China in 2013/14 was not much higher than the drought year and fell to less than 6% of exports.

270. If the current trend that began after November 2013 continues, U.S. corn exports to China in the future will be negligible.

271. The following graph shows the dramatic difference in accumulated U.S. exports to China after the MIR162 ban, taking into account seasonal variations in export quantities:



5/15/2015 Source: USDA/FAS/Export Sales Reporting

272. If the China market continues to deny access to U.S. corn imports, the losses will be even more significant. As the following quote explains, China was expected to be a very rapidly growing import market for corn:

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

> China's corn imports are projected to rise steadily and reach 22 million tons by 2023/24. China's strengthening domestic demand for corn is driven by structural change and growth in its livestock sectors, as well as by rising industrial use. The increase in China's imports accounts for nearly half of the projected growth in world corn trade. USDA Long-Term Projections at p.20 (February 2014).

USDA Agricultural Projections to 2023, www.usda.gov/oce/commodity/projections/.

273. For fiscal year 2013/2014 China was expected to import 7 mmt of corn and 6 mmt in 2014/15. Since the news of the rejected cargoes surfaced, USDA analysts have lowered projections of China's total annual imports from 7 to 3.5 mmt in 2013/14 and from 6 to 3 mmt for 2014/15. These projections obviously reflect the assumption that U.S. corn trade with China will begin again sometime in 2014/15. The damage to the U.S. corn market and the prices U.S. corn Producers and Non-Producers receive for their corn likely will be long lasting.

274. China replaced inports from the U.S. with has increased imports from the Ukraine; and reportedly small shipments from Brazil and Argentina. In other words, the U.S. is already beginning to lose China as an important corn export market, and it will be difficult to get it back.

18. *GMOs in China*

275. China imports more biotech soybeans than any other country. The vast majority of China's soybean imports are biotech varieties, even though biotech soybeans (and corn) are not commercially grown in China. China imports soybeans primarily from the U.S., Brazil, and Argentina.

276. China has approved five-biotech crops for importation – canola, cotton, corn, soybeans, and sugar beets. Approximately 15 different corn biotech products have been approved by China, including "events" developed by Monsanto, Syngenta, Bayer, and DuPont. The number of approved soybean products is approximately eight and there are six cotton and seven canola products. Only one sugar beet product has been approved.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

277. China started testing and rejecting cargoes of U.S. corn in November 2013.

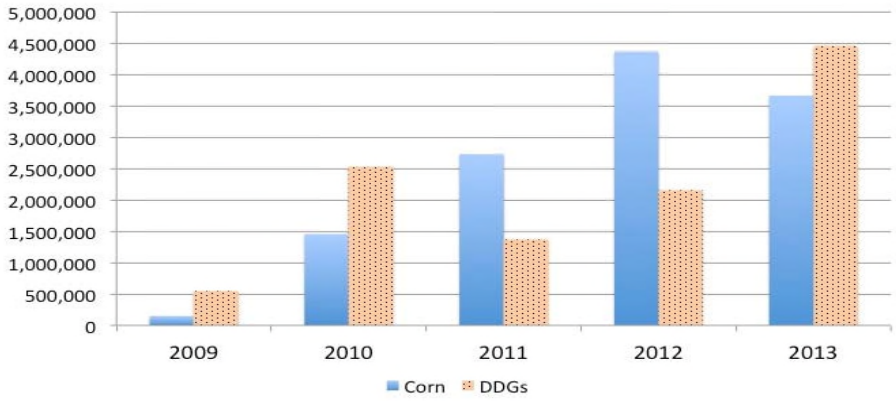
278. By mid-December 2013, China had rejected U.S. corn shipments of 545,000 metric tons. *See* http://www.reuters.com/article/2013/12/20/china-corn- idUSL3N0JZ0EZ20131220.

279. Beginning in July 2014, China's General Administration of Quality Supervision, Inspection, and Quarantine announced that it would require official government certification from the point of origin that shipments of DDGS are free of MIR162. China's rejection of U.S. DDGS due to the presence of MIR162 hurt the price of U.S. corn.

19. *DDGS Trade*

280. U.S. DDGS exports to China totaled 2.16 mmt in calendar year 2012 and 4.45 mmt in calendar year 2013. DDGS trade has been hit hard recently but the extent of the impact on corn prices may not show up in the trade data yet.

U.S. Exports of Corn and DDGS to China: 2009-2013 (calendar years)



Source: USDA, GATS. DDG HS code 2303300000

281. China was by far the largest market for U.S. DDGS exports accounting for approximately 50% of all exports. The U.S. exports over 20% of annual DDGS production. http://www.extension.iastate.edu/agdm/crops/outlook/dgsbalancesheet.pdf.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

282. The loss of the large Chinese market for DDGS displaces corn in the U.S. domestic market, pushing corn prices down further.

283. The impact of the loss of the Chinese market for corn and corn products to U.S. corn Producers and Non-Producers likely will be long lasting. The MIR162 incident has similarities to other international GMO contamination incidents, which have had long-lasting market effects. For instance, more than eight years after the 2006 Bayer Crop Science's Liberty Link contamination of the U.S. long-grain rice supply, exports to Europe have yet to recover. Before the 2006 marketing year, the EU-27 procured approximately 25% of its rice imports from the U.S. Immediately after the contamination event, the EU blocked imports of any new commercial U.S. long-grain rice imports. In fact, U.S. long grain rice farmers lost one of their most important markets, and they have yet to get it back despite considerable effort and expense. Recently, an official delegation from the U.S. rice industry visited countries in the EU (such as Germany and the United Kingdom) where they held discussions focused on the re-introduction of U.S. rice into this important market. After this visit, the USA Rice Federation reported that market re-entry faces significant hurdles:

> The U.S. has a superior product and the industry has successfully addressed environmental and social concerns of this market, but it's clear we have more work to do before our German customers return to us," said Keith Glover, president and CEO of Producers Rice Mill and chairman of USA Rice's World Market Price committee. USA Rice Federation, *USA Rice Daily* (Oct. 14, 2014).

284. In commodity markets like corn, a relatively small change in trade volume can have a significant impact on price. One of the prime examples of the operation of this basic law of economics occurred in 1973, when Middle Eastern oil producers (Iran and Arab members of OPEC) cut off exports to the U.S. to protest American military support for Israel. Even though imports from this region accounted for only about 10% of the U.S. oil supply, petroleum prices

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

quadrupled in response to the export embargo and there were long lines for gasoline at filling stations.

285. Another more recent example of inelastic demand at work is evident from the world coffee market. Brazil produces about 35% of the world's coffee and is unfortunately in the middle of a drought that is affecting both the 2014 and 2015 coffee harvests in that country. In 2014, the Brazilian coffee harvest was down about 13% and this doubled the price of coffee. World coffee production is about 150 million bags per year, and as the following quote from the *Financial Times* indicates, a 10 million bag swing in Brazil's production over a two-year period (about a 3.5% change in production) can mean the difference in coffee prices ranging between $3 and $1.50 per pound:

> Brazil is the largest coffee producer in the world, accounting for about 35 per cent of all output. Industry consensus around the 2014 Brazilian harvest seems to have settled at about 48m 60kg bags, down from the previous year's 54-55m, but the 2015 forecasts have ranged widely between 40m and 53m bags. Estimates for the cumulative Brazil supply 2014 and 2015 combined, range from 92m to 102m bags, which is the difference between $3.00 and $1.50 per pound of coffee. *Financial Times* (Sept. 17, 2014).

286. Based on the same economic logic, the *Wall Street Journal* reasoned that the loss of the Chinese corn market to the U.S. industry over MIR162 will have an important impact on the U.S. corn price, even though that market represented only about 12% of U.S. exports: "Exports account for only about 12% of the U.S. corn crop, but China's rapid growth gives the country an outsize influence over prices." *Wall Street Journal*, U.S. Corn Exports to China Dry Up Over GMO Concerns (Apr. 11, 2014).

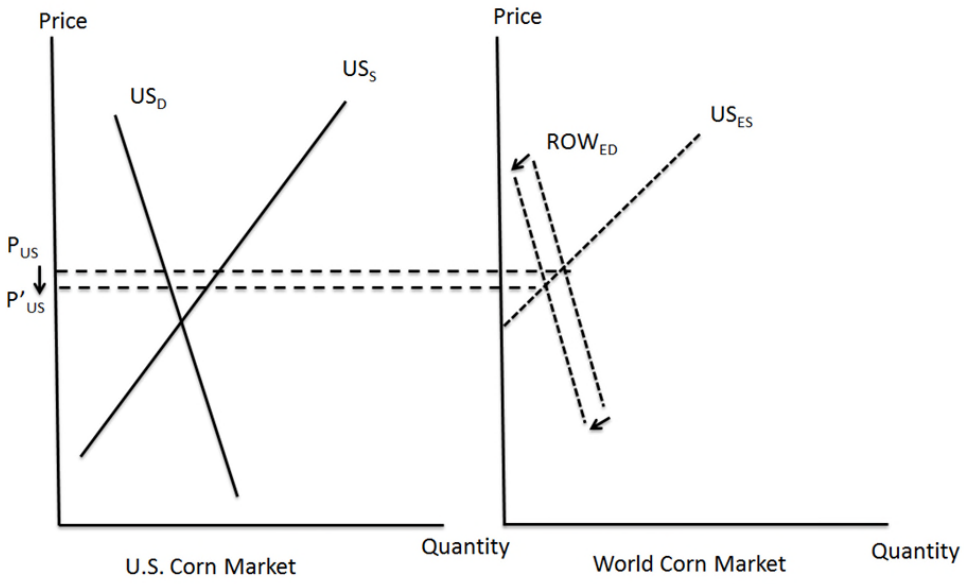
287. In the U.S. corn market, both domestic demand and supply curves are relatively inelastic, especially in the short run. Elasticity measures the degree of responsiveness in supply or demand to price changes. If both the supply and demand curves are inelastic, then for each curve

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

it will take a relatively large change in price to effect a change in quantity demanded or supplied. This is shown in the left panel of the diagram below, where the U.S. domestic demand for corn is represented as schedule US_D and the domestic supply is labeled as US_S. Both of these curves are inelastic as drawn. The horizontal difference between the supply (US_S) and demand (US_D) at world price (P_{US}) is the amount of corn exported.

288. The right hand panel of the diagram shows the market for U.S. corn exports. The U.S. export supply curve shown to the world market is labeled as US_{ES}. This curve is based on the U.S. domestic supply and demand curves in the left hand panel. For any price above the point where US_D and US_S intersect in the left-hand panel, there is excess domestic corn that is supplied to the world market according to the schedule US_{ES} in the right hand panel. The world demand for U.S. corn is shown by the curve ROW_{ED} in the right hand panel. This includes demand from China. Following the MIR162 ban the ROW_{ED} curve shifts left as shown by the arrows in the right hand panel. An inward shift of the global demand for U.S. corn reduces exports from the U.S. The intersection of the shrunken ROW_{ED} curve and US_S determines the volume of trade after the MIR162 ban. U.S. corn exports are reduced by a fixed volume due to a foreign market closing, and the U.S. price falls to P'_{US}. The drop in price is relatively large, even if the shrinkage in exports is a small share of production, because the price must fall to clear a market in which supply and demand are inelastic.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN



289. Under the bedrock economic law of supply and demand, for an exportable good, when there is less foreign demand for a product, particularly one with relatively inelastic demand and supply curves, the price is lower than it otherwise would be.

290. As a result, all U.S. corn Producers who priced their corn after November 2013 have received a lower price for their corn than they would have received if China's imports of U.S. corn had not effectively stopped.

291. These effects are likely to continue in the future, both because Chinese purchasers may not necessarily return to former U.S. suppliers even though MIR162 is now approved, and also because the presence of Event 5307 in Syngenta's Duracade corn may cause contamination similar to the contamination caused by MIR162 alone.

20. *Losses Suffered by Non-Producers*

292. Producers were not the only ones to suffer the impact of lost sales, or sales at lower prices than they would have received if China's imports of U.S. corn had not effectively stopped. Grain elevators, which buy from farmers and re-sell further down the supply chain, similarly suffered losses from the drop in corn prices, as well as reduced volumes and reduced margins.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

And, to the extent that exporters have purchased corn or DDGS for re-sale in the export market, they also suffered losses when the price of corn and DDGS fell.

293. When the price of corn and DDGS drops, and those products cannot be exported to China, there is far less need for the services of those who process, haul, or otherwise transport those products. Thus, transporters for the export trade have seen their business decimated with the evaporation of Chinese exports.

294. Exporters have also been hit hard. They have suffered from reduced shipments and canceled or rescinded export contracts as well as delayed payments on stalled deliveries to China. With respect to shipments held in Chinese ports, exporters have incurred huge costs for storage, moving, late customs clearance, customs checking, import taxes, and diversion fees. Delays in payment on shipments to China further affected the credit of exporters and thus impaired their ability to divert their corn or DDGS to other markets.

295. Many companies seeking to import U.S. corn and DDGS who accepted shipments that later tested positive for MIR162 have been forced to default on contracts to purchase additional quantities of U.S. corn and DDGS because they are no longer able to obtain import permits. They are also unable to enter into new contracts. This has seriously affected the business of exporters.

296. These effects are likely to continue in the future, both because Chinese purchasers may not necessarily return to former U.S. suppliers even though MIR162 is now approved and because the presence of Event 5307 in Syngenta's Duracade corn may cause contamination similar to the contamination caused by MIR162 alone.

21. Harm to Milo and Soybean Prices

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

297. Sorghum, also called milo, is a high energy, drought tolerant crop used most often for animal feed and ethanol production. The "milo belt" runs from South Dakota to southern Texas, and includes Kansas, Missouri, Arkansas, Texas, Oklahoma, Colorado, Nebraska, South Dakota, Illinois, Louisiana, Mississippi, and New Mexico. Texas and Kansas account for two-thirds of the nation's planted acres of milo. Over the last five years, planted acreage ranged from 5.3 million to over 8 million acres. Milo is not listed on the Chicago Board of Trade; instead, the cash price farmers receive for milo is set by the CBOT futures price for corn. Thus, there is a direct relationship between the price of corn and the set price of milo. When the Chinese ban depressed the price of corn, it simultaneously depressed the price of milo.

298. Soybeans are a substitute crop for corn. When corn prices are high, the demand for soybeans increases because the soybean prices are set lower than corn. Soybeans and milo are parallel markets to corn because both markets derive their demand from the corn market. Under the basic laws of supply and demand, when there is less demand for a product, the price is lower than it otherwise would be. With the influx of rejected corn back into the U.S. market, the corn supply in the U.S. increased, causing lower corn prices. With corn cheaper, sales of milo and soybeans dropped because of the substitutability of corn for these commodities in domestic feed rations. Soybean farmers received less money for their soybeans due to the sudden drop in corn prices because purchasers bought cheaper corn rather than the soybeans.

299. Milo and Soybean Plaintiffs have been damaged by Syngenta's material misrepresentations as alleged throughout this Complaint. Milo and Soybean Plaintiffs were injured by the negative market price impact, which resulted in lower revenues and profits. Milo Plaintiffs and Soybean Plaintiffs seek compensation for the losses suffered as a result of Syngenta's irresponsible conduct and punitive damages for Syngenta's reprehensible and

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

outrageous behavior.

I. Causes of Action

Count 1 – Negligence
(On Behalf of Minnesota, or All, Plaintiffs)

300. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

301. Syngenta owed a duty to Plaintiffs to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

302. Syngenta breached its duties by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera would lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

303. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Plaintiffs.

304. Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

305. Syngenta's conduct was willful, wanton, grossly negligent, and in reckless

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

disregard of the rights of others, including Plaintiffs. Moreover, Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to Plaintiffs' rights, and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's acts and omissions thus showed deliberate reckless disregard for Plaintiffs' rights. Punitive damages are thus warranted.

Count 2 – Trespass to Chattels
(On Behalf of Minnesota, or All, Plaintiffs)

306. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

307. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and Duracade into contact with non-Viptera/Duracade corn in which Plaintiffs had possession and/or possessory rights.

308. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or grain elevators and other modes of storage and transport.

309. As a result of the trespass, Plaintiffs' chattels/movables were impaired as to condition, quality, or value, and Plaintiffs were damaged.

310. Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

311. Syngenta's conduct was willful, wanton, grossly negligent, and in reckless disregard of the rights of others, including Plaintiffs. Punitive damages are thus warranted.

Count 3 – Tortious Interference
(On Behalf of Minnesota, or All, Plaintiffs)

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

312. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

313. Plaintiffs had a business relationship with customers such as grain elevators and exporters to whom they sold their corn. This business relationship was recorded by contracts, invoices, receipts, and other documents demonstrating a consistent course of sales.

314. Plaintiffs had a reasonable expectation of economic gain as a result of these relationships and reasonably expected to continue selling corn to such customers in the future.

315. Syngenta knew that Plaintiffs had business relationships in the chain of crop export and sales. Syngenta knew that Plaintiffs expected such relationships to continue in the future.

316. Despite such knowledge, Syngenta made representations that deceived Plaintiffs about whether customers would accept Viptera and Duracade corn or corn contaminated with MIR162.

317. Syngenta interfered with these prospective future business relationships by prematurely releasing Viptera and Duracade corn into the U.S. market knowing that it would lead to contamination of all U.S. corn shipments. This conduct prevented U.S. corn from being sold to certain export markets, including China, which had not granted approval for purchase or consumption of Viptera and Duracade corn.

318. Syngenta's conduct thus prevented the export of U.S. corn to China, causing depressed prices for Producers and Non-Producers. As a result, Plaintiffs were unable to sell corn at the price they reasonably expected to receive and would have received but for Syngenta's conduct. Plaintiffs, therefore, have been damaged as a result of Syngenta's interference.

319. Plaintiffs were damaged by Syngenta's conduct, including but not limited to suffering consequential damages from depressed prices for the sale of their corn.

320. As a direct and proximate result of Syngenta's conduct, Plaintiffs have been

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

injured and have suffered financial loss in excess of $50,000, for which damages and other relief as may be available at law or equity are warranted.

Count 4 – Private Nuisance
(On Behalf of Minnesota, or All, Plaintiffs)

321. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

322. By contaminating the U.S. corn supply, Syngenta obstructed the free use of Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or comfortable enjoyment of their property, constituting a private nuisance.

323. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of the Plaintiffs' interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct, and knew that it would substantially interfere with Plaintiffs' comfortable enjoyment of their property and/or property interests.

324. Syngenta's actions proximately caused damage to Plaintiffs. Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

325. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to Plaintiffs' rights and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions thus showed deliberate disregard for the rights of others including Plaintiffs. Punitive damages are thus warranted.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Count 5 - Minn. Stat §§ 325D.13 and 325F.69
(On Behalf of Minnesota, or All, Plaintiffs)

326. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

327. Syngenta made false or misleading statements regarding MIR162 and its impact on export markets for U.S. corn, including China, and corn prices.

328. Syngenta's representations, statements, and commentary have been largely disseminated and included:

a. To APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact on export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. To APHIS and the public, that MIR162 could and would be channeled away from markets that had not yet approved MIR162;

c. To the press and to investment analysts on quarterly conference calls;

d. Through statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Through other statements indicating that approval from China for MIR162 corn was expected at times when Syngenta knew it was not.

329. In addition, Syngenta stated in 2007 that its regulatory filings with China were "in process" when it did not actually file for Chinese approval until 2010.

330. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, during the summer of 2011, Syngenta represented to stakeholders, including Plaintiffs (to encourage further sales, planting, and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack,

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status within that process for MIR162, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

331. In addition to these false and misleading statements, Syngenta failed to disclose, and actively suppressed and concealed, that approval from China was not reasonably likely to occur (at least) for the 2011 and 2012 growing seasons and that purchase and planting of Viptera created at least a substantial risk of loss of the Chinese market.

332. Syngenta also has at all times made false and misleading statements regarding the ability to channel MIR162 corn, as well as the state and effectiveness of its supposed stewardship generally and in regard to MIR162.

333. Syngenta also failed to disclose, and actively suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

334. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Plaintiffs do not have access.

335. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Plaintiffs.

336. Syngenta knew but failed to disclose, suppressed, and concealed that systems were not in place to isolate or effectively channel Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

disseminate throughout the U.S. corn supply and into export markets, including China, which had not approved import, causing market disruption.

337. Syngenta also knew but failed to disclose, suppressed, and concealed, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

338. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Plaintiffs would be harmed.

339. Syngenta knew that Plaintiffs are affected by its business and depend on it for responsible commercialization practices.

340. For all these reasons, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 and 2012 growing seasons, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which it did not have approval, and that commercializing Viptera (and later Duracade) without Chinese import approval or an

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

effective channeling system created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

341. In addition, Syngenta made numerous misrepresentations to the effect that approval from China was on track and/or would be received during time periods when Syngenta knew it was not, and that Viptera and Duracade could, and would, be channeled away from markets for which approval had not been obtained. Syngenta had a duty to prevent words it communicated from misleading others.

342. Syngenta's misrepresentations and omissions were made intentionally or recklessly.

343. Syngenta, in connection with the sale of merchandise – Viptera and Duracade – knowingly misrepresented, directly or indirectly, the true quality of that merchandise in violation of Minn. Stat. § 325D.13.

344. Syngenta used or employed fraud, false pretense, false promise, misrepresentation, misleading statements, or deceptive practices, with the intent that others rely thereon in connection with the sale of Viptera and Duracade in violation of Minn. Stat. § 325F.69.

345. Syngenta's violations of Sections 325D.13 and 325F.69 proximately caused harm to Plaintiffs.

346. This action will serve a public benefit. Not only were Syngenta's misrepresentations made to a large segment of the public, Syngenta's conduct vitally affects a large segment of the public as well – all producers and non-producers in the business of growing, selling, storing, exporting, and transporting corn and corn products – who depend on the responsible stewardship practices of developers like Syngenta when commercializing GM products. The issues surrounding what duties and liabilities such developers have for irresponsible

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and intentional acts is not limited to corn but impact all developers and stakeholders in a similar position.

347. Plaintiffs are entitled to compensatory damages and attorneys' fees. *See* Minn. Stat. 8.31, subd. 3a.

Count 6 - Strict Liability-Failure to Instruct and/or Warn
(On Behalf of Minnesota, or All, Plaintiffs)

348. Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

349. Syngenta has in the past and continues to manufacture, sell, and otherwise distribute corn seed containing MIR162.

350. Syngenta sold Viptera and Duracade into the stream of commerce by selling it to farmers.

351. Viptera and Duracade was used as intended.

352. Viptera and Duracade was used in a manner Syngenta could have reasonably anticipated.

353. Syngenta is strictly liable to Plaintiffs as a result of its failure to warn about the dangers of Viptera and Duracade.

354. Syngenta knew, or had reason to know, of the dangers associated with corn seed containing MIR162.

355. Syngenta had a duty to warn and/or instruct Plaintiffs.

356. Syngenta did not give adequate warning of the danger of Viptera and/or Duracade; nor did Syngenta give adequate instructions as to the use of Viptera and/or Duracade.

357. Plaintiffs suffered injury and damages as a direct and proximate result of Syngenta's failure to provide an adequate warning and/or instructions regarding the dangers of Viptera and Duracade.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

358. Thus, Syngenta knew, or should have known, that its conduct would result in injuries to Plaintiffs.

359. Nevertheless, Syngenta continued such conduct in reckless disregard of or conscious indifference to those consequences.

360. As a direct and proximate result of the foregoing, Plaintiffs have been injured and suffered financial loss for which damages, injunctive, declaratory and other relief as may be available at law or equity is warranted.

Count 7 - Negligence
(On Behalf of Alabama Plaintiffs)

361. Alabama Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

362. Syngenta owed its stakeholders, including the Alabama Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

363. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

364. Syngenta's negligence directly and proximately caused harm to Alabama Plaintiffs.

365. Alabama Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

366. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Alabama Plaintiffs and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 8 – Trespass to Chattels
(On Behalf of Alabama Plaintiffs)

367. Alabama Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

368. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Alabama Plaintiffs had possession and/or possessory rights.

369. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Alabama Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

370. As a result of the trespass, Alabama Plaintiffs' chattels were impaired as to condition, quality, or value, and Plaintiffs were damaged.

371. Alabama Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

372. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others,

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

including Alabama Plaintiffs. Punitive damages are thus warranted.

Count 9 – Tortious Interference
(On Behalf of Alabama Plaintiffs)

373. Alabama Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

374. Alabama Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

375. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

376. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

377. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Alabama Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass and interference with Alabama Plaintiffs' use of their property and in violation of Syngenta's duty of care.

378. Syngenta's interference has proximately caused damage to Alabama Plaintiffs.

379. Alabama Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

380. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Alabama Plaintiffs. Punitive damages are thus warranted.

Count 10 - Private Nuisance
(On Behalf of Alabama Plaintiffs)

381. Alabama Plaintiffs incorporate by reference paragraphs 1-299 as though set forth

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

herein.

382. Syngenta's actions constitute a private nuisance to Alabama Plaintiffs. By contaminating the U.S. corn supply, Syngenta has substantially and unreasonably interfered with Alabama Plaintiffs quiet use and enjoyment of their land and/or property interests.

383. Syngenta's actions proximately caused damage to Alabama Plaintiffs.

384. Alabama Plaintiffs thus entitled to an award of compensatory damages and pre- and post-judgment interest.

385. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Alabama Plaintiffs. Punitive damages are thus warranted.

Count 11 – Negligence
(On Behalf of Alaska Plaintiffs)

386. Alaska Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

387. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

388. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to Alaska Plaintiffs, to use ordinary care in the timing, scope, and terms under which it commercialized Viptera and Duracade.

389. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera and Duracade as outlined herein.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

390. Specifically, Syngenta breached these duties by its acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

391. Syngenta's breach is the direct and proximate cause of the damage suffered by Alaska Plaintiffs.

392. The rejection by China of U.S. corn could not have occurred without Syngenta's negligence in prematurely releasing Viptera and Duracade corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera and Duracade in fact contaminated the U.S. corn supply, which could not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and Duracade and these unapproved genetically modified traits could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

393. Alaska Plaintiffs suffered injury and property damage by the sale and distribution of Viptera by Syngenta as outlined herein and seek compensatory damages. Alaska Plaintiffs also seeks all costs and fees allowed by law.

394. Alaska Plaintiffs further see punitive damages as a result of Syngenta's reckless and willful conduct. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Alaska Plaintiffs' interests. Punitive damages are thus warranted.

Count 12 - Trespass to Chattels
(On Behalf of Alaska Plaintiffs)

395. Alaska Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

396. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and Duracade into contact with and contaminated non-Viptera/Duracade corn in which Alaska PlaintiffsPlaintiffs had possessory rights.

397. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminated Alaska Plaintiffs' corn through contamination in fields and/or grain elevators and other modes of storage and transport.

398. As a result of the trespass, Alaska Plaintiffs' chattels, in which Alaska Plaintiffs had a possessory interest, were contaminated and impaired as to condition, quality, or value, and Alaska Plaintiffs were damaged.

399. Syngenta's intentional interference is the direct and proximate cause of the damage to Alaska Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

400. Alaska Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

401. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Alaska Plaintiffs' interests. Punitive damages are thus warranted.

Count 13 – Tortious Interference
(On Behalf of Alaska Plaintiffs)

402. Alaska Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

403. Alaska Plaintiffs had existing and prospective business relationships and a reasonable expectancy of continued relationships with third-party purchasers of corn.

404. Syngenta had knowledge of such relationships or expectancies and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the relationships or expectancies existed. Syngenta intended to prevent the fruition of the prospective and existing business relationships between Alaska Plaintiffs and third-party purchasers of corn.

405. Syngenta was not a party to the business relationships between Alaska Plaintiffs and third-party purchasers of corn.

406. Syngenta intentionally induced or caused a disruption of that expectancy without justification or privilege.

407. Because of Syngenta's conduct, the existing and prospective business relationships between Alaska Plaintiffs and third-party purchasers of corn did not culminate in pecuniary benefit to Alaska Plaintiffs.

408. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional, and contaminated Alaska Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass and interference with Alaska Plaintiffs' use of their property and in violation of Syngenta's duty of care.

409. Syngenta's interference is the direct and proximate cause of the damage to Alaska Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

410. Alaska Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

411. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Alaska Plaintiffs' interests. Punitive damages are thus warranted.

Count 14 - Private Nuisance
(On Behalf of Alaska Plaintiffs)

412. Alaska Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

413. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, transportation facilities, and equipment are contaminated with Viptera.

414. Syngenta's conducts was intentional, or at the very least negligent and/or reckless, and unreasonably interfered with Alaska Plaintiffs' use and enjoyment of their property interests in their corn.

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

415. The interference with Alaska Plaintiffs' use and enjoyment of their property interests, caused by Syngenta's contamination of both Alaska Plaintiffs' corn supply and the U.S. corn supply, is substantial, unreasonable, and ongoing. Alaska Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Alaska Plaintiffs' corn crops, reduced prices for Alaska Plaintiffs' corn crops, and diminution in the value of Alaska Plaintiffs' corn harvesting.

416. Syngenta's actions are the direct and proximate cause of the damage to Alaska Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

417. Alaska Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

418. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Alaska Plaintiffs' interests. Punitive damages are thus warranted.

Count 15 - Alaskan Unfair Trade Practices and Consumer Protection Act
(On Behalf of Alaska Producer Plaintiffs)

419. Alaska Plaintiffs incorporate by reference paragraphs 1-299 as though set forth herein.

420. Pursuant to Alaska Stat. §§ 45.50.471 through 45.50.561, the Alaskan Unfair Trade Practices and Consumer Protection Act ("AUTPCPA"), unlawful trade practices include:

a. "[C]ausing a likelihood of confusion or misunderstanding as to the source, sponsorship, or approval, or another person's affiliation, connection, or association with or certification of goods or services" Alaska Stat. § 45.50.471(b)(3);

b. "[R]epresenting that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have" Alaska Stat. § 45.50.471(b)(4);

c. "[E]ngaging in any other conduct creating a likelihood of confusion or of misunderstanding and which misleads, deceives or damages a buyer or a competitor in connection with the sale or advertisement of goods or services" Alaska Stat. § 45.50.471(b)(11); and

d. "[U]sing or employing deception, fraud, false pretense, false promise, misrepresentation, or knowingly concealing, suppressing, or omitting a material fact with intent that others rely upon the concealment, suppression, or omission in connection with the sale or advertisement of goods or services whether or not a person has in fact been misled, deceived or damaged. Alaska Stat. § 45.50.471(b)(12).

421. Syngenta's deceptive and unfair trade practices constitute a violation of Alaska Stat. §§ 45.50.471(3), (4), (11), and (12).

422. The AUTPCPA provides for a private cause of action. "A person who suffers an ascertainable loss of money or property as a result of another person's act or practice declared unlawful by AS 45.50.471 may bring a civil action to recover for each unlawful act or practice.…" Alaska Stat. § 45.50.531.

423. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn farmers and to induce corn farmers, including some Alaska Plaintiffs, to purchase Viptera and Duracade.

424. Syngenta's false and deceptive representations caused confusion and misunderstanding as to Viptera and Duracade's sponsorship, approval, and/or certification.

425. Syngenta further knowingly and recklessly represented that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

426. Syngenta's conduct created a substantial likelihood of confusion and misunderstanding, and misled, deceived, or damaged Alaska Plaintiffs in connection with the sale

27-CV-15-17585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

or advertisement of Viptera and Duracade.

427. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

428. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

429. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

430. Syngenta also failed to disclose material information to Producers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

431. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including Alaska Plaintiffs. Those Alaska Plaintiffs lack the sophistication and bargaining power in matters concerning genetically modified products.

432. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Producers, including Alaska Plaintiffs, do not have access.

433. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Alaska Plaintiffs.

434. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade, and knew that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

435. Syngenta engaged in these deceptions in order to sell and increase its sales of

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Alaska Plaintiffs would be harmed.

436. Syngenta knew that Alaska Plaintiffs would be affected by its business and depend on it for responsible commercialization practices.

437. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

438. Syngenta's deceptive trade practices have impacted Alaska ProducersProducers, as well as other corn farmers, including corn farmers who purchased and planted Viptera and/or Duracade.

439. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have significant potential to further disrupt the corn export market in the future.

440. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Alaska Producer Plaintiffs and other U.S. corn farmers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

441. Syngenta's deceptive trade practices proximately caused an injury in fact to a

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

legally protected interest belonging to Alaska ProcuersProcuers, including but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

442. Alaska Producer Plaintiffs are thus entitled to damages in a sum equal to three times the amount of actual damages they sustained, plus their attorney's fees and costs incurred in this action. Alaska Stat. § 45.50.531(a) & § 45.50.537.

443. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Alaska Producer Plaintiffs' interests. Punitive damages are thus warranted.

Count 16 - Negligence
(On Behalf of Arizona Plaintiffs)

444. Arizona Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

445. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

446. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to Arizona Plaintiffs, to use ordinary care in the timing, scope, and terms under which it commercialized Viptera and Duracade.

447. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that naturally resulted from the premature sale and distribution of Viptera and Duracade.

448. Syngenta breached these duties by its acts and omissions including but not limited to:

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channelthose products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

449. Syngenta's breach is the direct and proximate cause of the damage suffered by Arizona Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

450. China's rejection of U.S. corn wouldwould not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which could not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

451. Arizona Plaintiffs suffered injury and property damage by the sale and distribution

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of Viptera by Syngenta as outlined herein and seek compensatory damages. Arizona Plaintiffs also seeks all costs and fees allowed by law.

452. Arizona Plaintiffs further seek punitive damages. Syngenta's conduct, was aggravated and outrageous, and included acts done with malice, bad motives, and/or with the intent to injure, defraud, or deliberately interfere with the rights of Arizona Plaintiffs. Syngenta's conduct evidenced a reckless indifference or conscious disregard of the unjustifiably substantial risk of significant harm to Arizona Plaintiffs' interests. Punitive damages are thus warranted.

Count 17 – Trespass to Chattels
(On Behalf of Arizona Plaintiffs)

453. Arizona Plaintiffs incorporate by reference paragraphs 1-299299 as if set forth herein.

454. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and Duracade into contact with, and contaminated non-Viptera/Duracade corn in which Arizona Plaintiffs had possessory rights.

455. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate Arizona Plaintiffs' corn through contamination in fields and/or grain elevators and other modes of storage and transport.

456. As a result of the trespass, Arizona Plaintiffs' chattels, in which Arizona Plaintiffs had a possessory interest, were contaminated and impaired as to condition, quality, or value, and Arizona Plaintiffs were damaged.

457. Syngenta's intentional interference is the direct and proximate cause of the damage to Arizona Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

458. Arizona Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

459. Syngenta's conduct, was outrageous and included acts done with malice or bad motives and/or evidencing reckless indifference to Arizona Plaintiffs' interests. Punitive damages are thus warranted.

Count 18 - International Interference with Business Relationships
(On Behalf Arizona Plaintiffs)

460. Arizona Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

461. Arizona Plaintiffs had valid contracts and/or business expectancies with third-party purchasers of corn and a reasonable expectancy of the continuance of such relationships.

462. Syngenta had knowledge of such contracts and/or expectancies and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the contracts and/or expectancies existed.

463. Syngenta's conduct, as described above, constituted an intentional interference and induced or caused a breach of the contracts and/or termination of the relationships or expectancies.

464. Syngenta was not a party to the contracts and/or business relationships between Arizona Plaintiffs and third-party purchasers of corn.

465. Syngenta intentionally induced or caused a disruption of the contracts and/or business relationships without justification or privilege.

466. Syngenta's conduct was intentional and improper as to motive or means, and wrongful because, *interinter alia*, it was accomplished byby misrepresentations and omissions of material fact, was intentional, and contaminated Arizona Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass

27-CV-15-3585
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and interference with Arizona Plaintiffs' use of their property in violation of Syngenta's duty of care.

467. Syngenta's interference is the direct and proximate cause of the damage to Arizona Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

468. Arizona Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

469. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Arizona Plaintiffs interests. Punitive damages are thus warranted.

Count 19 - Private Nuisance
(On Behalf of Arizona Plaintiffs)

470. Arizona Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

471. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

472. Syngenta's conduct was intentional and unreasonably interfered with Arizona Plaintiffs' use and enjoyment of their real property.

473. The interference with Arizona Plaintiffs'Plaintiffs' use and enjoyment of theirtheir property interests caused by Syngenta's contamination of both Arizona Plaintiffs' corn supply and the U.S. corn supply is substantial, unreasonable, and ongoing. Arizona Plaintiffs have suffered

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for corn, reduced prices for corn, and diminution in the value of corn.

474. Syngenta's actions are the direct and proximate cause of the damage to Arizona Plaintiffs, including butnot limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

475. Arizona Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

476. Syngenta's conduct, as described above, was outrageous and included acts done with malice or bad motives and/or evidencing reckless indifference to Arizona Plaintiffs interests. Punitive damages are thus warranted.

Count 20 - Arizona Consumer Fraud Act
(On Behalf of Arizona Plaintiffs)

477. Arizona Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

478. Under A.R.S. §44-1522(A) of the Arizona Consumer Fraud Act ("ACFA"), A.R.S. §§ 44-1521 through 44-1534, unlawful trade practices include: "The act, use or employment by any person of any deception, deceptive or unfair act or practice, fraud, false pretense, false promise, misrepresentation, or concealment, suppression or omission of any material fact with intent that others rely on such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise whether or not any person has in fact been misled, deceived or damaged thereby…." A.R.S. § 44-1522(A).

479. Syngenta's deceptive trade practices in connection with the sale and advertisement of Viptera and Duracade constitute a violation of A.R.S. §§ 44-1522.

480. The ACFA provides a private cause of action against Syngenta in connection with Syngenta's violations of A.R.S. §§ 44-1522.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

481. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn ProducersProducers and Non-Producers and to induce ProducersProducers and Non-Producers, including Arizona Plaintiffs, to purchase Viptera and Duracade.

482. Syngenta's false and deceptive representations misled and deceived Arizona Plaintiffs as to Viptera and Duracade's approval and/or certification. Syngenta further knowingly and recklessly represented that Viptera and Duracade had approval that it did not have.

483. Syngenta's conduct created a substantial likelihood of confusion and misunderstanding, and misled, deceived, or damaged Arizona Plaintiffs in connection with the sale or advertisement of Viptera and Duracade.

484. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

485. Syngenta also submitted the MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

producing sales.

486. As described above, Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

487. Syngenta also failed to disclose material information to corn farmers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolatiors or channeling Viptera or Duracade.

488. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including Arizona Plaintiffs, who lack the sophistication and bargaining power in matters concerning genetically modified products.

489. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Arizona Plaintiffs did not have access.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

490. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling of its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

491. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

492. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers would be harmed.

493. Syngenta knew that farmers like Arizona Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

494. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

495. Syngenta's deceptive trade practices have previously impacted Arizona Plaintiffs and others, including ProducersProducers and Non-Producers who purchased oror planted Viptera or Duracade.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

496. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the China export market. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

497. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Arizona Plaintiffs and other U.S. ProducersProducers and Non-Producers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

498. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Arizona Plaintiffs.

499. Arizona Plaintiffs are thus entitled to damages, plus their attorney's fees and costs incurred in this action. A.R.S. § 44-1534. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

500. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Arizona Plaintiffs' interests. Punitive damages are thus warranted.

Count 21 - Negligence
(On Behalf of Arkansas Plaintiffs)

501. Arkansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

502. Syngenta owed its stakeholders, including Arkansas Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

503. Syngenta breached that duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channeling those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

504. Syngenta's negligence proximately caused harm to Arkansas Plaintiffs.

505. Arkansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

506. In light of the surrounding circumstances, Syngenta knew or ought to have known that its conduct would naturally and probably result in injury and damage to others, including the Arkansas Plaintiffs. Syngenta continued such conduct in reckless disregard of the consequences. Punitive damages are thus warranted.

Count 22 – Trespass to Chattels
(On Behalf of Arkansas Plaintiffs)

507. Arkansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

508. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Arkansas Plaintiffs had

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

possession and/or possessory rights.

509. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Arkansas Plaintiffs' corn through contamination in fields and/or grain elevators and other modes of storage and transport.

510. As a result of the trespass, these Arkansas Plaintiffs' chattels were impaired as to condition, quality, or value, and Arkansas Plaintiffs were damaged.

511. Arkansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

512. In light of the surrounding circumstances, Syngenta knew or ought to have known that its conduct would naturally and probably result in injury and damage. Syngenta continued such conduct in reckless disregard of the consequences. Punitive damages are thus warranted.

Count 23 – Tortious Interference
(On Behalf of Arkansas Plaintiffs)

513. Arkansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

514. Arkansas Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

515. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

516. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

517. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Arkansas Plaintiffs' fields, storage units, equipment, grain

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

elevators, and other facilities of the U.S. supply chain, constituting a trespass, and interference with Arkansas Plaintiffs' use of their property and in violation of Syngenta's duty of care.

518. Syngenta's interference has proximately caused damage to Arkansas Plaintiffs.

519. Arkansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, including butnot limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

520. In light of the surrounding circumstances, Syngenta knew or ought to have known that its conduct would naturally and probably result in injury and damage. Syngenta continued such conduct in reckless disregard of the consequences. Punitive damages are thus warranted.

Count 24 - Private Nuisance
(On Behalf of Arkansas Plaintiffs)

521. Arkansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

522. Syngenta's actions constitute a private nuisance to Arkansas Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet use and enjoyment of Arkansas Plaintiffs and and/or property interests.

523. Syngenta's actions proximately caused damage to Arkansas Plaintiffs.

524. Arkansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

525. In light of the surrounding circumstances, Syngenta knew or ought to have known that its conduct would naturally and probably result in injury and damage. Syngenta continued such conduct in reckless disregard of the consequences. Punitive damages are thus warranted.

Count 2525 - Negligence

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

(On Behalf of the California Plaintiffs)

526. California Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

527. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

528. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to California Plaintiffs and, to use ordinary care in the timing, scope and terms under which it commercialized Viptera and Duracade.

529. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera and Duracade herein.

a. channel those products;

b. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

c. Distributing misleading information about the importance of the Chinese market; and

d. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

530. Syngenta's breach is the direct and proximate cause of the damage suffered by California Plaintiffs.

531. China's rejection of U.S. corn would not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which would not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait would not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

532. California Plaintiffs suffered injury and property damage by the sale and distribution of Viptera and Duracade by Syngenta as outlined herein and seek compensatory damages. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market. California Plaintiffs also seek all costs and fees allowed by law.

533. California Plaintiffs further seek punitive damages. As described above, Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including California Plaintiffs. Punitive damages are thus warranted.

Count 26 - Trespass to Chattels
(On Behalf of California Plaintiffs)

534. California Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

535. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and Duracade into contact with and contaminated non-Viptera/Duracade corn in which California Plaintiffs has possessory rights.

536. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate California Plaintiffs' corn through

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

contamination in fields and/or grain elevators and other modes of storage and transport.

537. As a result of the trespass, California Plaintiffs' suffered injury. California Plaintiffs' chattels were contaminated and impaired as to condition, quality or value and California Plaintiffs' rights in the chattels were thus diminished.

538. California Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

539. As described above, Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including California Plaintiffs. Punitive damages are thus warranted.

Count 27 - Tortious Interference with Prospective Economic Advantage
(On Behalf of California Plaintiffs)

540. California Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

541. California Plaintiffs had economic relationships with third-party purchasers of corn and the substantial probability of future economic benefit to California Plaintiffs as a result of these economic relationships.

542. Syngenta had knowledge of such economic relationships and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the economic relationships existed.

543. Syngenta's conduct was intentional and was done with the intent to disrupt the relationship between California Plaintiffs and purchasers of corn. Further, Syngenta's conduct was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated California Plaintiffs' fields,

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass, and interference with California Plaintiffs' use of their property and in violation of Syngenta's duty of care.

544. As a result of Syngenta's intentional interference, the economic relationships between California Plaintiffs and the corn purchasers were disrupted and California Plaintiffs suffered economic harm.

545. Syngenta's interference is the direct and proximate cause of the damage to California Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

546. California Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

547. As described above, Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including California Plaintiffs. Punitive damages are thus warranted.

Count 28 – Private Nuisance
(On Behalf of California Plaintiffs)

548. California Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

549. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

550. Syngenta's conduct was intentional and unreasonably interfered with California Plaintiffs' use and enjoyment of their real property.

551. The interference with California Plaintiffs' use and enjoyment of their property interests caused by Syngenta's contamination of both California Plaintiffs' corn supply, and the U.S. corn supply, is substantial, unreasonable, and ongoing. California Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for California Plaintiffs' corn, reduced prices for California Plaintiffs' corn, and diminution in the value of California Plaintiffs' corn harvesting.

552. Syngenta's actions are the direct and proximate cause of the damage to California Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

553. California Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

554. As described above, Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including California Plaintiffs. Punitive damages are thus warranted.

Count 29 - Negligence
(On Behalf of Colorado Plaintiffs)

555. Colorado Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

556. Syngenta owed a duty of at least reasonable care to its stakeholders, including Colorado Plaintiffs in the timing, scope, and terms under which it commercialized MIR162.

557. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

558. Syngenta's negligence directly and proximately caused harm to Colorado Plaintiffs.

559. Colorado Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

560. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of Colorado Plaintiffs. Punitive damages are therefore warranted.

Count 30 - Trespass to Chattels
(On Behalf of Colorado Plaintiffs)

561. Colorado Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

562. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally brought those varieties into contact with non-Viptera/Duracade corn. This contact caused a harmful interference with the physical condition of chattels in which Colorado Plaintiffs had possession and/or possessory rights.

563. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with these Colorado Plaintiffs' corn through contamination in fields

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or in grain elevators and other modes of storage and transport. Syngenta intended to intermeddle with the corn in which these Colorado Plaintiffs had possession and/or possessory rights.

564. Syngenta's trespass proximately caused damage to Colorado Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

565. Colorado Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

566. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of Colorado Plaintiffs. Punitive damages are therefore warranted.

Count 31 - Colorado Consumer Protection Act
(On Behalf of Colorado Plaintiffs)

567. Colorado Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

568. Under the Colorado Consumer Protection Act ("CCPA"), "deceptive trade practices," made unlawful, include:

a. "Knowingly mak[ing] a false representation as to the . . . approval . . . of goods." Colo. Rev. Stat. § 6-1-105 (b).

b. "Knowingly mak[ing] a false representation as to the characteristics, ingredients, uses, benefits, alterations, or quantities of goods, food, services, or property or a false representation as to the sponsorship, approval, status, affiliation, or connection of a person therewith." Id. § 6-1-105 (d).

c. "Fail[ing] to disclose material information concerning goods, services, or property which information was known at the time of an advertisement or sale if such failure to disclose such information was intended to induce the consumer to enter into the transaction." Id. § 6-1-105(u).

569. The CCPA provides a private cause of action to "any person" who was: "(a) an actual or potential consumer of the defendant's goods, services, or property, who is injured as a result of a deceptive trade practice; (b) a successor in interest to an actual consumer who

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

purchased the defendant's goods, services, or property, or (c) injured as the result of a deceptive trade practice in the course of the individual's business or occupation." Colo. Rev. Stat. § 6-1-113.

570. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving Producers and Non-Producers and to induce Producers and Non-Producers to purchase Viptera and/or Duracade corn seed or corn. In addition, Colorado Plaintiffs who did not purchase Viptera and/or Duracade were also damaged in the course of their business or occupation due to Syngenta's false and deceptive representations regarding Viptera and/or Duracade.

571. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including Colorado Plaintiffs (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Agrisure Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, and its own status within that process for MIR162, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to its consequences.

572. Syngenta also submitted its MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets.…" Based on Syngenta's

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

573. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

574. Syngenta failed to disclose material information to Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would delay China's approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place to isolate or channel Viptera or Duracade and the very high

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

575. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including thousands of Colorado corn farmers. Those corn farmers lack the sophistication and bargaining power in matters concerning genetically modified products.

576. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which corn farmers, including Colorado Plaintiffs, do not have access.

577. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

578. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 and 2012 growing seasons, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

579. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers would be harmed.

580. Syngenta knew that Producers and Non-Producers are affected by its business and depend on it for responsible commercialization practices.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

581. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

582. Syngenta's deceptive trade practices have previously impacted Colorado Plaintiffs, including those who purchased and/or planted Viptera and/or Duracade seed or corn.

583. Syngenta's deceptive trade practices previously impacted actual or potential consumers of its products through the loss of the China export market. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

584. Syngenta's deceptive trade practices constitute a violation of Colo. Rev. Stat. §§ 6-1-105 (b), (d) & (u). Colorado Plaintiffs, including purchasers and non-purchasers of Viptera and/or Duracade, were injured in the course of their business or occupation as the result of Syngenta's deceptive trade practices.

585. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional and taken in bad faith.

586. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Colorado Plaintiffs.

587. Colorado Plaintiffs are thus entitled to damages in a sum equal to three times the amount of actual damages they sustained, plus their attorney's fees and costs incurred in this action. Colo. Rev. Stat. § 6-1-113(2). These damages include but are not limited to damaged corn

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

crops and reduced corn prices based on the inability to sell corn to the Chinese market.

588. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of Colorado Plaintiffs. Punitive damages are therefore warranted.

Count 32 - Negligence
(On Behalf of Connecticut Plaintiffs)

589. Connecticut Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

590. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

591. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and/or Duracade in a manner that would foreseeably cause harm to Connecticut Plaintiffs, and to use ordinary care in the timing, scope and terms under which it commercialized Viptera and Duracade.

592. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera and Duracade as outlined herein.

593. Specifically, Syngenta breached these duties by its acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

594. Syngenta's breach is the direct and proximate cause of the damage suffered by Connecticut Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

595. China's rejection of U.S. corn would not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which could not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

596. Connecticut Plaintiffs suffered injury and property damage by the sale and distribution of Viptera and Duracade by Syngenta as outlined herein and seek compensatory damages. Connecticut Plaintiffs also seek all costs and fees allowed by law.

597. As described above, Syngenta's conduct amounted to reckless indifference to the rights of Connecticut Plaintiffs or an intentional and wanton violation of those rights. Further, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the

Hennepin County, MN

rights and safety of others, specifically, Connecticut Plaintiffs. Punitive damages are thus warranted.

Count 33 - Trespass to Chattels
(On Behalf of Connecticut Plaintiffs)

598. Connecticut Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

599. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally brought those varieties into contact with and contaminated non-Viptera/Duracade corn. This contact caused a harmful interference with the physical condition of chattels in which Connecticut Plaintiffs had possession and/or possessory rights.

600. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate Connecticut Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport. Syngenta intended to intermeddle with the corn in which Connecticut Plaintiffs had possession and/or possessory rights.

601. As a result of the trespass, Connecticut Plaintiffs' suffered injury. Connecticut Plaintiffs' chattels were contaminated and impaired as to condition, quality or value and Connecticut Plaintiffs' rights in the chattels were thus diminished.

602. Syngenta's trespass proximately caused damages to Connecticut Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

603. Connecticut Plaintiffs are thus entitled to compensatory damages and all fees and costs permitted by law.

604. As described above, Syngenta's conduct amounted to reckless indifference to the rights of Connecticut Plaintiffs or an intentional and wanton violation of those rights. Further, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, the Connecticut Plaintiffs. Punitive damages are thus warranted.

Count 34 - Tortious Interference with Business Expectancies
(On Behalf of Connecticut Plaintiffs)

605. Connecticut Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

606. Connecticut Plaintiffs had valid contracts and/or beneficial business relationships and expectancies with third-party purchasers of corn, and a reasonable expectancy of the continuance of such contracts and relationships.

607. Syngenta had knowledge of such contracts and/or relationships/expectancies or knowledge of facts and circumstances that would lead a reasonable person to believe that the contract and/or relationship/expectancy existed.

608. Syngenta's conduct, as described above, constituted an intentional interference and induced or caused a breach of the contracts and/or termination of the relationships or expectancies.

609. Syngenta was not a party to the contracts or business relationships between Connecticut Plaintiffs and third-party purchasers of corn.

610. Syngenta intentionally induced or caused a disruption of those contracts and/or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

relationships/expectancies without justification or privilege.

611. Syngenta's conduct was intentional, and was improper as to motive or means, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Connecticut Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass, and interference with Connecticut Plaintiffs' use of their property and in violation of Syngenta's duty of care.

612. Syngenta's interference is the direct and proximate cause of the damage to Connecticut Plaintiffs.

613. Connecticut Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

614. As described above, Syngenta's conduct amounted to reckless indifference to the rights of Connecticut Plaintiffs or an intentional and wanton violation of those rights. Further, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Connecticut Plaintiffs. Punitive damages are thus warranted.

Count 35 – Private Nuisance
(On Behalf of Connecticut Plaintiffs)

615. Connecticut Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

616. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

617. Syngenta's conduct was intentional and unreasonably interfered with Connecticut Plaintiffs' use and enjoyment of their real property. Alternatively, Syngenta's conduct in creating the nuisance, as described above, was negligent.

618. The interference with Connecticut Plaintiffs' use and enjoyment of their property interests, caused by Syngenta's contamination of both Connecticut Plaintiffs' corn supply, and the U.S. corn supply, is substantial, unreasonable, and ongoing. Connecticut Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Connecticut Plaintiffs' corn, reduced prices for Connecticut Plaintiffs' corn, and diminution in the value of the Connecticut Plaintiffs' corn harvesting.

619. Syngenta's actions are the direct and proximate cause of the damage to Connecticut Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

620. Connecticut Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

Count 36 - Connecticut Unfair Trade Practices Act
(On Behalf of Connecticut Plaintiffs)

621. Connecticut Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

622. Under C.G.S.A §§ 42-110a through 42-110q, the Connecticut Unfair Trade Practices Act ("CUTPA"), "[n]o person shall engage in unfair methods of competition and unfair

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

or deceptive acts or practices in the conduct of any trade or commerce." C.G.S.A. § 42-110b(a).

623. Syngenta's deceptive and unfair trade practices constitute a violation of C.G.S.A. § 42-110b(a).

624. The CUTPA provides for a private cause of action. "Any person who suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment of a method, act or practice prohibited by section 42-110b, may bring an action in the judicial district in which the plaintiff or defendant resides or has his principal place of business or is doing business, to recover actual damages." C.G.S.A. § 42-110g(a).

625. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving Connecticut Plaintiffs, and to induce corn farmers, including some Connecticut Plaintiffs, to purchase Viptera and Duracade seed or corn.

626. Syngenta knowingly made false and deceptive representations that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

627. Syngenta further concealed, suppressed, or omitted material facts in connection with its sale and advertisement of Viptera and Duracade, with the intent that Connecticut Plaintiffs rely on the concealment, suppression, and omissions.

628. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

629. As described above, Syngenta also submitted a MIR162 Deregulation Petition that

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets…." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

630. As described above, Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

631. Syngenta also failed to disclose material information to Connecticut Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

632. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and in connection with its sale and advertisement of Viptera and/or Duracade and caused damage to a large portion of the public, including Connecticut Producers and Non-Producers, who lack the sophistication and bargaining power in matters concerning genetically modified products.

633. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Connecticut Plaintiffs did not have access.

634. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Connecticut Plaintiffs.

635. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

636. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Connecticut Plaintiffs would be harmed.

637. Syngenta knew that Producers and Non-Producers like Connecticut Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

638. In equity and good conscience, Syngenta had a duty to disclose the truth – that

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

639. Syngenta's deceptive trade practices have previously impacted Connecticut Plaintiffs, as well as others, including Producers and Non-Producers who purchased and/or planted Viptera and/or Duracade seed or corn.

640. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the China export market. Syngenta's deceptive practices have a significant potential to further disrupt the corn export market in the future.

641. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Connecticut Plaintiffs and other U.S. Producers and Non-Producers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

642. Connecticut Plaintiffs were harmed by Syngenta's misrepresentations and omissions and Syngenta's deceptive trade practices thus directly and proximately caused an injury in fact to a legally protected interest belonging to Connecticut Plaintiffs.

643. Connecticut Plaintiffs are thus entitled to damages, plus their attorney's fees and costs incurred in this action. C.G.S.A. § 42-110g(a) & (d), including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

644. Syngenta's conduct amounted to reckless indifference to the rights of Connecticut

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Plaintiffs or an intentional and wanton violation of those rights. Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Connecticut Plaintiffs. Punitive damages are thus warranted. C.G.S.A. § 42-110g(a).

Count 37 - Negligence
(On Behalf of Delaware Plaintiffs)

645. Delaware Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

646. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

647. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to Delaware Plaintiffs, to use ordinary care in the timing, scope and terms under which it commercialized Viptera and Duracade.

648. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera and Duracade.

649. Specifically, Syngenta breached these duties by its acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

650. Syngenta's breach is the direct and proximate cause of the damage suffered by Delaware Plaintiffs.

651. China's rejection of U.S. corn would not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which could not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

652. Delaware Plaintiffs suffered injury and property damage by the sale and distribution of Viptera and Duracade by Syngenta as outlined herein and seek compensatory damages. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market. Delaware Plaintiffs also seek all costs and fees allowed by law.

653. As described above, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Delaware Plaintiffs.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Punitive damages are thus warranted.

Count 38 - Trespass to Chattels
(On Behalf of Delaware Plaintiffs)

654. Delaware Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

655. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally brought those varieties into contact with and contaminated non-Viptera/Duracade corn. This contact caused a harmful interference with the physical condition of chattels in which Delaware Plaintiffs had possession and/or possessory rights.

656. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate Delaware Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport. Syngenta intended to intermeddle with the corn in which these Deleware Plaintiffs had possession and/or possessory rights.

657. As a result of the trespass, Delaware Plaintiffs' suffered injury. Delaware Plaintiffs' chattels were contaminated and impaired as to condition, quality, or value and Delaware Plaintiffs' rights in the chattels were thus diminished.

658. Syngenta's trespass proximately caused damage to Delaware Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

659. Delaware Plaintiffs are thus entitled to compensatory damages and all fees and costs permitted by law.

660. As described above, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

regard to consequences, or of the rights and safety of others, specifically, Delaware Plaintiffs. Punitive damages are thus warranted.

Count 39 - Tortious Interference with Prospective Business Relations
(On Behalf of Delaware Plaintiffs)

661. Delaware Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

662. Delaware Plaintiffs had substantial probabilities of business opportunities with third-party purchasers of corn, and a reasonable expectancy of the continuance of such relations and opportunities.

663. Syngenta had knowledge of such relations and opportunities and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the opportunities existed.

664. Syngenta's conduct, as described above, constituted an intentional interference with such opportunities. Syngenta's conduct induced or caused purchasers of corn not to enter in to or continue business relationships with Delaware Plaintiffs and/ or prevented Delaware Plaintiffs from acquiring or continuing the prospective relations with purchasers of corn.

665. Syngenta was not a party to the business relationships between Delaware Plaintiffs and third-party purchasers of corn.

666. Syngenta intentionally induced or caused a disruption of that expectancy without justification or privilege. Syngenta's conduct did not fall under its privilege to compete or protect its business interests in a fair and lawful manner.

667. Syngenta's conduct was intentional, and was improper as to motive or means, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Deleware Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

trespass, and interference with Deleware Plaintiffs' use of their property and in violation of Syngenta's duty of care.

668. Syngenta's interference is the direct and proximate cause of the damage to Delaware Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

669. Delaware Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

670. As described above, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Delaware Plaintiffs. Punitive damages are thus warranted.

Count 40 - Nuisance
(On Behalf Delaware Plaintiffs)

671. Delaware Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

672. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

673. Syngenta's conduct was intentional and unreasonably interfered with Delaware Plaintiffs' use and enjoyment of their real property.

674. The interference with Delaware Plaintiffs' use and enjoyment of the property interests, caused by Syngenta's contamination of both Delaware Plaintiffs' corn supply, and the

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

U.S. corn supply, is substantial, unreasonable, and ongoing. Delaware Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Delaware Plaintiffs' corn, reduced prices for Delaware Plaintiffs' corn, and diminution in the value of Delaware Plaintiffs' corn harvesting.

675. Syngenta's actions are the direct and proximate cause of the damage to Delaware Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

676. Delaware Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

677. As described above, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Delaware Plaintiffs. Punitive damages are thus warranted.

Count 41 - Delaware Consumer Fraud Act
(On Behalf of Delaware Plaintiffs)

678. Delaware Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

679. Under D.C.A. tit. 6, §§2511 through 2527, Delaware Consumer Fraud Act ("DCFA"), "[t]he act, use or employment by any person of any deception, fraud, false pretense, false promise, misrepresentation, or the concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale, lease or advertisement of any merchandise, whether or not any person has in fact been misled, deceived or damaged thereby, is an unlawful practice." D.C.A. tit. 6, § 2513.

680. Syngenta's deceptive and unconscionable trade practices constitute a violation of D.C.A. tit. 6, § 2513.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

681. The DCFA provides for a private cause of action. "A private cause of action shall be available to any victim of a violation of this subchapter." D.C.A. tit. 6, § 2525.

682. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving Producers and Non-Producers and to induce Producers and Non-Producers, including Delaware Plaintiffs to purchase Viptera and Duracade.

683. Syngenta knowingly made false and deceptive representations that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

684. Syngenta's conduct, in connection with its sale and advertisement of Viptera and Duracade constituted deception, fraud, and false pretense.

685. Syngenta further concealed, suppressed, or omitted material facts in connection with its sale and advertisement of Viptera and Duracade, with the intent that Delaware Plaintiffs rely on the concealment, suppression, and omissions.

686. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

687. As described above, Syngenta also submitted its MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets…." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

688. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

689. Syngenta also failed to disclose material information to corn farmers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

690. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and in connection with its sale and advertisement of Viptera and/or Duracade and caused damage to a large portion of the public, including Delaware Producers and Non-Producers, who lack the sophistication and bargaining

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

power in matters concerning genetically modified products.

691. As a developer of genetically modified products Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Delaware Plaintiffs did not have access.

692. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

693. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

694. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Producers and Non-Producers would be harmed.

695. Syngenta knew that farmers like Delaware Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

696. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of loss of the Chinese market and/or prolonging the loss of that market.

697. Syngenta's deceptive trade practices have previously impacted Delaware Plaintiffs, as well as other Producers and Non-Producers, including those who purchased and planted Viptera and/or Duracade.

698. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the significant potential to further disrupt the corn export market in the future.

699. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Delaware Plaintiffs and other Producers and Non-Producers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

700. Syngenta's deceptive trade practices proximately caused actual damages and an injury in fact to a legally protected interest belonging to Delaware Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

701. Delaware Plaintiffs are thus entitled to damages, plus their costs incurred in this action. D.C.A. tit. 6, § 2525.

702. As described above, Syngenta's conduct amounted to fraud, malice, or willful and wanton conduct. Syngenta's actions and omissions were done heedlessly and recklessly, without regard to consequences, or of the rights and safety of others, specifically, Delaware Plaintiffs. Punitive damages are thus warranted.

Count 42 - Negligence
(On Behalf of Florida Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

703. Florida Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

704. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

705. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to Florida Plaintiffs, and to use ordinary care in the timing, scope, and terms under which it commercialized Viptera and Duracade.

706. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera and Duracade as outlined herein.

707. Specifically, Syngenta breached these duties by its acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

708. Syngenta's breach is the direct and proximate cause of the damage suffered by Florida Plaintiffs.

709. China's rejection of U.S. corn would not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which could not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

710. Florida Plaintiffs suffered injury and property damage by Syngenta's sale and distribution of Viptera and Duracade and seek compensatory damages. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market. Florida Plaintiffs also seek all costs and fees allowed by law.

711. Florida Plaintiffs further seek punitive damages. Syngenta's actions constitute intentional misconduct and/or gross negligence. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Florida Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Florida Plaintiffs.

Count 43 - Trespass to Personal Property

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

(On Behalf of Florida Plaintiffs)

712. Florida Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

713. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally brought those varieties into contact with and contaminated non-Viptera/Duracade corn. This contact caused a harmful interference with the physical condition of chattels in which Florida Plaintiffs had possession and/or possessory rights.

714. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate Florida Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport. Syngenta intended to intermeddle with the corn in which these Plaintiffs had possession and/or possessory rights.

715. As a result of the trespass, Florida Plaintiffs' suffered injury. Florida Plaintiffs' chattels were contaminated and impaired as to condition, quality or value and Florida Plaintiffs' rights in the chattels were thus diminished.

716. Syngenta's trespass was done without privilege or justification.

717. Syngenta's trespass proximately caused damage to Florida Plaintiffs.

718. Florida Plaintiffs are thus entitled to compensatory damages and all fees and costs permitted by law. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

719. Florida Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constitute intentional misconduct and/or gross negligence. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Florida Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

disregard or indifference to the rights of persons exposed to such conduct, including Florida Plaintiffs.

Count 44 - Tortious Interference with Business Relationships
(On Behalf of Florida Plaintiffs)

720. Florida Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

721. Florida Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

722. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

723. Syngenta was not a party to the business relationships between Florida Plaintiffs and third-party purchasers of corn.

724. Syngenta intentionally induced or caused a disruption of that expectancy without justification or privilege.

725. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass, and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

726. Syngenta's interference has proximately caused damage to Florida Plaintiffs.

727. Florida Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

728. Florida Plaintiffs further seek punitive damages. Syngenta's actions constitute intentional misconduct and/or gross negligence. Syngenta had actual knowledge of the

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

wrongfulness of its conduct and the high probability that injury or damage to Florida Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Florida Plaintiffs.

Count 45 - Nuisance
(On Behalf of Florida Plaintiffs)

729. Florida Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

730. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

731. Syngenta's conducts was intentional and unreasonably interfered with Florida Plaintiffs' use and enjoyment of their real property. At the very least, Syngenta's conduct, as described above, was negligent.

732. The interference with Florida Plaintiffs' use and enjoyment of their property interests, caused by Syngenta's contamination of both Florida Plaintiffs' corn supply and the U.S. corn supply, is substantial, unreasonable, and ongoing. Florida Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Florida Plaintiffs' corn crops, reduced prices for Florida Plaintiffs' corn crops, and diminution in the value of Florida Plaintiffs' corn harvesting.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

733. Syngenta's actions are the direct and proximate cause of the damage to Florida Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

734. Florida Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

735. Florida Plaintiffs further seek punitive damages. Syngenta's actions constitute intentional misconduct and/or gross negligence. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Florida Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Florida Plaintiffs.

Count 46 – Violation of Deceptive and Unfair Trade Practices Act
(On Behalf of Florida Plaintiffs)

736. Florida Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

737. Pursuant to Fla. Stat. §§ 501.201 through 501.213, Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"), "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." Fla. Stat. § 501.204(a).

738. Syngenta's deceptive and unconscionable trade practices constitute a violation of Fla. Stat. § 501.204(a).

739. The FDUTPA provides for a private cause of action. Fla. Stat. Ann. § 501.211.

740. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving Producers and Non-Producers and to induce Producers and Non-Producers, including some Florida Plaintiffs, to purchase Viptera and Duracade.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

741. Syngenta knowingly made false and deceptive representations that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

742. Syngenta's conduct, in connection with its sale and advertisement of Viptera and Duracade constituted deception, fraud, and false pretense.

743. Syngenta further concealed, suppressed, or omitted material facts in connection with its sale and advertisement of Viptera and Duracade, with the intent that Florida Plaintiffs rely on the concealment, suppression, and omissions.

744. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

745. As described above, Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's "Stewardship Agreements" requiring "channeling" would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

746. As described above, Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

747. Syngenta also failed to disclose material information to corn farmers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

748. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and in connection with its sale and advertisement of Viptera and/or Duracade and caused damage to a large portion of the public, including Florida Producers and Non-Producers, who lack the sophistication and bargaining power in matters concerning genetically modified products.

749. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Producers and Non-Producers, including Florida Plaintiffs, do not have access.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

750. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

751. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

752. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers, including Florida Plaintiffs, would be harmed.

753. Syngenta knew that Producers and Non-Producers like Florida Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

754. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

755. Syngenta's deceptive trade practices have previously impacted Florida Plaintiffs, as well as other Producers and Non-Producers, including those who purchased and/or planted Viptera and/or Duracade.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

756. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

757. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were unconscionable and done in bad faith.

758. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Florida Plaintiffs and others would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

759. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Florida Plaintiffs and actual damages to Florida Plaintiffs.

760. Florida Plaintiffs are thus entitled to their actual damages, plus their attorney fees and costs incurred in this action. Fla. Stat. § 501.211(b). These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market

761. Florida Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constitute intentional misconduct and/or gross negligence. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Florida Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct.

Count 47 - Negligence
(On Behalf of Georgia Plaintiffs)

762. Georgia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

763. Syngenta's acts or omissions, as described above and below, constitute negligence, negligence per se, or both.

764. As a product developer and manufacturer, Syngenta had a duty to refrain from selling and distributing Viptera and Duracade in a manner that would foreseeably cause harm to Georgia Plaintiffs and to use ordinary care in the timing, scope, and terms under which it commercialized Viptera and Duracade.

765. Syngenta breached these duties by failing to exercise reasonable care to prevent the foreseeable contamination of the U.S. corn supply through cross-pollination and commingling that would naturally result from the premature sale and distribution of Viptera as outlined herein.

766. Specifically, Syngenta breached these duties by its acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

767. Syngenta's breach is the direct and proximate cause of the damage suffered by Georgia Plaintiffs.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

768. China's rejection of U.S. corn would not have occurred without Syngenta's negligence in prematurely releasing Viptera corn seed without prior approval of major export partners because the commercialization of Viptera was solely under its management and control. Syngenta made the decision to commercialize Viptera knowing that it would likely contaminate the U.S. corn supply. Viptera in fact contaminated the U.S. corn supply, which would not have occurred without Syngenta's negligence. Syngenta had exclusive control over the commercialization of Viptera and this unapproved genetically modified trait could not have contaminated the U.S. corn supply in the absence of a lack of the exercise of proper care by Syngenta.

769. Georgia Plaintiffs suffered injury and property damage by the sale and distribution of Viptera and Duracade by Syngenta as outlined herein and seek compensatory damages. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market. Georgia Plaintiffs also seek all costs and fees allowed by law.

770. Georgia Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care that would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Georgia Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Georgia Plaintiffs.

Count 48 - Trespass to Chattels/Personality
(On behalf of Georgia Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

771. Georgia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

772. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally brought those varieties into contact with and contaminated non-Viptera/Duracade corn. This contact caused a harmful interference with the physical condition of chattels in which Florida Plaintiffs had possession and/or possessory rights.

773. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with and contaminate Georgia Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport. Syngenta intended to intermeddle with the corn in which these Plaintiffs had possession and/or possessory rights.

774. As a result of the trespass, Georgia Plaintiffs' suffered injury. Georgia Plaintiffs' chattels were contaminated and impaired as to condition, quality or value and Georgia Plaintiffs' rights in the chattels were thus diminished.

775. Syngenta's trespass was done without privilege or justification.

776. Syngenta's trespass proximately caused damage to Georgia Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

777. Georgia Plaintiffs are thus entitled to compensatory damages and all fees and costs permitted by law.

778. Georgia Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care which would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

damage to Georgia Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Georgia Plaintiffs.

Count 49 - Tortious Interference with Potential Business Relations
(On Behalf of Georgia Plaintiffs)

779. Georgia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

780. Georgia Plaintiffs had existing business relationships or potential business relations with third-party purchasers of corn.

781. Syngenta had knowledge of such relationships/potential relationships and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the contracts existed.

782. Syngenta was not a party to the existing and potential business relations between Georgia Plaintiffs and the third-party purchasers of corn.

783. Syngenta acted intentionally and purposely and with malice with the intent to injure Georgia Plaintiffs without justification or privilege.

784. Syngenta's conduct was intentional and was done with the intent to interfere with and disrupt the existing/potential business relations between Georgia Plaintiffs and third-party purchasers of corn and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass, and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

785. As a result of Syngenta's intentional interference, the existing/potential business relations between Georgia Plaintiffs and the corn purchasers were disrupted and/or never formed.

786. Syngenta's interference is the direct and proximate cause of the damage to Georgia Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

787. Georgia Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care that would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Georgia Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Georgia Plaintiffs.

Count 50 - Private Nuisance
(On Behalf of Georgia Plaintiffs)

788. Georgia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

789. Syngenta's actions constituted a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

790. Syngenta's conduct was intentional and unreasonably interfered with Georgia Plaintiffs' use and enjoyment of their real property. At the very least, Syngenta's conduct, as described above, was negligent.

791. The interference with Georgia Plaintiffs' use and enjoyment of their property interests, caused by Syngenta's contamination of both Georgia Plaintiffs' corn supply, and the U.S. corn supply, is substantial, unreasonable, and ongoing. Georgia Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Georgia Plaintiffs' corn crops, reduced prices for Georgia Plaintiffs' corn crops, and diminution in the value of Georgia Plaintiffs' corn harvesting.

792. Syngenta's actions are the direct and proximate cause of the damage to Georgia Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

793. Georgia Plaintiffs are thus entitled to an award of compensatory damages and all fees and costs permitted by law.

794. Georgia Plaintiffs further seek punitive damages. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care that would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Georgia Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Georgia Plaintiffs.

Count 51 - Violation of Fair Business Practice Act
(On Behalf of Georgia Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

795. Georgia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

796. Pursuant to Ga. Code Ann. §§ 10-1-390 through 10-1-407, Georgia Fair Business Practices Act ("GFBPA"), "[u]nfair or deceptive acts or practices in the conduct of consumer transactions and consumer acts or practices in trade or commerce are declared unlawful." Ga. Code § 10-1-393(a).

797. Unlawful acts under the GFBPA, include:

a. "Causing actual confusion or actual misunderstanding as to the source, sponsorship, approval, or certification of goods or services;" Ga. Code § 10-1-393(b)(2).

b. "Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he or she does not have;" Ga. Code § 10-1-393(b)(5).

798. Syngenta's deceptive and unfair trade practices constitute a violation of Ga. Code § 10-1-393(b)(2) & (5).

799. The GFBPA provides for a private cause of action. "Any person who suffers injury or damages as a result of a violation of Chapter 5B of this title, as a result of consumer acts or practices in violation of this part…or whose business or property has been injured or damaged as a result of such violations may bring an action individually…" Ga. Code § 10-1-399(a).

800. Georgia Plaintiffs have complied with the advance notice requirement in Ga. Code Ann. § 10-1-399(b). Georgia Plaintiffs provided Syngenta with a written demand for relief at least 30 days before filing this action, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied on and the injury suffered.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

801. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving Georgia Plaintiffs and to induce Producers and Non-Producers, including some Georgia Plaintiffs, to purchase Viptera and Duracade seed or corn.

802. Syngenta's conduct caused actual confusion or actual misunderstanding as to the source, sponsorship, approval, or certification of Viptera and Duracade.

803. Syngenta knowingly made false and deceptive representations that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

804. Syngenta further concealed, suppressed, or omitted material facts in connection with its sale and advertisement of Viptera and Duracade, with the intent that Georgia Plaintiffs rely on the concealment, suppression, and omissions.

805. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

806. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's "Stewardship Agreements" requiring "channeling" would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The Deregulation

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Petition was circulated to the public before commercialization and for the purpose of producing sales.

807. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

808. Syngenta also failed to disclose material information to Producers and Non-Producers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade.

809. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and in connection with its sale and advertisement of Viptera and/or Duracade and caused damage to a large portion of the public, including Georgia Producers and Non-Producers who lack the sophistication and bargaining power in matters concerning genetically modified products.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

810. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Georgia Plaintiffs, do not have access.

811. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

812. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

813. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Producers and Non-Producers would be harmed.

814. Syngenta knew that Georgia Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

815. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

816. Syngenta's deceptive trade practices have previously impacted Georgia Plaintiffs, as well as other Producers and Non-Producers, including those who purchased and planted Viptera and/or Duracade.

817. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the China export market. Syngenta's deceptive practices have the significant potential to further disrupt the corn export market in the future.

818. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Georgia Plaintiffs and others would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

819. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Georgia Plaintiffs.

820. Georgia Plaintiffs are thus entitled to three times the sum of their actual damages, plus their attorney's fees and costs incurred in this action. Ga. Code § 10-1-399. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

821. Georgia Plaintiffs further seek punitive damages. Syngenta's actions constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care that would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Georgia Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious

27-CV-15-13785
Filed in Fourth Judicial District Court

Hennepin County, MN

disregard or indifference to the rights of persons exposed to such conduct, including Georgia Plaintiffs.

Count 52 - Negligence
(On Behalf of Hawaii Plaintiffs)

822. Hawaii Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

823. Syngenta owed its stakeholders, including Hawaii Plaintiffs, a duty to use at least reasonable care in the timing, scope and terms under which it commercialized MIR162.

824. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

825. Syngenta's negligence directly and proximately caused harm to Hawaii Plaintiffs.

826. Hawaii Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

827. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Hawaii Plaintiffs and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 53 - Tortious Interference
(On Behalf of Hawaii Plaintiffs)

828. Hawaii Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

829. Hawaii Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

830. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

831. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

832. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass, and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

833. Syngenta's interference has proximately caused damage to Hawaii Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

834. Hawaii Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

27-CV-15-13785

835. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Hawaii Plaintiffs. Punitive damages are thus warranted.

Count 54 – Hawaii Uniform Deceptive Trade Practice Act
(On Behalf of Hawaii Plaintiffs)

836. Hawaii Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

837. Under Hi. Rev. Stat. §§ 480-2, 481A and 481A-3, the Hawaii Unfair and Deceptive Trade Practices Act ("UDTPA"), "[u]nfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful." Hi. Rev. Stat. § 480-2.

838. Unlawful acts under the UDTPA, include when one, in the course of business:

a. "Causes likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;" Hi. Rev. Stat. § 481A-3(a)(2).

b. "Causes likelihood of confusion or of misunderstanding as to affiliation, connection, or association with, or certification by another;" Hi. Rev. Stat. § 481A-3(a)(3).

c. "Uses deceptive representations or designations of origin in connection with goods or services;" Hi. Rev. Stat. § 481A-3(a)(4).

d. "Represents that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;" Hi. Rev. Stat. § 481A-3(a)(5).

e. "Represents that goods or services are of a particular standard, quality, grade, or that goods are of a particular style or model, if they are of another;" Hi. Rev. Stat. § 481A-3(a)(7).

f. "Engages in any other conduct which similarly creates a likelihood of confusion or of misunderstanding." Hi. Rev. Stat. § 481A-3 (a)(12).

839. Syngenta's deceptive and unfair trade practices constitute a violation of Hi. Rev. Stat. § 481A.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

840. The UDTPA provides for a private cause of action. "No person other than a consumer, the attorney general or the director of the office of consumer protection may bring an action based upon unfair or deceptive acts or practices declared unlawful by this section." § 480-2(d).

841. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn farmers and to induce corn farmers, including Hawaii Plaintiffs, to purchase Viptera and Duracade.

842. Syngenta's conduct caused confusion and misunderstanding as to the source, sponsorship, approval, or certification of Viptera and Duracade.

843. Syngenta knowingly made false and deceptive representations that Viptera and Duracade had sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they did not have.

844. Syngenta further concealed, suppressed, or omitted material facts in connection with its sale and advertisement of Viptera and Duracade, with the intent that Hawaii Plaintiffs rely on the concealment, suppression, and omissions.

845. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

846. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's "Stewardship Agreements" requiring "channeling" would be

approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

856. Syngenta's deceptive trade practices have previously impacted Hawaii Plaintiffs, as well as other Producers and Non-Producers, including those who purchased and/or planted Viptera and/or Duracade seed or corn.

857. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the significant potential to further disrupt the corn export market in the future.

858. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Hawaii Plaintiffs and other U.S. Producers and Non-Producers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

859. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Hawaii Plaintiffs.

860. Syngenta's deceptive trade practices also violated Hawaii law governing the regulation of sale of seeds in that a false and misleading advertisement was made and used with respect to Viptera and Duracade. Hi. Rev. Stat. § 150-23(2).

861. Hawaii Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

862. Hawaii Plaintiffs are thus entitled to costs and attorneys' fees as well as any other relief the court considers reasonable. Hi. Stat. Rev. § 481A-4. These damages include but are not

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

863. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care which would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to the Hawaii Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including the Hawaii Plaintiffs. Punitive damages are thus warranted.

Count 55 - Private Nuisance
(On Behalf of Hawaii Plaintiffs)

864. Hawaii Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

865. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera corn. Syngenta licensed, sold, and distributed Viptera corn without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

866. Syngenta's conducts was intentional and unreasonably interfered with Hawaii Plaintiffs' use and enjoyment of their real property. At the very least, Syngenta's conduct, as described above, was negligent.

867. The interference with Hawaii Plaintiffs' use and enjoyment of the property interests, caused by Syngenta's contamination of both Hawaii Plaintiffs' corn supply and the U.S.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

corn supply, is substantial, unreasonable, and ongoing. Hawaii Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Hawaii Plaintiffs' corn crops, reduced corn prices for Hawaii Plaintiffs' corn crops, and diminution in the value of the Hawaii Plaintiffs' corn harvesting.

868. Syngenta's actions are the direct and proximate cause of the damage to Hawaii Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

869. Hawaii Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest, and all fees and costs permitted by law.

870. Syngenta's actions, as described above, constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care which would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Hawaii Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Hawaii Plaintiffs. Punitive damages are thus warranted.

Count 56 - Trespass to Chattels
(On Behalf of Hawaii Plaintiffs)

871. Hawaii Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

872. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which the Hawaii Plaintiffs had possession and/or possessory rights.

873. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

874. As a result of the trespass, Plaintiffs' chattels were impaired as to condition, quality or value, and plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

875. Hawaii Plaintiffs are thus entitled to an award of compensatory damages and pre- and post- judgment interest.

876. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including Hawaii Plaintiffs. Punitive damages are thus warranted.

Count 57 - Negligence
(On Behalf of Idaho Plaintiffs)

877. Idaho Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

878. Syngenta owed its stakeholders, including Idaho Plaintiffs, a duty to use at least reasonable care in the timing, scope and terms under which it commercialized MIR162.

879. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

880. Syngenta's negligence directly and proximately caused harm to Idaho Plaintiffs.

881. Idaho Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

882. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Idaho Plaintiffs, and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 58 - Tortious Interference
(On Behalf of Idaho Plaintiffs)

883. Idaho Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

884. Idaho Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

885. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

886. Syngenta induced or caused a disruption of that expectancy without justification or privilege through its use of wrongful and deceptive means to sell the seed to consumers that

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

caused injury to the contractual and business relationships of Idaho Plaintiffs because Viptera and Duracade were not approved in the markets that Syngenta stated it would be approved in, namely China.

887. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass, and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

888. Syngenta's interference has proximately caused damage to Idaho Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

889. Idaho Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

890. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Idaho Plaintiffs. Punitive damages are thus warranted.

Count 59 - Idaho Consumer Protection Act
(On Behalf of Idaho Plaintiffs)

891. Idaho Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

892. Idaho Plaintiffs relied on deceptive trade acts or practices committed by Syngenta in violation of Idaho's Consumer Protection Act codified at I.C. § 48-603. Syngenta made deceptive representations under § 48-603(5) when it represented that Viptera and/or Duracade would have approval and acceptance status from China's export authorities, and that it was reasonable to buy and plant the seed for export to China.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

893. Syngenta had knowledge that its business practices concerning the sale of seed to consumers were deceptive in that Syngenta sold Viptera and Duracade by lying to consumers about the acceptability of its seed produce in export markets, specifically China. Deceptive practices and acts include lying to consumers that the approval process for Viptera was already underway and that Syngenta's application had already been submitted to China at the time of the sale to consumers. Such a deceptive practice infiltrated the sale of seed to consumers in Idaho and was done with knowledge that such false information would induce consumers to purchase the seed.

894. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, and was intentional.

895. Syngenta's deceptive practices have proximately caused damage to Idaho Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

896. Idaho Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

897. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Idaho Plaintiffs. Punitive damages are thus warranted.

Count 60 - Trespass to Chattels
(On Behalf of Idaho Plaintiffs)

898. Idaho Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

899. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which the Idaho Plaintiffs had possession and/or possessory rights.

900. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn, grain elevators and other modes of storage and transport.

901. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

902. Idaho Plaintiffs are thus entitled to an award of compensatory damages and pre- and post- judgment interest.

903. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including the Idaho Plaintiffs. Punitive damages are thus warranted.

Count 61 - Private Nuisance
(On Behalf of Idaho Plaintiffs)

904. Idaho Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

905. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera. Syngenta licensed, sold, and distributed Viptera without regard for the cross-pollination that results when Viptera corn pollen drifts to neighboring, non-Viptera fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting equipment, and transportation facilities and equipment are contaminated with Viptera.

906. Syngenta's conducts was intentional and unreasonably interfered with Idaho Plaintiffs' use and enjoyment of their real property. At the very least, Syngenta's conduct was

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

negligent.

907. The interference with Idaho Plaintiffs' use and enjoyment of the property interests, caused by Syngenta's contamination of both the Idaho Plaintiffs' corn supply and the U.S. corn supply, is substantial, unreasonable, and ongoing. Idaho Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for Idaho Plaintiffs' corn crops, reduced prices for Idaho Plaintiffs' corn crops, and diminution in the value of the Idaho Plaintiffs' corn harvesting.

908. Syngenta's actions are the direct and proximate cause of the damage to Idaho Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

909. Idaho Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest, and all fees and costs permitted by law.

910. Syngenta's actions constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care which would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to the Idaho Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Further, Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including the Idaho Plaintiffs. Punitive damages are thus warranted.

Count 62 - Negligence
(On Behalf of Illinois Plaintiffs)

911. Illinois Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

912. Syngenta owed a duty of at least reasonable care to its stakeholders, including Illinois Plaintiffs in the timing, scope, and terms under which it commercialized MIR162.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

913. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program, which ensured contamination of the U.S. corn supply;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channeling those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

914. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Illinois Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

915. Illinois Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

916. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including Illinois Plaintiffs. Punitive damages are thus warranted.

Count 63 - Trespass to Chattels
(On Behalf of Illinois Plaintiffs)

917. Illinois Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

918. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which Illinois Plaintiffs had possession and/or possessory rights.

919. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

920. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and Plaintiffs were damaged, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

921. Illinois Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

922. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including Illinois Plaintiffs. Punitive damages are thus warranted.

Count 64 - Illinois Consumer Fraud and Deceptive Business Practices Act
(On Behalf of Illinois Plaintiffs)

923. Illinois Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

924. Corn seed such as Viptera and Duracade is an object, good, and/or commodity constituting merchandise pursuant to 815 Ill. Comp. Stat. 505/1.

925. Syngenta engaged in numerous unfair acts or practices in the timing, scope, and terms under which it commercialized Viptera and Duracade including:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products; and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that planting Viptera and/or Duracade would lead to loss of the Chinese market.

926. Syngenta's practices, as set forth above, were unfair in that:

a. The practices offend public policy in that they were done negligently, were done in a manner that brought Viptera and/or Duracade in contact with Illinois Plaintiffs' corn thereby resulting in a trespass to chattels, and/or violated industry recognized stewardship obligations;

b. The practices were immoral, oppressive and unscrupulous in that they imposed no meaningful choice on Plaintiffs, imposed an unreasonable burden on the corn farming industry and was so oppressive as to leave corn farmers with little alternative but to submit to the practices. Corn farmers had no control over the closure of the Chinese market due to the commercialization of Viptera and Duracade; had no reasonable ability to prevent Viptera and Duracade from entering onto their land, into their corn or into the corn market, and had no reasonable ability to separately channel their corn and Viptera and Duracade; and

c. The practices caused unavoidable and substantial injury to Plaintiffs through the loss of the Chinese export market and reduced U.S. corn prices.

927. Syngenta's unfair practices and conduct was directed toward consumers of Viptera and Duracade as well as other corn producers. Syngenta intended consumers of Viptera and Duracade as well as other corn producers to rely on its acts and practices in commercializing and selling Viptera and Duracade as being done in a manner that would avoid negatively impacting corn export markets.

928. Syngenta's unfair practices occurred during the course of conduct involving trade or commerce, specifically the commercialization and sale of Viptera and Duracade.

929. Illinois plaintiffs incurred damages due to the loss of the Chinese import market and resulting drop in the price of corn due to Syngenta's unfair acts and practices.

930. The loss of the Chinese import market and resulting drop in corn prices was directly and proximately caused by Syngenta's unfair acts and practices.

931. Syngenta's conduct was addressed to the market generally and otherwise

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

implicates consumer protection concerns and, therefore, a consumer nexus exists in that:

a. Syngenta's acts and practices in commercializing and selling Viptera and Duracade corn were directed to all corn farmers generally; and

b. Syngenta's acts and practices otherwise implicate consumer protection concerns including, but not limited to, not unreasonably risking the availability and welfare of corn export markets or minimizing the potential for unwanted comingling of crops.

932. Illinois Plaintiffs are authorized to bring a private action under Illinois Consumer Fraud and Deceptive Businesses Practices Act pursuant to 815 Ill. Comp. Stat. 505/10(a).

933. Reasonable attorneys' fees and costs should be awarded pursuant to 815 Ill. Comp. Stat. 505/10a.

934. Syngenta's conduct was willful and intentional and done with evil motive or reckless indifference to the rights of others. Punitive damages are thus warranted.

Count 65 - Negligence
(On Behalf of Indiana Plaintiffs)

935. Indiana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

936. Syngenta owed a duty of at least reasonable care to its stakeholders, including Indiana Plaintiffs in the timing, scope, and terms under which it commercialized MIR162.

937. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

938. Syngenta's negligence directly and proximately caused harm and damages to Indiana Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

939. Indiana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

940. Syngenta willfully and wantonly subjected Indiana Plaintiffs to probable injury, with an awareness of such impending danger and with heedless indifference of the consequences. Punitive Damages are therefore warranted.

Count 66 - Trespass to Chattels
(On Behalf of Indiana Plaintiffs)

941. Indiana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

942. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought those varieties into contact with non-Viptera/Duracade corn in which Indiana Plaintiffs had possession and/or possessory rights.

943. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

944. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and these Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

market.

945. Indiana Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

946. Syngenta willfully and wantonly subjected Indiana Plaintiffs to probable injury, with an awareness of such impending danger and with heedless indifference of the consequences. Punitive Damages are therefore warranted.

Count 67 - Tortious Interference
(On Behalf Indiana Plaintiffs)

947. Indiana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

948. Indiana Plaintiffs had valid business relationships and reasonable expectancy of continued business relationships with purchasers of corn.

949. Syngenta had knowledge of such relationships and/or possessed knowledge of facts and circumstances that would lead a reasonable person to believe that such relationships existed.

950. Syngenta intentionally caused an interference with those business relationships.

951. Syngenta's interference was wrongful and illegal because, among other things, it was accomplished with fraud, was intentional, and contaminated fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

952. Syngenta's interference proximately caused damage to Indiana Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

953. Indiana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

954. Syngenta willfully and wantonly subjected Indiana Plaintiffs to probable injury,

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

with an awareness of such impending danger and with heedless indifference of the consequences. Punitive damages are therefore warranted.

Count 68 - Negligence
(On Behalf of Iowa Plaintiffs)

955. Iowa Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

956. Syngenta owed a duty of at least reasonable care to its stakeholders, including Iowa Plaintiffs in the timing, scope, and terms under which it commercialized MIR162.

957. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

958. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Iowa Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

959. Iowa Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

960. Syngenta's conduct was intentional and unreasonable in disregard of a known or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

obvious risk so great as to make it highly probably that harm would follow. Its conduct was willful, wanton, and in reckless disregard for the rights of others including Iowa Plaintiffs. Thus, punitive damages are warranted.

Count 69 - Trespass to Chattels
(On Behalf Iowa Plaintiffs)

961. Iowa Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

962. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Iowa Plaintiffs had possession and/or possessory rights.

963. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

964. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and Plaintiffs were damaged, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

965. Iowa Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

966. Syngenta's conduct was intentional and unreasonable in disregard of a known or obvious risk so great as to make it highly probably that harm would follow. Its conduct was willful, wanton, and in reckless disregard for the rights of others including Iowa Plaintiffs. Thus, punitive damages are warranted.

Count 70 - Negligence
(On Behalf of Kansas Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

967. Kansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

968. Syngenta owed a duty of at least reasonable care to its stakeholders, including Kansas Plaintiffs in the timing, scope, and terms under which it commercialized MIR162.

969. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

970. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Kansas Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

971. Kansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

972. Syngenta's conduct was malicious and constitutes a willful and wanton invasion of the rights of others, including Kansas Plaintiffs. Punitive damages are thus warranted.

Count 71 - Trespass to Chattels
(On Behalf of Kansas Plaintiffs)

973. Kansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

974. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Kansas Plaintiffs had possession and/or possessory rights.

975. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

976. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and Plaintiffs were damaged.

977. Kansas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

978. Syngenta's conduct was malicious and constitutes a willful and wanton invasion of the rights of others, including Kansas Plaintiffs. Punitive damages are thus warranted.

Count 72 - Private Nuisance
(On Behalf of Kansas Plaintiffs)

979. Kansas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

980. Syngenta's actions constitute a private nuisance to Kansas Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with Kansas Plaintiffs' quiet use and enjoyment of their land and/or property interests.

981. Syngenta's actions proximately caused damage to Kansas Plaintiffs, who are entitled to compensatory damages and pre- and post-judgment interest, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

982. Syngenta's conduct was intentional, willful, wanton, and with reckless disregard for the rights of Kansas Plaintiffs, and was grossly negligent and unreasonable. Punitive damages are thus warranted.

Count 73 - Negligence
(On Behalf Kentucky Plaintiffs)

983. Kentucky Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

984. Syngenta owed its stakeholders, including Kentucky Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

985. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

986. Syngenta's negligence proximately caused damages to Kentucky Plaintiffs, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

987. Syngenta acted with oppression, fraud, wantonness, and malice. Punitive damages

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

are therefore warranted.

Count 74 - Trespass to Chattels
(On Behalf of Kentucky Plaintiffs)

988. Kentucky Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

989. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Kentucky Plaintiffs had possession and/or possessory rights.

990. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

991. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality or value, and Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

992. Kentucky Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

993. Syngenta acted with oppression, fraud, wantonness, and malice. Punitive damages are therefore warranted.

Count 75 - Negligence
(On Behalf of Louisiana Plaintiffs)

994. Louisiana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

995. Syngenta owed its stakeholders, including Louisiana Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

996. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

997. Syngenta's negligence proximately caused damages to Louisiana Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

998. Louisiana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 76 - Damage to Movables
(On Behalf of Louisiana Plaintiffs)

999. The Louisiana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1000. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which Louisiana Plaintiffs had possession and/or possessory rights.

1001. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1002. As a result, these Plaintiffs' chattels were impaired as to condition, quality, or value, and Lousiana Plaintiffs were damaged in their movables for which remedy is provided under La. Civ. Code art. 2315(A).

1003. The Louisiana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

Count 77 - Negligence
(On Behalf of Maine Plaintiffs)

1004. Maine Plaintiffs incorporate by reference paragraphs 1-299 as if fully alleged herein.

1005. Syngenta owed its stakeholders, including Maine Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1006. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1007. Syngenta's negligence directly and proximately caused harm to Maine Plaintiffs.

1008. Maine Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1009. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Maine Plaintiffs and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 78 - Tortious Interference
(On Behalf of Maine Plaintiffs)

1010. Maine Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1011. Maine Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1012. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1013. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1014. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

other facilities of the U.S. supply chain, constituting interference with Maine Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1015. Syngenta's interference has proximately caused damage to Maine Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1016. Maine Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1017. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Maine Plaintiffs. Punitive damages are thus warranted.

Count 79 - Maine Unfair Trade Practices Act
(On Behalf of Maine Plaintiffs)

1018. Maine Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1019. Under 5 M.R.S.A. § 207 of the Maine Unfair Trade Practices Act, unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful.

1020. Syngenta's deceptive trade practices in connection with the sale and advertisement of Viptera and Duracade constitute a violation of 5 M.R.S.A. § 207.

1021. The Maine Unfair Trade Practices Act provides a private cause of action against Syngenta in connection with Syngenta's violations of 5 M.R.S.A. § 207.

1022. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn Producers and Non-Producers and to induce Producers and Non-Producers, including Maine Plaintiffs, to purchase Viptera and Duracade.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1023. Syngenta's false and deceptive representations misled and deceived Maine Plaintiffs as to Viptera and Duracade's approval and/or certification. Syngenta further knowingly and recklessly represented that Viptera and Duracade had approval that it did not have.

1024. Syngenta's conduct created a substantial likelihood of confusion and misunderstanding, and misled, deceived, or damaged Maine Plaintiffs in connection with the sale or advertisement of Viptera and Duracade.

1025. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1026. Syngenta also submitted the MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

1027. Syngenta distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1028. Syngenta also failed to disclose material information to Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which caused delay in the regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolatiors or channeling Viptera or Duracade.

1029. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including Maine Plaintiffs, who lack the sophistication and bargaining power in matters concerning genetically modified products.

1030. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Maine Plaintiffs did not have access.

1031. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling of its genetically modified products, including Viptera and Duracade, which was not available to Producers and Non-Producers.

1032. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 growing season, and knew that systems were not in place for either isolating or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

1033. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers would be harmed.

1034. Syngenta knew that farmers like Maine Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

1035. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not imminent or indeed anticipated for (at least) the 2011 growing season, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchase and planting of Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

1036. Syngenta's deceptive trade practices have previously impacted Maine Plaintiffs and others, including Producers and Non-Producers who purchased or planted Viptera or Duracade.

1037. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the China export market. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1038. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional, and were taken in bad faith. Further, Syngenta knowingly concealed, suppressed, and omitted material facts with the intent that Maine Plaintiffs and other U.S. Producers and Non-Producers would rely on the concealment, suppression, or omission in connection with the sale and advertisement of Viptera and Duracade.

1039. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Maine Plaintiffs.

1040. Maine Plaintiffs are thus entitled to damages, plus their attorney's fees and costs incurred in this action. 5 M.R.S.A. § 213. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1041. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to Maine Plaintiffs' interests. Punitive damages are thus warranted.

Count 80 - Trespass to Chattels
(On Behalf of Maine Plaintiffs)

1042. Maine Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1043. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Maine Plaintiffs had possession and/or possessory rights.

1044. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1045. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality, or value, and Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1046. Maine Plaintiffs are thus entitled to an award of compensatory damages and pre- and post- judgment interest.

1047. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including Maine Plaintiffs. Punitive damages are thus warranted.

Count 81 - Negligence
(On Behalf of Maryland Plaintiffs)

1048. Maryland Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1049. Syngenta owed its stakeholders, including Maryland Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1050. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1051. Syngenta's negligence directly and proximately caused damages to Maryland Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1052. Maryland Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1053. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Maryland Plaintiffs and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 82 - Tortious Interference
(On Behalf of Maryland Plaintiffs)

1054. Maryland Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1055. Maryland Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1056. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1057. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1058. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities in the U.S. supply chain, in violation of Syngenta's duty of care.

1059. Syngenta's interference proximately caused damage to Maryland Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1060. Maryland Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1061. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Maryland Plaintiffs. Punitive damages are thus warranted.

Count 83 – Maryland Consumer Protection Act
(On Behalf of Maryland Plaintiffs)

1062. Maryland Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1063. Maryland Plaintiffs relied on deceptive trade acts or practices committed by Syngenta in violation of Maryland's Consumer Protection Act, MD Code, § 13-301 *et seq*. Syngenta made deceptive representations under § 13-301 when it represented China's timing of approval of Viptera and that it was reasonable to buy and plant the seed for export to China.

1064. Syngenta had knowledge that its business practices concerning the sale of seed to consumers were deceptive in that Syngenta sold its GMO seed by lying to consumers about the acceptability of its seed produce in export markets, specifically China. Deceptive practices and acts include lying to consumers that the approval process for GMO seed was already underway and that Syngenta's application had already been submitted to China at the time of the sale to consumers. Such a deceptive practice infiltrated the sale of seed to consumers in Maryland and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

was done with knowledge that such false information would induce consumers to purchase the seed.

1065. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, and was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities in the U.S. supply chain in violation of Syngenta's duty of care.

1066. Syngenta's deceptive practices have proximately caused damage to Maryland Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1067. Maryland Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1068. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Maryland Plaintiffs. Punitive damages are thus warranted.

Count 84 - Private Nuisance
(On Behalf of Maryland Plaintiffs)

1069. Maryland Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1070. Syngenta's actions constitute a private nuisance through the sale and distribution of Viptera and/or Duracade. Syngenta licensed, sold, and distributed Viptera and/or Duracade without regard for the cross-pollination that results when corn pollen drifts to neighboring, non-Viptera/Duracade fields. As a result, the entire U.S. corn farming and production chain, including, but not limited to, farmland, farming equipment, storage facilities, harvesting

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

equipment, and transportation facilities and equipment are contaminated with Viptera and/or Duracade.

1071. Syngenta's conducts was intentional and unreasonably interfered with Maryland Plaintiffs' use and enjoyment of their real property. At the very least, Syngenta's conduct, as described above, was negligent.

1072. The interference with Maryland Plaintiffs' use and enjoyment of their property interests, caused by Syngenta's contamination of the Maryland corn supply, and the U.S. corn supply, is substantial, unreasonable, and ongoing. Maryland Plaintiffs have suffered and continue to suffer injuries in the form of business losses because of reduced and/or restricted demand for corn crops, reduced corn prices, and diminution in the value of Maryland Plaintiffs' harvesting.

1073. Syngenta's actions are the direct and proximate cause of the damage to Maryland Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1074. Maryland Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1075. Syngenta's actions constituted willful misconduct, malice, fraud, wantonness, oppression, or an entire want of care which would raise the presumption of conscious indifference to consequences. Syngenta had actual knowledge of the wrongfulness of its conduct and the high probability that injury or damage to Maryland Plaintiffs would result and, despite that knowledge, intentionally pursued its course of conduct. Syngenta's conduct was so reckless or wanting in care that it constituted a conscious disregard or indifference to the rights of persons exposed to such conduct, including Maryland Plaintiffs. Punitive damages are thus warranted.

Count 85 - Trespass to Chattels
(On Behalf of Maryland Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1076. Maryland Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1077. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which Maryland Plaintiffs had possession and/or possessory rights.

1078. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1079. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality, or value, and Maryland Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1080. Maryland Plaintiffs are thus entitled to an award of compensatory damages and pre- and post- judgment interest.

1081. Syngenta's conduct was willful, wanton, and in reckless disregard for the rights of others, including Maryland Plaintiffs. Punitive damages are thus warranted.

Count 86 – Negligence
(On Behalf of Massachusetts Plaintiffs)

1082. Massachusetts Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1083. Syngenta owed its stakeholders, including Massachusetts Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1084. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1085. Syngenta's negligence proximately caused harm to Massachusetts Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1086. Massachusetts Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 87 – Trespass to Chattels
(On Behalf of Massachusetts Plaintiffs)

1087. Massachusetts Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1088. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which Massachusetts Plaintiffs had possession and/or possessory rights.

1089. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Massachusetts Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1090. As a result of the trespass, Plaintiffs' chattels were impaired as to condition, quality, or value, and Massachusetts Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1091. Massachusetts Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

Count 88 – Tortious Interference with Advantageous Relations'
(On Behalf of Massachusetts Plaintiffs)

1092. Massachusetts Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1093. Massachusetts Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

1094. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1095. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1096. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

facilities in the U.S. supply chain, constituting a trespass and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1097. Syngenta had no legitimate interest in Massachusetts Plaintiffs' expectancy but alternatively, if it had such an interest, Syngenta employed wrongful means including without limitation, misrepresentations, nuisance, and trespass.

1098. As a direct and proximate result of Syngenta's conduct, Massachusetts Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1099. Massachusetts Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest.

1100. Syngenta's conduct showed a complete indifference to or conscious disregard of the rights of others, including Massachusetts Plaintiffs. Punitive damages are thus warranted.

Count 89 – Private Nuisance
(On Behalf of Massachusetts Plaintiffs)

1101. Massachusetts Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1102. Syngenta's actions constitute a private nuisance to Massachusetts Plaintiffs. By contaminating the U.S. corn supply, Syngenta has obstructed the free use of Massachusetts Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or comfortable enjoyment of their property.

1103. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of Massachusetts Plaintiffs' interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

conduct and knew that it would substantially interfere with Massachusetts Plaintiffs' comfortable enjoyment of their property and/or property interests.

1104. Syngenta's actions proximately caused damage to Massachusetts Plaintiffs. Massachusetts Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

Count 90 – Massachusetts Consumer Protection Act
(On Behalf of Massachusetts Plaintiffs)

1105. Massachusetts Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1106. The Massachusetts Consumer Protection Act provides that "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce…is unlawful." Mass. Gen. Laws ch. 93A, § 2(a). "Trade" and "commerce" includes "the sale…or distribution of any services and any property, tangible or intangible, real, personal or mixed, any security…any contract of sale of a commodity for future delivery, and any other article, commodity, or thing of value…any trade or commerce directly or indirectly affecting the people of this commonwealth." Mass. Gen. Laws ch. 93A, § 1(b).

1107. Syngenta engaged in numerous deceptive acts or practices in the timing, scope, and terms under which it commercialized Viptera and Duracade including:

a. Prematurely commercializing Viptera and Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market.

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1108. Syngenta also made numerous false and deceptive representations regarding the importance of the Chinese market and the timing of China's approval of Viptera and/or Duracade.

1109. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status for MIR162 in that process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1110. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

knowledge of the Chinese regulatory process and its knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

1111. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1112. Syngenta also failed to disclose material information to Producers and Non-Producers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1113. Syngenta engaged in these deceptions to sell and increase its sales of Viptera and/or Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and/or Duracade would disseminate into the U.S. corn supply and Producers and Non-Producers would be harmed.

1114. Syngenta knew that approval from China was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera and/or Duracade would disseminate throughout the U.S. corn supply.

1115. Syngenta knew that Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

1116. Syngenta's conduct, misrepresentations and omissions, were immoral, unethical, oppressive, or unscrupulous and possessed the tendency or capacity to mislead or create the likelihood of deception.

1117. Syngenta's unfair and deceptive practices occurred during the conduct of trade or commerce, specifically the commercialization and sale of Viptera and/or Duracade, affecting the people of the State of Massachusetts.

1118. These unfair and deceptive practices caused the injuries and damages sustained by Massachusetts Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1119. Moreover, Syngenta's acts, practices, and misrepresentations affect the public interest. Syngenta's misrepresentations were made to a large segment of the public and its conduct vitally affects a large segment of the public, including all Producers and Non-Producers, who

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

depend on the responsible stewardship practices of developers like Syngenta when commercializing genetically engineered products.

1120. Massachusetts Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, as well as costs and reasonable attorneys' fees. Mass. Gen. Laws ch. 93A, § 11.

1121. Syngenta's conduct was grossly negligent and evidenced a reckless disregard for the rights of others, including Massachusetts Plaintiffs, thereby justifying punitive damages.

Count 91 - Negligence
(On Behalf of Michigan Plaintiffs)

1122. Michigan Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1123. Syngenta owed its stakeholders, including Michigan Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1124. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1125. Syngenta's negligence proximately caused harm to Michigan Plaintiffs. These

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1126. Michigan Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 92 - Trespass to Chattels
(On Behalf of Michigan Plaintiffs)

1127. Michigan Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1128. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Michigan Plaintiffs had possession and/or possessory rights.

1129. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Michigan Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1130. As a result of the trespass, Plaintiffs' chattels were impaired as to condition, quality, or value, and Michigan Plaintiffs were damaged. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1131. Michigan Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

Count 93 - Negligence
(On Behalf of Mississippi Plaintiffs)

1132. Mississippi Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1133. Syngenta owed its stakeholders, including Mississippi Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1134. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and /or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1135. Syngenta's negligence proximately caused damages to Mississippi Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1136. Mississippi Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1137. Syngenta's conduct was grossly negligent and evidenced a reckless disregard for the rights of others, including Mississippi Plaintiffs, thereby justifying punitive damages.

Count 94 - Trespass to Chattels
(On Behalf of Mississippi Plaintiffs)

1138. Mississippi Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1139. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Mississippi Plaintiffs had possession and/or possessory rights.

1140. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1141. As a result of the trespass, Plaintiffs' chattels were impaired as to condition, quality, or value, and Mississippi Plaintiffs were damaged, including but not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1142. Mississippi Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1143. Syngenta's conduct was grossly negligent and evidenced a reckless disregard for the rights of others, including Mississippi Plaintiffs, thereby justifying an award of punitive damages.

Count 94 - Private Nuisance
(On Behalf of Mississippi Plaintiffs)

1144. Mississippi Plaintiffs incorporate by reference paragraphs 1-294 as if set forth herein.

1145. Syngenta's actions constitute a private nuisance to Mississippi Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet use and enjoyment of Mississippi Plaintiffs' land and/or property interests.

1146. Syngenta's conduct was intentional and unreasonable, or if unintentional, was negligent and reckless, and proximately caused damage to Mississippi Plaintiffs. These damages

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1147. Mississippi Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1148. Syngenta's conduct was grossly negligent and evidenced a reckless disregard for the rights of others, including Mississippi Plaintiffs, thereby justifying punitive damages.

Count 95 - Negligence
(On Behalf of Missouri Plaintiffs)

1149. Missouri Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1150. Syngenta owed a duty of at least reasonable care to its stakeholders, including Missouri Plaintiffs, in the timing, scope, and terms under which it commercialized MIR162.

1151. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and /or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1152. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Missouri Plaintiffs. These damages include but are not limited to damaged corn crops

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and reduced corn prices based on the inability to sell corn to the Chinese market.

1153. Missouri Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest.

1154. Syngenta's conduct was grossly negligent and showed a complete indifference to or conscious disregard of the rights of others, including Missouri Plaintiffs. Punitive damages are thus warranted.

Count 96 - Trespass to Chattels
(On Behalf of Missouri Plaintiffs)

1155. Missouri Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1156. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Missouri Plaintiffs had possession and/or possessory rights.

1157. Syngenta's acts took place, or affected commerce, in Missouri.

1158. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1159. As a result of the trespass, Plaintiffs' chattels were impaired as to condition, quality, or value, and they were damaged.

1160. Missouri Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1161. In addition, Syngenta maliciously or wantonly damaged the property of Missouri Plaintiffs, including their corn and their rights in pursuit of business and business relationships in violation of Mo. Rev. Stat. §330, entitling these Missouri Plaintiffs to double the value of their

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

damages.

1162. Syngenta's conduct showed a complete indifference to or conscious disregard for the rights of others, including Missouri Plaintiffs, and thus punitive damages are warranted.

Count 97 - Tortious Interference
(On Behalf of Missouri Plaintiffs)

1163. Missouri Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1164. Missouri Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1165. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1166. Syngenta induced or disrupted that expectancy without justification or privilege.

1167. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with Missouri Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1168. Syngenta had no legitimate interest in Missouri Plaintiffs' expectancy but alternatively, if it had such an interest, Syngenta employed wrongful means including without limitation, misrepresentations, nuisance, and trespass.

1169. As a direct and proximate result of Syngenta's conduct, Missouri Plaintiffs were damaged.

1170. Missouri Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest.

1171. Syngenta's conduct showed a complete indifference to or conscious disregard of

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

the rights of others, including Missouri Plaintiffs, and thus punitive damages are warranted.

Count 98 – Negligence
(On Behalf of Montana Plaintiffs)

1172. Montana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1173. Syngenta owed its stakeholders, including Montana Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1174. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1175. Syngenta's negligence directly and proximately caused harm to Montana Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1176. Montana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1177. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to the rights of Montana Plaintiffs, and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions showed deliberate disregard for the rights of Montana Plaintiffs. Punitive damages are thus warranted.

Count 99 – Private Nuisance
(On behalf of Montana Plaintiffs)

1178. Montana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1179. Syngenta's actions constitute a private nuisance to Montana Plaintiffs. By contaminating the U.S. corn supply, Syngenta has obstructed the free use of Montana Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or comfortable enjoyment of their property.

1180. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of Montana Plaintiff's interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that such invasion would result from its conduct and knew that it would substantially interfere with Montana Plaintiffs' comfortable enjoyment of their property and/or property interests.

1181. Syngenta's actions proximately caused damage to Montana Plaintiffs, including damaged corn crops and reduced corn prices.

1182. Montana Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1183. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to the rights of Montana Plaintiffs, and deliberately acted in conscious or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions showed deliberate disregard for the rights of others including Montana Plaintiffs. Punitive damages are thus warranted.

Count 100 – Tortious Interference with Business Relationships
(On Behalf of Montana Plaintiffs)

1184. Montana Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1185. Montana Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1186. Syngenta's acts were intentional and willful and were calculated to cause damage to Montana Plaintiffs in their businesses by making misrepresentations and omissions of material fact, causing its product to contaminate Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain.

1187. Syngenta's interference has proximately caused actual damage to Montana Plaintiffs.

1188. Montana Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1189. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Montana Plaintiffs. Punitive damages are thus warranted.

Count 101 - Negligence
(On Behalf of Nebraska Plaintiffs)

1190. Nebraska Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1191. Syngenta owed a duty of at least reasonable care to its stakeholders, including

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Nebraska Plaintiffs, in the timing, scope, and terms under which it commercialized MIR162.

1192. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1193. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Nebraska Plaintiffs, including but not limited to damaged corn crops and reduced corn prices due to the inability to sell corn to the Chinese market.

1194. Nebraska Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 102 - Trespass to Chattels
(On Behalf of Nebraska Plaintiffs)

1195. Nebraska Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1196. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Nebraska Plaintiffs had possession and/or possessory rights.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1197. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Nebraska Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1198. As a result of the trespass, Nebraska Plaintiffs' chattels were impaired as to condition, quality, or value, and they were damaged thereby.

1199. Nebraska Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 103 – Private Nuisance
(On Behalf of Nebraska Plaintiffs)

1200. Nebraska Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1201. Syngenta's actions constitute a private nuisance to Nebraska Plaintiffs. By contaminating the U.S. corn supply, Syngenta unreasonably and substantially interfered with Nebraska Plaintiffs' enjoyment of their land and/or property interests.

1202. Said invasion was intentional and unreasonable, or alternatively unintentional and actionable because Syngenta's conduct was negligent and/or reckless.

1203. As a direct and proximate result of Syngenta's conduct, Nebraska Plaintiffs have sustained substantial injury and damage.

1204. Nebraska Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 104 - Nebraska Consumer Protection Act
(On Behalf of Nebraska Plaintiffs)

1205. Nebraska Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1206. The Nebraska Consumer Protection Act provides that "unfair or deceptive acts or practices in the conduct of any trade or commerce shall be unlawful." Neb. Rev. Stat. § 59-1602.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

"Trade and commerce" means "the sale of assets", including any property, tangible or otherwise, real or personal, and anything of value, "or services and any commerce directly or indirectly affecting the people of the State of Nebraska." Neb. Rev. Stat. § 59-1601 (2, 3). Corn seed constitutes assets under Section 59-1601, Neb. Rev. Stat.

1207. Syngenta engaged in numerous unfair and deceptive acts or practices in the timing, scope, and terms under which it commercialized Viptera and/or Duracade including:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/ or competence to effectively isolate or channel those products; and

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market.

1208. Syngenta also made numerous false and deceptive representations regarding the importance of the Chinese market and the timing of China's approval of Viptera and/or Duracade.

1209. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status for

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

MIR162 in that process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1210. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process and its knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public prior to commercialization and for the purpose of producing sales.

1211. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contains deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1212. Syngenta also failed to disclose material information to Producers and Non-Producers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and that China was a significant and growing import market. Syngenta further failed to disclose at all relevant

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling of Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1213. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and/or Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Nebraska Plaintiffs would be harmed.

1214. Syngenta knew that approval from China was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons, and knew that systems were not in place for either isolating or effectively channeling Viptera and/or Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera and/or Duracade would disseminate throughout the U.S. corn supply.

1215. Syngenta knew that Nebraska Plaintiffs are affected by its business and depend on it for responsible commercialization practices.

1216. Syngenta's conduct, misrepresentations, and omissions, were immoral, unethical, oppressive, or unscrupulous and possessed the tendency or capacity to mislead or create the likelihood of deception.

1217. Syngenta's unfair and deceptive practices occurred during the conduct of trade or commerce, specifically the commercialization and sale of Viptera and/or Duracade, affecting the people of the State of Nebraska.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1218. These unfair and deceptive practices caused the injuries and damages sustained by Nebraska Plaintiffs.

1219. Moreover, Syngenta's acts, practices, and misrepresentations affect the public interest. Syngenta's misrepresentations were made to a large segment of the public and its conduct vitally affects a large segment of the public, including all farmers and others in the business of selling corn and corn products, who depend on the responsible stewardship practices of developers like Syngenta when commercializing GM products.

1220. Nebraska Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest, as well as costs and reasonable attorneys' fees. Neb. Rev. Stat. § 59-1609.

Count 105 - Negligence
(On behalf of Nevada Plaintiffs)

1221. Nevada Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1222. Syngenta owed its stakeholders, including Nevada Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1223. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1224. Syngenta's negligence proximately caused harm to Nevada Plaintiffs including damaged corn and reduced corn prices.

1225. Nevada Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Count 106 - Trespass to Chattels
(On behalf of Nevada Plaintiffs)

1226. Nevada Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1227. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which Nevada Plaintiffs had possession and/or possessory rights.

1228. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Nevada Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1229. As a result of the trespass, these chattels were impaired as to condition, quality, or value and Nevada Plaintiffs were damaged.

1230. Nevada Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1231. In addition, Syngenta maliciously or wantonly damaged the property of Nevada Plaintiffs. Syngenta's conduct showed a complete indifference to or conscience disregard for the rights of others, including the rights of Nevada Plaintiffs. Punitive damages are thus warranted.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Count 107 - Private Nuisance
(On behalf of Nevada Plaintiffs)

1232. Nevada Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1233. Syngenta's actions constitute a private nuisance to Nevada Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with Nevada Plaintiffs' private use and enjoyment of their land and/or property interests.

1234. Said invasion was intentional and unreasonable, or alternatively unintentional and actionable because Syngenta's conduct was negligent and/or reckless.

1235. As a direct and proximate result of Syngenta's conduct, Nevada Plaintiffs have sustained substantial injury and damage, including damaged corn and reduced corn prices, entitling them to compensatory damages and pre- and post-judgment interest.

Count 108 - Nevada Consumer Protection Act
Nev. Stat. §§ 41.600, 598.0915
(On behalf of Nevada Plaintiffs)

1236. Nevada Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1237. Nevada Plaintiffs bring this claim under Nev. Stat. §§ 41.600, 598.0915.

1238. Syngenta engaged in numerous deceptive acts or practices in the timing, scope, and terms under which it commercialized Viptera and Duracade including:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1239. Syngenta also made numerous false and deceptive representations regarding the importance of the Chinese marketing and the timing of China's approval of Viptera and/or Duracade.

1240. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting, and harvesting of MIR162), that it would receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status for MIR162 in that process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1241. Syngenta also submitted its MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1242. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1243. Syngenta also failed to disclose material information to Nevada Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1244. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and/or Duracade, despite Syngenta's further knowledge that the more acres grown with

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

them, the more likely it would be that Viptera and/or Duracade would disseminate into the U.S. corn supply and Nevada Plaintiffs would be harmed.

1245. Syngenta knew that approval from China was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons and knew that systems were not in place for either isolating or effective channeling Viptera and/or Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera and/or Duracade would disseminate throughout the U.S. corn supply.

1246. Syngenta knew that Nevada Plaintiffs are affected by its business and depend on it for responsible commercialization practices.

1247. Syngenta's conduct, misrepresentations, and omissions, were immoral, unethical, oppressive, or unscrupulous and possessed the tendency or capacity to mislead or create the likelihood of deception.

1248. Syngenta's deceptive practices occurred during the conduct of trade or commerce, specifically the commercialization and sale of Viptera and Duracade, affecting the people of the State of Nevada.

1249. These deceptive practices caused the injuries and damages sustained by Nevada Plaintiffs.

1250. Moreover, Syngenta's acts, practices, and misrepresentations affect the public interest. Syngenta's misrepresentations were made to a large segment of the public and its conduct vitally affects a large segment of the public, including all farmers and others in the business of selling corn and corn products, who depend on the responsible stewardship practices of developers like Syngenta when commercializing genetically engineered products.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1251. Nevada Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, as well as costs and reasonable attorneys' fees under Nev. Stat. § 41.600.

Count 109 – Tortious Interference with Prospective Economic Advantage
(On Behalf of Nevada Plaintiffs)

1252. Nevada Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1253. Nevada Plaintiffs had business relationships and prospective contractual relationships with purchasers of corn.

1254. Syngenta had knowledge of prospective relationships and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the prospective relationships existed.

1255. Except for the conduct of Syngenta, Nevada Plaintiffs were reasonably certain to have continued the relationships and realized the expectancy of continued relationships with purchasers of corn.

1256. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1257. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with Nevada Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1258. Syngenta's interference has proximately caused damage to Nevada Plaintiffs.

1259. Nevada Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1260. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Nevada Plaintiffs. Punitive damages are thus warranted.

Count 110 - Negligence
(On behalf of New Hampshire Plaintiffs)

1261. New Hampshire Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1262. Syngenta owed its stakeholders, including New Hampshire Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1263. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1264. Syngenta's negligence proximately caused harm to New Hampshire Plaintiffs, including damaged corn and reduced corn prices.

1265. New Hampshire Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Count 111 - Trespass to Chattels
(On behalf of New Hampshire Plaintiffs)

1266. New Hampshire Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1267. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which New Hampshire Plaintiffs had possession and/or possessory rights.

1268. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with New Hampshire Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1269. As a result of the trespass, these chattels were impaired as to condition, quality, or value, and New Hampshire Plaintiffs were damaged.

1270. New Hampshire Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

Count 112 - Private Nuisance
(On behalf of New Hampshire Plaintiffs)

1271. New Hampshire Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1272. Syngenta's actions constitute a private nuisance to New Hampshire Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with New Hampshire Plaintiffs' private use and enjoyment of their land and/or property interests.

1273. Said invasion was intentional and unreasonable, or alternatively unintentional and actionable because Syngenta's conduct was negligent and/or reckless.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1274. As a direct and proximate result of Syngenta's conduct, New Hampshire Plaintiffs have sustained substantial injury and damage, including damage to their corn and reduced corn prices, entitling them to compensatory damages, and pre- and post-judgment interest.

Count 113 - Tortious Interference with Prospective Contractual Relations
(On behalf New Hampshire Plaintiffs)

1275. New Hampshire Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1276. New Hampshire Plaintiffs had existing and prospective business relationships and a reasonable expectancy of continued relationships with third-party purchasers of corn.

1277. Syngenta had knowledge of such relationships or expectancies and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the relationships or expectancies existed. Syngenta intended to prevent the fruition of the prospective and existing business relationships between New Hampshire Plaintiffs and the third-party purchasers of corn.

1278. Syngenta was not a party to the business relationships between New Hampshire Plaintiffs and the third-party purchasers of corn.

1279. Syngenta intentionally induced or caused a disruption of that expectancy without justification or privilege.

1280. Because of Syngenta's conduct, the existing and prospective business relationships between New Hampshire Plaintiffs and the third-party purchasers of corn did not culminate in pecuniary benefit to New Hampshire Plaintiffs.

1281. Syngenta's conduct was intentional, and was improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

other facilities of the U.S. supply chain, constituting a trespass and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1282. Syngenta's interference is the direct and proximate cause of the damage to New Hampshire Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1283. New Hampshire Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1284. Syngenta's conduct, as described above, was outrageous, and included acts done with malice or bad motives and/or evidencing reckless indifference to New Hampshire Plaintiffs' interests. Punitive damages are thus warranted.

Count 114 – New Hampshire Consumer Protection Act
N.H. Rev. Stat. § 358-A:2
(On Behalf of New Hampshire Plaintiffs)

1285. New Hampshire Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1286. The New Hampshire Consumer Sales Practices Act provides for a private right of action by any person injured by another's use of any method, act or practice declared unlawful under the Act. N. H. Rev. Stat. § 358-A:10.

1287. Unfair or deceptive acts or practices shall include, but are not limited to:

a. "Causing likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;"

b. "Causing likelihood of confusion or of misunderstanding as to affiliation, connection, or association with, or certification by another;"

c. "Using deceptive representations or designations of origin in connection with goods or services;"

d. "Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;" and

e. "Representing that goods or services are of a particular standard, quality, grade, or that goods are of a particular style or model, if they are of another." N.H. Rev. Stat. § 358-A:2 (II, III, IV, V, VI).

1288. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

1289. By deceiving Plaintiffs into believing that Viptera would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed New Hampshire Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

1290. Syngenta's acts took place in, or affected commerce in, New Hampshire.

1291. Syngenta's acts and omissions proximately caused the injuries and damages sustained by New Hampshire Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1292. New Hampshire Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1293. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, New Hampshire Plaintiffs are also entitled to an award of punitive damages.

Count 115 - Negligence
(On behalf of New Jersey Plaintiffs)

1294. New Jersey Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1295. Syngenta owed its stakeholders, including New Jersey Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1296. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1297. Syngenta's negligence proximately caused harm to New Jersey Plaintiffs.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1298. New Jersey Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1299. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to New Jersey Plaintiffs' rights, and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions thus showed deliberate disregard for New Jersey Plaintiffs' rights. Punitive damages are thus warranted.

Count 116 - Trespass to Chattels
(On behalf of New Jersey Plaintiffs)

1300. New Jersey Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1301. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which New Jersey Plaintiffs had possession and/or possessory rights.

1302. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with New Jersey Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1303. As a result of the trespass, these chattels were impaired as to condition, quality, or value, and New Jersey Plaintiffs were damaged.

1304. New Jersey Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1305. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to New Jersey Plaintiffs' rights, and deliberately acted in conscious or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions thus showed deliberate disregard for New Jersey Plaintiffs' rights. Punitive damages are thus warranted.

Count 117 - Tortious Interference
(On behalf of New Jersey Plaintiffs)

1306. New Jersey Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1307. New Jersey Plaintiffs had business relationships and a reasonable expectancy of continued relationships with third-party purchasers of corn.

1308. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1309. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1310. Syngenta's conduct was intentional, improper and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated New Jersey Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass and interference with New Jersey Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1311. There was an absence of justification for Syngenta's conduct.

1312. Syngenta had no legitimate interest in New Jersey Plaintiffs' expectancy but alternatively, if it had such an interest, Syngenta employed wrongful means including without limitation, misrepresentations, nuisance, and trespass.

1313. As a direct and proximate result of Syngenta's conduct, New Jersey Plaintiffs were damaged.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1314. New Jersey Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest.

1315. Syngenta's conduct showed a complete indifference to or conscious disregard of the rights of others, including New Jersey Plaintiffs, and thus punitive damages are warranted.

Count 118 - Private Nuisance
(On behalf of New Jersey Plaintiffs)

1316. New Jersey Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1317. Syngenta's actions constitute a private nuisance to New Jersey Plaintiffs. By contaminating the U.S. corn supply, Syngenta has obstructed the free use of New Jersey Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or comfortable enjoyment of their property.

1318. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of New Jersey Plaintiffs' interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct and knew that it would substantially interfere with New Jersey Plaintiffs' comfortable enjoyment of their property and/or property interests.

1319. Syngenta's actions proximately caused damage to New Jersey Plaintiffs. New Jersey Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1320. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to the rights of New Jersey Plaintiffs and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions thus showed

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

deliberate disregard for the rights of others, including New Jersey Plaintiffs. Punitive damages are thus warranted.

Count 119 - New Jersey Consumer Protection Act
N.J. Stat. § 56:8-1, *et seq*.
(On behalf of New Jersey Plaintiffs)

1321. New Jersey Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1322. New Jersey Plaintiffs bring this action under N.J. Stat. § 56:8-1, *et seq*.

1323. Syngenta engaged in numerous deceptive acts or practices in the timing, scope, and terms under which it commercialized Viptera and Duracade including:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products; and

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market.

1324. Syngenta also made numerous false and deceptive representations regarding the importance of the Chinese marketing and the timing of China's approval of Viptera and/or Duracade.

1325. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status for MIR162 in that process, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1326. Syngenta also submitted its MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

1327. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1328. Syngenta also failed to disclose material information to New Jersey Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China, and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1329. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and/or Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and/or Duracade would disseminate into the U.S. corn supply and New Jersey Plaintiffs would be harmed.

1330. Syngenta knew that approval from China was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons and knew that systems were not in place for either isolating or effective channeling of Viptera and/or Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera and/or Duracade would disseminate throughout the U.S. corn supply.

1331. Syngenta knew that New Jersey Plaintiffs here are affected by its business and depend on it for responsible commercialization practices.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1332. Syngenta's conduct, misrepresentations, and omissions, were immoral, unethical, oppressive, or unscrupulous and possessed the tendency or capacity to mislead or create the likelihood of deception.

1333. Syngenta's unfair and deceptive practices occurred during the conduct of trade or commerce, specifically the commercialization and sale of Viptera and/or Duracade, affecting the people of the State of New Jersey.

1334. These unfair and deceptive practices caused the injuries and damages sustained by New Jersey Plaintiffs.

1335. Moreover, Syngenta's acts, practices, and misrepresentations affect the public interest. Syngenta's misrepresentations were made to a large segment of the public and its conduct vitally affects a large segment of the public, including all farmers and others in the business of selling corn and corn products, who depend on the responsible stewardship practices of developers like Syngenta when commercializing genetically engineered products.

1336. Syngenta's conduct was grossly negligent and evidenced a reckless disregard for the rights of others, including New Jersey Plaintiffs, thereby justifying punitive damages.

1337. New Jersey Plaintiffs are thus entitled to an award of compensatory damages pre- and post-judgment interest, as well as costs and reasonable attorneys' fees and punitive damage under N.J. Stat. § 56:8-19.

Count 120 - Negligence
(On Behalf of New Mexico Plaintiffs)

1338. New Mexico Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1339. Syngenta owed a duty to New Mexico Plaintiffs to use at least reasonable care in the timing, scope, and terms under which is commercialized MIR162.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1340. Syngenta breached its duties by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers in the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera and/or Duracadewould lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1341. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by New Mexico Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1342. New Mexico Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1343. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith. Punitive damages therefore are warranted.

Count 121 – Trespass to Personalty
(On Behalf of New Mexico Plaintiffs)

1344. New Mexico Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1345. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

and/or Duracade into contact with non-Viptera/Duracade corn in which New Mexico Plaintiffs had possession and/or possessory rights.

1346. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with New Mexico Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1347. As a result of the trespass, New Mexico Plaintiffs' chattels/personalty was impaired as to condition, quality, or value, and these New Mexico Plaintiffs were damaged.

1348. New Mexico Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1349. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith. Punitive damages therefore are warranted.

Count 122 - Tortious Interference
(On Behalf of New Mexico Plaintiffs)

1350. New Mexico Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1351. New Mexico Plaintiffs had valid business relationships with customers throughout the crop chain for export and sales to whom they sold their corn. This business relationship was recorded by contracts, invoices, receipts, and other documents demonstrating a consistent course of sales.

1352. New Mexico Plaintiffs had a reasonable expectation of economic gain as a result of these relationships and reasonably expected to continue selling corn to such customers in the future.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1353. Syngenta knew or should have known that New Mexico Plaintiffs had business relationships in the chain of crop export and sales. Syngenta knew that New Mexico Plaintiffs expected such business relationships to continue into the future.

1354. Despite such knowledge, Syngenta intentionally made representations and material omissions of fact that deceived New Mexico Plaintiffs regarding whether customers would accept Viptera and /or Duracade corn .

1355. Syngenta further interfered with these prospective business relationships by prematurely releasing Viptera and/or Duracade corn into the U.S. market knowing that it would lead to contamination of all U.S. corn shipments. This conduct prevented U.S. corn from being sold to certain export markets, including China, which had not granted approval for purchase or consumption of Viptera and/or Duracade corn.

1356. Such representations and material omissions of fact, and such knowing contamination of U.S. corn shipments, constituted improper means of interfering with New Mexico Plaintiffs' prospective business advantage.

1357. Syngenta's conduct thus prevented the export of U.S. corn to China, causing depressed prices for New Mexico Plaintiffs in the U.S. As a result, New Mexico Plaintiffs were unable to sell corn at the price they reasonably expected to receive and would have received but for Syngenta's conduct. New Mexico Plaintiffs therefore have been damaged as a result of Syngenta's interference.

1358. As a direct and proximate result of Syngenta's conduct, New Mexico Plaintiffs have been injured and have suffered financial loss in excess of $50,000, for which damages and other relief as may be available at law or equity are warranted.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1359. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith. Punitive damages therefore are warranted.

Count 123 - Private Nuisance
(On Behalf of New Mexico Plaintiffs)

1360. New Mexico Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1361. Syngenta's actions constitute a private nuisance to New Mexico Plaintiffs. By contaminating the U.S. corn supply, Syngenta has obstructed the free use of the New Mexico Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or private use and enjoyment of land.

1362. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of the New Mexico Plaintiffs' private use and enjoyment of land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct and knew that it would substantially interfere with New Mexico Plaintiffs' private use and enjoyment of land.

1363. Syngenta's actions proximately caused damage to New Mexico Plaintiffs. New Mexico Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1364. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith. Punitive damages therefore are warranted.

Count 124 - Unfair Practices Act
N.M. Stat. § 57-12-1 et seq.
(On Behalf of New Mexico Plaintiffs)

1365. New Mexico Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1366. Under N.M. Stat. § 57-12-3, New Mexico's Unfair Practices Act prohibits "[u]nfair or deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce."

1367. N.M. Stat. § 57-12-2(D) defines unfair or deceptive trade practices to include any false or misleading representations of any kind as well as material omissions of fact made "by a person in the regular course of the person's trade or commerce, that may, tends to or does deceive or mislead any person." Such practices specifically include: "(2) causing confusion or misunderstanding as to the source, sponsorship, approval or certification of goods or services; (3) causing confusion or misunderstanding as to affiliation, connection or association with or certification by another; (5) representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits or quantities that they do not have [. . .]; (14) using exaggeration, innuendo or ambiguity as to a material fact or failing to state a material fact if doing so deceives or tends to deceive[.]" *Id*.

1368. Syngenta engaged in unlawful practices by employing deceptive acts or practices, fraud, false pretenses, false promises, and/or misrepresentations in connection with the sale or advertisement of Viptera and/or Duracade.

1369. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving [corn farmers] and to induce them to purchase Viptera and/or Duracade.

1370. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including [corn farmers and others in the chain of crop export and sales] and with the goal of encouraging further sales of MIR162, that it would

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

receive China's approval in March 2012. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status within that process for MIR162, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1371. Syngenta also submitted its MIR162 Deregulation Petition that falsely states "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process and its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and was for the purpose of producing sales.

1372. As described above, Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested the Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and Syngenta's knowledge of past contamination events, Syngenta knew those representations were

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

false and/or made those representations recklessly and willfully without regard to their consequences.

1373. Syngenta also failed to disclose material information to New Mexico Plaintiffs. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose, at minimum, in 2010-2011 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) and effective system in place for isolating or channeling Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1374. As a developer of genetically modified products Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which New Mexico Plaintiffs do not have access.

1375. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling of Viptera and/or Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera and/or Duracade would disseminate throughout the U.S. corn supply.

1376. Syngenta knew that New Mexico Plaintiffs are affected by Syngenta's business and depend on Syngenta to act responsibly in commercializing new products.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1377. In equity and good conscience, Syngenta had a duty to disclose the truth: that import approval from China, a key market, was neither expected nor reasonably likely to occur for at least the 2011 and 2012 growing season, that there was not an effective system in place to channel Viptera and/or Duracade away from China or other foreign markets for which Syngenta did not have approval, and that purchase and planting Viptera and later Duracade created a substantial risk of loss of the Chinese market and/or prolonging the loss of the market.

1378. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and/or Duracade despite Syngenta's knowledge that the greater the market penetration, the more likely it would be that Viptera and/or Duracade would disseminate into the U.S. corn supply and New Mexico Plaintiffs would be harmed.

1379. Syngenta in fact did acquire money or property by means of its unlawful practices through sales of Viptera and/or Duracade.

1380. Syngenta's conduct caused damage to New Mexico Plaintiffs.

1381. New Mexico Plaintiffs therefore are entitled to an award of compensatory damages and pre- and post-judgment interest.

1382. Because Syngenta willfully committed its unfair trade practices, New Mexico Plaintiffs are entitled to treble damages. Additionally or in the alternative, because Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith, punitive damages therefore are warranted.

1383. New Mexico Plaintiffs are further entitled to an award of attorneys' fees and costs.

Count 125 - Negligence
(On Behalf of New York Plaintiffs)

1384. New York Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1385. Syngenta owed a duty to New York Plaintiffs to use at least reasonable care in the timing, scope, and terms under which is commercialized MIR162.

1386. Syngenta breached its duties by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers in the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera and/or Duracade would lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1387. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by New York Plaintiffs, including but not limited to, damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1388. New York Plaintiffs are thus entitled to an award of compensatory damages, pre- and post-judgment interest.

1389. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith, and with conscious disregard for the rights of others, including New York Plaintiffs. Punitive damages therefore are warranted.

Count 126 - Trespass to Chattels
(On Behalf of New York Plaintiffs)

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1390. New York Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1391. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which New York Plaintiffs had possession and/or possessory rights.

1392. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with New York Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1393. As a result of the trespass, New York Plaintiffs' chattels were impaired as to condition, quality, or value, and New York Plaintiffs were damaged.

1394. New York Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1395. Syngenta's conduct was willful, wanton, malicious, reckless, oppressive, grossly negligent, or fraudulent and in bad faith, and with conscious disregard for the rights of others, including New York Plaintiffs. Punitive damages therefore are warranted.

Count 127 - Private Nuisance
(On Behalf of New York Plaintiffs)

1396. New York Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1397. Syngenta's actions constitute a private nuisance to New York Plaintiffs. By contaminating the U.S. corn supply, Syngenta has obstructed the free use of New York Plaintiffs' property, thereby materially and substantially interfering with their property interests and/or comfortable enjoyment of their property.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1398. Syngenta's conduct was negligent because Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of New York Plaintiffs' interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct and knew that it would substantially interfere with New York Plaintiffs' comfortable enjoyment of their property and/or property interests.

1399. Syngenta's actions proximately caused damage to New York Plaintiffs. New York Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1400. Syngenta had knowledge of facts or intentionally disregarded facts that created a high probability of harm to the rights of New York Plaintiffs, and deliberately acted in conscious or intentional disregard of that high probability of harm; alternatively, Syngenta deliberately acted with indifference to that high probability of harm. Syngenta's actions and omissions thus showed deliberate disregard for the rights of others including New York Plaintiffs. Punitive damages are thus warranted.

Count 128 - Deceptive Trade Practices
(On Behalf of New York Plaintiffs)

1401. New York Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1402. Section 349 of New York's General Business Law prohibits "[d]eceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in" the State of New York. N.Y. Bus. Law. § 349(a).

1403. Syngenta has willfully committed deceptive acts and practices directed toward consumers with respect to its business, trade and commerce in New York, including but not limited to:

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers in the dangers of contamination by MIR162 and at least the substantial risks that planting Viptera and/or Duracade would lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1404. A reasonable consumer would have been misled by these deceptive acts and practices.

1405. Syngenta's deceptive acts and practices took place in New York and injured New York Plaintiffs.

1406. Syngenta's deceptive acts and practices offended the public interest and injured New York Plaintiffs.

1407. Syngenta willfully engaged in the deceptive acts and practices set forth herein.

1408. New York Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, as well as treble or other exemplary damages, and attorneys' fees and costs, under N.Y. Gen. Bus. Law § 349(h).

Count 129 - Negligence
(On Behalf of North Carolina Plaintiffs)

1409. North Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1410. Syngenta owed its stakeholders, including North Carolina Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1411. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1412. Syngenta's negligence was a direct and proximate cause of the injuries and damages sustained by North Carolina Plaintiffs.

1413. North Carolina Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1414. Syngenta acted fraudulently, maliciously, and with willful and wanton conduct with respect to the rights of North Carolina Plaintiffs. Punitive damages are thus warranted.

Count 130 - Trespass to Chattels
(On Behalf of North Carolina Plaintiffs)

1415. North Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1416. By commercializing Viptera and/or Duracade prematurely and without adequate

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

systems to isolate and channel it, Syngenta intentionally, unlawfully, and without authorization intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which North Carolina Plaintiffs had possession and/or possessory rights. This contact caused a harmful interference with the physical condition of chattels in which North Carolina Plaintiffs had possession and/or possessory rights.

1417. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with the corn of North Carolina Plaintiffs, through contamination in fields and/or in corn elevators and other modes of storage and transport.

1418. As a result of the trespass, the chattels in which North Carolina Plaintiffs had possession and/or possessory rights were impaired as to condition, quality, or value, and North Carolina Plaintiffs were damaged.

1419. North Carolina Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1420. Syngenta acted fraudulently, maliciously, and with willful and wanton conduct with respect to the rights of North Carolina Plaintiffs. Punitive damages are thus warranted.

Count 131 - Private Nuisance
(On Behalf of North Carolina Plaintiffs)

1421. North Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1422. Syngenta's actions constitute a private nuisance to North Carolina Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet use and enjoyment of the land and/or property interests of North Carolina Plaintiffs.

1423. Said invasion was intentional and unreasonable. Syngenta knew of, or was substantially certain of the invasion of property rights resulting from its conduct.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1424. As a direct and proximate result of Syngenta's conduct, North Carolina Plaintiffs have sustained substantial and irreparable injury and damage, entitling them to compensatory damages as well as pre- and post-judgment interest.

1425. Syngenta acted fraudulently, maliciously, and with willful and wanton conduct with respect to the rights of North Carolina Plaintiffs. Punitive damages are thus warranted.

Count 132 - North Carolina Unfair and Deceptive Trade Practices Act
(On Behalf of North Carolina Plaintiffs)

1426. North Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1427. N.C. Gen Stat. § 75-1.1 declares that unfair or deceptive acts or practices in or affecting commerce are unlawful.

1428. A practice is unfair if it offends established public policy, immoral, unethical, oppressive, unscrupulous, or substantially injurious.

1429. N.D. Gen. Stat. § 75-16 provides that if any person or the business of any person is injured by reason of any act or thing done by another in violation of the North Carolina Unfair and Deceptive Trade Practices Act, the injured person or entity may bring a claim for damages.

1430. Syngenta has committed willful unfair trade practices by a number of acts and omissions taken to inequitably assert its power and position, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products; and

e. Failing to adequately warn and instruct farmers on the dangers of

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to the loss of the Chinese market.

1431. Syngenta's actions offend public policy, were immoral, unethical, oppressive, unscrupulous, or substantially injurious to North Carolina Plaintiffs.

1432. Syngenta's acts took place in or effected commerce in North Carolina.

1433. Syngenta's actions and omissions proximately caused the injuries and damages sustained by North Carolina Plaintiffs.

1434. Syngenta willfully engaged in the unfair and deceptive acts and practices set forth herein.

1435. North Carolina Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest, as well as treble or other exemplary damages, attorneys' fees and costs under N.C. Gen. Stat §§ 75-16 and 75-16.1.

Count 133 - Negligence
(On Behalf of North Dakota Plaintiffs)

1436. North Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1437. Syngenta owed its stakeholders, including North Dakota Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1438. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability and/or competence to effectively isolate or channel those products;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1439. Syngenta's negligence directly and proximately caused harm to North Dakota Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell to the Chinese market.

1440. North Dakota Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1441. Syngenta acted oppressively and maliciously. Punitive damages are thus warranted.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Count 134 - Trespass to Chattels
(On Behalf of North Dakota Plaintiffs)

1442. North Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1443. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which North Dakota Plaintiffs had possession and/or possessory rights.

1444. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with North Dakota Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1445. As a result of the trespass, these North Dakota Plaintiffs' chattels were impaired as to condition, quality or value, and North Dakota Plaintiffs were damaged.

1446. North Dakota Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1447. Syngenta acted oppressively and maliciously. Punitive damages are thus warranted.

Count 135 - Tortious Interference
(On Behalf of North Dakota Plaintiffs)

1448. North Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1449. North Dakota Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1450. Syngenta had knowledge of such business and expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that such business and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

expectancy existed.

1451. Syngenta's conduct interfered with and disrupted that business and expectancy without justification or privilege.

1452. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated North Dakota Plaintiffs' fields, storage units, equipment, grain elevators, and other facilities of the U.S. supply chain, constituting a trespass and interference with North Dakota Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1453. Syngenta's interference has proximately caused damage to North Dakota Plaintiffs.

1454. North Dakota Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1455. Syngenta acted oppressively and maliciously. Punitive damages are thus warranted.

Count 136 - Private Nuisance
(On Behalf of North Dakota Plaintiffs)

1456. North Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1457. Syngenta's actions constitute a private nuisance to North Dakota Plaintiffs.

1458. Syngenta had a duty to not act in a way that unreasonably interferes with others' use and enjoyment of their property.

1459. By contaminating the U.S. corn supply, Syngenta has substantially and unreasonably interfered with North Dakota Plaintiffs' quiet use and enjoyment of their land and/or property interests.

1460. Syngenta unlawfully acted, or omitted to perform its duty, which annoyed, injured or endangered North Dakota Plaintiffs' comfort and repose, and rendered them insecure in the use

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

of their property.

1461. Syngenta's actions proximately caused damage to North Dakota Plaintiffs.

1462. North Dakota Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1463. Syngenta acted oppressively and maliciously. Punitive damages are thus warranted.

Count 137 - North Dakota Unfair Trade Practices and Consumer Protection Law (On Behalf of North Dakota Plaintiffs)

1464. North Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1465. Under N.D. Code Ann. § 51-15-02, "[t]he act, use, or employment by any person of any deceptive act or practice, fraud, false pretense, false promise, or misrepresentation, with the intent that others rely thereon in connection with the sale or advertisement of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby, is declared to be an unlawful practice."

1466. Syngenta engaged in unlawful practices by employing deceptive acts or practices, fraud, false pretenses, false promises, and/or misrepresentations in connection with the sale or advertisement of Viptera and/or Duracade.

1467. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn farmers and induce them to purchase Viptera and Duracade.

1468. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status within that process for MIR162, Syngenta knew this representation was false and/or made this representation recklessly and willfully without regard to its consequences.

1469. Syngenta also submitted its MIR162 Deregulation Petition which falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process, and based on its expertise and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and was for the purpose of producing sales.

1470. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1471. Syngenta also failed to disclose material information to corn farmers. Syngenta did

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's regulatory approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling of Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1472. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which North Dakota Plaintiffs do not have access.

1473. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling Viptera and/or Duracade, which was not available to North Dakota Plaintiffs.

1474. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 and 2012 growing season and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera nd/or Duracade would disseminate throughout the U.S. corn supply.

1475. Syngenta knew that North Dakota Plaintiffs here are affected by its business and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

depend on it for responsible commercialization practices.

1476. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchasing and planting Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

1477. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and Duracade despite Syngenta's knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers would be harmed.

1478. Syngenta in fact did acquire money or property by means of its unlawful practices through sales of Viptera and Duracade.

1479. Syngenta's conduct caused damage to North Dakota Plaintiffs.

1480. North Dakota Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1481. Because Syngenta knowingly committed its conduct, three times actual damage is also warranted, North Dakota Plaintiffs further are entitled to costs, disbursements, and reasonable attorney's fees. See N.D. Code Ann. § 51-15-09.

1482. Syngenta acted oppressively and maliciously. Punitive damages are thus warranted.

Count 138 - Negligence
(On Behalf of Ohio Plaintiffs)

1483. Ohio Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1484. Syngenta owed its stakeholders, including Ohio Plaintiffs, a duty to use at least

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1485. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1486. Syngenta's negligence proximately caused damage to Ohio Plaintiffs.

1487. Ohio Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1488. Syngenta knew or should have realized that its conduct created an unreasonable risk of harm, and that the risk was substantially greater than that which is necessary to make its conduct negligent. Syngenta acted with indifference to the consequences, when the probability that harm would result from such failure was great and such probability was known to Syngenta. Syngenta thus acted wantonly and recklessly and punitive damages are warranted.

Count 139 - Trespass to Chattels
(On Behalf of Ohio Plaintiffs)

1489. Ohio Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1490. By commercializing Viptera and/or Duracade prematurely and without adequate

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which Ohio Plaintiffs had possession and/or possessory rights.

1491. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Ohio Plaintiffs' corn through contamination in fields and/or grain elevators and other modes of storage and transport.

1492. As a result of the trespass, Ohio Plaintiffs' chattels were impaired as to condition, quality or value, and Ohio Plaintiffs were damaged.

1493. Ohio Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1494. Syngenta knew or should have realized that its conduct created an unreasonable risk of harm, and that the risk was substantially greater than that which is necessary to make its conduct negligent. Syngenta acted with indifference to the consequences, when the probability that harm would result from such failure was great and such probability was known to Syngenta. Syngenta thus acted wantonly and recklessly and punitive damages are warranted.

Count 140 - Qualified Nuisance
(On Behalf of Ohio Plaintiffs)

1495. Ohio Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1496. Syngenta breached its duty of care by negligently commercializing Viptera and/or Duracade, which caused injury, annoyance, and inconvenience, and endangered the comfort of Ohio Plaintiffs.

1497. Ohio Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1498. Syngenta knew or should have realized that its conduct created an unreasonable

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

risk of harm and that the risk was substantially greater than that which is necessary to make its conduct negligent. Syngenta acted with indifference to the consequences, when the probability that harm would result from such failure was great and such probability was known to Syngenta. Syngenta thus acted wantonly and recklessly and punitive damages are warranted.

Count 141 - Negligence
(On Behalf of Oklahoma Plaintiffs)

1499. Oklahoma Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1500. Syngenta owed its stakeholders, including Oklahoma Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1501. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1502. Syngenta's negligence directly and proximately caused harm to Oklahoma Plaintiffs, including damaged corn and reduced corn prices.

1503. Oklahoma Plaintiffs are thus entitled to an award of compensatory damages and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

pre- and post-judgment interest.

1504. Syngenta acted with reckless disregard for the rights of Oklahoma Plaintiffs; or in the alternative breached its duties intentionally and with malice. Punitive damages are therefore warranted under 23 Okl. St. Ann. § 9.1.

Count 142 - Trespass to Chattels
(On Behalf of Oklahoma Plaintiffs)

1505. Oklahoma Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1506. By commercializing Viptera and Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non- Viptera/Duracade corn in which Oklahoma Plaintiffs had possession and/or possessory rights.

1507. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Oklahoma Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1508. As a result of the trespass, these Oklahoma Plaintiffs' chattels were impaired as to condition, quality, or value, and Oklahoma Plaintiffs were damaged.

1509. Oklahoma Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1510. Syngenta acted with reckless disregard for the rights of Oklahoma Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted under 23 Okl. St. Ann. § 9.1.

Count 143 - Tortious Interference
(On Behalf of Oklahoma Plaintiffs)

1511. Oklahoma Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1512. Oklahoma Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

1513. Syngenta had knowledge of such business and expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that such business and expectancy existed.

1514. Syngenta's conduct interfered with and disrupted that business and expectancy without justification or privilege.

1515. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Oklahoma Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with the use of their property and in violation of Syngenta's duty of care.

1516. Syngenta's interference has proximately caused damage to Oklahoma Plaintiffs.

1517. Oklahoma Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1518. Syngenta acted with reckless disregard for the rights of Oklahoma Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted under 23 Okl. St. Ann. § 9.1.

Count 144 - Negligence
(On Behalf of Oregon Plaintiffs)

1519. Oregon Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1520. Syngenta owed its stakeholders, including Oregon Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1521. Syngenta also owed an independent duty of care to Oregon Plaintiffs.

1522. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1523. Syngenta's negligence directly and proximately caused harm to Oregon Plaintiffs, including damaged corn and reduced corn prices.

1524. Oregon Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1525. Syngenta acted with reckless disregard for the rights of Oregon Plaintiffs; or in the alternative breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 145 - Trespass to Chattels
(On Behalf of Oregon Plaintiffs)

1526. Oregon Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1527. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Oregon Plaintiffs had possession and/or possessory rights.

1528. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Oregon Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1529. As a result of the trespass, Oregon Plaintiffs' chattels were impaired as to condition, quality, or value, and Oregon Plaintiffs were damaged.

1530. Oregon Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1531. Syngenta acted with reckless disregard for the rights of Oregon Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 146 - Tortious Interference
(On behalf of Oregon Plaintiffs)

1532. Oregon Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1533. Oregon Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

1534. Syngenta also owed an independent duty of care to Oregon Plaintiffs.

1535. Syngenta had knowledge of such business and expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that such business and expectancy existed.

1536. Syngenta's conduct interfered with and disrupted that business and expectancy without justification or privilege.

1537. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Oregon Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with the use of their property and in violation of Syngenta's duty of care.

1538. Syngenta's interference has proximately caused damage to Oregon Plaintiffs.

1539. Oregon Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1540. Syngenta acted with reckless disregard for the rights of Oregon Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 147 - Private Nuisance
(On Behalf of Oregon Plaintiffs)

1541. Oregon Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1542. Under Or. Rev. Stat. § 30.930(2) a "'nuisance' or 'trespass' includes but is not limited to actions or claims based on noise, vibration, odors, smoke, dust, mist from irrigation, use of pesticides and use of crop production substances."

1543. Or. Rev. Stat. §§ 30.936(2)(a)-(b), 30.937(2)(a)-(b) allows for a private right of actions for (a) damage to commercial agriculture products, and (b) death or serious physical injury.

1544. Syngenta's actions constitute a private nuisance to Oregon Plaintiffs to their commercial agricultural products by contaminating the U.S. corn supply, Syngenta has substantially and unreasonably interfered with Oregon Plaintiffs' quiet use and enjoyment of their land and/or property interests.

1545. Syngenta's actions proximately caused damage to Oregon Plaintiffs.

1546. Oregon Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1547. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Oregon Plaintiffs. Punitive damages are thus warranted.

Count 148 - Negligence
(On Behalf of Pennsylvania Plaintiffs)

1548. Pennsylvania Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1549. Syngenta owed its stakeholders, including Pennsylvania Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1550. Syngenta also owed an independent duty of care to Pennsylvania Plaintiffs.

1551. Syngenta breached its duty by acts and omissions including but not limited to:

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1552. Syngenta's negligence directly and proximately caused harm to Pennsylvania Plaintiffs, including damaged corn and reduced corn prices.

1553. Pennsylvania Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1554. Syngenta acted with reckless disregard for the rights of Pennsylvania Plaintiffs; or in the alternative breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 149 - Trespass to Chattels
(On behalf of Pennsylvania Plaintiffs)

1555. Pennsylvania Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1556. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera

27-CV-15-13785
Filed in Fourth Judicial District Court

1575. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Pennsylvania Plaintiffs. Punitive damages are thus warranted.

Count 152 - Unfair Trade Practices and Consumer Protection Law
73 P.S. § 201-1
(On Behalf of Pennsylvania Plaintiffs)

1576. Pennsylvania Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1577. Pursuant to the Unfair Trade and Consumer Protection Law ("UTPCPL") "unfair or deceptive acts or practices" include:

a. Causing likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;

b. Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have;

c. Representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another; …

1578. The UTPCPL provides for a private cause of action for any person "who purchases or leases goods or services primarily for personal, family or household purposes and thereby suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment by any person of a method, act or practice declared unlawful."

1579. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn farmers and to induce corn farmers to purchase Viptera and/or Duracade.

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1580. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012.

1581. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status within that process for MIR162, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to its consequences.

1582. Syngenta also submitted its MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets . . . ." Based on Syngenta's knowledge of the Chinese regulatory process and its knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

1583. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and its

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1584. Syngenta also failed to disclose material information to corn farmers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China and that it sought approval cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling of Viptera or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1585. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including thousands of corn farmers. Those corn farmers lack the sophistication and bargaining power in matters concerning genetically modified products.

1586. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Pennsylvania Plaintiffs do not have access.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1587. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling of its genetically modified products, including Viptera and Duracade, which was not available to Pennsylvania Plaintiffs.

1588. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 and 2012 growing seasons, and knew that systems were not in place for either isolating or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

1589. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and Pennsylvania Plaintiffs would be harmed.

1590. Syngenta knew that farmers like Pennsylvania Plaintiffs are affected by its business and depend on it for responsible commercialization practices.

1591. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchasing and planting Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

1592. Syngenta's deceptive trade practices have impacted Pennsylvania Plaintiffs, as well as corn farmers other than Pennsylvania Plaintiffs, including corn farmers who purchased and planted Viptera and/or Duracade.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1593. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the potential to cause further disruption to the corn export market in the future.

1594. Syngenta's deceptive trade practices constitute a violation of the UTPCPL. Pennsylvania Plaintiffs were injured in the course of their business or occupation as the result of Syngenta's deceptive trade practices.

1595. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional and taken in bad faith.

1596. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Pennsylvania Plaintiffs.

1597. Pennsylvania Plaintiffs are thus entitled to damages three times the actual damages sustained, plus their attorney's fees and costs incurred in this action.

1598. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of Pennsylvania Plaintiffs. Punitive damages are therefore warranted.

Count 153 - Negligence
(On Behalf of Rhode Island Plaintiffs)

1599. Rhode Island Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1600. Syngenta owed its stakeholders, including Rhode Island Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1601. Syngenta also owed an independent duty of care to Rhode Island Plaintiffs.

1602. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1603. Syngenta's negligence directly and proximately caused harm to Rhode Island Plaintiffs, including damaged corn and reduced corn prices.

1604. Rhode Island Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1605. Syngenta acted with reckless disregard for the rights of Rhode Island Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 154 - Trespass to Chattels
(On behalf of Rhode Island Plaintiffs)

1606. Rhode Island Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1607. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Rhode Island Plaintiffs had possession and/or possessory rights.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1608. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Rhode Island Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1609. As a result of the trespass, Rhode Island Plaintiffs' chattels were impaired as to condition, quality, or value, and Rhode Island Plaintiffs were damaged.

1610. Rhode Island Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1611. Syngenta acted with reckless disregard for the rights of Rhode Island Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 155 - Tortious Interference
(On behalf of Rhode Island Plaintiffs)

1612. Rhode Island Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1613. Rhode Island Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

1614. Syngenta also owed an independent duty of care to Rhode Island Plaintiffs.

1615. Syngenta had knowledge of such business and expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that such business and expectancy existed.

1616. Syngenta's conduct interfered with and disrupted that business and expectancy without justification or privilege.

1617. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional, and contaminated Rhode Island Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with the use of their property and in violation of Syngenta's duty of care.

1618. Syngenta's interference has proximately caused damage to Rhode Island Plaintiffs.

1619. Rhode Island Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1620. Syngenta acted with reckless disregard for the rights of Rhode Island Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 156 - Deceptive Trade Practices
R.I. Gen. Laws Ann. tit. 6, Ch. 13.1, *et seq*.
(On Behalf of Rhode Island Producer Plaintiffs)

1621. Rhode Island Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1622. Under the Deceptive Trade Practices Act "unfair methods of competition and unfair or deceptive acts or practices" include:

a. Causing likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;

b. Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have; and

c. Representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another.

1623. The DTPA provides a private cause of action for any person "who purchases or leases goods or services primarily for personal, family or household purposes and thereby suffers

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

any ascertainable loss of money or property, real or personal, as a result of the use or employment by any person of a method, act or practice declared unlawful."

1624. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving corn farmers and to induce corn farmers to purchase Viptera and/or Duracade.

1625. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012.

1626. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process, and its own status within that process for MIR162, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to its consequences.

1627. Syngenta also submitted a MIR162 Deregulation Petition that falsely stated "there should be no effects on the U.S. maize export markets," that Syngenta's regulatory filings were in process in China, and Syngenta's Stewardship Agreements requiring channeling would be "successful" in "diverting this product away from export markets...." Based on Syngenta's knowledge of the Chinese regulatory process and knowledge of past contamination events, Syngenta knew these representations were false and/or made the representations recklessly and willfully without regard to their consequences. The MIR162 Deregulation Petition was circulated to the public before commercialization and for the purpose of producing sales.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1628. Syngenta also distributed misleading written advertisements and promotional materials to the public for the purpose of inducing sales, including a "Request for Bio-Safety Certificates," which suggested that Viptera could be exported to China, and a "Plant with Confidence Fact Sheet," which contained deceptive statements regarding the importance of China as an export market. Based on Syngenta's knowledge of the Chinese regulatory process and its knowledge of past contamination events, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to their consequences.

1629. Syngenta also failed to disclose material information to corn farmers. Syngenta did not disclose the threat of contamination and the attendant threat to the export market posed by Viptera and/or Duracade. Syngenta also failed to disclose, at minimum, in 2010-2011 that it would not have import approval from China by the 2011 crop year and in 2011-2012 that it would not have import approval from China by the 2012 crop year, and failed to disclose that China was a significant and growing import market. Syngenta further failed to disclose at all relevant times the insufficiency of its approval request to China and that it sought approval to cultivate MIR162 in China, both of which Syngenta knew would cause delay in China's approval process for MIR162. Syngenta also failed to disclose, and suppressed and concealed, that there was not (and would not be) an effective system in place for isolating or channeling Viptera and/or Duracade and the very high likelihood that MIR162 would move into export channels where it was not approved, causing market disruption.

1630. Syngenta's failure to disclose material information and false and misleading representations and omissions occurred in the course of its business and caused damage to a large portion of the public, including Rhode Island Plaintiffs. Rhode Island Plaintiffs lack the sophistication and bargaining power in matters concerning genetically modified products.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1631. As a developer of genetically modified products, Syngenta has special knowledge of regulatory matters and facts pertaining to the content and status of its application for foreign approvals to which Rhode Island Plaintiffs do not have access.

1632. Syngenta also has special knowledge regarding the systems it did and did not institute for isolating and channeling its genetically modified products, including Viptera and Duracade, which was not available to Rhode Island Plaintiffs.

1633. Syngenta knew that approval from China would not be forthcoming for (at least) the 2011 and 2012 growing seasons and knew that systems were not in place for either isolation or effectively channeling Viptera and Duracade and that absent robust isolation practices and effective channeling, it was virtually certain that Viptera or Duracade would disseminate throughout the U.S. corn supply.

1634. Syngenta engaged in these deceptions in order to sell and increase its sales of Viptera and Duracade, despite Syngenta's further knowledge that the more acres grown with them, the more likely it would be that Viptera and Duracade would disseminate into the U.S. corn supply and farmers would be harmed.

1635. Syngenta knew that Rhode Island Plaintiffs are affected by its business and depend on it for responsible commercialization practices.

1636. In equity and good conscience, Syngenta had a duty to disclose the truth – that import approval from China (a key market) was not expected or reasonably likely to occur for (at least) the 2011 and 2012 growing seasons, that there was not an effective system in place to channel Viptera and Duracade away from China (or other foreign markets) from which Syngenta did not have approval, and that purchasing and planting Viptera (and later Duracade) created a substantial risk of loss of the Chinese market and/or prolonging the loss of that market.

27-CV-15-13785
Filed in Fourth Judicial District Court

Hennepin County, MN

1637. Syngenta's deceptive trade practices have impacted Rhode Island Plaintiffs, as well as other corn farmers outside of Rhode Island Plaintiffs, including corn farmers who purchased and planted Viptera and/or Duracade.

1638. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

1639. Syngenta's deceptive trade practices constitute a violation of the DTPA. Rhode Island Plaintiffs were injured in the course of their business or occupation as the result of Syngenta's deceptive trade practices.

1640. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional and taken in bad faith.

1641. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to Rhode Island Plaintiffs.

1642. Rhode Island Plaintiffs are thus entitled to damages three times the actual damages sustained, plus their attorney's fees and costs incurred in this action.

1643. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of Rhode Island Plaintiffs. Punitive damages are therefore warranted.

Count 157 - Negligence
(On Behalf of South Carolina Plaintiffs)

1644. South Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1645. Syngenta owed its stakeholders, including South Carolina Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1646. Syngenta also owed an independent duty of care to South Carolina Plaintiffs.

1647. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1648. Syngenta's negligence directly and proximately caused harm to South Carolina Plaintiffs. Those damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell corn to the Chinese market.

1649. South Carolina Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1650. Syngenta acted with reckless disregard for the rights of South Carolina Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 158 - Trespass to Chattels
(On behalf of South Carolina Plaintiffs)

1651. South Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1652. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which South Carolina Plaintiffs had possession and/or possessory rights.

1653. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with South Carolina Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1654. As a result of the trespass, South Carolina Plaintiffs' chattels were impaired as to condition, quality, or value, and South Carolina Plaintiffs were damaged.

1655. South Carolina Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1656. Syngenta acted with reckless disregard for the rights of South Carolina Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 159 - Tortious Interference
(On behalf of South Carolina Plaintiffs)

1657. South Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1658. South Carolina Plaintiffs had business relationships and reasonable expectancy of continued relationships with purchasers of corn.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1659. Syngenta also owed an independent duty of care to South Carolina Plaintiffs.

1660. Syngenta had knowledge of such business and expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that such business and expectancy existed.

1661. Syngenta's conduct interfered with and disrupted that business and expectancy without justification or privilege.

1662. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with these Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1663. Syngenta's interference has proximately caused damage to South Carolina Plaintiffs.

1664. South Carolina Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1665. Syngenta acted with reckless disregard for the rights of South Carolina Plaintiffs; or in the alternative, breached its duties intentionally and with malice. Punitive damages are therefore warranted.

Count 160 - Private Nuisance
(On Behalf of South Carolina Plaintiffs)

1666. South Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1667. Syngenta's actions constitute a private nuisance to South Carolina Plaintiffs contaminating the U.S. corn supply. Syngenta has substantially and unreasonably interfered with South Carolina Plaintiffs' quiet use and enjoyment of their land and/or property interests.

1668. Syngenta's actions were intentional and caused significant harm to South Carolina Plaintiffs.

1669. Syngenta's actions proximately caused damage to South Carolina Plaintiffs.

1670. South Carolina Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1671. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including South Carolina Plaintiffs. Punitive damages are thus warranted.

Count 161 - Unfair Trade Practices
S.C. Code Ann. § 39-5-10, *et seq*.
(On Behalf of South Carolina Plaintiffs)

1672. South Carolina Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1673. Under the Unfair Trade Practices Act "Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful."

1674. The UTPA provides a private cause of action for "Any person who suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of an unfair or deceptive method, act or practice declared unlawful by § 39-5-20 may bring an action individually, but not in a representative capacity, to recover actual damages."

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1675. Syngenta knowingly and recklessly made numerous false and deceptive representations with the intent of deceiving South Carolina Plaintiffs and to induce Producers and Non-Producers to purchase Viptera and/or Duracade seed and corn.

1676. Syngenta made numerous misrepresentations pertaining to the status of China's import approval for MIR162. Among others, and as more fully set forth above, Syngenta during the summer of 2011, represented to stakeholders, including growers (to encourage further sales, planting and harvesting of MIR162), that it would receive China's approval in March 2012.

1677. Syngenta continued making this misrepresentation throughout the planting and harvesting season in 2011 and into 2012. On April 18, 2012, Syngenta's Chief Executive Officer, Michael Mack, stated that he expected China to approve Viptera "quite frankly within the matter of a couple of days." Based on Syngenta's knowledge of the Chinese regulatory process and its own status within that process for MIR162, Syngenta knew these representations were false and/or made these representations recklessly and willfully without regard to its consequences.

Hennepin County, MN

1688. Syngenta's deceptive trade practices have impacted South Carolina Plaintiffs, as well as other corn farmers outside of South Carolina Plaintiffs, including corn farmers who purchased and planted Viptera and/or Duracade.

1689. Syngenta's deceptive trade practices have previously impacted actual or potential consumers of its products through the loss of the export market of China. Syngenta's deceptive practices have the significant potential to cause further disruption to the corn export market in the future.

1690. Syngenta's deceptive trade practices constitute a violation of the UTPA. South Carolina Plaintiffs were injured in the course of their business or occupation as the result of Syngenta's deceptive trade practices.

1691. Syngenta's deceptive trade practices were fraudulent, willful, knowing, or intentional and taken in bad faith.

1692. Syngenta's deceptive trade practices proximately caused an injury in fact to a legally protected interest belonging to South Carolina Plaintiffs.

1693. The public has an interest in ensuring that the deceptive trade practices by Syngenta are not repeated in the future.

1694. South Carolina Plaintiffs thus entitled to damages three times the actual damages sustained, plus their attorney's fees and costs incurred in this action.

1695. Syngenta acted with fraud, malice, and wanton and reckless disregard of the rights of South Carolina Plaintiffs. Punitive damages are therefore warranted.

Count 162 - Negligence
(On Behalf of South Dakota Plaintiffs)

1696. South Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1697. Syngenta owed its stakeholders, including South Dakota Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1698. Syngenta breached that duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1699. Syngenta's negligence proximately caused harm to South Dakota Plaintiffs, including damaged corn and reduced corn prices.

1700. South Dakota Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1701. Syngenta's conduct was willful and wanton and indicated a reckless disregard for the rights of South Dakota Plaintiffs. Punitive damages are thus warranted.

Count 163 - Trespass to Chattels
(On Behalf of South Dakota Plaintiffs)

1702. South Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1703. By commercializing Viptera and Duracade prematurely and without adequate

Hennepin County, MN

systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which South Dakota Plaintiffs had possession and/or possessory rights.

1704. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with South Dakota Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1705. As a result of the trespass, South Dakota Plaintiffs' chattels were impaired as to condition, quality, or value, and South Dakota Plaintiffs were damaged.

1706. South Dakota Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1707. Syngenta's conduct was willful and wanton and indicated a reckless disregard for the rights of South Dakota Plaintiffs. Punitive damages are thus warranted.

Count 164 - Consumer Protection Act
S.D.C.L. § 37-24-1, *et seq.*
(On Behalf of South Dakota Plaintiffs)

1708. South Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1709. The South Dakota Deceptive Trade Practices and Consumer Protection Act provides a private right of action for damages by any person who claims to have been adversely affected by any act or practice declared to be unlawful by S.D.C.L. § 37-24-6. S.D.C.L. § 37-24-31.

1710. The Act declares unlawful certain conduct deemed to be a "deceptive act or practice," including but not limited to:

> Knowingly act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any

27-CV-15-13785

Hennepin County, MN

material fact in connection with the sale or advertisement of any merchandise, regardless of whether any person has in fact been misled, deceived, or damaged thereby.

S.D.C.L. § 37-24-6(1).

1711. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

1712. By deceiving South Dakota Plaintiffs into believing that Viptera would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed South Dakota Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

1713. Syngenta's acts took place in, or affected commerce in, South Dakota.

1714. Syngenta's acts and omissions proximately caused the injuries and damages sustained by South Dakota Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell corn to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1715. South Dakota Plaintiffs are entitled to an aware of compensatory damages and pre- and post-judgment interest.

1716. Syngenta engaged in conduct involving oppression, fraud, or malice, as well as conduct that manifested a knowing and reckless indifference towards the rights of others, thus entitling South Dakota Plaintiffs to an award of punitive damages under S.D.C.L. § 21-3-2.

Count 165 - Tortious Interference
(On Behalf of South Dakota Plaintiffs)

1717. South Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1718. To establish a claim for tortious interference with business relationships or expectancy under South Dakota law, a plaintiff must prove (1) the existence of a valid business relationship or expectancy; (2) knowledge by the interferer of the relationship or expectancy; (3) an intentional and unjustified act of interference on the part of the interferer; (4) proof that the interference caused the harm sustained; and (5) damage to the party whose relationship or expectancy was disrupted. *Tibke v. McDougall,* 479 N.W.2d 898, 908 (S.D. 1992).

1719. South Dakota Plaintiffs had valid business relationships or expectancies with purchasers of corn, and expectancies that those business relationships and purchases would continue without interference.

1720. Syngenta had knowledge of the business relationships and expectancies that South Dakota Plaintiffs had with purchasers of corn.

1721. Syngenta acted intentionally or without justification through material misrepresentations and omissions of material facts concerning the marketability of its Viptera and/or Duracade corn products, and by prematurely marketing those products leading to the contamination of fields, storage units, equipment, grain elevators owned and/or operated by South

Dakota Plaintiffs as well as other facilities in the U.S. supply chain.

1722. Syngenta's acts took place in, or affected commerce in, South Dakota.

1723. This interference by Syngenta proximately caused substantial harm to South Dakota Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1724. South Dakota Plaintiffs are entitled to an aware of compensatory damages and pre- and post-judgment interest.

1725. Syngenta engaged in conduct involving oppression, fraud, or malice, as well as conduct that manifested a knowing and reckless indifference towards the rights of others, thus entitling South Dakota Plaintiffs to an award of punitive damages under S.D.C.L. § 21-3-2.

Count 166 - Consumer Protection Act
S.D.C.L. § 37-24-1 *et seq.*
(On Behalf of South Dakota Plaintiffs)

1726. South Dakota Plaintiffs incorporate paragraphs 1-299 as if set forth herein.

1727. The South Dakota Deceptive Trade Practices and Consumer Protection Act provides a private right of action for damages by any person who claims to have been adversely affected by any act or practice declared to be unlawful by S.D.C.L. § 37-24-6. S.D.C.L. § 37-24-31.

1728. The Act declares unlawful certain conduct deemed to be a "deceptive act or practice," including but not limited to:

> Knowingly act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise, regardless of whether any person has in fact been misled, deceived, or damaged thereby.

S.D.C.L. § 37-24-6(1).

Count 167 - Tortious Interference
(On Behalf of South Dakota Plaintiffs)

1734. South Dakota Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1735. To establish a claim for tortious interference with business relationships or expectancy under South Dakota law, a plaintiff must prove (1) the existence of a valid business relationship or expectancy; (2) knowledge by the interferer of the relationship or expectancy; (3) an intentional and unjustified act of interference on the part of the interferer; (4) proof that the interference caused the harm sustained; and (5) damage to the party whose relationship or expectancy was disrupted.

1736. South Dakota Plaintiffs had valid business relationships or expectancies with purchasers of corn and expectancies that those business relationships and purchases would continue without interference.

1737. Syngenta had knowledge of the business relationships and expectancies that South Dakota Plaintiffs had with purchasers of corn.

1738. Syngenta acted intentionally or without justification through material misrepresentations and omissions of material facts concerning the marketability of its Viptera and Duracade corn products, and by prematurely marketing those products leading to the contamination of South Dakota Plaintiffs' fields, storage units, equipment, grain elevators as well as other facilities in the U.S. supply chain.

1739. Syngenta's acts took place in, or affected commerce in, South Dakota.

1740. This interference by Syngenta proximately caused substantial harm to South Dakota Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1741. Syngenta engaged in conduct involving oppression, fraud, or malice, as well as conduct that manifested a knowing and reckless indifference towards the rights of others, thus entitling the South Dakota Plaintiffs to an award of punitive damages under S.D.C.L. § 21-3-2.

Count 168 - Private Nuisance
(On Behalf of South Dakota Plaintiffs)

1742. South Dakota Plaintiffs incorporate by reference Paragraphs 1-299 as if set forth herein.

1743. Syngenta's actions constituted a private nuisance to South Dakota Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet enjoyment of South Dakota Plaintiffs' land and/or property interests.

1744. Syngenta's conduct constitutes interference that was negligent. Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of South Dakota Plaintiffs' land and/or interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct, and knew that it would substantially interfere with South Dakota Plaintiffs' private use and enjoyment of their land and/or property interests.

1745. Syngenta's actions proximately caused damage to South Dakota Plaintiffs.

1746. Syngenta's conduct included acts and omissions involving oppression, fraud, or malice, as well as conduct that manifested a knowing and reckless indifference towards the rights of others, thus entitling South Dakota Plaintiffs to an award of punitive damages under S.D.C.L. § 21-3-2.

Count 169 - Negligence
(On Behalf of Tennessee Plaintiffs)

1747. Tennessee Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1748. Syngenta owed a duty of at least reasonable care to its stakeholders, including Tennessee Plaintiffs, in the timing, scope, and terms under which it commercialized MIR162.

1749. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and /or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1750. Syngenta's negligence is a direct and proximate cause of the injuries and damages sustained by Tennessee Plaintiffs, including damaged corn and reduced corn.

1751. Tennessee Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1752. Syngenta acted maliciously, intentionally, or recklessly in disregard of the rights of Tennessee Plaintiffs. Punitive damages are therefore warranted under T.C.A. § 29- 39-104.

27-CV-15-13785
Filed in Fourth Judicial District Court

Hennepin County, MN

Count 170 - Trespass to Chattels
(On Behalf of Tennessee Plaintiffs)

1753. Tennessee Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1754. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Tennessee Plaintiffs had possession and/or possessory rights.

1755. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Tennessee Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1756. As a result of the trespass, Tennessee Plaintiffs' chattels were impaired as to condition, quality, or value, and they were damaged.

1757. Tennessee Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1758. Syngenta acted maliciously, intentionally, or recklessly in disregard of the rights of Tennessee Plaintiffs. Punitive damages are therefore warranted under T.C.A. § 29-39-104.

Count 171 - Tortious Interference
(On Behalf of Tennessee Plaintiffs)

1759. Tennessee Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1760. Tennessee Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1761. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1762. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1763. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was intentional, and contaminated Tennessee Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with the use of their property and in violation of Syngenta's duty of care.

1764. Syngenta's interference has proximately caused damage to Tennessee Plaintiffs.

1765. Tennessee Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1766. Syngenta acted maliciously, intentionally, or recklessly in disregard of the rights of Tennessee Plaintiffs. Punitive damages are therefore warranted under T.C.A. § 29- 39-104.

Count 172 - Private Nuisance
(On Behalf of Tennessee Plaintiffs)

1767. Tennessee Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1768. Syngenta's actions constitute a private nuisance to Tennessee Plaintiffs. By contaminating the U.S. corn supply, Syngenta has substantially and unreasonably disturbed the free use of their property.

1769. Syngenta's actions proximately caused damage to Tennessee Plaintiffs.

1770. Tennessee Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1771. Syngenta acted maliciously, intentionally, or recklessly in disregard of the rights of Tennessee Plaintiffs. Punitive damages are therefore warranted under T.C.A. § 29-39-104.

Count 173 – Tennessee Consumer Protection Act
T.C.A. § 47-18-104
(On Behalf of Tennessee Plaintiffs)

1772. Tennessee Plaintiffs incorporate paragraphs 1-299 as if set forth herein.

1773. The Tennessee Consumer Protection Act provides for a private right of action by any person injured by another's use of any method, act or practice declared unlawful under the Act. T.C.A. § 47-18-109.

1774. Unfair or deceptive acts or practices shall include, but are not limited to:

a. "Causing likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;"

b. "Causing likelihood of confusion or of misunderstanding as to affiliation, connection, or association with, or certification by another;"

c. "Using deceptive representations or designations of origin in connection with goods or services;"

d. "Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;" and

e. "Representing that goods or services are of a particular standard, quality, grade, or that goods are of a particular style or model, if they are of another." T.C.A. § 47-18-104 (2-5)(7).

1775. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

1776. By deceiving Tennessee Plaintiffs into believing that Viptera would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Tennessee Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

1777. Syngenta's acts took place in, or affected commerce in, Tennessee.

1778. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Tennessee Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1779. Tennessee Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1780. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, Tennessee Plaintiffs are also entitled to an award of punitive damages.

Count 174 - Negligence
(On Behalf of Texas Plaintiffs)

1781. Texas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1782. Syngenta owed a duty of at least reasonable care to its stakeholders, including Texas Plaintiffs, in the timing, scope, and terms under which it commercialized MIR162.

1783. Syngenta breached its duty by acts and omissions including but not limited to:

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and /or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1784. Syngenta's negligence proximately caused harm to Texas Plaintiffs, including but not limited to damaged corn and reduced corn prices.

1785. Texas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1786. Syngenta's actions and omissions, when viewed objectively from Syngenta's viewpoint at the time of the actions and omissions, involved an extreme degree of risk, considering the probability and magnitude of the potential harm to others. Syngenta had actual, subjective awareness of the risk, but proceeded with a conscious disregard for the rights, safety, or welfare of others. Punitive damages are thus warranted.

Count 175 - Trespass to Chattels
(On Behalf of Texas Plaintiffs)

1787. Texas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1788. Syngenta intentionally interfered with property belonging to Texas Plaintiffs by commercializing Viptera and Duracade prematurely and without adequate systems to isolate and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

channel it, and thus bringing Viptera and Duracade into contact with non-Viptera/Duracade corn in which Texas Plaintiffs had possession and/or possessory rights.

1789. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Texas Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1790. As a result of the trespass, Texas Plaintiffs' chattels were damaged.

1791. Texas Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1792. Syngenta's actions and omissions, when viewed objectively from Syngenta's viewpoint at the time of the actions and omissions, involved an extreme degree of risk, considering the probability and magnitude of the potential harm to others. Syngenta had actual, subjective awareness of the risk, but proceeded with a conscious disregard for the rights, safety, or welfare of others. Punitive damages are therefore warranted.

Count 176 - Tortious Interference
(On Behalf of Texas Plaintiffs)

1793. Texas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1794. Texas Plaintiffs had business relationships and a reasonable expectancy of continued relationships with purchasers of corn.

1795. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1796. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1797. Syngenta's conduct was intentional, improper, and wrongful because, among other things, it was accomplished with misrepresentations and omissions of material fact, was

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

intentional, and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities of the U.S. supply chain, constituting a trespass and interference with Plaintiffs' use of their property and in violation of Syngenta's duty of care.

1798. Syngenta's interference has proximately caused damage to exas Plaintiffs.

1799. Texas Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

Syngenta's actions and omissions, when viewed objectively from Syngenta's viewpoint at the time of the actions and omissions, involved an extreme degree of risk, considering the probability and magnitude of the potential harm to others. Syngenta had actual, subjective awareness of the risk, but proceeded with a conscious disregard for the right, safety or welfare of others. Punitive damages are therefore warranted.

Count 177 - Private Nuisance
(On Behalf of Texas Plaintiffs)

1800. Texas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1801. Syngenta's actions constituted a private nuisance to Texas Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet enjoyment of Texas Plaintiffs' land and/or property interests.

1802. Syngenta's conduct constitutes interference that was negligent. Syngenta knew or should have known that its conduct involved an unreasonable risk of interfering with or causing an invasion of Texas Plaintiffs' land and/or interest in land. Additionally, or in the alternative, Syngenta's actions were intentional and unreasonable because Syngenta knew that its invasion would result from its conduct and knew that it would substantially interfere with Texas Plaintiffs' private use and enjoyment of their land and/or property interests.

1803. Syngenta's actions proximately caused damage to Texas Plaintiffs.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1804. Texas Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1805. Syngenta's actions and omissions, when viewed objectively from Syngenta's viewpoint at the time of the actions and omissions, involved an extreme degree of risk, considering the probability and magnitude of the potential harm to others. Syngenta had actual, subjective awareness of the risk, but proceeded with a conscious disregard for the rights, safety, or welfare of others. Punitive damages are therefore warranted.

Count 178 – Texas Deceptive Trade Practices-Consumer Protection Act V.T.C.A. § 17.41 (On Behalf of Texas Plaintiffs)

1806. Texas Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1807. The Deceptive Trade Practices-Consumer Protection Act provides for a private right of action by any person injured by another's use of any method, act or practice declared unlawful under the Act. V.T.C.A. § 17-50.

1808. Unfair or deceptive acts or practices shall include, but are not limited to:

a. "Causing confusion or misunderstanding as to the source, sponsorship, approval, or certification of goods or services;"

b. "Causing confusion or misunderstanding as to affiliation, connection, or association with, or certification by another;"

c. "Using deceptive representations or designations of origin in connection with goods or services;"

d. "Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;" and

e. "Representing that goods or services are of a particular standard, quality, grade, or that goods are of a particular style or model, if they are of another." V.T.C.A. § 17-46 (b).

Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1809. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon expert markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Through statements in marketing materials published in the Internet such as its "Plant With Confidence" fact sheet; and

e. Through other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

1810. By deceiving Plaintiffs into believing that Viptera would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Texas Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

1811. Syngenta's acts took place in, or affected commerce in, Texas.

1812. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Texas Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1813. Texas Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1814. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Therefore, Texas Plaintiffs are also entitled to an award of punitive damages.

Count 179 - Negligence
(On Behalf of Utah Plaintiffs)

1815. Utah Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1816. Syngenta owed its stakeholders, including Utah Plaintiffs, a duty to use reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1817. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to the loss of the Chinese market.

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1818. Syngenta's acts took place in, or affected commerce in, Utah.

1819. Syngenta's actions and omissions proximately caused the injuries and damages sustained by Utah Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices.

1820. Utah Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1821. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, Utah Plaintiffs are also entitled to an award of punitive damages under Utah Code Ann. § 78B-8-201.

Count 180 - Trespass to Chattels
(On Behalf of Utah Plaintiffs)

1822. Utah Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1823. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Utah Plaintiffs had possession or possessory rights.

1824. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Utah Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes or storage and transport.

1825. As a result of the trespass, Utah Plaintiffs' corn was impaired as to its condition, quality, and/or value.

1826. Syngenta's acts took place in, or affected commerce in, Utah.

1827. Syngenta's actions and omissions proximately caused the injuries and damages sustained by Utah Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices.

1828. Utah Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1829. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Therefore, Utah Plaintiffs are also entitled to an award of punitive damages under Utah Code Ann. § 78B-8-201.

Count 181 - Tortious Interference
(On Behalf of Utah Plaintiffs)

1830. Utah Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1831. Utah Plaintiffs had business relationships with purchasers of corn and an expectancy that those business relationships and purchases would continue.

1832. Syngenta acted intentionally through material misrepresentations and omissions of material facts and by contaminating the fields, storage units, equipment, grain elevators owned and/or operated by Utah Plaintiffs, as well as other facilities in the U.S. supply chain.

1833. This interference by Syngenta proximately caused substantial harm to Utah Plaintiffs by inducing or causing a disruption of their business expectancy without justification or privilege.

1834. Syngenta's acts took place in, or affected commerce in, Utah.

1835. Utah Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1836. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, Utah Plaintiffs are also entitled to an award of punitive damages under Utah Code Ann. § 78B-8-201.

Count 182 - Private Nuisance
(On Behalf of Utah Plaintiffs)

1837. Utah Plaintiffs incorporates by reference paragraphs 1-299 as if set forth herein.

1838. Syngenta's actions have contaminated the corn crop in Utah and throughout the U.S., thereby reducing the market for Utah corn.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1839. Syngenta's contamination of the corn crop constitutes a substantial and unreasonable interference with the private use and enjoyment of the land owned or possessed by Utah Plaintiffs.

1840. Syngenta's acts took place in, or affected commerce in, Utah. Syngenta's actions and omissions proximately caused the injuries and damages sustained by Utah Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1841. Utah Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1842. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, Utah Plaintiffs are also entitled to an award of punitive damages under Utah Code Ann. § 78B-8-201.

Count 183 - Utah Consumer Protection Act, § 13-11-1, *et al*.
(On Behalf of Utah Plaintiffs)

1843. Utah Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1844. The Utah Consumer Sales Practices Act provides a private right of action by any consumer who "suffers loss as a result of a violation" of the Act. Utah Code Ann. § 13-11-19.

1845. The Act states that any "deceptive acts or practices by a supplier" as well as any "unconscionable acts or practices by a supplier" violate the Act. *Id*. § 13-11-4.

1846. The list of prohibited practices include, among others:

a. Indicating that the subject of a consumer transaction has sponsorship, approval, performance characteristics, uses or benefits, if it does not;

b. Indicating that the subject of a consumer transaction is of a particular standard, quality, grade, style, model, if it is not;

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

c. Indicating that the subject of a consumer transaction has been supplied in accordance with a previous representation, if it has not;

d. Indicating that the supplier has a sponsorship, approval, or affiliation the supplier does not have; and

e. Engaging in any unconscionable act or practice in connection with a consumer transaction, as determined as a question of law by a court.

Utah Code Ann. § 13-11-4 (2)(a), (2)(b), (2)(e), (2)(i); § 13-11-5(1)-(2).

1847. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

1848. By deceiving Utah Plaintiffs into believing that Viptera would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Utah Plaintiffs as a result of China's rejection of MIR162 depressed the market for U.S. corn.

1849. Syngenta's acts took place in, or affected commerce in, Utah.

1850. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Utah Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1851. Utah Plaintiffs are entitled to compensatory damages and pre-judgment and post-judgment interest.

1852. Syngenta engaged in willful, malicious, and intentionally fraudulent conduct, as well as conduct that manifested a knowing and reckless indifference towards the rights of others. Therefore, Utah Plaintiffs are also entitled to an award of punitive damages under Utah Code Ann. § 78B-8-201.

Count 184 - Negligence
(On Behalf of Vermont Plaintiffs)

1853. Vermont Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1854. Syngenta owed its stakeholders, including Vermont Plaintiffs, a duty to use reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1855. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to the loss of the Chinese market.

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1856. Syngenta's acts took place in, or affected commerce in, Vermont.

1857. Syngenta's acts and omissions proximately caused the injuries and damages

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

sustained by Vermont Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell corn to the Chinese market.

1858. Vermont Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1859. Syngenta's conduct was wrongful, reprehensible, completed with malice, and in reckless disregard for the rights of others. Vermont Plaintiffs are thus entitled to an award of punitive damages under Vermont law. *See Fly Fish Vermont, Inc. v. Chapin Hill Estates, Inc.*, 2010 VT 33, ¶ 18, 187 Vt. 541, 548, 996 A.2d 1167, 1173 (2010).

Count 185 - Trespass to Chattels
(On Behalf of Vermont Plaintiffs)

1860. Vermont Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1861. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Vermont Plaintiffs had possession or possessory rights.

1862. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Vermont Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes or storage and transport.

1863. As a result of the trespass, Vermont Plaintiffs' corn was impaired as to its condition, quality, and/or value.

1864. Syngenta's acts took place in, or affected commerce in, Vermont.

1865. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Vermont Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1866. Vermont Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1867. Syngenta's conduct was wrongful, reprehensible, completed with malice, and in reckless disregard for the rights of others, which supports an award of punitive damages under Vermont law. *See Fly Fish Vermont, Inc.*, 996 A.2d at 1173.

Count 186 - Tortious Interference
(On Behalf of Vermont Plaintiffs)

1868. Vermont Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1869. Vermont Plaintiffs had business relationships with purchasers of corn and an expectancy that those business relationships and purchases would continue.

1870. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1871. Syngenta induced or caused a disruption of that expectancy without justification or privilege and thereby proximately caused substantial harm to Vermont Plaintiffs.

1872. Syngenta acted intentionally through material misrepresentations and omissions of material facts and by contaminating the fields, storage units, equipment, grain elevators owned and/or operated by Vermont Plaintiffs, as well as other facilities in the U.S. supply chain.

1873. Syngenta's acts took place in, or affected commerce in, Vermont.

1874. Vermont Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1875. Syngenta's conduct was wrongful, reprehensible, completed with malice, and in reckless disregard for the rights of others, which supports an award of punitive damages under Vermont law. *See Fly Fish Vermont, Inc.*, 996 A.2d at 1173.

Hennepin County, MN

Count 187 - Private Nuisance
(On Behalf of Vermont Plaintiffs)

1876. Vermont Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1877. Syngenta's actions have contaminated the corn crop in Vermont and throughout the U.S., thereby reducing the market for Vermont corn.

1878. Syngenta's contamination of the corn crop constitutes a substantial and unreasonable interference with the private use and enjoyment of the land owned or possessed by Vermont Plaintiffs.

1879. Syngenta's acts took place in, or affected commerce in, Vermont.

1880. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Vermont Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

1881. Vermont Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1882. Syngenta's conduct was wrongful, reprehensible, completed with malice, and in reckless disregard for the rights of others, which supports an award of punitive damages under Vermont law. *See Fly Fish Vermont, Inc.*, 996 A.2d at 1173.

Count 188 - Vermont Consumer Fraud Act
Vt. Stat. Ann. tit. 9, § 2451 *et seq.*
(On Behalf of Vermont Plaintiffs)

1883. Vermont Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1884. The Vermont Consumer Fraud Act provides a private right of action by any consumer who purchases or leases goods or services and is harmed by a practice that is declared unlawful by the Act. Vt. Stat. Ann. tit. 9, § 2461(b).

1885. The Act states that "unfair or deceptive acts or practices in commerce, are hereby

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

declared unlawful" as interpreted according to Section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45. *Id.* § 2453.

1886. Whether conduct is "unfair" under the Act is determined by a number of factors, including "(1) whether the act offends public policy, (2) whether it is immoral, unethical, oppressive or unscrupulous, and (3) whether it causes substantial injury to consumers." *Drake v. Allergan, Inc.*, 63 F. Supp. 3d 382, 393 (D. Vt. 2014).

1887. To establish a "deceptive practice" under the Act, "(1) there must be a representation, omission, or practice likely to mislead consumers; (2) the consumer must be interpreting the message reasonably under the circumstances; and (3) the misleading effects must be material, that is, likely to affect the consumer's conduct or decision regarding the product." *Madowitz v. Woods at Killington Owners' Ass'n, Inc.*, 2014 VT 21, ¶ 23, 196 Vt. 47, 57, 93 A.3d 571, 579 (2014).

1888. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 was expected at a time when Syngenta knew that it was not.

1889. By deceiving Vermont corn farmers into believing that thViptera would be

27-CV-15-13785
Filed in Fourth Judicial District Court

Hennepin County, MN

marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Vermont Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

1890. Syngenta's acts took place in, or affected commerce in, Vermont.

1891. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Vermont Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell corn to the Chinese market.

1892. Vermont Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1893. Syngenta's conduct was wrongful, reprehensible, completed with malice, and in reckless disregard for the rights of others, which supports an award of punitive damages under Vermont law. *See Fly Fish Vermont, Inc.*, 996 A.2d at 1173.

Count 189 - Negligence
(On Behalf of Virginia Plaintiffs)

1894. Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1895. Syngenta owed its stakeholders, including Virginia Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1896. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1897. Syngenta's negligence directly and proximately caused harm to Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell corn to the Chinese market.

1898. Virginia Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1899. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Virginia Plaintiffs, and was aware that harm would likely or probably result. Punitive damages are thus warranted.

Count 190 – Trespass to Chattels
(On Behalf of Virginia Plaintiffs)

1900. Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1901. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Virginia Plaintiffs had possession and/or possessory rights.

1902. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Virginia Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1903. As a result of the trespass, Virginia Plaintiffs' corn was impaired as to condition, quality, or value.

1904. Syngenta's actions took place, or affected commerce, in Virginia.

1905. Syngenta's acts and omissions proximately caused damage to Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

1906. Virginia Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1907. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Virginia Plaintiffs. Punitive damages are thus warranted.

Count 191 – Tortious Interference
(On Behalf of Virginia Plaintiffs)

1908. Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1909. Virginia Plaintiffs had business relationships with purchasers of corn and a reasonable expectancy that those relationships would continue.

1910. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1911. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1912. Syngenta's conduct was intentional and improper because, among other things, it was accomplished with misrepresentations and omissions of material fact and contaminated fields, storage units, equipment, grain elevators and other facilities in the U.S. supply chain.

1913. Syngenta's acts took place, or affected commerce, in Virginia.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1914. Syngenta's interference has proximately caused damage to Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

1915. Virginia Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1916. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Virginia Plaintiffs. Punitive damages are thus warranted.

Count 192 – Private Nuisance
(On Behalf of Virginia Plaintiffs)

1917. Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1918. Syngenta's actions have contaminated the corn crop in Virginia and throughout the U.S., thereby reducing the market for Virginia corn.

1919. Syngenta's contamination of the corn crop constitutes a substantial and unreasonable interference with the private use and enjoyment of the land and/or property owned or possessed by Virginia Plaintiffs.

1920. Syngenta's actions and omissions proximately caused the injuries and damages sustained by Virginia Plaintiffs.

1921. Virginia Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1922. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, Virginia Plaintiffs are also entitled to an award of punitive damages.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM

Count 193 – Virginia Consumer Protection Act
Va. Code Ann. § 59.1-196 *et seq*.
(On Behalf of Virginia Plaintiffs)

1923. Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1924. The Virginia Consumer Protection Act provides for a private cause of action by any person who suffers loss as the result of a violation of the Act. Va. Code Ann. § 59.1-204(A).

1925. The Act states that certain "fraudulent acts or practices committed by a supplier in connection with a consumer transaction are hereby declared unlawful," including among other things:

- Misrepresenting the source, sponsorship, approval, or certification of goods or services;
- Misrepresenting that goods or services have certain quantities, characteristics, ingredients, uses, or benefits;
- Misrepresenting that goods or services are of a particular standard, quality, grade, style, or model; and
- Using any other deception, fraud, false pretense, false promise, or misrepresentation in connection with a consumer transaction.

Va. Code Ann. § 59.1-200(A)(2), (5), (6), and (14).

1926. Syngenta committed a number of such fraudulent acts or practices, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1927. By deceiving Virginia corn farmers into believing that Viptera and/or Duracade would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Virginia corn farmers as a result of China's rejection of Viptera depressed the market for U.S. corn.

1928. Syngenta's acts took place in, or affected commerce in, Virginia.

1929. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

1930. Virginia Plaintiffs are entitled to an award of compensatory damages and pre- and post-judgment interest, as well as treble damages because Syngenta's violation of the Act was willful. Va. Code Ann. § 59.1-204(A).

1931. Virginia Plaintiffs are also entitled to attorney's fees and costs under Va. Code Ann. § 59.1-204(B).

1932. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of Plaintiffs. Therefore, Virginia Plaintiffs are also entitled to an award of punitive damages.

Count 194 – Negligence
(On Behalf of Washington Plaintiffs)

1933. Washington Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1934. Syngenta owed its stakeholders, including Washington Plaintiffs, a duty to use at least reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1935. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1936. Syngenta's negligence directly and proximately caused harm to Washington Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1937. Washington Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1938. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others including Washington Plaintiffs and was aware that harm would likely or probably result. Punitive damages are thus warranted.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Count 195 – Trespass to Chattels
(On Behalf of Washington Plaintiffs)

1939. Washington Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1940. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Washington Plaintiffs had possession and/or possessory rights.

1941. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Washington Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

1942. As a result of the trespass, Washington plaintiffs' corn was impaired as to condition, quality, or value.

1943. Washington Plaintiffs are thus entitled to compensatory damages and pre- and post-judgment interest.

1944. Syngenta's acts and omissions proximately caused damage to Washington Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1945. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Washington Plaintiffs. Punitive damages are thus warranted.

Count 196 - Tortious Interference
(On Behalf of Washington Plaintiffs)

1946. Washington Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1947. Washington Plaintiffs had business relationships with purchasers of corn and a reasonable expectancy that those relationships would continue.

1948. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

1949. Syngenta induced or caused a disruption of that expectancy without justification or privilege.

1950. Syngenta's conduct was intentional and improper because, among other things, it was accomplished with misrepresentations and omissions of material fact and contaminated Plaintiffs' fields, storage units, equipment, grain elevators and other facilities in the U.S. supply chain.

1951. Syngenta's acts took place, or affected commerce, in Washington.

1952. Syngenta's interference has proximately caused damage to Washington Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

1953. Washington Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

1954. Syngenta acted consciously or deliberately with oppression, fraud, wantonness, and malice. Syngenta acted and failed to act with conscious disregard for the rights of others, including Washington Plaintiffs. Punitive damages are thus warranted.

Count 197 – Private Nuisance
(On Behalf of Washington Plaintiffs)

1955. Washington Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1956. Syngenta's actions, as described above, have contaminated the corn crop in

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Washington and throughout the U.S., thereby reducing the market for Washington corncorn.

1957. Syngenta's contamination of the U.S. corn crop constitutes a substantial and unreasonable interference with Washington Plaintiffs' private use and enjoyment of their land and/or property.

1958. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Washington Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell corn to the Chinese market.

1959. Washington Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1960. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of Washington Plaintiffs. Therefore, Washington Plaintiffs are also entitled to an award of punitive damages.

Count 198 – Washington Consumer Protection Act
Wa. Rev. Code § 19.86.010 *et seq*.
(On Behalf of Washington Plaintiffs)

1961. Washington Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1962. The Washington Consumer Protection Act provides a private cause of action by any person who is injured in his or her business or property by a violation of § 19.86.020 of the Act. Wash. Rev. Code § 19.86.090.

1963. Section 19.86.020 of the Act states that "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful."

27-CV-15-3785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1964. Syngenta engaged in numerous unfair methods or competition and unfair and deceptive acts or practices in the timing, scope and terms under which it commercialized Viptera and Duracade, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risk that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

1965. Syngenta's unfair practices and conduct was directed toward consumers of Viptera and Duracade as well as other corn Producers and Non-Producers. Syngenta intended consumers of Viptera and Duracade as well as other corn Producers and Non-ProducersProducers to rely on its acts and practices in commercializing and selling Viptera and Duracade as being done in a manner that would avoid negatively impacting corn expert markets.

1966. Syngenta's unfair practices and conduct had the capacity to injure, and did injure, consumers of Viptera and Duracade as well as other corn Producers and Non-ProducersProducers, including Washington Plaintiffs.

1967. Syngenta's acts took place in, or affected commerce in, Washington.

1968. Syngenta's actions and omissions proximately caused the injuries and damages

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

sustained by Washington Plaintiffs.

1969. Washington Plaintiffs are entitled to an award of compensatory damages, attorney's fees, costs, and treble damages as provided by Wash. Rev. Code § 19.86.090. Washington Plaintiffs' are also entitled to pre- and post-judgment interest.

1970. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, Washington Plaintiffs are entitled to an award of punitive damages.

Count 199 – Negligence
(On Behalf of West Virginia Plaintiffs)

1971. West Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1972. Syngenta owed its stakeholders, including West Virginia Plaintiffs, a duty to use reasonable care in the timing, scope, and terms under which it commercialized MIR162.

1973. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to the loss of the Chinese market.

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

approval of Viptera and/or Duracade.

1974. Syngenta's acts took place in, or affected commerce in, West Virginia.

1975. Syngenta's acts and omissions proximately caused the injuries and damages sustained by West Virginia Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell corn to the Chinese market.

1976. Because Syngenta acted in illegal restraint of trade, West Virginia Plaintiffs are entitled to an award of compensatory damages, treble damages, attorney's fees, filing fees, and other costs of the action under W. Va. Code § 47-18-9.

1977. West Virginia Plaintiffs are further entitled to pre- and post-judgment interest.

1978. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, West Virginia Plaintiffs are also entitled to an award of punitive damages. *See Mayer v. Frobe*, 40 W. Va. 246, 22 S.E. 58, 59 (1895).

Count 200 – Trespass to Chattels
(On Behalf of West Virginia Plaintiffs)

1979. West Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1980. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn and storage facilities in which West Virginia Plaintiffs had possession or possessory rights.

1981. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with West Virginia Plaintiffs' corn and facilities through contamination in fields and/or in grain elevators and other modes or storage and transport.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

1982. As a result of the trespass, West Virginia Plaintiffs' corn was impaired as to its condition, quality, and/or value.

1983. Syngenta's acts took place in, or affected commerce in, West Virginia.

1984. Syngenta's actions and omissions proximately caused the injuries and damages sustained by West Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

1985. West Virginia Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

1986. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, West Virginia Plaintiffs are also entitled to an award of punitive damages. *See Mayer*, 22 S.E. at 59.

Count 201 – Tortious Interference
(On Behalf of West Virginia Plaintiffs)

1987. West Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1988. West Virginia Plaintiffs had business relationships with purchasers of corn, and an expectancy that those business relationships and purchases would continue.

1989. Syngenta acted intentionally through material misrepresentations and omissions of material facts, and by contaminating the fields, storage units, equipment, grain elevators owned and/or operated by West Virginia Plaintiffs, as well as other facilities in the U.S. supply chain.

1990. Syngenta's acts took place in, or affected commerce in, West Virginia.

1991. This interference by Syngenta proximately caused substantial harm to West Virginia Plaintiffs. These damages include but are not limited to damaged corn product and

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

reduced corn prices based on the inability to sell to the Chinese market.

1992. Because SyngentaSyngenta acted in illegal restraint of trade, West Virginia Plaintiffs are entitled to an award of compensatory damages, treble damages, attorney's fees, filing fees, and other costs of the action, pursuant to W. Va. Code § 47-18-9.

1993. West Virginia Plaintiffs are further entitled to pre- and post-judgment interest.

1994. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, West Virginia Plaintiffs are also entitled to an award of punitive damages. *See Mayer*, 22 S.E. at 59.

Count 202 – Private Nuisance
(On Behalf of West Virginia Plaintiffs)

1995. West Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

1996. Syngenta's actions, as described above, have contaminated the corn crop in West Virginia and throughout the U.S., thereby reducing the market for the corn.

1997. Syngenta's contamination of the corn crop constitutes a substantial and unreasonable interference with West Virginia Plaintiffs' private use and enjoyment of their land.

1998. Syngenta's acts took place in, or affected commerce in, West Virginia.

1999. Syngenta's acts and omissions proximately caused the injuries and damages sustained by West Virginia Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

2000. West Virginia Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

2001. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, West Virginia Plaintiffs are also entitled to an award of punitive damages. *See Mayer*, 22 S.E. at 59.

Count 203 - Consumer Credit and Protection Act
W. Va. Code § 46A-1-101, *et seq*.
(On Behalf of West Virginia Plaintiffs)

2002. West Virginia Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2003. West Virginia Consumer Credit and Protection Act provides a private right of action by any consumer who purchases or leases goods or services and is harmed by a practice that is declared unlawful by the Act. W. Va. Code § 46A-6-106.

2004. The Act states that "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." *Id.* at § 46A-6-104.

2005. The list of "unfair methods of competition and unfair or deceptive acts or practices" includes, among others:

a. Causing likelihood of confusion or of misunderstanding as to the source, sponsorship, approval, or certification of goods or services;

b. Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have;

c. Advertising goods or services with the intent not to supply reasonably expected public demand;

d. Engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding; and

e. The act, use or employment by any person of any deception, fraud, false pretense, false promise or misrepresentation, or the concealment, suppression or omission of any material fact with the intent that others rely upon such concealment, suppression or omission, in connection with the

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

sale or advertisement of any goods or services, whether or not any person has in fact been misled, deceived, or damaged thereby.

W. Va. Code § 46A-6-102(7)(B), (E), (J), (L), (M).

2006. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

2007. By deceiving West Virginia corn farmers into believing that Viptera and/or Duracade would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed West Virginia Plaintiffs as a result of China's rejection of Viptera depressed the market for U.S. corn.

2008. Syngenta's acts took place in, or affected commerce in, West Virginia.

2009. Syngenta's acts and omissions proximately caused the injuries and damages sustained by West Virginia Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

2010. West Virginia Plaintiffs have provided the notice to Syngenta required by W. Va. Code § 46A-6-106(c), and Syngenta did not cure the financial losses suffered by the West

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Virginia Plaintiffs.

2011. Because Syngenta acted in illegal restraint of trade, West Virginia Plaintiffs are entitled to an award of compensatory damages, treble damages, attorney's fees, filing fees, and other costs of the action under W. Va. Code § 47-18-9.

2012. West Virginia Plaintiffs are further entitled to pre- and post-judgment interest.

2013. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, West Virginia Plaintiffs are also entitled to an award of punitive damages. *See Mayer*, 22 S.E. at 59.

Count 204 - Negligence
(On Behalf of Wisconsin Plaintiffs)

2014. Wisconsin Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2015. Syngenta owed a duty of at least reasonable care to its stakeholders, including Wisconsin Plaintiffs, in the timing, scope, and terms under which it commercialized MIR162.

2016. Syngenta breached its duty by acts and omissions including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on a widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and /or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

2017. Syngenta's negligence proximately caused damages to Wisconsin Plaintiffs, including damaged corn and reduced corn prices.

2018. Wisconsin Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

2019. Syngenta acted with intentional disregard for the rights of Wisconsin Plaintiffs. Punitive damages are therefore warranted.

Count 205 - Trespass to Chattels
(On Behalf of Wisconsin Plaintiffs)

2020. Wisconsin Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2021. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Wisconsin Plaintiffs had possession and/or possessory rights.

2022. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Wisconsin Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

2023. As a result of the trespass, Wisconsin Plaintiffs' chattels were impaired as to condition, quality, or value, and Wisconsin Plaintiffs were damaged.

2024. Wisconsin Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

2025. Syngenta acted with intentional disregard to the rights of Wisconsin Plaintiffs.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Punitive damages are therefore warranted.

Count 206 - Private Nuisance
(On Behalf of Wisconsin Plaintiffs)

2026. Wisconsin Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2027. Syngenta's actions constitute a private nuisance to Wisconsin Plaintiffs. By contaminating the U.S. corn supply, Syngenta has unreasonably and substantially interfered with the quiet use and enjoyment of Wisconsin Plaintiffs' land and/or property interests.

2028. Syngenta's conduct was intentional and unreasonable, or if unintentional, was negligent and reckless, and proximately caused damage to Wisconsin Plaintiffs, including damaged corn and reduced corn prices.

2029. Wisconsin Plaintiffs are thus entitled to an award of compensatory damages and pre- and post-judgment interest.

2030. Syngenta acted with intentional disregard for the rights of Wisconsin Plaintiffs, and thus punitive damages are warranted.

Count 207 – Negligence
(On behalf of Wyoming Plaintiffs)

2031. Wyoming Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2032. Syngenta owed its stakeholders, including Wyoming Plaintiffs, a duty to use reasonable care in the timing, scope, and terms under which it commercialized MIR162.

2033. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Prematurely commercializing Viptera and/or Duracade on widespread basis without reasonable or adequate safeguards;

b. Instituting a careless and ineffective stewardship program;

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

c. Failing to enforce or effectively monitor its stewardship program;

d. Selling Viptera and/or Duracade to thousands of corn farmers with knowledge that they lacked the mechanisms, experience, ability, and/or competence to effectively isolate or channel those products;

e. Failing to adequately warn and instruct farmers on the dangers of contamination by MIR162 and at least the substantial risks that growing Viptera and/or Duracade would lead to the loss of the Chinese market;

f. Distributing misleading information about the importance of the Chinese market; and

g. Distributing misleading information regarding the timing of China's approval of Viptera and/or Duracade.

2034. Syngenta's acts took place in, or affected commerce in, Wyoming.

2035. Syngenta's actions and omissions proximately caused the injuries and damages sustained by Wyoming Plaintiffs. These damages include but are not limited to damaged corn crops and reduced corn prices based on the inability to sell to the Chinese market.

2036. Because the Defendants breached their duty, and caused damages to Wyoming Plaintiffs, Wyoming Plaintiffs are entitled to an award of compensatory damages, attorney's fees, filing fees, and other costs of the action. Wyo. Stat. Ann. §1-14-126; 1-1-109; Wyo. R. Civ. P., Rule 54.

2037. Wyomng Plaintiffs are further entitled to pre- and post-judgment interest. *KM Upstream, LLC v. Elkhorn Const., Inc*., 2012 WY 79, 278 P.3d 711, 726-27 (Wyo. 2012).

2038. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of Wyoming Plaintiffs. Therefore, Wyoming Plaintiffs are also entitled to an award of punitive damages. *See Farmers Ins. Exchange v. Shirley*, 958 P.2d 1040 (Wyo. 1998).

Hennepin County, MN

Count 208 – Trespass to Chattels
(On behalf of Wyoming Plaintiffs)

2039. Wyoming Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2040. By commercializing Viptera and/or Duracade prematurely and without adequate systems to isolate and channel it, Syngenta intentionally intermeddled with and brought Viptera and/or Duracade into contact with non-Viptera/Duracade corn in which Wyoming Plaintiffs had possession and/or possessory rights.

2041. Syngenta knew that its conduct would, to a substantial certainty, bring Viptera and/or Duracade into contact with Plaintiffs' corn through contamination in fields and/or in grain elevators and other modes of storage and transport.

2042. As a result of the trespass, these Plaintiffs' chattels were impaired as to condition, quality, or value, and Wyoming Plaintiffs were damaged.

2043. Syngenta's acts took place in, or affected commerce in, Wyoming.

2044. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Wyoming Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

2045. Wyoming Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

2046. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Plaintiffs. Therefore, Wyoming Plaintiffs are also entitled to an award of punitive damages.

Count 209 – Tortious Interference
(On behalf of Wyoming Plaintiffs)

2047. Wyoming Plaintiffs incorporate by reference paragraphs 1-299 as if set forth

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

herein.

2048. Wyoming Plaintiffs had business relationships and a reasonable expectancy of continued business relationships with purchasers of corn.

2049. Syngenta had knowledge of such expectancy and/or knowledge of facts and circumstances that would lead a reasonable person to believe that the expectancy existed.

2050. Syngenta induced or caused a breach of that expectancy without justification or privilege.

2051. Syngenta's conduct was intentional and improper because, among other things, it was accomplished with misrepresentations and omissions of material fact, and contaminated Wyoming Plaintiffs' fields, storage units, equipment, grain elevators owned and/or operated by Wyoming Plaintiffs, as well as other facilities in the U.S. supply chain.

2052. Syngenta's acts took place in, or affected commerce in, Wyoming.

2053. The business relationship Wyoming Plaintiffs had with purchasers of corn was disrupted.

2054. Syngenta's interference has proximately caused damage to Wyoming Plaintiffs.

2055. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Wyoming Plaintiffs. These damages include but are not limited to damaged corn product and reduced corn prices based on the inability to sell to the Chinese market.

2056. Wyoming Plaintiffs are entitled to compensatory damages and pre- and post-judgment interest.

2057. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the Wyoming Plaintiffs. Therefore, Wyoming Plaintiffs are also entitled to an award of punitive

damages. Wyo. Stat. Ann. § 1-1-114; *see Farmers Ins. Exchange v. Shirley*, 958 P.2d 1040 (Wyo. 1998).

Count 210 – Wyoming Consumer Protection Act
Wyo. Stat. Ann. § 40-12-101 *et seq.*
(On behalf of Wyoming Plaintiffs)

2058. Wyoming Plaintiffs incorporate by reference paragraphs 1-299 as if set forth herein.

2059. The Wyoming Consumer Protection Act provides a private right of action by any consumer who suffers damages from a deceptive trade practice that is declared unlawful by the Act. Wyo. Stat. Ann. § 40-12-108.

2060. A person unlawfully engages in a deceptive trade practice when, in the course of his business and in connection with a consumer transaction, that person knowingly:

a. Represents that merchandise has a source, origin, sponsorship, approval, accessories, or use it does not have;

b. Represents that he has a sponsorship, approval, or affiliation he does not have;

c. Represents that merchandise is of a particular standard, grade, style, or model, if it is not;

d. Represents that merchandise is available to the consumer for a reason that does not exist;

e. Represents that merchandise has been supplied in accordance with a previous representation, if it has not;

f. Makes false or misleading statements of fact concerning the price of merchandise;

g. Advertises merchandise with intent not to sell it as advertised;

h. Advertises merchandise with intent not to supply reasonably expectable public demand; and

i. Engages in unfair or deceptive acts or practices.

27-CV-15-13785
Filed in Fourth Judicial District Court
10/2/2015 4:33:44 PM
Hennepin County, MN

Wyo. Stat. Ann. § 40-12-105(i-v), (vii), (x), (xi), (xv).

2061. Syngenta breached its duty by acts and omissions, including but not limited to:

a. Statements to APHIS and the public, including stakeholders interested in the MIR162 Deregulation Petition, that deregulation of MIR162 should not cause an adverse impact upon export markets for U.S. corn, that Syngenta would communicate the stewardship requirements "using a wide ranging grower education program," and that at the time the MIR162 Deregulation Petition was submitted to APHIS, regulatory filings were in progress in China;

b. Statements to APHIS and the public that MIR162 could and would be channeled away from markets which had not yet approved MIR162;

c. Statements to the press and to investment analysts on quarterly conference calls;

d. Statements in marketing materials published on the Internet such as its "Plant With Confidence" fact sheet; and

e. Other statements indicating that approval from China for MIR162 corn was expected at a time when Syngenta knew that it was not.

2062. By deceiving Wyoming corn farmers into believing that Viptera and/or Duracade would be marketable to all consumers, Syngenta created a likelihood of confusion or misunderstanding that materially harmed Wyoming Plaintiffs after China's rejection of Viptera depressed the market for U.S. corn.

2063. Syngenta's acts took place in, or affected commerce in, Wyoming.

2064. Syngenta's acts and omissions proximately caused the injuries and damages sustained by Wyoming Plaintiffs. These damages include but are not limited to damaged corn and reduced corn prices based on the inability to sell to the Chinese market.

2065. Wyoming Plaintiffs provided the notice to Syngenta required by Wyo. Stat. Ann. § 40-12-109, and Syngenta did not cure the financial losses suffered by Wyoming Plaintiffs.

2066. Because Syngenta engaged in unlawful deceptive trade practices, Wyoming

Plaintiffs are entitled to an award of compensatory damages, attorney's fees, filing fees, and other costs of the action. Wyo. Stat. Ann. §1-14-126; 1-1-109; Wyo. R. Civ. P., Rule 54.

2067. Wyoming Plaintiffs are further entitled to pre- and post-judgment interest.

2068. Syngenta acted with gross fraud, malice, oppression, or with wanton, willful, or reckless conduct, or with criminal indifference to civil obligations affecting the rights of the plaintiff. Therefore, Wyoming Plaintiffs are also entitled to an award of punitive damages.

VII. Request for Relief

Plaintiffs demand judgment from all Defendants for:

a. All monetary and compensatory relief to which they are entitled and will be entitled at the time of trial;

b. Punitive damages;

c. Attorneys' fees;

d. Pre- and post-judgment interest at the maximum rates allowed by law;

e. The costs of this action; and

f. Such other and further relief as is appropriate.

VIII. DEMAND FOR JURY TRIAL

Plaintiffs demand a trial by jury on all issues.

COUNTY OF HENNEPIN **FOURTH JUDICIAL DISTRICT**

In re: Syngenta Litigation This Document Related to: ALL ACTIONS	Case Type: Civil Other Honorable Thomas M. Sipkins File No.: 27-CV-15-3785 **PROPOSED NOTICES TO CONFORM**

On September 25, 2015, the Court entered Scheduling Order No. 1, which held that "[a]ny plaintiff wishing to join in one of the consolidated master complaints shall file a notice to conform." That Order further required that "[o]n of before October 9, 2015, the parties shall meet and confer on a form of notice to conform and a deadline for plaintiffs to file said notice to conform."

On October 2, 2015, plaintiff filed a consolidated non-class master complaint for producers and non-producers. In accordance with the Court's September 25, 2015 Scheduling Order No. 1 and the extension granted by the Court's October 13, 2015 Order, the parties respectfully submit a proposed Notice to Conform to Plaintiffs' Non-Class Master Complaint for Producer Plaintiffs, attached hereto as Exhibit A, and a proposed Notice to Conform to Plaintiffs' Non-Class Master Complaint for Non-Producer Plaintiffs, attached hereto as Exhibit B. The parties jointly propose November 19, 2015 as the deadline for plaintiffs to file and serve Notices to Conform.

The parties jointly propose a set of procedures with respect to the Notice to Conform, as set forth in the accompanying Proposed Order.

COUNSEL FOR DEFENDANTS

27-CV-15-3785
Filed in Fourth Judicial District Court
10/23/2015 10:11:24 AM
Hennepin County, MN

STATE OF MINNESOTA	**DISTRICT COURT**
COUNTY OF HENNEPIN	**FOURTH JUDICIAL DISTRICT**
In re: Syngenta Litigation This Document Related to: ALL ACTIONS	Case Type: Civil Other Honorable Thomas M. Sipkins File No.: 27-CV-15-3785 **[PROPOSED] ORDER APPROVING NOTICES TO CONFORM**

WHEREAS, On September 25, 2015, the Court entered Scheduling Order No. 1, which held that "[a]ny plaintiff wishing to join in one of the consolidated master complaints shall file a notice to conform" and further required that "[o]n of before October 9, 2015, the parties shall meet and confer on a form of notice to conform and a deadline for plaintiffs to file said notice to conform";

WHEREAS, in accordance with that Order and the Court's subsequent October 13, 2015 Order, the parties have jointly submitted for the Court's consideration two proposed Notices to Conform and have jointly proposed November 19, 2015 as a deadline for Plaintiffs to file and serve Notices to Conform;

NOW, THEREFORE, IT IS ORDERED that the parties' proposed Notice to Conform to Plaintiffs' Non-Class Master Complaint for Producer Plaintiffs, attached hereto as Exhibit A, and a proposed Notice to Conform to Plaintiffs' Non-Class Master Complaint for Non-Producer Plaintiffs, attached hereto as Exhibit B, are hereby approved and that the deadline for Plaintiffs to file Notices of Conform is November 19, 2015. The Court furthers orders that the following procedures for the Notices to Conform shall be adopted:

27-CV-15-13285
Filed in Fourth Judicial District Court
10/23/2015 10:11:24 AM
Hennepin County, MN

1. For purposes of the Notices to Conform and all other orders of the Court, the term "Producer" shall mean:

> an owner, operator, landlord, waterlord, tenant, or sharecropper, who shares in the risk of producing corn and who is entitled to share in the corn crop available for marketing from the farm, as reflected in FSA Form 578, or who is paid cash rent by a farmer for use of his or her land.

The term "Non-Producer" shall mean all Plaintiffs who are not Producers.

2. The Non-Class Master Complaint shall be deemed to amend the individual claims of any Plaintiff who files a Notice to Conform to the Non-Class Master Complaint. Upon service of the Notice to Conform upon Defendants, the amendment of the constituent case to conform to the Non-Class Master Complaint shall be deemed to have been served. Any responsive pleading filed by the Defendant to the Non-Class Master Complaint, whether filed before or after a Notice to Conform by the Plaintiff is filed, shall apply. If a Plaintiff's constituent complaint names a Defendant that is not named in the Non-Class Master Complaint, then the absent Defendant shall be deemed to have been voluntarily dismissed without prejudice pursuant to Rule 41 of the Minnesota Rules of Civil Procedure. If a Defendant is named in the Non-Class Master Complaint who is not named in the constituent case, by filing a Notice to Conform, the Plaintiff shall be deemed to have added that Defendant to their constituent case pursuant to Rule 21 of the Minnesota Rules of Civil Procedure. If a Plaintiff has not yet filed or served a Complaint, he or she may conform his or her complaint to the Non-Class Master Complaint by filing and serving a complaint and a Notice to Conform on or before November 19, 2015. Any Plaintiff who files suit after November 19, 2015 may conform his or her complaint by filing a Notice to Conform, provided, however, that any Order of the Court related to the Master Non-Class Complaint shall be binding and apply.

27-CV-15-13285
Filed in Fourth Judicial District Court
10/23/2015 10:11:24 AM
Hennepin County, MN

3. Plaintiffs have initiated service of the Master Non-Class and Master Class Complaints on the non-U.S. defendants through the Hague Convention, but do not anticipate service to be completed prior to the 60-day deadline set forth in Scheduling Order No. 1. Syngenta does not object to an extension of the deadline, and the deadline for service of the Master Non-Class Complaint and Master Class Complaint on the non-U.S. defendants is hereby extended until and including March 31, 2016. The parties anticipate that the non-U.S. defendants, once properly served under the Hague Convention, would join in the briefing and resulting Order on Defendants' Motions to Dismiss. Any Plaintiff who files a Notice to Conform in this proceeding shall be deemed to have served any foreign defendants upon proper service of the Non-Class Master Complaint, and any amendments thereto, pursuant to the Hague Convention, regardless of whether the Notice to Conform was filed before or after the Non-Class Master Complaint was served.

4. The Court does not intend to revisit issues that already have been decided in these consolidated proceedings. If a plaintiff who is not named in a Master Non-Class Complaint or Master Class Complaint and does not file a Notice to Conform, that does *not* exempt their individual case from the Court's Orders with respect to the Master Complaints. Any Orders issued by the Court that are directed to the Master Non-Class Complaint shall be deemed to apply to all cases to the extent the issues have the same subject-matter as the allegations, claims, and parties in the non-conforming cases. The failure to file an objection within 14 days of an Order explaining why that Order directed to the Master Non-Class Complaint should not apply to his or her non-conforming case, shall be deemed a waiver.

In re: Syngenta Litigation

This Document Relates to: ALL ACTIONS

Case Type: Civil Other
Hon. Thomas M. Sipkins

FILE NO. 27-CV-15-3785

PRESERVATION ORDER

This Agreed Order Regarding Preservation of Communications, Documents, Electronic Data, and Other Tangible Items ("Order") governs the Parties in the above-captioned action ("Action"), including individual cases during their pendency in this Action. Pursuant to the Court's duty to supervise pretrial proceedings in this Action, including discovery, and pursuant to the Court's inherent powers, the Court hereby issues the following agreed Preservation Order. This Order shall continue in full force and effect until further Order of this Court.

The Parties agree that these Guidelines define the scope of their preservation obligations for the purposes of this Action.

I. DEFINITIONS

For the purposes of this Order, the following definitions shall apply. All other terms shall have the meaning defined in The Sedona Conference Glossary.

A. The terms "**Communication**" or "**Communications**" mean the transmission, sending, or receipt of information of any kind (in the form of facts, ideas, inquiries, or otherwise), by computer electronics of any kind (including e-mail),

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

magnetic tape, videotape, photographs, graphs, symbols, signs, magnetic or optical disks, floppy disks, hard drives, compact discs, CD-ROM discs, other removable or transportable media, telecommunication, telephone, teletype, facsimile, telegram, microfilm, microfiche, photographic film of all types, or other media of any kind.

B. The terms "**Document**" and "**Documents**" are synonymous and equal in scope to usage of this term in Minn. R. Civ. P. 34.

C. The terms "**Electronic Data**" or "**Data**" mean the original (or identical duplicate when the original is not available), and any non-identical copies (whether non-identical because of notes made on copies or attached comments, annotations, marks, transmission notations, or highlighting of any kind) of writings of every kind and description whether inscribed by mechanical, facsimile, electronic, magnetic, digital, or other means.

D. The term "**Syngenta Corn Seed**" refers to Syngenta's genetically modified corn seed containing the MIR162 genetic trait and/or Event 5307, including those marketed as Viptera and Duracade, and any Corn crops containing any of those traits.

E. The term "**Potentially Relevant Information**" means a Document, Electronic Data, Communication or any tangible things containing information within the scope of the categories set forth below.

II. GENERAL PRESERVATION OBLIGATIONS

A. The fact that a particular document or tangible object may or may not be included in the scope of this Order is not intended to, and does not, establish or suggest that the document is or is not discoverable, relevant to, subject to privilege or work

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

product protection or admissible in this matter. Each party reserves any and all objections to the collection and/or production of documents or information that may fall within the scope of this Order, including to the time frames specified in the Sections IV and V.

B. The Parties shall take commercially reasonable steps to ensure that Communications, Documents, Electronic Data and other tangible objects that are subject to this Order are not destroyed, removed, mutilated, altered, concealed, deleted or otherwise disposed of.

C. The preservation obligations set forth in this Order apply to currently existing Communications, Documents, Electronic Data, and other tangible objects within the Parties' possession, custody, or control. This Order is not intended to, and shall not be construed by a Party to, require any Party to alter its day-to-day business practices regarding the creation or modification of documents, except to ensure that Potentially Responsive Information in Sections IV and V is adequately preserved. Accordingly, unless a category of Potentially Responsive Information indicates that the preservation obligation extends to the present, the preservation obligation extends to December 31, 2014. Furthermore, persons may generate new business documents without preserving dictation, drafts, interim versions or other temporary compilations of information if such documents would not have been preserved in the ordinary course of business. Similarly, any Party may delete or recycle data electronically stored on servers or hard drives reasonably likely to contain Potentially Responsive Information after the Party has made and secured a copy of the files which contain information

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

within the scope of this Order contained on said data storage device.

D. Absent a showing of good cause by the requesting Party, the categories of ESI identified below need not be preserved by any Party:

1. Any cellular or mobile data (including any text messages) and no Party shall be required to request that any service providers preserve such data;

2. Any telephone or VOIP message system data (including voicemail messages) on a system-wide, central or enterprise basis, or on an individual level and no Party shall be required to request that service providers for any Party preserve such data;

3. Any instant messaging systems (including but not limited to Skype, AIM, Yahoo Messenger, Microsoft Lync, or any equivalent) and no Party shall be required to request that any service providers preserve such data;

4. Deleted, slack, fragmented, or other data only accessible by use of computer forensics;

5. Random access memory (RAM), temporary files, or other ephemeral data that are difficult to preserve without disabling the operating system;

6. On-line access or internet searching data such as temporary internet files, browser history, file or memory cache, cookies, and the like; and

7. Operating system files, executable files, server, system or network logs.

III. DEFENDANTS' PRESERVATION OBLIGATIONS

A. **Potentially Relevant Information:** To the extent such Documents, Electronic Data, and other tangible objects exist, Defendants shall take reasonable steps to ensure the preservation of the following Potentially Relevant Information:

1. Field trials and field testing of Syngenta Corn Seed, including controls during the field trials and testing, post-testing destruction, monitoring of field trials and testing, audit and inspection of field

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

trials and testing, contracts for field trials and testing, and containment and channeling efforts during field trials and testing, and communications regarding the same;

2. Syngenta's communications with governmental or administrative bodies regarding Syngenta Corn Seed, and other communications relating thereto;

3. Syngenta's efforts to obtain U.S. and Chinese regulatory approval for Syngenta Corn Seed and the export of Syngenta Corn Seed, and other communications relating thereto;

4. Syngenta's efforts to deregulate Syngenta Corn Seed and other communications relating thereto;

5. Stewardship Agreements and Stewardship Guides regarding Syngenta Corn Seed;

6. Any efforts or statements by Syngenta regarding channeling of Syngenta Corn Seed or other efforts and communication undertaken, proposed or considered to maintain segregation of Syngenta Corn Seed from other corn;

7. From 2010 to the present, documents sufficient to show the quarterly and yearly sales of and profits from Syngenta Corn Seed, to the extent such information is maintained on that basis;

8. Syngenta's decision to sell and/or commercialize Syngenta Corn Seed and the impact of that decision on U.S. corn prices and any potential impact on farmers and exporters;

9. The MIR162 genetic trait and/or Event 5307 traces found in corn produced in or exported from the United States;

10. From 2010 to the present, documents sufficient to show the sale, booking, listing, transfer or resale of Syngenta Corn Seed in each county and/or by zip code, to the extent such information is maintained on that basis, each month, to the extent such information is maintained on that basis;

11. Until December 31, 2014, the marketing and advertising of Syngenta Corn, including Defendants' Internet, Intranet (as that term is defined in the Sedona Conference Glossary) and Social Media sites referencing Syngenta Corn;

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

12. From 2005 to the present, Defendants' involvement with industry organizations regarding stewardship standards or practices for genetically modified crops or plants, biotechnology issues involving identity preservation, segregation and/or tracing of genetically modified crops or plants, and asynchronous approval of genetically modified crops or plants;

13. Syngenta's involvement in and communications with industry members, trade associations, or government officials regarding Syngenta Corn Seed after January 1, 2010;

14. From 2010 to the present, documents sufficient to show exports of U.S. corn and China's imports of U.S. corn;

15. From 2007 to the present, the actual or possible effect of Syngenta Corn Seed on the market for U.S. corn exports and the importance or significance of the Chinese market for U.S. corn;

16. From 2007 to the present, documents sufficient to show the price for U.S. corn; and

17. Syngenta's efforts or statements regarding the channeling or segregation of other genetically-modified corn or soybean seed products that Syngenta commercialized in the United States before obtaining Chinese regulatory approval, covering the time period from 2005 to the date of such Chinese approval; and

18. Defendants' affirmative defenses.

IV. PLAINTIFFS' PRESERVATION OBLIGATIONS

A. **Potentially Relevant Information for Producer Plaintiffs:** To the extent such Documents, Electronic Data, and other tangible objects exist, each Plaintiff shall take reasonable steps to ensure the preservation of the following Potentially Relevant Information:

1. From 2010 to the present, documents sufficient to show the Plaintiff's total and corn acreage farmed;

2. From 2010 to the present, documents sufficient to show the Plaintiff's purchases of corn seed;

27-CV-15-3285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

3. From 2010 to the present, the Plaintiff's sales or contracts for sale of corn, corn by-products, and sorghum/milo (including hedging, option contracts, and futures contracts);

4. From 2010 to the present, testing for the presence of Viptera or Duracade and/or any efforts to remove Syngenta Corn Seed;

5. From 2010 to the present, for any Plaintiff involved in livestock farming, documents sufficient to show whether any corn produced by the Plaintiff was used to feed the plaintiff's livestock and/or any corn purchased to feed the livestock;

6. From 2010 to the present, documents sufficient to show whether the producer was part of an ethanol cooperative and, if so, any corn supplied by the producer to the ethanol cooperative;

7. From 2010 to the present, subsidies received by Plaintiff relating to corn, including applications and claims made;

8. From 2010 to the present, Plaintiff's crop insurance for any corn crops, including applications, policies, claims made, and outcomes of claims;

9. From 2010 to the present, Plaintiff's exposure to or reliance on statements made by Syngenta regarding Syngenta Corn Seed;

10. From 2010 to the present, documents sufficient to show the types of genetically-modified crops grown by Plaintiff and the dates when those crops were grown;

11. From 2010 to the present, Plaintiff's involvement in and communications with trade associations or government officials regarding Syngenta Corn Seed;

12. From 2010 to the present, Plaintiff's allegations;

13. From 2010 to the present, Plaintiff's financials relating to the sale of corn or corn by products; and

14. Plaintiff's alleged damages, including losses from the changes in the price of corn.

B. **Potentially Relevant Information for Non-Producer Plaintiffs:** To the extent such Documents, Electronic Data, and other tangible objects exist, each Plaintiff

27-CV-15-13285
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

shall take reasonable steps to ensure the preservation of the following Potentially Relevant Information:

1. Plaintiff's efforts to segregate or decision not to segregate corn known or believed by Plaintiff to be grown from Syngenta Corn Seed in its facilities or elsewhere in the supply chain in the United States after January 1, 2010;

2. Plaintiff's efforts or statements regarding the channeling or segregation of other genetically-modified corn or soybean products commercialized in the United States before Chinese regulatory approval was obtained, covering the time period from 2005 to the date of such Chinese approval;

3. Plaintiff's contracts for the sale of corn and corn by-products with buyers of U.S. corn and corn by-products in China dated on or after January 1, 2010, including but not limited to option contracts or hedging or trading mechanisms;

4. Plaintiff's efforts to mitigate damages related to China's rejection of U.S. corn after November 2013;

5. Plaintiff's sales of, and efforts to sell or deliver, corn known or believed by Plaintiff to be grown from or to have been mixed with Syngenta Corn Seed to China from countries other than the U.S. after January 1, 2010;

6. Plaintiff's awareness of China's import approval status of Syngenta Corn Seed and communications with Chinese government officials regarding the same;

7. Plaintiff's knowledge of or reliance on statements made by Syngenta regarding Syngenta Corn Seed;

8. From 2005 to the present, Plaintiff's involvement with industry organizations regarding stewardship standards or practices for genetically modified crops or plants, biotechnology issues involving identity preservation, segregation and/or tracing of genetically modified crops and plants, and asynchronous approval of genetically modified crops or plants;

9. Plaintiff's involvement in and communications with industry members, trade associations, or government officials regarding Syngenta Corn Seed after January 1, 2010;

27-CV-15-3765
Filed in Fourth Judicial District Court
10/30/2015 11:26:23 AM
Hennepin County, MN

10. From 2010 to the present, documents sufficient to show exports of U.S. corn and China's imports of U.S. corn;

11. From 2007 to the present, the actual or possible effect of Syngenta Corn Seed on the market for U.S. corn exports and the importance or significance of the Chinese market for U.S. corn exports;

12. From 2007 to the present, documents sufficient to show the price for U.S. corn;

13. Plaintiff's allegations; and

14. Documents and information regarding Plaintiff's alleged damages related to the litigation.

SO ORDERED.

Dated: 10-30, 2015

BY THE COURT:

Thomas M. Sipkins
Judge of District Court

EXHIBIT 55

STATE OF MINNESOTA **DISTRICT COURT**

COUNTY OF HENNEPIN **FOURTH JUDICIAL DISTRICT**

In re: Syngenta Litigation This Document Relates to: ALL ACTIONS	Case Type: Civil Other Honorable Thomas M. Sipkins File No.: 27-CV-15-3785 **ESI PROTOCOL**

The parties in the above-captioned litigation (each of the parties is referred to individually as a "party" and collectively as the "parties"), by and through their undersigned counsel, propose this ESI Protocol for the Production of Data ("Protocol"). Pursuant to the provisions of Rule 34 of the Minnesota Rules of Civil Procedure permitting the parties to specify the form or forms in which documents are to be produced, the Protocol sets forth the specifications that shall govern document production during discovery in the above-captioned consolidated litigation ("Action"), including for all individual cases currently pending in the Action and cases that are later filed in, transferred to, or remanded to this Court.

A. SCOPE

1. This Protocol governs the collection and production of electronically-stored information ("ESI") and hard copy documents (collectively "Data"), which are to be produced electronically in the Action.

2. Nothing herein shall alter the parties' respective responsibility to comply with the applicable Minnesota Rules of Civil Procedure and any applicable Local Rules regarding the collection or production of Data. To the extent additional obligations, restrictions, or rights not addressed in this Protocol arise under the Minnesota Rules of Civil Procedure or other applicable law or rules, that law or rule shall govern.

3. The parties incorporate the provisions of the Stipulated Protective Order. For the avoidance of doubt, nothing herein shall contradict the parties' rights and obligations with respect to any information designated as Confidential or Highly Confidential pursuant to the Stipulated Protective Order.

4. Nothing in this Protocol establishes any agreement regarding the subject matter or scope of discovery in this Action, or the relevance, authenticity or admissibility of any Data.

5. Nothing in this Protocol shall be interpreted to require production of Data protected from disclosure by the attorney-client privilege, work-product doctrine, or any other applicable protection or privilege.

6. Although the Court is initially entering this Protocol conforming to the ESI Protocol Order entered in the In re: Syngenta MDL proceedings ("Federal MDL"), no change to this ESI protocol shall be effective unless presented and decided by this Court regardless of whether such change is presented to and/or ordered in the Federal MDL.

7. To promote communication and cooperation between the parties, the parties will designate e-discovery liaisons for purposes of meeting and conferring on ESI topics. The ESI Liaison for Defendants shall be Ragan Naresh of Kirkland & Ellis. The ESI Liaisons for Lead and Liaison Plaintiffs shall be Eric Taubel of Gustafson Gluek, Ashlea Schwarz of Paul McInnes, and Casey Marshall of Bassford Remele. The Parties agree to work in good faith to schedule e-discovery conferences when the ESI Liaisons or their designee(s) are available.

B. DELIVERY OF DOCUMENT PRODUCTIONS

1. Each Party shall transmit its document productions to other Party's Liaison Counsel or such vendor as designated by a Party's ESI Liaison.

2. Document productions shall be made via DVD-ROMs, CD-ROMs, portable hard drives or through secure file transfer protocol ("FTP") or similar secure or encrypted electronic transmission.

3. If either Party chooses to employ a document depository vendor to receive docs for its convenience, that side shall bear the costs of such a vendor and take reasonable steps to ensure that only persons authorized under the Protective Order have access to the depository.

4. Each Party shall bear its own costs of production.

C. ESI PRODUCTION FORMAT

1. Image File Format

Except for the types of documents identified in Paragraphs (C)(2)-(3) below, a Producing Party will convert ESI from its native file format ("Native File") to an image file for production, subject to the following specifications:

a. Single-page, black and white, 300 DPI, 1 bit Group IV TIFF images shall be provided for each page of each document, with each image file named after the production number of that page, with extension ".tif."

b. To the extent reasonably possible, the imaged Data shall retain all attributes of the native or hard-copy file, such as document breaks and original document orientation (i.e. portrait to portrait and landscape to landscape). The following formatting will be applied:

i. Word processing documents will be processed to TIFF format and imaged showing track changes or edits, comments, notes and other similar information;

ii. Spreadsheet files with redactions will be imaged un-hiding any hidden rows and/or columns and/or sheets; and

iii. Presentation files will be processed to TIFF format showing comments,

hidden slides, speakers' notes and similar data, where present in the original file. In addition to TIFF images, native presentation files will be provided upon request from a receiving party. The native file will be named as the first Bates number of the respective document. The corresponding load file shall include native file link information for each native file that is produced.

Embedded ESI documents (e.g., a spreadsheet embedded within a word processing document) will be extracted, produced as independent document records and related back to the respective top level parent document (e.g., standalone file, email message, etc.) via the BegAttach field referenced in Appendix 2. Related documents will be produced within a continuous Bates range. However, a Producing Party may suppress its logo or v-card embedded in email files.

c. To the extent a document is not already unitized, the parties shall undertake reasonable efforts, if a document consists of more than one page, to unitize the document and any attachment(s) as in their original form when creating the image files. The parties shall also undertake reasonable efforts to ensure that distinct documents are not merged into a single record and that single documents are not split into multiple records.

d. Text files shall be produced as one file per document, named after the starting production number assigned to the document and ending with extension ".txt", with a text directory for each production volume, and with a relative file path to the text file provided in the related database load file. With the exception of TIFF, PDF and other image file types for which the text cannot be extracted, the text of documents should be extracted directly from the Native File without using Optical Character Recognition ("OCR"), except in the case of redacted documents, as specified in Paragraph 3(c) and 3(d), below. Documents produced in redacted

form should not have text files populated with extracted text but should instead have text files populated with OCR data which will not contain the redacted data. If a document does not contain extractable text, the Producing Party shall provide OCR files for that document to the extent possible.

e. Data containing color need not initially be produced in color. The Producing Party will honor reasonable requests for a color image, if the original Data contains color necessary to understand the meaning or content of the Data.

f. Electronic documents attached to an email or electronic document and hard-copy documents attached or appended to a hard-copy document, are to be produced contemporaneously and sequentially immediately after the parent document. Parent-child relationships within a document family (the association between an attachment and its parent document) shall be preserved. Each document shall be produced with the production number for the first and last page of that document in the "BegDoc" and "EndDoc" fields of the data load file and with the "BegAttach" and "EndAttach" fields listing the production number for the first and last page in the document family.

g. Except as specified in Paragraph 3(c) below, each of the metadata and coding fields set forth in Appendix 2 that reasonably can be extracted from an electronic document shall be produced for that document. Fields that are not populated shall be left with null values and not populated with fillers or spaces. All metadata pertaining to dates and times will be standardized to Greenwich Mean Time (GMT).

h. Production numbers shall be branded to the lower right hand corner of TIFF images and confidentiality designations (if applicable) shall be electronically branded or burned to the lower left hand corner of TIFF images so that they legibly print with the images. If one or

more production numbers is skipped in a production, the Producing Party will so note in a cover letter accompanying the production or in a privilege log. The parties shall use reasonable efforts to ensure that production numbers: (1) are unique and consistent across the entire production, provided, however, that parties may use multiple prefixes to reflect productions from separate entities or related to specific experts; (2) maintain a constant prefix and page length (0-padded) across the production, consistent with the requirements of sub-paragraph (1); (3) contain a prefix that clearly identifies the Producing Party; (4) contain no special characters or embedded spaces; and (5) are sequential within a given document. Attachments will immediately follow the production number(s) for the parent document. Production number prefixes shall be consistent across all documents a party produces in the litigation. However, to the extent a Producing Party produces documents as they were produced in prior proceedings, the documents shall retain their numbering from the prior proceedings.

i. Upon entry of this Protocol, each party shall also produce accompanying image load/unitization files and delimited text files as described below in Appendix 1. Parties are encouraged to work in cooperation with one another and each other's respective vendors in exchanging sample load files. If this exchange occurs, the Receiving Party will have 14 days to respond with load file change requests. Nothing in this Order will limit the parties from discussing load file changes throughout the course of the litigation.

j. Where TIFF images of certain electronic documents are not readable, the parties may produce such documents in native format. Where TIFF images of certain hard copy documents are not readable, the parties will meet and confer regarding the volume and best method of production prior to producing paper documents in hard copy format. To the extent the Receiving Party obtains through discovery a file or document that the party believes is not

adequately represented in TIFF image format, the Receiving Party may request that the file or document be produced in native format by identifying the document by production number, the production of which shall not unreasonably be withheld.

2. Non-Convertible Files

Certain types of files such as system, program, proprietary files, audio files, and video files may not be amenable to conversion into TIFF format. Such files will not be converted into TIFF format. To the extent that the parties have not excluded these files from production elsewhere in this Protocol, these files will be produced in their native format in accordance with Paragraph 3 below. Examples of file types that are or may not be conducive to conversion into TIFF format include, but are not limited to:

*.exp *.ilk *.res *.trg *.tlh *.idb *.pdb *.pch *.opt *.lib *.cab *.mov *.mp3 *.swf *.psp *.cdi *.chi *.chm *.com *.dll *.exe *.hlp *.ivi *.ivt *.ix *.msi *.nls *.obj *.ocx *.rmi *.sys *.tmp *.ttf *.vbx *.wav *.wpg *.iso *.pdb *.eps *.mpeg *.mpg *.ram *.rm *.psd *.ai *.aif *.bin *.hqx *.snd *.mpe *.wmv *.wma *.xfd *.db *.bat *.xnk *.qtl *.kob *.mso *.dat *.m4a *.bak *.xll *.blank *.wdf *.cdo *.snp *.rename *.mdi *.sda *.ren *.001 *.crf *.dtf *.eds *.ex1 *.dwg *.fdf *.pcl *.wmf *.wps *.fpage *.odttf *.cas *.ldl *.wm *.m4p *.dcx *.3g2 *.sss *.xyz

3. Native Files

In addition to the types of Data listed in Paragraphs C(1) and (2), a Producing Party will produce certain additional types of ESI in their native format, subject to the following specifications:

a. Notwithstanding any provision contained herein, the parties agree that they shall produce Microsoft Excel files, .CSV files and other similar spreadsheet files as Native Files. The Native File shall be renamed in the following format: Bates Prefix-Bates Number-Confidentiality Designation. Except as specified in Paragraph 3(d) below, each of the metadata and coding fields set forth in Appendix 2 that reasonably can be extracted from an electronic document shall be produced for that document. Fields that are not populated shall be left with null values and not

populated with fillers or spaces.

b. Where native files are produced in lieu of TIFF images, each native file will be assigned a unique production number within the litigation database. The Producing Party will produce a placeholder (a single-page TIFF slip sheet indicating that the native item was produced) along with the file itself in native format. The placeholder will be branded with the production number in the lower right hand corner, the original filename of the native file, and the phrase "PRODUCED IN NATIVE ONLY" branded in the center of the page. The Producing Party will also brand any confidentiality or similar endorsements in the lower left hand corner of the placeholder.

c. To the extent that any file identified for production in native format contains information subject to a claim of privilege or any other applicable protection that requires redaction, the Producing Party shall convert that file to TIFF format and produce it with the necessary redactions, along with OCR text that reflects such redactions, unless such conversion and redaction is unduly burdensome to the Producing Party. All such OCR text will be Unicode-compliance (UTF-8) to the extent practical. If such conversion is unduly burdensome or renders the document unusable, the Producing Party may produce the document in any reasonably usable form as may be agreed upon by the respective parties.

d. The portion of the redacted text shall be clearly identified on the face of the TIFF image, either by masking the redacted content with electronic highlighting in black or through the use of redaction boxes. The label "Redacted" shall appear on the face of the redacted portion of the TIFF image. If Personally Identifiable Information ("PII"), such as social security numbers are redacted, the label "Redacted – PII" shall appear on the face of the redacted portion. If information is redacted on the basis of the attorney-client privilege or the work product doctrine,

the basis for the redaction shall appear on the face of the redacted document. Redactions for privilege and work product, including whether such redactions must be included on a privilege log, are discussed in more detail in Section F below. The redacted TIFF image shall be produced in accordance with the image load file specifications in Appendix 1, and any other provisions for the production of TIFF images contained herein. Redacted text shall not be included in the text file for that redacted TIFF image. The original unredacted Native File shall be preserved pending conclusion of the Action.

e. The parties will make reasonable efforts to remove passwords or other security protection from any Native File prior to production. If the security protection cannot be removed from a Native File after reasonable efforts by the Producing Party, a placeholder TIFF image may be produced in place of the Native File indicating that security protection could not be removed from the Data. Upon request from the Requesting Party, the parties shall meet and confer in good faith regarding the reasonable efforts or mechanisms made to remove the security protection from the Native File and/or the production of the available metadata listed in Appendix 2 from the file.

f. If a Native File is used at a deposition or hearing in this Action, or attached to a motion or other filing, it shall be accompanied by its production number-stamped placeholder TIFF image in order to facilitate tracking and authentication thereof. The parties may, but are not required to, further mark fixed images of Native Files with additional numbering for ease of identification at a deposition or hearing.

4. Duplicates

To reduce the unnecessary costs of reviewing and producing duplicate documents, each party will make reasonable efforts to remove duplicate Data prior to producing documents. Data

will be deduplicated vertically within each custodian and horizontally across custodians (e.g., globally) following industry standard de-duplication algorithms. The ALL_CUSTODIANS field will be populated with all of the custodians who had a copy of the document in their files. In order to reduce the volume of entirely duplicative content within email threads, the parties may but are not required to use email thread suppression but shall disclose that they have used email thread suppression.

5. Production of Data from Databases and Other Formats

a. If a Producing Party identifies a particular source or type of responsive Data for which it reasonably believes that application of this Protocol would be unduly burdensome or impractical, the party identifying the source or type of responsive Data shall promptly notify the Requesting Party, explaining in detail the type and source of the Data at issue, and the reason(s) why the party believes that application of this Protocol would be unduly burdensome or impractical, and proposing reasonable modifications of this Protocol with respect to that source or type of responsive Data. Thereafter, the parties shall meet and confer within 14 calendar days to determine if modification of the Protocol with respect to the Data at issue is appropriate, and if an agreement is not reached, the Producing Party bears the burden of seeking relief from the Court from the requirements of this Protocol.

b. If a response to discovery requires production of ESI contained in a database or comprehensive electronic accounting system, the Producing Party shall meet and confer with the Requesting Party concerning a reasonable method of production. To the extent reasonably available, the Producing Party shall also provide any data dictionary, key, or other information sufficient to provide a reasonable understanding of the contents of the database or accounting system.

c. Nothing in this Protocol requires a party to use unreasonably burdensome or expensive data recovery processes, or to search for information, documents, or other materials in locations where responsive information is not likely to be found, absent a showing of good cause. To the extent a party believes that responsive data is likely to be found on data sources that are not reasonably accessible, the party shall disclose that fact to the other parties.

6. Time Zone

Unless otherwise agreed, all dynamic date and time fields, where such fields are processed to contain a value and do not automatically populate, and all metadata pertaining to dates and times will be standardized to Greenwich Mean Time (GMT). The Parties understand and acknowledge that such standardization affects only dynamic fields and metadata values and does not affect, among other things, dates and times that are hard-coded text within a file.

D. HARD COPY DOCUMENT PRODUCTION FORMAT

1. The parties agree that, with respect to documents that exist in hard-copy format ("Hard-Copy Materials"), a Producing Party will image and produce such documents as TIFF images and OCR text in accordance with the specifications delineated in Section C, above. Where paper scanned images have identification spines, file folder labels, "post-it notes," or any other labels, the information on the label shall be scanned and produced to the extent practicable. In addition, folder labels, box labels, or binder labels (including spines), or other similar top level identifiers, to the extent practicable, shall be manually recorded at the time of scanning and coded in the Binder and/or Folder field. Load files for such productions shall include data relevant to the individual documents, including Bates numbering, custodian, OCR and folder labels and box labels that have been manually recorded.

2. To the extent responsive Hard-Copy Materials are included in a large compilation of documents that is compiled solely for the purposes of storage convenience and not for any

purposes related to the litigation and contains irrelevant, non-responsive Hard-Copy Materials, the Producing Party may produce responsive, non-privileged Hard-Copy Materials without also producing non-responsive Hard-Copy Materials.

3. If a Producing Party reasonably believes that production of Hard-Copy Materials as imaged files pursuant to this Section D is unduly burdensome, the Producing Party shall seek to meet and confer in good faith with the Requesting Party regarding content, volume, and related issues before any production of Hard-Copy Materials. If the parties are unable to reach agreement, any party may seek relief from the Court.

E. PREVIOUSLY PRODUCED DATA

For every production of Data in the Action that was made prior to the adoption of this Protocol, the Producing Party shall provide a metadata overlay containing the metadata listed in Appendix 2, as applicable, for the Data in the production to be provided under this Protocol. To the extent a Producing Party is requested or ordered to produce materials that were previously produced in a different action or proceeding, however, the Producing Party shall disclose prior to production how such materials were produced in the previous action. The Producing Party shall produce materials as they were produced in the prior action or proceeding, and no additional metadata overlay need be produced absent a further order from the Court.

F. PRIVILEGE LOGS

1. To the extent that a document is withheld from production on the basis of the attorney client privilege or the work product doctrine, the producing Party shall produce a rolling privilege log of withheld documents within a reasonable period after the document was withheld from the rolling production.

2. Prior to generation of a privilege log, the parties shall meet and confer in a good faith effort to reach agreement on the manner in which a privilege log will be generated and the

contents of such a log. The parties shall consider whether the nature and volume of the privileged documents and ESI warrants category-by-category privilege logs, document-by-document privilege logs, or some combination of these approaches, consistent with Minnesota Rule of Civil Procedure 26. If the parties are unable to agree on the requirements of a privilege log for documents and ESI, the parties shall present such a dispute to the Court. Neither party shall contend that the meet and confer process set forth in this paragraph constitutes a waiver of attorney-client privilege or attorney work product for any document claimed to be protected from disclosure.

3. The following documents presumptively need not be included on a privilege log:

   a. Privileged communications exclusively between a party and its outside litigation counsel after September 12, 2014, and work product performed by a party at the direction of outside litigation counsel after September 12, 2014.

   b. Privileged communications exclusively involving outside litigation counsel after September 12, 2014.

   c. Work product created by in-house or outside litigation counsel, or by an agent of in-house or outside litigation counsel, other than a party, after September 12, 2014.

The parties agree that certain privileged communications between a party and its in-house counsel need not be logged, but will continue to confer on that subject in order to reach agreement or present their disagreements in accordance with Section F(2) above. The parties further agree to meet and confer regarding any proposed additional categories of documents that presumptively need not be logged.

G. OBJECTIONS PRESERVED

Nothing in this Protocol shall be interpreted to require disclosure of relevant information or Data that is protected by the attorney-client privilege, common interest privilege, work-product doctrine, or is prohibited from disclosure under any similar law, regulation, rule, court order, or any other applicable privilege or protection. The parties do not waive any objections to the production, discoverability, or confidentiality of ESI, Hard-Copy Materials or any other discovery materials, including, without limitation, objections regarding the burden, overbreadth or relevance of document requests related to ESI, Hard-Copy Materials or any other discovery materials, or relating to the production of ESI or Hard-Copy Materials in a form specified in this Protocol.

H. RESOLUTION OF DISPUTES

1. The parties agree to meet and confer in good faith regarding matters related to the production of Data not specifically set forth in this Protocol, related to the interpretation of this Protocol, or related to the parties' obligations thereunder. The parties shall make their best efforts to comply with and resolve any differences concerning compliance with this Protocol. If a Producing Party cannot comply with any material aspect of this Protocol, such party shall inform the Requesting Party in writing at or before the time of production as to why compliance with the Protocol is unreasonable or not possible.

2. If the parties are unable to reach resolution regarding any dispute concerning the interpretation of this Protocol or compliance with same, such disputes may be presented for judicial resolution. No party may seek judicial relief concerning this Protocol unless it first has conferred with the applicable Producing or Requesting Party.

SO ORDERED this 25 day of September, 2015

BY THE COURT:

Thomas M. Sipkins
Judge of District Court

APPENDIX 1: Load File Formats

Image Load Files

- ESI will be produced in Concordance load file format. Upon request and demonstration of need, the Parties will meet and confer to discuss production in an alternative load file format or to produce without load files.
- Every document referenced in a production image load file shall have all corresponding images, text, and data. Redacted text shall not be included in a redacted document's text file.
- The name of the image load files shall mirror the name of the delivery volume, and should have an .opt or .log file extension (*e.g.*, ABC001.OPT or ABC001.LOG).
- The volume names shall be consecutive (*i.e.*, ABC001, ABC002, *et. seq.*).
- Every image in the delivery volume shall be contained in the image load file.
- The image key shall be named the same as the production number of the page.
- Load files shall not span across media (*e.g.*, CDs, DVDs, Hard Drives, etc.); instead, a separate volume shall be created for each piece of media delivered.
- Each image load file shall be produced in a standard litigation support image load format (e.g., .opt or .log) providing:
    a. The document number for each image;
    b. The relative path name(s) of each TIFF image file; and
    c. The document boundaries for each document.

- The load file shall be in the order that appropriately corresponds with each image file. The following represents an example of the format of a standard .opt or .log image load/unitization file:

Bates,Volume,PATH_to_image,Document Break,Folder Break,Box Break,Total_Pages.

M_0100000,06150101,\06150101\0000\0001.TIF,Y,,,1
M_0100001,06150101,\06150101\0000\0002.TIF,Y,,,1
M_0100002,06150101,\06150101\0000\0003.TIF,Y,,,1
M_0100003,06150101,\06150101\0000\0004.TIF,Y,,,2
M_0100004,06150101,\06150101\0000\0005.TIF,,,,
M_0100005,06150101,\06150101\0000\0006.TIF,Y,,,1
M_0100006,06150101,\06150101\0000\0007.TIF,Y,,,4
M_0100007,06150101,\06150101\0000\0008.TIF,,,,,
M_0100008,06150101,\06150101\0000\0009.TIF,,,,,
M_0100009,06150101,\06150101\0000\0010.TIF,,,,,

Metadata Load Files

- The metadata load file shall use the following delimiters:
  - Field Delimiter: ¶ (ASCII 020)
  - Text Qualifier: þ (ASCII 254)
  - Multi-value Delimiter: ; (ASCII 059)
  - New line: ® (ASCII 174)
- Metadata fields that are not applicable to a document or are NULL shall be left with null values and not populated with fillers or spaces.
- All date fields shall be produced in "mm/dd/yyyy" format.
- All time fields shall be produced in "hh:mm:ss" format.
- Load files shall not span across media (*e.g.*, CDs, DVDs, Hard Drives, etc.); instead, a separate volume shall be created for each piece of media delivered.
- The name of the metadata load file shall mirror the name of the delivery volume, and shall have a .dat or .txt extension (*i.e.*, ABC001.DAT or ABC001.TXT).

- The volume names shall be consecutive (*i.e.*, ABC001, ABC002, *et. seq.*).
- Furthermore, .dat or .txt files must be encoded in ASCII or ANSI:UTF codings.
- The metadata fields listed in Appendix 2 (as pertain to particular categories of documents pursuant to this Protocol) shall be included in the delimited database load files, to the extent such metadata is already in existence and reasonably accessible. To the extent that metadata does not exist, is not reasonably accessible or available, or would be unduly burdensome to collect, nothing in this Protocol shall require any party to extract, capture, collect or produce such metadata. Any party that intends to withhold existing metadata listed in Appendix 2 on the basis that it is not reasonably accessible or available or would be unduly burdensome to collect shall promptly inform the requesting party and meet and confer. The parties will reasonably endeavor to confirm the accuracy of the metadata extraction process and expressly reserve their rights to object to the use of metadata for any reason or purpose. To the extent that the metadata listed in Appendix 2 relating to any ESI contains information subject to a claim of privilege or any other applicable protection, that metadata may be redacted or withheld, as appropriate, and the Producing Party shall include information regarding the basis and justification for withholding or redacting such information in its privilege log in accordance with Rule 26 of the Minnesota Rules of Civil Procedure.

APPENDIX 2: ESI Metadata and Coding Fields

Field Name	Field Description	Populated For	Example Values

27-CV-15-3785
Filed in Fourth Judicial District Court
11/4/2015 4:16:05 PM
Hennepin County, MN

STATE OF MINNESOTA | **DISTRICT COURT**

COUNTY OF HENNEPIN | **FOURTH JUDICIAL DISTRICT**

In re: Syngenta Litigation This Document Related to: ALL ACTIONS	Case Type: Civil Other Honorable Thomas M. Sipkins File No.: 27-CV-15-3785 **SCHEDULING ORDER NO. 2**

The Court orders that the deadlines in the following Scheduling Order shall govern this case, until further order of this Court:

I. Master Complaint, Notice to Conform, and Motions to Dismiss. By separate orders, this Court previously ordered the Plaintiffs to file a Master Complaint on October 2, 2015, to meet and confer concerning Notices to Conform by October 9, 2015 and to file joint proposals regarding the same by October 23, 2015. On October 23, 2015, the parties filed a proposed agreed order concerning Notices to Conform. The Court entered an Order Approving Notices to Conform and established a deadline of November 19, 2015 for Plaintiffs to file Notices to Conform.

By separate order, this Court previously ordered Defendants to file their Motions to Dismiss the Master Complaints by November 9, 2015, Plaintiffs to file their Oppositions to such Motions to Dismiss by December 1, 2015, and Defendants to file their Replies to such oppositions by December 22, 2015.

The Court will hold a hearing on January 8, 2016 for oral arguments on Defendants' Motions to Dismiss Plaintiffs' Master Complaints.

27-CV-15-37385
Filed in Fourth Judicial District Court
11/4/2015 4:16:05 PM
Hennepin County, MN

II. Answer, Comparative Fault, and Additional Parties. Should one or both complaints survive the Motion to Dismiss, the parties shall meet and confer regarding a date for Defendants to answer the Master Complaints within thirty (30) days following the Court's ruling.

No later than 14 days following the filing of the Answer[s], any party asserting comparative fault must identify all persons or entities whose fault is to be compared. If any person or entity is so identified, then the party asserting comparative fault also must specify the nature of the fault which is claimed, subject to such additional identifications that a party may seek to make upon good cause shown based on facts learned during discovery.

Any motion for leave to join additional parties or to otherwise amend the pleadings must be filed by no later than 21 days following the filing of the Answer[s], subject to such joinders or amendments that a party may seek to make upon good cause shown based on facts learned during discovery.

III. Bellwether Discovery Plaintiff Selection. On October 23, 2015, the parties submitted an agreed proposed bellwether selection order, and the Court subsequently entered it. The Bellwether Selection Order is hereby incorporated by reference.

The initial discovery pool shall consist of (i) all named class representatives; and (ii) the forty (40) bellwether discovery plaintiffs named by the Court in accordance with the Bellwether Selection Order. If a plaintiff selected as a bellwether plaintiff (whether for discovery or trial) voluntarily dismisses its case, Syngenta may identify a replacement within five (5) days thereafter.

IV. Stay of Discovery. Upon entry of this Order and the Coordination Order, the stay of discovery is hereby lifted as to discovery to Defendants and to the named Class Plaintiffs.

27-CV-15-3735
Filed in Fourth Judicial District Court
11/4/2015 4:16:05 PM
Hennepin County, MN

Discovery as to all other Plaintiffs shall remain stayed; however, such stay shall be lifted as to bellwether discovery plaintiffs, once selected by the Court on December 21, 2015.

V. Written Discovery. Except as stayed above, written discovery may commence upon the entry of this Order and the entry of the Coordination Order and pursuant to the terms of both Orders. The parties shall serve written objections and responses to written discovery requests within 30 days. Parties must certify when document discovery is substantially complete for any given party. All fact written discovery must be served by March 15, 2016.

VI. Fact Depositions. Except as stayed above, parties may begin taking fact depositions upon the entry of this Order and the Coordination Order and pursuant to the terms of both Orders (assuming reasonable notice is provided, with individual scheduling to be mutually agreed). Each witness shall only be deposed once absent Order of the Court for good cause shown. All fact depositions shall close on May 2, 2016. The parties have agreed to attempt to conclude the fact depositions of all producer bellwether plaintiffs by April 1, 2016, but without waiving either side's right to conduct any fact depositions up to and including May 2, 2016 if necessary.

VII. Individual Bellwether Plaintiff Selection—Trial. The bellwether trial pool shall be comprised of four (4) producer plaintiffs and two (2) non-producer plaintiffs. On June 13, 2016, each party shall simultaneously provide to each other, at a time to be determined, a list of four (4) producer plaintiffs and two (2) non-producer plaintiffs.

Between June 13 and June 17, 2016, the parties shall meet-and-confer to attempt to reach an agreement as to which cases should serve as individual bellwether trial cases. If the parties reach agreement, the parties shall jointly submit a list of four (4) producer plaintiffs and two (2) non-producer plaintiffs to the Court for consideration on June 20, 2016.

27-CV-15-3735
Filed in Fourth Judicial District Court
11/4/2015 4:16:05 PM
Hennepin County, MN

If the parties do not agree, each Party shall propose in writing to the Court four (4) producer plaintiffs and two (2) non-producer plaintiffs to serve as individual bellwether trial cases, with the reasons stated in a brief totaling five (5) pages and filed by 4:30 p.m. on June 20, 2016. On June 30, 2016, the parties shall each submit to the Court in writing either (a) their agreement with one or more of the bellwether trial cases proposed by the other side, or (b) their grounds for opposition in a brief totaling five (5) pages.

On July 22, 2016, the Court will select four (4) cases to serve as individual bellwether trial cases, including at least one non-producer, and will rank them in the order in which each one will be tried.

VIII. Class Certification. Plaintiffs shall file their class certification motion, along with all class-related expert reports and reliance materials, by June 15, 2016. The parties shall complete discovery of plaintiffs' class-related experts by July 6, 2016. Syngenta shall file its opposition to plaintiffs' class certification motion, along with all class-related expert reports and reliance materials, by July 20, 2016. The parties shall complete discovery of Syngenta's class-related experts by August 12, 2016. Plaintiffs' reply brief shall be due August 17, 2016. After reviewing the parties' briefs and other submissions, the Court will decide whether to convene an oral argument hearing on class certification and, if so, when to schedule that hearing; however, if it does so, the Court intends to hold a hearing on class certification in September 2016.

IX. Merits Experts. Limited to the cases approved by the Court for the initial trial pool (including the named class representatives if a class is certified), plaintiffs must serve their merits (non-class-related) expert reports and reliance materials, with regards to both liability and damages issues, by September 9, 2016. The parties shall complete discovery of plaintiffs' merits experts by October 10, 2016. Syngenta shall file its merits experts and reliance materials by

27-CV-15-3735 Filed in Fourth Judicial District Court
11/4/2015 4:16:05 PM
Hennepin County, MN

November 4, 2016. The parties shall complete discovery of Syngenta's merits experts by November 23, 2016. No further expert disclosures will be allowed.

X. Dispositive and *Frye-Mack* Motions. The parties shall file their dispositive and merits-expert *Frye-Mack* motions, if any, by January 6, 2017. The parties shall file their opposition briefs, if any, by January 27, 2017. The parties shall file their reply briefs, if any, by February 13, 2017. After reviewing the parties' briefs and other submissions, the Court will decide whether to convene an oral argument hearing on summary judgment and/or *Frye-Mack* motions and, if so, when to schedule that hearing; however, if it does so, the Court intends to the Court will hold a hearing on the dispositive and *Frye-Mack* motions in February 2017.

XI. Pre-Trial Conference. The Court will hold a pre-trial conference in February 2017, with the precise date to be determined later.

XII. Trial Sequencing. After the Court decides class certification, the Court will enter an order sequencing the trials beginning in March 2017.[1] The Court may revisit this date, if it appears overly optimistic or aggressive. The issue of whether the first trial will be a class trial or a bellwether trial is deferred until after the Court rules on the motion for class certification.

XIII. First Bellwether Trial. Subject to the caveat in paragraph XII, the first trial will commence in March 2017, with the precise date to be determined later. Each of the four or five initial trials (including the class trial, if one occurs), shall be scheduled to occur approximately four (4) weeks following the conclusion of the previous trial. The Court intends to coordinate trial schedules with the federal MDL and other coordinated state court actions, and as such,

[1] The Court originally indicated in its letter order dated September 28, 2015 that "I believe January through March 2017 is a reasonable target to schedule trials in the bellwether trials." Since then, Class Counsel for the Plaintiffs has indicated a desire for an even earlier trial, while individual counsel proposed an initial bellwether trial of April 3, 2017. The issue of whether the first trial ordered herein in March 2017 will be a class trial or a bellwether trial is deferred for a future date, and is to be decided only after the Court rules on the motion for class certification.

reserves the right to move the schedule for the above bellwether trials to avoid simultaneous trials in two such jurisdictions during the bellwether period.

SO ORDERED.

Dated: 11-4, 2015

Court File No: 27-CV-15-3785

Judge Thomas M. Sipkins

ORDER

The above matter came on before the undersigned based on a recommendation made by Special Master Van de North on December 16, 2015:

WHEREAS, on October 30, 2015, the Court entered a Bellwether Selection Order specifying a process by which Plaintiffs' counsel and Defendants' counsel would work with Special Master Van de North to select 40 bellwether discovery plaintiffs.

WHEREAS, the Parties met and conferred pursuant to the Bellwether Selection Order and worked with Special Master Van de North to select the 40 bellwether discovery plaintiffs.

WHEREAS, by letter dated December 16, 2015, Special Master Van de North recommended 40 bellwether discovery plaintiffs to the Court.

WHEREAS, the matter came before the court at the December 18, 2015 hearing.

NOW THEREFORE, in consideration of the foregoing, it is hereby ordered that:

1. The 40 plaintiffs recommended by Special Master Van de North, and attached hereto as Exhibit A, are selected as bellwether discovery plaintiffs.

2. The discovery stay is lifted with respect to the 40 plaintiffs identified in Exhibit A, pursuant to Scheduling Order No. 2 entered on November 4, 2015.

Dated 12-22, 2015.

Thomas M. Sipkins
District Court Judge

INTRODUCTION 1

BACKGROUND 5

A. Biotechnology And Genetically Modified Crops In The United States 5

B. Syngenta's Development Of U.S.-Approved Viptera And Duracade Corn 6

C. Syngenta Commercializes Viptera Consistent With Industry Guidelines 9

1. The BIO Stewardship Policy 9

2. Syngenta Commercializes Viptera Consistent With The BIO Policy 10

3. Competing "Stewardship" Guidelines From Other Trade Associations 11

D. Most Grain Elevators And Exporters Treat Viptera As Fungible Corn, Commingle It, And Ship It To China 11

E. The Price Of Corn Drops And China Then Bans U.S. Corn 13

CHOICE OF LAW 14

ARGUMENT 16

I. All Claims Asserted Under The Laws Of Any States Where No Plaintiff Resides Must Be Dismissed As A Matter Of Law. 16

II. Plaintiffs' Claims Are Barred By The Economic Loss Doctrine. 17

A. The Producers' Claims Are Barred By The Stranger ELD. 18

1. The Stranger ELD Is The Majority Rule. 18

2. The Stranger ELD Bars The Producers' Claims. 23

3. The Producers Cannot Avoid The ELD By Claiming Physical Injury To Their Own Property. 26

4. The MDL Order Misstates The Law On The Stranger ELD. 28

5. All States Would Bar The Producers' Claims Under The Stranger ELD. 36

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

B. Non-Producers' Claims Are Barred By The Stranger ELD Or The Contractual ELD. 57

1. All States At Issue Would Apply The Contractual ELD. 64

III. Syngenta Did Not Have A Duty To Control The Conduct Of Others To Segregate Viptera From The Corn Supply. 68

A. The Existence Of Duty Depends On Policy-Based Factors That Limit Liability Regardless Of Foreseeability As A Matter Of Law. 69

B. Applying These Factors, Courts Routinely Hold That Duty Cannot Be Established To Hold A Manufacturer Liable For Third Parties' Post-Sale Use Of Its Safe, Non-Defective Product. 71

C. These Same Principles Limiting Duty Show That Plaintiffs Cannot Establish A Duty Of Care Here. 74

D. The Only Court To Address Parallel Claims Against A Manufacturer Of Another Approved GM Seed Held That Duty Could Not Be Established As A Matter Of Law. 80

E. The MDL Court Erred In Holding That Syngenta Had A Duty. 82

F. Plaintiffs' Allegations Do Not Show That Syngenta Voluntarily Undertook A Duty To Isolate Viptera. 87

IV. As A Matter Of Law, Syngenta Had No Duty To Refrain From Selling Viptera. 89

A. The Law Does Not Impose A Duty On Manufacturers To Refrain From Selling A Safe, Non-Defective Product Based On How Third Parties Might Use It After The Point Of Sale. 89

B. Alleged "Industry Standards" Did Not Impose A Legal Duty On Syngenta. 91

V. FIFRA Preempts Plaintiffs' Failure-To-Warn Theory Of Liability. 92

VI. Plaintiffs' Strict-Liability Claims Fail As A Matter Of Law. 93

A. Minnesota Class Plaintiffs' Products-Liability Claim Does Not Allege Any Defect In The Condition Of Syngenta's Corn Seeds. 94

B. Syngenta Cannot Be Held Strictly Liable For Failure To Warn. 97

VII. Plaintiffs' Trespass-To-Chattels Claims Must Be Dismissed As A Matter Of Law. 99

A. Plaintiffs Fail Adequately To Plead Acts *By Syngenta* Constituting Trespass. 100

B. Plaintiffs Fail Adequately To Plead Intent..... 102

C. Plaintiffs Fail Adequately To Plead That *Their* Corn Suffered Intermeddling..... 103

D. Plaintiffs Fail Adequately To Plead That Their Property Was "Impaired" By Any Alleged Intermeddling..... 104

VIII. Plaintiffs Fail to State A Claim For Tortious Interference. 105

A. The Producers Fail Adequately To Allege Specific Prospective Business Relationships..... 105

B. Plaintiffs Fail To Allege The Requisite Injury: That A Third Party Ended Or Refused To Enter A Business Relationship..... 108

C. The Producers Fail To Allege Improper Means. 111

D. Plaintiffs Fail Adequately To Allege Intent..... 112

IX. Plaintiffs' Private-Nuisance Claims Must Be Dismissed As A Matter Of Law. 113

A. Plaintiffs Fail Adequately To Allege That Syngenta Controlled Or Substantially Participated In the Activity Constituting The Nuisance. 113

B. Plaintiffs Fail Adequately To Allege Interference With The Use And Enjoyment Of Their *Land*. 115

C. Plaintiffs Fail Adequately To Allege Unreasonable Interference..... 117

X. Plaintiffs' Consumer Protection Claims Must Be Dismissed. 118

A. Minnesota Statutes §§ 325D.13, 325D.44, & 325F.69 118

1. Plaintiffs' Allegations Cannot Support Applying MUTPA And MCFA To The Individual Claims Of Non-Minnesota Residents. 118

2. MUTPA And MCFA Do Not Apply Because The Direct Purchasers Of Syngenta's Goods Are Merchants. 122

3. MUTPA And MCFA Claims Fail For Lack Of Public Benefit. 123

4. MDTPA Does Not Apply To Claims For Compensation For Past Harms. 124

INTRODUCTION

Plaintiffs' lawsuit rests on the unprecedented theory that it was a *tort* for Syngenta to sell a U.S.-approved, genetically modified (GM) corn seed called Viptera in the U.S. simply because that biotechnology had not yet been approved for import into China. According to Plaintiffs, absent Chinese approval, the law imposed a duty on Syngenta either (i) to control the way *everyone else* handled corn grown with the new technology to keep it segregated or (ii) to prevent American farmers from having access to the technology *at all*. The claimed reason for this novel duty is not that the GM trait harmed corn in any *physical* way. There is no dispute that the U.S. government allowed corn grown from Viptera to be treated like any other yellow corn and thus that it could be harvested, processed, and consumed without any requirement to keep it separate. Instead, Plaintiffs claim only *economic* injury, asserting that because corn is typically treated as a fungible commodity crop, and because they and others mixed Viptera corn into the U.S. corn supply, China eventually decided to block all U.S. corn shipments (supposedly due to the presence of Viptera), so as to cause a drop in the price of all U.S. corn. In their view, Syngenta should be liable in tort for that entire extended chain of events, including actions taken by *others* entirely outside Syngenta's control. That theory should be recognized for what it is: an attempt to use tort law to allow Plaintiffs to avoid the costs of adapting their businesses to the advent of new technology and to turn a biotechnology manufacturer into an insurer paying out on a policy that Plaintiffs never bought to protect themselves from market drops in the price of corn.

At the heart of this case lies an inescapable fact: when the U.S. approves biotechnology before foreign countries (like China), players in the U.S. corn industry such as grain elevators and exporters face a choice. They can continue to treat all corn as fungible and mix all corn together, in which case they risk losing the ability to export to a market where a U.S.-approved technology has not yet gained approval. Or they can take steps to separate corn to preserve their

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

ability to serve the special demands of particular export markets. The premise of Plaintiffs' case is that tort law eliminates the need for Plaintiffs to face that choice by requiring the manufacturers of new GM technology to hold others in the market harmless from costs that the advent of new technology might place on their current ways of doing business. In their view, tort law dictates that American manufacturers must either *suppress* innovative new technology until it is approved overseas, or else absorb the costs that others in the market incur when they fail to take steps to adapt to the new technology—all because it is supposedly a tort to market technology that others find disruptive for their way of doing business. Under that radical reasoning, a GM manufacturer could be liable in tort for selling a GM seed that increases crop yields and thus causes prices to drop, because of the economic harm to those in the industry who previously enjoyed higher prices. Plaintiffs' theory has no support in precedent and should be rejected as a matter of law.

There is no dispute that when Syngenta began selling Viptera in 2010, it had been found safe and was fully approved by the U.S. Government. It was also well known in the industry that China had not yet approved Viptera. As a result, some grain elevators—like Bunge—chose to change the way they did business to address the advent of this new technology. They decided it was important to preserve their ability to meet the standards of the Chinese export market, so they refused to accept Viptera corn at their grain elevators. Others, including the Non-Producer Plaintiffs here, took a different approach. They chose not to segregate corn grown from Viptera from other corn, treating all such corn for what, by law, it was: fungible U.S. "yellow corn." They mixed corn without distinction in their facilities. Corn producers similarly made no effort to require the grain elevators to whom they sold their corn to segregate it to ensure that it would be exportable to China. And in seeking to profit from record-high prices driven by corn shortages in 2011 and 2012, Non-Producers decided to ship corn containing Viptera to China

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

knowing that Viptera had not yet been approved for import into China. That approach continued for two years, until China began turning away U.S. corn shipments in November 2013.

In addition to suffering from a host of individual defects, Plaintiffs' causes of action are broadly foreclosed by two fundamental principles.

First, Plaintiffs' claims are barred by the economic loss doctrine ("ELD"). Under settled law, purely economic losses are not recoverable in actions for unintentional torts. Indeed, until the Viptera litigation, the only American court to consider claims identical to those here based on the loss of a foreign market due to the spread of an approved GM trait *rejected* those claims by applying the ELD. *See Sample v. Monsanto Co.*, 283 F. Supp. 2d 1088, 1093 (E.D. Mo. 2003).

Although the MDL court presiding over the federal Viptera litigation ("MDL Court") concluded that the ELD did not apply, that court did not acknowledge *Sample*, much less distinguish it. Instead, the MDL decision rests on the creation of a novel exception to the ELD based on a case-by-case assessment of policy factors to determine when the ELD should apply. With all respect, that approach misstates the law: the very reason for the ELD is to provide a bright-line rule barring recovery of economic losses absent physical injury. It forecloses precisely the case-by-case approach that the MDL Court adopted and which, if anything, resembles the *minority* approach to the ELD adopted by only three States and rejected by the Restatement and every other State to have considered it.

Second, Plaintiffs' suggestion that Syngenta had a duty to reorganize the entire industry framework for growing and distributing corn—by controlling the actions of growers, elevators, and exporters, *including Non-Producers themselves*—is literally unprecedented. The standard rule is that a party has no duty to control the conduct of another, and under that rule courts regularly reject the idea that manufacturers of safe, non-defective products have a duty to control third parties' handling of products after the point of sale. Imposing such a duty would also

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

undermine the policy behind the U.S. regulatory framework under which, once approved by the USDA, the EPA, and the FDA, GM crops are treated the same as non-GM crops. No court has purported to create a parallel regulatory regime restricting which GM traits can and cannot be sold freely after federal approval, and this Court should not proceed down that uncharted path.

To the extent Plaintiffs claim that Syngenta had a duty not to sell Viptera *at all* until it had Chinese approval, that theory is even more far-fetched. State tort law does not require the suppression of new technology that current market participants find inconvenient, nor does it give foreign governments a veto over which new technologies—*already approved by the U.S. government*—can be sold in the United States.

The MDL Court's conclusion that Syngenta had a duty to operate its business "for the mutual benefit of all" in the industry so as to avoid economic disruptions for other market participants, MDL Order 10,[2] is similarly unprecedented. The MDL Court cited no prior case recognizing such a duty, and it is completely counter to the usual rule that, absent specifically defined economic torts, market participants are free to pursue their own advantage in the market, including by introducing disruptive new technologies.

Plaintiffs' repeated references to cases involving *unapproved* GM traits are irrelevant. Those cases involved GM traits that had been improperly released into the U.S. food supply *before they had been approved for human consumption.* Before the Viptera litigation, only two courts had addressed claims like the ones here—claims that the *lawful* sale of an *approved* GM seed harmed farmers or exporters by foreclosing their ability to serve an export market. Both courts rejected those claims as a matter of law. As noted above, *Sample* barred such claims under the ELD. In the second case, a Canadian court applied the same common-law principles

[2] "MDL Order" refers to Mem. & Order, Dkt. 1016, *In re Syngenta AG MIR162 Corn Litig.*, No. 2:14-md-2591 (D. Kan. Sept. 11, 2015) (attached as Ex. C).

27-CV-15-3735
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

applicable here and held as a matter of law that the plaintiffs could not show duty *and* that the claims were barred by the ELD as well. *See Hoffman v. Monsanto Canada (Hoffman I)*, 2005 SKQB 225, 2005 SK.C. LEXIS 330 (Can. Sask. Q.B. May 11, 2005) (attached as Ex. A), *aff'd*, *Hoffman v. Monsanto Canada* (*Hoffman II*), 2007 SKCA 47, 2007 SK.C. LEXIS 194 (Can. Sask. C.A. May 7, 2007) (attached as Ex. B).[3] Those decisions provide the proper approach for analyzing this case, and this Court should similarly dismiss Plaintiffs' claims.

BACKGROUND

Because Plaintiffs' complaints hinge on the premise that GM crops must be segregated from those that are not, a brief discussion of the regulatory backdrop is helpful.

A. Biotechnology And Genetically Modified Crops In The United States[4]

The United States Department of Agriculture ("USDA") defines genetic engineering as "a precise and predictable method used to introduce new traits into plants and animals by moving genetic elements from one or more organisms into another."[5] The government has recognized that the use of this biotechnology "has resulted in benefits to farmers, producers, and consumers" by "mak[ing] both insect pest control and weed management safer and easier while safeguarding crops against disease," including "allow[ing] for a significant reduction" in the use of pesticides.[6]

The benefits of biotechnology have prompted a dramatic increase in the use of GM seeds over the past two decades. For some crops, such as corn, this has translated into near-universal

usage across the U.S. Today, GM corn makes up 92% of all corn planted in the U.S.[7] The use of GM technology has also produced corresponding increases in crop yields.[8] As the USDA has explained, biotechnology can help "keep pace with demands for food while reducing production costs."[9] For these reasons, the U.S. Government long ago weighed the benefits of GM crops and adopted the policy of treating approved GM products the same as conventionally bred crops.[10]

Manufacturers of GM traits like the ones at issue here are statutorily restricted from launching GM traits until they have been fully vetted and approved by the USDA, the EPA, and the FDA—as the traits at issue here were.[11] Through its "complex method of evaluation"[12] and testing, the USDA may determine that the GM trait is safe and remove any statutory restrictions by "deregulating" the GM trait, either in whole or in part.

B. Syngenta's Development Of U.S.-Approved Viptera And Duracade Corn

Syngenta has developed, manufactured, and sold GM seeds for decades, and its advances include two corn seed traits called MIR162 and Event 5307. Each trait protects corn crops from insects and pests, thus increasing crop yields and reducing the need for pesticides. MIR162 was incorporated into Syngenta's Viptera corn seed, making it resistant to above-ground pests like

Lepidoptera (caterpillars). Several years after Viptera was launched, Syngenta developed Event 5307, which controls pests like rootworm and is found in a corn seed product called Duracade.

According to the complaints, Syngenta "field tested [Viptera and Duracade] under permits issued by or notifications to . . . the USDA." Non-Class Compl. ¶ 13; *see* Class Compl. ¶ 39. The complaints do not allege any unapproved releases of MIR162 during the field testing. Once sufficient laboratory and field testing established that Viptera was safe for humans, animals, and the environment alike, Syngenta petitioned the USDA in 2007 to deregulate MIR162. *See generally* Pet. for Determination of Nonregulated Status for Insect-Resistant MIR162 Maize, SYN-IR162-4 (Aug. 31, 2007) ("Deregulation Petition"), http://www.aphis.usda.gov/brs/aphisdocs/07_25301p.pdf.

Three years later, in 2010, the USDA approved MIR162 for deregulation without any restrictions on how it was to be sold, grown, or handled.[13] The USDA also concluded that MIR162 did not pose risks to humans, animals, or the environment.[14] The USDA rejected alternatives to full deregulation, including partial deregulation that would have restricted where Viptera could be planted.[15] By deregulating a GM trait like MIR162, the USDA "allow[s] it to be sold commercially." *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d 1004, 1015 n.2 (E.D. Mo. 2009). As a result, the USDA's unrestricted approval made Viptera, just like every other U.S.-approved GM corn product, a lawful and integral part of the U.S. corn supply under the USDA's broad definition of "yellow corn."[16]

Syngenta petitioned the USDA for deregulation of Event 5307 in April 2011[17] after conducting USDA-authorized field tests. Non-Class Compl. ¶ 13; Class Compl. ¶ 198. As with the MIR162 field tests, the complaints do not allege any unapproved releases of Event 5307 during testing. In 2013, the USDA fully deregulated Event 5307 without any restrictions.[18]

MIR162 and Event 5307 not only received USDA approval, but also were approved by the EPA and the FDA. The EPA regulates the use, sale, and labeling of pesticides, including those in GM traits such as MIR162, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). *See* 7 U.S.C. §§ 136a, 136w. Syngenta secured EPA approval of MIR162 in November 2008[19] and Event 5307 in July 2012.[20] The FDA, which oversees food and feed safety of GM plants,[21] was satisfied with Syngenta's conclusion that "food and feed derived from . . . MIR162 are as safe and nutritious as food and feed derived from conventional maize" (and likewise with respect to Event 5307).[22] Thus, by April 20, 2010, it is undisputed that Viptera had received all approvals required for it to be sold without restriction in the United States, and Duracade had received all required approvals for unrestricted sale by January 29, 2013. There is no dispute in this case about the safety or efficacy of Viptera and Duracade.

C. Syngenta Commercializes Viptera Consistent With Industry Guidelines

1. The BIO Stewardship Policy

Given the increasingly globalized market for many commodity crops, one issue perennially raised by new GM technologies arises from the fact that a given GM trait typically will not secure approval from regulatory authorities in different countries all at the same time. Thus, a trait may be approved for commercialization in an exporting country before it has received approval for import in all other countries. Because of this issue of asynchronous approvals, various players in the biotechnology and grain industries have suggested "stewardship" guidelines for developers to consider in deciding when to commercialize a new product. One of the earliest was the Biotechnology Industry Organization ("BIO") "Product Launch Stewardship Policy," first approved on May 10, 2007.[23] The BIO Policy sets out recommendations for member companies but expressly refuses to create any binding obligations. *See* 2009 BIO Policy, Ex. D at 1 n.2 ("Under BIO's bylaws and applicable antitrust law, individual member companies ***are not bound*** by this Association policy or its annexes.") (emphasis added). The BIO Policy suggests that, before launching a new GM trait, member companies should assess which countries are "key import markets," which requires, among other things, assessing the volume of trade for the crop at issue. *Id.* at 4. The Policy does not define what makes a market "key" or stipulate any particular market-assessment metrics. The BIO Policy suggests that, before launching a new GM seed, manufacturers consider obtaining import approval from those "key export markets" that have "functioning regulatory systems"—defined as countries with "a track record of systematic authorizations with *consistent and predictable*

[23] BIO updated the BIO Policy on December 10, 2009—the only update prior to Syngenta's decision to launch Viptera, https://www.bio.org/sites/default/files/Product_Launch_Stewarship_12_10_09_0.pdf (attached as Ex. D and incorporated by reference at Non-Class Compl. ¶¶ 73, 116, 121, 144 and Class Compl. ¶¶ 25, 32, 35, 62).

timelines and processes." *Id.* at 4 & n.6 (emphasis added).

The BIO Policy has never listed China as a key import country or a country from which approval should be secured prior to commercialization. In fact, the 2009 BIO Policy listed only the U.S., Canada, and Japan as "key markets," *see id.* at 4, and noted only that other countries might be considered later. *See id.* at 4 n.6.

2. Syngenta Commercializes Viptera Consistent With The BIO Policy

In late 2009, Syngenta decided to begin commercialization upon securing deregulation of MIR162 from the U.S. and import approval in the markets named by BIO. It is undisputed that, consistent with the BIO Policy, Syngenta obtained approval from the U.S., Canada, and Japan before Viptera was launched—the countries that BIO had identified at the time. Indeed, even before the first commercial planting began in 2011, many additional foreign countries, including Brazil, Korea, Taiwan, the Philippines, and Mexico, had approved Viptera for import as well.

China does not even permit an application for approval of a trait to be filed until the trait has been approved for human consumption in the exporting country.[24] Syngenta applied for import approval from China as soon as it was permitted to do so in March 2010. Non-Class Compl. ¶ 70; Class Compl. ¶ 59. At the time Syngenta launched Viptera in the United States in 2010, about one-third of 1% of annual U.S. corn production was exported to China.[25]

---

[24] *See* USDA Foreign Agr. Serv., GAIN Report No. CH12046 (July 13, 2012) http://gain.fas.usda.gov/-Recent%20GAIN%20Publications/Agricultural%20Biotechnology%20Annual_Beijing_China%20%20Peoples%20Republic%20of_7-13-2012.pdf.

[25] Plaintiffs' repeated efforts to tout China's significance to the U.S. corn market are belied by the USDA's own statistics in the public record. For example, in 2010, there were 12,425,330,000 bushels of corn produced in the U.S. and 1,025,396 metric tons of that corn exported from the U.S. to China. *See* USDA Economic Research Service Feed Grains Database, http://www.ers.usda.gov/data-products/feed-grains-database/feed-grains-custom-query.aspx (attached as Exhibit F). Converting the latter data point to bushels (39.368 bushels per metric ton, *see* Ex. F, or approximately 40,367,790 bushels) and then dividing it by the total number of bushels produced in the U.S. shows that only 0.32% of the U.S. corn produced in 2010 was exported to China. *Cf. Kaiser v. Kaiser*, 186 N.W.2d 678, 684 n.4 (Minn. 1971) ("We do not doubt that judicial notice may be taken of both the fact of increase and the extent of increase in the cost of living by resort to consumer price indices published by the United States Bureau of Labor Statistics."); *see also, e.g.*, *Victoria Cruises, Inc. v. Chiangjiang Cruise Overseas Travel Co.*, 630 F. Supp. 2d

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

3. Competing "Stewardship" Guidelines From Other Trade Associations

Other industry associations have developed similar non-binding stewardship guidelines like the BIO Policy. The Excellence Through Stewardship ("ETS") "Guide for Product Launch Stewardship," *see* Non-Class Compl. ¶ 44; Class Compl. ¶ 33, leads with a disclaimer that the Guide is "solely an educational tool" and "does not define or create legal rights or obligations."[26] The ETS Guide simply provides "guidance" for companies to consider as they develop their own internal stewardship policies.[27] Likewise, CropLife International has established "Product Launch Stewardship" guidelines that, like the BIO Policy, recommend that CropLife International members should meet regulatory requirements in "key countries" with "functioning regulatory systems."[28] Neither the ETS nor the CropLife guidelines mention China.

D. Most Grain Elevators And Exporters Treat Viptera As Fungible Corn, Commingle It, And Ship It To China

With U.S. and other approvals in hand, Syngenta sold Viptera seeds to independent dealers and directly to growers in the United States for the 2011 growing season. Non-Class Compl. ¶ 80; Class Compl. ¶ 69. Plaintiffs allege that the farmers planting Viptera did so in a way that permitted cross-pollination with neighboring fields.

At the time, it was well known that China had not approved Viptera for import. As Plaintiffs point out, industry organizations, such as NGFA and NAEGA, were well aware of that fact at all relevant times. *See* Non-Class Compl. ¶¶ 85, 104-05; Class Compl. ¶¶ 93-94.

Based on the information available in the market, a few grain elevators and exporters,

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

including Bunge, decided to protect what they viewed as their economic interests by refusing to accept Viptera corn. Bunge, in mid-2011, announced that it would not "accept Viptera corn because [it] exported corn to China." Non-Class Compl. ¶ 147; *see* Class Compl. ¶ 136.[29]

Unlike Bunge and Consolidated Grain and Barge, Non-Class Compl. ¶ 148; Class Compl. ¶ 137, many other grain elevators and exporters decided to accept and handle Viptera corn without distinction from non-Viptera corn. These grain elevators and exporters did not refuse Viptera corn (like Bunge and others) or ask for any contractual assurance from growers about the seed they had used. Nor did they decide to test for Viptera or to try to segregate Viptera to make sure that their corn complied with Chinese standards. And that made sense because as noted above, the Chinese market accounted for only about one-third of 1% of U.S. corn production when Viptera was launched in the U.S. *See supra* note 25.

During this time, Syngenta kept market analysts and its investors updated on the status of Chinese approval. For example, in April 2012, Syngenta hosted an earnings call for investors.[30] Plaintiffs seize on a statement from then-Syngenta AG CEO Michael Mack that, as to "outstanding approval for China" "we *expect* to have [it] quite frankly within the matter of a couple of days," and try to portray it as misleading.[31] But Mr. Mack cautioned listeners that "the regulatory authorities are not something that we can handicap definitively," and the entire call was preceded by the "usual cautionary statement" that the "presentation contains forward-

[29] As Plaintiffs note, Syngenta Seeds sued Bunge and sought a preliminary injunction requiring Bunge to accept Viptera corn. *See* Non-Class Compl. ¶¶ 149-50; Class Compl. ¶¶ 138-39. The court refused that request and thus established the principle that Bunge—and all other grain elevator operators—remained free to protect their economic interests in exporting to China by refusing to accept Viptera corn. Bunge is not a plaintiff in this case.

[30] *See* Tr. of Q1 2012 Syngenta Earnings Call, http://www.syngenta.com/global/corporate/SiteCollectionDocuments/pdf/transcripts/q1-2012-transcript-syngenta.pdf (attached as Ex. E) (quoted in Non-Class Compl. ¶ 184 and Class Compl. ¶ 173).

[31] *Id.* (emphasis added).

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

looking statements, which can be identified by terminology such as" the word "*expect*."[32]

If anything, Mr. Mack's statement about the uncertainty of predicting the Chinese regulatory process was prescient. While Plaintiffs allege that China had a functioning regulatory system when Syngenta applied for import approval in 2010, *see* Non-Class Compl. ¶ 60; Class Compl. ¶ 49, as it turned out, it was anything but functional. Under Chinese law, the application for Viptera should have been addressed within 270 days.[33] By April 2012, it had been pending for more than 700 days. In December 2012, the U.S. Trade Representative acknowledged China's "apparent slow-down in issuing approvals" for biotechnology products.[34] Indeed, due in part to public backlash in China over GM products and outstanding trade disputes between the U.S. and China, the Ministry of Agriculture did not approve a single application for importing new GM crops from June 2013 until December 11, 2014 (when Viptera was approved).[35]

E. The Price Of Corn Drops And China Then Bans U.S. Corn

The complaints do not allege any rejections by China from the time Syngenta commercialized Viptera until late 2013. And as the 2013/2014 corn season approached, USDA analysts projected a "record" U.S. corn crop and significantly "[l]ower prices" as a result of "higher production, moderately higher use, and record global supplies"[36]—issues having nothing

to do with Viptera. Corn futures reflected the same expectations.[37] That year's bumper crop was a record U.S. corn harvest (after several years of decreasing production) and the world's largest corn harvest in more than 50 years.[38] As predicted, U.S. corn prices dropped significantly in 2013, decreasing from $7.04 per bushel in February to $4.63 per bushel in October.[39]

It was not until late-November 2013, after that 34% price drop, that "China began rejecting shipments of U.S. corn that tested positive for the presence of MIR162." Non-Class Compl. ¶ 201; *see* Class Compl. ¶ 190. By rejecting this and other shipments, Beijing gave Chinese buyers a way out of millions of dollars of corn contracts that had been locked in at higher prices before the bumper crop. *See* Non-Class Compl. ¶ 205; Class Compl. ¶ 194.

Following China's actions, grain elevators and other exporters—the same ones that made no effort to turn away Viptera corn and no effort to protect themselves contractually in their agreements with Chinese buyers—sued Syngenta, later followed by farmers of non-Viptera corn.

China eventually approved Viptera for import in December 2014.[40]

CHOICE OF LAW

For purposes of the issues raised in this Motion to Dismiss, there are no conflicts in the tort laws applied by the relevant States, except where expressly noted. As a result, this Motion cites exemplar cases applying principles that apply across the relevant jurisdictions. *See, e.g.*, *Jepson v. Gen. Cas. of Wis.*, 513 N.W.2d 467, 469 (Minn. 1994) ("In analyzing the choice of law issue, the first consideration is whether the choice of one state's law over another's creates an

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

actual conflict."). Out of an abundance of caution, however, Syngenta outlines the analysis that would apply in the event of a conflict. As the MDL Court recognized, each plaintiff's claim would be governed by the laws of that plaintiff's home state. *See* MDL Order 7.

Minnesota looks to five factors to determine which State's law applies: "(1) predictability of result; (2) maintenance of interstate order; (3) simplification of judicial task; (4) advancement of the forum's governmental interests; and (5) application of the better rule of law." *Schumacher v. Schumacher*, 676 N.W.2d 685, 690 (Minn. Ct. App. 2004). First, Syngenta sold Viptera "in nearly every state," Non-Class Compl. ¶ 98, and would expect that its "business-related . . . activity" would be governed by the State where the activity occurred. *Schumacher*, 676 N.W.2d at 690. The second factor, which requires the Court to weigh each state's governmental interest, *Nodak Mut. Ins. Co. v. Am. Family Mut. Ins. Co.*, 604 N.W.2d 91, 95 (Minn. 2000), favors applying the law of the state where each plaintiff operated its business and allegedly suffered financial harm. The third factor "is not . . . significant" here because no single state's law is more difficult to apply than another's. *Jepson*, 513 N.W.2d at 472. Fourth, "Minnesota's interest in allowing recovery for persons injured within its boundaries" does not extend to the non-resident Plaintiffs. *Montpetit v. Allina Health Sys., Inc.*, No. C2-00-571, 2000 WL 1486581, at *3 (Minn. Ct. App. Oct. 10, 2000). Because the other factors favor each Plaintiff's home state, the Court need not consider the fifth factor. *See Schumacher*, 676 N.W.2d at 691-92.

The Non-Class Complaint's attempt to squeeze *all* Plaintiffs within the claims brought under Minnesota law, *see* Non-Class Compl. ¶¶ 300-60, violates the federal constitutional requirement that a "State must have a significant contact or significant aggregation of contacts" for that State's substantive law to apply. *Allstate Ins. Co. v. Hague*, 449 U.S. 302, 312-13 (1981); *see Jepson*, 513 N.W.2d at 469-70. Non-Minnesota Plaintiffs base their claims on decisions and/or statements made outside Minnesota in conjunction with the "widespread"

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

commercialization of Viptera that allegedly caused them economic harm outside Minnesota by lowering the price of the corn they grew and sold outside Minnesota. *See infra* X.A.1. The *only* contact Minnesota has with those claims is that *one* of the *six* defendants, Syngenta Seeds, Inc., has its principal place of business in Minnesota. *See* Non-Class Comp. ¶¶ 9-13. But the Non-Class Complaint makes clear that Syngenta AG, a *Swiss* entity, directed decisions about commercializing Viptera and that Syngenta Seeds, Inc. does "not function independently but under the Syngenta AG umbrella." *Id.* ¶ 18. As the MDL Court recognized in addressing parallel allegations, "the mere fact that one defendant resides in Minnesota does not provide significant contacts with the state with respect to claims by non-residents who had no contact with Minnesota." MDL Order 101. Thus, the Due Process and Full Faith and Credit Clauses preclude applying Minnesota law to non-residents' claims.

ARGUMENT

I. All Claims Asserted Under The Laws Of Any States Where No Plaintiff Resides Must Be Dismissed As A Matter Of Law.

The Non-Class Complaint purports to bring claims under the laws of all 22 States now at issue. As of this filing, however, no notices to conform have been filed, and the complaint itself names only plaintiffs from Minnesota. Non-Class Compl. ¶¶ 5-8. For claims under the law of any State other than Minnesota to survive, there must be a plaintiff from that State to assert those claims. Non-residents of a State lack standing to bring claims under the laws of that State. *See generally Snyder's Drug Store, Inc. v. Minn. State Bd. of Pharm.*, 221 N.W.2d 162, 165 (Minn. 1974) (adopting "'injury in fact' concept of standing"); *see, e.g.*, *In re HSBC Bank, USA, N.A., Debit Card Overdraft Fee Litig.*, 1 F. Supp. 3d 34, 49 (E.D.N.Y. 2014) ("Plaintiffs may only assert a state claim if a named plaintiff resides in, does business in, or has some other connection

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

to that state").[41] In the event that timely Notices to Conform are not filed by plaintiffs from all 22 States, claims under the laws of any State lacking a plaintiff must be dismissed.

II. Plaintiffs' Claims Are Barred By The Economic Loss Doctrine.

Plaintiffs' unintentional tort claims[42] are foreclosed by the economic loss doctrine ("ELD"), which generally "bars recovery in negligence when the plaintiff has suffered only economic loss." *Annett Holdings, Inc. v. Kum & Go, L.C.*, 801 N.W.2d 499, 503 (Iowa 2011); *see also In re Chi. Flood Litig.*, 680 N.E.2d 265, 274 (Ill. 1997) ("[S]olely economic losses are generally not recoverable in tort actions."). As the Restatement (Third) of Torts states the general rule, "[a]n actor has no general duty to avoid the unintentional infliction of economic loss on another." Restatement (Third) of Torts: Liab. for Econ. Harm § 1(a) (Tent. Draft No. 1 2012). That broad rule reflects the fact that the primary function of tort law is to establish duties to protect society from physical "harm to person or property" and that "the general duty of care to refrain from acts unreasonably threatening *physical harm* is not paralleled by any comparable duty when the harm threatened is merely *economic*." *Daanen & Janssen, Inc. v. Cedarapids, Inc.*, 573 N.W.2d 842, 846, 847 (Wis. 1998) (emphases added).

Two strands of the doctrine are relevant here. The "stranger" ELD applies between contractual strangers—like the Producers and Syngenta here.[43] The "contractual" strand of the doctrine generally applies to parties connected by a chain of contracts, particularly those in the chain of distribution for a product that is alleged to cause economic harm. As explained below, the Non-Producers' claims are covered by either the stranger rule or the contractual rule,

---

[41] *See also Parks v. Dick's Sporting Goods, Inc.*, No. 05-CV-6590 (CJS), 2006 WL 170447, at *2 (W.D.N.Y. June 15, 2006) ("The Court finds that the [plaintiff] lacks standing to assert state-law claims arising under the laws of states other than New York, since he was never employed by defendant anywhere other than New York.").

[42] The ELD bars the Class and Non-Class Complaints' negligence claims, the Non-Class Complaint's nuisance claims, and the Class and Non-Class Complaints' strict-liability claims for products liability and failure to warn.

[43] To the extent Plaintiff Producers include farmers who *purchased* Viptera seed, which is unclear from the complaint, their claims are barred by the contractual ELD. *See infra* Part II.B.

27-CV-15-3585

depending on how the claims are cast. To the extent Non-Producers complain that they were injured by the general presence of Viptera in the corn supply (not in the particular corn they handled), they are in the same position as Producers and their claims are barred by the stranger ELD. To the extent Non-Producers complain that the corn *they purchased* contained corn grown from Viptera, and that that caused their injury, they are in the classic position of purchasers of a product that has disappointed their commercial expectations and their unintentional tort claims are barred by the contractual ELD.

A. The Producers' Claims Are Barred By The Stranger ELD.

1. The Stranger ELD Is The Majority Rule.

The stranger rule is the historical core of the ELD. As the Iowa Supreme Court has explained, "[f]or well over a century it has been a settled feature of American and English tort law that in a variety of situations there is no recovery in negligence for pure economic loss," *Annett Holdings*, 801 N.W.2d at 503 (citation omitted)—a doctrine known as the stranger (or "relational") ELD. Under American law, the rule can be traced to *Anthony v. Slaid*, 52 Mass. 290 (1846), and the most-cited seminal decision is Justice Holmes' opinion in *Robins Dry Dock & Repair Co. v. Flint*, 275 U.S. 303 (1927). There, the charterer of a ship sued in negligence when a dry dock damaged the ship during repairs and thus delayed the ship's return to service. The plaintiff and the defendant had no contractual relationship because the ship's owner had contracted for the repairs. The Supreme Court held that because the charterer sought solely economic damage (for the loss of the use of the ship) and did not allege any physical injury to its own property, an action in negligence would not lie. *Id.* at 309-10;[44] *see also State of La. ex rel. Guste v. M/V Testbank*, 752 F.2d 1019, 1023 (5th Cir. 1985) (en banc) (noting that

[44] The Court made clear that its rationale was based on general principles under common law, not a special admiralty rule. *See Robins Dry Dock*, 275 U.S. at 309-10 (citing Georgia case for the rule).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

"[t]he principle that there could be no recovery for economic loss absent physical injury to a proprietary interest" was "well established when *Robins Dry Dock* was decided").

The stranger ELD is followed by the "majority of jurisdictions" in the U.S. *Aguilar v. RP MRP Wash. Harbour, LLC*, 98 A.3d 979, 982 (D.C. 2014); *see also Aikens v. Debow*, 541 S.E.2d 576, 583, 587 (W. Va. 2000) (American jurisdictions have followed *Robins Dry Dock* "almost without exception," collecting cases, and describing decisions that reject the stranger rule as a "minority view" that "represents a departure from a substantial collection of American and British cases").[45] Standard tort treatises universally describe it as the majority rule. *See, e.g.*, Dan B. Dobbs *et al.*, *The Law of Torts* § 647 (2d ed. 2011) ("Dobbs"); W. Keeton et al., *Prosser and Keeton on Law of Torts* § 129 (5th ed. 1984). As one treatise puts it, there is only "[a] little authority [that] has expressly rejected the stranger version of the [ELD]," and those cases "have garnered almost no lasting support outside their home states." Dobbs § 655;[46] *see also* Restatement (Third) of Torts: Liab. for Econ. Harm § 7 (Tent. Draft No. 2 2014) (Reporter's Note) (adopting the rule from *Robins Dry Dock* and explaining that "[c]ontrary positions have been taken only occasionally in the case law").

The stranger ELD applies in a variety of situations where the defendant's negligence has disrupted the plaintiff's ability to carry on business or caused economic loss and the plaintiff and defendant have no contractual connection. It applies where the defendant has, for example,

---

[45] *See generally* Peter Benson, *The Problem with Pure Economic Loss*, 60 S.C. L. Rev. 823, 823-24 (2009) (explaining that, "from the start" the stranger ELD "has been a relatively fixed point in thinking about this issue in all its shapes and forms"); William Powers, *Negligence, Breach of Contract, and the "Economic Loss" Rule*, 23 Tex. Tech. L. Rev. 477, 482 (1992) (explaining that "cases between contractual strangers are the paradigm of the traditional 'economic loss' rule"); Ronen Perry, *The Economic Bias in Tort Law*, 2008 U. Ill. L. Rev. 1573, 1578 (2008) ("The law governing this type of loss [between strangers] is also unambiguous. Starting with *Anthony v. Slaid*, and subject to few deviations, American courts have consistently denied recovery for relational economic losses. The leading authority is *Robins Dry Dock & Repair Co. v. Flint* . . . .").

[46] Only three States have rejected the stranger ELD: Alaska, California, and New Jersey. *See* Dobbs § 655 (citing *People Expr. Airlines, Inc. v. Consol. Rail Corp.*, 495 A.2d 107 (N.J. 1985), *Mattingly v. Sheldon Jackson Coll.*, 743 P.2d 356 (Alaska 1987), and *J'Aire Corp v. Gregory*, 598 P.2d 60 (Cal. 1979)).

27-CV-15-3585

injured the plaintiff's employee[47] and where the defendant has damaged a common resource, such as a bridge or wharf, disrupting business for many potential plaintiffs.[48] Absent physical injury to their own property, claimants cannot sue in negligence for economic losses. The rule thus means that "claimants are barred from recovering lost profits or lost wages due to the negligent interruption of commerce caused by a third party." *Aguilar*, 98 A.3d at 982-83.

Multiple policies underpin the doctrine. As then-Judge Breyer has explained, one rationale is that, unlike physical injuries, economic effects from an event could extend almost infinitely and create unlimited liability. *Barber Lines A/S v. M/V Donau Maru*, 764 F.2d 50, 54 (1st Cir. 1985); *see also Annett*, 801 N.W.2d at 504 ("[E]conomic reverberations travel quickly and widely, resulting in potentially limitless liability."). As a result, financial harm that could "prove[] vast, cumulative and inherently unknowable in amount, could create incentives that are perverse," deterring worthwhile activity. *Barber Lines*, 764 F.2d at 55. In addition, the rule also reflects the view that, while tort law should protect against physical harm, economic losses (especially for commercial plaintiffs) are better addressed through the law of contract—including through the ability of a party to insure in advance against such losses or to secure contracts guaranteeing access to vital business inputs (here, for example, Producers could have contracted with grain elevators to address risks potentially posed by "commingling"). *Id.* at 54; *see also*

---

[47] *See, e.g.*, *Gosch v. Juelfs*, 701 N.W.2d 90, 91 (Iowa 2005) (defendant injured plaintiff's employee); *Anderson Plasterers v. Meinecke*, 543 N.W.2d 612, 613 (Iowa 1996) (same); *Annett Holdings*, 801 N.W.2d at 504 (explaining that *Anderson Plasterers* is a "stranger economic loss rule" case); *see also Conn. Mut. Life Ins. Co. v. N.Y. & N.H. R.R. Co.*, 25 Conn. 265 (1856) (denying recovery for economic loss where defendant had injured plaintiff's insured); Dobbs § 647 (collecting similar cases)

[48] *See, e.g.*, *Neb. Innkeepers, Inc. v. Pittsburgh-Des Moines Corp.*, 345 N.W.2d 124 (Iowa 1984) (damage and closure of bridge reduced access to plaintiffs' business); *Barber Lines A/S v. M/V Donau Maru*, 764 F.2d 50, 50-51 (1st Cir. 1985) (Breyer, J.) (negligent oil spill closed wharf to other shipping traffic); *Byrd v. English*, 43 S.E. 419 (Ga. 1903) (negligent severing of power line shut down printing business); *Weller & Co. v. Foot & Mouth Disease Research Inst.*, [1966] 1 Q.B. 569 (negligent release of virus from research institute caused closure of cattle markets, depriving auctioneers of ability to earn living) (attached as Ex. G); *Stevenson v. E. Ohio Gas Co.*, 73 N.E.2d 200 (Ohio Ct. App. 1946) (damage closed factory so workers could not earn wages).

Annett, 801 N.W.2d at 504 (the stranger ELD "encourages parties to enter into contracts"). The Restatement, for example, explains that the stranger ELD is "justified by several considerations," one of which is that "contractual lines of protection against economic loss"—including "first-party insurance"—are "considered preferable to judicial assignments of liability in tort." Restatement (Third) of Torts: Liab. for Econ. Harm § 7 cmt. b. The stranger ELD thus "encourages the party with the best information (that is, the party with knowledge of its own risk of loss) to decide whether to assume, allocate, avoid, or insure against its risk of loss." *Wiltz v. Bayer Cropscience, L.P.*, 645 F.3d 690, 697 (5th Cir. 2011) (emphasis added).

Multiple courts and the Restatement have explained that a central purpose of the stranger ELD is to provide a bright-line rule foreclosing the recovery of purely economic losses absent physical injury to the plaintiff or his property. The point of the doctrine is to eliminate the need for a case-by-case assessment of factors such as foreseeability to draw lines cutting off liability for economic losses or the need for a case-by-case policy assessment to decide when recovery for economic losses should be barred. Instead, the doctrine provides a clear rule: absent physical injury, there can be no recovery for purely economic losses. Thus, for example, in *Barber Lines* then-Judge Breyer explained that the rationales justifying the ELD "are highly general and abstract," 764 F.2d at 53, and that, even though they are "unlikely to apply with equal strength to every sort of 'financial harm' claim," nevertheless, "courts cannot weigh or apply them case by case," *id.* at 55. Case-by-case application of concepts like foreseeability to limit liability, for example, can be problematic because the economic ripple effects of a given event are, in many cases, foreseeable.[49] Using foreseeability to cut off liability would inevitably distort the concept

[49] *Barber Lines*, 764 F.2d at 54 (explaining that an oil spill "foreseeably harms not only ships, docks, piers, beaches, wildlife, and the like, that are covered with oil, but also harms blockaded ships, marina merchants, suppliers of those firms, the employees of marina businesses and suppliers, the suppliers' suppliers, and so forth").

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

of foreseeability itself. *Id.* at 54. *Barber Lines* also made clear that the policies behind the ELD derive force based on *cumulative effects* across cases and that part of the purpose of the doctrine is to avoid distortions that would result if courts used case-specific line drawing "to separate the financially injured allowed to sue from the financially injured not allowed to sue." *Id.*

Similarly, in *M/V TESTBANK*, the Fifth Circuit explained that the ELD applies a bright-line rule barring recovery for economic losses absent physical injury and rejected calls for a "case-by-case approach," 752 F.2d at 1026, to applying the doctrine. It was the *dissent* in *M/V TESTBANK* that suggested that recovery for economic losses should be permitted but limited to cases where liability could be circumscribed to avoid the concern for "open ended" liability. *Id.* at 1046 (Wisdom, J., dissenting). The majority rejected such proposals for a fact-specific approach and held that the ELD should be applied as a "bright line rule." *Id.* at 1029. Echoing the concern from *Barber Lines*, the court explained that a case-specific analysis for determining who could recover economic losses would prove "arbitrary" and "much less the product[] of a determinable rule of law" than adhering to a bright line. *Id.* at 1028-29; *accord Am. Petrol. & Transp., Inc. v. N.Y.C.*, 737 F.3d 185, 196-97 (2d Cir. 2013) (where economic injury was "surely foreseeable" and limited in scope such that permitting recovery would *not* create "unbounded exposure . . . to a vast number of economic loss claims," the court nevertheless applied the rule barring recovery because any benefit from creating "an exception on the particular facts here is outweighed by the benefits of adhering to the general rule that denies recovery"); *Getty Refining & Mktg. Co. v. MT FADI B*, 766 F.2d 829, 832-33 (3d Cir. 1985) (similarly rejecting a case-by-case approach).

The Restatement (Third) similarly explains that the rationales behind the ELD "prevail by their cumulative force," and even though "they do not apply equally to every claim," "most courts *reject such claims categorically*." Restatement (Third) of Torts: Liab. for Econ. Harm § 7

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

cmt. b (emphasis added). In other words, courts reject claims for economic losses without a case-specific policy assessment. The majority rule is that "distinctions allowing some plaintiffs to recover but not others, based on a case-by-case inquiry into the policies at issue, cannot be made in a sufficiently principled manner." *Id.* The Restatement acknowledges that this rule imposes "hardship" on those whose claims "fall outside the policies that make the rule attractive," but concludes that a bright-line rule denying recovery has other benefits—"predictability, clarity, and economy of application for courts"—that "outweigh the benefits of occasionally providing relief." *Id.*

There are defined exceptions to the ELD. It does not bar claims for intentional torts, such as fraud, *see* Dobbs § 606, and most States hold that it does not bar malpractice claims against certain professionals. *See, e.g.*, *Annett*, 801 N.W.2d at 504; *see also Barber Lines*, 764 F.2d at 56 (listing exceptions). In addition, many States hold that the ELD does not apply to the tort of negligent misrepresentation, which allows recovery for economic loss where a professional or other expert service provider (*e.g.*, an accountant) has been negligent in providing information or a service that is intended to be relied upon by a known, limited group of third parties.[50]

2. The Stranger ELD Bars The Producers' Claims.

The Producers' claims are barred by the stranger ELD. The essence of their claim is that the distribution and exporting facilities for commodity corn were affected by the pervasive presence of Viptera, making it impossible to export U.S. corn to China. The only harm they claim is economic loss in the form of lower corn prices (followed by milo and soybean prices).[51]

---

[50] *See generally First Midwest Bank, N.A. v. Stewart Title Guar. Co.*, 843 N.E.2d 327, 338-39 (Ill. 2006) (discussing negligent misrepresentation exception to ELD); *Van Sickle Constr. Co. v. Wachovia Comm. Mort., Inc.*, 783 N.W.2d 684, 690-91 (Iowa 2010) (same).

[51] *See, e.g.*, Non-Class Compl. ¶ 290 ("[A]ll U.S. corn Producers who priced their corn after November 2013 have received a lower price for their corn than they would have received if China's imports of U.S. corn had not effectively stopped.").

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Conceptually, those claims are indistinguishable from claims that access to some other shared resource used by multiple parties for their businesses (a bridge, a wharf, etc.) was disrupted by a negligent act. They seek exactly what is barred by the stranger ELD: "lost profits . . . due to the negligent interruption of commerce caused by a third-party." *Aguilar*, 98 A.3d at 982-83.

Until the Viptera litigation, only one American case addressed parallel claims alleging supposed "contamination" of a crop supply with a U.S.-approved GM trait, and that case held that the ELD barred farmers' tort claims. *See Sample v. Monsanto Co.*, 283 F. Supp. 2d 1088 (E.D. Mo. 2003). *Sample* involved GM corn and soybeans that, like Viptera, had been fully approved in the U.S. The plaintiffs abandoned allegations that their own particular crops had been damaged by cross-pollination or commingling because they recognized that such allegations would raise individual issues dooming a class. *See id.* at 1091. Instead, the plaintiffs proceeded on the theory—parallel to Plaintiffs' theory here—that "non-GM farmers lost revenue because the European community rejected Monsanto's genetically modified products and boycotted *all* American corn and soy as a result." *Id.* (emphasis added). Applying Illinois and Iowa law, the court held that "the economic loss doctrine preclude[d] recovery" because the farmers were not alleging "physical 'contamination' or injury to their property." *Id.* at 1093.

Because Plaintiffs here base their claims on the same theory of market-wide price effects from a foreign boycott (not physical injury to *their particular corn*), *see infra* Part II.A.3, the analysis from *Sample* equally applies here and the Producers' claims are barred by the ELD.

This case also aptly highlights some of the policies underlying the ELD. In particular, it shows how alleged economic effects can expand virtually without limit. If farmers could bring claims for economic losses based on an alleged drop in the price of corn, then anyone allegedly affected by a price drop for the largest commodity crop in the U.S.—such as landowners wanting

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

to sell farm land[52] or farm equipment dealers[53]—could try to assert some "inter-connectivity" between their economic interests and the price of corn and turn Syngenta and other GM manufacturers "into insurers with seemingly unlimited tort liability." *Daanen & Janssen, Inc.*, 573 N.W.2d at 850. Indeed, this case has *already* spawned such claims by layers of plaintiffs other than corn farmers asserting ripple effects from the alleged drop in the price of corn. The plaintiffs include both growers of milo—who claim that the price of milo is pegged to the price of corn, *see* Non-Class Compl. ¶ 297—and growers of soybeans—who claim that corn is a substitute for soybeans and that lower corn prices thus increase the usage of corn and reduce demand for soybeans, *see id.* ¶¶ 298-99. Including soybean farmers as plaintiffs almost *doubles* the size of the potential pool of plaintiffs in this case, expanding it to more than 650,000 farmers.[54] As such claims show, the inherent problem with permitting *any* claims for purely economic loss is that "[t]he chain of events leading to economic losses is only limited by one's imagination," and as a result "permitting recovery for purely economic loss . . . could expand the potential pool of plaintiffs beyond reason." *Long Motor Corp. v. SM&P Util. Res., Inc.*, 214 P.3d 707, 2009 WL 2595932, at *2-3 (Kan. Ct. App. Aug. 21, 2009). It is precisely to avoid embroiling the courts in a morass of litigation bringing such claims (and to avoid the task of drawing lines determining which plaintiffs can recover pure economic losses and which cannot) that the law has applied a bright line rule for more than a hundred years barring *all* purely

economic claims for unintentional torts as a matter of law. *See Barber Lines*, 764 F.2d at 54-56.

3. The Producers Cannot Avoid The ELD By Claiming Physical Injury To Their Own Property.

The Producers cannot sidestep the ELD by arguing that they have alleged physical injury to their own property. Any such argument fails for at least four reasons.

First, the complaint does not allege that each Producer had his particular corn, while it was his property, mixed with or cross-pollinated by Viptera corn. It merely alleges generally that there was a "pervasive contamination of the U.S. corn supply, including fields, grain elevators and other facilities of storage and transport, causing physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land." Non-Class Compl. ¶ 236. Vague assertions about generalized "contamination of the U.S. corn supply"—primarily in areas (such as "grain elevators and other facilities of storage and transport") that are involved only *after* the farmer has sold his corn—are not the same as an allegation that each Producer experienced cross pollination (or commingling) on his farm.[55] Indeed, Plaintiffs' allegations simply parrot word-for-word the allegations made in the Federal MDL.[56] And the MDL Court—which *rejected* the ELD on other grounds, *see infra* pp. 29-37—recognized that such vague allegations did not assert that every Plaintiff suffered physical injury to his property. *See* MDL Order 19-20.

Second, allegations of physical harm are irrelevant in any event because Plaintiffs' theory of injury does not depend on physical harm to *their* corn. Their theory is that the presence of Viptera in the U.S. corn supply and China's actions reduced the price for *all* U.S. corn—even

---

[55] Plaintiffs no doubt refrained from making such an allegation for good reason. They know that cross pollination or commingling did not happen on every Producer's farm, and they know that they cannot prove that it happened (much less prove it on a class-wide basis with common proof).

[56] *See* Producers' Am. Compl. ¶ 319, *In re Syngenta AG MIR162 Corn Litig.*, No. 2:14-md-2591 (D. Kan. May 29, 2015) (alleging "pervasive contamination of the U.S. corn supply, including fields, grain elevators and other facilities of storage and transport, causing physical harm to plaintiffs' corn, harvested corn, equipment, storage facilities, and land.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

corn that might be Viptera-free.[57] As the MDL Court recognized, allegations of physical harm provide an avenue for avoiding the ELD only where the economic loss results from the particular harm to property alleged. Where, as here, the alleged damages "are not derived from the physical harm alleged," physical harm provides no basis for evading the ELD. MDL Order 20.

Third, to the extent the Producers point to commingling of corn in grain elevators and storage facilities *after* they have sold their corn, they provide no allegations whatsoever establishing that they still had a property interest in the corn after it had been sold.

Fourth, even if the Producers had alleged that Viptera cross-pollinated or commingled with *their* corn, that would not qualify as *damage* to their property because Viptera was fully approved in the U.S. Viptera corn could be sold at the same price as all other fungible corn. Plaintiffs' only complaint is that they hypothetically could have secured a higher price if there had been no Viptera. That is the paradigm of pure economic loss, not physical injury.

As the court in *Sample* held in identical circumstances, there was "no evidence to demonstrate that the physical injury requirement would be met *even if* GM seeds were 'commingled' with non-GM seeds in a cooperative grain elevator" precisely because there was no allegation that commingling rendered the crop unfit for human consumption. 283 F. Supp. 2d at 1093 & n.2 (emphasis added). In the *Hoffman* case, a Canadian court considered similar allegations about "contamination" of canola with an approved GM trait and reached the same result. *See Hoffman I*, 2005 SK.C. LEXIS 330 (Ex. A), *aff'd*, *Hoffman II*, 2007 SK.C. LEXIS 194 (Ex. B). There, the plaintiffs claimed that GM canola had cross-pollinated with their non-GM crops, which they hoped to sell at a premium as organic crops and on the European market. The court held that, where a GM seed has been approved for human consumption, "the alleged

[57] *See* Non-Class Compl. ¶ 290 (asserting that "*all* U.S. corn Producers who priced their corn after November 2013 have received a lower price for their corn than they would have . . .") (emphasis added).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

damage is not of physical harm to the plaintiffs' crops, but arises from the alleged inability to meet the requirements of organic certifiers or of foreign markets for organic canola." *Hoffman I*, 2005 SK.C. LEXIS 330 ¶ 72. The "harm" of receiving a different price for a commodity that is still fully saleable for human use was not sufficient to avoid the ELD.

Cases analyzing the ELD in the context of *unapproved* GM traits are irrelevant. As the court in *In re StarLink Corn Prods. Liab. Litig.* explained, crops are "damaged when they are pollinated" by corn with an unapproved trait (like StarLink) because it "render what would otherwise be a valuable food crop unfit for human consumption." 212 F. Supp. 2d 828, 841 (N.D. Ill. 2002). The court made clear, moreover, that such physical injury was the *sine qua non* for avoiding the ELD as it explained that "*[a]bsent a physical injury*, plaintiffs cannot recover for drops in market prices." *Id.* at 842 (emphasis added). The fact that rendering crops unfit for human consumption may constitute physical "harm" says nothing about the situation here, in which Viptera was fully approved and corn with the MIR162 trait is, by law, fungible U.S. Yellow Corn. In fact, *Sample* distinguished *StarLink* on exactly that basis. *See* 283 F. Supp. 2d at 1093 n.2.[58] Indeed, there is not a *single case* holding that an *approved* GM trait somehow "damages" a crop sufficiently to avoid the ELD. The only cases addressing the issue (*Sample* and *Hoffman*) say the opposite.

4. The MDL Order Misstates The Law On The Stranger ELD.

The MDL Court's ELD ruling does not reflect the majority rule.

a. The MDL Court Mistakenly Applied A Case-By-Case Policy Analysis To Permit Recovery Of Economic Losses.

First, the MDL Court disregarded settled law holding that the ELD is meant to provide a

[58] *Bayer Cropscience LP v. Schafer*, 385 S.W.3d 822, 833 (Ark. 2011), and *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d at 1013, are distinguishable on the same basis because the GM Rice cases involved an unapproved trait.

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

bright-line rule and does *not* depend on a case-by-case policy assessment. Instead, the court adopted a "case-specific approach," MDL Order 25, to assess whether "the rationales supporting the [doctrine] would necessarily be furthered by application" in a given case, *id.* at 24; *see also id.* at 24 n.10 (asserting that States would apply the ELD "only . . . when the doctrine's purposes would be served"). Thus, the MDL Order held that, because the plaintiffs constituted "discrete classes" all in an "inter-connected market" whose economic losses were "actually fores[een]," allowing their claims would not give rise to the primary concern animating the doctrine—"completely open-ended" liability. MDL Order 24. That approach is counter to the majority rule. As explained above, the majority rule is that "distinctions allowing some plaintiffs to recover but not others, based on a case-by-case inquiry into the policies at issue, cannot be made in a sufficiently principled manner." Restatement (Third) of Torts: Liab. for Econ. Harm § 7 cmt. b; *see also supra* pp. 21-23.

Indeed, the MDL Court's approach is functionally indistinguishable from the *minority* approach that rejects applying the ELD as a bright-line rule. Three minority jurisdictions reject the bright-line "physical harm rule" and instead apply a "more thorough consideration and searching analysis of *underlying policies* to determine whether a particular defendant may be liable for a plaintiff's economic losses." *People Express Airlines, Inc. v. Consol. Rail Corp.*, 495 A.2d 107, 111 (N.J. 1985) (emphasis added). Such jurisdictions rely on a case-by-case analysis to permit recovery in tort for economic losses where there is "[a]n identifiable class of plaintiffs" that is "particularly foreseeable." *Id.* at 116. But that is functionally the *same* analysis that the MDL Court applied. The federal court pointed to "inter-connected relationships and markets," MDL Order 23, to identify "discrete classes" of plaintiffs whose economic losses were "actually fores[een]," *id.* at 24, who may be allowed to recover. That focus on "inter-connected relationships" defining a "discrete" plaintiff group and "actually foreseen" harm is simply

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

another way of expressing the same criteria used by courts applying the *minority* approach—namely, a focus on facts showing "[a]n identifiable class of plaintiffs" that is "particularly foreseeable in terms of the type of persons or entities comprising the class . . . as well as the type of economic expectations disrupted." *People Express*, 495 A.2d at 116. Thus, while it purported to be analyzing the ELD as it would be applied in twenty-two States, the MDL Court actually applied a *minority* analysis that has been overwhelmingly rejected.

Tellingly, moreover, the MDL Order does not cite a *single case* using a similar "case-specific approach" to apply the ELD. *StarLink* does not support that approach. *StarLink* held that the ELD did not apply because the plaintiffs had alleged *physical injury* from an *unapproved* GM trait that rendered their crops unfit for human consumption. 212 F. Supp. 2d at 841-43. *StarLink* does not suggest that a case-by-case policy analysis can provide an *independent* basis for avoiding the ELD where (as here) there was no physical injury. The *StarLink* court noted the "finite number of potential plaintiffs," *id.* at 842, only as additional support for a holding based on physical injury. The court made clear that physical injury was necessary for avoiding the ELD as it explained that "[a]bsent a physical injury, plaintiffs cannot recover for drops in market prices." *Id.* at 842. Indeed, the court reiterated a warning to plaintiffs that "proving *direct harm to their own property* is a *predicate* to any recovery." *Id.* at 843 (emphases added).

To the extent the MDL Order acknowledges settled law rejecting a case-by-case policy analysis, it dismisses the majority rule in a footnote with the observation that there are many exceptions to the ELD and that each existing exception must have been adopted in a first case. *See* MDL Order 23 n.10. The problem with that assertion is that the MDL Court's new exception is *different in kind* from existing ones. Existing exceptions apply to "broad categories of cases," *Barber Lines*, 764 F.2d at 56, typically defined by a type of legal claim (*e.g.*, intentional torts, negligent misrepresentation, malpractice claims against professionals). Here,

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

by contrast, the criterion defining the new exception—"inter-connected relationships and markets," MDL Order 23—rests on a *factual* circumstance in which the interrelatedness of the industry supposedly (i) limits the number of potential plaintiffs to a "discrete" group (still numbering in the hundreds of thousands) and (ii) makes alleged economic losses particularly "foreseeable and foreseen." *Id.* at 24-25. The whole point of the majority rule set out in *Barber Lines*, *M/V TESTBANK*, and the Restatement (Third), however, is to foreclose exactly such case-specific assessments of whether the policies behind the doctrine apply in a particular case.

The MDL Court's focus on "inter-connectedness" also exposes exactly the problems with line-drawing that the majority bright-line rule seeks to avoid. Simply put, this new "inter-connected industry" exception supplies no clear principle marking an identifiable category of cases. The grain industry does not have greater "inter-connected relationships" than many others. In the maritime industry, for example, vessels operating in a confined waterway depend on one another for continued operations. It is readily foreseeable that one vessel's negligence will inevitably cause economic losses to others, and the scope of potential plaintiffs is, as here, limited to "discrete classes." MDL Order 24; *cf. M/V TESTBANK*, 752 F.2d at 1049 (Wisdom, J., dissenting) (noting the "great interdependence of the elements in the maritime industry"). The maritime industry thus seems to satisfy the test for the new exception. *But see, e.g., Am. Petrol. & Transp.*, 737 F.3d at 196 (applying the ELD); *Barber Lines*, 764 F.2d at 55 (same). As that example suggests, the MDL Court's new test provides no clear limiting principle. Applying it would embroil courts in endless fact-based inquiries into whether industry A is more "inter-connected" than industry B, or whether party X is sufficiently "interrelated" with party Y, with no real legal rule to guide them. That exercise would present precisely the problem the Fifth Circuit predicted of producing "arbitrary" results that are not "the product of a determinable rule

of law." *M/V TESTBANK*, 752 F.2d at 1029, 1030.[59]

In fact, the added claims of *soybean* farmers in this case highlight that problem. Beyond the deficiencies that doom the claims of corn farmers, adding more than 270,000 soybean farmers to the plaintiff pool (which would then include growers of the *first* and *second* largest crops in the U.S.)[60] destroys any concept of a "discrete" plaintiff class supporting an exception to the ELD as conceived by the MDL Court. At the same time, if this Court were to apply the MDL Court's novel analysis, the line distinguishing the "inter-connectedness" of corn and milo from the "inter-connectedness" of corn and soybeans (or corn and whatever other related market the next complaint raises) is not going to be based on a clear *legal* rule. Instead, it will be driven by exactly the exercise in *ad hoc*, fact-based line drawing necessary to limit liability that the Fifth Circuit and other courts have warned against and that has prompted them to adhere to a bright-line rule rejecting *all* recovery for economic losses.

b. The MDL Court Applied A Mistaken View Of The Policy Rationales Supporting The ELD.

Second, the MDL Order rested on an overly restrictive understanding of the policies behind the ELD. The MDL Order focused on preventing a risk of indeterminate or disproportionate liability and reasoned that this risk was primarily at issue in "access cases" or "public nuisance" cases in which "any member of the public could potentially assert a claim for economic loss," producing liability that is "completely open-ended." MDL Order 24. The court distinguished the Viptera lawsuits on the basis that they are not "access" cases and reasoned that, because they involve a supposedly more "discrete" tranche of plaintiffs—albeit one numbering

[59] *See also Pickett v. Consignment Enter. Co.*, No. C-77372, 1978 WL 216505, at *2 (Ohio Ct. App. Aug. 9, 1978) (applying ELD as bright-line rule, because "[i]f we wished to place limits on the recovery of economic interests, we would have to draw a line between remote and immediate third party losses, and between foreseeable and unforseeable [sic] risks to third parties, a task we decline to undertake, in the broad interest of justice").

[60] *See supra* note 54.

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

in the hundreds of thousands—the policies behind the ELD were not implicated. *See id.* Every step in that analysis is contrary to precedent.

As an initial matter, nothing in the ELD limits its application to cases involving an indeterminate number of first-tier plaintiffs. *Robins Dry Dock* did not involve exposure to such a huge plaintiff group, or even to a "discrete" group of hundreds of thousands as in the Viptera cases. The first tranche of plaintiffs in *Robins Dry Dock* was limited to *one* charterer for losses related to *one* ship. *See* 275 U.S. at 308-09. Nevertheless, the ELD applied. As noted above, the doctrine similarly applies in various situations—such as where a defendant injures the plaintiff's employee—where there is only one initial plaintiff. *See supra* p. 20 & note 47.

Such cases show that the policies underpinning the doctrine are *not* limited to situations involving an indeterminate number of first-tier plaintiffs. Instead, the doctrine is based on the inherent unpredictability of permitting *any* recovery of pure economic losses because such losses spread outwards indefinitely to second- and third-tier plaintiffs. For example, a charterer as in *Robins Dry Dock* suffers economic losses because a damaged ship is unable to sail; as a result, a shipper also suffers losses because his cargo is delayed; as a result, a shopkeeper who expected a shipment of merchandise suffers losses, and so on. *See, e.g.*, *Barber Lines*, 764 F.2d at 54 (describing such ripple effects as rationale for the doctrine); *M/V TESTBANK*, 752 F.2d at 1028 (describing "wave upon wave of successive economic consequences"); Restatement (Third) of Torts: Liab. for Econ. Harm § 7 cmt. b (describing ripple effect as the primary rationale for the ELD). By focusing solely on the size of the initial tranche of plaintiffs, and holding that the ELD should not apply where the court can identify a supposedly "discrete class" of first-tier plaintiffs, the MDL Court failed to consider the spreading ripple effect of economic losses.[61]

[61] To the extent the MDL Order suggests that the "inter-connectedness" of the corn industry provides a natural

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

The MDL Court was also mistaken in describing access cases as cases in which "any member of the public could potentially assert a claim." MDL Order 24. *Barber Lines* was an access case involving blocked access to a pier. But the number of ships scheduled to dock at the pier (and thus the group of potential first-tier plaintiffs) was necessarily smaller than the more than 350,000 corn farmers who are potentially plaintiffs here—not to mention milo and soybean farmers. Similarly, "access" cases involving the closure of a factory or other workplace routinely involve much smaller groups of workers, but the ELD still applies. *See, e.g.*, *Aguilar*, 98 A.3d at 980 n.1; *United Textile Workers of Am. v. Lear Siegler Seating Corp.*, 825 S.W.2d 83, 84 (Tenn. Ct. App. 1990); *Stevenson v. E. Ohio Gas Co.*, 73 N.E.2d 200 (Ohio Ct. App. 1946).[62]

As a result, the MDL Court's suggestion that there is a "discrete class" of plaintiffs here that is *more limited* and *more narrowly defined* than in the typical access case is demonstrably incorrect. In reality, the MDL Court reached the anomalous conclusion that there was no concern for expansive and indeterminate liability where the court was contemplating a first-tier plaintiff group *vastly larger* than in the typical access case where the ELD is applied. That approach cannot be reconciled with precedent. Indeed, if the MDL Court's analysis were consistently applied—if facts showing a "discrete class" of foreseeable plaintiffs numbering in the hundreds of thousands were sufficient to avoid the ELD—it would gut the doctrine and

---

breaking point after the first tier plaintiffs to cut off liability for more remote economic effects, *cf.* MDL Order 14, that rationale still cannot reconcile the court's approach with the ELD. Courts could always solve the problem of spreading economic effects by pointing to a factual distinction that might justify cutting off liability at the first tier of plaintiffs. The point of the ELD, however, is to avoid the need for such fact-based line-drawing distinguishing between those who are permitted to recover economic losses and those who are not and to replace it with a bright-line rule based on physical injury. *See supra* Part II.A.4.a.

[62] The MDL Court's approach is not supported by *StarLink*. The *StarLink* court did suggest that "access" cases involve situations where "the tort's effects on plaintiffs are not qualitatively different from the effects on society at large" and thus such cases involve an "unbounded group of potential plaintiffs." *StarLink*, 212 F. Supp. 2d at 840. As the cases cited in text show, however, *StarLink*'s generalization is inaccurate. It was based on a mistaken focus on cases involving *bridges*. *See id.* In addition, as explained above, *StarLink* did not suggest that a more limited plaintiff group could, *in itself*, justify refusing to apply the ELD. Physical injury was the critical factor permitting recovery of economic losses in *StarLink*. *See id.* at 842; *see also supra* pp. 28-29.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

require reversing almost every seminal decision applying it. *Robins Dry Dock*, for example, involved a "discrete class[]" of plaintiffs (there was only one); the economic injuries were readily foreseeable (damaging the ship would foreseeably cause losses to those scheduled to use it); and thus the facts could have alleviated concern for "open-ended liability." MDL Order 24. Under the MDL Court's mistaken analysis, the ELD should not have applied.

The MDL Order also fails to consider additional policies behind the ELD, including encouraging the use of contracts to address economic risks. *See, e.g.*, *Barber Lines*, 764 F.2d at 55; *Wiltz*, 645 F.3d at 696. The Restatement, for example, explains that the stranger ELD is "justified by several considerations," one of which is that "contractual lines of protection against economic loss"—including "first-party insurance"—are "considered preferable to judicial assignments of liability in tort." Restatement (Third) of Torts: Liab. for Econ. Harm § 7 cmt. b. That rationale fully applies here. Producers concerned about ensuring exportability for their corn could have contracted for guarantees from grain elevators prohibiting commingling.

c. The MDL Order Does Not Acknowledge, Much Less Address, Directly Contrary Authority From Sample v. Monsanto.

Third, the MDL Court ignored the only American case on all fours with this case. *Sample v. Monsanto* involved exactly parallel claims that an approved GM trait had caused economic losses by triggering the loss of an overseas market, and the court held that such claims were barred by the ELD. *See supra* Part II.A.4.c. The MDL Order does not discuss or distinguish that precedent.[63] Syngenta respectfully submits that a decision contradicting the only American authority squarely on point—without even acknowledging that authority, much less providing a considered rationale to distinguish it—cannot be credited as persuasive precedent.

[63] The assertion that Syngenta had not cited any case in which a court considered and applied the ELD "despite the presence of inter-connected relationships and markets," MDL Order 23, is incorrect. *Sample* was such a case.

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

d. The MDL Order Mistakenly Relies On West Virginia's "Hybrid" "Special Relationship" Exception From The ELD.

Fourth, the MDL Order erred by relying on *Aikens v. Debow*, 541 S.E.2d 576 (W. Va. 2000), to hold that members of an "inter-connected" industry are in a "special relationship" that defeats the ELD. *See* MDL Order 23. The "special relationships" identified in *Aikens* all involved people with special expertise who provided information as part of their business and on which they intended others to rely. *See* 541 S.E.2d at 591 (discussing auditors, surveyors, termite inspectors, engineers, architects, and lawyers). In most States, parallel exceptions to the ELD are treated under the rubric of negligent misrepresentation and require meeting the elements for that tort, including that the defendant must provide the information as part of his business intending that a known group of persons will rely on it. *See supra* p. 23 & note 50; *see also* Restatement (Third) of Torts: Liab. for Econ. Harm §§ 5-6. To the extent *Aikens* adopted a broader principle, permitting a free-ranging use of "special relationships" as exceptions to the ELD, it is not the majority approach. To the contrary, *Aikens* itself described its "special relationship" test as a "hybrid." *Id.* at 590; *see also id.* at 590 (noting that "minority view" cases "reveal[] reasoning similar to ours"); *id.* at 592 (Starcher, J., concurring) (suggesting that *Aikens* took a "bold step forward" departing from majority rule). As a result, the "special relationship" exception in *Aikens* cannot properly be used to predict the law in twenty-two other States.

5. All States Would Bar The Producers' Claims Under The Stranger ELD.

Although the stranger ELD rule is the clear majority rule, some States have never had occasion to address it expressly. For example, the District of Columbia never considered it until just last year. When workers at retail establishments claimed that a defendant's negligence allowed the Potomac River to flood their workplaces (prompting closures that prevented them from earning wages), the D.C. Court of Appeals explained that the stranger ELD raised a

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

question of "first impression" under D.C. law. *Aguilar*, 98 A.3d at 980. The court surveyed other state authorities, explained that the stranger rule was applied by a "majority of jurisdictions," and applied the rule to bar recovery. *Id.* at 982-85.

The question in this case is whether the twenty-two States at issue would apply the majority bright-line rule of the stranger ELD, or whether there is a basis in existing state law to predict that a State would *reject* the majority approach and permit recovery of pure economic loss. For the reasons below, there is no sound basis for predicting that *any* State at issue here would allow Plaintiffs' claims to proceed. Some States have applied the stranger rule in the past and there is no reason for concluding that they would not apply it here. Other States have not yet expressly addressed the stranger rule, but existing cases also provide no basis for holding that the State would *not* apply the majority rule when the issue arises. In particular, the mere fact that existing cases may address the ELD solely in the context of sales of goods provides no basis for concluding that a State would fail to follow the majority approach under the stranger ELD.

The MDL Order does not provide a persuasive rationale for a different result. Indeed, by predicting that *all* States would apply the ELD "only . . . when the doctrine's purposes would be served," MDL Order 24 n. 10, the MDL Court effectively predicted that *all* twenty-two States would *reject* the majority rule, which does not permit "case-by-case inquiry into the policies at issue." Restatement (Third) of Torts: Liab. for Econ. Harm § 7 cmt. b. There was no basis for such a prediction. In addition, the MDL Court assumed that if a State permitted *any* exceptions to the ELD, it would adopt the exception created by the MDL Court. As explained above, however, the MDL Court's new "inter-connected industry" exception is different in kind from existing exceptions, *see supra* pp. 31-32, and the mere fact that a State may recognize an exception for a *legal* category of claims—such as negligent misrepresentation—does not suggest that the State would follow the MDL Court's minority-approach case-by-case policy analysis.

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

This Court should reject the MDL Court's erroneous analysis.

a. Nine States Have Expressly Adopted The Stranger ELD.

Minnesota. The Minnesota Supreme Court long ago applied the stranger ELD to hold that an employer cannot recover increased workers' compensation premiums that resulted after the defendant negligently killed an employee. *See N. States Contracting Co. v. Oakes*, 253 N.W. 371, 372 (Minn. 1934). The decision placed itself squarely in the line of stranger ELD decisions[64] and has been cited as an example of the rule.[65] More recently, a Minnesota court applied the stranger ELD to prevent an employer from recovering "lost profits" incurred as a result of the defendant's negligence injuring an employee. *Cariveau v. Golden Valley Motors, Inc.*, No. 27CV06-11202, 2006 WL 6252343 ¶ 27 (Minn. Dist. Ct. Nov. 28, 2006). The court expressly relied on two Iowa cases applying the stranger rule. *See id.* (citing *Anderson Plasterers*, 543 N.W.2d at 613-14; *Gosch*, 701 N.W.2d at 91).

For the sale of goods, Minnesota has codified the ELD by statute. *See* Minn. Stat. § 604.101. The statute applies only to claims by "a buyer against a seller" relating to "a defect in the goods sold or leased," *id.* subd. 2, and in that context the statute states that the ELD "applies to claims only as stated in this section," *id.* subd. 5. That statute is irrelevant to the Producers' claims, because they do not arise in the context of a sale of goods. Contrary to the MDL Order, there is no basis for reading § 604.101 to displace the common law ELD *outside* the sale-of-goods context addressed by the statute. *See* MDL Order 25-27. In Minnesota, "statutes in derogation of the common law are strictly construed," and courts "do not presume that the Legislature intends to abrogate or modify a common law rule except to the extent expressly

[64] *See N. States Contracting*, 253 N.W. at 372 (citing *Anthony*, 52 Mass. 290, and *Conn. Mut. Life Ins.*, 25 Conn. 265).

[65] *See, e.g.*, *Union Oil Co. v. Oppen*, 501 F.2d 558, 563 n.6 (9th Cir. 1974); David B. Gaebler, *Negligence, Economic Loss, and the U.C.C.*, 61 Ind. L.J. 593, 599 n.24 (1986).

27-CV-15-3585
Filed in Fourth Judicial District Court

Hennepin County, MN

declared or clearly indicated in the statute." *Staab v. Diocese of St. Cloud*, 813 N.W.2d 68, 73 (Minn. 2012). For several reasons, nothing in the statute suggests that it eliminates the common law ELD outside the sale-of-goods context.

First, the statute was a legislative response to a specific decision from the Minnesota Supreme Court *in the context of a sale of goods* in which the court eliminated the distinction for injury to property "other than" the purchased goods. *See* 27 Minn. Practice: Prods. Liab. Law § 13.15 (2015 ed.) (describing *Hapka v. Paquin Farms*, 458 N.W.2d 683 (Minn. 1990)).[66] The original statute was limited to addressing *sales of goods*. *See* Minn. Stat. § 604.10. When difficulties arose in interpreting that statute, the current statute was passed, again limited to *sales of goods*. *See* 27 Minn. Practice: Prods. Liab. Law § 13.15. Given the highly specific purpose for which the legislature acted, there is no basis for concluding that statutory language stating that "[t]he economic loss doctrine applies to claims only as stated in this section," Minn. Stat. § 604.101, subd. 5, was intended to sweep any more broadly than to the types of "claims" actually addressed in the statute—*i.e.*, claims relating to the sale of goods. Nothing in the history of the statute supports reading that language to wipe out the common-law ELD in myriad *other* contexts that were never even considered by the legislature. *Cf.* Minn. Stat. § 645.16 (statute should be construed by "considering" the "occasion and necessity for the law," the "circumstances under which it was enacted," and the "object to be attained").

Second, the official co-reporters of the statute published a definitive account of the statute explaining that its exclusive scope is more limited. They explained that, "*[w]here the statute does apply*, it occupies the field; there is no residual common law economic loss doctrine," and

[66] *See also* Minn. Stat. § 604.101, Reporter's Note (similarly describing response to *Hapka*); Daniel S. Kleinberger, Linda J. Rusch & Alan I. Silver, *Building a New Foundation: Torts, Contracts, and the Economic Loss Doctrine*, Bench & Bar of Minn. (Sept. 2000), http://www2.mnbar.org/benchandbar/2000/sep00/econ-loss.htm (similarly describing legislative response to *Hapka*) (hereinafter "Kleinberger").

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

that the statute "should preempt any common law rules *within its scope*."[67]

Third, courts have treated the exclusive scope of the statute consistent with that description. As noted above, a Minnesota court recently applied the stranger ELD to bar a claim for economic losses brought by an employer against a defendant who had injured an employee. *See Cariveau*, 2006 WL 6252343 ¶ 27. If section 604.101 actually eliminated *all* common law applications of the ELD, that decision would not have been possible. No Minnesota court, moreover, has ever held that the statute precludes application of the ELD *outside* the context of the sale of goods.[68] And the Eighth Circuit has expressly held that the predecessor statute to section 604.101, *see* Minn. Stat. § 604.10(a), did *not* preempt the common law ELD in contexts outside the sale of goods. *See AKA Distrib. Co. v. Whirlpool Corp.*, 137 F.3d 1083, 1086 n.3 (8th Cir. 1998). As the Eighth Circuit explained, the statute "is limited to sales of goods" and there is "no indication that the statute was intended to replace or narrow the scope of the broader common law doctrine." *Id.*; *accord Praktika Design & Projectos Ltda. v. Marvin Lumber & Cedar Co.*, No. 06-cv-957, 2007 WL 1582710, at *3 (D. Minn. May 30, 2007). There is no basis for concluding that the successor statute, section 604.101, was intended to apply more broadly.

Illinois. Illinois applies the stranger ELD. *In re Chicago Flood Litigation* involved classic claims under the stranger rule. When a flood interrupted electrical service, numerous businesses brought claims for "lost revenues, sales, profits and good will," 680 N.E.2d at 268, all of which were held barred where they were not accompanied by physical injury to property, *see*

---

[67] Kleinberger (under "Drafting Policies Underlying the New Statute") (http://www2.mnbar.org/benchandbar/2000/sep00/econ-loss.htm) (emphases added).

[68] *Ptacek v. Earthsoils, Inc.*, 844 N.W.2d 535 (Minn. Ct. App. 2014), does not suggest any broader preemptive scope for the statute. That case involved a sale of goods. *See id.* at 536-37. The court held solely that, where the trial court had held that the plaintiff's negligence claim fell outside the "product defect" claims covered by the statute (a decision that was not appealed), the trial court could not rely on the common law ELD to bar the claim—the statutory rule was exclusive *in that sale-of-goods context*. *Id.* at 539. The decision is irrelevant to the Producers' claims, which do not arise in a sale-of-goods context.

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

id. at 274-75. As explained above, moreover, *Sample v. Monsanto* squarely applied the Illinois ELD to bar claims identical to those in this case.

Contrary to the MDL Order, Illinois cases provide no support for applying a case-by-case policy assessment. In *2314 Lincoln Park W. Condo. Ass'n v. Mann, Gin, Ebel & Frazier, Ltd.*, 555 N.E.2d 346 (Ill. 1990), the *only* exceptions to the ELD the court recognized were for intentional misrepresentation, negligent misrepresentation, intentional interference with contract, and intentional interference with prospective business advantage, *see id.* at 352. That list proves Syngenta's point: those well-established exceptions are all based on defined legal categories of claims, three of which fall outside the ELD because they are *intentional* torts. In noting that the common principle underlying such exceptions was "that the defendant owes a duty in tort to prevent precisely the type of harm, economic or not, that occurred," *id.* at 352, the court was merely acknowledging that there are some types of torts (fraud, negligent misrepresentation) that are designed to protect against economic losses and to which the ELD simply does not apply. Nothing in *2314 Lincoln Park* supports a case-by-case policy assessment.

Similarly, in *Metro. Water Reclamation Dist. of Greater Chi. v. Terra Found. for Am. Art*, 13 N.E.3d 44 (Ill. App. Ct. 2014), the court reasoned that the type of tortious conduct before it—"*intentional* interference with an easement"—was "[s]imilar to the torts of *intentional* interference with a contract or with prospective business advantage" because it was an intentional tort and involved interference with property rights. *Id.* at 59-60 (noting that the case "originates in property law") (emphases added). In pointing out that the "damages suffered by the [plaintiff] were the very damages the [defendant] *sought to inflict upon it*," the court was indicating that, in contrast to *Chicago Flood*, the case at bar involved an *intentional* tort and that provided a basis for avoiding the ELD. *Id.* at 61 (emphasis added). Although the court did note that "the considerations behind the economic loss doctrine articulated in *Moorman* are not

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

present here," *id.* at 61, that single, passing comment from an intermediate appellate court did not flip Illinois from a majority-rule State that applies the ELD as a bright-line rule to a *minority*-view State like New Jersey that applies a case-by-case policy analysis to determine whether economic losses can be recovered in tort.

Lastly, the MDL Order is incorrect in suggesting that Illinois courts would not apply the ELD in Viptera cases because they do not apply it where "the defendant had a duty to act reasonably to avoid the very harm that occurred" and "this Court has now recognized . . . just such a duty to avoid plaintiffs' financial losses." MDL Order 38. That reasoning is circular. The point of the ELD is that it *precludes* a duty to avoid economic harm. The MDL Court cannot point to its *own decision* recognizing a new duty to "avoid . . . financial losses" *in the case before it* as a reason for holding that the ELD does not apply *in the case before it*.

Iowa. Iowa has also adopted the stranger ELD. *See, e.g., Neb. Innkeepers, Inc. v. Pittsburgh-Des Moines Corp.*, 345 N.W.2d 124, 126 (Iowa 1984) (barring recovery of "purely economic or business losses sustained as a result of non-intentional harm to a public bridge, resulting in its closing"). Indeed, the Iowa Supreme Court has stated that it follows "the stranger economic loss rule." *Annett Holdings*, 801 N.W.2d at 503-04; *see also Gosch v. Juelfs*, 701 N.W.2d 90, 91 (Iowa 2005) (business cannot recover against third party that injured an employee for "loss of income to [the] business as a result of the absence of [the] injured employee").

Contrary to the MDL Order, Iowa has not applied the stranger rule solely in access cases. That misstates the law. *See, e.g., Gosch*, 701 N.W.2d at 91 (defendant injured plaintiff's employee); *Anderson Plasterers v. Meinecke*, 543 N.W.2d 612, 613 (Iowa 1996) (same); *see also Annett*, 801 N.W.2d at 504 (explaining that *Anderson Plasterers* is a "stranger economic loss rule" case). In addition, nothing in *Annett* suggests that Iowa applies the ELD through a case-by-case policy analysis. *Cf.* MDL Order 38-39. *Annett* merely acknowledged that there were some

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

categorical exceptions or "qualifications" to the rule (for example, exempting professional malpractice claims against attorneys and accountants from the ELD) and applied the rule upon determining that the case before it "does not fall under any of the recognized exceptions or qualifications to the [ELD]." 801 N.W.2d at 504. And *Van Sickle Constr. Co. v. Wachovia Commercial Mortg., Inc.*, 783 N.W.2d 684 (Iowa 2011), simply recognized that negligent misrepresentation claims provide an exception to the ELD because the tort "is, and always has been, an economic tort allowing for recovery of purely economic damages" and applying the doctrine to bar such claims "would essentially eliminate the tort." *Id.* at 693. Once again, nothing in that analysis endorses the fact-specific policy assessment adopted in the MDL Order.

Louisiana. Louisiana has "adopted a slightly modified version of the economic-loss rule," *Wiltz*, 645 F.3d at 697, in the stranger context. The rule is not a *per se* bar, but rather is applied as part of Louisiana's duty-risk analysis. *See Phillips v. G & H Seed Co.*, 86 So. 3d 773, 780 (La. Ct. App. 2012).

In *PPG Indus., Inc. v. Bean Dredging*, 447 So. 2d 1058 (La. 1984), the Louisiana Supreme Court faced a classic stranger economic loss scenario: a dredging company damaged a gas pipeline and a gas customer sued for losses resulting from the interruption in gas supply. *See id.* at 1060. The court barred recovery for those economic losses. Citing the standard rationale for the ELD, the Court explained that liability in tort for economic losses must be restricted to prevent creating "liability 'in an indeterminate amount for an indeterminate time to an indeterminate class.'" *Id.* at 1061 (quoting *Ultramares Corp. v. Touche*, 174 N.E. 441, 444 (N.Y. 1931) (Cardozo, J.)). "Because the list of possible victims and the extent of economic damages might be expanded indefinitely, the court necessarily makes a policy decision on the limitation of recovery of damages." *Id.* at 1061-62. Restricting recovery in tort reflects the recognition that "a chain reaction occurs when economic harm is done and may produce an

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

unending sequence of financial effects best dealt with by insurance, contract, or other business planning devices." *Great Sw. Fire Ins. Co. v. CNA Ins. Cos.*, 557 So. 2d 966, 970 (La. 1990); *see also Wiltz*, 645 F.3d at 697-98 (noting that "the reasoning and result in *PPG* flow from the standard economic-loss rule," but the case "left the door open for case-by-case adjustments.").

Based on these considerations, the Louisiana Supreme Court has instructed that it is "*highly unlikely* that the moral, social and economic considerations" underpinning the duty/risk analysis would encompass the risk of pure "economic loss" suffered by parties whose property has not been injured. *PPG Indus.*, 447 So. 2d at 1061 (emphasis added). Applying that principle, courts have repeatedly held that the duty-risk analysis would produce precisely the same outcome as the stranger ELD. *See, e.g., id.* at 1061-62 (barring recovery where dredging company severed gas line causing economic loss to plaintiff); *Wiltz*, 645 F.3d at 699-702 (barring recovery where defendant's alleged negligence largely killed the crawfish crop, thus causing economic losses to buyers and processors of crawfish); *TS&C Invs. LLC v. Beusa Energy, Inc.*, 637 F. Supp. 2d 370 (W.D. La. 2009) (barring recovery where defendant's negligence closed an interstate highway, resulting in economic losses to plaintiffs).

The Fifth Circuit's decision in *Wiltz* is particularly instructive and rebuts the conclusion that Louisiana would permit recovery of economic losses in a case such as this. *Wiltz* involved claims by buyers and processors of crawfish who purchased crawfish from rice farmers and who claimed that the maker of an herbicide sold to the rice farmers had ruined the farmers' crawfish crop (thus hurting the plaintiffs' economic interests). In *Wiltz* there was certainly a "discrete" group of plaintiffs far smaller than the 350,000 or more corn farmers potentially at issue here, and there were similar "inter-connected relationships," yet the Fifth Circuit held that Louisiana

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

law barred recovery.[69]

Missouri. The Supreme Court of Missouri adopted the stranger ELD long ago. *See Brink v. Wabash Ry. Co.*, 60 S.W. 1058, 1059-60 (Mo. 1901) (barring parents' claim asserting that railroad's negligence causing death of their son had injured them by preventing the son from keeping his contract to provide for their support).[70] Contrary to the MDL Order, the mere fact that a federal court addressing an action against tobacco manufacturers for restitution found a basis for distinguishing *Brink* based on intervening changes in wrongful death law does not undermine the relevance of the opinion here. *See* MDL Order 39 (citing *City of St. Louis v. Am. Tobacco Co., Inc.*, 70 F. Supp. 2d 1008 (E.D. Mo. 1999)). *Brink* shows that the Missouri courts adopted the principles behind the stranger ELD, and the decision has never been disapproved. Similarly, the mere fact that Missouri (like many States) has recognized exceptions to the ELD for actions for against architects akin to professional malpractice claims, *see Business Men's Assurance Co. of Am. v. Graham*, 891 S.W.2d 438, 454 (Mo. Ct. App. 1994), and for negligent misrepresentation, *B.L. Jet Sales, Inc. v. Alton Packaging Corp.*, 724 S.W.2d 669, 673 (Mo. Ct. App. 1987), provides no basis for thinking that Missouri would not apply the ELD here. As another federal court has recognized, *B.L. Jet Sales* falls into one of the "rare exceptions to the economic loss doctrine" recognized in Missouri, and it does not warrant expanding Missouri law to create new ones. *Dannix Painting, LLC v. Sherwin-Williams Co.*, No. 4:12 CV 01640 CDP,

---

[69] The decisions from *In re Genetically Modified Rice Litigation* are inapposite. They involved GM rice that had *not been approved for human consumption even in the U.S.* The duty to prevent release in those cases was founded entirely on federal laws and regulations, which were designed to "prevent harms arising from market disruptions" caused by the spread of *non-approved* crops. *In re Genetically Modified Rice Litig.*, No. 4:06-md-1811, 2011 WL 5024548, at *4 (E.D. Mo. Oct. 21, 2011); *see also In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d at 1015, 1020 (E.D. Mo. 2009) (duties under federal law to "confine" the unapproved GM material). Those decisions are irrelevant here given that Viptera was fully approved in the U.S.

[70] The decision has been cited as an early application of the ELD. *See, e.g.*, *Union Oil Co.*, 501 F.2d at 563 n.4; *Stevenson*, 73 N.E.2d at 203; *cf. also* Dobbs § 647 (describing cases involving negligent injury of a person who had "contracted to provide [the plaintiff's] upkeep" as stranger economic loss cases).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

2012 WL 6013217, at *2 (E.D. Mo. Dec. 3, 2012), *aff'd*, 732 F.3d 902 (8th Cir. 2013).

Ohio. Ohio applied the stranger ELD long ago to bar workers from recovering lost wages after the defendant negligently caused an explosion that closed a factory. *See Stevenson*, 73 N.E.2d at 203-04. More recently, Ohio courts applied the rule to bar claims against a defendant that negligently severed telephone cables "resulting in a loss of telephone, fax and some internet and cable services to thousands," *RWP, Inc. v. Fabrizi Trucking & Paving Co., Inc.*, No. 87382, 2006 WL 2777159, at *1 (Ohio Ct. App. Sept. 28, 2006), and to bar an environmental group's effort to recoup remediation costs from a railroad, *see Ashtabula River Corp. Grp. II v. Conrail, Inc.*, 549 F. Supp. 2d 981, 987-88 (N.D. Ohio 2008).[71] *Ashtabula* squarely rejected the theory that the "[ELD] does not bar tort claims that are independent of a contract claim." *Id.* (citing *Corporex Dev. & Constr. Mgmt., Inc. v. Shook, Inc.*, 835 N.E.2d 701, 704 (Ohio 2005)).

Despite that straightforward precedent, the MDL Court concluded that the ELD does not apply in Ohio whenever a plaintiff asserts a tort claim independent of a contract. *See* MDL Order 41. That misstates Ohio law. The federal court pointed to broad dicta in *Campbell v. Krupp*, 961 N.E.2d 205 (Ohio Ct. App. 2011), which suggested that the ELD "does not apply—and the plaintiff who suffered only economic damages can proceed in tort—if the defendant breached a duty that did not arise solely from a contract." *Id.* at 211. But understanding that language requires looking at the *holding* of the case. The plaintiff in *Krupp* sued a title insurance company for negligence, claiming economic losses from a negligent title search. The court held that Ohio law had barred negligence claims against title abstractors (by parties other than those

[71] *See also City of Cleveland v. Ameriquest Mortg. Sec., Inc.*, 621 F. Supp. 2d 513, 516 (N.D. Ohio 2009) (barring city's public nuisance claim against financial institutions for their use of subprime lending that allegedly caused "epidemic of foreclosures afflicting the City").

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

in privity) for over 100 years and thus concluded that the plaintiff's negligence claim *failed* because "no cause of action outside of contract exists against a title abstracter for negligence." *Id.* at 213. Of course, the rule that no cause of action for negligence lies against title abstractors is nothing other than a particular application of—*the ELD*. Thus, when the court stated in dicta that a plaintiff could "proceed in tort" to recover economic losses "*if* the defendant breached a duty that did not arise from a contract," *id.* at 211 (emphasis added), the court was not remotely announcing a general rule that there *is* a duty in tort to avoid economic losses that would allow plaintiffs to bring negligence claims whenever they arise independently of a contract. To the contrary, to determine whether a duty in tort existed at all, the court still applied the ELD—and held that there was *no duty* in that case. *Id.* at 212-13. The holding in *Krupp* thus does nothing to upset the "general rule" under Ohio law that "there is no . . . duty to exercise reasonable care to avoid intangible economic loss or losses to others that do not arise from tangible physical harm to persons and tangible things." *Queen City Terminals, Inc. v. Gen. Am. Transp. Corp.*, 653 N.E.2d 661, 667-68 (Ohio 1995).[72]

The other cases cited by the MDL Court reflect the same principles. *Mulch Mfg., Inc. v. Advanced Polymer Sols., LLC*, 947 F. Supp. 2d 841 (S.D. Ohio 2013), involved claims for fraud, deceptive trade practices in violation of Ohio statute, and negligent misrepresentation, *see id.* at 855-56. The court reached the unremarkable conclusion that such claims came within exceptions to the ELD. The ELD does not apply to intentional torts (such as fraud and intentional

[72] As the discussion in *Krupp* shows, in suggesting that a plaintiff may recover economic losses in tort "*if* the defendant breached a duty that did not arise solely from a contract," *Krupp*, 961 N.E.2d at 211, the court was simply contemplating particular situations—particularly the tort of negligent misrepresentation—where there may be a duty in tort to avoid conduct causing economic losses to others. *See id.* (discussing the fact that, under *Haddon View Inv. Co. v. Coopers & Lybrand*, 436 N.E.2d 212 (Ohio 1982), the tort of negligent misrepresentation imposes a duty by law on certain parties to avoid economic losses).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

deception), and negligent misrepresentation is also a recognized exception to the doctrine.[73] *See id.* at 856 (noting that "various courts, applying Ohio law, have held that the [ELD] does not apply to the claims involved here"). As the court noted, the particular claims in the case rested on the assertion of duties that did not fall under the rubric of the ELD —namely, duties "not to engage in deceptive, misleading, and/or fraudulent practices." *Id.* at 857; *see also* Dobbs §§ 606 & n.1, 666. Nothing in that conclusion remotely undermines application of the stranger ELD to bar *negligence, nuisance*, or *strict liability* claims as in this case. *Dana Ltd. v. Aon Consulting, Inc.*, 984 F. Supp. 2d 755 (N.D. Ohio 2013), is further afield. The court there merely held that the only duties the plaintiff had identified all arose from a contract and applied the contractual ELD. *See id.* at 767. The case did not hold that a plaintiff may proceed in tort whenever its claims arise *outside* a contract; the court had no occasion to address that question.

At bottom, the MDL Order did not identify a *single* Ohio case—nor is there such a case—allowing a claim for *negligence, nuisance*, or *strict liability* for economic losses to proceed on the theory that the claim arises outside a contractual relationship.

Tennessee. Tennessee has adopted the stranger ELD. *See, e.g., Lear Siegler*, 825 S.W.2d at 85-87 (tracing the rule to *Robins Dry Dock*); *Ladd Landing, LLC v. TVA*, 874 F. Supp. 2d 727, 732 (E.D. Tenn. 2012). In *Lear Siegler*, the court barred workers' claims for wages lost when an industrial park was closed for a day due to the defendant's negligence in permitting a propane leak. 825 S.W.2d at 87. Tennessee cases discussing the ELD in the context of sales of goods and contract scenarios provide no basis for concluding that Tennessee would *restrict* the ELD to that context. As a federal court recently noted, there is a "difference between the [ELD]

[73] *See, e.g., Nat'l Mulch & Seed, Inc. v. Rexius Forest By-Prods. Inc.*, No. 2:02-CV-1288, 2007 WL 894833, at *9 (S.D. Ohio Mar. 22, 2007) (collecting cases and concluding that "the Court does not believe that under Ohio law a negligent misrepresentation claim is barred by the [ELD]").

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

in the context of a case involving contracts and a case in which no contract or privity between the parties is involved—the situation presented in *Lear Siegler* and in this case." *Ladd Landing*, 874 F. Supp. 2d at 732 (rejecting argument that ELD is limited to contracts and the sale of goods and relying on *Lear Siegler* to bar claims for pure economic loss resulting from dike failure).

As the MDL Court has pointed out, another federal court has suggested that, despite the holding in *Lear Siegler*, Tennessee would limit the ELD to the products liability context. *See Ham v. Swift Transp. Co., Inc.*, 694 F. Supp. 2d 915 (W.D. Tenn. 2010). But as *Ladd Landing* has explained, "*Ham* did not offer an explanation for why *Lear Siegler*'s application of the [ELD] to a tort situation was in error or limited to the facts of that case." *Ladd Landing*, 874 F. Supp. 2d at 731-33 (finding *Ham* unpersuasive and following *Lear Siegler* as the "controlling authority" from Tennessee courts). Indeed, the *Ham* court based its analysis on the patently mistaken assertion that the ELD "has its origins in the UCC." *Ham*, 694 F. Supp. 2d at 923. As explained above, that is demonstrably incorrect. The stranger ELD dates back to the nineteenth century. In addition, *Ham*'s holding—purportedly limiting Tennessee's ELD to UCC transactions—cannot be squared with other Tennessee cases applying the ELD outside the UCC context.[74] Lastly, as *Ladd Landing* pointed out, "because *Lear Siegler* is a published decision by the Tennessee Court of Appeals that has not been overruled or modified by a subsequent decision of the Tennessee Supreme Court, it is controlling authority." 874 F. Supp. 2d at 733. The reasoning in *Ham* for ignoring *Lear Siegler* is thus wholly unpersuasive.[75]

Texas. Texas has applied the ELD to contractual strangers. *See LAN/STV v. Martin K.*

[74] *See, e.g.*, *Rural Dev., LLC v. Tucker*, No. M2008-00172-COA-R3-CV, 2009 WL 112541, at *9 (Tenn. Ct. App. Jan. 14, 2009); *Amsouth Erectors, LLC v. Skaggs Iron Works, Inc.*, No. W2002-01944-COA-R3-CV, 2003 WL 21878540, at *4-5 (Tenn. Ct. App. Aug. 5, 2003).

[75] To the extent the federal court attempted to distinguish *Lear Siegler* and *Ladd Landing* as "lack-of-access" cases, MDL Order 43, as explained above, that distinction is meritless. *See supra* Part II.A.4.b.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Eby Constr. Co., Inc., 435 S.W.3d 234, 250 (Tex. 2014). In contrast to most jurisdictions, however, in Texas the "application of the rule depends on an analysis of its rationales in a particular situation." *Id.* at 245-46. Contrary to the MDL Order, however, that does not mean that Texas courts would decline to apply the ELD in this case. *See* MDL Order 44. The Texas Supreme Court has expressly recognized that the "principal rationale[] for the rule" is that "[e]conomic losses *proliferate* more easily than losses of other kinds" and can result in "indeterminate and disproportionate liability." *LAN/STV*, 435 S.W.3d at 240 (emphasis added). "Those liabilities may in turn create an exaggerated pressure to avoid an activity altogether." *Id.* Those concerns fully apply here. As Syngenta has explained, Plaintiffs' theories would, in the first instance, expose Syngenta to claims by hundreds of thousands of corn farmers, not to mention the claims of Non-Producers ranging from grain elevators to exporters to anyone else downstream. And as the milo and soybean producers' claims show, the alleged economic ripple effects from Viptera could expand the potential plaintiff pool to sweep in hundreds of thousands more. The allegations in this case thus provide a classic stranger economic loss scenario, and there is no basis for concluding that Texas law would not apply the stranger rule in this case.

In re Genetically Modified Rice provides no persuasive authority for declining to apply the ELD in a case such as this. That decision predated *LAN/STV* and misread Texas law by holding that the stranger ELD applied only if "the plaintiff could have recovered for the same injury by a contract action against another." *In re Genetically Modified Rice Litig.*, No. 4:06-md-1811, 2011 WL 339168, at *3 n.2 (E.D. Mo. Feb. 1, 2011) (citing *Sterling Chems., Inc. v. Texaco Inc.*, 259 S.W.3d 793, 793 (Tex. App. 2007)). *Sterling Chemicals* did not read the ELD so narrowly, *see* 259 S.W.3d at 799,[76] and other Texas cases (including those cited in *Sterling*

[76] In observing that the ELD was "particularly appropriate" where the plaintiff had a contract action against

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Chemicals) have applied the stranger ELD without any such restriction.[77]

Wisconsin. Federal courts have squarely held that Wisconsin applies the stranger ELD. In *Leadfree Enters., Inc. v. U.S. Steel Corp.*, 711 F.2d 805 (7th Cir. 1983), the Seventh Circuit held that Wisconsin law barred plaintiffs (users of a bridge) from recovering "for lost profits and other purely economic losses caused when [the] bridge was closed as a result of allegedly defective construction." *Id.* at 806. Subsequently, the Seventh Circuit explained that "there is now substantial evidence that Wisconsin would decline *in all circumstances* to allow a negligence suit for the recovery of only economic damages, even when there is no contractual relationship between the parties." *Midwest Knitting Mills, Inc. v. United States*, 950 F.2d 1295, 1300 (7th Cir. 1991) (emphasis added); *see also Custom Underground, Inc. v. Mi-Tech Servs., Inc.*, No. 10-CV-222-JPS, 2011 WL 5008343, at *4 (E.D. Wis. Oct. 20, 2011) (applying ELD to bar contractor's claim seeking to recover increased costs due to engineer's negligent plans where parties were contractual strangers). Federal courts have made clear that Wisconsin's ELD applies even in the absence of a contractual relationship and have refused to "conflat[e] the economic loss doctrine's applicability in cases where contractual privity exists between the parties with Wisconsin's principles regarding recovery of economic losses in tort where no contractual privity exists between the parties." *Custom Underground*, 2011 WL 5008343, at *3.

Wisconsin cases have not undermined the federal opinions and have not confined the ELD to "the context of contractual relationships." MDL Order 44-45. In products liability cases, the Wisconsin Supreme Court has taken a broad approach, holding that "contract notions

---

another, *Sterling Chemicals* did not suggest that fact was determinative. *See* 259 S.W.3d at 799.

[77] *See, e.g., Trans-Gulf Corp. v. Performance Aircraft Servs., Inc.*, 82 S.W.3d 691, 695 (Tex. App. 2002); *Coastal Conduit & Ditching, Inc. v. Noram Energy Corp.*, 29 S.W.3d 282, 288-90 (Tex. App. 2000) (applying ELD to "contractual strangers" where there was no alternative for recovery in contract for excavating company's claims that gas company's negligent marking of its lines had caused economic losses in the form of "additional overhead and expenses" when excavating company struck the improperly marked lines).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

of privity are irrelevant to the question whether" the ELD applies. *Daanen & Janssen*, 573 N.W.2d at 852. *Brew City Redevelopment Grp., LLC v. Ferchill Grp.*, 724 N.W.2d 879 (Wis. 2006), is not to the contrary. The court there rejected the ELD on multiple grounds, including the square holding that the damages claimed were "non-economic." *Id.* at 888. The court also cited *Daanen* approvingly, *id.*, and cannot be read as *sub silentio* rejecting *Daanen*'s reasoning.

Schuetta v. Aurora Nat'l Life Assurance Co., No. 13-cv-007-JPS, 2013 WL 6199248, at *1 (E.D. Wis. Nov. 27, 2013), involved claims by the beneficiary of an annuity that the insurance company had negligently failed to inform him of his rights and is best understood as falling in the category of cases in which a defendant in the business of providing professional services or information for the benefit of a third party may be held liable for economic losses if it performs the service negligently. *See supra* pp. 24 & n.50; *cf. Ins. Co. of N. Am. v. Cease Elec., Inc.*, 688 N.W.2d 462, 471-72 (Wis. 2004) (holding that Wisconsin would not apply the ELD to claims arising under any contracts for services). To the extent the court there suggested that the ELD should not apply simply because the UCC did not govern the transaction and that ELD cases "most often deal with manufactured products that are under warranty," *Schuetta*, 2013 WL 6199248, at *5, that approach misstates the law and falls into precisely the error of "conflat[ing] the ELD's applicability in cases where contractual privity exists between the parties with Wisconsin's principles regarding recovery of economic losses in tort where no contractual privity exists between the parties." *Custom Underground*, 2011 WL 5008343, at *3.

The MDL Court was also mistaken in relying on *Walker v. Ranger Ins. Co.*, 711 N.W.2d 683, 687 (Wis. Ct. App. 2006), because that case involved *physical injury*. *See id.* (due to defendant's conduct "pipes burst and significant damage occurred as a result"). To the extent the court there suggested that the ELD should not apply because the plaintiffs had no contractual remedy, it plainly misunderstood the most basic parameters of the doctrine. The ELD did not bar

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

recovery in that case because the plaintiffs had suffered physical damage to their property.

b. The Court Should Predict That States That Have Not Expressly Adopted The Stranger ELD Would Apply It Here.

Alabama. The Alabama Supreme Court has adopted the ELD in the products liability context, *see Lloyd Wood Coal Co. v. Clark Equip. Co.*, 543 So. 2d 671, 674 (Ala. 1989), and nothing in that decision indicates Alabama would reject the majority approach here. The MDL Court cited *Public Building Authority of City of Huntsville v. St. Paul Fire and Marine Insurance Co.*, 80 So. 3d 171 (Ala. 2010), for the proposition that Alabama has limited the ELD to products liability. But *Public Building* merely held that the ELD does not apply in "a commercial-construction context" because Alabama has developed a context-specific six-factor test to determine whether "a duty in tort" exists in commercial-construction cases. *Id.* at 184-85.

Arkansas. The Arkansas Supreme Court has held that the ELD does not apply in strict products liability cases, *Blagg v. Fred Hunt Co., Inc.*, 612 S.W.2d 321, 324 (Ark. 1981), and has reserved the question whether to apply the doctrine to negligence cases, *see Bayer CropScience LP v. Schafer*, 385 S.W.3d 822 (Ark. 2011). The MDL Order reached a contrary conclusion primarily by misstating Arkansas law. The Order rests on the assertion that the court in *Carvin v. Ark. Power & Light Co.*, Civ. Nos. 90-6055 & 90-6109, 1991 WL 540481, at *4 (W.D. Ark. Dec. 2, 1991), "declined to apply the ELD under Arkansas law in the stranger context." MDL Order 27. That is flatly incorrect. *Carvin* applied the stranger ELD as it held: "We do not believe that the Arkansas courts if faced with the issue would allow plaintiffs to recover from defendants for the purely economic losses stemming from the loss of the bridge." 1991 WL 540481, at *5. There is no reason to think that *Carvin* does not accurately reflect Arkansas law.

Colorado. The Colorado Supreme Court recently held that one strand of the ELD applying the doctrine where there are "interrelated contracts" does not apply to tort duties that

27-CV-15-3735
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

arise independently of contract duties. *S K Peightal Eng'rs, LTD v. Mid Valley Real Estate Sols. V, LLC*, 342 P.3d 868, 872 (Colo. 2015). But the court made clear that it was addressing scenarios involving "a single contract" or "interrelated contracts" and specifically stated that its holding was "narrowly" tailored to "the specific facts of this case." *Id.* at 868, 877. The MDL Court erred in relying on that decision to hold that Colorado would reject the majority approach to the *stranger* ELD.[78]

Indiana. Indiana has made clear that the "existence or non-existence of a contract is not the dispositive factor for determining whether a tort action [for economic loss] is allowable," *U.S. Bank, N.A. v. Integrity Land Title Corp.*, 929 N.E.2d 742, 748 (Ind. 2010), and has applied the ELD where parties had no contractual privity at all, *Indianapolis-Marion Cty. Pub. Library v. Charlier Clark & Linard, P.C.*, 929 N.E.2d 722, 739 (Ind. 2010). These decisions, which post-date the Indiana state-court decisions erroneously relied on by the MDL Court,[79] show that Indiana does not restrict the ELD to situations where the parties have a contract. In fact, the Indiana Court of Appeals has applied the stranger ELD in the classic scenario of defendant injuring an employee and disrupting plaintiff's business. *See Morton v. Merrillville Toyota, Inc.*, 562 N.E.2d 781, 786 (Ind. Ct. App. 1990).

The MDL Court also erred by relying on a federal decision that erroneously cited *Charlier* for the proposition that Indiana has restricted the ELD to cases involving contracting

[78] The MDL Court also relied on *Town of Alma v. AZCO Constr., Inc.*, 10 P.3d 1256 (Colo. 2000). *See* MDL Order 28-29. But *AZCO* was decided in the context of parties who were in contractual privity and said nothing about how the court would rule in a stranger scenario.

[79] The three state-court cases relied on by the MDL Court not only predate the Indiana Supreme Court's decisions, they also are readily distinguished from this case. Two of the cases involved property damage, which "clearly fall[s] outside the scope of the economic loss doctrine." *Hoffman v. WCC Equity Partners, LP*, 899 N.E.2d 756, at *2 (Ind. Ct. App. 2008) (unpublished decision); *see KB Home Ind. Inc. v. Rockville TBD Corp.*, 928 N.E.2d 297, 300, 304-05 (Ind. Ct. App. 2010). In the third case, the appellate court found the ELD did not apply to a negligence *per se* claim because "it seeks recovery in negligence based upon [a] violation of state statutory and federal regulatory law." *American United Life Ins. Co. v. Douglas*, 808 N.E.2d 690, 705 (Ind. Ct. App. 2004).

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

parties. *See Novak v. Ind. Family & Soc. Servs. Admin.*, No. 1:10-cv-0677-RLY-DML, 2011 WL 1224813, at *8 (S.D. Ind. Mar. 30, 2011). Contrary to *Novak*'s mischaracterization, the defendant in *Charlier* was an engineering subcontractor with whom the plaintiff had no contractual privity whatsoever. *Charlier*, 929 N.E.2d at 739.

Kansas. The MDL Court correctly recognized that the Kansas Supreme Court has held open the possibility that the ELD would apply in the stranger context, *see Rinehart v. Morton Buildings Inc.*, 305 P.3d 622, 632 (Kan. 2013), but erroneously found "no basis" to predict that Kansas courts would apply the doctrine in this case because "Kansas courts have never applied the stranger [ELD]." MDL Order 31. That analysis ignores the fact that the stranger ELD is the *majority* approach and should be applied in Kansas absent some indication that Kansas would *reject* the stranger ELD. Moreover, the Kansas Court of Appeals *has* applied the stranger ELD when an excavator negligently operated its equipment causing "economic harm due to an interruption in phone and internet service." *Long Motor Corp. v. SM & P Utility Res., Inc.*, 214 P.3d 707, at *3 (Kan. Ct. App. 2009) (unpublished).

Kentucky. The Kentucky Supreme Court adopted the ELD in the products liability context in *Giddings & Lewis, Inc. v. Indus. Risk Insurers*, 348 S.W.3d 729 (Ky. 2011), and nothing in that decision restricts the doctrine to that context. The federal and lower-court decisions relied on by the MDL Court arose in the context of a contractual relationship and thus afforded no opportunity for those courts to address the stranger ELD. *See, e.g., Nami Res. Co., LLC v. Asher Land & Mineral, Ltd.*, Nos. 2012-CA-762-MR et al., 2015 WL 4776376, at *2 (Ky. Ct. App. Aug. 14, 2015) (non-final opinion). Accordingly, these cases are irrelevant to the question whether Kentucky would apply the stranger ELD here.

Michigan. Although Michigan courts have indicated that the ELD applies only where parties could have addressed their risks by contract, the Michigan Court of Appeals held open the

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

possibility that claims for economic losses might be barred in "a mass tort claim with the potential for disproportionate economic exposure." *Quest Diagnostics, Inc. v. MCI WorldCom, Inc.*, 656 N.W.2d 858, 866 (Mich. Ct. App. 2002). Plaintiffs have made this case a purported mass tort action, with more than 2,130 plaintiffs pursuing claims. Accordingly, this Court should predict that the Michigan courts would apply the stranger ELD in this "mass tort" action.

Mississippi. Mississippi courts have not addressed, let alone rejected, the stranger ELD. The cases relied on by the MDL Court considered the ELD in the context of contractual relations, *see, e.g.*, *Lyndon Prop. Ins. Co. v. Duke Levy & Assocs., LLC*, 475 F.3d 268, 274 (5th Cir. 2007) (refusing to apply ELD to "a duty shaped by contract"), and consequently took no position on the rationales underpinning the stranger ELD.

Nebraska. The Nebraska Supreme Court has adopted the ELD in the products liability context, *see Nat'l Crane Corp. v. Ohio Steel Tube Co.*, 332 N.W. 2d 39, 44 (Neb. 1983), and the MDL Court's reliance on *Lesiak v. Cent. Valley Ag. Co-op, Inc.*, 808 N.W.2d 67 (Neb. 2012), to limit the doctrine to that context is misplaced. In *Lesiak*, the court held only that the ELD did not apply because the plaintiffs had suffered *physical injury*—that is, "the damage allegedly caused by the breach was not purely economic loss," *id.* at 83. The court did not consider, even in dicta, stranger scenarios and thus *Lesiak* cannot be read as a rejection of the stranger ELD.

North Carolina. North Carolina courts have not addressed the stranger ELD. The MDL Court's conclusion was based on a decision that analyzed the ELD through the lens of products liability cases, and in that context held that lack of contractual privity precluded applying the rule. *See Lord v. Customized Consulting Specialty, Inc.*, 643 S.E.2d 28, 32 (N.C. Ct. App. 2007). *Lord* does not show that North Carolina would reject bright-line application of the stranger ELD.

North Dakota & Oklahoma. North Dakota and Oklahoma have adopted the ELD in the products liability context, *see Leno v. K & L Homes, Inc.*, 803 N.W.2d 543, 550 (N.D. 2011); *see*

27-CV-15-3735

Hennepin County, MN

Waggoner v. Town & Country Mobile Homes, Inc., 808 P.2d 649, 652 (Okla. 1990), and have given no indication that they would not adopt majority approach in the stranger context.

South Dakota. The South Dakota Supreme Court has noted that it "is in agreement with the rationale behind the rule denying economic damages under tort theories and expressly recognize[d] it." *City of Lennox v. Mitek Indus., Inc.*, 519 N.W.2d 330, 333 (S.D. 1994). In defining the doctrine's contours, the court has looked to Illinois—a state that has unquestionably adopted the stranger ELD. *See Kreisers Inc. v. First Dakota Title Ltd. P'ship*, 852 N.W.2d 413 (S.D. 2014) (citing *Collins v. Reynard*, 607 N.E.2d 1185 (Ill. 1992)).

B. Non-Producers' Claims Are Barred By The Stranger ELD Or The Contractual ELD.

The Non-Producers' claims are barred by one of the two strands of the ELD, depending on how the claims are cast. To the extent the Non-Producers assert that they were injured by the general presence of Viptera in the U.S. corn supply, their claims are identical to those of the Producers and are barred under the stranger rule for the reasons explained above. To the extent the Non-Producers assert that they were injured because the particular corn they purchased contained Viptera corn, the contractual strand of the ELD bars tort claims for economic losses arising where the parties are connected (directly or indirectly) by contract.[80]

In particular, the contractual ELD bars tort claims for economic losses arising from the assertion that goods do not have the value or the qualities the purchaser expected.[81] "A buyer's desire to enjoy the benefit of his bargain is not an interest that tort law traditionally protects."

11/9/2015 8:39:52 PM
Hennepin County, MN

Anderson Elec., Inc. v. Ledbetter Erection Corp., 503 N.E.2d 246, 248 (Ill. 1987).

Like the stranger rule, the contractual ELD precludes the open-ended liability that would result if a manufacturer could be held liable for the spreading economic consequences of some failure of its product to meet expectations. *See, e.g.*, *Daanen & Janssen*, 573 N.W.2d at 849. It is also intended to preserve the distinct roles of tort and contract law. As noted above, tort law is concerned with duties to prevent physical harm. By contrast, claims that "a product has not met the customer's expectations" or "that the customer has received 'insufficient product value'" and suffered economic loss as a result are the concern of "express and implied warranties." *E. River S.S. Corp. v. Transamerica Delaval, Inc.*, 476 U.S. 858, 872 (1986). The contractual ELD thus reflects a determination that "principles of warranty law remain the appropriate vehicle to redress a purchaser's disappointed expectations when a defect renders a product inferior or unable adequately to perform its intended function." *Moorman Mfg. Co. v. Nat'l Tank Co.*, 435 N.E.2d 443, 450 (Ill. 1982) (citations omitted); *accord Delaval*, 476 U.S. at 867.

Restricting parties to their contract remedies prevents tort law from swallowing contract law and preserves the ability of parties to allocate risks through the terms of their transactions. The doctrine is thus intended to encourage parties to address economic risks by contract.[82]

Here, the Non-Producers' claims are barred by the contractual ELD. Their fundamental claim is that they purchased corn without regard to whether it was grown from Viptera, mixed the corn all together, and then were disappointed when the presence of Viptera in the corn supply (and China's embargo) allegedly lowered the price of corn. The Non-Producers themselves

[82] It encourages "the party with the best information (that is, the party with knowledge of its own risk of loss) to decide whether to assume, allocate, avoid, or insure against its risk of loss." *Wiltz*, 645 F.3d at 697; *see also Daanen & Janssen*, 573 N.W.2d at 850 ("[T]he economic loss doctrine is aimed at encouraging commercial parties ex ante to negotiate for warranty protection or to take other steps, such as purchasing insurance, to protect their purely economic interests.").

27-CV-15-3785

characterize their alleged damages as "economic harm," Non-Class Compl. ¶ 240, and they complain solely of "losses from the drop in corn prices," "reduced volumes and reduced margins," Non-Class Compl. ¶ 292, and other similar economic damages, *see id.* ¶¶ 293-96. Such injuries are paradigmatic economic losses by a purchaser disappointed that the goods he purchased do not have the qualities and the economic value he had hoped for.[83]

The policies behind the doctrine also apply with particular force to the Non-Producers, because they could have protected against their losses through their contracts for purchasing corn—including by seeking warranties that the corn was Viptera free.[84] As noted, one purpose of the ELD is to "encourage" the "*commercial purchaser*[] to assume, allocate, or insure against [economic] risk." *Daanen & Janssen, Inc.*, 573 N.W.2d at 846 (emphasis added). Allowing recovery in tort and making Syngenta (and other manufacturers of GM seeds) the universal insurers for everyone else in the grain industry would give the Non-Producers the benefit of a protection they did not bargain (or pay) for when they were purchasing corn, eliminate incentives for them ever to rely on contracts to address these risks, and prevent the system of contracts between various players in the market from ever developing to address the economic risks at issue here. These are exactly the results the ELD is designed to avoid. The doctrine is premised on the view that "commercial entities [are] quite capable of bargaining for express warranties" and that the courts should not permit after-the-fact tort actions to remove the incentives to do so. *Lexington Ins. Co. v. W. Roofing Co., Inc.*, 316 F. Supp. 2d 1142, 1149 (D. Kan. 2004).

---

[83] *See, e.g., Daanen & Janssen, Inc.*, 573 N.W.2d at 845 (ELD bars claims for "loss in value of the product itself" or "insufficient product value"); *State Farm Mut. Auto. Ins. Co. v. Ford Motor Co.*, 736 So. 2d 384, 387 (Miss. Ct. App. 1999) (ELD bars recovery for "controversies in which commercial purchases do not live up to the expectations of the consumer"); Minn. Stat. § 604.101, subd. 3 (Reporter's Note) (statute bars "recovery for damage to [or] diminution in the value of" the goods sold).

[84] *See, e.g., Daanen & Janssen*, 573 N.W. 2d at 850 ("Since Daanen was free to negotiate for warranty protection with [third parties], the policies underlying the [economic loss] doctrine applied with full force to its claims regardless of whether it was in privity with [Defendant].").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Like the Producers, the Non-Producers also cannot sidestep the ELD by claiming physical injury to property. *See supra* Part II.A.3. The Non-Producers rely on the same generic assertions about "pervasive contamination of the U.S. corn supply," Non-Class Compl. ¶ 236, rather than any assertions about harm to *their* property. And their theory of injury is similarly decoupled from injury to *their* corn. They allege injury from a market-wide drop in the price of *all* U.S. corn, not injury to *their* corn in particular. The MDL Court held that the non-producers before it had not alleged physical injury, and the same logic applies to the Non-Producers here. *See* MDL Order 19-20. As explained above, moreover, the presence of Viptera in corn cannot count as physical injury in any event, because Viptera was fully approved in the U.S. Finally, the Non-Producers face an additional hurdle. In the purchase-of-goods context, physical injury suffices to avoid the ELD only where the purchased good damaged *other* property.[85] Where the only injury is to the good itself, the ELD applies. Here, corn—including corn containing the MIR162 trait—is the product the Non-Producers purchased. Their claim that the corn they purchased did not have the value it should have had does not involve damage to *other* property.

Nor can the Non-Producers claim injury to *other* property on the theory that they commingled MIR162 corn with other corn. Where one component or ingredient allegedly "injures" a product of which it is a part, that does not qualify as injury to "other property." *See, e.g.*, *Jorgensen*, 824 N.W.2d at 419; *W. Roofing*, 316 F. Supp. 2d at 1147-49; *Minneapolis Soc'y of Fine Arts*, 354 N.W.2d at 820.[86] Under this principle, courts have held, for example, that where fertilizer contaminated a crop of wheat with rye (thus preventing the farmer from selling

[85] *See, e.g.*, *Lexington Ins.*, 316 F. Supp. 2d at 1147; *Jorgensen Farms, Inc. v. Country Pride Coop., Inc.*, 824 N.W.2d 410, 419 (S.D. 2012); *State Farm*, 736 So. 2d at 387; Minn. Stat. § 604.101, subd. 3(1) (plaintiff can recover solely for damage to "*other* tangible personal property") (emphasis added).

[86] *See also, e.g.*, *Nw. Ark. Masonry, Inc. v. Summit Spec. Prods., Inc.*, 31 P.3d 982, 988 (Kan. Ct. App. 2001); *StarLink Corn*, 212 F. Supp. 2d at 841 ("[C]ourts have uniformly held that if a defective part of a product harms the rest of the product, that does not constitute 'other property.'").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

the crop at a higher price as certified seed), that did not constitute injury to "other property" because the fertilizer was merely a component part of the finished product—the crop of wheat. *Jorgensen*, 824 N.W.2d at 413, 418-19. Here, the Non-Producers combine corn from multiple sources to create their product: fungible corn. Mixing some corn with the MIR162 trait together with other corn cannot, as a matter of law, produce injury to "other property." *See, e.g.*, *Wasau Tile, Inc. v. Country Concrete Corp.*, 593 N.W.2d 445, 454 (Wis. 1999) (where manufacturer of pavers complained that "the pavers were damaged because one or more of their ingredients was of insufficient quality," there was no damage to "other property"); Dobbs § 449.[87]

The MDL Court offered two reasons for holding that the ELD did not bar non-producers' claims, but both rest upon incorrect statements of the law.[88]

First, the MDL Court held that the ELD did not apply because the non-producers had not purchased Syngenta's own product—Viptera *seed*—directly from Syngenta. Instead, they had purchased harvested corn grain from other intermediaries. *See* MDL Order 47. Contrary to the federal court's assumptions, however, the ELD applies even to remote purchasers who did not purchase directly from the defendant and applies where the defendant made only a component or ingredient incorporated into the product purchased by the plaintiff. It is well settled that, when a remote purchaser sues the manufacturer, the ELD applies just as it would if the plaintiff had purchased from the manufacturer directly. *See, e.g.*, *Daanen & Jansen*, 573 N.W.2d at 849.

---

[87] *See also Int'l Flavors & Fragrances, Inc. v. McCormick & Co., Inc.*, 575 F. Supp. 2d 654, 660-64 (D.N.J. 2008) (plaintiff that had purchased paprika infested with cigarette beetles from defendant could not show injury to "other property" where it had included the paprika in its barbeque sauce and the barbeque sauce was ruined); *Dixie-Portland Flour Mills, Inc. v. Nation Enters., Inc.*, 613 F. Supp. 985, 988-89 (N.D. Ill. 1985) (purchaser of flour contaminated with sand could not recover in tort despite the assertion that other ingredients were "harmed" and wasted when they were mixed with the flour; the "qualitative" defect in the flour "at core . . . merely injures a purchaser's expectations"); *see also StarLink*, 212 F. Supp. 2d at 841 (the "modern trend" is to hold that if "damage is of a type that the buyer could have foreseen resulting from the product failing to perform, it does not constitute harm to other property").

[88] The MDL Court discussed its rationales primarily in the context of Minnesota's statute codifying the ELD, and that statute is addressed more specifically below. *See infra* pp. 66-69.

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Any other rule would produce the anomalous result that those purchasing directly *could not* recover in tort for economic losses, but those who happened to purchase from intermediaries *could*. That is not the law. *See, e.g.*, *StarLink*, 212 F. Supp. 2d at 839-40 (if the ELD did not apply to a remote purchaser, "then manufacturers would become liable for economic expectations of secondary purchasers").[89]

Similarly, it is settled law that the ELD applies where a plaintiff sues the maker of a component or ingredient in a purchased product. The U.S. Supreme Court's seminal decision applying the contractual ELD involved exactly such a scenario—a charterer sued the manufacturer of the turbines in a vessel. *See Transam. Delaval, Inc.*, 476 U.S. at 860-61. Even though the charterer had not purchased the turbines (or anything else) from the defendant, the Supreme Court held that the ELD applied. *See id.* at 871-72. Likewise, in *King v. Hilton-Davis*, 855 F.2d 1047 (3d Cir. 1988), the plaintiff farmer had purchased seed potatoes from a supplier, the seed potatoes had been treated with a sprout-suppressor, and the farmer sued the maker of the sprout-suppressor claiming that it had damaged the seed potatoes (preventing them from growing). The Third Circuit held the claim barred by the ELD because the sprout suppressor was simply a component of the product the farmer had purchased (seed potatoes), even though the farmer had not purchased any sprout suppressor himself.[90] The court explained that all the

---

[89] *See also, e.g.*, *Nw. Ark. Masonry*, 31 P.3d at 988-89 (explaining that "consumers are not typically in privity of contract with the manufacturer when they purchase products from retailers or wholesalers," but that "[n]evertheless, the economic loss rule applies").

[90] This is the rule generally applied across jurisdictions. *See, e.g.*, *Hininger v. Case Corp.*, 23 F.3d 124, 127 (5th Cir. 1994) (under Texas law, consumer cannot recover economic losses in tort in action against a supplier of a component part in the product the consumer purchased); *accord Shipco 2295, Inc. v. Avondale Shipyards, Inc.*, 825 F.2d 925 (5th Cir. 1987) (suit against designer of steering mechanism in ship) *Progressive Ins. Co. v. Monaco Coach Corp.*, No. 1:05-CV-37-DMR-JMR, 2006 WL 839520, at *3 (S.D. Miss. Mar. 29, 2006) (suit against maker of water heater in motor home); *Capital Motor Lines v. Detroit Diesel Corp.*, 799 F. Supp. 2d 11, 17 (D.D.C. 2011) (suit against maker of engine in a motor coach); *St. Paul Fire & Marine Ins. Co. v. Steeple Jac, Inc.*, 352 N.W.2d 107 (Minn. Ct. App. 1984) (suit against maker of defective gear box incorporated into window washing unit).

The Restatement (Third) applies the same approach. It explains that where Buyer purchases a house from Developer and later discovers that windows made by Manufacturer have leaked, damaging the house, the ELD bars

27-CV-15-3585
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

plaintiff-farmer had lost was "the expected performance of the seed potatoes, no more and no less." *Id.* at 1052. The same rationale applies here.

Once again, any other rule would produce an anomalous gap in the doctrine. For example, if a purchaser bought pizza dough from A, and A had made the dough with flour from B that had sand in it, the MDL Court's approach would suggest that the ELD would not bar purchaser's tort claim against B (the remote component supplier) simply because the purchaser did not buy flour from B. But such a result cannot be squared with the settled rule that the ELD bars both (i) any tort claim by A (the maker of the dough) against B (the supplier of contaminated flour) because the flour was merely a component in A's final product (and thus did not injure "other" property)[91] and (ii) any tort claim by the ultimate purchaser against A, his direct counter-party. Nothing in the policies underpinning the doctrine suggests that a tort claim for economic losses should spring to life the minute the maker of a product with a deficient component sells the finished product to a third party. Or as many courts have put it, there is "no principled basis for affording the purchaser of a defective product greater relief against the manufacturer of a component part . . . than against the manufacturer of the assembled defective product." *Hilton-Davis*, 855 F.2d at 1051. To the contrary, the same policy rationales apply with full force, because barring tort claims will both limit indeterminate liability and encourage purchasers to protect themselves by contract (including warranties).[92] Nothing in the situation of a remote component supplier could justify "permitting a tort recovery that will allow a purchaser to reach back up the production and distribution chain, thereby disrupting the risk allocations that have been worked out in the transactions comprising that chain." *Id.* at 1054. In short, the MDL

Buyer's tort claim against the Manufacturer. *See* Restatement (Third) of Torts: Liab. for Econ. Harm § 2 illust. 1.

[91] *See, e.g.*, *Dixie-Portland*, 613 F. Supp. at 988-89.

[92] In the pizza dough example, the ultimate purchaser would seek warranties from A (the maker of the dough), and A, in turn, would find it wise to protect its interests by seeking warranties from B (its flour supplier).

Hennepin County, MN

Court's suggestion that the ELD would not apply unless the plaintiff had purchased the exact good produced and sold by Syngenta fundamentally misstates the law.[93]

Second, the MDL Court concluded that the ELD did not apply because the non-producers had not asserted that Viptera was "defective" and the ELD applies solely to product defect claims. MDL Order 47. That is also incorrect. Nothing in the purposes underlying the ELD limits it to tort claims asserting that a product meets a particular definition making it "defective." Instead, the fundamental point of the doctrine is that, *whenever* a plaintiff asserts a claim resting on the assertion that the product has disappointed the plaintiff's economic expectations, the plaintiff cannot proceed in negligence or strict liability and instead must look to the law of contract (and warranty) for relief. The doctrine has thus has been applied where, for example, the defendant simply sent the plaintiff the wrong product. *See, e.g.*, *Adcock v. S. Austin Marine, Inc.*, No. 2:08-cv-263KS-MTP, 2009 WL 3633335, at *5 (S.D. Miss. Oct. 30, 2009). If the MDL Court's approach were applied, a plaintiff could evade the ELD by merely describing his alleged economic losses while studiously refraining from calling a product "defective."

1. All States At Issue Would Apply The Contractual ELD.

With minor variations, all States at issue apply the ELD in the context of the purchase of goods to bar recovery of economic losses in tort[94] and, for the reasons above, would apply it to

[93] The Non-Producers cannot avoid the rule described here on the theory that seeds used as an input in producing crops are somehow different from other component parts used as inputs in a final product. Cases applying the ELD in the agricultural context have repeatedly recognized that not only seeds but also even fertilizers are component parts that go into the finished product of a final crop. *See, e.g.*, *Jorgensen Farms*, 824 N.W.2d at 418-19 (applying ELD because fertilizer contaminated with rye was a component part of wheat crop for which fertilizer was used); *Everkrisp Vegetables, Inc. v. Tobiason Potato Co.*, 870 F. Supp. 2d 745, 750-52 (D.N.D. 2012) (applying ELD where seed potatoes infected with ring rot infected entire potato crop).

[94] *See, e.g.*, *Lloyd Wood Coal Co. v. Clark Equip. Co.*, 543 So. 2d 671, 674 (Ala. 1989); *S K Peightal Engineers, LTD v. Mid Valley Real Estate Solutions V, LLC*, 342 P.3d 868, 872 (Colo. 2015); *Moorman Mfg. Co. v. Nat'l Tank Co.*, 435 N.E.2d 443, 447-48 (Ill. 1982); *Indianapolis-Marion Cty. Public Library v. Charlier Clark & Linard, P.C.*, 929 N.E.2d 722, 739 (Ind. 2010); *Richards v. Midland Brick Sales Co., Inc.*, 551 N.W.2d 649, 651-52 (Iowa Ct. App. 1996); *Jordan v. Case Corp.*, 993 P.2d 650, 651-52 (Kan. Ct. App. 1999); *Giddings & Lewis, Inc. v. Indus. Risk Insurers*, 348 S.W.3d 729, 738-39 (Ky. 2011); *Neibarger v. Univ. Coops., Inc.*, 486 N.W.2d 612, 619-20

bar the Non-Producers' claims here. Syngenta addresses here solely Minnesota law and those few States whose law requires some further comment.

Minnesota. As noted above, Minnesota has codified the ELD in the context of the sale of goods. *See* Minn. Stat. § 604.101. The statute provides that a "buyer may not bring a product defect tort claim against a seller for compensatory damages unless a defect in the goods . . . caused harm to the buyer's tangible personal property other than the goods." *Id.* subd. 3. The Non-Producers' claims fall under that provision and thus are barred.

The Non-Producers are "buyers" of corn, and Syngenta is properly classified as a "seller" under the statute because Syngenta sold an input (Viptera corn seed) that was used in creating at least some of the harvested corn purchased by the Non-Producers. The Non-Producers cannot escape the statute on the theory that they did not purchase goods *directly* from Syngenta. By its terms, the statute applies "regardless of whether the seller and the buyer were in privity regarding the sale . . . of the goods." Minn. Stat. § 604.101 subdiv. 2(1). And the Reporters' Note makes clear that the statute applies "where, in essence, both the claimant and the party claimed against are in the chain of distribution." *Id.* Reporters' Note. Syngenta is plainly in the chain of distribution for the MIR162 corn that the Non-Producers complain about here.

In addition, contrary to the rationale adopted by the MDL Court, *see* MDL Order 47, the Non-Producers also cannot evade the statute on the theory that Syngenta sold merely corn *seed* whereas the Non-Producers purchased a different "good"—the *harvested corn*. As noted above,

see supra pp. 38-41, prior to the enactment of the statute, Minnesota common law recognized that the ELD applies to claims against the maker of a component part in a finished product. *See St. Paul Fire & Marine Ins. Co. v. Steeple Jac, Inc.*, 352 N.W.2d 107 (Minn. Ct. App. 1984) (suit against maker of gear box incorporated into window washing unit). The statute itself carries over this concept as it expressly defines the "goods" to which the statute applies to include tangible property "regardless of whether that property is incorporated into or becomes a component of some different property." Minn. Stat. § 604.101, subd. 1(c). The Reporters' Note, for example, explains that cinder blocks are a "good" sold by their maker even after a general contractor has incorporated the blocks into a different finished product—a building. *Id.* Reporters' Note, Example 1. Thus, the Non-Producers are "buyers" of any "good" that is "incorporated into" or that is a "component of" the corn they purchased, and that definition plainly includes Viptera seed. Nothing in the text or history of the statute suggests that the Legislature intended to make the statute narrower than the common law rule by eliminating the ELD whenever a purchaser of a final product sues a component manufacturer. As noted above, the Court should not presume that the Legislature intended "to abrogate or modify a common law rule except to the extent expressly declared" in the statute. *Staab*, 813 N.W.2d at 72.

The Non-Producers also cannot escape the statute on the theory that they are not bringing "product defect tort claims." *Cf.* MDL Order 46-47. The statute defines that term to mean "a common law claim for damages caused by a defect in the goods" and provides that "[a] defect in the goods includes a failure to adequately instruct or warn." Minn. Stat. § 604.101 subd. 1(e). Strict liability claims for failure to warn, *see, e.g.*, Non-Class Compl. Count VI, thus fall squarely within the statute. The statute also sweeps more broadly, as the Reporters' Note makes clear that it "encompasses all common law claims for product defects, such as negligence." Minn. Stat. § 604.101 subd. 1(e) Reporters' Note. In context, the statutory reference to product "defects" is

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

best understood to encompass any characteristic that the plaintiff claims has resulted in deficient value of the product. One of the core purposes of the ELD is to protect the law of contract by restricting purchasers to contract remedies (including warranties) for complaints about disappointed expectations in goods. The purpose behind the doctrine thus has nothing to do with whether a claim in negligence meets a particular definition of a product "defect" developed by another body of law (such as products liability). What matters is whether the plaintiff is proceeding in tort for a claim that alleges only disappointed commercial expectations. Here, the crux of the Non-Producers' claim is that corn with the MIR162 trait has diminished *economic value* because it cannot be exported to China. That is a claim for disappointed commercial expectations that is at the heart of the ELD. If a plaintiff seeking to recover for that sort of alleged harm caused by a characteristic of a product could avoid section 604.101 simply by arguing that the characteristic is not a "defect," the statute could be evaded at will. Again, nothing in the text or history of the statute suggests that the Legislature intended to create such a gap in the coverage of the ELD. The "occasion and necessity for the law," the "circumstances under which it was enacted," the "object to be attained," and the "consequences" of Non-Producers' interpretation all suggest that the statute should be read to cover Non-Producers' claims. Minn. Stat. § 645.16(1), (2), (4), (6).[95]

In any event, the Non-Producers' claims also fit within a standard definition of a "product defect claim," because they essentially assert that corn with the MIR162 trait is not fit for its ordinarily intended purpose, which includes exporting it abroad. *Cf.* Minn. Stat. § 336.2-

[95] *Ptacek v. Earthsoils, Inc.*, 844 N.W.2d 535 (Minn. Ct. App. 2014), is not to the contrary. As explained above, *see supra* note 68, in *Ptacek*, the trial court had held that the plaintiffs' negligence claim was not a "product defect" claim under the statute. That holding is not explained, it was not appealed, and it was not even addressed by the Court of Appeals. Instead, taking that ruling as a given, the court merely held that, where a claim fell outside the statute in the context of a sale of goods, there was no residual common law ELD to apply. *See Ptacek*, 844 N.W.2d at 539. That decision provides no guidance as to what qualifies as a "product defect tort claim" under the statute.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

314(2)(c) ("merchantable," goods must be "fit for the ordinary purposes for which such goods are used"). Non-Producers' basic theory is that corn with a GM trait that has not been approved in key export markets is not fit to be treated as fungible U.S. corn. It does not matter that Non-Producers have not expressly couched their claim in terms of fitness of the corn for its ordinary purpose. Again, if labels chosen by a plaintiff controlled, section 604.101 could be evaded by artful pleading. Substance is what counts. And the substance of the Non-Producers' claim is that the corn they bought was deficient because it could not be exported to China.

Arkansas. As noted, *see supra* p. 53, Arkansas has rejected the ELD for strict liability claims involving the purchase of goods. For other claims, the Court should predict that the contractual ELD would apply.

Louisiana. Although Louisiana does not clearly apply the contractual ELD, all Non-Producers' claims in Louisiana (other than strict liability failure to warn) are barred by the Louisiana Products Liability Act ("LPLA"). The LPLA provides the exclusive means in Louisiana for seeking damages from a manufacturer for injuries allegedly caused by a characteristic or quality of a product. *See* La. R.S. 9:2800.52 (LPLA "establishes the exclusive theories of liability for manufacturers for damage caused by their products").[96]

III. Syngenta Did Not Have A Duty To Control The Conduct Of Others To Segregate Viptera From The Corn Supply.

Plaintiffs' negligence claims fail because Syngenta owes no duty to control the way third parties handle a seed like Viptera with unrestricted U.S. approval simply because it has not been

[96] *See, e.g.*, *Jefferson v. Lead Indus.*, 106 F.3d 1245, 1251 (5th Cir. 1997) (applying LPLA to bar "allegations of negligence, fraud by misrepresentation, market share liability, breach of implied warranty of fitness and civil conspiracy" and collecting similar cases barring non-LPLA claims); *Bladen v. C.B. Fleet Holding Co.*, 487 F. Supp. 2d 759, 767 (W.D. La. 2007) ("The plain language and the unique legislative history of the LPLA demonstrate the legislature's intent to make the LPLA the sole vehicle for a suit against a 'manufacturer' [under Louisiana law]."). And as explained below, the Louisiana Non-Class Plaintiffs' failure-to-warn claim fails to state a claim under the LPLA as a matter of law. *See infra* Part VI.B.

27-CV-15-3785
Filed in Fourth Judicial District Court

Hennepin County, MN

approved in China. Courts have uniformly declined to impose liability on a manufacturer for failure to control the way *others* use the manufacturer's safe, non-defective[97] product.

A. The Existence Of Duty Depends On Policy-Based Factors That Limit Liability Regardless Of Foreseeability As A Matter Of Law.

Plaintiffs' claims for negligence rest on the premise that Syngenta can be held liable for failing to control a chain of independent parties involved in growing and distributing corn to ensure that none of them would allow corn grown from Viptera seed to enter the U.S. corn supply. Plaintiffs cannot show that Syngenta had a duty to control the conduct of third parties including growers, grain elevator operators, and exporters who actually commingled Viptera corn into the corn supply. Duty ultimately depends on purely legal policy judgments defining how far liability should extend, and these are fundamentally questions of law for the Court. Courts have consistently rejected similar claims that manufacturers should be liable for controlling the way third parties handle their safe, non-defective products after the point of sale. This Court should similarly reject Plaintiffs' radical theory that Syngenta can be liable in tort for failing to reorganize the entire industry framework for growing, harvesting, shipping, and exporting corn. Plaintiffs' approach would essentially require Syngenta to establish a new system for what they now claim they wanted to do—grow and market a specialty product for export based on the laws of China rather than U.S. standards for fungible U.S. corn.

There is no support in existing law for imposing a duty on a manufacturer like Syngenta to reorganize the way third parties handle the manufacturer's safe, non-defective product. Duty is "an issue for the court to determine as a matter of law." *Larson v. Larson*, 373 N.W.2d 287,

[97] Although Plaintiffs' strict products liability claim alleges that Viptera and Duracade were defective, *see* Class Compl. ¶ 339, Plaintiffs' negligence claim does not depend on any allegation of a defect.

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

289 (Minn. 1985).[98] Contrary to the impression Plaintiffs attempt to create, moreover, merely alleging that the commingling of Viptera in the corn supply and the consequences that might follow for the China market were "foreseeable" is not sufficient to create a duty. *See, e.g.*, *Leeper v. Asmus*, 440 S.W.3d 478, 489 n.5 (Mo. Ct. App. 2014) ("[F]oreseeability alone is not enough to establish a duty. . . . [T]here must also be some right or obligation to control the activity, which presents the danger."); *Hutchings v. Bauer*, 599 N.E.2d 934, 935 (Ill. 1992) ("[D]uty is not to be bottomed on the factor of foreseeability alone. Instead, we must balance the foreseeability of the harm against the burdens and consequences that would result from the recognition of a duty.").[99] As Minnesota courts have put it, "[p]ublic policy is a major consideration in identifying the legal-duty element of a negligence cause of action." *Gutierrez v. Eckert Farm Supply, Inc.*, No. C5-02-1900, 2003 WL 21500161, at *2 (Minn. Ct. App. July 1, 2003). It is the settled "general common law rule [] that no person has a duty to protect another from harm caused by a third party's conduct" absent certain well-defined special relationships with the third party or injured party. *Id.*; *Kirk v. Michael Reese Hosp. & Med. Ctr.*, 513 N.E.2d 387, 398 (Ill. 1987); *see* Restatement (Second) of Torts § 315. And merely manufacturing and selling a product does *not* create any such special relationship.[100] As courts have observed in

[98] *See also, e.g.*, *Marlar v. Daniel*, 247 S.W.3d 473, 476 (Ark. 2007); *Skinner v. State*, 149 So. 3d 342, 347 (La. Ct. App. 2014); *Gaytan v. Wal-Mart*, 853 N.W.2d 181, 192 (Neb. 2014); *Bajwa v. Metro. Life Ins. Co.*, 804 N.E.2d 519, 526 (Ill. 2004); *accord* Dobbs § 164 ("Judges rather than juries determine whether the defendant was under a duty of care at all and if so what standard of care applied.").

[99] *See also, e.g.*, *A.W. v. Lancaster Cty. Sch. Dist. 0001*, 784 N.W.2d 907, 916, 918 (Neb. 2010) ("Simply put, whether a duty exists is a *policy* decision . . . . We expressly hold that foreseeability is not a factor to be considered by courts when making determinations of duty."); *Williams v. Cingular Wireless*, 809 N.E.2d 473, 478 (Ind. Ct. App. 2004) ("Simply because an action may have some degree of foreseeability does not make it sound public policy to impose a duty.").

[100] *See, e.g.*, *First Commercial Trust Co. v. Lorcin Eng'g, Inc.*, 900 S.W.2d 202, 204-05 (Ark. 1995) (no duty on firearm manufacturer to control third parties by restricting its own distribution of firearms absent a special relationship); *Hamilton*, 750 N.E.2d at 1061 (rejecting claim for negligent distribution of firearms by applying rule that "[a] defendant generally has no duty to control the conduct of third persons" absent a special relationship); *Camden Cty. Bd. of Chosen Freeholders v. Beretta U.S.A. Corp.*, 123 F. Supp. 2d 245, 266-67 (D.N.J. 2000) (rejecting similar claim for sale of firearms because "defendants have no duty to control the misconduct of third

Hennepin County, MN

rejecting theories that would require manufacturers to control the conduct of their products' purchasers, "judicial resistance to the expansion of duty grows out of practical concerns both about potentially limitless liability and about the unfairness of imposing liability for the acts of another." *City of Chi. v. Beretta U.S.A. Corp.*, 821 N.E.2d 1099, 1119 (Ill. 2004).[101]

B. Applying These Factors, Courts Routinely Hold That Duty Cannot Be Established To Hold A Manufacturer Liable For Third Parties' Post-Sale Use Of Its Safe, Non-Defective Product.

Based on these principles, courts routinely reject efforts to hold manufacturers responsible for injuries resulting from third parties' post-sale use of safe, non-defective products.

For example, courts reject the theory that a cell-phone retailer can be liable for injuries caused by a buyer using a cell phone while driving. A retailer of a safe, non-defective product "cannot control what people do with the [product] after they purchase [it]," and thus "[i]mposing a duty on [a retailer] to prevent car accidents . . . would effectively require the companies to stop selling cellular phones entirely." *Williams v. Cingular Wireless*, 809 N.E.2d 473, 478–79 (Ind. Ct. App. 2004).[102] Adopting a theory that sellers have "a legal duty to third parties to anticipate

---

parties"); *Bloxham v. Glock, Inc.*, 53 P.3d 196, 199 (Ariz. Ct. App. 2002) (rejecting negligent commercialization claim against firearm manufacturer because "there is no duty to control the conduct of a third party"); *Gourdine v. Crews*, 955 A.2d 769, 783-84 (Md. Ct. App. 2008) (rejecting claim against pharmaceutical manufacturer for negligent sale because "there is no duty to control a third person's conduct"); *Blackton Bldg. Supply Co., Inc. v. Garesche*, 383 So. 2d 250, 251-52 (Fla. Dist. Ct. App. 1980) ("[Plaintiff] cites us to no authority which imposes on a retailer or distributor of a safe non-defective product the duty to oversee its use by a third party *over whose actions the distributor has no control*.") (emphasis added); *Ball v. SGB Constr. Servs., Inc.*, 820 S.W.2d 916, 917 (Tex. App. 1991) (rejecting claim against supplier for failure to provide safeguards because "there is no duty to control the conduct of third persons"); *see also, e.g., W. Innovations, Inc. v. Sonitrol Corp.*, 187 P.3d 1155, 1157, 1159 (Colo. App. 2008) (non-actionable nonfeasance where security company "install[ed] and monitor[ed] [] a burglar alarm system" but "failed to notify the police").

[101] *See also, e.g., J.A.H. ex rel. R.M.H. v. Wadle & Assocs., P.C.*, 589 N.W.2d 256, 258 (Iowa 1999) (existence of a duty depends on "three factors": "(1) the relationship between the parties, (2) reasonable foreseeability of harm to the person who is injured, and (3) public policy considerations"); *Williams*, 809 N.E.2d at 476 ("Indiana courts analyze three factors in determining whether to impose a duty at common law: (1) the relationship between the parties, (2) the reasonable foreseeability of harm to the person injured, and (3) public policy concerns.").

[102] *See, e.g., Durkee*, 765 F. Supp. 2d at 750–51 ("Existing precedent from the appellate courts of North Carolina support the legal conclusion that there is no duty to design or manufacture a product so as to anticipate that a user will misuse the product to harm another."); *Estate of Doyle v. Sprint/Nextel Corp.*, 248 P.3d 947, 951 (Okla. Civ. App. 2010) (no duty for telephone company to "protect [a motorist] from [a cell-phone purchaser's] negligent

27-CV-15-33785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

improper use of their products" would mean that "no product" that could cause harm by others' post-sale use "could be marketed"—allowing similar claims against sellers of "GPS devices and even car radios" to flood the courts and "turn[ing] products liability law on its head." *Durkee v. C..H. Robinson Worldwide, Inc.*, 765 F. Supp. 2d 742, 749 (W.D.N.C. 2011).

Similarly, when municipalities tried to hold makers of cold medicine liable for damages resulting from third parties' use of the medicine in making methamphetamine, the Eighth Circuit dismissed all claims for lack of proximate cause, based on the same policy factors that limit duty. *Ashley Cty., Ark. v. Pfizer, Inc.*, 552 F.3d 649, 663 (8th Cir. 2009) (Arkansas law). Paralleling the arguments here, the plaintiffs argued that even though Sudafed and similar products were FDA-approved, the manufacturer should have "take[n] steps to restrict access to the products," by controlling the way retailers sold the medicine (*e.g.*, keeping it behind the pharmacy counter), and thus should have effectively "channeled" the product away from potential meth cooks. *Id.* at 669. The Eighth Circuit rejected the idea that the manufacturer could be held liable based on how others used the product—and that was true "*even if the manufacturers knew* that cooks purchased their products to use in manufacturing methamphetamine." *Id.* at 670 (emphasis added). The court emphasized that the manufacturer lacked "sufficient control over the retailers . . . [to] require [them] to implement the suggested measures." *Id.* at 671. Ultimately, given public policy concerns limiting "how far society is willing to extend liability"—the same public-policy concerns that inform the scope of duty—the court refused to impose liability on a manufacturer of an otherwise-lawful product based on the way third parties used that product.

---

driving and/or warn of the potential dangers associated with using a cell phone while driving"); *see also, e.g.*, *City of Bloomington v. Westinghouse Elc. Corp.*, 891 F.2d 611, 614 (7th Cir. 1989) (Indiana law) (chemical manufacturer could not be held liable for contamination caused by purchaser's dumping of chemicals because tort law does not impose liability on manufacturers of lawful, non-defective products for claims "arising from the use of their products subsequent to the point of sale").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Id. To do so would open a "Pandora's box to [an] avalanche of actions that would follow" against all sorts of manufacturers for injuries caused by those using their products. *Id.*

Identical principles have also been applied by numerous courts to reject tort claims against gun manufacturers based on theories that the manufacturers should restrict firearms sales by independent retailers so as to limit injuries from the use of guns. These courts have applied the settled rule that a "defendant generally has no duty to control the conduct of third persons so as to prevent them from harming others, even where as a practical matter defendant can exercise such control." *Hamilton v. Beretta, U.S.A. Corp.*, 750 N.E.2d 1055, 1061 (N.Y. 2001). A manufacturer usually has "no control over its retailers[,]" *Lorcin Eng'g, Inc.*, 900 S.W.2d at 204-05, and even where it does, the law does not create a "duty of care born of their purported ability to lessen the risks of illegal gun trafficking because they have the power to restrict marketing and product distribution." *People ex rel. Spitzer v. Sturm, Ruger & Co., Inc.*, 761 N.Y.S.2d 192, 196 (N.Y. App. Div. 2003).[103]

Multiple policy factors all weighed heavily against finding a duty on the gun manufacturers, including the flood of litigation against other industries that could be expected if such a duty were created, *see, e.g., People ex rel. Spitzer*, 761 N.Y.S.2d at 196, and the magnitude of the liability—which would have the practical effect of imposing a policy decision by judicial decree shutting down the sale of an otherwise lawful product.[104]

---

[103] The few cases that declined to reject claims against gun manufacturers as a matter of law involved allegations that the manufacturers knowingly facilitated illegal gun-trafficking or marketed defective or dangerous products. *See, e.g., City of Bos. v. Smith & Wesson Corp.*, No. 199902590, 2000 WL 1473568, at *15 (Mass. Super. Ct. July 13, 2000) (alleged "affirmative conduct" constituting "the creation of the illegal, secondary firearms market").

[104] *Cf., e.g., Martin v. Harrington & Richardson, Inc.*, 743 F.2d 1200, 1204 (7th Cir. 1984) (Illinois law) ("Imposing liability for the sale of handguns, which would in practice drive manufacturers out of business, would produce a handgun ban by judicial fiat in the face of the decision by Illinois to allow its citizens to possess handguns.").

C. These Same Principles Limiting Duty Show That Plaintiffs Cannot Establish A Duty Of Care Here.

The same reasoning shows that Syngenta had no duty here.

First, it makes no sense to impose a duty on a GM seed manufacturer like Syngenta to control the conduct of all those who grow, harvest, process, store, ship, and export corn, because seed manufacturers simply do not control those third parties.[105] The usual approach under tort law is to place the duty "on the person in the best position to avoid the loss." *Turner v. Fehrs Neb. Tractor & Equip. Co.*, 609 N.W.2d 652, 658 (Neb. 2000).[106] Here, as in the pharmaceutical, cell-phone, and gun cases, the manufacturer (Syngenta) has no authority to control how third parties grow corn or handle harvested grain—especially county elevators, terminal elevators, and exporters. Plaintiffs have not even alleged that Syngenta has a contractual relationship with those actors. It is apparent on the face of the complaints that Syngenta has neither the authority nor the expertise to tell those parties how to reorganize their *own* facilities to enable segregation of different types of corn. Those third parties, including the Non-Producers themselves, are in the best position to devise and implement any such system.

Second, the theory that Syngenta had a duty to ensure that *everyone else* isolated Viptera is especially mistaken given that, once Viptera had been approved, it was permissible *by law* for Viptera to be present in U.S. corn because U.S. regulations make no distinction between non-GM corn and GM corn with approved traits. If some growers or handlers wanted to sell or export Viptera-free corn, that was a specialty product distinct from fungible U.S. corn. And the usual background rule is that a person who wants to conduct a specialized or especially sensitive

[105] To the extent Plaintiffs intend to suggest a duty to refrain from selling Viptera *at all* (which is within Syngenta's control), that theory is addressed below. *See infra* Part IV.

[106] *See also, e.g.*, *Abdo v. Trek Transp. Co., Inc.*, 582 N.E.2d 247, 252 (Ill. App. Ct. 1991) ("[W]hen a third party is in the best position to prevent a plaintiff's injury, there is no justification for imposing liability upon [the defendant]."); *Hamilton*, 750 N.E.2d at 1061 (same).

enterprise bears the burden of establishing protections enabling him to do so. *See generally* W. Prosser, The Law of Torts, § 87, at 579 (4th ed. 1971) ("The plaintiff cannot, by devoting his land to an unusually sensitive use, . . . make a nuisance out of conduct of the adjoining defendant which would otherwise be harmless."); *see also, e.g., Belmar Drive-In Theatre Co. v. Ill. State Toll Hwy. Comm.*, 216 N.E.2d 788, 791 (Ill. 1966) ("[A] person cannot increase the liability of his neighbor by applying his own property to special and delicate uses."). For the same reason, the USDA has always taken the view for organic crops—another specialty product—that it is "the responsibility of organic operations" to protect their products' special identity by "manag[ing] the potential contact of organic products with other substances not approved for use in organic production systems."[107]

In fact, the USDA has expressly announced its view that parallel logic dictates that those who want to deal in corn free from approved GM traits should bear the burden of implementing the necessary safeguards to enable them to do so: "conventional growers, similar to organic growers who desire to minimize cross pollination from G[M] corn into their plantings, have the same basic options for avoiding pollination from other corn."[108] Indeed, in response to comments filed during numerous deregulation proceedings for GM traits (including Duracade), the USDA has repeatedly addressed concerns that a GM trait has not yet been approved in desired export markets by placing the onus on grain elevators and grain buyers, not GM manufacturers, to avoid the risk of rejection in export markets:

Hennepin County, MN

> When international acceptance of a specific event has not been attained, ***US elevators and grain buyers*** may either refuse to purchase the grain, or may require that it be diverted to elevators that are solely designated as sources for domestic grain sale.[109]

The Non-Producers' claims are particularly specious since they assert that Syngenta had a duty to ensure that *they themselves* did not commingle Viptera and non-Viptera corn. The Non-Producers could have taken steps to keep Viptera corn out of their elevators, just as Bunge did. *See* Non-Class Compl. ¶ 147. They chose not to, and the law does not make it Syngenta's duty to protect their ability to export a specialized sub-segment of U.S. corn production.[110]

Third, recognizing an unprecedented duty for Syngenta to control the actions of others and imposing liability on Syngenta for those actions would ultimately force this Court to face the impossible task of apportioning responsibility for Plaintiffs' alleged injuries among Syngenta, growers who allegedly allowed cross-pollination, and the multiple elevators along the way who were actually responsible for "commingling" corn—including the Non-Producer Plaintiffs themselves. The Court would then also have to ensure that there was no duplicative recovery among Producer Plaintiffs and Non-Producer Plaintiffs for the same alleged drop in the price of

---

[109] *E.g.*, USDA, *USDA's Response to Public Comments on Syngenta SYN-05307-1 Corn*, 24 (Comment 7), http://www.aphis.usda.gov/brs/aphisdocs/10_33601_rtc.pdf (emphasis added); USDA, *Nat'l Env'tl Policy Act Decision & Finding of No Significant Impact for Bayer CropScience LP Event FG72 Soybean*, 49 (Issue 16), http://www.aphis.usda.gov/brs/aphisdocs/09_32801p_fonsi.pdf; USDA, *Nat'l Env'tl Policy Act Decision & Finding of No Significant Impact for Stine Seed Farm, Inc. Event HCEM485*, 27 (Issue 8), http://www.aphis.usda.gov/brs/aphisdocs/09_06301p_fonsi.pdf. The decision in *Bunge* does not suggest anything to the contrary. *See Syngenta Seeds, Inc. v. Bunge N. Am., Inc.*, 820 F. Supp. 2d 953 (N.D. Iowa 2011). When the *Bunge* court stated that Syngenta "accepted the risk of commercializing Viptera," *id.* at 990, it was addressing an entirely different question (and in the context of a preliminary injunction)—merely explaining that Syngenta took the risk that some purchasers in the free market might decide that they did not want to buy corn with a GM trait like Viptera and they could lawfully refuse to accept Viptera corn. *See id.* (deciding whether Bunge "made a legitimate and reasonable business decision not to accept Viptera corn in order to service the Chinese import market"). The court did not face, and did not address, the entirely different question whether Syngenta had a duty in tort law to police the conduct of others so as to facilitate the ability of third party grain elevators to purchase and sell a specialized product like "Viptera-free" corn.

[110] Plaintiffs assert that Syngenta sought to stop channeling by bringing "a lawsuit against Bunge, a grain elevator operator," for "refus[ing] to accept Viptera corn." Non-Class Compl. ¶ 147; Class Compl. ¶ 136 (same). To the extent Plaintiffs base their claims on that lawsuit, such claims are barred by the First Amendment's Petition Clause. *See, e.g., BE&K Constr. Co. v. NLRB*, 536 U.S. 516, 525–26 (2002) (litigation is protected by the right to petition unless it is objectively and subjectively sham litigation).

corn. The intractable problems courts would encounter in apportioning responsibility in that fashion are one of the reasons for the settled rule that a manufacturer is *not* liable for the conduct of third parties using the manufacturer's product.

Fourth, Plaintiffs' theory would impose extraordinary liability on GM seed manufacturers for alleged ripple effects in the market that have no logical stopping point. *Cf. City of Chi.*, 821 N.E.2d at 1126 (the "magnitude of the burden" placed on defendant is a relevant factor in assessing duty). Plaintiffs' theories would effectively transform GM manufacturers into insurers for their otherwise-lawful, non-defective products—a result flatly at odds with settled principles of tort law.[111] Indeed, according to Plaintiffs, Syngenta owes a duty not only to corn producers and corn non-producers, but also to producers of milo and soybeans because the prices of those crops are allegedly affected (in different ways) by the price of corn. The same allegations could be asserted by retailers of farm equipment,[112] or landowners leasing their land, or anyone else arguing that demand for their products or services is affected by the alleged drop in price for the largest commodity crop in the United States—precisely the open-ended liability that the MDL Court failed to foresee.

Fifth, imposing such liability would effectively put courts in the position of usurping policy determinations concerning which GM traits can and cannot be used in the U.S. As a

---

[111] *See, e.g.*, *Martin*, 743 F.2d at 1204 (rejecting liability that "would virtually make [the manufacturers] the insurer for such products as explosives, hazardous chemicals, or dangerous drugs even though such products are not negligently made nor contain any defects"); *Patterson v. Rohm Gesellschaft*, 608 F. Supp. 1206, 1213 (N.D. Tex. 1985) ("If this unconventional and unfounded theory is accepted, then—contrary to one of the basic principles of products liability—handgun manufacturers would become insurers for all injuries resulting from their products."); *Perkins v. F.I.E. Corp.*, 762 F.2d 1200, 1269 (5th Cir. 1985) (rejecting "[t]he argument that the manufacturer should become an insurer of all uses of those products, both legitimate and illegitimate, simply by virtue of having marketed them").

[112] *See, e.g.*, Abby Wendle, *Pain From The Grain: Corn Belt Towns Languish As Prices Drop*, NPR (Mar. 18, 2015), http://www.npr.org/sections/thesalt/2015/03/18/393841311/pain-from-the-grain-corn-belt-towns-languish-asprices-drop ("When corn prices peaked, Hofreiter sold close to $11 million worth of shiny blue tractors in a single year. He says he doesn't expect to crack $3 million in 2015.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

practical matter, Plaintiffs' theory would shut down the marketing of any GM seed as long as there was a risk of litigation like this one. Halting the introduction of a seed like Viptera, however, would run flatly counter to the policy determination that the USDA made in approving Viptera and the general policy approach the U.S. Government has adopted of treating approved GM products exactly the same as conventional crops.[113]

Indeed, the extensive existing regulation of GM traits strongly counsels against thrusting courts into the role that Plaintiffs' theories would have them adopt. *See, e.g.*, *Young v. Bryco Arms*, 821 N.E.2d 1078, 1090 (Ill. 2004) (fact that sale of firearms is already "highly regulated by law" counsels against judicial creation of additional duties); *Ashley Cty., Ark.*, 552 F.3d at 669 (same for pharmaceuticals). Three federal agencies regulate GM crops, and Syngenta commercialized Viptera only after obtaining unrestricted domestic approval through extensive testing in "at least 119 field trials of MIR162 corn under at least 20 [government] permits" over eight years. Non-Class Compl. ¶ 52.

Plaintiffs' lawsuit is, in effect, an invitation for the courts to become super-regulators, grafting additional obligations onto GM traits without regard to the USDA's decisions by holding that, unless other countries have approved a particular trait, the entire system for growing and distributing corn in the U.S.—or for that matter, soybeans, wheat, or many other crops—should be reorganized to facilitate the desires of a market segment that wants to export to that foreign country. To paraphrase the conclusion of another court in a parallel context, "courts are the least suited, least equipped, and thus the least appropriate branch of government to regulate and micro-manage the manufacturing, marketing, distribution, and sale of" GM seeds.

[113] *Cf. Martin*, 743 F.2d at 1204 (Illinois law) ("Imposing liability for the sale of handguns, which would in practice drive manufacturers out of business, would produce a handgun ban by judicial fiat in the face of the decision by Illinois to allow its citizens to possess handguns.").

27-CV-15-13785

Hennepin County, MN

People ex rel. Spitzer, 761 N.Y.S.2d at 199.

It would be particularly inappropriate for the courts to take on that role given the attention that Congress and state legislatures have given to proposals addressing exactly the subject of this lawsuit—liability of GM seed manufacturers based on the spread of their products. At least six Congresses have considered and failed to enact bills that would have made a "biotech company [] liable to any party injured by the release of a genetically engineered organism into the environment if that injury results from that genetic engineering." *See* App. A-1. Similarly, California eliminated part of a bill that would have made "the manufacturer of a genetically engineered plant . . . liable to any producer, grain, and seed cleaner, handler, or processor injured by the release of that plant into California." Assem. Bill 984, 2005 Leg., Reg. Sess. (Cal. 2005). Minnesota, New York, Nebraska, Massachusetts, Montana, North Dakota, Oregon, West Virginia, and Vermont have all considered and refused to enact similar bills.[114] That legislative activity not only confirms that Plaintiffs' theories are meritless (legislation would be unnecessary if the common law already imposed liability), but also underscores that the task of weighing the public policy implications of liability for GM seed manufacturers is best left to the political branches—all of which have refused to impose the sort of liability that Plaintiffs seek to impose here.

Sixth, and finally, the Court should reject Plaintiffs' proposed expansion of tort law because it would foist a flood of litigation on the courts of Minnesota and other States. As other courts have observed, once a claim is allowed to proceed in a case such as this, the same theories could be brought "against countless other types of commercial enterprises," raising claims about supposed harms from lawful, non-defective products "regardless of the distance between the

'causes' of the 'problems' and their alleged consequences." *People ex rel. Spitzer*, 761 N.Y.S.2d at 203; *Ashley Cty., Ark.*, 552 F.3d at 671-72.

D. The Only Court To Address Parallel Claims Against A Manufacturer Of Another Approved GM Seed Held That Duty Could Not Be Established As A Matter Of Law.

Before the Viptera litigation, only one common law court had addressed the theory that a seed manufacturer could be liable in tort for selling an *approved* GM seed that had not yet been approved abroad.[115] In *Hoffman*, Canadian courts applying the same common law principles that govern this case rejected the exact same claims that Plaintiffs raise here. *See Hoffman I*, 2005 SK.C. LEXIS 330; *Hoffman II*, 2007 SK.C. LEXIS 194. *Hoffman* involved Monsanto's GM canola seed that had been fully approved by the Canadian government for "unconfined release." *Hoffman II*, 2007 SK.C. LEXIS 194 ¶ 60. Alleging cross-pollination, non-GM canola farmers sued to recover (1) losses incurred by organic farmers, whose crops could no longer command a premium organic price, and (2) (in a claim exactly paralleling those asserted here) losses allegedly incurred by farmers due to "loss of the European market for all Canadian canola" because Monsanto launched the product in Canada before getting import approval from the EU. *Hoffman I*, 2005 SK.C. LEXIS 330 ¶¶ 21-22.

The Canadian court rejected the plaintiffs' trespass, nuisance, and negligence claims as a matter of law for lack of duty. It found "no existing judicial or legislative authority" imposing a duty on the manufacturer to prevent lawful GM canola seed from cross-pollinating with other crops by regulating farmers' growing practices. *Id.* ¶ 52. In so holding, the court assumed that cross-pollination was foreseeable, *see id.* ¶¶ 61, 63, but recognized that (as in the U.S.) duty was

[115] *Sample v. Monsanto* involved similar tort claims against a GM seed manufacturer for selling a U.S.-approved GM seed, but the court did not address the general duty analysis because it held that plaintiffs' claims were barred by the ELD. 283 F. Supp. 2d at 1093-94; *see also supra* Part II.A.4.c.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

not governed by foreseeability alone, *see id.* ¶¶ 66–67. As the court explained, there was no relationship giving rise to a duty of care between the GM manufacturer and the plaintiffs. *See id.* In addition, the court concluded that the mere sale of the GM canola seed could not be treated as the cause of plaintiffs' alleged harm, because the harm "required the intervention of neighbouring farmers who cultivated GM canola." *Id.* ¶ 114. Finding that proximate cause was lacking as a matter of law, the court cautioned that the "implications of holding a manufacturer . . . liable in *nuisance* for damage caused by the use of its product . . . by another would be very sweeping indeed." *Id.* ¶ 122 (emphasis added); *see also id.* ¶ 114 (explaining that plaintiffs' theory "would be equivalent to holding the manufacturers of pesticide responsible for the nuisance caused by the harmful drift of the pesticide" after a third party's use of it).

The two prior cases that Plaintiffs cite involving GM seeds, *see, e.g.*, Non-Class Compl. ¶¶ 30-32; Class Compl. ¶¶ 19-21, are irrelevant because both involved the release of *unapproved* traits in violation of governing regulations in factual contexts where the manufacturer still had control. In *StarLink*, the trait was not approved for human consumption, and the government conditioned the limited approval for cultivation by imposing on the manufacturer (Aventis) an "affirmative duty to enforce StarLink farmers' compliance with" restrictions, including segregation from other corn. *StarLink*, 212 F. Supp. 2d at 847. The court held that this duty gave Aventis "some measure of control over StarLink's use" and was a "critical factor" that "negate[d]" the usual "concerns [that] courts have expressed about holding manufacturers liable for post-sale nuisances." *Id.* The court thus reasoned that "[t]he *unique obligations* imposed by the limited registration arguably put Aventis in a position to control the nuisance." *Id.* (emphasis added). There are no similar facts here because Viptera enjoyed unrestricted U.S. approval.

In *Genetically Modified Rice*, the theory of the case was not that the GM manufacturer was responsible for the conduct of *others*; instead, the manufacturer itself (Bayer) had caused the

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

improper release of the unapproved trait when conducting its own field trials. *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d at 1022. Bayer thus violated the USDA's GMO Regulations, which "unambiguously provide performance standards that do not allow adventitious presence of GM material outside the GM plants being tested" before approval is granted. *Id.* Again, there are no similar facts alleged here.

E. The MDL Court Erred In Holding That Syngenta Had A Duty.

The MDL Court is the *only* court that has ever held that a GM seed manufacturer has a duty in tort to restrict commercialization of an *approved* GM trait simply because the trait has not been approved in a foreign country. The MDL Court announced the unprecedented holding that Syngenta owes a duty to run its business "at least in part for the mutual benefit" of others in the corn industry by "exercis[ing] reasonable care in the manner, timing, and scope of . . . commercialization" so as to prevent solely economic harm to other industry participants who would prefer not to have their chosen methods of handling corn disrupted by the presence of a trait with limited exportability. MDL Order 10. That novel duty should not be recognized here.

First, the MDL Court started from the presumption of a "default duty rule" under which everyone owes a duty to avoid foreseeable harm to everyone else and it would be Syngenta's burden to establish an "exception" from that general rule. MDL Order 14. That is not the law. As the MDL Court itself recognized, the presumption of a duty to the whole world is an "alternative" approach adopted in the Restatement (Third) of Torts, which all but a few States have rejected.[116] *See, e.g.*, *Dolin v. SmithKline Beecham Corp.*, 62 F. Supp. 3d 705, 714 (N.D.

[116] *See, e.g.*, *Behrendt v. Gulf Underwriters Ins. Co.*, 768 N.W.2d 568, 574 (Wis. 2009) ("Wisconsin has long followed the minority view of duty set forth in the dissent of *Palsgraf v. Long Island Railroad*."). But even these few jurisdictions like Wisconsin assess policy factors in ultimately determining whether an actionable duty exists. *See, e.g.*, *Nichols v. Progressive N. Ins. Co.*, 746 N.W.2d 220, 225 (Wis. 2008) ("[E]ven if all the elements for a claim of negligence are proved, or liability for negligent conduct is assumed by the court, the court nonetheless may preclude liability based on public policy factors.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Ill. 2014) ("[T]here is no duty to the world at large.").

Second, the Restatement (Third)'s alternative approach that the MDL Court cited is expressly limited to a duty to avoid *physical harm*. *See* Restatement (Third) of Torts: Liab. for Phys. & Emot. Harm § 7(a) ("An actor ordinarily has a duty to exercise reasonable care when the actor's conduct creates a risk of *physical harm*.").[117] The presumption of a duty is flatly inapplicable in these cases, which (as the MDL Court recognized) involve solely allegations of *economic* harm. *See* MDL Order 18-22. As explained above, *see supra* Part II, the ELD should bar Plaintiffs' claims entirely. But even if the Court disagrees on that point, the economic nature of the injury does not drop out of the duty analysis entirely. Evaluating duty involves weighing, *inter alia*, the injury at issue, the burden of placing a duty on the defendant compared to the utility of the defendant's conduct, and administrative difficulties that might arise in enforcing the duty.[118] The economic nature of the injury here has a bearing on all these issues.

Third, the grounds the MDL Court offered to distinguish the consistent line of cases holding that manufacturers do *not* have a duty to control the way third parties use their products is unpersuasive. The MDL Court asserted that in the cell-phone, pharmaceutical, and gun cases, the third parties' conduct was "more culpable" than the conduct here. MDL Order 13. But nothing in the legal analysis in those cases rested on culpability. And culpability does not even work as a factual distinction. Non-producers who commingled Viptera corn are at least as culpable as negligent drivers in the cell-phone cases. Like the cell-phone users, they used a product the way it was intended, but in circumstances where it happened (allegedly) to cause

---

[117] The Restatement (Third) makes clear that it does *not even address* claims, like those here, that involve solely economic harm. *See* Restatement (Third) of Torts: Liab. for Phys. & Emot. Harm § 6 cmt. f ("Liability for breaching the duty of reasonable care addressed in this Section applies *only in cases involving physical and emotional harm* . . . . Cases involving negligence that causes *only economic loss* (that is not property damage or derivative of personal injury) *are not addressed* in this Restatement . . . .") (emphases added).

[118] *See, e.g.*, *Taco Bell, Inc. v. Lannon*, 744 P.2d 43, 46 (Colo. 1987) (en banc); *see also* Dobbs § 255.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

injury. In fact, Plaintiffs' allegations suggest *knowing* violations of the law by Non-Producers that are *more* culpable than mere negligence. Plaintiffs allege that, knowing it was (allegedly) "*inevitable* that Viptera® corn would move into export channels, including China," Class Compl. ¶ 224; Non-Class Compl. ¶ 235, Non-Producers shipped corn containing Viptera to China anyway. That violated Chinese law, which requires importers to obtain a biosafety certificate before importing.[119] Such knowing—or at a minimum, reckless—violations of law are more culpable than distracted driving while using a cell phone.

Fourth, the MDL Court's basis for distinguishing *Hoffman*—the only prior holding directly on point—is also unpersuasive. The MDL Court stated that *Hoffman* rested on Canadian law "that required a sufficiently proximal relationship between the parties," to find a duty. MDL Order 16. But that is no different from American law, which also looks at the relationship between the parties in assessing duty.[120] Moreover, the MDL Court based its entire rationale for finding a duty on the supposed "*relationship between the parties* in an inter-connected market," *id.* at 17 (emphasis added). It thus based a duty on exactly what the *Hoffman* court thought was *lacking* in an identical agricultural market where the spread of an approved GM trait supposedly caused economic harm. The MDL Court provided no rationale for distinguishing *Hoffman*'s diametrically opposed assessment of the significance of any "relationship" between players in

[119] *See* Class Compl. ¶ 177 ("In China, 'Bio-Safety Authorizations' are required for the issuance of shipment-specific 'Bio-Safety Certificates.'"); Chinese Ministry of Agriculture, Implementation Regulations on the Safety of Import of Agricultural Genetically Modified Organisms, arts. 18-19 (Jan. 5, 2002), http://bch.biodiv.org/database/attachedfile.aspx?id=561 (emphasis added); *id.* at art. 18 ("Those who import agricultural GMOs for production or as raw materials for processing *shall obtain the safety certificate of agricultural GMOs* issued by the ministry of agriculture *before signing the contract.*") (emphases added); State Council of the People's Republic of China, Regulations on the Safety Administration of Agricultural GMOs art. 34 (Jan. 8, 2011), http://apps.fas.usda.gov/gainfiles/200106/110681034.pdf ("[T]he introducers or foreign companies must submit the Safety Certificate from the Agricultural Administrative Department of the State Council and relevant approval documents to the Entry-Exit Inspection and Quarantine Department at the border."); *id.* at art. 38 ("[I]f goods arrive without the Safety Certificate . . . the goods will be rejected or destroyed.").

[120] *See generally* Dobbs § 255; *see, e.g.*, *Erickson v. Curtis Inv. Co.*, 447 N.W.2d 165, 169 (Minn. 1989); *DiBiasi v. Joe Wheeler Elec. Membership Corp.*, 988 So. 2d 454, 463 (Ala. 2008). Indeed, the MDL Court itself noted that the "relationship of the parties" is routinely considered as a factor relevant to duty. MDL Order 13.

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

the grain industry at issue there.

The MDL Court thus created an unprecedented new economic tort—what might be termed "tortious commercialization of a product." Under the MDL Court's approach, wherever businesses operate in "an inter-connected market," MDL Order 13, a company can fall under a duty to run its business for the "mutual benefit," *id.* at 10, of others—that is, for the *economic benefit* of others in the industry. Under that duty, the company may be required to delay introducing new products, or to alter the *way* it introduces products, solely because innovations might undermine the *economic* interests of others. The essence of Plaintiffs' complaint is that they have an established way of doing business that involves treating corn as fungible. They do not want new biotechnology products (like GM traits) that have not been approved in overseas markets to be sold in the U.S., because such products force them to a choice: either spend money to alter their methods so that they can keep track of different types of corn, or risk foregoing an export market. Thus, they want to eliminate the threat that technological innovation poses to their business model. This lawsuit is their effort to force Syngenta (and other GM manufacturers) either not to sell seeds with GM traits or to shoulder the cost of creating a system for segregating different types of corn in order to hold Plaintiffs harmless from their own refusal to adapt to technological change in the market. Plaintiffs' radical theory would apply equally to hold a manufacturer liable in "negligence" for marketing a GM corn seed that increases crop yields and thus causes corn prices to drop because of increased supply.[121]

The MDL Court adopted Plaintiffs' vision of tort duties requiring some market players to protect others from the advent of innovative technologies, but that view is literally unprecedented

[121] *See* Robert Holly, *Growing Pains or Gains*, The News-Gazette (Oct. 11, 2015), http://www.news-gazette.com/news/business/2015-10-11/growing-pains-or-gains.html (describing Monsanto's GM seed that would increase the size of corn ears, with some economists cautioning that "increase in yield at the farm level could actually end up reducing producer income because the drop in price may be larger than the increasing quantity").

in American jurisprudence. The ordinary presumption is that, apart from specific, strictly limited economic torts (fraud, tortious interference, negligent misrepresentation, etc.) or violations of statutory antitrust or unfair competition laws, businesses are free to pursue their own advantage in the marketplace—including by introducing disruptive new products that others may find inconvenient for their business plans—without regard for the effects their products might have on the economic positions of others.[122] As the Minnesota Supreme Court has explained, courts are "generally cautious and reluctant to impose a duty to protect between those conducting business with one another." *Funchess v. Cecil Newman Corp.*, 632 N.W.2d 666, 674 (Minn. 2001). Tellingly, the MDL Court did not cite a *single* case finding a duty in tort to operate one's business for the economic benefit of others or to constrain the introduction of innovative products so as to avoid economic disruptions for others.

The MDL Court also failed to acknowledge the sweeping implications of its novel duty. The court's assertion that its new duty "does not involve the possibility of an endless stream of claims by strangers further and further removed from Syngenta's conduct," MDL Order 14, has already been proved wrong—by the claims of *soybean farmers in this case*. Non-Class Compl. ¶¶ 298-99. As noted above, the MDL Court's rationale provides no clear legal rule to distinguish the claims of milo farmers and soybean farmers, who similarly claim that the price of corn affects the price of their crop. *See supra* pp. 24-26, 32-33.

In addition, the MDL Court's novel duty is broad enough to apply—and to turn settled law upside down—in dozens of industries where businesses have "inter-connected relationships" in which they rely on one another for their products to succeed. For example, in the mobile

[122] Indeed, that is the view reflected in the USDA's determination that grain handlers and growers who do not grow GM corn—not GM seed manufacturers—are responsible for implementing measures to minimize the risk that corn grown from a GM seed is not exported to countries where the GM trait is not yet approved. *See supra* pp. 75-76.

27-CV-15-3785

Hennepin County, MN

"ecosystem" where network operators, device manufacturers, app developers, social-media platforms, and other participants rely on one another of the interoperability of their products, the new duty would allow app developers to hold phone manufacturers liable in tort for changing their operating software and causing apps to cease functioning properly (until they adapted their products with new programming). Like Plaintiffs here, the app developers could complain that a phone manufacturer like Apple should have slowed down its rollout of the new operating system or done more to assist them so they could adapt to the new product. The very fact that the MDL Court's theory makes such a claim plausible shows how far it departs from existing law.

F. Plaintiffs' Allegations Do Not Show That Syngenta Voluntarily Undertook A Duty To Isolate Viptera.

Plaintiffs also cannot concoct a duty by claiming that Syngenta voluntarily undertook a duty. Any theory that a duty arose from (1) statements in Syngenta's Deregulation Petition concerning channeling or (2) public statements about Syngenta's role in "stewardship," *see* Class Compl. 3 & ¶¶ 27-35, 51, 305(a)-(b), fails as a matter of law.

First, it is settled that the law "limit[s] liability for the injury in a voluntary undertaking to 'physical harm.'" *Simms v. Jones*, 879 F. Supp. 2d 595, 604 (N.D. Tex. 2012); *see generally* Restatement (Second) of Torts § 323.[123] Plaintiffs allege only "economic harm" supposedly resulting from the loss of the Chinese corn market. *See, e.g.*, Class Compl. 3-4 & ¶ 229; Non-Class Compl. 3-4 & ¶ 240. As explained above, *see supra* Part II.A.3, Plaintiffs' vague assertions that their "corn crops" were "damaged," Non-Class Compl. ¶ 399, and that there was "physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land,"

[123] *See also, e.g.*, *Vancura v. Katris*, 939 N.E.2d 328, 347 & n.6 (Ill. 2010) (liability for a negligently performed voluntary "undertaking is explicit[ly] limit[ed] [] to situations in which the plaintiff has suffered 'physical' or 'bodily' harm," and thus does not extend to "economic damages"); *accord Hatleberg v. Norwest Bank Wis.*, 700 N.W.2d 15, 24 (Wis. 2005); *Theisen v. Covenant Med. Ctr., Inc.*, 636 N.W.2d 74, 82 (Iowa 2001); *Northfield Ins. Co. v. St. Paul Surplus Lines Ins. Co.*, 545 N.W.2d 57, 63 (Minn. Ct. App. 1996); *Shaner v. United States*, 976 F.2d 990, 994 (6th Cir. 1992) (Ohio law).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Class Compl. ¶ 225; Non-Class Compl. ¶ 236, are legal conclusions that must be disregarded and in any event do not allege physical harm as a matter of law. The MDL Court rightly held that indistinguishable allegations failed to assert physical harm. *See* MDL Order 18-22.

Second, Syngenta's statements in its Deregulation Petition are constitutionally protected under the Petition Clause and cannot be the basis for a duty resulting in liability. *See, e.g.*, *TEC Cogeneration Inc. v. Fla. Power & Light Co.*, 76 F.3d 1560, 1573 (11th Cir. 1996).[124]

Third, a voluntary undertaking creates a duty only if it "induce[s] detrimental reliance" that is reasonable. *Doe v. Hunter Oaks Apts., L.P.*, 105 So. 3d 422, 427 (Miss. Ct. App. 2013). *see also, e.g.*, *Daugherty v. Fuller Eng'g Serv. Corp.*, 615 N.E.2d 476, 480 (Ind. Ct. App. 1993) (same); *Chisolm v. Stephens*, 365 N.E.2d 80, 86 (Ill. App. Ct. 1977) (same). But Plaintiffs have not alleged that they detrimentally relied on any statement from Syngenta. They do not claim they would have done anything differently absent some statements from Syngenta. Nor *could* they allege detrimental reliance. To justify reliance, "plaintiff[s] must be unaware of the actual circumstances and not equally capable of determining such facts." *Chisolm*, 365 N.E.2d at 86. The complaints make clear that Plaintiffs knew that cross-pollination and commingling can occur (indeed, Plaintiffs claim it is "*inevitable*," Class Compl. ¶ 224 (emphasis added)), that China had not approved Viptera, and that Syngenta was not attempting to force isolation of Viptera corn. *See, e.g.*, Class Compl. ¶¶ 95, 97-100, 138. Thus, Syngenta's statements "did nothing to prevent plaintiff[s] from obtaining information . . . or from taking precautionary steps on [their] own behalf." *Chisolm*, 365 N.E.2d at 87. That forecloses a claim of reasonable reliance.

[124] To the extent there may be an exception for fraudulent statements in adjudicative proceedings, that exception applies only to statements that were "material, in the sense that they *actually altered the outcome of the proceeding*." *Mercatus Grp., LLC v. Lake Forest Hosp.*, 641 F.3d 834, 843 (7th Cir. 2011) (emphasis added) (collecting cases). As a matter of law, Syngenta's alleged misrepresentations could not have been material to the USDA's decision to deregulate Viptera because the USDA "has no power to regulate the adverse economic effects that could follow [a GM trait's] deregulation." *Ctr. for Food Safety v. Vilsack*, 718 F.3d 829, 841 (9th Cir. 2013).

As the court in *Hoffman* explained in rejecting a parallel argument that Monsanto had undertaken a duty to channel its GM canola seed, "no duty of care arises from a gratuitous undertaking in the absence of some element of detrimental reliance." *Hoffman I*, 2005 SK.C. LEXIS 330 ¶¶ 84-88. The same analysis and result apply here.

IV. As A Matter Of Law, Syngenta Had No Duty To Refrain From Selling Viptera.

A. The Law Does Not Impose A Duty On Manufacturers To Refrain From Selling A Safe, Non-Defective Product Based On How Third Parties Might Use It After The Point Of Sale.

To the extent Plaintiffs claim that Syngenta had a duty to refrain from selling Viptera *at all*, that theory is also meritless. For many of the same reasons that courts refuse to impose a duty on manufacturers to control the post-sale use of a product by others, they also refuse to impose a duty to refrain from selling safe, non-defective products altogether. *See, e.g.*, *Ashley Cty., Ark.*, 552 F.3d at 673; *Bond v. E.I. DuPont De Nemours & Co.*, 868 P.2d 1114, 1120 (Colo. App. 1993) (Teflon manufacturer "had no duty to refrain from selling its [non-defective] product"); *People ex rel. Spitzer*, 761 N.Y.S.2d at 200 (rejecting "a duty upon a manufacturer to refrain from the lawful distribution of a non-defective product").[125] Indeed, in circumstances exactly parallel to those here, Canadian courts in *Hoffman* held that the common law does not impose any duty on a GM manufacturer to refrain from selling a GM seed that is fully approved in the country where it is sold. *See Hoffman I*, 2005 SK.C. LEXIS 330 ¶ 71.

A duty-not-to-sell rule would also thrust the judiciary even more clearly into the role of usurping policy decisions properly left to the political branches. A tort duty prohibiting the sale

[125] *See also, e.g.*, *Williams*, 809 N.E.2d at 478 (refusing to impose a duty on a cell-phone retailer for harm caused by distracted drivers because imposing such a duty "would be akin to making a car manufacturer stop selling otherwise safe cars because the car might be negligently used in such a way that it causes an accident"); *Stanford By and Through Stanford v. Wal-Mart Stores, Inc.*, 600 So. 2d 234, 240 (Ala. 1992) (no duty to refrain from selling a product that was not "inherently dangerous"); *Watters v. TSR, Inc.*, 904 F.2d 378, 381 (6th Cir. 1990) (Kentucky law) ("[W]e are confident that the courts of Kentucky would never permit a jury to say that simply by marketing a parlor game, the defendant violated its duty to exercise ordinary care.").

of Viptera until it had been approved in China would directly conflict with the USDA's determination that Viptera *could* be sold in the U.S. without restriction. It would also give China a veto over which GM traits can and cannot appear in U.S. corn. Indeed, given that the U.S. is the world's largest corn exporter, Plaintiffs' position would give China the power to deny the biotechnology benefits of higher yields and lower prices not only to the United States, but also to much of the rest of the world. Given that China imported *only about one-third of 1%* of U.S. corn production when Viptera was launched, *see supra* note 25, Plaintiffs' theory would mean giving such a biotechnology veto to every country that imported a comparable percentage of any given crop. The common law of tort does not provide the courts with a mechanism for taking over the USDA's role in determining which biotechnology products can and cannot be sold in the U.S. and effectively transferring that decision to foreign sovereigns.

Plaintiffs' theory of duty would also embroil the judiciary in an ongoing flood of policy choices. Courts would have to decide for every significant export crop (1) how to define "key" markets that should be given a veto over the introduction of new biotechnology in the U.S.; (2) how to assess which governments have "functioning regulatory systems" such that they are worthy of being granted that veto power by American courts; and (3) whether changes in a country's circumstances have caused it to lose (or gain) status as a "key" market or a "functioning regulatory system." *Cf.* Nov. 27, 2012 BIO Policy at 4 n.5 ("Since regulatory systems continue to evolve and change globally, countries' systems may become functional or dysfunctional.").[126] Courts simply do not have the experience or expertise to construct and micromanage such a parallel regulatory system governing the introduction of biotechnology products. That is a role for the political branches. *See supra* Part III.C.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

B. Alleged "Industry Standards" Did Not Impose A Legal Duty On Syngenta.

None of the supposed industry standards that Plaintiffs cite creates a legal duty on Syngenta to refrain from selling an approved GM seed simply because the trait has not been approved in a foreign country accounting for exports of about one-third of 1% of the relevant U.S. crop. *See supra* note 25. Plaintiffs point to the BIO Policy's guideline that GM products should not be launched without import approval from "key" export markets with "functioning regulatory systems," as well as advocacy statements by other private trade associations. *See* Class Compl. ¶¶ 25-26; Non-Class Compl. ¶¶ 36-37. Industry customs and standards, however, "may not be used to establish a duty in the first place"; instead, they are only "relevant evidence of the standard of care *after* the law has already recognized a duty of care." *Van Duyn v. Cook-Teague P'ship*, 694 N.E.2d 779, 782 (Ind. Ct. App. 1998) (emphasis added).[127]

The supposed industry standards that Plaintiffs invoke also show that it would make no sense to treat them as binding legal duties. The BIO Policy is an advocacy statement that expressly does not bind member companies and sets nothing more than "general policy statements and recommended processes." 2009 BIO Policy, Ex. D at 1 & n.2. Similarly, other supposed "standards" consist of self-serving statements from different sectors of the grain industry on what industry custom *should* be, conveniently asserting that someone *else* should bear the cost of addressing issues raised by asynchronous approvals in different markets.

Nor can Plaintiffs transform any supposed industry standard they cite into a legal duty not to sell Viptera by claiming that Syngenta *adopted* the standard. *Cf.* Class Compl. ¶ 46.

First, as explained above, the law limits liability for a voluntarily undertaken duty to

[127] *See also, e.g.*, *ServiceMaster of St. Cloud v. GAB Bus. Servs., Inc.*, 544 N.W.2d 302, 307 (Minn. 1996) ("[T]he evidence of industry custom would be relevant as to a standard of care, but did not establish a duty . . . ."); *Fla. Fuels, Inc. v. Citgo Petrol. Corp.*, 6 F.3d 330, 334 (5th Cir. 1993) ("Custom may help define the standard of care . . . , but custom alone cannot create a legal relationship between the parties.").

27-CV-15-33785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

physical harm, not the purely economic harm Plaintiffs allege here. *See supra* Part III.F.

Second, a gratuitous promise cannot create a legal duty absent detrimental reliance. *See supra* Part III.F (collecting cases). Plaintiffs make no allegations showing that they refrained from taking any actions because they were relying on a supposed promise from Syngenta.

Third, a voluntarily undertaken duty is "limited to the extent of the undertaking" and courts "apply a narrow construction" to it. *Bailey v. Edward Hines Lumber Co.*, 719 N.E.2d 178, 184 (Ill. App. Ct. 1999); *see also, e.g.*, *Doe*, 105 So. 3d at 428. A general statement adopting the BIO Policy in 2007 cannot be read as a promise to delay commercialization of Viptera simply because China had not approved it for import. The BIO Policy merely stated in general terms that commercialization should await approval in "key" markets without providing any definition of what makes a market "key." It also specified only the United States, Canada, and Japan—not China—as key export markets. *See* 2009 BIO Policy, Ex. D at 4. At the time Viptera was commercialized, moreover, it is a matter of public record that exports to China accounted for only about one-third of 1% of U.S. corn production. *See supra* note 25. Given the rule of strict construction that would apply to a voluntarily assumed duty, even if Syngenta had promised to abide by the vague standard in the BIO Policy, that could not reasonably be interpreted as a promise to refrain from selling Viptera absent approval from a market such as China.

V. FIFRA Preempts Plaintiffs' Failure-To-Warn Theory Of Liability.

The Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA") expressly preempts Plaintiffs' strict liability failure to warn claims in their entirety as well as Plaintiffs' other claims to the extent they are based on an alleged failure "to adequately warn and instruct farmers on . . . the substantial risk that planting Viptera would lead to loss of the Chinese Market."[128] *See* 7

[128] Class Compl. ¶ 331; *see, e.g.*, *id.* ¶¶ 346-59; Non-Class Compl. ¶¶ 302, 348-60.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

U.S.C. § 136v(b) ("[A] State shall not impose or continue in effect any requirements for labeling or packaging in addition to or different from those required under this subchapter."). FIFRA preempts any state rule—including a common law duty—that satisfies two conditions: (1) "it must be a requirement for labeling or packaging" that (2) "is in addition to or different from those required under [FIFRA]." *Bates v. Dow Agrosciences LLC*, 544 U.S. 431, 444 (2005). Plaintiffs' failure-to-warn theory would impose requirements that trigger both concerns.

First, failure-to-warn claims qualify as seeking to impose "'requirements for labeling or packaging,'" because they purport to "set a standard for a product's labeling." *Id.* at 446. *Second*, Plaintiffs seek to impose state-law requirements that labels must warn of potential economic loss due to trade disruptions, which is plainly "in addition to or different from" FIFRA's requirement that the label need only contain a warning "adequate to protect health and the environment." 7 U.S.C. § 136q(1)(G). Thus, as the MDL Court correctly held, Plaintiffs' theory that Syngenta failed to warn Viptera farmers is preempted because it "seeks to impose a labeling requirement not found among FIFRA's statutory requirements." MDL Order 49; *see Bates*, 544 U.S. at 452; *StarLink*, 212 F. Supp. 2d at 836 ("FIFRA therefore preempts any claims based on the inadequacy of StarLink's label or defendants' failure to warn StarLink farmers.").

VI. Plaintiffs' Strict-Liability Claims Fail As A Matter Of Law.

As noted above, Plaintiffs' strict-liability claims for products liability and failure to warn are both barred by the ELD. *See supra* Part II. In addition to that independent bar, the law also limits strict liability to defects that cause *physical* harm. *See generally* Restatement (Second) of Torts § 388 (limiting liability to "physical harm caused by the use of the chattel"); *see, e.g.*, *Russo v. NCS Pearson, Inc.*, 462 F. Supp. 2d 981, 996 (D. Minn. 2006) (Minnesota law "requires

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

the 'unreasonably dangerous' condition of the product to cause some 'physical harm'").[129] Like their other claims, however, Plaintiffs' strict-liability claims allege only economic injury based on the theory that Viptera and Duracade were "defective" because Plaintiffs allegedly suffered market losses. *See supra* Part II.A.3. Plaintiffs do not and cannot allege that Viptera or Duracade corn seeds (or corn grown from them)—which were approved by the FDA, USDA, and EPA before sale, Class Compl. ¶¶ 36, 55-56—pose a threat of physical harm.

The strict-liability claims also suffer from further claim-specific defects.[130]

A. Minnesota Class Plaintiffs' Products-Liability Claim Does Not Allege Any Defect In The Condition Of Syngenta's Corn Seeds.

To state a products-liability claim, Minnesota Class Plaintiffs must show that (1) the product was in a defective condition unreasonably dangerous to the user, (2) the defect existed when the product left the manufacturer's control, and (3) causation. *Western Sur. & Cas. Co. v. Gen. Elec. Co.*, 433 N.W.2d 444, 447 (Minn. Ct. App. 1988). Plaintiffs fail to satisfy these requirements because they fail to allege any defect.

First, the Class Complaint does not even try to identify *any* defect in the condition of the Viptera and Duracade seeds that Syngenta sold—which alone requires dismissal. *See, e.g.*, *Russo*, 462 F. Supp. 2d at 996 (dismissing Minnesota products-liability claims based on lack of a defect as a matter of law). Products-liability claims are limited to three types of defects—defects in manufacturing, design, or warnings/instructions. *See generally* Dobbs § 452; Restatement

---

[129] *See also, e.g.*, *Mink v. Univ. of Chi.*, 460 F. Supp. 713, 719 (N.D. Ill. 1978) ("[O]ne of the essential elements in a claim for strict liability is physical injury to the plaintiff.").

[130] Both of Plaintiffs' strict-liability claims must be dismissed to the extent that they are based on the theory that Syngenta should have "withdrawn" Viptera and Duracade corn seed from the market. Class Compl. ¶¶ 86, 218-19; Non-Class Compl. ¶¶ 98-99, 229-30. The law has consistently refused to impose a common-law duty to recall on manufacturers. *See, e.g.*, *Hammes v. Yamaha Motor Corp. U.S.A., Inc.*, No. 03-6456, 2006 WL 1195907, at *11 (D. Minn. May 4, 2006) ("[N]o Minnesota case has imposed a duty upon manufacturers to institute a product recall or retrofit[,]" and "other courts have opined that Minnesota would refuse to impose a duty to recall a defective product because the overwhelming majority of jurisdictions have rejected such an obligation.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

(Third) of Torts: Prods. Liab. § 2. Plaintiffs' only attempt to allege a defect is the assertion that "Viptera and Duracade was in a defective condition, unreasonably dangerous to users' property because it is nearly impossible to keep corn containing MIR162 from contaminating non-MIR162-containing corn." Class Compl. ¶ 339. That does not allege anything defective about the condition of the *seeds* Syngenta sold; instead, it focuses on cross-pollination and commingling of planted and grown corn long after the corn seeds have left Syngenta's hands.

That allegation does not assert any manufacturing defect because Minnesota Class Plaintiffs do not allege that any units of Viptera or Duracade seeds failed to meet Syngenta's intended design specifications. *See, e.g.*, *In re Temporomandibular Joint (TMJ) Implants Prods. Liab. Litig.*, 97 F.3d 1050, 1054 n.4 (8th Cir. 1996) (explaining that a "manufacturing defect exists only where an item is substandard when compared to other identical units off of the assembly line"). The ability of corn grown from Viptera and Duracade corn seeds to cross-pollinate and commingle with other corn is also not a design defect. Any design defect theory would amount to the unprecedented proposition that Syngenta was legally obligated to overcome biological fact by developing a corn seed that does not pollinate in the air and on contact. Indeed, the *StarLink* court rejected an identical attempt to treat the susceptibility of corn to cross-pollination and commingling as a defective design. *See StarLink*, 212 F. Supp. 2d at 837-38 (rejecting claim that StarLink corn seed is a "defective product" because "it will inevitably commingle and cross-pollinate" with other corn and explaining that "[t]his constitutes a failure to warn, not a design defect"). To the extent that Minnesota Class Plaintiffs' products-liability claim is based on defective warnings or instructions, that theory duplicates their claim for failure to warn and must be dismissed for the same reasons explained below. *See infra* Part VI.B.

Second, Syngenta is a component-parts manufacturer that cannot be held liable as a matter of law for harm resulting from the way growers used Viptera and Duracade seeds to grow

27-CV-15-13785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

corn or for harm resulting from the way non-producers commingled harvested corn. Under the raw-materials or component-parts doctrine, a manufacturer of a safe, non-defective component is not liable for harm resulting from the integration of the component into another product by other producers if the component manufacturer does not substantially participate in the integration. *See, e.g.*, *In re TMJ Implants Prods. Liab. Litig.*, 97 F.3d at 1056-57. And that is true *even if* the harm that may result from the integration is foreseeable or known to the component-part manufacturer. *See, e.g.*, *id.* at 1057 ("The alleged foreseeability of the risk of the finished product is irrelevant to determining the liability of the component part manufacturer . . . ."). Tort law thus generally does not impose duties on manufacturers of non-defective, safe components to refrain from marketing the component, even where the harm from integration is foreseeable. *See, e.g.*, *id.* ("[I]mposing such a duty would force the supplier to retain an expert in every finished product manufacturer's line of business and second-guess the finished product manufacturer whenever any of its employees received any information about any potential problems."). Applying this principle, courts have held that raw materials for plants—including fertilizer and seeds like Viptera and Duracade—are component parts. *See, e.g.*, *Jorgensen Farms, Inc. v. Country Pride Coop., Inc.*, 824 N.W.2d 410, 419 (S.D. 2012) (fertilizer was a component part where it allegedly contaminated wheat crop with rye); *King v. Hilton-Davis*, 855 F.2d 1047, 1052-53 (3d Cir. 1988) (barring claim against sprout-suppressant manufacturer because suppressant was a chemical used in treating a potato crop and was thus a component part of that crop); *cf. People ex rel. Spiegel v. Lyons*, 115 N.E.2d 895, 898 (Ill. 1953) (holding that the law treats commercially sold seeds as "ingredient[s]" of the crops raised by growers for sale).[131]

[131] As noted above, *see supra* note 93, some of these courts held that the ingredients of plants are component parts of the plant in the analogous context of analyzing the "other property" exception. There is no plausible basis for any different analysis under the component-part doctrine.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Minnesota Class Plaintiffs expressly allege that Syngenta is nothing more than a component-parts manufacturer. They allege that Syngenta manufactured a safe component (Viptera corn seed) and that their economic injuries resulted from the way that component was integrated into another product (harvested corn and, subsequently, supplies of commingled, fungible corn) by later producers (who grew the corn and allowed cross-pollination), and non-producers (who commingled the corn). Under the law, the alleged foreseeability of commingling (which Plaintiffs say is "nearly impossible" to prevent, Class Compl. ¶ 339) does not give rise to a duty on Syngenta not to sell its non-defective, safe component.

Plaintiffs do not and cannot allege that their harm resulted from any flaw in Syngenta's seeds such that these component parts were themselves defective. Under Plaintiffs' allegations, if producers and non-producers had never integrated Viptera and Duracade corn seeds into commodity corn destined for export to a country where those genetic traits were not yet approved for import then Plaintiffs would not have suffered any harm. That is the point of the component parts doctrine. Where the source of the harm is the way the component part is integrated into another product (rather than an underlying defect in the component itself without regard to integration), the component-part manufacturer cannot be held liable. *In re TMJ Prods. Liab. Litig.*, 97 F.3d at 1056. Allowing Plaintiffs to hold Syngenta strictly liable would thus impermissibly "cast [Syngenta] in the role of insurer for any accident that may arise after [Viptera and Duracade corn seeds] leaves [its] hands." *Id.*

B. Syngenta Cannot Be Held Strictly Liable For Failure To Warn.

Plaintiffs allege that Syngenta owed them a duty to warn of "the danger of Viptera and Duracade" and a duty to Viptera and Duracade growers to "give adequate instructions as to the use of Viptera and Duracade." Class Compl. ¶ 355; Non-Class Compl. ¶ 356.

First, as explained above, the theory that Syngenta failed to warn Viptera and Duracade

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

purchasers is preempted by FIFRA. *See supra* Part V.

Second, the component-part doctrine likewise bars Plaintiffs' failure-to-warn claims. *See, e.g.*, *In re TMJ Prods. Liab. Litig.*, 97 F.3d at 1058 ("A failure to warn claim brought against suppliers of multi-purpose components is precluded by the same raw material/component part supplier analysis that forecloses design defect claims."). The law does not require a component-part manufacturer like Syngenta to warn of the risks of an infinite number of circumstances in which Viptera and Duracade seed may integrated into growing crops, storage, commingling, sale, and export—particularly because the integrators (producers and non-producers) have superior knowledge about how they intend to use the seed (and harvested corn) and whether their uses are likely to cause harm. *See, e.g.*, *id.* at 1058-59 (rejecting failure-to-warn claim because allowing it "would be tantamount to charging a component part manufacturer with knowledge that is superior to that of the completed product manufacturer").

Third, as a matter of law, Syngenta did not owe any duty to warn of the obvious risks on which Plaintiffs base their claim. *See, e.g.*, *Drager by Gutzman v. Aluminum Indus. Corp.*, 495 N.W.2d 879, 884 (Minn. Ct. App. 1993) (rejecting failure-to-warn claim because risk was obvious as a matter of law). There is no duty to "warn or instruct regarding risks and risk-avoidance measures that should be obvious to, or generally known by, foreseeable product users." Restatement (Third) of Torts: Prods. Liab. § 2 cmt. j; *see also, e.g.*, *Drager by Gutzman*, 495 N.W.2d at 884 ("[E]ven in the instance of an intended or reasonably foreseeable unintended use, a manufacturer has no duty to warn when the product user is aware of the risk."). Likewise, Syngenta owed no duty to warn corn producers, who are knowledgeable users expected to know about inherent parts of their own business including the biological fact of cross-pollination. *See, e.g.*, *DG&G, Inc. v. FlexSol Packaging Corp. of Pompano Beach*, 576 F.3d 820, 824 (8th Cir. 2009); *Hines v. Remington Arms Co.*, 648 So. 2d 331, 337 (La. 1994). Similarly, Syngenta owed

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

no duty to warn everyone in the industry of the risk of commingling or the risk that China might reject U.S. corn containing Viptera. Plaintiffs themselves assert that the entire industry was aware that Syngenta began commercially selling Viptera, that China had not yet approved that genetic trait for import, and that "[i]t was *inevitable* that Viptera corn would move into export channels, including China and cause trade disruption." Class Compl. ¶ 224; *id.* ¶¶ 22, 74, 93 (alleging that Syngenta was publicly warned of risks by others).

Under Plaintiffs' novel theory, however, Syngenta would be required to identify and warn not only all corn producers and non-producers, but also all milo producers and soybean producers. Plaintiffs' proposed duty to warn has no limiting principle and would apply to any business that allegedly lost revenue because demand for its services or products was affected by the alleged drop in corn prices. There is no basis in the law for creating a duty to warn that follows the never-ending ripple effects of those alleged economic injuries.

VII. Plaintiffs' Trespass-To-Chattels Claims Must Be Dismissed As A Matter Of Law.

Plaintiffs' Non-Class Complaint is insufficient to make out the elements of a claim for trespass to chattels. As relevant here, a trespass-to-chattels claim requires: (1) an action by the defendant that is (2) intentionally directed at plaintiff's chattels; (3) that the plaintiff had ownership or possession of the chattels; and (4) that the defendant's action physically intermeddled with the chattels—that is, that it damaged them by "impair[ing] [them] as to [their] condition, quality, or value." Restatement (Second) of Torts §§ 217, 218. This provision of the Restatement has been adopted in 21 of the 22 states under whose law Plaintiffs have asserted claims.[132] Plaintiffs fail to adequately plead all of these required elements.

[132] *See, e.g.*, *Holt v. Macy's Retail Holdings, Inc.*, 719 F. Supp. 2d 903, 914 (W.D. Tenn. 2010); *McLeodUSA Telecomms. Servs., Inc. v. Qwest Corp.*, 469 F. Supp. 2d 677, 703-04 (N.D. Iowa 2007); *MCI WorldCom Network Servs., Inc. v. W.M. Brode Co.*, 411 F. Supp. 2d 804, 810 (N.D. Ohio 2006); *Terrell v. Rowsey*, 647 N.E.2d 662, 666

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

A. Plaintiffs Fail Adequately To Plead Acts *By Syngenta* Constituting Trespass.

Plaintiffs first fail adequately to allege any action *by Syngenta* that "intermeddled" with their chattels. Plaintiffs do not assert that Syngenta directed Viptera pollen onto Producers' farms or introduced Viptera corn into Non-Producers' grain elevators. To the contrary, Plaintiffs acknowledge that Syngenta's limited role is to sell seeds, primarily to dealers and distributors, who then sell them to farmers. *See* Non-Class Compl. ¶ 9. Plaintiffs' allegations about cross-pollination and commingling of corn that resulted in Viptera corn coming into contact with "the U.S. corn supply," *id.* ¶ 236, plainly describe the conduct of *others*. Thus, Plaintiffs describe pollen drift from farmers' fields, *see id.* ¶¶ 107-08, which presupposes that a farmer has planted Viptera close enough to a neighbor's crops for such drift to occur, *cf. id.* ¶ 127 (complaining that Syngenta did not require farmers to "take measures to prevent such cross-pollination in their own fields"). And as for commingling, Syngenta's conduct is even further removed. Plaintiffs affirmatively allege that corn "from hundreds of thousands of farms is then further commingled as it is gathered, stored and shipped through a system of local, regional and terminal grain elevators." *Id.* ¶ 111. Such local, regional, and terminal grain elevators accomplishing this commingling are, of course, none other than *the Non-Producers themselves*. *See id.* ¶¶ 7-8.

Thus, under Plaintiffs' own allegations, any cross-pollination or commingling that came about from the actions of neighboring farmers who planted Viptera and the actions of the Non-

---

(Ind. Ct. App. 1995); *Poff v. Hayes*, 763 So. 2d 234, 238 (Ala. 2000); *Ark. La. Gas Co. v. Cent. Utils. Constructors, Inc.*, 643 S.W. 2d 566, 567 (Ark. 1982); *Mountain States Tel. & Tel. Co. v. Horn Tower Constr. Co.*, 363 P.2d 175, 178 (Colo. 1961); *Ingram Trucking, Inc. v. Allen*, 372 S.W.3d 870, 872 (Ky. Ct. App. 2012); *Mackie v. Bollore S.A.*, No. 286461, 2010 WL 673295, at *4 (Mich. Ct. App. Feb. 25, 2010); *Mayo Clinic v. Elkin*, Civ. No. 09-322 (DSD/JJK), 2010 WL 760728, at *5 n.12 (D. Minn. Mar. 4, 2010); *McDowell v. Davis*, 235 S.E.2d 896, 900 (N.C. Ct. App. 1977), *abrogated on other grounds, Johnson v. Ruark Obstetrics & Gynecology Assocs., P.A.*, 395 S.E.2d 85 (N.C. 1990); *Sagebrush Res., LLC v. Peterson*, 841 N.W.2d 705, 712-13 (N.D. 2014); *Woodis v. Okla. Gas & Elec. Co*, 704 P.2d 483, 485 (Okla. 1984); *Zapata v. Ford Motor Credit Co.*, 615 S.W.2d 198, 201 (Tex. 1981); *Sotelo v. DirectRevenue, LLC*, 384 F. Supp. 2d 1219, 1229-33 (N.D. Ill. 2005); *ACI Worldwide Corp. v. MasterCard Techns., LLC*, No. 8:14-cv-31, 2014 WL 7409750, at *9-10 (D. Neb. Dec. 31, 2014). Because Louisiana does not recognize the common-law tort of trespass to chattels, Plaintiffs proceed under Louisiana's general "offense and quasi-offense" statute, La. Civ. Code art. 2315. *See* Non-Class Compl. Count 76, ¶¶ 999-1003.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Producers themselves (and other grain elevators and exporters like them) who commingled Viptera and non-Viptera corn. The most the complaint alleges is that Syngenta "knew or certainly should have known" that there was a "very high likelihood" that others might take these actions—an allegation insufficient to suggest any set of facts under which Syngenta itself accomplished any intermeddling. *Id.* ¶ 112. In other words, the complaint is deficient because, given the affirmative allegations about Syngenta's limited role and the intervening conduct of farmers, grain elevators, and others after Syngenta sold Viptera seed, the complaint does not leave open any possible set of facts that might be proved consistent with the pleadings that would put Syngenta in the role of accomplishing any intermeddling. *Cf. Walsh v. U.S. Bank, N.A.*, 851 N.W.2d 598, 602 (Minn. 2014) (describing pleading standard under Minnesota law).

That conclusion is buttressed by abundant precedent holding as a matter of law that a manufacturer cannot be liable in trespass based on the way others use its product post sale. The settled rule is that "[c]ourts do not impose trespass liability on sellers for injuries caused by their product after it has left the ownership and possession of the sellers." *City of Bloomington, Ind. v. Westinghouse Elec. Corp.*, 891 F.2d 611, 615 (7th Cir. 1989); *see also Parks Hiway Enters., LLC v. CEM Leasing, Inc.*, 995 P.2d 657, 664 (Alaska 2000) (seller of fuel not liable for trespass after purchaser leaked fuel into groundwater); *Jordan v. S. Wood Piedmont Co.*, 805 F. Supp. 1575, 1582 (S.D. Ga. 1992) (seller not liable for trespass for contamination when buyer released chemicals).[133] As one court explained in rejecting a claim of trespass against the manufacturer of an herbicide that had drifted onto neighboring farm land when it was being applied, "there is no

[133] *See also Acosta Orellana v. CropLife Int'l.*, 711 F. Supp. 2d 81, 94 (D.D.C. 2010) (dismissing plaintiffs' trespass claim because "nowhere in the amended complaint do the plaintiffs allege, or even remotely suggest, that the CropLife Defendants ever personally sprayed" the fungicide at issue); *Dine v. W. Exterminating Co.*, CIV. A. No. 86-1875-OG, 1988 WL 25511, at *9 (D.D.C. Mar. 9, 1988) (pesticide vendor cannot be held liable in trespass based on later application of pesticide by others, because he did not "directly cause" an invasion of plaintiff's land).

27-CV-15-13785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

authority suggesting that a person who merely sells one item to another person is acting in concert with that person when that person eventually uses . . . the purchased item."[134]

Faced with parallel claims, the *Hoffman* court applied common-law principles to hold that trespass will not lie against a GM seed manufacturer based on claims of cross-pollination, because "much more than 'natural and inevitable forces' must intervene between merely marketing GM [seed] and its arrival on the plaintiffs' land." 2005 SK.C. LEXIS 330 ¶ 131.

More recently, the MDL Court applied precisely the rationale outlined above, holding that "plaintiffs may not state a claim for trespass" under the theory that a seller like Syngenta "knew that [its] product would end up interfering with property of non-purchasers" where "the seller *did not cause the interference itself*." MDL Order 54 (emphasis added). That ruling correctly stated the law and the same result should apply here.[135]

B. Plaintiffs Fail Adequately To Plead Intent.

Plaintiffs also fail to adequately plead intent. Plaintiffs cannot satisfy this requirement by simply repeating the conclusory assertion that Syngenta "knew . . . to a substantial certainty" that intermingling would result if it sold Viptera. Non-Class Compl. ¶ 308. Even if that were true, the Restatement's "substantial certainty" standard is expressly intended to convey the same level of intent that is required for other intentional torts—such as battery—and thus requires a state of mind beyond recklessness. *See* Restatement (Second) of Torts § 217 cmt. c; *id.* § 8A cmt. b & Illus. 2. Even the known possibility that selling Viptera might lead to farmers handling it in a way that allowed cross-pollination and grain elevators commingling it is simply not sufficient to

[134] *Ward v. Ne. Tex. Farmers Co-op. Elevator*, 909 S.W. 2d 143, 150-51 (Tex. App. 1995), *abrogated on other grounds by Envt'l Processing Sys., L.C. v. FPL Farming Ltd.*, 457 S.W.3d 414 (Tex. 2015).

[135] The same rule applies under Louisiana law. Plaintiffs rely on Louisiana's general "offense and quasi-offense" statute, La. Civ. Code art. 2315, but a tort under that provision similarly requires showing that the defendant itself *caused* the alleged harm. *See, e.g.*, *Addison v. Williams*, 546 So. 2d 220, 226 (La. Ct. App. 1989).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

hold Syngenta liable for an intentional tort. That is precisely why the Canadian court in *Hoffman I* held that assertions parallel to those made here could not state a claim for trespass. *See Hoffman I*, 2005 SK.C. LEXIS 330 ¶ 130.

C. Plaintiffs Fail Adequately To Plead That *Their* Corn Suffered Intermeddling.

Plaintiffs' claims also fail because they do not adequately allege that there was any intermeddling with *their corn*—corn that they owned or possessed at the time. Plaintiffs mostly rely on vague allegations of Viptera intermixing with the "U.S. corn supply," Non-Class Compl. ¶ 236, which has nothing to do with their own property. Even in their specific counts, they fail to assert where and how any supposed intermeddling occurred that affected their own property. Instead, they allege only that the trespass occurred "through contamination in fields *and/or* in grain elevators *and* other modes of storage and transport." *E.g.*, Non-Class Compl. ¶ 369 (allegations of Alabama Plaintiffs) (emphases added). The complaint does not assert that any particular Producer (much less *every* Producer) experienced cross-pollination on his land or that any particular Non-Producer (much less *every* Non-Producer) experienced commingling of corn within its facilities. And to the extent Producers generally point to commingling in grain elevators *after* they had sold their corn, in that scenario the Producers no longer owned their corn and certainly lacked possession. They provide no rationale on which such commingling post-sale could be considered commingling with *their* property.[136]

The reason for the lack of any allegations asserting injury to their *own* property is that Plaintiffs' theory of damages has nothing to do with injury to Plaintiffs' own corn from Viptera.

[136] As the MDL Court noted, "one would normally expect growers to have given up their interest in the corn sent to elevators." MDL Order 55. That is fatal for Producers' trespass claims to the extent they are based on commingling *after* a Producer sold his crop to a grain elevator. *See generally* Restatement (Second) of Torts § 217; *see also, e.g.*, *Universal Tube & Rollform Equip. Corp. v. YouTube, Inc.*, 504 F. Supp. 2d 260, 269 (N.D. Ohio 2007) ("To make a claim for trespass, one must have a possessory interest in the property in question.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

As the MDL Court recognized, Plaintiffs rely on a damage-to-the-market theory. MDL Order 55. Their theory is not that their particular corn lost value due to contact with Viptera. Their theory is that *all* U.S. corn lost value due to the generalized presence of Viptera. *See* Non-Class Compl. ¶¶ 281-291. As a result, their complaint omits the critical assertions for pleading a claim of trespass—namely, allegations asserting intermeddling with their *own* property. As the MDL Court recognized, as a matter of law, trespass claims cannot survive where Plaintiffs have not even alleged that "*each* plaintiff suffered contamination of its own corn or other property." MDL Order 56 (emphasis added).[137] On that basis, the trespass claims should be dismissed.

D. Plaintiffs Fail Adequately To Plead That Their Property Was "Impaired" By Any Alleged Intermeddling.

Finally, Plaintiffs have not adequately alleged damage in the form of "impairment" to the "condition, quality, or value" of their property through alleged intermixing with Viptera.[138]

First, because Viptera was fully approved in the U.S., corn intermingled with Viptera corn cannot be said to be "damaged." By law, the USDA definition of yellow corn permitted the presence of Viptera, *see* 7 C.F.R. § 810.402(c), and Viptera corn was treated the same, could be sold the same, and brought the same price as all other U.S. fungible corn.

Second, and more important, Plaintiffs' theory of damage has nothing to do with their particular corn, milo, or soybeans having been mixed with Viptera. They do not claim that it was Viptera in their particular corn, milo, or soybeans that caused them to receive a lower price for their crop. Their complaint is that *all* U.S. corn—whether or not it specifically was mixed with

---

[137] The claims under Louisiana law fail for the same reason. To sustain a claim under La. Civ. Code art. 2315, a plaintiff must retain ownership of the "damaged" property. *See, e.g.*, *Forcum-James Co. v. Duke Transp. Co.*, 93 So. 2d 228, 230 (La. 1957) ("[S]ince we find that the [property] belonged to [a third party] it would seem to necessarily follow that plaintiff is without a right of action").

[138] Actual damage is a required element for trespass to chattels. *See* Restatement (Second) of Torts § 218 cmt. e ("The interest of a possessor of a chattel in its inviolability, unlike the similar interest of a possessor of land, is not given legal protection by an action for nominal damages for harmless intermeddlings with the chattel.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Viptera—suffered a market-wide price drop due to a Chinese boycott. *See* Non-Class Compl. ¶¶ 281-91. Because Plaintiffs' corn brought the same price whether or not it had Viptera in it, Plaintiffs simply cannot make out a claim that physical contact with Viptera somehow changed the "condition or quality" of their corn in a manner causing injury as required for a trespass claim. As the MDL Court recognized in addressing identical allegations, "because a producer or non-producer's corn [allegedly] lost value whether or not it experienc[ed] contamination, any trespass by means of contamination cannot have caused plaintiffs' market injury." MDL Order 57. That defect alone requires dismissing Plaintiffs' trespass claims.

VIII. Plaintiffs Fail to State A Claim For Tortious Interference.

Non-Class Plaintiffs fail adequately to allege multiple elements of their claim for tortious interference with prospective business relations. Specifically, the Plaintiffs fail: (1) to identify any specific business relationships that are the subject of the claim; (2) to allege the requisite injury: that third parties stopped doing business (or refused to do business) with Plaintiffs; (3) to provide any allegations suggesting that Syngenta *intentionally* caused third parties to stop doing business with Plaintiffs; and (4) to identify any *improper means* supposedly used by Syngenta.[139]

A. The Producers Fail Adequately To Allege Specific Prospective Business Relationships.

Plaintiffs' tortious interference claims fail at the outset because the complaint does not identify any "precise business expectancy" that is sufficiently concrete to warrant legal

[139] Non-Class Plaintiffs assert tortious interference claims under the laws of ten States: Alabama, Arkansas, Indiana, Minnesota, Missouri, North Dakota, Oklahoma, South Dakota, Tennessee, and Texas. Each State requires the four elements noted in text. *See e.g.*, *Walter Energy, Inc. v. Audley Capital Advisors LLP*, No. 1131104, 2015 WL 731152, at *5 (Ala. Feb. 20, 2015); *Overturff v. Read*, 442 S.W.3d 862, 867 (Ark. Ct. App. 2014); *Harris v. Gaylord Entm't Co.*, No M2013-00689-COA-R3-CV, 2013 WL 6762372, at *4 (Tenn. Ct. App. Dec. 19, 2013); *Tuffy's Inc. v. City of Okla. City*, 212 P.3d 1158, 1165 (Okla. 2009); *Felsher v. Univ. of Evansville*, 755 N.E.2d 589, 598 n.21 (Ind. 2001); *Trade 'N Post, L.L.C. v. World Duty Free Ams., Inc.*, 628 N.W.2d 707, 717 (N.D. 2001) (tortious interference with business); *Prudential Ins. Co. of Am. v. Fin. Review Servs., Inc.*, 29 S.W.3d 74, 77-78 (Tex. 2000); *Anderson v. Regents of Univ. of Cal.*, 554 N.W.2d 509, 518-19 (Wis. Ct. App. 1996); *Briner Elec. Co. v. Sachs Elec. Co.*, 680 S.W.2d 737, 740 (Mo. Ct. App. 1984).

27-CV-15-3785

Hennepin County, MN

protection. *Country Corner Food and Drug, Inc. v. First State Bank and Trust Co. of Conway, Ark.*, 966 S.W.2d 894, 898 (Ark. 1998). To make out a claim, Plaintiffs "must specifically identify a third party with whom [they had] a reasonable probability of a future economic relationship." *Gieseke ex rel. Diversified Water Diversion, Inc. v. IDCA, Inc.*, 844 N.W.2d 210, 221-22 (Minn. 2014); *see also Gruhlke v. Sioux Empire Fed. Credit Union, Inc.*, 756 N.W.2d 399, 404 (S.D. 2008) (requiring plaintiff to demonstrate "an identifiable third party who wished to deal with the plaintiff"). A general assertion that the plaintiff has had customers in the past and expects to continue doing business is not sufficient. Merely projecting "future business with unidentified customers, without more, is insufficient as a matter of law," as is asserting a general expectation for the "level of business to continue in the future." *Gieseke*, 844 N.W.2d at 221-22; *see also e.g., Forever Green Athletic Fields, Inc. v. Lasiter Constr., Inc.*, 384 S.W.3d 540, 552 (Ark. Ct. App. 2011) (allegations that "are nothing more than a general desire to be able to contract" for business "do not show a specific relationship or expectancy").[140]

To the extent a plaintiff relies on the assertion that existing relationships will continue, moreover, the plaintiff must identify specific parties in those relationships,[141] and identify particular reasons for concluding that business with the same customers will continue. *See Stonebridge Collection v. Carmichael*, 791 F.3d 811, 820 (8th Cir. 2015) (claim failed where plaintiff failed to state "how many reorders a customer typically would place" or "whether its

[140] *See also Gieseke*, 844 N.W.2d at 221 ("[T]he majority of state courts that have considered the issue require the plaintiff to demonstrate the existence of a prospective economic advantage with at least one specific, identifiable third party with which the defendant interfered.") (collecting cases).

[141] *See, e.g., Gold Sci. Consultants, Inc. v. Cheng*, No. 3:07-CV-152, 2009 WL 1256664, at *10 (E.D. Tenn. May 4, 2009) ("Generalized references to third parties simply fail[] to meet the specificity need for this element."); *Playboy Enters., Inc. v. Editorial Caballero, S.A. de C.V.*, 202 S.W.3d 250, 265 (Tex. App.--Corpus Christi 2006, pet. denied) (allegations that defendant "interfered with [plaintiff's] business relations with investors, advertiser, and others" was insufficient where plaintiff "[did] not identify any such contracts"); *Du Page Aviation Corp. v. Du Page Airport Auth.*, 229 Ill.App.3d 793, 171 Ill.Dec. 814, 594 N.E.2d 1334, 1340 (1992) (allegation of expectancy of future economic advantage through business relationships with "others" is insufficient).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

relationship with the reordering customers was long-term"); *Kidd v. Bass Hotels & Resorts, Inc.*, 136 F. Supp. 2d 965, 970 (E.D. Ark. 2000) ("[P]ast business relationships with former customers [are] not sufficiently certain, concrete and definite to establish a cognizable prospective relationship.") (internal quotation marks omitted); *see also* 1A Callmann on Unfair Competition, Trademarks, and Monopolies § 9:11 (4th ed.) ("Past business relationships with former customers are usually not sufficient to establish a cognizable prospective relationship.").

Plaintiffs' allegations fall woefully short of making out a claim on these standards. The sum total of Plaintiffs' allegations is that "Plaintiffs had business relationships and a reasonable expectancy of continued relationships with [unidentified] purchasers of corn." *E.g.* Non-Class Compl. ¶ 374. That is precisely the sort of "bald and conclusory assertion that [plaintiff] had . . . a business expectancy" that fails as a matter of law. *Hunt v. Riley*, 909 S.W.2d 329, 332 (Ark. 1995). Contrary to the MDL Court's suggestion, *see* MDL Order 68, it is not sufficient for a plaintiff merely to identify a class of third parties with whom it expects to do business. That amounts to no more than a "projection of future business with unidentified customers," which is "insufficient as a matter of law." *Gieseke*, 844 N.W. at 221-22. A complaint fails where "there are no specific third parties named in the complaint, only general categories of persons." *Overnite Transp. Co. v. Teamsters Local Union No. 480*, No. M2002-02116-COA-R3-CV, 2004 WL 383313, at *13 (Tenn. Ct. App. Feb. 27, 2004). Especially here, where the master complaint presents solely the claims of four individuals, it is hardly asking much for Plaintiffs to identify at least *one* party with whom they claim a business expectancy. Even if identifying a class of current customers were sufficient, moreover, Plaintiffs would still have to identify some basis for expecting the relationship with that group to continue, which they have wholly failed to do.[142]

[142] The Minnesota Non-Class Plaintiffs' allegations are different on this score. Minnesota Non-Class Plaintiffs

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

B. Plaintiffs Fail To Allege The Requisite Injury: That A Third Party Ended Or Refused To Enter A Business Relationship.

Plaintiffs also fail to allege the requisite injury for tortious interference—namely, that the defendant "induc[ed] or caus[ed] a breach or termination of the relationship or expectancy." *McNeill v. Sec. Ben. Life Ins. Co.*, 28 F.3d 891, 893 (8th Cir. 1994) (applying Arkansas law). Where a plaintiff asserts interference with a *prospective* relationship, he must allege "that the defendant's actions *prevented the relationship from occurring.*" *Texas Disposal Sys. Landfill, Inc. v. Waste Mgmt. Holdings, Inc.*, 219 S.W.3d 563, 590 (Tex. App. 2007) (emphasis in original); *accord Wilkey v. Hull*, 366 F. App'x 634, 638 (6th Cir. 2010) ("Absent some factual allegation that [defendant's actions] *ended or prevented a business relationship*," a plaintiff "does not state a claim.") (emphasis added). In other words, "[a] defendant faces potential liability for intentional interference with business relationships *only* when the interference causes a third person to *discontinue* a business relationship or to *refrain from entering* into a prospective business relationship." *Brown v. CVS Pharm., LLC*, 982 F. Supp. 2d 793, 805 (M.D. Tenn. 2013).[143] That rule is reflected in the black-letter of the Restatement, which explains that

---

allege that their existing business relationships with elevators and exporters were "recorded by contracts, invoices, receipts and other documents *demonstrating a consistent course of sales*" and that Minnesota Non-Class Plaintiffs "reasonably expected to continue selling corn *to such customers*." Non-Class Compl. ¶¶ 313, 314 (emphases added). Non-Class Plaintiffs in other States make no similar allegations of repeat business or consistent course of sales. Even if the Minnesota Non-Class Plaintiffs' allegations were sufficient to survive they highlight the deficiency in the remaining plaintiffs' claims.

[143] This rule is consistently applied across jurisdictions. *See, e.g.*, *Schoedinger v. United Healthcare of Midwest, Inc.*, No. 4:07CV904SNLJ, 2011 WL 97735, at *7 (E.D. Mo. Jan 12, 2011) ("Failing to allege whether such actions caused any identified patient to *terminate* his/her business relationship with the plaintiffs is fatal to the plaintiffs' cause of action.") (emphasis added); *Gold Sci. Consultants, Inc.*, 2009 WL 1256664, at *11 (claim failed because "there is insufficient evidence that Defendants' alleged acts caused either Mr. Twigg or Mr. Winfield *to breach or break* their relationships with Plaintiff" and "Mr. Twigg and Mr. Winfield *did not choose to end their relationships* with Plaintiff") (emphases added); *Cent. Park Prods., Inc. v. Dorel Juvenile Grp., Inc.*, No. 07-5012, 2007 WL 1821308, at *2 (W.D. Ark. June 25, 2007) (dismissing claim because "[p]laintiff has not pled any breach or termination of its relationship or expectancy"); *Erickson's Flooring & Supply Co., Inc. v Tembec, Inc.*, No. 03-74214, 2006 WL 148759, at *8 (E.D. Mich. Jan. 18, 2006) (claim failed where there was no evidence that defendant "actually induced or caused a breach or termination of Plaintiff's business relationships or expectancies"), *aff'd*, 212 F. App'x 558, 566 (6th Cir. 2007); *Reali, Giampetro & Scott v. Soc'y Nat'l Bank*, 729 N.E.2d 1259, 1265 (Ohio Ct. App. 1999) (plaintiff must show that defendant "induce[d] or otherwise purposely cause[d] a third person *not to*

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

liability for tortious interference with a prospective relationship arises only when the interference consists of "(a) inducing or otherwise causing a third person *not to enter into* or *continue* the prospective relation or (b) *preventing* the other from *acquiring* or *continuing* the prospective relation." Restatement (Second) of Torts § 766B (emphases added).

Here, Plaintiffs wholly fail to make the requisite assertion that Syngenta's conduct prevented an expectancy from being realized. Plaintiffs do not allege that buyers of corn stopped doing business with them or refused to deal with them. For the most part, they fail to describe any injury at all, relying instead on the bare, boilerplate assertion that Syngenta "induced or caused a disruption of that expectancy" without any further description. *E.g.* Non-Class Compl. ¶¶ 376, 516, 1166, 1451, 1514, 1762, 1796. The Minnesota Non-Class Plaintiffs, however, make clear that the only "interference" Plaintiffs allege is that Viptera in the corn supply supposedly left Plaintiffs "unable to sell corn at the *price* they reasonably expected to receive." *Id.* ¶ 318 (emphasis added). But it is black letter law that such a complaint about the *terms* of a contract that was realized is not sufficient to state a claim. As explained above, the plaintiff must allege that defendant prevented a business relationship from forming at all. "Merely claiming that [a] contract would have been more advantageous to [Plaintiff] in the absence of Defendants' interference—pleading, in other words, that a contract did not end up being as beneficial as the plaintiff had hoped—does not satisfy the requirement that a business relationship be *prevented.*" *U.S. Enercorp, Ltd. v. SDC Montana Bakken Expl., LLC*, 966 F. Supp. 2d 690, 704 (W.D. Tex. 2013) (emphasis in original).[144] The MDL Court's assertion that a plaintiff could state a claim

---

enter into or continue a business relation with another") (emphases added).

[144] *See also Enercorp*, 966 F. Supp. 2d at 703 ("The Court is unaware of . . . any Texas case in which a contract was consummated but the plaintiff was nevertheless successful on a claim for tortious interference with a prospective business relationship."); *BCD LLC v BMW Mfg. Co.*, 360 F. App'x 428, 436 (4th Cir. 2010) ("A claim for prospective interference cannot stand where the plaintiff is able to consummate a contract with another party. . . . [I]t is irrelevant that a plaintiff could have realized a better deal 'but for' the actions of the defendant . . . .") (South

Hennepin County, MN

by asserting "interference with the expectation of sales *at certain market prices*," MDL Order 72, fails to acknowledge this settled law. The MDL Court did not cite any case supporting its unprecedented conclusion.

Restricting tortious interference to situations in which a relationship has not been realized at all makes sense in light of the greater speculation required to divine the *terrms* parties would have set under hypothetical circumstances. Where an expectancy was not realized *at all*, a court needs to make only a relatively binary determination: the expectancy would have been realized absent the defendant's conduct or not. By contrast, if plaintiffs could state a claim based on the theory that the *terms* would have been better absent defendant's conduct, courts would have to adjudicate a vast new range of speculative assertions about the possible course of negotiations and the terms that "might have been." Plaintiffs' theory highlights that problem, because it would require speculating about what commodity prices for corn (*and* milo *and* soybeans) *would have been* under hypothetical facts. Turning tortious interference into a vehicle for having courts recalculate the market price of various goods any time a plaintiff asserts that someone took some wrongful action supposedly affecting prices would bring the tort a long way from its limited purpose of addressing intentional actions that prevent a plaintiff from securing a business relationship. This Court should not expand the law of Minnesota (and other States) by adopting such a novel extension of the law. *See, e.g.*, *State v. Anderson*, 603 N.W.2d 354, 357 (Minn. Ct. App. 1999) ("[T]he task of extending existing law falls to the supreme court or the legislature . . . ."); *cf. Texas Disposal Sys.*, 219 S.W.3d at 590 (refusing to "expand the doctrine of tortious interference . . . to make actionable conduct that results in *delaying the execution* of a

---

Carolina law); Callman on Unfair Competition, Trademarks & Monopolies § 9:16 ("There is no liability where the plaintiff is able to consummate a contract with another party but could have realized a better deal but for the actions of the defendant; i.e. the plaintiff cannot recover on a theory that the agreement was less profitable to him than it would have been without defendant's interference.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

contract," which made the contract less profitable) (emphasis in original).

C. The Producers Fail To Allege Improper Means.

Plaintiffs also fail adequately to allege that Syngenta accomplished the supposed interference through "improper means"—that is, through means that are "independently tortious or unlawful." *Gieseke*, 844 N.W.2d at 218.[145] "[I]ndependently tortious [] mean[s] conduct that would violate some other recognized tort duty." *Wal-Mart Stores, Inc. v. Sturges*, 52 S.W.3d 711, 713 (Tex. 2001). In connection with their tortious interference claims, Plaintiffs do not specifically allege that Syngenta's conduct amounted to other, specific torts, and for all the reasons explained above, their other efforts to cast Syngenta's conduct as tortious fail.

To the extent Plaintiffs point to supposed misrepresentations about "whether customers would accept Viptera," Non-Class Compl. ¶ 316, such misrepresentations cannot support a claim for tortious interference unless they were directed at preventing third parties from conducting business with Plaintiffs. *See, e.g.*, *Grund v. Donegan*, 700 N.E.2d 157, 161 (Ill. App. Ct. 1998) ("[P]laintiff must allege action by the defendant *directed towards the party with whom the plaintiff expects to do business*.") (emphasis added). But the Plaintiffs do not point to anything of the sort. Supposed misrepresentations to Plaintiffs themselves about what customers would accept or about the pace of Chinese approval, *see, e.g.*, Non-Class Compl. ¶ 182, are irrelevant, because the Plaintiffs do not and cannot allege that those statements were intended to prevent

[145] Courts in Texas, Minnesota, Missouri, North Dakota, and Oklahoma have explicitly required that the alleged interfering act be actionable under a recognized tort or independently wrongful. *See, e.g.*, *Gieseke ex rel. Diversified Water Diversion, Inc. v. IDCA, Inc.*, 844 N.W.2d 210, 219-20 (Minn. 2014); *Wal-Mart Stores, Inc. v. Sturges*, 52 S.W.3d 711, 726 (Tex. 2001); *Trade 'N Post, L.L.C. v. World Duty Free Ams., Inc.*, 628 N.W.2d 707, 720 (N.D. 2001); *Community Title Co. v. Roosevelt Fed. Sav. and Loan Ass'n*, 796 S.W.2d 369, 373 (Mo. 1990) (en banc); *Gaylord Entm't Co. v. Thompson*, 958 P.2d 128, 150 (Okla. 1998). Arkansas, Alabama and South Dakota look to a multifactor test to determine if a defendant's conduct was "improper." *See, e.g.*, *Baptist Health v. Murphy*, 373 S.W. 3d 269, 281-82 (Ark. 2010); *Selle v. Tozser*, 786 N.W. 2d 748, 753 (S.D. 2010); *White Sands Grp., L.L.C. v. PRS II, LLC*, 32 So. 3d 5, 13 (Ala. 2009). Tennessee requires that "the plaintiff demonstrate that the defendant's predominant purpose was to injure the plaintiff" to show "improper" motive or means. *Trau-Med of Am., Inc. v. Allstate Ins. Co.*, 71 S.W.3d 691, 701 n.5 (Tenn. 2002).

Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

counterparties from doing business with Plaintiffs, or that they logically could have that effect.

At bottom, Plaintiffs are trying to treat the lawful sale of a U.S.-approved product, in the U.S. as if it constituted "improper means," and to penalize Syngenta for lawfully pursuing its own economic interests in the marketplace. That is incorrect as a matter of law. The concept of "improper means" is restricted to preserve the ability of actors in a free market to pursue their own economic advantage—that is, to "ensure that fair competition is not chilled." *Gieseke*, 844 N.W.2d at 218.[146] Treating the lawful sale of an approved product as an "improper means" would turn the policy objectives of the law on their head and allow businesses to use tortious interference claims to impair the robust operation of free markets.

D. Plaintiffs Fail Adequately To Allege Intent.

Finally, Plaintiffs fail sufficiently to allege that Syngenta acted with the requisite intent. Even if intent in this context required only that Syngenta "knew to a substantial certainty" that interference with Plaintiffs' business expectancies would result from Syngenta's actions,[147] Plaintiffs have not satisfied that standard. As explained above, the only "interference" that suffices is preventing a business relationship from being realized at all. Plaintiffs do not (and cannot) allege that Syngenta *knew* that would happen; they do not even allege that it *did* happen. And to the extent Plaintiffs erroneously assert that the "interference" was merely causing lower corn prices, Plaintiffs cannot plausibly allege that Syngenta "knew to a substantial certainty" that introducing Viptera would have that effect. At the time Viptera was introduced, China

[146] *See also, e.g.*, *Berger v. Cas. Feed Store, Inc.*, 543 N.W.2d 597, 599 (Iowa 1996) ("A party does not improperly interfere with another's contract by exercising its own legal rights in protection of its own financial interests."); *Companio v. Hawkeye Bank & Trust of Des Moines*, 588 N.W.2d 462, 466 (Iowa 1999) (bank's desire "to improve its own financial condition and improve the service to its client" cannot be "improper means"); *Bridgeway Commc'ns, Inc. v. Trio Broad., Inc. (WBLX Radio Station-93 FM)*, 562 So. 2d 222, 223 (Ala. 1990) (no improper means where "defendants were engaged in lawful competition to increase their own business").

[147] *See, e.g.*, *May v. Countrywide Home Loans, Inc.*, No. 4:07-cv-375-CDP, 2007 WL 1879781, at *4 (E.D. Mo. June 28, 2007).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

accounted for only one third of one percent of corn exports, *see supra* note 25, and Plaintiffs themselves allege that it was not until *two years* after Viptera had been introduced that China first rejected shipments of U.S. corn. Even under Plaintiffs' theory, the supposed effect of Viptera on the market price of corn depended on a highly contingent sequence of events that no one could have known to a "substantial certainty" in advance.

IX. Plaintiffs' Private-Nuisance Claims Must Be Dismissed As A Matter Of Law.

A claim for private nuisance requires that (1) the defendant control or substantially participate in carrying on an activity that (2) unreasonably interferes (3) with another's interest in the private use and enjoyment of his land. *See* Restatement (Second) of Torts § 821D; *see also, e.g., Lethu Inc. v. City of Hous.*, 23 S.W.3d 482, 489 (Tex. App. 2000); *Goforth v. Smith*, 991 S.W.2d 579, 587 (Ark. 1999).[148] Plaintiffs' complaint fails adequately to allege each element.

A. Plaintiffs Fail Adequately To Allege That Syngenta Controlled Or Substantially Participated In the Activity Constituting The Nuisance.

Plaintiffs have not adequately alleged even in a general fashion that Syngenta controlled or substantially participated in carrying on the activity that amounted to the alleged nuisance. It is well settled in similar situations that, because a "seller in a commercial transaction [like Syngenta] relinquishes ownership and control of its products when they are sold," it *cannot*, as a matter of law, be liable for post-sale nuisances allegedly caused by others' use of its products. *See, e.g., Cloverleaf Car Co. v. Philips Petrol. Corp.*, 540 N.W. 2d 297, 300-01 (Mich. Ct. App.

[148] The applicable principles of law are substantially the same in all relevant States, and each State has analyzed nuisance relying on the private nuisance definition in the Restatement (Second) of Torts. *See, e.g., Paulus v. Citicorp N. Amer., Inc.*, No. 12-cv-856, 2014 WL 4557603 (S.D. Ohio Sept. 12, 2014) (Ohio law); *Northern Nat. Gas Co. v. L.D. Drilling, Inc.* 697 F.3d 1259 (10th Cir. 2012) (Kansas law); *Kane v. Cameron Intern. Corp.*, 331 S.W.3d 145 (Tex. App. 2011); *Johnson v. Knox Cty. P'ship*, 728 N.W.2d 101 (Neb. 2007); *Collins v. Barker*, 668 N.W.2d 548 (S.D. 2003); *Lane v. W.J. Curry & Sons*, 92 S.W.3d 355 (Tenn. 2002); *Union Pacific R. Co. v. Reilly Indus., Inc.*, 4 F. Supp. 2d 860 (D. Minn. 1998) (Minnesota law); *Vogel v. Grant-Lafayette Elec. Co-op.*, 548 N.W.2d 829 (Wis. 1996); *Leaf River Forest Prods., Inc. v. Ferguson*, 662 So. 2d 648 (Miss. 1995); *Rassier v. Houim*, 488 N.W.2d 635 (N.D. 1992); *Tipler v. McKenzie Tank Lines*, 547 So. 2d 438 (Ala. 1989); *Pendergrast v. Aiken*, 236 S.E.2d 787 (N.C. 1977).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

1995) ("Because Phillips had no control over what happened to the gasoline after it was delivered, it cannot incur liability as the supplier of the gasoline."); *L'Henri, Inc. v. Vulcan Materials Co.*, Civ. No. 2006-177, 2010 WL 924259, at *6 (D.V.I. Mar. 11, 2010) ("there is no support" for saying that a manufacturer "participated to a substantial extent in carrying on" a nuisance where it, "after the time of manufacture and sale, no longer had the power to abate the nuisance"); *City of Bloomington, Ind.*, 891 F.2d at 614 (dismissing nuisance claim because manufacturer did not "retain[] the right to control the [chemicals it sold] beyond the point of sale").[149] The general rule is that "the absence of a manufacturer's control over a product at the time [an alleged] nuisance is created generally is fatal to any . . . claim" based on post-sale uses of the manufacturer's product. *Traube v. Freund*, 775 N.E.2d 212, 216 (Ill. App. Ct. 2002).

Plaintiffs cannot salvage their claim by arguing that Syngenta participated to a "substantial extent" in the activities giving rise to the nuisance. *See* Restatement (Second) of Torts § 834. Plaintiffs have not alleged that Syngenta either controlled or was substantially involved in the growing and distribution activity of either the farmers or grain elevators who accomplished the supposed cross-pollination and commingling of which Plaintiffs complain. To the contrary, the complaint affirmatively alleges that *others* carried out those activities. Plaintiffs allege, for example, that it is grain elevators like the Non-Producers themselves that commingled

[149] *See also, e.g.*, *E.S. Robbins Corp. v. Eastman Chem. Co.*, 912 F. Supp. 1476, 1494 (N.D. Ala. 1995) (dismissing nuisance claim alleging that chemical supplier was liable for spills that occurred after delivery because it "had no control over the off-loading of product by its carriers or [the plaintiff]"); *Jordan*, 805 F. Supp. at 1583 (rejecting tort claims, including nuisance, alleging that a chemical supplier was responsible for post-sale use of the chemicals that led to contamination); *Tioga Pub. Sch. Dist. No. 15 v. U.S. Gypsum Co.*, 984 F.2d 915, 920 (8th Cir. 1993) (under North Dakota law, manufacturer not liable for nuisance arising from post-sale use of product because "liability for damage caused by a nuisance turns on whether the defendant is in control of the instrumentality alleged to constitute a nuisance, since without control a defendant cannot abate the nuisance"); *Appletree Square 1 Ltd. P'ship v. W.R. Grace & Co.*, 815 F. Supp. 1266, 1274 n.13 (D. Minn. 1993) (after defendant had sold fireproofing, "it no longer controlled the fireproofing and consequently a nuisance action cannot be maintained against it"); *Johnson Cty., Tenn. By & Through Bd. of Educ. v. U.S. Gypsum Co.*, 580 F. Supp. 284, 294 (E.D. Tenn. 1984) ("[A]s an elementary principle of tort law, a nuisance claim may only be alleged against one who is in control of the nuisance creating instrumentality."), *order set aside in part on other grounds sub nom. Johnson Cty., Tenn. v. U.S. Gypsum Co.*, 664 F. Supp. 1127 (E.D. Tenn. 1985).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Viptera corn with other corn. *See, e.g.*, Non-Class Compl. ¶ 111. The most that Plaintiffs allege is that Syngenta supposedly "knew" that there was a "very high likelihood" that cross-pollination and commingling would occur through the actions of others, *id.* ¶ 112, that Syngenta sold Viptera *without* a program in place giving it the ability to control the way others handled the product post-sale, *id.* ¶¶ 135-36, 143, 145, and that Syngenta brought a *failed* lawsuit against Bunge, *id.* ¶¶ 149-52—which actually confirmed that Syngenta could *not* control what grain elevators decided to do with respect to corn grown from Viptera.

The decision in *StarLink* also provides no support for nuisance claims here. The claim in that case survived because of unique circumstances that gave the manufacturer (Aventis) some control over the use of its product (StarLink corn) after the point of sale. *StarLink* recognized the "concerns [that] courts have expressed about holding manufacturers liable for post-sale nuisances." 212 F. Supp. 2d at 847. The "critical" difference "negat[ing]" those concerns was that StarLink had been given only restricted approval by the USDA. The "*unique obligations* imposed by the limited registration" of StarLink issued by the USDA imposed "an affirmative duty to enforce StarLink farmers' compliance with the Grower Agreements" and thus "arguably put Aventis in a position *to control the nuisance*." *Id.* (emphases added). Because there are no similar regulatory obligations here, *StarLink* is wholly inapposite.

In addressing identical private nuisance claims, the MDL Court correctly held that the "general rule" is that "a seller of a product is not liable for a private nuisance caused by the use of that product after it has left the seller's control," and dismissed the claims. MDL Order 59, 61. There is no basis for a different outcome here.

B. Plaintiffs Fail Adequately To Allege Interference With The Use And Enjoyment Of Their *Land.*

The nuisance claims are also fatally flawed because Plaintiffs have not adequately alleged

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

that their injuries arise from an interference with the use and enjoyment of their *land*. Plaintiffs make general assertions about cross-pollination and commingling, but they do not allege those effects took place on every plaintiff's property, *see supra* Part II.A.3, nor do they present a theory of nuisance that depends on such an effect on every plaintiff's property. Instead, they rely on the theory that Syngenta created a nuisance "[b]y contaminating the U.S. corn supply." *E.g.*, Non-Class Compl. ¶ 382 (private nuisance for Alabama plaintiffs); *see also id.* ¶¶ 322, 522, 980, 1145, 1201, 1422, 1459, 1743, 1768, 1801, 2027. Plaintiffs' theory, in other words, is that they can claim a nuisance even if Viptera seed, Viptera pollen, and harvested Viptera corn never came anywhere near their properties. In their view, it is enough that Viptera affected the "corn supply," and that allegedly affected the price of all U.S. corn on the Chicago Board of Trade.

That is incorrect as a matter of law. Private nuisance unequivocally requires interference with the use and enjoyment of *Plaintiffs' land*. *See, e.g.*, *Anderson v. State, Dep't of Nat. Res.*, 693 N.W.2d 181, 185, 192 (Minn. 2005) (beekeepers could not bring a nuisance claim for spraying of pesticide where beekeepers "do not own the land on which they place their hives" and thus "lack[] the requisite property interest" for a private-nuisance claim).[150] That requires allegations of some perceptible, tangible effects on the land. To permit a private nuisance claim to proceed based merely on assertions about the corn supply and a market drop in the price of corn would radically expand the tort, decoupling it from effects on *the land*. Courts routinely reject attempts to expand the tort in that fashion, recognizing that separating nuisance from its connection to the land in order to facilitate claims about manufactured products would result in

[150] *See also Hutchens v. MP Realty Grp.-Sheffield Square Apts.*, 654 N.E.2d 35, 38 (Ind. Ct. App. 1995) (private-nuisance liability requires a "proprietary interest in the land on which [the plaintiff's] injuries occur"); *Hot Rod Hill Motor Park v. Triolo*, 293 S.W.3d 788, 791 (Tex. App. 2009) (rejecting private-nuisance claim where plaintiff did not have a property interest in any of the houses affected by the alleged nuisance); *Culwell v. Abbott Const. Co., Inc.*, 506 P.2d 1191, 1196 (Kan. 1973) (rejecting private-nuisance allegations because "nowhere does it appear that [the plaintiff] was injured in relation to a right which he enjoyed by reason of his ownership of an interest in land").

27-CV-15-33785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

nuisance "becom[ing] a monster that would devour in one gulp the entire law of tort." *Tioga Pub. Sch. Dist. v. U.S. Gypsum Co.*, 984 F.2d 915, 920-21 (8th Cir. 1993).[151] There is no basis for this Court to adopt such a radical expansion of the law.

The MDL Court correctly rejected a nuisance claim on identical allegations. As that court explained, there is no "authority indicating that a landowner may maintain a nuisance claim without any tangible effect on its property," and if such a claim were allowed "then any conduct causing fluctuation in a market for crops would give rise to a nuisance claim." MDL Order 65.

C. Plaintiffs Fail Adequately To Allege Unreasonable Interference.

Lastly, any alleged cross-pollination or commingling of Viptera corn and non-Viptera corn cannot be treated as an *unreasonable* interference with Plaintiffs' use of their land, given that Viptera had unrestricted federal approval to become part of the general corn supply and does nothing inherently harmful to yellow corn. Corn containing Viptera is still fungible yellow corn as defined by the USDA and is marketable at the same price as all other U.S. corn. As explained above, to the extent the Plaintiffs claim that they wanted to produce or transport "Viptera-free corn," they are opting to devote their land and facilities to producing a *specialty* product. But that does not enable them to treat the cultivation of corn meeting ordinary U.S. standards as a nuisance in violation of tort law. To the contrary, it is black letter law that the touchstone for determining what is an "unreasonable" interference depends on "normal uses" of land, and an alleged interference "is not a nuisance if it interferes only with especially sensitive . . . uses" of land. Dobbs § 399; Restatement (Second) of Torts § 821F cmt d & illus. 2. Growing, storing, or transporting exclusively corn that satisfies Chinese standards for international imports rather than

[151] *See also, e.g., Cavanagh v. Electrolux Home Prods.*, 904 F. Supp. 2d 426, 435 (E.D. Pa. 2012) ("Extending the private nuisance doctrine to encompass a products liability claim by a non-neighboring landowner is unsupported by Pennsylvania law or policy.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

U.S. standards applicable in the U.S. constitutes a specially sensitive use of land and cannot support a claim of nuisance against neighboring farmers or anyone else.

The producers here are no different from the organic farmers in *Hoffman I*, in that they claim that they wanted to grow a crop with specialty characteristics, rather than fungible corn that met USDA standards. *Cf. Hoffman I*, 2005 SK.C. LEXIS 330 ¶ 121. The *Hoffman* plaintiffs based their claims upon the loss of the entire European market for *all* Canadian canola, based on the allegation that the commoditized canola market had become tainted. *Hoffman I*, 2005 SK.C. LEXIS 330 ¶¶ 21-22. The *Hoffman* court recognized that a nuisance claim could not survive where it was not alleged that the GM trait at issue "is harmful per se or that it renders the . . . crops unfit for consumption or otherwise harmful." *Id*. ¶ 121. The same reasoning applies here.

X. Plaintiffs' Consumer Protection Claims Must Be Dismissed.

A. Minnesota Statutes §§ 325D.13, 325D.44, & 325F.69

Plaintiffs bring claims for a Minnesota class and individual claims for *all* Plaintiffs under Minnesota's Unfair Trade Practices Act ("MUTPA") and Prevention of Consumer Fraud Act ("MCFA"). Class Compl. ¶¶ 300-27; Non-Class Compl. ¶¶ 326-47. They also assert Minnesota class claims under the Minnesota Deceptive Trade Practices Act ("MDTPA"). Class Compl. ¶¶ 300-27. These claims all fail as a matter of law for the following reasons.

1. Plaintiffs' Allegations Cannot Support Applying MUTPA And MCFA To The Individual Claims Of Non-Minnesota Residents.

As a threshold matter, Plaintiffs have not adequately alleged any basis for applying MUTPA and MCFA extraterritorially to the individual claims of non-Minnesota residents.

For a state consumer protection statute to be applied to transactions and injuries *outside* the State, three hurdles must be crossed: (1) the statute must apply extraterritorially under state law; (2) the State must have sufficiently significant contacts with the plaintiffs and their

27-CV-15-13785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

transactions for applying its laws to comport with due process; and (3) ordinary choice-of-law rules must warrant applying the State's law. *See In re St. Jude Med., Inc.*, 425 F.3d 1116, 1120-21 (8th Cir. 2005); *see also Cruz v. Lawson Software, Inc.*, Civ. No. 08-5900, 2010 WL 890038, at *7 (D. Minn. Jan. 5, 2010) ("*St. Jude* . . . provides that a Minnesota statute must both be subject to extraterritorial application ***and*** able to be applied under the constitutional analysis and choice of law test before it can be applied to a nationwide class.") (emphasis in original). As the MDL Court recognized, Plaintiffs cannot cross any of those hurdles. *See* MDL Order 103.

First, MUTPA and MCFA cannot apply extraterritorially as a matter of state law. The Minnesota Supreme Court has never applied them extraterritorially, *see St. Jude*, 425 F.3d at 1121, and Minnesota adheres to "the general rule which limits the operation of statutory law to the state of its enactment." *In re St. Paul & K.C. Grain Co.*, 94 N.W. 218, 225 (Minn. 1903); *see Olson v. Push, Inc.*, Civ. No. 14-1163, 2014 WL 4097040 ADM/JJK, at *2 (D. Minn. Aug. 19, 2014) ("Minnesota law does impose a presumption against the extra-territorial application of state law."). Applying that principle, the MDL Court (the only court that has addressed the issue) correctly ruled that MUTPA and MCFA do not apply extraterritorially. MDL Order 99.

Decisions applying these statutes to non-residents, *see Mooney v. Allianz Life Ins. Co. of N. Am.*, 244 F.R.D. 531 (D. Minn. 2007), provide no precedent for extraterritorial application here. In *Mooney*, for example, the court conducted no analysis of extraterritorial application, and under the facts of that case extraterritorial application was not required. The sole defendant was a Minnesota corporation that had allegedly distributed fraudulent materials from Minnesota, and every putative class member had entered into a contract with the Minnesota defendant. This case is wholly different. Only one of six defendants is located in Minnesota, *see* Non-Class Compl. ¶ 9, and as explained below, Plaintiffs do not allege that the Minnesota entity (Syngenta Seeds) was the source of the allegedly deceptive practices. In fact, Plaintiffs do not allege any

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

interactions with Syngenta Seeds at all. Their claims are based on statements that Syngenta Defendants made to *other* people *outside* Minnesota that supposedly encouraged sales of Viptera *outside* Minnesota that allegedly harmed Plaintiffs *outside* Minnesota. There is no precedent for applying Minnesota statutes in such a case. *Cf. Friedman v. Dollar Thrifty Auto. Grp.*, Civ. Act. No. 12-cv-02432-WYD-KMT, 2013 WL 5448078, at *6 (D. Colo. Sept. 27, 2013) (dismissing consumer protection claim because statute did not apply extraterritorially).

Second, Plaintiffs' allegations fail to establish any basis for allowing Minnesota law to apply to non-resident Plaintiffs consistent with the Due Process and Full Faith and Credit Clauses.[152] "For a State's substantive law to be selected in a constitutionally permissible manner, that State must have a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." *Allstate Ins. Co. v. Hague*, 449 U.S. 302, 312-13 (1981); *see also Phillips Petrol. Co. v. Shutts*, 472 U.S. 797, 818 (1985). Such contacts were found in *Mooney* where the sole defendant was incorporated and headquartered in Minnesota, the allegedly fraudulent materials were "created and distributed . . . from Minnesota," and every putative class member had purchased an annuity from the Minnesota defendant and remitted payments to Minnesota. *Mooney*, 244 F.R.D. at 535. Given the importance in the due process analysis of the parties' expectations, the fact that every class member interacted directly with the Minnesota defendant was particularly significant in *Mooney*. *See id.*; *see also Shutts*, 472 U.S. at 822 ("When considering fairness . . . an important element is the expectation of the parties.").

None of those facts is present here. As noted, only one of six defendants is in Minnesota

[152] Both a constitutional analysis and a choice-of-law analysis are required because it is well settled that "[s]tate consumer-protection laws vary considerably, and courts must respect th[o]se differences rather than apply one state's law to sales in other states with different rules." *In re St. Jude*, 425 F.3d at 1120 (quoting *In re Bridgestone/Firestone, Inc.*, 288 F.3d 1012, 1018 (7th Cir. 2002)).

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

and Plaintiffs do not allege that it was the nerve center setting Syngenta's policies. Instead, they affirmatively allege that Syngenta AG, the Swiss parent, exercises an "unusually high degree of control" over *all* the subsidiaries, who "do not function independently but under the Syngenta AG umbrella." Non-Class Compl. ¶¶ 19, 21. While Syngenta's U.S. corn seed business is based in Minnesota, the Complaint itself alleges that it was the Swiss parent that directed decisions about commercializing Viptera. *Id.* ¶ 18. Those allegations, taken as true for purposes of this motion, establish that decisions relevant to Plaintiffs' claims did not emanate from Minnesota.

The supposedly deceptive statements on which Plaintiffs rely also confirm a lack of significant contacts with Minnesota. For example, Plaintiffs point to the statement of Syngenta AG CEO Michael Mack in an earnings call, but Mack participated in that call from *Switzerland* as CEO of a *Swiss* company.[153] Similarly, Plaintiffs complain of misleading statements in Syngenta's Deregulation Petition. But that was prepared and filed by Syngenta Biotechnology, Inc., a Delaware corporation with its principal place of business in North Carolina, and it was submitted to a government agency office in Maryland and made public on a government website.[154] Addressing parallel allegations, the MDL Court correctly concluded that they failed to allege any statements that were "made in or distributed from Minnesota." MDL Order 100.

Non-Minnesota Plaintiffs, moreover, had no contacts with Minnesota. They complain about statements primarily made outside Minnesota to others outside Minnesota, that supposedly encouraged farmers primarily outside Minnesota to buy more Viptera, which allegedly harmed Plaintiffs outside Minnesota when the price of corn dropped. Nothing in that chain of events could create an "expectation" that Minnesota law might apply to *all* non-residents' consumer

[153] *See* 2012 Q1 Trading Statement (Apr. 18, 2012) ("Basel, Switzerland"), http://www.syngenta.com/global/corporate/en/news-center/events-and-presentations/Pages/1stquarter2012.aspx.
[154] *See* Syngenta Biotechnology, Inc., Petition for Determination of Nonregulated Status for Insect-Resistant MIR162 Maize (Aug. 31, 2007), http://www.aphis.usda.gov/brs/aphisdocs/07_25301p.pdf.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

complaints against all six Syngenta Defendants. *Shutts*, 472 U.S. at 822.

Given Plaintiffs' failure to describe any significant aggregation of contacts with Minnesota, their "allegations are not enough to invoke Minnesota law" under the Due Process and Full Faith and Credit Clauses. *Murphy v. DirecTV, Inc.*, No. 2:01-cv-06465, 2011 WL 3325891, at *3-4 (C.D. Cal. Feb. 11, 2011).

Third, it follows *a fortiori* that Minnesota law also cannot be applied under Minnesota's own choice-of-law principles. *See Jepson v. Gen. Cas. Comp. of Wis.*, 513 N.W.2d 467, 469 (Minn. 1994) (preliminary step in a choice-of-law analysis is to "consider whether the law of both states can be constitutionally applied"). As explained above, *see supra* pp. 15-16, Minnesota's choice-of-law rules would not point to Minnesota law for non-residents' claims because the activities giving rise to their claims did not take place primarily in Minnesota, the alleged injuries did not occur in Minnesota, and each Plaintiff's home State will have a strong interest in applying its own laws to its residents' claims.[155] *See Jepson*, 513 N.W.2d at 470-71.

2. MUTPA And MCFA Do Not Apply Because The Direct Purchasers Of Syngenta's Goods Are Merchants.

Plaintiffs cannot assert claims under Minnesota's consumer protection laws because the direct purchasers of Syngenta's goods are *merchants*, not consumers. "[T]he Minnesota consumer protection statutes do not apply to a merchant." *Marvin Lumber & Cedar Co. v. PPG Indus., Inc.*, 401 F.3d 901, 920 (8th Cir. 2005).[156] Merchants are defined as "entities that deal in goods of the kind or otherwise by occupation hold themselves out as having knowledge or skill

[155] *See Pilgrim v. Universal Health Card, LLC*, 660 F.3d 943, 946 (6th Cir. 2011) ("[T]he state with the strongest interest in [consumer protection lawsuits] is the State where the consumers—the residents protected by *its consumer*-protection laws—are harmed by it.") (emphasis in original); *cf. Tyler v. Alltel Corp.*, 265 F.R.D. 415, 427 (E.D. Ark. 2010) ("States tend to be jealous of their right to protect their own citizens in consumer transactions.").

[156] *See also Securian Fin. Grp., Inc. v. Wells Fargo Bank N.A.*, Civ. No. 11-2957 (DWF/HB), 2014 WL 6911100, at *6 (D. Minn. Dec. 8, 2014) ("Courts examining MCFA and MUTPA claims have indeed distinguished between 'merchants' and consumers.").

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

peculiar to the practices or goods involved," *Solvay Pharm., Inc. v. Global Pharm.*, 298 F. Supp. 2d 880, 887 (D. Minn. 2004), or entities who purchase a good "for the purpose of reselling it," *Ly v. Nystrom*, 615 N.W.2d 302, 310 (Minn. 2000). The relevant question is whether the direct purchaser of the defendant's products is a merchant in the context of the goods that were sold. *See Pugh v. Westreich*, No. A04-657, 2005 WL 14922, at *3 (Minn. Ct. App. Jan. 4, 2005).

Here, the direct purchasers of Syngenta's goods (corn seed) plainly qualify as merchants. Dealers and distributors, by definition, purchase seed to resell it and thus are merchants. *See Solvay*, 298 F. Supp. 2d at 887 ("wholesalers" and "distributors" are merchants "as they are entities that deal in goods of the kind"). Similarly, the growers to whom Syngenta sells directly are merchants because they "deal in goods of the kind" by purchasing the corn seed, growing the corn, and selling the corn to grain elevators and other buyers. Because the direct consumers of Syngenta's seeds qualify as merchants, it is black-letter Minnesota law that Plaintiffs' claims under the MUTPA and MCFA must be dismissed.[157] *See, e.g.*, *Pugh*, 2005 WL 14922, at *3.

3. MUTPA And MCFA Claims Fail For Lack Of Public Benefit.

Plaintiffs' MUTPA and MCFA claims also fail because they will not "benefit[] the public." *Ly*, 615 N.W.2d at 314 ("[T]he Private AG Statute applies only to those claimants who demonstrate that their cause of action benefits the public."). A public benefit will be found only "when the plaintiff seeks relief primarily aimed at altering the defendant's conduct," *Buetow v. A.L.S. Enters., Inc.*, 888 F. Supp. 2d 956, 961 (D. Minn. 2012), which typically requires seeking injunctive relief and always requires the relief to be forward-looking. *See id.*

---

[157] The MDL Court declined to decide this question as a matter of law, *see* MDL Order 97, even though Minnesota courts have made similar merchant determinations on the pleadings, *see, e.g.*, *Pugh*, 2005 WL 14922, at *3. Such a decision is especially appropriate here because there can be little doubt that corn producers "deal in goods of the kind" when it comes to corn seed. *See Tisdell v. ValAdCo*, Nos. C0-01-2054 *et al.*, 2002 WL 31368336, at *10 (Minn. Ct. App. Oct. 16, 2002) ("operators of large commercial farms" are not consumers); *Huntting Elevator Co. v. Biwer*, No. C9-98-548, 1998 WL 747170, at *2 (Minn. Ct. App. Oct. 27, 1998) (corn "producer acted as a merchant in selling his grain products to the grain elevator").

27-CV-15-33785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Plaintiffs fail that test because they seek solely "compensatory damages and attorneys' fees."[158] Class Compl. ¶ 326; Non-Class Compl. ¶ 347. That relief would benefit Plaintiffs, but not the public. *See Zutz v. Case Corp.*, No. Civ. 02-1776 (PAM/RLE), 2003 WL 22848943, at *4 (D. Minn. Nov. 21, 2003) ("Plaintiffs seek only compensatory damages. Where recovery is sought for the exclusive benefit of the plaintiff, there is no public benefit."). Nor can Plaintiffs claim this relief would put a stop to ongoing misrepresentations, because they have not alleged any ongoing misrepresentations. *Cf. Collins v. Minn. Sch. of Bus., Inc.*, 636 N.W.2d 816, 820 (Minn. Ct. App. 2001). The only misrepresentations Plaintiffs allege concern the timing of China's approval, *see, e.g.*, Class Compl. ¶ 305, and China has since approved MIR162. As the MDL Court correctly recognized, claims based on these alleged misrepresentations "would not serve a public benefit and are therefore subject to dismissal." MDL Order 95.

4. MDTPA Does Not Apply To Claims For Compensation For Past Harms.

Plaintiffs' MDPTA claim must be dismissed because MDPTA "provides only injunctive relief" "limited to those persons 'likely to be damaged by a deceptive trade practice.'" *Dennis Simmons, D.D.S., P.A. v. Modern Aero, Inc.*, 603 N.W.2d 336, 339 (Minn. Ct. App. 1999) (quoting Minn. Stat. § 325D.45, subd. 1). MDPTA claims fail where, as here, there is no claim that future deceptive acts will cause *future harm*. *See, e.g., Four D, Inc. v. Duthland Plastics Corp.*, No. 01-cv-2073, 2002 WL 570655, at *4 (D. Minn. Apr. 15, 2002); *Damon v. Groteboer*, 937 F. Supp. 2d 1048, 1070 (D. Minn. 2013) ("The [M]DTPA provides relief from future damage, not past damage."). Plaintiffs fail to state a claim because their MDPTA allegations all refer to past conduct and harm. *See, e.g.*, Class Compl. ¶ 304 (alleging misrepresentations "*were* likely to cause and/or *did* cause confusion and mistake") (emphases added); *id.* ¶¶ 305-07

[158] Although Plaintiffs suggest "injunctive . . . relief *may* be available," Class Compl. ¶ 327, they do not specify what conduct they want enjoined nor do they mention injunctive relief in their requests for relief, *see id.* at 85-86.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

(alleging Syngenta made false misrepresentations concerning China's approval of Viptera, which was granted in 2014); *id.* ¶ 321 (alleging Syngenta's actions "*caused* a likelihood of confusion") (emphasis added). Moreover, Plaintiffs merely assert that "injunctive . . . relief *may* be available" without indicating what the Court should enjoin, *see, e.g.*, *id.* ¶ 327 (emphasis added), and do not mention an injunction in their requests for relief, *see id.* at 85. Because Plaintiffs fail to articulate any actual forward-looking relief they seek, their MDTPA claim must be dismissed.

B. Illinois Consumer Fraud And Deceptive Business Practices Act

As "non-consumer[s]" of Syngenta's products, Plaintiffs lack standing under the Illinois Consumer Fraud and Deceptive Business Practices Act ("ICFA") because they have not alleged a "consumer nexus." *Thrasher-Lyon v. Ill. Farmers Ins. Co.*, 861 F. Supp. 2d 898, 912 (N.D. Ill. 2012). A "consumer nexus" requires showing, among other things, "how defendant's particular [action] involved consumer protection concerns; and . . . how the requested relief would serve the interests of consumers." *Id.* (citation omitted). Plaintiffs cannot meet either requirement.

The term "consumer" in the ICFA means "any person who purchases . . . merchandise not for resale," Ill. Comp. Stat. 505/1(e), meaning "the ultimate buyers of the finished product," *Williams Elecs. Games, Inc. v. Garrity*, 366 F.3d 569, 579 (7th Cir. 2004). A corn farmer who purchases Viptera seed is not a consumer "because his only use of the purchased product is as an input into the making of a product that he sells." *Id.* Grain elevators, exporters, and others along the distribution chain are also not consumers because they purchase corn "for resale in the ordinary course of [their] trade or business." Ill. Comp. Stat. 505/1(e). Thus, Plaintiffs' theory that Syngenta's conduct lowered the overall price of corn falls outside the scope of the ICFA because it means that "the ultimate buyers" (*i.e.*, consumers of corn) paid *less* for corn than they would have absent Syngenta's actions. *See Speakers of Sport, Inc. v. ProServ, Inc.*, 178 F.3d 862, 868 (7th Cir. 1999) (rejecting ICFA claim because "allow[ing] the seller to obtain damages

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

. . . . when no consumer has been hurt is unlikely to advance the consumer interest").

Nor would Plaintiffs' requested relief serve consumers' interests. Plaintiffs seek damages on behalf of individual commercial corn growers and attorneys' fees. ¶¶ Non-Class Compl. ¶¶ 923-34. Because "none of these requests would benefit [consumers] in the least," Plaintiffs "do not have statutory standing to bring this claim." *Prescott v. Argen Corp.*, No. 13-cv-6147, 2014 WL 4638607, at *7 (N.D. Ill. Sept. 17, 2014).

The MDL Court erroneously held that corn farmers qualify as consumers of Syngenta's seeds. *See* MDL Order 107-08 (citing *Sluis v. Nudelman*, 34 N.E.2d 391 (Ill. 1941)). *Sluis* held that, under the tax statute at issue, seeds sold to farmers qualified as property transferred "for use or consumption and not for resale" because the farmer sold vegetables, not seeds. 34 N.E.2d at 392. But a more recent version of that tax statute clarified that when "property as an ingredient or constituent goes into and forms a part" of a product that is later sold, it qualifies as property transferred for resale. *People ex rel. Spiegel v. Lyons*, 115 N.E.2d 895, 898 (Ill. 1953). Under this version of the law, which more closely parallels the ICFA test for consumers,[159] the Illinois courts held that seeds sold to farmers who then sell their crop ***do*** qualify as property transferred for resale and are *not* transferred "for use or consumption." *See id.* at 898.

C. Nebraska Consumer Protection Act

Plaintiffs have failed to plead a violation of the NCPA, which "expressly exempts certain activities of heavily regulated businesses." *Hage v. Gen. Serv. Bureau*, 306 F. Supp. 2d 883, 889-90 (D. Neb. 2003). The NCPA exemption requires that the "*actor* comes within the jurisdiction of some regulatory body" and that the act "was at least indirectly approved." *Wrede v. Exch. Bank of Gibbon*, 531 N.W.2d 523, 529-30 (Neb. 1995) (emphasis added). This

[159] Under the ICFA, "the business purchaser is not a consumer, because the only use of his purchased product is as an input into the making of a product that he sells." *Williams Elecs. Games*, 366 F.3d at 579.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

exception "is broader than federal preemption, and applies to all conduct regulated by federal agencies." *In re ConAgra Foods Inc.*, 908 F. Supp. 2d 1090, 1104 (C.D. Cal. 2012).

Syngenta's GM seed traits come under the jurisdiction of several federal agencies, including the USDA. Non-Class Compl. ¶ 47. And as the Complaints make clear, "[t]he USDA approved Viptera for sale in 2010" and Duracade in 2013. Non-Class Compl. 2, 4; Class Compl. 1-3; *see In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d at 1015 n.2 (USDA's deregulation of a GMO "allow[s] it to be sold commercially").[160] In addition, the USDA considered and rejected alternatives to full deregulation, including partial deregulation that would impose geographic restrictions on where the products could be planted and isolation distance requirements for Duracade.[161] Syngenta's conduct therefore falls within the NCPA's exemption.[162] *See ConAgra*, 908 F. Supp. 2d at 1104 (food mislabeling claim fell within NCPA exemption because FDA has regulatory authority over food labels).

D. North Carolina Unfair And Deceptive Trade Practices Act

Plaintiffs also fail to establish standing under NCUTPA. That statute "was enacted to protect consumers" and only "extend[s] to businesses in appropriate contexts." *Williams v. Charlotte Copy Data, Inc.*, 591 S.E.2d 598, at *2 (N.C. Ct. App. 2004). Namely, "one business is permitted to assert an [NCUTPA] claim against another business only when the businesses are competitors (or potential competitors) or are engaged in commercial dealings with each other" or

---

[160] *See also* USDA, *Nat'l Envt'l Policy Act Decision and Finding of No Significant Impact, MIR162 Maize*, 5 (April 12, 2010) (recognizing that deregulation would allow commercialization), http://www.aphis.usda.gov/brs/aphisdocs2/07_25301p_com.pdf.

[161] *See* USDA, *Nat'l Envt'l Policy Act Decision and Finding of No Significant Impact, MIR162 Maize*, 5 (April 9, 2010), http://www.aphis.usda.gov/brs/aphisdocs2/07_25301p_com.pdf; USDA, *Final Environmental Assessment, Syngenta Company Petition for Determination of Nonregulated Status of SYN-05307-1 Rootworm Resistant Corn*, 40-41 (Jan. 2013), http://www.aphis.usda.gov/brs/aphisdocs/10_33601p_fea.pdf.

[162] The MDL Court did not consider the fact that the USDA not only approved Viptera and Duracade for sale, but also chose not to impose requirements on the manner of sale and growing, such as geographic restrictions or isolation distances. *See* MDL Order 110. This decision by the USDA suffices as the "indirect[] approv[al]" necessary for Syngenta's conduct to fit into the NCPA's exemption. *Wrede*, 531 N.W.2d at 530.

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

the conduct giving rise to the cause of action has a negative effect on the consuming public. *Food Lion, Inc. v. Capital Cities/ABC, Inc.*, 194 F.3d 505, 520 (4th Cir. 1999); *see Williams*, 2004 WL 193887, at *3; *Pleasant Valley Promenade v. Lechmere, Inc.*, 464 S.E.2d 47, 54 (N.C. Ct. App. 1995). The MDL Court mistakenly held that North Carolina law does not impose such restrictions. *See* MDL Order 111. But less than a month later, a federal court in North Carolina, drawing on multiple North Carolina decisions, reaffirmed exactly the restrictions Syngenta has explained: "When there is no business, competitive, or consumer relationship between two business entities a business tort only 'affects commerce' where the defendant's actions have a negative effect on the consuming public." *Exclaim Mktg., LLC v. DirecTV, LLC*, ___ F. Supp. 2d ___, 2015 WL 5773586, at *6 (E.D.N.C. Sept. 30, 2015).

Syngenta (a company that sells seed) does not compete with the Producers or Non-Producers, and Plaintiffs do not allege that they are engaged in commercial dealings with Syngenta. Moreover, Plaintiffs have not alleged that Syngenta's actions *harmed* the consuming public; instead, under their theory, Syngenta's actions produced lower corn prices for consumers. *See Exclaim Mktg.*, 2015 WL 5773586, at *7 (no harm to consuming public where defendant's actions "had a net positive effect on plaintiff's clients"). "The [NCUTPA], therefore, cannot be used here because there is no competitive or business relationship that can be policed for the benefit of the consuming public." *Food Lion*, 194 F.3d at 520.

Even if Plaintiffs had standing under the NCPA, their claims must be dismissed to the extent they are based on alleged misrepresentations because they do not allege reliance. *See Tucker v. Boulevard At Piper Glen LLC*, 564 S.E.2d 248, 251 (N.C. Ct. App. 2002). The MDL Court dismissed claims under the NCUTPA on exactly this basis. *See* MDL Order 115.

E. North Dakota Unlawful Sales Or Advertising Practices Act

Plaintiffs have not stated a claim under North Dakota's Unlawful Sales Or Advertising

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Practices Act because that law is limited to "deceptive or fraudulent acts [made] 'in connection with the sale' of merchandise." *Benz Farm, LLP v. Cavendish Farms, Inc.*, 803 N.W.2d 818, 825 (N.D. 2011). None of the misrepresentations alleged here was made in connection with the sale of merchandise. The Deregulation Petition was submitted to a government agency three years before any Viptera sales. *See* Non-Class Compl. ¶¶ 55-56. Plaintiffs also erroneously rely on (1) statements made to investors (not consumers) in an earnings call, *id.* ¶ 184; (2) a biosafety certificate request form that Producers would have no reason to see (if ever) until *after* they had purchased Syngenta's product,[163] *id.* ¶ 188; and (3) a fact sheet targeted to Producers already "experiencing the advantages of Agrisure Viptera,"[164] *id.* ¶ 190. These statements cannot support a claim because they "were not made to [consumers], nor were they made 'in connection with the sale or advertisement of any merchandise.'" *Thimjon Farms P'ship v. First Int'l Bank & Trust*, 837 N.W.2d 327, 338 (N.D. 2013).[165]

F. South Dakota Consumer Protection Act

Plaintiffs' SDCPA claims must be dismissed because Plaintiffs have failed to plead reliance. *See Nygaard v. Sioux Valley Hosps. & Health Sys.*, 731 N.W.2d 184, 198 (S.D. 2007). Plaintiffs do not allege that they heard or received the alleged misrepresentations or that the alleged misrepresentations caused them to act. Without such allegations, the SDCPA claims fail as a matter of law. *See Nygaard*, 731 N.W.2d at 198; *Rainbow Play Sys., Inc. v. Backyard Adventure, Inc.*, 2009 WL 3150984, at *7 (D.S.D. Sept. 28, 2009).

---

[163] The Bio-Safety Request Form's stated purpose is "to assist Recipient in obtaining required authorization for shipments containing [Syngenta's] Corn Product(s) into China," http://www3.syngenta.com/country/us/en/agriculture/Stewardship/Documents/Biosafety-Certificate-Request-Form.pdf.

[164] Plant with Confidence, http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf.

[165] With the exception of the fact sheet, the MDL Court correctly held that none of these statements was made in connection with the sale of merchandise for purposes of the North Dakota statute. *See* MDL Order 115-16. With respect to the fact sheet, the MDL Court erred. On its face, that document is nothing more than an update to growers who had *already purchased* Viptera to instill confidence "in your option for marketing and selling your grain." Plant with Confidence, http://www.syngenta-us.com/viptera_exports/images/Agrisure-Viptera-Fact-Sheet.pdf.

G. Texas Deceptive Trade Practices Act

The Producer Plaintiffs lack standing for a TDTPA claim because they do not qualify as consumers. *See, e.g.*, *AdvoCare Int'l, LP v. Ford*, No. 05-10-00590-CV, 2013 WL 505210, at *2 (Tex. App. Feb. 5, 2013). A "consumer" must have "sought or acquired goods or services by purchase or lease" ***and*** "the goods or services purchased or leased must form the basis of the complaint." *Id.* (citing *Cameron v. Terrell & Garrett, Inc.*, 618 S.W.2d 535, 539 (Tex. 1981)). As Plaintiffs' allegations make clear, the Complaint is based on Syngenta's decision to commercialize Viptera, Non-Class Compl. 2-3, and the Producer Plaintiffs do not allege that they purchased that product.

Even if some Producer Plaintiffs had standing to bring a TDTPA claim, the TDTPA claims brought by all Plaintiffs must be dismissed because Plaintiffs failed to allege that they "relied on the misrepresentation to [their] detriment." *McLaughlin, Inc. v. Northstar Drilling Techs., Inc.*, 138 S.W.3d 24, 30 (Tex. App. 2004) (citing Tex. Bus. & Com. Code § 17.50(a)(1)). The Complaint does not allege that Plaintiffs received the misrepresentations, let alone relied on them. The claim thus fails as a matter of law. *See Bailey v. Smith*, No. 13-05-085-CV, 2006 WL 1360846, at *11 (Tex. App. May 18, 2006).

CONCLUSION

For the foregoing reasons, the First Amended Non-Class and First Amended Minnesota Class Action Master Complaints for Producers and Non-Producers should be dismissed with prejudice.

APPENDIX A:
FEDERAL AND STATE LEGISLATIVE PROPOSALS TO ADDRESS LIABILITY FOR GM CROPS

Jurisdiction	Year(s)	Legislation
Federal (U.S. Congress)	2002 2003 2005 2008 2010 2011	Genetically Engineered Organism Liability Act, H.R. 4816, 107th Cong. 2d (2002), H.R. 2919, 108th Cong. 1st (2003), H.R. 5271, 109th Cong. 2d (2005), H.R. 6637 § 203(a), 110th Cong. 2d (2008), H.R. 5579 § 203(a), 111 Cong. 2d (2010), H.R. 3555 § 203(a), 112th Cong. 1st (2011) (failed bills that would have made "biotech compan[ies] [] liable to any party injured by the release of a genetically engineered organism into the environment if that injury results from that genetic engineering")
California	2005	Assem. B. 984, 2005 Leg., Reg. Sess. (Cal. 2005) (eliminated bill provision that would have made "the manufacturer of a genetically engineered plant . . . liable to any producer, grain and seed cleaner, handler, or processor injured by the release of that plant into California")
Hawaii	2014	S.B. 2737 § 2, 27th Leg. Sess. (Haw. 2014) (bill that would have required GM manufacturer to provide certain minimum notice to purchasers of the "possible legal and environmental risks")
Massachusetts	2003	S.B. 1912 (Mass. 2003) (voted-down bill that would have held GMO manufacturers liable in tort for damages caused by use of their products)
	2001	S.B. 1789 (Mass. 2001) (similar)
Minnesota	2000	HF 3820, 81st Leg. (Minn. 2000) (failed bill to make manufacturers liable for "[a]ny transfer of genetic material from a growing crop of an agriculturally related GMO to a growing crop of nongenetically modified plant organisms, whether by cross pollination or other means" that results in "diminishe[d] value" of the crops)
Montana	2005	S.B. 218, 2005 Leg. Reg. Sess. (Mon. 2005) (failed proposal to make "manufacturer[s] liable for injury suffered by any party because of the release of genetically engineered wheat into Montana")

27-CV-15-3785
Filed in Fourth Judicial District Court
11/9/2015 8:39:52 PM
Hennepin County, MN

Jurisdiction	Year(s)	Legislation
Nebraska	2000	L.B. 959 § 3, 96th Leg., 2d Reg. Sess. (Neb. 2000) (failed bill that would have established liability for "[t]he transfer of a genetically engineered trait from a genetically engineered growing crop, by cross pollination or other means, to a growing crop which is not genetically engineered")
New York	2013	Assem. Bill 6509 § 1, 236th Leg. Sess. (N.Y. 2013) (failed bill that would have made "[a] manufacturer of genetically engineered plants, planting stocks, or seeds . . . liable to any person for any damages . . . due to cross-contamination caused by the manufacturer's products," including "market price reductions incurred by farmers resulting from loss of crop exports, including foreign and domestic markets")
North Dakota	2005	S.B. 2235, 2005 Leg. Reg. Sess. (N.D. 2005) (voted-down bill "to establish liability related to the planting of genetically engineered wheat")
Oregon	2013	H.B. 2736 § 3, 77th Leg. Assem. (Or. 2013) (failed bill that would have made GM manufacturers liable in "private nuisance if the release causes the presence of the plant on property owned or occupied by a person who did not intend for the plant to be present on the property")
Vermont	2006	S. 18, 2006 Leg., Reg. Sess. (Vt. 2006) (vetoed bill that would have allowed farmers to sue GMO seed manufacturers for economic damage caused by cross-contamination)
West Virginia	2013	H.B. 2207, 81st Reg. Sess. (W. Va. 2013) (failed bill that would have made a "biotech company [] liable to any party injured by the release of a genetically engineered organism into the environment if that injury results from that genetic engineering")

TABLE OF AUTHORITIES iv

INTRODUCTION 1

FACTS 2

I. Syngenta created the risk of harm to Plaintiffs 3

II. The harm to Plaintiffs was foreseen by Syngenta 5

III. Syngenta was fully capable of implementing legitimate stewardship and channeling 8

IV. Syngenta undertook stewardship obligations 8

V. Syngenta embarked on a campaign of false statements in commercializing Viptera 9

VI. Plaintiffs suffered both physical and economic harm 11

ARGUMENT 12

I. Legal standard 12

II. Minnesota law applies 13

A. The Non-Class Complaint alleges facts and asserts claims warranting application of Minnesota law 14

B. Minnesota's choice-of-law factors favor Minnesota law 16

C. Minnesota's consumer laws may be constitutionally applied to the claims of all Plaintiffs, regardless of location 18

D. Plaintiffs have alleged facts warranting application of Minnesota law to the common-law claims, regardless of each Plaintiff's residence 19

III. The economic loss doctrine does not bar Plaintiffs' claims 20

A. Syngenta misstates the ELD's narrow scope 21

B. The SELD applies in limited circumstances not present here 22

C. Applying the SELD would not serve the doctrine's underlying purposes 26

1. The contract-based policy rationale does not apply 26

2. The reasonable-limitations rationale is not served by applying the SELD 28

3. Special-relationship considerations do not warrant applying the SELD 30

D. Syngenta misreads the MDL Order 32

E. The relevant states would not apply the ELD here 34

F. The ELD does not bar Producer Plaintiffs' claims because they have adequately pled harm to property 55

G. The ELD does not bar Non-Producer Plaintiffs' claims 57

H. The ELD does not apply to claims seeking damages related to soybeans 62

IV. Syngenta owed a duty to Plaintiffs 64

A. Syngenta's conduct created the foreseeable risk of harm to Plaintiffs 64

B. Alternatively, Syngenta voluntarily undertook a duty 74

C. Foreseeability and public policy support finding a duty 78

1. Syngenta's cases are inapposite 78

2. This is not an exceptional case warranting a no-duty determination 81

3. Public policy should not be adjudicated absent a factual record 88

V. FIFRA does not preempt Plaintiffs' claims 89

VI. Plaintiffs' have adequately pled their duty to warn claims 90

VII. Plaintiffs sufficiently allege claims for tortious interference 93

A. Plaintiffs adequately allege business relationships that Syngenta harmed 94

A. Plaintiffs adequately allege injury 98

B. Plaintiffs sufficiently allege improper means or wrongful conduct 100

C. Plaintiffs adequately allege intent 103

VIII. Plaintiffs have adequately pled their consumer-protection claims 104

A. Minnesota Statutes sections 325D.13, 325D.44, and 325F.69 apply 104

B. This Court may constitutionally hear Non-Class Plaintiffs' MUTPA and MCFA claims against Syngenta 105

C. Syngenta cannot escape liability by mislabeling Plaintiffs as merchants 108

D. Plaintiffs have sufficiently pled a public benefit 109

CONCLUSION 122

INTRODUCTION

This Court should deny Syngenta's Motion to Dismiss. A complaint need only contain a "short and plain statement" showing an entitlement to relief. Minn. R. Civ. P. 8.01; *see also Walsh v. U.S. Bank, N.A.*, 851 N.W.2d 598, 601 (Minn. 2014) ("This language from Rule 8.01 has remained the same since we adopted the rule in 1951.").

Remarkably, despite 166 pages of text, Syngenta's brief does not even mention the applicable pleading standard. Instead, Syngenta deluges the Court with citations to federal decisions (143 in total) for which different, more stringent pleading standards apply. Perhaps more remarkably, the majority of Syngenta's cited cases were decided either on summary judgment on a full evidentiary record (128 in total) or after a full merits trial (58 in total). Those cases, which obviously had very different procedural postures than this case, do not trump Judge Lungstrum's reasoned decision in the federal MDL in Kansas, which soundly rejected the same arguments Syngenta recycles here.[1]

In addition, Syngenta all but ignores *Walsh*. Syngenta buries that case deep in its principal brief and relegates it to a single citation (on page 119) without any discussion. But *Walsh* governs the outcome here because the Minnesota Supreme Court rejected the more stringent federal pleading standard established in *Iqbal* and *Twombly*. The Court held, as it has for decades, that Minnesota law permits "'pleading of events by way of a broad general statement which may express conclusions rather than, as was required under code pleading, by a statement of facts sufficient to constitute a cause of action.'" *Walsh*, 851 N.W.2d at 602 (quoting *N. States Power Co. v. Franklin*, 265 Minn. 391, 394-95, 122 N.W.2d 26, 29 (1963)).

---

[1] Granting Syngenta's motion would lead to an anomalous result where the plaintiffs in the Kansas MDL are permitted to proceed with fact discovery while Plaintiffs here (who have asserted, in many respects, identical claims) are not.

The Complaints here satisfy the pleading requirements of Rule 8.03, as interpreted by *Walsh*. In fact, they would satisfy any standard.

Syngenta is also wrong on the substantive law. As Judge Lungstrum concluded, Syngenta's principal argument—that Plaintiffs' claims are barred by the economic loss doctrine—is without merit. Syngenta's attempt to expand the ELD to apply to strangers to the contractual transactions between Syngenta and Viptera purchasers is a bridge too far and is simply untrue to the policy rationale behind the doctrine. Like Judge Lungstrum, this Court should resist Syngenta's invitation to broadly expand the ELD.

Syngenta's other arguments regarding legal duty, the importance of the China market, and Plaintiffs' alleged contributory fault just cast aside and ignore the allegations in the Complaints, which are deemed to be true at this stage. They also misstate the law in several important respects. As explained fully below, the Court should deny Syngenta's motion and allow this case to proceed to discovery.[2]

FACTS

Syngenta mischaracterizes Plaintiffs' claims by asserting that they somehow "hinge on the premise that GM crops must be segregated from those that are not." (Syn. Br. at 5.) This is a fiction of Syngenta's own making.

The Complaints do not allege that GM crops must be segregated from non-GM crops. Rather, the Complaints allege that commercialization of GM traits carries well-known risks, including "major trade disruptions and massive harm to both Producers and Non-Producers"

[2] Both the Class Complaint and Non-Class Complaint include common-law claims of nuisance and trespass. Given Judge Lungstrom's thorough analysis and Order in the federal MDL, which resolved similar common-law claims, Plaintiffs will voluntarily dismiss their claims for nuisance and trespass. In addition, the Class Plaintiffs will voluntarily dismiss their product-liability claims.

(NCC at 2; CC at 1),[3] and requires responsible practices, including approval from significant export markets (NCC ¶¶ 46, 73, 228; CC ¶¶ 34, 62, 217). Syngenta committed to stewardship when, *inter alia*, it represented to the USDA that channeling to "divert [Viptera] away from" unapproved export markets would take place in an effective manner, and affirmatively signed on to industry policies calling for a test to detect its GM trait. (NCC ¶¶ 62, 122, 132; CC ¶¶ 51, 111, 121.)

Because Syngenta's fact section is so contrary to the allegations pled, the Court should disregard it entirely.

I. Syngenta created the risk of harm to Plaintiffs.

Syngenta has publicly acknowledged that the commodity agricultural market is an integrated market where a seed manufacturer's decisions impact farmers, elevators, and exporters. (NCC ¶ 38 ("Our stakeholders are the people . . . affected by [our business]," referring specifically to "[g]rowers" and the "[i]ndustry"); CC ¶ 27 (same).) When a seed manufacturer like Syngenta commercializes a new GM trait without approval from major export markets, that decision imposes substantial risk on the integrated market, which is only exacerbated without responsible safeguards in place. (NCC at 2-3 & ¶ 38; CC at 2-3 & ¶¶ 15.)

In this case, Plaintiffs expressly allege that Syngenta commercialized Viptera with knowledge that "China would not approve MIR162 until sometime after that trait had entered export channels," creating a "huge risk that the U.S. corn industry could lose one of their large and growing export markets." (NCC at 3; CC at 2.) Nevertheless, during the 2012 and 2013 growing seasons, Syngenta expanded sales of Viptera, increasing the known risk of cross-

[3] Throughout this response brief, the First Amended Non-Class Complaint is denoted "NCC," and the First Amended Minnesota Class Action Master Complaint is denoted "CC."

pollination and commingling within the U.S. corn supply. (NCC ¶¶ 156, 199; CC ¶¶ 145, 188.)

Syngenta also:

- "actively misled Producers and Non-Producers" about the importance of the Chinese market and the imminence of Chinese approval in order to encourage sales and thus the spread of MIR162 (NCC at 4; CC at 3);

- misrepresented the measures it would take to prevent Viptera from contaminating other crops (NCC at 4; CC at 3);

- encouraged growers to take actions that increased the risk of cross-pollination (NCC ¶¶ 120, 126, 128 (encouraging growers to plant Viptera side-by-side with other corn and advising that they had no obligation to warn their neighbors); CC ¶¶ 109, 115, 117 (same));

- misrepresented to the USDA and to the public that deregulation would have no impact on the export market (NCC ¶¶ 60, 64; CC ¶¶ 49, 53);

- told the USDA and the public that its filings in China were in process when they were not (NCC ¶¶ 67, 70; CC ¶¶ 56, 59);

- told the USDA and the public that any risk of cross contamination was low because Syngenta would engage in a legitimate stewardship program, channeling MIR162 "away from export markets . . . where [MIR162] has not yet received regulatory approval for import" (NCC ¶ 62; CC ¶ 51);

- increased the presence of Viptera seed on U.S. land, which furthered "the widespread, pervasive contamination that has caused disruption of trade in U.S. corn with China" (NCC ¶ 129; CC ¶ 118);

- crafted a plan to mislead Producers and Non-Producers into believing that Chinese approval of MIR162 was forthcoming and continued its deception regarding the status of Chinese approval throughout 2012, further enhancing the risk of contamination (NCC ¶¶ 161-94; CC ¶¶ 150-83); and

- represented to Viptera growers on August 17, 2011, that Syngenta anticipated Chinese approval by March 2012; publicly represented in April 2012 that Chinese approval was expected in a matter of days; and disseminated a Bio-Safety Request Form and a Plant with Confidence Fact Sheet (NCC ¶¶ 167, 184, 190-93; CC ¶¶ 156, 173, 179-80).

In other words, "Syngenta did not simply fail to take precautions against foreseen and foreseeable harm. Syngenta acted affirmatively to create such harm." (NCC ¶ 239; CC ¶ 228.)

Absent effective stewardship and channeling, Viptera's entry into export channels was inevitable, as Syngenta knew. (NCC ¶¶ 235, 333; CC ¶¶ 224, 313.) That risk, and the resulting harm to Plaintiffs, was of Syngenta's making. (NCC ¶ 236; CAC ¶ 225.) Indeed, when one exporter attempted to exercise the purported "choice" that Syngenta wrongly relies on to put blame on Non-Producers for trying to keep MIR162 out of China, Syngenta sued it, and demanded that a federal court order the exporter to purchase Viptera. (NCC ¶¶ 147-50; CC ¶¶ 136-39). Syngenta also made misrepresentations to increase sales,[4] and decided not to implement a legitimate stewardship or channeling program, all for its own financial benefit. (NCC ¶¶ 106, 115, 124-25, 131, 136-37, 145-46; CC ¶¶ 95, 104, 113-14, 120, 125-26, 134-35.)

Syngenta could—and should—have waited to market Agrisure Viptera. Syngenta also could have withdrawn the seed from the integrated market before planting. (NCC ¶ 97; CC ¶ 86.) But it did not. Syngenta instead "sold even more Viptera for planting in 2012, further increasing th[e] risks." (NCC ¶ 156; CC ¶ 145.) Even after China closed its entire market to U.S. corn, Syngenta launched another GM strain of corn unapproved by China, Agrisure Duracade, for the 2014 crop year, not only prolonging but deepening the damage. (NCC at 4; CC at 3.)

II. The harm to Plaintiffs was foreseen by Syngenta.

Syngenta disputes that China was a key export market, ignoring its prior repeated acknowledgements that it is.[5] (NCC ¶¶ 74-75; CC ¶¶ 63-64.) Syngenta also says that China

---

[4] Syngenta strategized about how to mislead growers to "get them comfortable that [Chinese] approval is close" and ensure continued purchases of Viptera seed. (NCC ¶ 161; CC ¶ 150.) "To encourage further sales and planting of Viptera, Syngenta, by at least August 2011, was representing to stakeholders . . . that [it] would obtain China's approval by March 2012." (NCC ¶ 167; CC ¶ 156.)

[5] A federal court determined that Syngenta should have recognized that Chinese imports of U.S. corn for the 2011 crop year "might well be very significant." (NCC ¶ 153; CC ¶ 142.)

lacked a "functioning regulatory system," and banned U.S. corn for economic reasons. But the Complaints, which are deemed to be true at this stage, allege otherwise. (NCC ¶¶ 60, 71; CC ¶¶ 49, 60.) Syngenta's unsupported suggestion that market-price damages are too "speculative" or that they were due to a "bumper corn crop" in 2013 are also inappropriate at this pleading stage, and in any event will be factually refuted by expert testimony.[6]

In April 2010, the USDA deregulated MIR162. (NCC ¶ 56; CC ¶ 45.) When Syngenta began selling Viptera "for the 2011 crop year," it "knew well that it would not have import approval from China."[7] (NCC ¶ 76; CC ¶ 65.) "The typical time period for import approval from China at that time was approximately 2-3 years." (NCC ¶ 77; CC ¶ 66.) The approval process can take longer if the application is "insufficient, incorrect, and/or incomplete," as Syngenta's was here. (NCC ¶ 170; CC ¶ 159.) Syngenta's request for cultivation approval, which is "more severely restricted," also delayed the process.[8] (NCC ¶¶ 175-76; CC ¶¶ 164-65.)

Syngenta commercialized Viptera for the 2011 growing season "despite the lack of regulatory approval from China, and despite [its own] knowledge that China was a key (and growing) export market for U.S. corn." (NCC ¶ 80; CC ¶ 69.) Syngenta knew the risk was

---

[6] Syngenta hides behind the "U.S. regulatory framework" to defend its conduct. Nothing about the U.S. regulatory system justifies Syngenta's actions.

[7] In fact, Syngenta had only just sought regulatory approval in China. (NCC ¶ 70 ("Contrary to Syngenta's representations that its regulatory filings were "in process" in China, Syngenta first sought regulatory approval for MIR162 from China's Ministry of Agriculture three years later, in or around March 2010."); CC ¶ 59 (same).)

[8] Syngenta relies on materials far outside the Complaints to claim that Chinese authorities have deadlines to act on import applications and that failure to meet those deadlines evidences a non-functioning system. (Syn. Br. at 13.) But Plaintiffs allege that Syngenta knew that its application would not be approved in 270 days, and that delays were due to Syngenta's deficiencies. (NCC ¶¶ 78, 170; CC ¶¶ 67, 159.)

significant that MIR162 would be detectable in export channels before export approval. (NCC ¶¶ 113-14; CC ¶¶ 102-03.) "Syngenta clearly knew the risks of premature commercialization, and knew that without stringent containment and channeling procedures, MIR162 would contaminate the U.S. corn supply and move to export markets." (NCC ¶ 46; CC ¶ 35.) Syngenta also knew that meant "significant risk of trade disruption."[9] (NCC ¶ 114; CC ¶ 103.) The "importance of obtaining import approval from key markets was well known and recognized within the biotechnology industry and by Syngenta before [it] commercialized MIR162." (NCC ¶ 45; CC ¶ 34.)

Syngenta also knew that China was a major, growing export market. On multiple occasions before commercializing MIR162, Syngenta recognized China as a "key" import market for U.S. corn. (NCC ¶¶ 74-75; CC ¶ 63-64.) Industry groups warned Syngenta of China's importance. (NCC ¶¶ 82-89, 151; CC ¶¶ 71-78, 140.) By at least May 2010, Syngenta was "well aware . . . of the strong likelihood that China would be a significant import market by 2011." (NCC ¶ 82; CC ¶ 71.) In 2010, Syngenta itself recognized China as a "key" market to the National Grain and Feed Association. (NCC ¶ 75; CC ¶ 64.) Syngenta continued to recognize China's importance in early 2011, before the first planting of MIR162. (NCC ¶¶ 90-94, 101-105, 151, 153; CC ¶¶ 79-83, 90-94, 140, 142.) And Syngenta was explicitly warned about the importance of Chinese approval before commercialization and throughout 2011. (NCC ¶ 85; CC ¶ 74.) Even as China's importance increased, Syngenta refused to stop marketing Viptera. (NCC ¶¶ 87-90, 96; CC ¶¶ 76-79, 86.)

---

[9] Syngenta's conduct in the face of similarly foreseeable risks continued in the 2014 crop year, when it "announced it would commercialize Duracade for the 2014 crop year . . . despite the continued lack of approval from China for MIR162." (NCC ¶ 212; CC ¶ 201.)

III. Syngenta was fully capable of implementing legitimate stewardship and channeling.

Syngenta contracts with growers who purchase its seed. (NCC ¶¶ 62-63, 132; CC ¶¶ 51-52, 121.) It could have required that "growers adhere to stringent practices that would have decreased the likelihood of contamination," but chose not to in order to avoid "drastically reduced sales." (NCC ¶ 125; CC ¶ 114; *see also* NCC ¶¶ 220, 222-23 (Syngenta represented when it launched Duracade that it would require growers to feed the corn to livestock or poultry or deliver it to those not exporting to China, but declined to require planting/harvesting protocols not because it could not have done so, but because it "did not want to"); CC ¶¶ 209, 211-12.).) Syngenta's contract contained a provision for channeling (without any reference to China), but gave no instruction on how to accomplish it. (NCC ¶¶ 138-41; CC ¶¶ 127-30.) And Syngenta "could have instituted channeling measures but did not." (NCC ¶ 238; CC ¶ 227.) As such, "[i]t was inevitable that Viptera corn would move into export channels, including China, and cause trade disruption, as Syngenta well knew." (NCC ¶ 235; CC ¶ 224.)

IV. Syngenta undertook stewardship obligations.

Syngenta knew the risks posed by premature commercialization and the importance of obtaining approval from key importing countries such as China. (NCC ¶¶ 27, 29-37, 45-46; CC ¶¶ 16, 18-26, 34-35.) Syngenta's experience in 2007 with MIR604 prior to approval in Japan and other export markets led to the Biotechnology Industry Organization's ("BIO") launch policy. (NCC ¶¶ 34-35; CC ¶¶ 23-24.) Syngenta adopted its own launch policy in 2007, incorporating BIO policies, including an assessment to identify key importing nations and secure approval prior to commercialization. (NCC ¶¶ 43, 46; CC ¶¶ 32, 35.) Syngenta also said it supports and will comply with stewardship standards of CropLife International and Excellence Through Stewardship. (NCC ¶ 44; CC ¶ 33.)

Syngenta not only agreed to these industry standards, but promulgated a corporate responsibility code identifying "Growers" and the "Industry" as "stakeholders" affected by Syngenta's decisions. (NCC ¶ 38; CC ¶ 27.) That code requires Syngenta to respond to feedback from stakeholders, implement high stewardship standards, prioritize issues important to stakeholders, and institute safeguards. (NCC ¶¶ 39-42; CC ¶¶ 28-31.) Consistent with these standards, "Syngenta committed to not commercializing new [GM] traits that had not been approved by key import markets." (NCC ¶ 46; CC ¶ 35.) Similarly, in its Deregulation Petition to the USDA, Syngenta represented that it instituted a "wide-ranging grower education campaign" to channel, which it said would be successful "based on prior experiences with the specialty maize market." (NCC ¶ 62; CC ¶ 51.) Despite these representations, Syngenta commercialized Viptera before Chinese approval without any legitimate stewardship. (NCC ¶ 134; CC ¶ 123.)

V. Syngenta embarked on a campaign of false statements in commercializing Viptera.

Syngenta engaged in an operation of misinformation regarding Chinese approval to sell Viptera. To commercialize, Syngenta needed the USDA to deregulate MIR162. (NCC ¶ 47; CC ¶ 36.) Deregulation petitions are publicly disseminated, and Syngenta's petition assured that Viptera would not disrupt the export market for U.S. corn. (NCC ¶ 60; CC ¶ 49.) It represented that: (1) there should be no effects on U.S. corn export markets; (2) applications for approval in export markets with functioning regulatory systems, including China, were in process; and (3) Syngenta would institute a stewardship program and wide-ranging grower education campaign to channel away from markets that had not approved MIR162. (NCC ¶¶ 58, 60-63; CC ¶¶ 47, 49-52.) Syngenta filed the petition with full knowledge that its statements and representations would be published and contained commercial content. (NCC ¶¶ 57, 69; CC ¶¶ 46, 58.)

After launch, Syngenta actively misrepresented that Chinese approval of MIR162 was forthcoming. (NCC ¶¶ 161, 181-94; CC ¶¶ 150, 170-83.) On August 17, 2011, in response to

increasing concern over the lack of Chinese approval and the prospect of grain handlers not purchasing corn grown from Viptera seed, Syngenta sent letters to growers and non-producers stating that Syngenta anticipated Chinese approval by March 2012. (NCC ¶ 167; CC ¶ 156.) Syngenta's CEO stated in April 2012 that approval was expected "in the matter of a couple of days."[10] (NCC ¶ 184; CC ¶ 173.) Syngenta instructed its employees to "verbally" tell potential customers that Syngenta anticipated approval soon. (NCC ¶ 183; CC ¶ 172.) But Syngenta knew these statements falsely represented reality. (NCC ¶¶ 169-73, 182-86; CC ¶¶ 158-62, 171-75.) Syngenta also published and disseminated a pointless Bio-Safety Certificate Request Form, deceptively indicating that Viptera corn could be exported to China, and a Plant with Confidence Fact Sheet deceptively downplaying China's importance to the market. (NCC ¶¶ 187-92; CC ¶¶ 176-81.)

Syngenta was "focused on its bottom line." (NCC ¶ 166; CC ¶ 155.) Contrary to its policies, "Syngenta launched a 'blame the grain trade' campaign," attempting to shift the entire burden of channeling to grain handlers. (NCC ¶ 165; CC ¶ 154.) Syngenta developed a "Top 10" list as part of a sales program designed to neutralize concerns about Chinese approval. (NCC ¶ 166; CC ¶ 155.) The program "provide[d] regular (and misleading) updates 'on progress and plans for China trait approval and to drive trait acceptance.'" (*Id.*) Thus, despite knowing the falsity of its feigned expectation that approval was forthcoming in March 2012, Syngenta decided that "[i]f we say March enough, there should be no issue." (NCC ¶ 168; CC ¶ 157.)

By trying to shift responsibility to non-producers, Syngenta ignores its commitment to manage the introduction of Viptera and its "ability to control the timing, size, and geographic

[10] Syngenta asks the Court to draw an inference that this statement cautions that Syngenta could not handicap the Chinese regulatory process. (Syn. Br. at 12.) Syngenta, as the moving party, is not entitled to this inference (or any other) on a motion to dismiss.

scope of its commercialization . . . , as well as the extent to which adequate containment measures [were] required." (NCC ¶ 238; CC ¶ 227.) Syngenta even re-characterizes the Complaints to support blaming Syngenta's customers for planting Viptera "in a way that permitted cross-pollination with neighboring fields." (Syn. Br. at 11.) But it was Syngenta that recognized the risk of MIR162 moving to export channels. And it was Syngenta that encouraged farmers to grow Viptera "side by side" with other corn, and to not warn their neighbors. (NCC ¶¶ 126-28; CC ¶¶ 115-17.)

Syngenta repeatedly resisted and abandoned its promised stewardship program. In July 2010, for example, Syngenta executives identified a need for a GM detection strategy. (NCC ¶ 123; CC ¶ 112.) That strategy would have been in accord with the BIO policy and Syngenta's internal policy, both requiring availability of a "reliable detection method or test." (NCC ¶¶ 121-22; CC ¶¶ 110-11.) Syngenta, however, utterly failed to execute.[11] (NCC ¶ 124; CC ¶ 113.)

VI. Plaintiffs suffered both physical and economic harm.

The pervasive contamination brought on by Syngenta's acts "caus[ed] physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land. (NCC ¶ 236; CC ¶ 225.) Syngenta's conduct also caused significant economic harm. (NCC ¶ 240; CC ¶ 229.) The corn industry began to suffer enormous consequences from Syngenta's actions around November 2013, when China began rejecting U.S. shipments testing positive for MIR162. (NCC ¶ 213; CC

[11] Syngenta also blames grain elevators and other non-producers by claiming they opted not to test for MIR162. (Syn. Br. at 12.) This both assumes that an adequate test was available, and that grain elevators were equipped to test and segregate corn for genetic traits—they were not. (NCC ¶ 111; CC ¶ 100.) Nor is there any allegation to support Syngenta's impermissible inference that the mythical "cost" decision by grain elevators was because "the Chinese market accounted for only about one-third of 1% of U.S. corn production when Viptera was launched in the U.S." (Syn. Br. at 12.)

¶ 202.) It took Syngenta another 13 months to obtain Chinese import approval. (NCC ¶ 233; CC ¶ 222.)

By then, Syngenta had already launched Duracade, not approved in China, thereby prolonging the harm. (*Id.*; *see also* NCC at 4; CC at 3.) China's subsequent approval of MIR162 is not likely to lessen the impact of Syngenta's conduct anytime soon. (*Id.*) Under basic laws of supply and demand, less demand means lower price. (NCC ¶¶ 284-89; CC ¶¶ 273-78.) As a result of Syngenta's actions, Plaintiffs have been harmed.[12] (NCC ¶¶ 241-99; CC ¶¶ 230-85). That harm likely will be long lasting (NCC ¶¶ 273, 283; CC ¶¶ 262, 272), in part because U.S. corn exports to China have not even begun to recover (NCC ¶¶ 269-74; CC ¶¶ 258-63).

ARGUMENT

I. Legal standard.

Syngenta moves to dismiss under Minn. R. Civ. P. 12.02(e). Such dismissals are generally disfavored. *Tollefson Dev., Inc. v. McCarthy*, 668 N.W.2d 701, 703 (Minn. App. 2003).

A motion under Minn. R. Civ. P. 12.02(e) "raises the single question of whether the complaint states a claim upon which relief can be granted." *Martens v. Minn. Min. & Mfg. Co.*, 616 N.W.2d 732, 739 (Minn. 2000) (citations omitted). In assessing such a motion, the Court accepts the facts alleged in the complaint as true, and makes all reasonable inferences in favor of the nonmoving party. *Bahr v. Capella Univ.*, 788 N.W.2d 76, 80 (Minn. 2010).

---

[12] Syngenta improperly claims that China began testing U.S. corn shipments in 2013 to get out of contracts at higher prices because a "bumper crop" had caused prices to drop. (Syn. Br. at 14.) Syngenta's unsupported arguments may not be considered on a motion to dismiss. Instead, Plaintiffs' allegations that China's rejection of U.S. corn was because of the MIR162 contamination and that the NGFA, for one, tied trade disruption with China's positive detections of MIR162, must be accepted as true for purposes of this motion. (NCC ¶¶ 213-14; CC ¶¶ 202-03.)

Significantly, in *Walsh*, the Minnesota Supreme Court rejected the application of the federal plausibility standard to State pleadings. 851 N.W.2d at 603 ("We now decline to engraft the plausibility standard from *Twombly* and *Iqbal* onto our traditional interpretation of Minn. R. Civ. P. 8.01"). Minnesota's notice-pleading standard was left untouched. That standard "'does not require absolute specificity in pleading, but rather requires only information sufficient to fairly notify the opposing party of the claim against it.'" *Id*. at 605 (quoting *Hansen v. Robert Half Int'l, Inc*., 813 N.W.2d 906, 917-18 (Minn. 2012)).

"A pleading will be dismissed only if it appears to a certainty that no facts, which could be introduced consistent with the pleading, exist which would support granting the relief demanded." *Franklin*, 265 Minn. at 395, 122 N.W.2d at 29; s*ee also First Nat'l Bank of Henning v. Olson*, 246 Minn. 27, 38, 74 N.W.2d 123, 129 (1955) ("[T]here is no justification for dismissing a complaint for insufficiency . . . unless it appears to a certainty that the plaintiff would be entitled to no relief under any state of facts which could be proved in support of the claim."). Thus, "[a] claim is sufficient against a motion to dismiss for failure to state a claim if it is possible on any evidence which might be produced, consistent with the pleader's theory, to grant the relief demanded." *Walsh*, 851 N.W.2d at 603.

II. Minnesota law applies.

There is no choice-of-law issue with respect to the Class Complaint, in which Plaintiffs and a class entirely within Minnesota have stated claims under Minnesota's consumer statutes. As for the Non-Class Complaint, Syngenta argues that the Court may not apply Minnesota law to the claims of non-resident Plaintiffs. But because the claims here involve false, fraudulent, or deceptive statements made from a defendant's principal place of business in Minnesota, Minnesota law—including its consumer-protection statutes—provides a basis for relief to the non-class plaintiffs, regardless of their location.

In this State, a choice between laws is required where "the choice of one forum's law over the other will determine the outcome of the case." *Nodak Mut. Ins. Co. v. Am. Family Mut. Ins. Co.*, 604 N.W.2d 91, 93-94 (Minn. 2000). If there is such an outcome-determinative conflict and the law of either forum may be constitutionally applied, then Minnesota courts decide which state's law applies by weighing five factors: (1) predictability of result; (2) maintenance of interstate order; (3) simplification of the judicial task; (4) advancement of the forum's governmental interests; and (5) application of the better rule of law. *Nodak*, 604 N.W.2d at 94; *see also Danielson v. Nat'l Supply Co.*, 670 N.W.2d 1, 6 (Minn. App. 2003). Here, even assuming there is such an outcome-determinative conflict, the Court should apply Minnesota law to the claims of all Plaintiffs in the 22 states at issue in Syngenta's motion.

A. The Non-Class Complaint alleges facts and asserts claims warranting application of Minnesota law.

Plaintiffs' claims under Minn. Stat. §§ 325D.13 and 325F.69 pertain to false or misleading statements made in Minnesota by a Minnesota company. Such statements are actionable under Minnesota's consumer-protection laws.

Syngenta's principal place of business is in Minnetonka, Minnesota. (NCC ¶ 9.) Syngenta has stated that it "develops, produces, and sells, through dealers and distributors or directly to growers, a wide range of agricultural products," including Agrisure Viptera and Agrisure Duracade corn seeds. (*Id.*) Syngenta conducted field testing under permits issued by or notifications to, and made application for deregulation by, the USDA. (*Id.* ¶¶ 13, 50.)

Plaintiffs' allegations concerning the role of Syngenta in marketing Viptera warrant application of Minnesota law. (NCC ¶ 18.) Plaintiffs' fact allegations regarding Syngenta's role—drawn directly from Syngenta's representations in federal litigation about the nature of its own business—give rise to the reasonable inference that any false or misleading statements made

by Syngenta in connection with marketing Viptera were made by Syngenta through its principal place of business in Minnesota. (*See, e.g.*, *id*. ¶¶ 167-69, 182-89.)

Minnesota law is properly invoked by non-resident plaintiffs against a Minnesota defendant based on false, fraudulent, or deceptive statements originating in Minnesota. *Mooney v. Allianz Life Ins. Co. of N. Am.*, 244 F.R.D. 531, 535 (D. Minn. 2007) ("As a Minnesota corporation, Allianz [cannot] claim surprise by the application of Minnesota law to conduct emanating from Minnesota, since Minnesota has a 'substantial interest in preventing the corporate form from becoming a shield for unfair business dealing.'") (citation omitted); *Castello v. Allianz Life Ins. Co. of N. Am.*, No. MC 03-20405, slip op. at 2, 7 (Minn. Henn. Cnty. Sept. 5, 2005) (certifying nation-wide class in state-court action alleging violations of Minnesota consumer-protection statutes).

As courts have recognized, the Minnesota Prevention of Consumer Fraud Act "is intended to apply both to the conduct of foreign corporations that injures Minnesota residents and to the conduct of Minnesota companies that injures non-residents." *In re Lutheran Bhd. Variable Ins. Prods. Co. Sales Practices Litig.*, No. 99-MD-1309, 2004 U.S. Dist. LEXIS 7789, at *6 (D. Minn. Apr. 28, 2004) (re-affirming nationwide class based on Minnesota consumer-protection statutes).

This reasoning compels the conclusion that Minnesota's consumer statutes provide non-resident Plaintiffs a remedy for Syngenta's false, misleading, and deceptive practices. *Cf.* Restatement (Second) of Conflict of Laws § 145 (1971) ("[T]he place of injury does not play so important a role for choice-of-law purposes in the case of false advertising . . . as in the case of other kinds of torts. Instead the principal location of the defendant's conduct is the contact that

will usually be given the greatest weight in determining the state whose local law determines the rights and liabilities that arise from false advertising . . . .").

B. Minnesota's choice-of-law factors favor Minnesota law.

The five choice-of-law factors also cut in favor of applying Minnesota's consumer-protection laws.

Predictability of results. Predictability of results has little bearing on a tort case. *See Reed v. Univ. of N. Dakota*, 543 N.W.2d 106, 108 (Minn. App. 1996). Here, Plaintiffs' claims sound principally in tort. Still, as in *Mooney*, applying Minnesota law is predictable. Plaintiffs would expect that fraudulent statements and misrepresentations made in Minnesota would be governed by Minnesota law. 244 F.R.D. at 536. Therefore, the first factor favors Minnesota law.

Maintenance of interstate order. The second factor primarily involves whether Minnesota has a sufficient connection to—and interest in—the facts and issues being litigated. *Id*. Syngenta is a Minnesota corporation, deeply related to the other Defendants, and made fraudulent statements and directed fraudulent activities from Minnesota. "Therefore, application of Minnesota law would not manifest disrespect for the sovereignty of any other state."[13] *Id*. This factor, too, favors Minnesota.

Simplification of the judicial task. For the same reasons explained in *Mooney*, this factor is either neutral (because this Court is capable of applying either Minnesota law or the substantive law of non-residents' states) or it favors Minnesota law (because that may be simpler for the Court to apply). *See, e.g., H Enters. Int'l v. Gen. Elec. Capital Corp.*, 833 F. Supp. 1405,

[13] Syngenta cites no authority that the second factor "favors applying the law of the state where each plaintiff operated its business and allegedly suffered financial harm." (Syn. Br. at 15.) Indeed, this *lex loci* rule was abandoned long ago. *Milkovich v. Saari*, 203 N.W.2d 408, 417 (Minn. 1973).The second factor requires only that "the forum state [have] a substantial connection with the facts and issues involved." *Id.* at 417. For the reasons explained throughout this brief, Minnesota does.

1417 (D. Minn. 1993). Either way, this factor does not lend support to Syngenta's argument for home-state law.

Advancement of forum's governmental interest. Although both Minnesota and Plaintiffs' individual states may have various interests in having their laws applied here, the balance tips in favor of applying Minn. Stat. §§ 325D.13 and 325F.69. As the court explained in *Mooney*:

> By allowing "any person" to sue under [Minnesota's consumer-protection statutes], the Minnesota legislature has evinced a strong policy of providing redress for fraudulent business practices that occur within Minnesota's borders, regardless of where a consumer's injury occurs . . . . Although other states have an interest in applying their own laws, their interest is not so strong so as to prevent their citizens from benefitting from Minnesota's willingness to provide statutory and common law remedies for fraudulent conduct emanating from Minnesota.

244 F.R.D. at 536-37. Put simply, applying the home states' consumer laws—if, indeed, there are any[14]—would "reduce the protection afforded under Minnesota law" when Minnesota companies engage in false and deceptive conduct. *Medtronic, Inc. v. Adv. Bionics Corp.*, 630 N.W.2d 438, 455 (Minn. App. 2001).[15] This factor favors Minnesota law.

---

[14] There are no consumer-protection claims in this action for more than half of the 22 states at issue here. (*See* NCC at 81-83 (Alabama), 102-04 (Arkansas), 167-69 (Indiana), 170-71 (Iowa), 171-73 (Kansas), 173-75 (Kentucky), 175-76 (Louisiana), 195-97 (Michigan), 197-99 (Mississippi), 199-202 (Missouri), 248-50 (Ohio), and 250-52 (Oklahoma).).

[15] Syngenta's citation to *Montpetit v. Allina Health Sys., Inc.*, No. C2-00-571, 2000 Minn. App. LEXIS 1051 (Minn. App. Oct. 10, 2000), regarding the fourth factor is misleading. *Montpetit* did not state that Minnesota's interests are only satisfied when Minnesota residents recover losses. *Montpetit*'s holding was more limited: the district court was not wrong to conclude that, under the circumstances of that particular case, Wisconsin had the predominant governmental interest in distribution of a wrongful-death recovery where the parties claiming entitlement as beneficiaries all lived in Wisconsin. *Id.* at *3.

Better rule of law. Minnesota courts have tended not to use this factor, applying it primarily when the other four factors are not dispositive. *See Nodak*, 604 N.W.2d at 96; *Reed*, 543 N.W.2d at 109. Here the first four factors favor Minnesota law. Accordingly, the fifth factor is inapplicable.

In sum, then, the five choice-of-law factors favor Minnesota law. If there is any doubt, the Court could defer the choice-of-law analysis until discovery has been conducted, which would allow time to examine the extent of Syngenta's actions that emanated from or were connected to Minnesota. *See, e.g.*, *Reid v. Doe Run Res. Corp.*, 74 F. Supp. 3d 1015, 1024 (E.D. Mo. 2015) ("Many courts have concluded that a court is typically in a better position to decide a choice of law issue after the parties have developed the factual evidence through the process of discovery"); *Bonnell v. Cabo Azul Resort*, No. 2:08-CV-00910, 2010 U.S. Dist. LEXIS 89155, at *4 (D. Nev. Aug. 27, 2010) (finding that fact discovery regarding relationships between the various defendants was necessary to determine choice-of-law issues).

C. Minnesota's consumer laws may be constitutionally applied to the claims of all Plaintiffs, regardless of location.

Contrary to Syngenta's argument, no constitutional impediment exists to applying Minnesota law to the nonresidents' claims. "[F]or a State's substantive law to be selected in a constitutionally permissible manner, that State must have a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." *Allstate Ins. Co. v. Hague*, 449 U.S. 302, 312-13 (1981). "When considering fairness in this context, an important element is the expectation of the parties." *Phillips Petroleum Co. v. Shutts*, 472 U.S. 797, 822 (1985).

Minnesota has significant contacts with Plaintiffs' claims. Syngenta has its principal place of business is in Minnesota. Further, Syngenta made its fraudulent statements and directed

its fellow-Defendant subsidiaries from Minnesota. *Mooney* and *Lutheran Brotherhood* found on similar facts that both the defendant and non-Minnesota class members would have expected Minnesota law to apply, and therefore constitutional requirements were satisfied. *Mooney*, 244 F.R.D. at 535; *Lutheran Bhd.*, 2004 U.S. Dist. LEXIS 7789, at *5-6; *cf. In re Target Corp. Customer Data Sec. Breach Litig.*, 309 F.R.D. 482, 486 (D. Minn. 2015) (court can "presume there are substantive conflicts between the laws of Plaintiffs' home states and Minnesota law and still constitutionally apply Minnesota law" because defendant's headquarters are in Minnesota); *Peterson v. BASF Corp.*, 657 N.W.2d 853, 873 (Minn. App. 2003) (upholding district court's application of New Jersey law to nationwide consumer-fraud class action), *aff'd*, 675 N.W.2d 57 (Minn. 2004), *vacated and remanded on other grounds*, 544 U.S. 1012 (2005); *Castello*, No. MC 03-20405, slip op. at *2, 7 (certifying nationwide class alleging violations of Minnesota consumer-protection statutes).

D. Plaintiffs have alleged facts warranting application of Minnesota law to the common-law claims, regardless of each Plaintiff's residence.

The same conduct by Syngenta noted above supports applying Minnesota law to Plaintiffs' common-law claims as well. When analyzing choice-of-law questions that involve torts, the Minnesota Supreme Court has stressed that only the last two choice-influencing factors—advancement of the forum's governmental interests and application of the better rule of law—are relevant. *H Enter. Int'l. v. Gen'l Elec. Capital Corp.*, 833 F. Supp. 1405, 1416 (D. Minn. 1993) (citing *Milkovich v. Saari*, 295 Minn. 155, 203 N.W.2d 408, 412 (1973)); *Cargill, Inc. v. Prod. Eng'g Co.*, 627 F. Supp. 1492, 1496 (D. Minn. 1986). As a matter of policy, "Minnesota places great value in compensating tort victims." *Schumacher v. Schumacher*, 676 N.W.2d 685, 691 (Minn. App. 2004) (quoting *Jepson v. Gen. Cas. Co. of Wis.*, 513 N.W.2d 467, 472 (Minn. 1994)).

Here, advancing the forum's governmental interests favors applying Minnesota law to judge tortious conduct emanating from Minnesota by a Minnesota corporation. The Court should apply Minnesota law to the common-law claims. As explained above, applying Minnesota common law to these claims also passes constitutional muster.[16]

III. The economic loss doctrine does not bar Plaintiffs' claims.

In seeking to invoke the economic loss doctrine ("ELD"), Syngenta asks this Court to dramatically expand the ELD beyond existing law in 22 states, and to depart from the ELD's underlying policies. Syngenta urges the Court to undertake this broad expansion by mischaracterizing the careful reasoning and analysis of Judge Lungstrum, who expressly rejected the *identical* arguments asserted here.

First, Syngenta ignores that the traditional ELD is limited in scope, and is subject to many exceptions. Courts disfavor the doctrine where its application would not further the underlying purposes for which the doctrine was created.

Second, Syngenta conflates application of the ELD with the stranger ELD ("SELD"), a separate doctrine that courts seldom apply and, when they do, they apply it only in a narrow category of cases. Syngenta acknowledges that it *must* rely on the SELD in this case, but then artfully blurs the lines between the two doctrines. Syngenta conflates these two distinct legal doctrines because the SELD is not recognized in many of the relevant states. Further, in the minority of jurisdictions where it has been recognized, the SELD is applied in extremely limited circumstances where the policies behind the doctrine are clearly served. There is no legitimate dispute that this case does *not* fall into one of the recognized SELD categories and, as discussed

---

[16] Syngenta's argument that claims asserted under states in which no plaintiff resides must be dismissed (Syn. Br. at 16) is moot because a notice to conform has been filed on behalf of at least one plaintiff from all 22 states at issue in Syngenta's motion to dismiss.

at length by Judge Lungstrum in rejecting the SELD, expansion of the doctrine here is not warranted here.

Finally, Syngenta undertakes a broad attack on Judge Lungstrum's MDL Order by misconstruing that court's analysis and conclusion. In denying Syngenta's motion to dismiss, Judge Lungstrum undertook one of the most thorough analyses of the SELD that has been undertaken by any court in any state. In so doing, Judge Lungstrum declined Syngenta's invitation to drastically expand the SELD (the same invitation Syngenta makes here) after carefully considering the historical roots of the doctrine, the pertinent case law, and the facts alleged by plaintiffs in that federal case. The resulting 120-page Order is well-reasoned and relies on a number of compelling factors to hold that the SELD is inapplicable to the facts presented in that parallel case. Nothing in Syngenta's motion provides any valid reason for this Court to rule differently.

A. Syngenta misstates the ELD's narrow scope.

Syngenta argues that the ELD is a broad rule prohibiting *any* recovery of economic loss in tort. But even a cursory read of applicable case law shows that the ELD is a very limited doctrine that, even when applied, is riddled with exceptions, each of which is established to ensure that the doctrine is applied in a manner consistent with its underlying policies.

The ELD has been defined as a rule that "denies the purchaser of a defective product a tort action against the seller or manufacturer for purely economic losses sustained as a result of the product's failure." *Saratoga Fishing Co. v. J.M. Martinac & Co.*, 520 U.S. 875, 885 (1997) (Scalia, J., dissenting). The doctrine developed in the product-liability context to prevent the deterioration of the line between warranty and tort law. *E. River S.S. Corp. v. Transamerica Delaval, Inc.*, 476 U.S. 858, 866 (1986). Similarly, courts have applied the ELD "to maintain a distinction between damage remedies for breach of contract and for tort." *Giles v. GMAC*, 494

F.3d 865, 873 (9th Cir. 2007). As the United States Supreme Court stated in its seminal *East River* decision, without the ELD, "contract law would drown in a sea of tort." 476 U.S. at 866.

Over the years, though, courts have limited the ELD by creating a number of well-recognized exceptions. *See People Express Airlines v. Consol. Rail Corp.*, 100 N.J. 246, 259 (N.J. 1985) (describing numerous exceptions to the ELD); *Barber Lines A/S v. M/V Donau Maru*, 764 F.2d 50, 56 (1st Cir. 1985) (same). Courts have consistently stated that the ELD should not be applied in categories of cases where the policy provisions underpinning the doctrine are not served by its application. *See, e.g.*, *Rinehart v. Morton Bldgs., Inc.*, 305 P.3d 622, 624 (Kan. 2013) (holding that the ELD did not apply because "the doctrine's purposes would not be furthered by extending it to such claims"); *Grynberg v. Questar Pipeline Co.*, 70 P.3d 1, 11 (Utah 2003) ("[M]any courts have successfully translated the theory by recognizing and applying the underlying premise of the economic loss doctrine"). Taken together, the exceptions and policy limitations placed on the ELD have served to dramatically limit the doctrine's scope.

B. The SELD applies in limited circumstances not present here.

Syngenta does not seek to apply the ELD to Producer Plaintiffs' claims because that doctrine is plainly inapplicable. Rather, Syngenta's argument instead relies on a very narrow offshoot of the ELD, the SELD, which has been applied in a minority of states and in only a limited category of cases. Of the 22 states at issue in this motion, some have rejected the ELD altogether (*see, e.g.*, Arkansas); others have limited application of the ELD to non-stranger cases (*see e.g.*, Colorado, Minnesota, Michigan, and South Dakota); and others have applied the SELD, but only in extremely limited circumstances where the policy rationales behind the doctrine are served (*see, e.g.*, Iowa).

None of the relevant states have applied the SELD in the broad manner Syngenta advocates here. Thus, to apply the SELD, this Court would effectively have to expand the law of all 22 states. As stated in *Leonard v. Dorsey & Whitney LLP*, when predicting the law of another state, a court's "duty is to conscientiously ascertain and apply state law, not to formulate new law based on our own notions of what is the better rule." 553 F.3d 609, 612 (8th Cir. 2009).

Syngenta argues that the SELD is a broad rule barring recovery of economic damages in torts between strangers. (Syn. Br. at 25.) But the cases Syngenta cites reveal that the SELD has been applied primarily in three limited categories of cases: (1) lack-of-access/public nuisance; (2) chain-of-contract; and (3) injured employees. (*See* MDL Order at 23 (noting that in the seven states where the SELD has arguably been applied the vast majority of cases were lack-of-access/public nuisance cases).)

Lack-of-access cases typically involve situations where a negligent actor damages a piece of public infrastructure or a public resource. *See, e.g., Neb. Innkeepers, Inc. v. Pittsburgh-Des Moines Corp.*, 345 N.W.2d 124, 125 (Iowa 1984) (considering claims by restaurant owners and employees against a contractor who damaged a public bridge); *La. ex rel. Guste v. M/V Testbank*, 752 F.2d 1019, 1020-21 (5th Cir. 1985) (considering claims by seafood restaurants, bait shops, marinas, and similar businesses against a ship that caused a chemical spill). In these cases, the public at large was denied access to the infrastructure or resource that was damaged. As Judge Lungstrum stated in his MDL Order, "[t]his is not a lack-of-access case in which any member of the public could potentially assert a claim for economic loss, leading to remote and indeterminate liability." (MDL Order at 23-24.) Thus, the limited exception does not apply.

The second category includes chain-of-contracts cases.[17] Syngenta repeatedly cites *Robins Dry Dock & Repair v. Flint*, which is a classic chain-of-contracts case. 275 U.S. 303 (1927). In *Robins*, plaintiff contracted with a ship owner to use the ship, and the ship owner in turn contracted with defendant to fix the ship. *Id*. Thus, while plaintiff and defendant were strangers because they did not contract with each another, and in fact, had no knowledge of one another, the Court reasoned that the parties had the ability to protect themselves *in contract* due to the chain of contractual obligations among the parties. *Id.*

Syngenta also relies heavily on another chain-of-contract case, *Aguilar v. RP MRP Wash. Harbour, LLC.*, 98 A.3d 979, 980 (D.C. 2014). In *Aguilar*, the plaintiffs had an employment relationship with shopping mall businesses and the shopping mall businesses, in turn, had a lessee-lessor relationship with the defendant. Therefore, although the plaintiff and defendant were not parties to a contract, they were only one step removed from each other in the "chain" of contracts. *Aguilar* carefully noted, however, that the SELD would not apply in chain-of-contracts cases where the parties have a "special relationship." *Id.* at 984. *Aguilar* analogized its application of the SELD to its treatment of claims for negligent infliction of emotional distress ("NIED"). The court reasoned that its rulings on NIED "balanced the need to hold negligent actors accountable while still maintaining limits on liability" by creating an exception based on "the nature of the defendant's undertaking to or relationship with plaintiff." *Id*. at 984. The Court stated that this approach was warranted (and applicable to SELD claims) because it "maintain[s] strong limits on liability while still allowing meritorious claims to proceed by examining the

[17] *See Annett Holdings, Inc. v. Kum & Go, L.C.*, 801 N.W.2d 499, 504-05 (Iowa 2011), for examples of chain of contracts.

special relationship between the parties." *Id.* This reasoning is particularly instructive in this case, where plaintiffs and defendants are participants in a highly interconnected market.

Ultimately, chain-of-contracts cases are best viewed as a modification of the contract ELD, the primary purpose of which is to encourage parties to protect themselves in contract and to preserve the distinction between contract and tort law. *See Air Prods. & Chems., Inc. v. Eaton Metal Prods. Co.*, 272 F. Supp. 2d 482, 499 (E.D. Pa. 2003) ("an underlying reason for the economic loss doctrine is to encourage parties to negotiate liability provisions"). Syngenta tacitly acknowledges this when it argues that "the contractual strand of the ELD bars tort claims for economic losses arising where the parties are connected (directly or indirectly) by a contract." (Syn. Br. at 57.) Regardless of whether chain-of-contracts cases are contract ELD cases or SELD cases, this is not a chain-of-contracts case. Accordingly, *Robins* and *Aguilar* are inapposite.

Syngenta also cites to injured-employee cases, which claims brought by an employer against a third-party tortfeasor who has injured one of the plaintiff's employees. (Syn. Br. at 20 n.47.) For the most part, these cases are not ELD cases, and Syngenta cites them only in passing. Further, to the extent even a few of these cases do rely on the ELD, they are highly distinguishable.

What Syngenta fails to mention is that there is case law addressing whether the SELD should be extended to apply to negligence claims brought by farmers against GM seed companies. The majority of these cases hold that the SELD does not apply. (*See* MDL Order at 19-46) (holding that the ELD does not apply to producer plaintiffs' claims)); *In re Starlink Corn Prods. Liab. Litig.*, 212 F. Supp. 2d 828, 842 (N.D. Ill. 2002) (refusing to apply the ELD); *Bayer CropScience LP v. Schafer*, 385 S.W.3d 822, 833 (Ark. 2011) (same); *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d 1004, 1017 (E.D. Mo. 2009) (same). Although these cases

considered the SELD in the context of negligence claims brought by farmers against GM seed manufacturers, with the exception of Judge Lungstrum's MDL Order, none of them provide a thorough analysis of the issues in this case. But Judge Lungstrum's MDL Order is directly on point.

Syngenta asks this Court to apply a common-law bar on recovery in circumstances where it has never been applied before, all while ignoring the persuasive decision made by Judge Lungstrum in rejecting identical arguments under virtually identical facts. In so arguing, Syngenta asks this Court to expand the common law in 22 different states. Further, it asks the court to do so for a doctrine that rests on tenuous grounds, in a situation where expansion does not serve the policies underlying the doctrine it seeks to expand. This Court should refuse Syngenta's invitation.

C. Applying the SELD would not serve the doctrine's underlying purposes.

There are two policy rationales underlying the ELD: (1) encouraging the use of contract to address economic loss; and (2) placing reasonable limits on liability. *See, e.g.*, *E. River S.S. Corp. v. Transamerica Delaval, Inc.*, 476 U.S. 858, 866-75 (1986). Neither rationale would be served by extending the SELD in this case.

1. The contract-based policy rationale does not apply.

The policy of encouraging the use of contracts to manage risk is multifaceted. Many cases state that the ELD is designed "to maintain a distinction between damage remedies for breach of contract and for tort." *See, e.g.*, *Giles v. GMAC*, 494 F.3d 865, 873 (9th Cir. 2007). Other cases state that the policy is to "encourage parties to negotiate liability provisions." *See, e.g.*, *Air Prods. & Chems., Inc. v. Eaton Metal Prods. Co.*, 272 F. Supp. 2d 482, 499 (E.D. Pa. 2003). Still others state that the doctrine is intended "to encourage the party best situated to

assess the risk [of] economic loss . . . to assume, allocate, or insure against that risk." *See e.g. Daanen & Janssen v. Cedarapids, Inc.*, 573 N.W.2d 842, 846 (Wis. 1998).

The contract-based policies that commonly underlie the ELD do not apply here. The Producer Plaintiffs did not have the opportunity to contract around their loss, either through insurance or by entering contracts with other grain market participants. Syngenta half-heartedly argues that "[p]roducers concerned about ensuring the exportability for their corn could have contracted for guarantees from grain elevators prohibiting commingling." (Syn. Br. at 35.) Setting aside whether these types of contracts were even possible, this argument ignores the realities of the modern corn market. Individual farmers do not have the market power to demand unique contracts with grain elevators.[18] Additionally, this argument is particularly unavailing given that Syngenta sued one of the country's largest grain buyers, Bunge, to *force* it to permit the commingling of non-Viptera corn with Viptera. *See Syngenta Seeds, Inc. v. Bunge N. Am., Inc.*, 820 F. Supp. 2d 953 (N.D. Iowa 2011). It cannot reasonably be disputed that Producer Plaintiffs did not have the opportunity to avoid loss through the use of contract.

Not only is the rationale underlying the ELD not served by applying the doctrine, those policies are actually furthered by declining to expand the doctrine to cover the claims asserted here. As argued by Syngenta, "[t]he stranger ELD thus 'encourages the party with the best information (that is, the party with knowledge of its own risk of loss) to decide whether to assume, allocate, avoid, or insure against its risk of loss.'" (Syn. Br. at 21 (*quoting Wiltz v. Bayer CropScience, Ltd. P'shp*, 645 F.3d 690, 697 (5th Cir. 2011)).) Here, *Syngenta* was the party in

[18] *Accord David v. Hett*, 270 P.3d 1102, 1103 (Kan. 2011) (holding that even where a plaintiff entered into a contract with the alleged tortfeasor, the ELD did not apply because of disparate bargaining positions that made the policy underlying the ELD inapplicable).

the best position, and arguably the only position, to avoid the loss, not the individual corn farmers.

Similarly, in discussing application of the ELD, the Restatement (Third) of Torts notes that "courts doubt that threats of such open-ended liability would usefully improve the incentives of parties to take precautions." Restatement (Third) of Torts § 7 cmt. b. That is not the case here. Holding Syngenta responsible for its actions would almost certainly dissuade other GM seed companies from taking similar actions for their own financial benefit.

2. The reasonable-limitations rationale is not served by applying the SELD.

The second policy underlying the SELD is avoiding the nearly endless flow of economic damages that could result from accidents. *See id.* This policy factor is best illustrated in lack-of-access cases, where an accident could cause open-ended and indiscriminate harm to the public at large. *See, e.g.*, *In re Chi. Flood Litig.*, 680 N.E.2d 265, 274 (Ill. 1997). Setting aside the fact that this case does not involve an accident—but rather a calculated decision by Syngenta to put farmers at risk for its own financial benefit—applying the SELD to Producer Plaintiffs' claims would not serve the policy of avoiding remote and indeterminate liability.

Syngenta relies almost exclusively on the policy of placing reasonable limits on liability to argue that the SELD precludes Producer Plaintiffs' claims. Syngenta analogizes to lack-of-access cases by stating "[c]onceptually, [Producer Plaintiff] claims are indistinguishable from claims that access to some other shared resource used by multiple parties for their businesses (a bridge, a wharf, etc.) was disrupted by a negligent act." (Syn. Br. at 25.) The MDL Order distinguished lack-of-access cases by stating that this is not a case "in which any member of the public could potentially assert a claim for economic loss, leading to remote and indeterminate liability." (MDL Order at 24.) The MDL Court reasoned that "the scope of liability is not

completely open-ended, as plaintiffs represent discrete classes of growers and sellers, all in an inter-connected market." *Id*. The MDL Court was correct. This case does not involve the open-ended liability at issue in lack-of-access cases. The injuries suffered by Plaintiffs are not shared by the public at large. Rather, the damage was incurred by a discrete (albeit large) group of participants in the highly interconnected grain market.

Applying the ELD to avoid open-ended liability is not about the scope or amount of damages at issue, but rather the reasonableness of holding the tortfeasor responsible for those damages. The question of how to place proper limitations on tort liability is a fundamental question of law going back to some of this country's seminal cases. *See, e.g*., *Palsgraf v. Long Island R.R. Co.*, 162 N.E. 99 (N.Y. 1928). For this reason, cases purporting to analyze the ELD, as well as those cases cited as so-called "ELD cases", often sound in duty and proximate cause. *See, e.g., La. ex rel. Guste*, 752 F.2d at 1023 (noting that the ELD is "a pragmatic limitation imposed by the Court upon the tort doctrine of foreseeability"); *Daanen & Janssen*, 573 N.W.2d at 846 ("At the heart of the distinction drawn by the economic loss doctrine is the concept of duty.").

Duty and proximate cause are the traditional limits on liability in tort. The role of the ELD is to supply an additional limitation where appropriate. For example, the Restatement (Third) of Torts rationalizes the ELD by stating that "[i]n some cases recognition of such claims would also result in liabilities that are indeterminate and out of proportion to the culpability of the defendant." *Id.* § 7 cmt. b. By way of example, a seminal ELD case, *Seely v. White Motor Co.*, 403 P.2d 145, 151 (Cal. 1965), discusses this concept in terms of the "nature of the responsibility" and analyzes what damages a tortfeasor can "appropriately be held liable [for]." *See also Long Motor Corp. v. SM&P Util. Res., Inc.*, No. 100,336, 2009 Kan. App. Unpub.

LEXIS 638, at *6 (Kan. App. 2009) (applying the ELD to prevent expansion of claims "beyond reason").

There is no danger of indeterminate damages—or damages "beyond reason"—in this case. As stated in the MDL Order, this case does not seek "liability that would be far out of proportion to the tortfeasor's culpability." (MDL Order at 24.) The Court reasoned that allowing producer Plaintiffs' claims would "not be disproportionate to Syngenta's specific wrongful conduct that caused the very injuries foreseen." *Id.* (citing *In re StarLink*, 212 F. Supp. 2d at 842). Moreover, this is not an accident case. Instead, Syngenta intentionally released Viptera into the market, fully aware of the damage that premature commercialization would cause and fully aware that Producers and Non-Producers alike would suffer the damage. Requiring Syngenta to take responsibility for the risks it knowingly created is not unreasonable, and the potential class of injured parties is not indefinite. Accordingly, the purpose of the SELD is not furthered by applying it in this case.

3. Special-relationship considerations do not warrant applying the SELD.

Syngenta asks this Court to apply the SELD in a novel context that has not been previously recognized by any of the relevant states, thereby demanding expansion of the doctrine. But this case shares more similarities with a category of cases that are *excepted* from the ELD than with those limited categories of cases in which the SELD has been applied, particularly as it relates to "special relationship" cases.

A special relationship between the parties precludes application of the ELD. *See Union Oil Co. v. Oppen*, 501 F.2d 558, 565 (9th Cir. 1974) (noting that "recovery for pure economic losses in negligence has been permitted in instances in which there exists 'some special relation between the parties.'") (citing Prosser, Law of Torts 952 (4th ed. 1971)); *Aikens v. Debow*, 541

S.E.2d 576, 589 (W. Va. 2000) (holding that the ELD applies absent some "other special relationship between the alleged tortfeasor and the individual who sustains purely economic damages sufficient to compel the conclusion that the tortfeasor had a duty to the particular plaintiff and that the injury complained of was clearly foreseeable to the tortfeasor"); *Duffin v. Idaho Crop Improvement Ass'n*, 895 P.2d 1195, 1201 (Idaho 1995) (noting that the special relationship exception is not limited to professional or quasi-professional relationships).

The California Supreme Court—which first adopted the ELD has held that a Court should consider six factors in determining whether to apply the "special relationship" exception to the ELD:

> (1) the extent to which the transaction was intended to affect the plaintiff, (2) the foreseeability of harm to the plaintiff, (3) the degree of certainty that the plaintiff suffered injury, (4) the closeness of the connection between the defendant's conduct and the injury suffered, (5) the moral blame attached to the defendant's conduct and (6) the policy of preventing future harm.

J'Aire Corp. v. Gregory, 598 P.2d 60 (Cal. 1979). Each of these factors militates against applying the SELD.

The "special relationship" exception exists to permit recovery where—like here—a duty of care exists and the defendant's breach of that duty causes economic loss. *See Tommy L. Griffin Plumbing & Heating Co. v. Jordan, Jones & Goulding, Inc.*, S.E.2d 85, 87 (S.C. 1995) (stating that the ELD does not prevent tort recovery where there is a "special relationship"). The reasoning in *Air Prods. & Chems., Inc. v. Eaton Metal Prods. Co.* elucidates the purpose of the "special relationship" exception. *Eaton* held that "[a] 'special relationship' exists where the relationship between the parties is such that it would be equitable to impose a duty to exercise due care to avoid purely economic loss." 272 F. Supp. 2d 482, 496 (E.D. Pa. 2003) (internal quotation omitted).

Here, Syngenta and Producer Plaintiffs are part of an interconnected market in which the parties rely on one another to act responsibly. This is underscored because Syngenta was urged by other participants in the interconnected market to take responsible actions with respect to the release and marketing of Viptera and cautioned about damages that would occur if it chose to proceed as it did. (NCC at 3-4.) Given this interconnected market, the policy rationales underpinning the "special relationship" exception are particularly applicable in this case and argue against application of the SELD.

D. Syngenta misreads the MDL Order.

Syngenta urges this Court to depart from the MDL Order based on the false premise that the MDL Court applied an incorrect rule of law. This argument is a red herring. According to Syngenta, Judge Lungstrum erred because he applied a "case-by-case approach" rather than a "bright line rule." (Syn. Br. at 23.) That assessment is faulty. Instead, Judge Lungstrum analyzed whether the ELD applied in the relevant states under analogous circumstances.

Courts routinely analyze whether the ELD should apply—including considering policy factors. *See, e.g.*, Oscar S. Gray, *Some Thoughts on "The Economic Loss Rule" and Apportionment*, 48 Ariz. L. Rev. 897, 901-02 (2006) (noting that courts often refuse to apply the ELD "where the reasons for limiting liability [are] absent"); *Fireman's Fund Ins. Co. v. SEC Donohue, Inc.*, 679 N.E.2d 1197, 1200 (Ill. 1997) (considering "[t]he policy interest supporting the ability to comprehensively define a relationship" in deciding whether to apply the ELD); *Rinehart v. Morton Bldgs., Inc.*, 305 P.3d 622, 624 (Kan. 2013) (holding that the ELD did not apply because "the doctrine's purposes would not be furthered by extending it to such claims"). Judge Lungstrum analyzed whether the ELD applied and correctly found that was inapplicable in this case. Therefore, Judge Lungstrum did not apply any ELD rule or exception, let alone an incorrect one. He simply decided that the doctrine did not apply.

Syngenta also misconstrues Judge Lungstrum's decision by stating that it creates a "new 'inter-connected industry' exception." It did not. Rather, Judge Lungstrum rightly concluded that the SELD should not be expanded as far as Syngenta seeks. *See e.g.*, *Rinehart v. Morton Bldgs., Inc.*, 305 P.3d 622, 626 (Kan. 2013) (framing the question of whether to apply the ELD to a particular tort claim as a question of whether to "extend the doctrine"). Judge Lungstrum merely cited the fact that the parties are part of an interconnected industry as one of the many reasons not to *extend* the SELD. Judge Lungstrum further reasoned that the SELD is inapplicable because the case already presents "a natural cutoff for liability" and does not require the ELD to artificially create one. (MDL Order at 14.)

The central part of MDL Order that Syngenta ignores is that the relevant states would not apply the SELD in this type of case given that the policies underlying the ELD would not be served. First, the Court correctly held that states that have not adopted the SELD doctrine would not adopt it in this case. (MDL Order at 23 (noting that "[a]lthough 22 states provide the governing law for plaintiff's negligence claims, only in seven has a court arguably applied the ELD in a stranger case").) Second, for those limited states that have applied the SELD in its traditional context, the Judge Lungstrum concluded that "those jurisdictions would [apply the doctrine] only in the right circumstances, in which the rationales for the doctrine would be furthered." (*Id*. (noting that the great majority of stranger ELD applications are lack-of-access or public nuisance cases).) Judge Lungstrum's well-reasoned order correctly concluded that the issues here do not support application of the SELD.

E. The relevant states would not apply the ELD here.

Minnesota

Syngenta tacitly recognizes that Minnesota's statutory ELD, Minn. Stat. § 604.101, does not bar the Producers' claims. (Syn. Br. at 38.) But relying on purported common-law ELD, Syngenta argues that the Producers' claims must be dismissed. Syngenta is wrong.

The Minnesota Legislature supplanted the judicially created ELD with Minn. Stat. § 604.101. The ELD "applies to claims only as stated in this section," Minn. Stat. § 604.101, subd. 5, which are confined to claims "by a buyer against a seller for harm caused by a defect in the goods sold or leased, or for a misrepresentation relating to the goods sold or leased."[19] Minn. Stat. § 604.101, subd. 2. From the plain language and the accompanying reporter's notes, it is clear that no common-law ELD survives in Minnesota. *See id.*, rep. note ("[T]he first sentence of Subdivision 5 means that: (1) the statute exhaustively states the economic loss doctrine, and (2) there is no residual common law economic loss doctrine.").

Syngenta ignores the plain language of the statute to argue that the common-law ELD still applies outside the sale-of-goods context. Syngenta's argument must be rejected for two reasons.

First, the Minnesota Court of Appeals rejected this very argument in a published decision. In *Ptacek v. Earthsoils, Inc.*, 844 N.W.2d 535, 537-38 (Minn. App. 2014), farmers sued a manufacturer that sold and recommended fertilizer based on analyses of soil types and field histories. They alleged the fertilizer contained insufficient nitrogen, resulting in yield loss. The trial court correctly held that plaintiffs did not assert a product-defect claim barred by section 604.101, but also held that the negligence claim was barred by the common-law ELD. The

[19] The statute does not apply to statutory misrepresentation claims, and allows common law misrepresentation (of a seller) "made intentionally or recklessly." Minn. Stat. § 604.101, subd. 4.

appellate court reversed noting that section 604.101 "exhaustively states the [ELD]," and "there is no residual common law [ELD]." *Id.* (quoting Minn. Stat. § 604.101 reporter's notes; citing 27 *Minnesota Practice, Products Liability Law* § 13.15). "Because section 604.101 abrogates the common law and sets forth the full extent of the [ELD] as it applies to bar claims arising on or after August 1, 2000, the district court's holding as to the negligence claim was in error." *Id.* at 539.

In a footnote, Syngenta attempts to distinguish *Ptacek* as applicable only to the sale of goods. (Syn. Br. at 40 n.68.) Nothing in *Ptacek*, however, limits its application in this manner. Further, the decision in *Ptacek* is consistent with recent precedent from the federal district court in Minnesota. *See Smith v. Questar Capital Corp.*, No. 12-CV-2669, 2013 U.S. Dist. LEXIS 108703 (D. Minn. Aug. 2, 2013). In *Smith*, the plaintiff, a purported class representative, filed suit alleging violations of Minnesota's securities laws, common-law negligence, and common-law negligent misrepresentation. *Id.* at *4-5. Defendant filed a motion to dismiss, arguing that the negligence and negligent misrepresentation claims were barred by the ELD. The court denied the motion, reasoning that "[i]n Minnesota, the [ELD] is codified at Minn. Stat. §§ 604.10-101." Because the sale at issue concerned investment securities, "not tangible personal property," the court held they were "not 'goods' under Minn. Stat. §§ 604.10-101." Thus, the court held that the ELD did "not preclude [plaintiff's] negligence and negligent misrepresentation claims." *Id.* at *33. If Syngenta were correct, the court would have applied the common-law economic loss doctrine. It did not.

Second, Syngenta relies on extrinsic sources, but the cardinal rule of statutory interpretation is that, "[w]hen legislative intent is clear from the statute's plain and unambiguous language, we interpret the statute according to its plain meaning without resorting to other

principles of statutory interpretation." *City of Brainerd v. Brainerd Invs. P'ship*, 827 N.W.2d 752, 755 (Minn. 2013) (declining "invitation to rely on extrinsic sources" to interpret statute because "the statute is not ambiguous"); *see also* Minn. Stat. § 645.16 ("When the words of a law in their application to an existing situation are clear and free from all ambiguity, the letter of the law shall not be disregarded under the pretext of pursuing the spirit.").

Section 604.101 expressly provides that "[t]he economic loss doctrine applies to claims only as stated in this section." Minn. Stat. § 604.101. It also provides that it "applies to any claim . . . regardless of whether article 2 or article 2A of the Uniform Commercial Code under chapter 336 governed the sale or lease that caused the seller to be a seller and buyer to be a buyer[.]" *Id.*, subd. 2(2). Syngenta's interpretation would render the statute's express application to situations outside of "article 2 or article 2A of the Uniform Commercial Code" meaningless. *See* Minn. Stat. § 645.16 ("Every law shall be construed, if possible, to give effect to all its provisions."). That is not to interpret the statute, but to rewrite it.

Based on the plain language of Minn. Stat. § 604.101, Judge Lungstrum "reject[ed] Syngenta's argument that a common-law ELD survives in Minnesota" and correctly held that "the Minnesota plaintiffs' claims are not barred by the ELD." (MDL Order at 26.) This Court should do the same.

Illinois

No Illinois state court has ever applied the SELD in the situation presented by this case and nothing supports the notion that Illinois courts would extend the doctrine where the policies

behind the doctrine are not served, and where Syngenta had an independent duty to act reasonably to avoid the very harm that occurred.[20]

Syngenta argues that because Illinois applied the SELD in *In re Chicago Flood Litigation*, 680 N.E.2d at 274-76, it must be applied here. Syngenta makes the misguided argument that because the SELD has been applied in one of the limited categories in which it served the policies underlying the doctrine, it must be applied to all claims. *Chicago Flood* is a lack-of-access case. Thus, it is uninstructive to the question faced by this Court, which is whether an Illinois court would apply the SELD here. The answer is no.

First, Illinois courts have expressly stated that "[i]n mapping the future course of the [ELD], this court should consider the policy behind it." *Congregation of the Passion v. Touche Ross & Co.*, 636 N.E.2d 503, 527 (Ill. 1994). The policies behind the ELD are not served by applying it here; therefore, the ELD should not be applied.

Second, Illinois courts have stated that "[t]he [ELD] does not bar recovery in tort for the breach of a duty that exists independently of a contract." *Id.* at 515; *2314 Lincoln Park West Condo. Ass'n v. Mann, Gin, Ebel & Frazier, Ltd.*, 555 N.E.2d 346, 352 (Ill. 1990) (recognizing that "[t]he principle common to those decisions [where the ELD is not applied] is that the defendant owes a duty in tort to prevent precisely the type of harm, economic or not, that occurred"). Here, Syngenta had a duty to participants in an interconnected market not to take action that it knew would cause an undue risk of harm.

---

[20] Syngenta cites *Sample v. Monsanto Co.*, 283 F. Supp. 2d 1088 (E.D. Mo. 2003). *Sample* is not an Illinois state case, does not cite Illinois law, and overstates the ELD without analysis. Conversely, Judge Lungstrum's Order provides a thorough analysis of the ELD under Illinois law and holds that it does not apply in this case.

The SELD has never been applied by an Illinois court in this context. Because applying it in this context would not serve the policies underlying the doctrine, and because Syngenta had a duty to prevent the precise harm that occurred, the SELD does not apply under Illinois law.

Iowa

Syngenta's analysis of Iowa law relating to the ELD exemplifies its attempt to expand the ELD far beyond the limited circumstances in which it has previously been applied, again arguing that because the SELD has been applied in *some* clearly identifiable circumstances, it *must* be applied in *all* circumstances.[21] Iowa law does not support this conclusion.

There is no dispute that Iowa has applied the SELD in limited circumstances, as Judge Lungstrum recognized in his analysis. (MDL Order at 38.) *See Annett Holdings, Inc. v. Kum & Go, L.C.*, 801 N.W.2d 499 (Iowa 2011) (applying the SELD in a chain-of-contracts case where the application of tort law would "supplant a consensual network of contracts"); *Neb. Innkeepers, Inc. v. Pittsburgh-Des Moines Corp.*, 345 N.W.2d 124 (Iowa 1984) (applying the SELD in a lack-of-access case). But this is not a lack-of-access or chain-of-contracts case. And the rationales underpinning the SELD in those cases do not apply here.

Rather, the question before the Court is whether Iowa courts would *expand* the ELD to the facts presented here. Case law suggests Iowa courts would decline this invitation where—like

---

[21] Syngenta cites *Anderson Plasterers v. Meinecke*, 543 N.W.2d 612, 613 (Iowa 1996) and *Gosch v. Juelfs*, 701 N.W.2d 90, 91 (Iowa 2005), as examples of the application of the SELD in Iowa. These cases involved questions of whether an employer could recover economic damages based on an employee's injury caused by a third party. As noted in *Anderson Plasterers*, the rationale for precluding the employer's recovery of purely economic damages was two-fold: (1) the Restatement (Second) of Torts § 766(c) did not recognize a claim for "unintentional interference" with the performance of a contract or making the performance "more expensive or burdensome"; and (2) unlike under English common law, which recognized a claim for *per quod servitium amisit* and permitted a "master to recover for the loss of a servant's services," the modern employer-employee relationship no longer treats employees like property. These rationales are inapplicable in this case, and do not support applying the ELD here.

here—the policies underlying the ELD are inapplicable. *See Van Sickle Constr. Co. v. Wachovia Commer. Mortg., Inc.*, 783 N.W.2d 684 (Iowa 2010) (declining to expand the ELD to negligent misrepresentation claims after "a review of the purposes of the ELD and the situations in which it has been applied convinces [the court] that it provides no bar to the recovery of economic losses caused by a negligent misrepresentation"); *accord St. Malachy Roman Catholic Congregation of Geneseo v. Ingram*, 841 N.W.2d 338, 351-52 (Iowa 2013) (recognizing and affirming previous decision to reject expanding the ELD to cases involving principal-agent relationships). The Iowa Supreme Court's analysis in *Van Sickle* relied on a nearly identical policy analysis approach as Judge Lungstrum in determining whether the purposes of the ELD were furthered by applying the doctrine in a new context. *Van Sickle*, 783 N.W.2d at 692. Judge Lungstrum's decision properly analyzed Iowa precedent and, like the Iowa Supreme Court, declined to expand the ELD where the purposes underlying the doctrine are inapplicable.

Louisiana

Louisiana does not apply the ELD, but rather engages in a case-by-case duty-risk analysis to determine whether the policies underlying the doctrine are implicated. *See Maw Enters., L.L.C. v. City of Marksville*, 149 So. 3d 210, 221 (La. 2014) (noting that the Louisiana Supreme Court "abandoned the per se rule excluding recovery [of economic losses] in favor of a case-by-case application of the duty-risk analysis"). Thus, any analysis of Louisiana law *must* consider the policies underpinning the ELD. As discussed in detail above, and as noted in Judge Lungstrum's Order declining to apply the SELD, the rationale supporting the doctrine is not furthered by applying it here. (MDL Order at 24.)

Applying the ELD here would be inconsistent with Louisiana law. In *England v. Fifth Louisiana Levee Dist.*, 167 So. 3d 1105, 1107 (La. App. 2015), for example, the court upheld the

plaintiffs' recovery of "economic damage only for the loss of use of their water" after they were required to stop using it for fear that the defendant had negligently contaminated it with herbicide. Saliently, *England* permitted recovery even though the plaintiffs water supply had not been contaminated—and thus there was no actual damage to property—after conducting its duty-risk analysis and finding a connection between the duty breached by the defendant and the purely economic damage suffered by plaintiffs. *Id.* at 1111. *England* directly demonstrates that a Louisiana court would not apply the ELD here.

Conversely, Syngenta cites *Wiltz v. Bayer CropScience, Ltd.*, 645 F.3d 690 (5th Cir. 2011), which is inapposite. *Wiltz* specifically noted that "although Bayer may have foreseen harm to the crawfish industry generally, *there is no indication that it should have foreseen harm to the plaintiffs specifically*." 645 F.3d at 702 n.16 (emphasis added). Plaintiffs here allege that Syngenta not only *could* foresee the harm it caused, but that the harm was "indeed foreseen" by Syngenta. (NCC ¶ 226.) Thus, neither the policies underlying the ELD nor Louisiana case law support application of the doctrine in this case.

Missouri

Syngenta insists that Missouri has adopted the SELD based on a case decided over 100 years ago, *Brink v. Wabash Ry. Co.*, 60 S.W. 1058 (Mo. 1901). (Syn. Br. at 45.) *Brink* relied on English common law and determined that parents could not maintain an action against the railroad for the negligent death of their son, which caused them to lose his financial support. *Id.* at 1059-60. The court carefully noted, however, that the outcome would be different had the railroad acted willfully. *Id.* at 1060.

Moreover, as the MDL Order observed, "much has changed in tort law since that case was decided," and thus *City of St. Louis v. Am. Tobacco Co.*, 70 F. Supp. 2d 1008, 1013 (E.D.

Mo. 1999), declined to follow *Brink*. (*See* MDL Order at 39.) *City of St. Louis* reasoned that "claims and issues" being considered differed substantially from those in *Brink*; the same is true here. Moreover, Missouri has repeatedly recognized exceptions in other cases. *Bus. Men's Assurance Co. of Am. v. Graham*, 891 S.W.2d 438, 454 (Mo. App. 1984) (refusing to apply the ELD to a claim relating to architectural services);[22] *B.L. Jet Sales, Inc. v. Alton Packaging Corp.*, 724 S.W.2d 669, 673 (Mo. App. 1987) (concluding negligent misrepresentation cases are in a different category than cases in which the ELD has been applied). *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d 1004, 1016-17 (E.D. Mo. 2009), concluded that the SELD did not bar rice contamination claims, and noted "Missouri has traditionally allowed tort claims even where the only damages sought were economic."

Syngenta cites *Dannix Painting, LLC v. Sherwin-Williams Co.*, No. 4:12-CV-01640, 2012 U.S. Dist. LEXIS 170845 (E.D. Mo. Dec. 3, 2012), to argue that the SELD would apply in Missouri. (Syn. Br. at 45.) In doing so, Syngenta ignores the rationale of the ELD: preventing "tort law from 'altering the allocation of costs and risks negotiated by the parties.'" *Dannix*, 2012 U.S. Dist. LEXIS 170845, at *3-4 (citation omitted). Thus, as Judge Lungstrum concluded, there is no basis for predicting that Missouri courts would apply the SELD "without consideration of whether the purposes of the rule would be served." (MDL Order at 40.)

Ohio

Ohio courts have applied the SELD only in public-nuisance claims. *RWP, Inc. v. Fabrizi Trucking & Paving Co.*, No. 87382, 2006 Ohio App. LEXIS 4958 (Sept. 28, 2006). This Court

[22] Syngenta attempts to distinguish *Graham* by analogizing it with a professional malpractice claim. (Syn. Br. at 45.) This analogy ignores the reasoning of the court: even where a contract exists, damages arising from a breach of duty are still recoverable. *Graham*, 891 S.W.2d at 454.

should not expand the SELD in Ohio where, as here, applying it would not serve the SELD's underlying policies and where there is an independent duty precluding the ELD.

Syngenta argues that applying the ELD in *River Corp. Group II v. Conrail, Inc.*, 549 F. Supp. 2d 981 (N.D. Ohio 2000), mandates applying it here because *Ashtabula* "squarely rejected the theory that the ELD does not bar tort claims that are independent of a contract claim." (Syn. Br. at 46.) Syngenta's reliance on *Ashtabula* is misleading and misplaced. *Ashtabula* is a public-nuisance case and the court's decision is limited to that context. Further, Syngenta misstates the holding. *Ashtabula* simply recognized that the plaintiff was "not alleging a tort independent of a breach of contract" without further discussion. Finally, the issue was not whether there was a tort claim without an accompanying contract claim, but that the defendant had no duty in tort.

The Ohio Supreme Court has held that the ELD does not apply where there is a "discrete, preexisting duty in tort." *Corporex Dev. & Constr. Mgmt. v. Shook, Inc.*, 835 N.E.2d 701, 705 (Ohio 2005); *Campbell v. Krupp*, 961 N.E.2d 205 (Ohio App. 2011); *see also* MDL Order at 41 ("Other courts in Ohio, however, have held that the ELD does not apply to a claim based on the breach of a non-contractual duty."). Plaintiffs have alleged that Syngenta had an independent tort duty.

Ohio courts have deemed it appropriate to consider the policies underlying the ELD in determining whether the doctrine should be applied. *Eysoldt v. Imaging*, 957 N.E.2d 780, 785 (Ohio App. 2011) (considering "the fundamental policy consideration underlying the economic loss rule" in deciding not to apply the doctrine). Because the SELD has never been applied under Ohio law in the context presented by this case, Syngenta had an independent duty in tort, and applying the SELD here would not serve the doctrine's underlying policies, the SELD does not apply under Ohio law.

Tennessee

Tennessee courts have applied the SELD only in lack-of-access cases. (MDL Order at 42 (citing *United Textile Workers, etc. v. Lear Siegler Seating Corp.*, 825 S.W.2d 83, 84 (Tenn. App. 1990); *Ladd Landing, LLC v. TVA*, 874 F. Supp. 2d 727, 728 (E.D. Tenn. 2012).) Syngenta relies solely on *Lear Siegler* and *Ladd Landing* to argue that the SELD should be expanded to apply in this case. This Court should reject Syngenta's argument for several reasons.

First, Tennessee Courts consider the policies underlying the ELD and SELD when determining if those doctrines apply. For instance, in *Lear Siegler*, the Court discussed the possibility for "limitless liability, or liability out of proportion to the defendants fault" and other "policy reasons" when deciding whether to apply the ELD. *Id*. at 85; *see also Lincoln Gen. Ins. Co. v. Detroit Diesel Corp.*, 293 S.W.3d 487, 492 (Tenn. 2009) (adopting an approach to ELD that "fairly balances the competing policy interests"). Tennessee courts are unlikely to expand the SELD in this case because the policies underlying the doctrine would not be served by its application.

Second, Tennessee Courts have indicated that the ELD should be limited to product-liability cases. As stated in *Ham v. Swift Transp. Co.*, "[t]he Tennessee Court of Appeals has since implicitly restricted the economic loss doctrine to claims involving products liability or the sale of goods, at least where the plaintiff can establish a sufficiently direct relationship between the defendant's negligent act and the plaintiff's economic loss." 694 F. Supp. 2d 915, 922 (W.D. Tenn. 2010). Since Tennessee courts have so limited the ELD, they are unlikely to expand the SELD into a new category of case in which the policies underlying the doctrine are not served.

Texas

Texas courts also consider the policies underlying the ELD in determining whether to apply the doctrine. *See LAN/STV v. Martin K. Eby Constr. Co.*, 435 S.W.3d 234 (Tex. 2014) (stating that "whether and how to apply the economic loss rule does not lend itself to easy answers or broad pronouncements. Rather, as we have already observed, the application of the [ELD] depends on an analysis of its rationales in a particular situation"). In *LAN/STV*, two policy rationales supported applying the ELD: (1) avoiding indeterminate and disproportionate liability; and (2) deference to contract law. *Id.* at 240-41. The court carefully confined its opining by noting that a "duty may exist when the rationales just stated for limiting recovery are 'weak or absent.'" *Id.* at 241. Neither of these policy rationales supports applying the ELD in this case. As Judge Lungstrum explained, his "consideration of the pertinent rationales in deciding whether to apply the ELD in this case [was] consistent with the approach mandated by the Texas Supreme Court." (MDL Order at 44.)

Further, the primary case law cited by Syngenta in its attempt to undermine Judge Lungstrum's order *supports* Plaintiffs' arguments against applying the ELD. For example, *Sterling Chems., Inc. v. Texaco Inc.*, 259 S.W.3d 793, 799-800 (Tex. App. 2007), applied the ELD only because "although [plaintiff] may not have been in privity with [defendant], the economic losses claimed . . . were the subject matter of [plaintiff's] product supply agreement with [a third party], and the contract specifically addressed the issue of consequential damages." Thus, *Sterling* is a classic chain-of-contracts case applying the ELD to protect the bargained-for contract rights negotiated between parties in a series of linked contracts. *Sterling* is inapplicable here.

Wisconsin

Syngenta relies on *Midwest Knitting Mills, Inc. v. United States*, 950 F.2d 1295 (7th Cir. 1991), to argue that Wisconsin would unequivocally apply the SELD here. But in the 25 years after *Midwest*'s prediction that "Wisconsin would decline in all circumstances to allow a negligence suit for the recovery of only economic damages, even where there is no contractual relationship,"[23] Wisconsin courts have fulfilled that prediction. Instead, they have remained steadfast in applying the ELD only to product liability and contract claims. (MDL Order at 44-45.)

For example, *United Concrete & Construction, Inc. v. Red-D-Mix Concrete, Inc.*, 836 N.W.2d 807, 822 (Wis. 2013), affirmed that the ELD barred claims related to concrete work done pursuant to a contract because to hold otherwise "would prevent contractual rules from serving their legitimate function in governing commercial transactions." The court went on, however, to hold that claims unrelated to the concrete, *i.e.*, for landscaping, were not subject to the ELD because they were not governed by a contract. *Id.* at 823 n.19, *see also Ins. Co. of N. Am. v. Cease Elec. Co.*, 688 N.W.2d 462 (Wis. 2004) (refusing to extend the ELD to service contracts because "a recognition of tort actions in cases under the U.C.C. would upset the remedies contained in the U.C.C.; when the rationale is not applicable, *i.e.*, when the U.C.C. does not apply, there is no reason for the [ELD] to apply"); *Brew City Redevelopment Grp., LLC v. Ferchill Grp.*, 724 N.W.2d 879, 884 (Wis. 2006) (concluding the ELD did not apply because claims were not predicated on contract); *Walker v. Ranger Ins. Co.*, 711 N.W.2d 683, 687 (Wis.

---

[23] *Custom Underground, Inc. v. Mi-Tech Servs., Inc.*, No. 10-CV-222-JPS, 2011 WL 5008343 (E.D. Wis. Oct. 20, 2011), accepted *Midwest Knitting*'s broad proclamation without any analysis of the Wisconsin opinions that subsequently refused to apply the ELD outside of the product liability or contractual context. (*See* MDL Order at 45 n.14.)

App. 2006) (declining to expand the ELD beyond product liability or contract cases because "[t]he ELD exists to compel parties bound by a contractual relationship to pursue damages via contract, not to prevent an injured party from bringing a potentially viable negligence claim when no contract exists").

Alabama

Alabama courts have not applied the ELD outside the context of product-liability cases. *Lloyd Wood Coal Co. v. Clark Equip. Co.*, 543 So. 2d 671, 673 (Ala. 1989); *see also Vesta Fire Ins. Corp. v. Milam & Co. Constr.*, 901 So. 2d 84, 107 (Ala. 2004) (rejecting the ELD absent evidence that damage was caused by a "product" within the meaning of Alabama's product-liability statutes); *Wellcraft Marine, a Div. of Genmar Indus., Inc. v. Zarzour*, 577 So. 2d 414 (Ala. 1990) (applying the ELD to a defective-boat claim); *Tull Bros. v. Peerless Prods., Inc.*, 953 F. Supp. 2d 1245, 1256 (S.D. Ala. 2013) (holding that the ELD did not apply in an action by a subcontractor where there was no damage to the product itself, but rather only the cost to install a new one). Syngenta has not—and cannot—point to any authority to support its argument that the Alabama courts would so drastically expand the ELD to apply here.

Arkansas

Arkansas has completely rejected applying the ELD, even in the strict-liability context. *See Bayer CropScience LP v. Schafer*, 385 S.W.3d 822, 832 (Ark. 2011) (declining to "extend the doctrine to claims involving negligence" because of allegations of damage to property); *Blagg v. Fred Hunt Co., Inc.*, 612 S.W.2d 321, 324 (Ark. 1981) (rejecting application in the strict-liability context). The MDL Order concluded that "at least one federal court has declined to apply the ELD under Arkansas law in the stranger context." (MDL Order at 27 (citing *Carvin v. Ark. Power & Light Co.*, No. 90-6055, 1991 WL 54048, at *4-5 (W.D. Ark. Nov. 26, 1991),

which stated "[t]he question then is not whether the so-called economic loss rule applies but whether the plaintiffs have a right to recover losses for the kind of harm they sustained").) Syngenta attacks this as "flatly incorrect." (Syn. Br. at 53.) In so doing, Syngenta ignores that recovery was barred in *Carvin* because plaintiffs did not have a sufficient "property interest" to warrant recovery, not because the court applied the SELD. *Carvin*, 1991 WL 54048, at *5. Judge Lungstrum's analysis of Arkansas law was correct, and he properly declined to apply the SELD in a state that has not even adopted the ELD.

Colorado

Colorado law clearly precludes applying the ELD to any claim based on the breach of a duty that is independent of any contractual obligation. *See, e.g., S K Peightal Eng'rs, Ltd. v. Mid Valley Estate Sols. V, LLC*, 342 P.3d 868, 875 (Colo. 2015) ("If, however, the duty breached arises 'independently of any contract duties between the parties,' then a tort action premised on that breach remains viable."); *Cosmopolitan Homes, Inc. v. Weller*, 663 P.2d 1041, 1042 (Colo. 1983) (the ELD will not bar a tort claim against a homebuilder because it has an independent duty to act without negligence in constructing the home); *Metro. Gas Repair Serv., Inc. v. Kulik*, 621 P.2d 313 (Colo. 1981) (holding that the contractual relationship gave rise to a common-law duty for defendant to perform its work with reasonable care and skill). Here, the duties alleged by Plaintiffs arise from common law, not contract, and are thus independent of any contractual duty owed by Syngenta. Thus, the SELD does not bar Plaintiffs' claims.

Indiana

As Judge Lungstrum noted, Indiana courts apply the ELD in a limited number of contexts. *See Indianapolis-Marion Cnty. Pub. Library v. Charlier Clark & Linard, P.C.*, 929 N.E.2d 722, 736-37, 742 (Ind. 2010) (applying the ELD to preclude purely economic recovery in

a chain-of-contracts case); *Gunkel v. Renovations, Inc.*, 822 N.E.2d 150, 152 (Ind. 2005) (applying the ELD to claims for failure of performance of products or services). In seeking to invoke the ELD, Syngenta relies on three decisions: *U.S. Bank, N.A. v. Integrity Land Title Corp.*, 929 N.E.2d 742, 748 (Ind. 2010); *Charlier*, 929 N.E.2d at 739; and *Morton v. Merrillville Toyota, Inc.*, 562 N.E.2d 781, 786 (Ind. App. 1990). (Syn. Br. at 54-55.) None of these cases support applying the ELD.

Morton affirmed that an employer could not recover solely economic losses resulting from an injury to an employee, reasoning that any such claim was "outmoded" and the "policy reasons for adopting it are dubious." 562 N.E. 2d at 786. The court cited the potential "multiplicity of actions" whereby an employee would sue the tortious actor for the injury incurred while the employer would file a parallel suit seeking damages for lost revenue and profits. *Id. Morton* provides no evidence to support application of the ELD in this case.

Charlier analyzed the context in which the ELD had previously applied, *i.e.*, product liability and contract claims. 292 N.E.2d at 741. *Charlier* then applied the ELD reasoning "there is no liability in tort to the owner of a major construction project for pure economic loss caused unintentionally by contractors, subcontractors, engineers, design professionals, or others engaged in the project with whom the project owner, whether or not technically in privity of contract, is connected through a network or chain of contracts." *Id.* Thus, *Charlier* was a chain-of-contracts case and is inapposite.

Finally, Syngenta cites *U.S. Bank* to argue that Indiana courts have "made clear that the 'existence or non-existence of a contract is not the dispositive factor for determining whether a

tort action [for economic loss] is allowable.'"[24] (Syn. Br. at 54.) But *U.S. Bank* determined whether the ELD applied to claims of negligent misrepresentation by a title insurer, with the court *reversing* the trial court's dismissal of the plaintiffs tort claim and permitting the plaintiff to pursue the claim for solely economic damages. 929 N.E.2d at 749-50. Moreover, in so holding, the court favorably cited a prior decision that observed: "[A] defendant's exposure to tort liability is best framed in terms of what the defendant did. . . . To the extent that a plaintiff's interests have been invaded beyond mere failure to fulfill contractual obligations, a tort remedy should be available." *Id.* at 749 (quoting *Greg Allen Constr. Co., Inc. v. Estelle*, 798 N.E.2d 171, 173 (Ind. 2003)). Indiana case law does not support applying the ELD.

Kansas

Under Kansas law, the ELD has been applied in product-defect cases. *See Elite Profs., Inc. v. Carrier Corp.*, 827 P.2d 1195, 1197 (Kan. App. 1992). In *Rinehart v. Morton Buildings, Inc.*, 305 P.3d 622, 625-26 (Kan. 2013), the Kansas Supreme Court explicitly declined to expand the ELD to cover claims of negligent misrepresentation because "the duty at issue arises by operation of law and the doctrine's purposes are not furthered by its application under these circumstances." *Rinehart* acknowledged that the ELD is "still unfolding" under Kansas law, but declined to "extend the doctrine" where the rationales and policies underpinning the doctrine are not present. *Id.*; *see also Bryant Manor, LLC v. Bank of Am., N.A. (In re Manor, LLC)*, 434 B.R. 629, 636 (Bankr. D. Kan. 2010) (declining to expand the ELD where the plaintiff was not

[24] Syngenta has omitted a substantial portion of the quotation, which properly reads: "Moreover, consistent with our opinion in *Indianapolis-Marion County Public Library*, the existence or non-existence of a contract is not the dispositive factor for determining whether a tort action is allowable where special circumstances and overriding public policies have carved out exceptions for tort liability." The omitted portion of the quotation demonstrates that Indiana courts engage in a public-policy analysis to determine whether the policies underlying the ELD are served by its application.

"seeking to circumvent claims that could be brought under contract law by instead bringing tort claims"). Accordingly, in considering the expansion of the ELD from its traditional application under Kansas law—product defect cases—this Court *must* consider whether the policies underpinning the ELD support its application. As demonstrated above, and in the detailed analysis of the MDL Order, those policies do not support expansion of the doctrine to apply the ELD here.

Syngenta relies on *Long Motor Corp. v. SM & P Utility Res., Inc.*, 214 P.3d 707 (Kan. App. 2009) (unpublished), to argue that the SELD should be expanded in Kansas to preclude Plaintiffs' claims. (Syn. Br. at 55.) *Long Motor* affirmed the application of the ELD outside of the traditional product-liability context after a thorough policy and factual analysis. This case is distinguishable because *Long Motor* feared that permitting recovery would "expand the potential pool of plaintiffs beyond reason." *Id.* at *6. Here there is an identifiable group of claimants who participated in an interconnected market and whose injuries were actually foreseen by Syngenta. Further, *Long Motor* was cabined to the facts of that case, with the notation that the claim was dismissed "[d]ue to these public policy concerns, and based on the specific facts presented here." *Id*. Significantly, this Court should be hesitant to contradict Judge Lungstrum's conclusion that Kansas courts would not apply the ELD here. (MDL Order at 24.)

Kentucky

Under Kentucky law, the ELD has been limited to product-liability and sales cases. *Giddings & Lewis, Inc. v. Indus. Risk Insurers*, 348 S.W.3d 729, 738 (Ky. 2011), adopted the ELD, by recognizing that "economic losses, in essence, deprive the purchaser of the benefit of his bargain and that such losses are best addressed by the parties' contract and relevant provisions of Article 2 of the Uniform Commercial Code." Kentucky's federal courts have held

that where a "negligence claim does not arise from the sale of a defective product in a commercial transaction . . . under the controlling authority of Kentucky's highest court, the [ELD] does not apply." *NS Trans. Brokerage Corp. v. Louisville Sealcoat Ventures, LLC*, No. 3:12-CV-00766 (JHM), 2015 WL 1020598, at *3 (W.D. Ky. Mar. 9, 2015). Both of these cases demonstrate that in Kentucky, the ELD is confined to product-liability and contract cases.

Finally, a concurring opinion in *Presnell Construction Managers, Inc. v. EH Construction, LLC*, 134 S.W.3d 575, 589-90 (Ky. 2004), observed that *if* the economic loss doctrine *were* to be expanded, exceptions should be recognized for "special relationships" that "by their nature automatically trigger an independent duty of care" and instances where "a duty independent of any contractual obligations" exists, precluding application of the rule. *Id.* Thus, the *only* applicable analysis is firmly against applying the ELD in this case.

Michigan

Michigan law makes it abundantly clear that the ELD applies only where "there was a contract or commercial transaction that governed the plaintiff's economic expectations." *Quest Diagnostics, Inc. v. MCI WorldCom, Inc.*, 656 N.W.2d 858, 866 (Mich. App. 2002). Here, there is no contract or commercial transaction that governed Plaintiffs' economic expectations. Nevertheless, Syngenta argues that this Court "should predict that the Michigan courts would apply the SELD in this 'mass tort' action." (Syn. Br. at 56.) As support, Syngenta cites to a single decision in which the defendants argued that there *should* be an exception to the ELD in "mass tort claims" and the Michigan Court of Appeals refused to even consider that argument. *Quest Diagnostics*, 656 N.W.2d at 866. This fact was explicitly noted by Judge Lungstrum in rejecting Syngenta's recycled argument. (MDL Order at 33.) There is no basis to predict that a Michigan court would apply the SELD here.

Mississippi

Syngenta contends that Mississippi has "not addressed, let alone rejected, the stranger ELD." (Syn. Br. at 56.) This argument loses the forest for the trees. The Mississippi Supreme Court has not adopted the ELD; thus, of course it has not expressly rejected the SELD.

Moreover, Syngenta ignores that the Mississippi Court of Appeals and federal courts have repeatedly observed that the ELD applies only in product-liability cases. *State Farm Mut. Auto. Ins. Co. v. Ford Motor Co.*, 736 So. 2d 384, 387 (Miss. App. 1999); *Lyndon Prop. Ins. Co. v. Duke Levy & Assocs. LLC*, 475 F.3d 268, 274 (5th Cir. 2007) (refusing to apply the ELD to a contract case because no Mississippi case applies the ELD outside the realm of product liability); *BC's Heating & Air & Sheet Metal Works, Inc. v. Vermeer Mfg. Co.*, 2012 U.S. Dist. LEXIS 24420, at *26-27 (S.D. Miss. Feb. 27, 2012) (considering a motion to dismiss and refusing to apply the ELD where claims based on contract, tort, warranty, and product liability were pled because the ELD applies only to product liability cases, and barring Plaintiffs' claims would "effectively choose [the] theory of liability"); *Photo Arts Imaging Prof'ls, LLC v. Best Buy Co.*, 2011 U.S. Dist. LEXIS 135596, at *10-11 (S.D. Miss. Nov. 22, 2011) (denying motion for summary judgment based on the ELD because the ELD applies to only product liability cases and "Plaintiff's claims sound in both tort and contract, and the Court does not have sufficient evidence to sort out which rubric is a closer fit"); *Fed. Ins. Co. v. Gen. Elec. Co.*, 2009 U.S. Dist. LEXIS 112931, at *22 (S.D. Miss. Dec. 3, 2009) (noting that in Mississippi the ELD "has not been extended beyond product liability cases"); *Miss. Phosphates Corp. v. Furnace & Tube Serv., Inc.*, 2008 U.S. Dist. LEXIS 11294 (S.D. Miss. Feb. 1, 2008) (denying motion to dismiss because the ELD does not apply to non-product liability cases); *Brasscorp v. Highside Chems., Inc.*, 2007 U.S. Dist. LEXIS 41690 (S.D. Miss. June 7, 2007) (denying motion for summary

judgment because the ELD applies only to product liability cases). (S*ee also* MDL Order at 33-34. This is not a product-liability case. Therefore, in Mississippi, the ELD would not bar Plaintiffs' claims.

Nebraska

Nebraska has "expressly limited" the ELD to two contexts: product liability and situations where the alleged breach is based on a contractual duty, and no independent tort duty exists. *Lesiak v. Cent. Valley Ag Coop.*, 808 N.W.2d 67, 81-82 (Neb. 2012); *see also Thurston v. Nelson*, 2014 Neb. App. LEXIS 41, at *21 (Neb. App. Feb. 4, 2014); *E3 Biofuels-Mead, LLC v. Skinner Tank Co.*, 2014 U.S. Dist. LEXIS 12302, at *4 (D. Neb. Jan. 30, 2014) (the ELD does not bar tort theories if "there exists an independent tort duty alleged to be breached that is separate and distinct from the contractual duty"). Syngenta's urging that *Lesiak* does not support Nebraska's rejection of the SELD ignores the circumspect clarification of the ELD's "application and scope in Nebraska." *Id.* at 80-81 (observing that the ELD is a "judicially created doctrine" akin to the "ever-expanding, all-consuming alien life form portrayed in the 1958 B-movie class *The Blob*," which might "consume much of tort law if left unchecked"). *Lesiak* concluded that the primary and most compelling rationale of the ELD "is to preserve the distinction between contract and tort theories in circumstances where both theories could apply." *Id.* at 81. Thus, as the MDL Order observed, *Lesiak* "would preclude application of the ELD in this case." (MDL Order at 35.)

North Carolina

North Carolina has not applied the ELD outside of product-liability cases and has observed that the ELD does not overturn 25 years of case law allowing tort claims for negligence based on breaches in the duty of care. (MDL Order at 35 (citing *Lord v. Customized Consulting*

Specialty, Inc., 643 S.E.2d 28, 32 (N.C. App. 27).) *See Hospira Inc. v. AlphaGary Corp.*, 671 S.E.2d 7, 14 (N.C. App. 2009) (the rationale behind the ELD is to "encourage[] contracting parties to allocate risks for economic loss themselves," and is therefore inapplicable where no privity exists); *Moore v. Coachmen Indus.*, 499 S.E.2d 772, 780 (N.C. App. 1998) ("[T]he rationale for the [ELD] is that the sale of goods is accomplished by contract and the parties are free to include, or exclude, provisions as to the parties' respective rights and remedies . . . . To give a party a remedy in tort . . . would permit the party to ignore and avoid the rights and remedies granted or imposed by the parties' contract."); *Ellis-Don Constr., Inc. v. HKS, Inc.*, 353 F. Supp. 2d 603, 606 (M.D. N.C. 2004) (rejecting defendant's argument that the ELD required granting a motion to dismiss and stating that the ELD "does not limit tort action that arise in the absence of a contract, nor is there any indication that the courts of North Carolina have expanded the [ELD] beyond its traditional role in products liability cases").

Thus, Syngenta's contention that there is no indication that "North Carolina would reject bright-line application of the stranger ELD" is unavailing and does not support its motion to dismiss. (Syn. Br. at 56.)

North Dakota and Oklahoma

Neither North Dakota nor Oklahoma have adopted the SELD. Rather, like many other states, both North Dakota and Oklahoma have limited the ELD to the product-liability context. *See Leno v. K & L Homes, Inc.*, 803 N.W.2d 543, 550 (N.D. 2011); *Waggoner v. Town & Country Mobile Homes, Inc.*, 808 P.2d 649, 652 (Okla. 1990). There is no authority to indicate that North Dakota or Oklahoma would expand the ELD, let alone that they would do so when the policies underlying the doctrine do not support its application. When predicting the law of another state, the Court's "duty is to conscientiously ascertain and apply state law, not to

formulate new law based on our own notions of what is the better rule." *Leonard v. Dorsey & Whitney LLP*, 553 F.3d 609 (8th Cir. 2009). Thus, this Court should decline to expand the law of these states by applying the ELD.

South Dakota

South Dakota courts have applied the ELD only in commercial transactions governed by the UCC, reasoning that in that context "the general rule is that economic losses are not recoverable under tort theories; rather, they are limited to the commercial theories found in the U.C.C." *City of Lennox v. Mitek Indus., Inc.*, 519 N.W.2d 330, 333-34 (S.D. 1994). The South Dakota Supreme Court has explicitly *rejected* expanding the ELD to cases outside the context of the UCC. *See Kriesers Inc. v. First Dakota Title Ltd. P'ship*, 852 N.W.2d 413, 421-22 (S.D. 2014) (rejecting expansion of the ELD to apply to the provision of professional services).

Further, Syngenta mischaracterizes the Court's reasoning in *Kriesers*, arguing that the Court "looked to Illinois—a state that has unquestionably adopted the SELD" in defining the contours of the ELD. (Syn. Br. at 57.) Leaving aside that Illinois courts *would not* apply the SELD under the facts presented in this case, the South Dakota Supreme Court relied on Minnesota law, not the law of Illinois, in analyzing the application of the ELD. *See id.* at 421 ("In formulating our economic loss rule, we cited Minnesota law, which has declined to extend the [ELD] beyond commercial transactions."). Simply put, Syngenta cannot provide any case law supporting extension of the ELD.

F. The ELD does not bar Producer Plaintiffs' claims because they have adequately pled harm to property.

Judge Lungstrum relied on the federal plausibility standard to hold that Producer Plaintiffs did not adequately allege physical injury. (MDL Order at 20-21.) Plaintiffs here are not required to meet this higher standard. *Walsh*, 851 N.W.2d at 603, explicitly rejected application

of the federal plausibility standard to pleadings under Minnesota's Rules of Civil Procedure. *Id.* ("[W]e now decline to engraft the plausibility standard from *Twombly* and *Iqbal* onto our traditional interpretation of Minn. R. Civ. P. 8.01."). Minnesota's notice-pleading standard "does not require absolute specificity in pleading, but rather requires only information sufficient to fairly notify the opposing party of the claim against it." *Id.* at 605 (quoting *Hansen*, 813 N.W.2d at 917-18.)

As discussed, Producer Plaintiffs do not rely on allegations of physical damage to their corn to defeat Syngenta's ELD argument. But to the extent this Court considers it necessary, Producer Plaintiffs have adequately alleged physical damage precluding application of the SELD. *See e.g.*, *Ashtabula River Corp. Group II v. Conrail, Inc.*, 549 F. Supp. 2d 981, 988 (N.D. Ohio 2008) ("Where 'plaintiff suffers both physical injury and economic loss, economic losses resulting from physical injury are recoverable.'") (citation omitted).

Plaintiffs allege that "Syngenta's acts and omissions have resulted in, and will continue to result in, the pervasive contamination of the U.S. corn supply, including fields, grain elevators and other facilities of storage and transport, causing physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land." (*See*, *e.g.*, NCC ¶ 236.) Producers and Non-Producers are participants in the U.S. corn market reliant on the corn supply that was contaminated and damaged by Syngenta's conduct. Plaintiffs also allege that "Plaintiffs' chattels/movables were impaired as to condition, quality, or value, and Plaintiffs were damaged." (*Id*. ¶ 309.) Therefore, Plaintiffs have made sufficient allegations of physical damage to place Syngenta on notice of the economic damages Plaintiffs intend to recover. Under Minnesota's notice-pleading standard, that is sufficient to survive a motion to dismiss.

G. The ELD does not bar Non-Producer Plaintiffs' claims.

Syngenta's argument with respect to Non-Producers contradicts the SELD argument it makes regarding Producers. Specifically, Syngenta argues that either (or both) the contractual ELD and the SELD apply based on whether Non-Producers allege damage to their own corn. But the question of whether any application of the ELD would fall under the stranger strand, or the traditional contract strand, does not hinge on injury to a proprietary interest, it hinges on the relationship between Plaintiffs and Syngenta. Here the Non-Producer Plaintiffs are *not* parties to a contract with Syngenta and Non-Producers did not buy any of Syngenta's products. As Syngenta readily acknowledges, "Syngenta sells corn seed. It does not grow corn for commercial sale, distribute corn, segregate corn or export corn."[25] (Third Party Compl. ¶ 43.) Therefore, the lack of a contractual relationship between Syngenta and Non-Producers dictates that if the ELD applies at all, it can only do so under the SELD, the only iteration that applies to strangers.

Further, Syngenta's attempt to shoehorn the Non-Producer Plaintiffs' claims into the contractual ELD is backwards. Syngenta argues that "[t]o the extent the Non-Producers assert that they were injured because the particular corn they purchased contained Viptera corn, the contractual strand of the ELD bars tort claims for economic losses arising where the parties are connected (directly or indirectly) by a contract." (Syn. Br. at 57.) Presumably, by arguing that the contract ELD applies "directly or indirectly," Syngenta is referring to the chain-of-contracts cases, stemming from *Robins*. But *Robins* precludes applying the ELD where Non-Producers plead damage to their own corn. "[T]he prevailing rule denie[s] a plaintiff recovery for economic loss if that loss resulted from physical damage to property in which he had no proprietary interest." *La. ex rel. Guste*, 752 F.2d at 1022 (explaining the holding of *Robins*). Therefore, if

[25] On November 19, 2015, Syngenta filed a Third-Party Complaint in the Federal MDL asserting claims against Cargill and ADM. Citations to the "Third Party Compl." refer to that document.

Non-Producers' corn was damaged by Syngenta's premature commercialization, that fact would remove their claims from the ELD under *Robins*, rather than urging its application as Syngenta argues.

Regardless, Syngenta's argument is irrelevant. What matters is that neither the contractual ELD nor the SELD applies to Non-Producers' claims. As established above, there is no contract, or opportunity to contract, that would make the contractual ELD apply. The SELD cannot apply because Non-Producers' claims do not fall into one of the recognized categories of SELD cases. Syngenta argues that Non-Producers' "claims are identical to those of the Producers." (Syn. Br. at 57.) That argument is inaccurate, but it is true that the same policy factors precluding expansion of the SELD to Producers' claims also preclude expansion of the SELD to Non-Producers' claims.

Although it is clear that the contractual ELD does not bar Non-Producers' claims, Syngenta makes additional arguments for three of the relevant states. Those arguments are unpersuasive.

Minnesota

Minnesota's ELD does not bar claims by Non-Producers. As already explained, Minnesota's ELD is entirely statutory. Minn. Stat. § 604.101; Minn. Stat. § 604.101, subd. 5; *Ptacek*, 844 N.W.2d at 538-39. Other than common law misrepresentation claims, it applies to claims "for harm caused by a defect in the goods sold." Minn. Stat. § 604.101, subd. 2; *see also* Minn. Stat. § 604.101, subd. 3 (setting out when a buyer may bring a "product defect tort claim").[26]

[26] A buyer may bring a "product defect tort claim" if a "defect in the goods sold or leased caused harm to the buyer's tangible personal property other than the goods or to the buyer's real

Contrary to Syngenta's arguments, section 604.101 does not apply to Non-Producers' claims because they did not purchase a "good" sold by Syngenta. As Syngenta readily acknowledges, "Syngenta sells corn seed. It does not grow corn for commercial sale, distribute corn, segregate corn or export corn." (Third Party Compl. ¶ 43.) Therefore, Judge Lungstrum correctly noted that the Non-Producers "bought corn, but [they] did not buy any product sold by Syngenta, which sold seeds, and Syngenta has not cited any authority to support a theory allowing for liability under this statute if the plaintiff did not buy the particular product sold by the defendant." (MDL Order at 47.)

In addition, section 604.101 is unavailing to Syngenta because neither Producers nor Non-Producer Plaintiffs have alleged a product defect. They do not allege that Viptera seed was defectively designed or manufactured, or that Syngenta's instructions or warnings on safe use were inadequate. They do not allege that Viptera seed was unfit for a particular purpose required by a particular buyer (Minn. Stat. § 336.2-315), was unmerchantable (Minn. Stat. § 336.2-314), or failed express warranties (Minn. Stat. § 336.2-313). In strikingly similar circumstances (the sale of fertilizer to farmers), *Ptacek* held that that the plaintiff "did not assert . . . a product-defect tort claim." 844 N.W.2d at 539; *see also* MDL Order at 47 ("In addition, plaintiffs have not alleged any sort of product defect, as Syngenta's seeds are not alleged to have failed to perform as intended. Therefore, the Court concludes that the claims by the Minnesota non-producer plaintiff are not barred by the ELD."); Minn. Stat. § 604.101, rep. note ("To come within the definition of 'product defect tort claim' a common law tort claim must seek recovery 'for damages caused by a defect in the goods.'").

---

property," in which case the buyer may recover loss for, *e.g.*, "diminution in value of the other tangible personal property or real property" including costs of repair, replacement and restoration, and "business interruption losses." Minn. Stat. § 604.101, subd. 3(1)-(2).

Because the Non-Producer Plaintiffs did not purchase a "good" sold by Syngenta and have not alleged a "product defect tort claim," Syngenta's motion to dismiss must be denied.

Arkansas

Syngenta argues that this Court should apply the "contractual ELD" to bar Non-Producers' claims under Arkansas law. (Syn. Br. at 68.) Syngenta is wrong for at least two reasons. First, there are no allegations by Plaintiffs that Non-Producers contracted with Syngenta and, as Judge Lungstrum noted, there is no evidence to support that assertion because Non-Producers purchase corn, not corn seed. (MDL Order at 47.) Thus, the contractual ELD does not apply.

Second, Arkansas courts have not adopted the ELD in any form under any circumstance. See Blagg v. Fred Hunt *Co., Inc*., 612 S.W.2d 321, 324 (Ark. 1981) (rejecting application in the strict liability context); *see also Bayer CropScience LP v. Schafer*, 385 S.W.3d 822, 832 (Ark. 2011) (declining to "extend the doctrine to claims involving negligence" because of allegations of damage to property). As such, there is no Arkansas law to support applying the ELD to Non-Producers' claims in this case.

Louisiana

Syngenta argues that the Louisiana Products Liability Act ("LPLA"), La. Rev. Stat. § 9:2800.52, *et seq.*, bars any claims by Non-Producers under Louisiana law. (Syn. Br. at 68.) This argument overlooks two critical facts. First, the claims against Syngenta do not arise from damages that were "proximately caused by a characteristic of the product that renders the product unreasonably dangerous" and thus the LPLA does not apply. La. Rev. Stat. § 9:2800.54(A). Plaintiffs do not argue that Syngenta created a product that contained a characteristic that somehow rendered the Viptera or Duracade unreasonably dangerous. Rather,

Plaintiffs argue, and have pled, that Syngenta's conduct in commercializing its product was tortious and damaged Plaintiffs. Thus, neither the Producer nor Non-Producer claims are subject to the LPLA.

Second, Syngenta ignores a line of cases that reject the LPLA's exclusivity. These cases demonstrate that nothing in the LPLA precludes a plaintiff from bringing a non-LPLA claim against a manufacturer for damages caused by the manufacturer's wrongful conduct unrelated to the product's manufacture, design, warnings, or warranties. *See, e.g.*, *Triche v. McDonald's Corp.*, 164 So. 3d 253, 258 (La. App. 2014) ("[T]he LPLA does not eliminate a general negligence cause of action for damages caused by the negligent use or handling of the product."); *Lavergne v. Am. Pizza Co.*, 838 So. 2d 845, 848 (La. App. 2003) (rejecting argument that LPLA provided exclusive remedy for negligence claim derived from the negligent use of a product); *Crawford v. Dehl*, No. 08-0463, 2008 U.S. Dist. LEXIS 99133, at *8 (W.D. La. Jul. 21, 2008), *report and recommendation adopted*, 2008 U.S. Dist. LEXIS 68476 (W.D. La. Sept. 8, 2008) (rejecting LPLA exclusivity argument and permitting independent negligence claim reasoning that "[t]he exclusivity provision is better construed as barring only those claims against manufacturers in which the defendant's capacity as manufacturer is essential"); *accord In re Genetically Modified Rice Litig.*, No. 06-1811, 2011 WL 5024548, at *3-4 (E.D. Mo. Oct. 21, 2011) (allowing plaintiffs to pursue non-LPLA negligence claims under Louisiana law in GM contamination case).

H. The ELD does not apply to claims seeking damages related to soybeans.

Syngenta's premature release of Viptera caused damage to farmers by affecting the price of corn and soybeans.[27] (NCC ¶¶ 298-99.) Corn and soybeans are inherently connected commodities because corn and soybeans are used together as rotational crops and because they are feed ration substitutes. (*Id.* ¶ 298.)[28] Therefore, the damage incurred by Producer Plaintiffs' cannot be measured solely by the drop in corn prices, but instead must factor in the drop in soybean prices.

Despite the interconnected nature of these two crops, Syngenta's motion to dismiss implies that because Producer Plaintiffs were adversely affected by the drop in both corn and soybean prices, their claims are subject to the ELD. This argument fails.

As previously discussed, none of the relevant states have applied the SELD to negligence claims filed by farmers against a GM seed company, and there is no reason to extend the SELD in this case because its application would not serve the policies underlying the doctrine. The fact that farmers were harmed by the drop in corn and soybean prices does not change the policy analysis. First, the farmers still had no opportunity to contract around the losses they suffered.

---

[27] The individual producers in these consolidated proceedings are all corn producers who are alleging that liability and damages both rest with the Syngenta entities. There are no named plaintiffs or individual plaintiff producers who grew only soybeans during the relevant time period, and no such claims are being pursued. The individual and named plaintiff producers grew both corn and soybeans. Plaintiffs do allege that Syngenta's actions with respect to the Chinese market caused them harm in their capacity as corn producers and, further, that because the corn and soybean markets are interrelated or otherwise inter-connected that their damages as corn producers were impacted in a manner consistent with how corn farmers who also grew milo were impacted. The extent and nature of the interrelationship or interconnectedness of the corn-farmer damages will be the subject of documentary evidence and expert testimony. Contrary to Syngenta's arguments, it would be inappropriate to decide the reasonable foreseeability or the nature and extent of the damages caused to corn farmers by Syngenta's conduct on a motion to dismiss, especially when all of the facts alleged in the Complaints must be accepted as true.

[28] Plaintiffs' Class Complaint makes no allegations regarding soybeans.

See Daanen & Janssen, 216 Wis. 2d at 403 (detailing contract rationale behind the ELD). Second, there is still no risk of the type of unlimited damages that exist in lack-of-access cases. *See e.g. La. ex rel. Guste*, 752 F.2d at 1021. Soybean related damages do not change Syngenta's culpability. Instead, the harm was foreseen, the damages are rationally limited to those suffered by farmers, Syngenta was in the best position to prevent the harm, and Producer Plaintiffs and Syngenta are part of an interconnected market.

Syngenta incorrectly compares soybean-related damages to the ripple effect of economic damages that exist in lack-of-access cases. (Syn. Br. at 50.) Syngenta has no basis to argue that the existence of damages related to the price of soybeans "almost doubles the size of the potential pool of plaintiffs," because corn farms and soybean farmers are principally the same group. More importantly, Syngenta confuses one of the ways in which Producer Plaintiffs were damaged with the multiple categories of claims that arise in lack-of-access cases. In lack-of-access cases, the risk is that almost any member of the public could have a valid claim for economic loss resulting from the inability to access a public resource or piece of public infrastructure. Syngenta claims that allowing Producer Plaintiffs to recover all of their damages, including soybean related damages, opens up the risk of such claims. "This is not a lack-of-access case, in which any member of the public could potentially assert a claim for economic loss, leading to remote or indeterminate liability that would be far out of proportion to the tortfeasors culpability . . . the scope of liability is not completely open-ended, as plaintiffs represent discrete classes of growers and sellers, all in an inter-connected market." (MDL Order at 24.) The fact that Producer Plaintiffs suffered multiple types of injury as a result of Syngenta's actions does not change that rationale.

IV. Syngenta owed a duty to Plaintiffs.

Plaintiffs allege that Syngenta owes a duty to exercise reasonable care in the "timing, scope and terms under which it commercialized MIR162." (*See, e.g.*, NCC ¶ 301; CC ¶ 328.) Syngenta knew the risks that existed if it chose to commercialize MIR162 absent approval by major export markets and adequate stewardship, and in fact, was explicitly warned that it would lead to devastating consequences. (NCC at 2-3, ¶¶ 18-26, 334; CC at 2-3, ¶¶ 29-37.) Syngenta's efforts to escape a legal duty fail based on established Minnesota law.

A. Syngenta's conduct created the foreseeable risk of harm to Plaintiffs.

Under Minnesota law, a party owes a duty of reasonable care where its "'conduct creates a foreseeable risk of injury to a foreseeable plaintiff.'" *Wenker ex rel. Wenker v. Xcel Energy, Inc.*, No. A14-0047, 2015 WL 1013553, at *2 (Minn. App. Mar. 9, 2015) (quoting *Doe 169 v. Brandon*, 845 N.W.2d 174, 177-78 (Minn. 2014) and *Domagala v. Rolland*, 805 N.W.2d 14, 23 (Minn. 2011)). "In other words, when a person acts in some manner that creates a foreseeable risk of injury to another, the actor is charged with an affirmative duty to exercise reasonable care to prevent his conduct from harming others." *Domagala*, 805 N.W.2d at 26.

This principle is widely recognized outside of Minnesota. For example, the Restatement (Second) of Torts states that when performing "acts which affect[] the interests of another, there is a duty not to be negligent with respect to the doing of the act." Restatement (Second) of Torts Div. 2, Ch. 12, Topic 4, Scope Note; *see also* Dan B. Dobbs et al., The Law of Torts § 125 (2d ed. 2015) ("In the ordinary case . . . the defendant does owe a duty of care."); 57A Am. Jur. 2d Negligence § 88 ("[T]he law imposes upon every member of society the duty to refrain from conduct of a character likely to injure a person with whom he or she comes in contact and to use his or her own property in such manner as not to injure that of another."). Other jurisdictions at

issue here have likewise adopted the general duty to exercise reasonable care when the actor's conduct creates the risk of injury to another:[29]

- *Taylor v. Smith*, 892 So. 2d 887, 893 (Ala. 2004) ("'[E]very person owes every other person a duty imposed by law to be careful not to hurt him' . . . In a variety of circumstances, this Court has recognized a duty to foreseeable third parties, based on a general 'obligation imposed in tort to act reasonably.'");
- *Hill v. Wilson*, 224 S.W.2d 797, 800 (Ark. 1949) ("Actionable negligence itself is a relational concept. There is no such thing as 'negligence in the air.' Conduct without relation to others cannot be negligent; it becomes negligent only as it gives rise to an appreciable risk of injury to others.");
- *Greenberg v. Perkins*, 845 P.2d 530, 537 (Colo. 1993) ("people owe a duty to use reasonable care with regard to their affirmative conduct" and "such a duty extends to all who may foreseeably be injured if that conduct is negligently carried out," rejecting application of the no-duty-to-control rule);
- *Karas v. Strevell*, 884 N.E.2d 122, 129 (Ill. 2008) ("[E]very person owes a duty of ordinary care to guard against injuries to others[.]");
- *Thompson v. Kaczinski*, 774 N.W.2d 829, 834 (Iowa 2009) ("An 'actor ordinarily has a duty to exercise reasonable care when the actor's conduct creates a risk of physical harm.'");

- *Behrendt v. Gulf Underwriters Ins. Co.*, 768 N.W.2d 568, 575 (Wis. 2009) ("In the vast majority of cases . . . every person is subject to a duty to exercise ordinary care in all of his or her activities[.]").

Plaintiffs allege that Syngenta's affirmative acts—misfeasance[30]—are at the core of Plaintiffs' negligence claims. These acts include:

- Premature commercialization of Viptera and Duracade;
- Instituting a "careless and ineffective 'stewardship' program";
- The sale of Viptera and Duracade to thousands; and
- Distributing misleading and inadequate information regarding Viptera and Duracade and the timing of China's approval.

(*See, e.g.*, CC ¶ 331; NCC ¶ 302.) Plaintiffs further allege that "Syngenta clearly knew [of] the risks" that the above affirmative conduct would—and did—create for the U.S. corn market. (*See, e.g.*, CC at 2-3, ¶¶ 15-16, 35, 80-83, 101-03, 334; NCC at 2-3; ¶¶ 46, 93-94, 112-14.) These acts created a risk of (and caused) "physical harm to Producers' and Non-Producers' corn, equipment, storage facilities, and land" as a result of the "pervasive contamination of the U.S. corn supply." (CC ¶ 225; NCC ¶ 236.)

These allegations are further supported by numerous other affirmative acts that Syngenta took to create the risk and harm to Plaintiffs: (1) Syngenta recognized Plaintiffs as stakeholders "affected by" its business (CC ¶ 226; NCC ¶ 237);[31] (2) Syngenta knew commercialization created a risk of losing the Chinese market (CC ¶ 102; NCC ¶ 113); (3) without Chinese approval, Syngenta gave away, planted, and sold Viptera seed and increased commercialization even as certainty of a Chinese ban intensified (*see, e.g.*, CC ¶¶ 184-89; NCC ¶¶ 115, 195-200);

---

[30] "Misfeasance is 'active misconduct working positive injury to others'" while nonfeasance, or nonaction, is "'passive inaction or a failure to take steps to protect [others] from harm.'" *Domagala*, 805 N.W.2d at 22 (quoting W. Page Keeton et al., Prosser and Keeton on the Law of Torts § 56 (5th ed.1984)).

[31] *See, e.g.*, *Doe v. WTMJ, Inc.*, 927 F. Supp. 1428, 1434 (D. Kan. 1996) (radio station had a duty of care because it "create[d] and foster[ed] a relationship with its listeners.").

(4) Syngenta purposefully decided not to institute responsible stewardship and channeling programs despite publicly acknowledging its obligation to do so (*see, e.g.*, CC ¶¶ 27-35, 108-36; NCC ¶¶ 38-46, 119-47); and (5) even after China's ban on MIR162, Syngenta introduced a new unapproved trait, enhancing and prolonging the risk and duration of injury (CC at 3-4; NCC at 3-4.) "Syngenta did not simply fail to take precautions against foreseen and foreseeable harm," but "acted affirmatively to create such harm." (CC ¶ 228; NCC ¶ 239.) As such, Syngenta owed a duty of care to Plaintiffs since its affirmative conduct contributed directly to the foreseeable harm suffered by Plaintiffs.[32] *See* MDL Order at 10 ("plaintiffs' particular injuries were not only foreseeable, they were actually foreseen by Syngenta, with the plaintiffs suffering the very harm expected . . . and thus plaintiffs' injury is sufficiently connected to Syngenta's conduct"); *see also Domagala*, 805 N.W.2d at 26.

Syngenta's argument that there is no duty to protect another from harm caused by a third party's conduct without a special defined relationship (Syn. Br. at 70-71) misses the mark. Syngenta asks the Court to apply Restatement (Second) of Torts § 315 and conclude that, absent a special relationship, there is "no duty so to control the conduct of a third person." Syngenta fails to address Plaintiffs' controlling and dispositive allegations—Syngenta's conduct, timing,

[32] Syngenta does not dispute that Plaintiffs sufficiently plead a breach of duty or that the harm was foreseeable. Instead, it attempts to argue that public policy is the critical factor in considering a duty. (Syn. Br. at 70.) This is untrue under Minnesota law, which considers the foreseeability of the harm as the threshold issue. *See e.g.*, *Doe 169 v. Brandon*, 845 N.W.2d 174, 178 (Minn. 2014) ("Once we identify the defendant's 'own conduct,' we then determine whether that conduct created a foreseeable risk of injury to a foreseeable plaintiff."). It is only when the harm is too remote that public policy dictates whether a legal duty exists. *Drager by Gutzman v. Aluminum Indus. Corp.*, 495 N.W.2d 879, 884 (Minn. App. 1993). Here, Plaintiffs were stakeholders (CC ¶ 226; NCC ¶ 237) and the harm suffered was the "very harm expected to occur" and known by Syngenta (MDL Order at 10).

scope, and manner of commercialization, is being challenged, not a third party's.[33] (*See, e.g.*, CC ¶ 331; NCC ¶ 302.) As discussed above, the "no-duty" rule turns on the distinction between "nonfeasance" and "misfeasance." *See Ariola v. City of Stillwater*, No. A14-0181, 2014 WL 5419809, at *7 (Minn. App. Oct. 27, 2014) ("[T]he duty to protect another from one's own conduct attaches only in the case of misfeasance, or "active misconduct working positive injury to others.") (internal quotations omitted); *Estates of Morgan v. Fairfield Family Counseling Ctr.*, 673 N.E.2d 1311, 1320 n.2 (Ohio 1997);[34] W. Page Keeton et al., Prosser and Keeton, On the Law of Torts § 56, at 373-74 (5th ed. 1984). As Minnesota Supreme Court explained, "when a person acts in some manner that creates a foreseeable risk of injury to another, the actor is charged with an affirmative duty to exercise reasonable care to prevent his conduct from harming others."[35] *Domagala*, 805 N.W.2d at 26.

Syngenta did not fail to remove a preexisting risk, but committed "a new risk of harm to the plaintiff." *Satterfield*, 266 S.W.3d at 356 (quoting Prosser, *supra*, §56, at 373). That is misfeasance, for which liability extends to the foreseeable plaintiff suffering the foreseeable

---

[33] Moreover, in light of Syngenta's premature commercialization, Plaintiffs pled that no third party could have prevented the harm absent adequate stewardship and channeling managed by Syngenta.

[34] The classic example is an ordinary bystander, even an expert swimmer with a rope, who has no duty to save a child from drowning. *Estates of Morgan*, 673 N.E.2d at 1319 n.2; Restatement (Second) of Torts § 314 Illustr. No. 4. Modern cases involve the duty of a mental health professional to act with regard to patients for the benefit of third parties. *Estates of Morgan*, 673 N.E.2d at 1328.

[35] *See* Dobbs, *supra*, § 414 ("The rule that one owes no duty to control others is a particular instance of the general rule that nonfeasance is not a tort unless there is a duty to act."); Fowler V. Harper & Posey M. Kime, *The Duty to Control the Conduct of Another*, 43 Yale L.J. 886 (1934) (Restatement draft founded on nonfeasance, where relationship of the parties imposes an "affirmative obligation").

injury.[36] *Domagala*, 805 N.W.2d at 26; Prosser, *supra*, § 56, at 375; *accord* Restatement (Second) of Torts, Div. 2, Ch. 12, Topic 4, Scope Note. Even Syngenta's cited cases recognize that misfeasance establishes a duty, even if a third party might alleviate the harm.[37] *See Leppke v. Segura*, 632 P.2d 1057, 1059 (Colo. App. 1981) (defendant who "jump-start[ed] an automobile for an obviously drunken driver" took "an affirmative act" creating a duty). Further, not one case cited by Syngenta excuses negligent commercialization by a corporation when there was far-reaching and foreseeable harm.[38] And the only Court to consider whether Syngenta

---

[36] The no-duty-to-control rule "has no logical application" when a defendant affirmatively "creat[es] a risk of harm . . . through the instrumentality of another or otherwise." Dobbs, *supra*, § 414.

[37] Numerous cases in the relevant states hold that the no-duty-to-control rule does not apply where defendant's affirmative acts create or enhance the risk of harm. *See Simmons v. Homatas*, 925 N.E.2d 1089, 1100 (Ill. 2010) (club that "affirmatively assisted" intoxicated driver into car had duty to victims); *Bell v. Hutsell*, 955 N.E.2d 1099, 1109-10 (Ill. 2011) (discussing Simmons and distinguishing it from a "case of true nonfeasance" where the defendant "took no action"); *Calwell v. Hassan*, 925 P.2d 422, 431 (Kan. 1996) (identifying as a "basis for imposing a 'special relationship' duty under § 315 [of the Restatement where defendant's] "actions created a risk of harm to" the plaintiffs, but finding record inadequate); *Cincinnati v. Beretta U.S.A. Corp.*, 768 N.E.2d 1136, 1144 (Ohio 2002) (rejecting defendant's attempt to characterize duty as one of control over third persons, where plaintiffs alleged that they "engaged in affirmative acts (*i.e.*, creating an illegal, secondary firearms market) by failing to exercise adequate control over the distribution of their firearms"); *Joyce v. M & M Gas Co.*, 672 P.2d 1172, 1174 (Okla. 1983) (where actor's own affirmative act has created or exposed the other to a recognizable high degree of risk of harm through such misconduct," no-duty rule inapplicable); *Smith ex rel. Ross v. Lagow Const. & Developing Co.*, 642 N.W.2d 187, 192 (S.D. 2002) (landlords whose "own affirmative acts or omissions create a high risk of harm from crime owe a duty to exercise reasonable care to protect tenants from that increased risk"); *Robb*, 295 P.3d at 216 (no-duty rule does not apply when "the actor's own affirmative act creates a recognizable high degree of risk of harm"); *Otis Eng'g Corp. v. Clark*, 668 S.W.2d 307, 309 (Tex. 1983) ("One who voluntarily enters an affirmative course of action affecting the interests of another is regarded as assuming a duty to act and must do so with reasonable care."); *accord Ginapp v. City of Bellevue*, 809 N.W.2d 487, 492 (Neb. 2012) (identifying relationship between section 315 of the Restatement (Second) and section 37 of the Restatement (Third)).

[38] Syngenta's cases excusing misfeasance do so because the harm was unforeseeable. *Watters v. TSR, Inc.*, 904 F.2d 378, 381 (6th Cir. 1990) (game manufacturer had no reason to foresee

owed a duty under virtually identical facts as those before this Court concluded Syngenta did owe such a duty based on its own conduct. (MDL Order at 10-11 ("[T]he Court recognizes a duty here, based on Plaintiffs' allegations that Syngenta created an unreasonable risk of harm to plaintiffs by its conduct").)

Syngenta's attempt to skirt liability by arguing various policy considerations fails to address the relevant inquiry: whether Syngenta's conduct created a foreseeable risk of harm.[39] *Eischen v. Crystal Valley Coop.*, 835 N.W.2d 629, 634 (Minn. App. 2013); *see also* Prosser, *supra*, § 56 at 375 (when defendant has engaged in acts that have "begun to affect the interests of the plaintiff adversely, as distinguished from merely failing to confer a benefit upon him," the course of conduct is misfeasance). The allegations here are that "Syngenta did not simply fail to take precautions against foreseen and foreseeable harm," but it "acted affirmatively to create such harm." (CC ¶ 228; NCC ¶ 239.) And Syngenta's "failure" to implement stewardship and channeling programs was not an omission, but a decision. In choosing not to act as a steward, so as to bolster its gain, Syngenta created the risk of pervasive contamination. Syngenta has not and cannot argue a lack of foreseeability; therefore, existence of a duty is well founded.

---

plaintiff's son was mentally ill and would commit suicide after playing the game); *Ashley Cnty., Ark. v. Pfizer, Inc.*, 552 F.3d 659, 670 (8th Cir. 2009) (criminal acts were an intervening cause between chemical manufacturer and city fighting methamphetamine crime). In contrast here, the harm was actually foreseen. (MDL Order at 10-11.)

[39] Syngenta offers one unpublished case for the rule that public policy is a major consideration in finding a legal duty under Minnesota law. (Syn. Br. at 70.) That case, however, offers no guidance. First, although the court states that public policy is a consideration, there is no mention of any guiding public policy in its analysis. Second, the court is considering whether a person has a duty to protect another from criminal activity in the landlord-tenant or hotel-guest situation. *Gutierrez v. Eckert Farm Supply, Inc.*, No. C5-02-1900, 2003 WL 21500161, at *4 (Minn. App. July 1, 2003).

Tacitly acknowledging the flaw in its duty argument, Syngenta makes straw-man arguments that Plaintiffs seek to impose a "novel duty" (and that the MDL Order imposed such a duty) and a duty "to refrain from selling Viptera *at all*." (Syn. Br. at 82, 89-90.) Plaintiffs do not assert, nor did the MDL Order impose, a novel duty on Syngenta. Instead, the duty invoked is one of "reasonable care" under the circumstances of this case. *See* Dobbs, *supra*, § 253 ("duty states a rule or standard of law rather than a conclusion about the defendant's breach of duty on the particular facts"). In Minnesota, it is well recognized that a defendant has a legal duty when its "'own conduct creates a foreseeable risk of injury to a foreseeable plaintiff.'" *Wenker ex rel. Wenker*, 2015 WL 1013553, at *2 (quoting *Doe 169 v. Brandon*, 845 N.W.2d 174, 177-78 (Minn. 2014)). Moreover, and contrary to Syngenta's contentions, Plaintiffs do not seek relief prohibiting GM seed developers from ever commercializing, or always waiting for approval from every foreign export market, "effectively transferring that decision to foreign sovereigns," as Syngenta argues. (Syn. Br. at 89-92.)

Courts have rejected similar efforts to recast duty in a manner that conflates its existence with breach.[40] In *Ludwikoski v. Kurotsu*, 840 F. Supp. 826 (D. Kan. 1993), the victim of an errant golf ball sued the golfer for negligence. Defendant moved to dismiss, arguing that Kansas law "does not impose upon a golfer a duty to hit a golf ball precisely." *Id.* at 827. The court rejected that argument: "Contrary to defendant's position, it is not necessary . . . to recognize a duty to

---

[40] *See also Stephenson v. Universal Metrics, Inc.*, 641 N.W.2d 158, 163 (Wis. 2002) ("[T]he primary question we ask is not whether the defendant has a duty to take (or refrain from) certain actions, but whether the defendant's actions (or lack thereof) were consistent with the general duty to exercise a reasonable degree of care under the circumstances."); *Hesse v. McClintic*, 176 P.3d 759, 763 (Colo. 2008) ("[T]here is no general requirement that a driver *always* pull over to the side of the road when confronted by animals on the road. However, simply because a driver need not pull over *every* time she is confronted by animals on the road does not mean that she *never* needs to pull over in such a situation.").

'hit a ball precisely' in order to find that plaintiff states a claim. The court need only find that the defendant had a duty to exercise ordinary care, or the care of a reasonable person under the circumstances." *Id.* at 827; *see also* Dobbs, *supra*, § 253 (discussing the "duty vs. breach confusion").

The same is true here. By collapsing duty and breach, Syngenta is trying to turn a jury question into a legal one. *See Glorvigen v. Cirrus Design Corp.*, 816 N.W.2d 572, 582 (Minn. 2012) ("Other issues such as adequacy of the warning, breach of duty and causation remain for jury resolution."). Syngenta attempts to create new law and insists that the USDA's deregulation precludes a duty to refrain from selling Viptera. (Syn. Br. at 90.) But, that is not the duty owed. Instead, "nothing about USDA deregulation requires a developer like Syngenta to commercialize" or dictates the timing, scope, and manner of that commercialization. (CC ¶ 61; NCC ¶ 72.) Deregulation meant Viptera was no longer under USDA oversight at the time of commercialization. Syngenta's argument is like saying a driver's license confers a right to drive negligently. It does not.[41] And, of course, an activity need not be unlawful to be negligent.[42]

---

[41] *See, e.g., Smith v. Waggoners Trucking Corp.*, 69 So. 3d 773, 778 (Miss. App. 2011) ("[S]tatutory driving laws [do not] supplant the common-law duty of ordinary care," and that driver who had the statutory right-of-way "still owed a duty of reasonable care during the entire parking maneuver[.]").

[42] *Vancura v. Katris*, 939 N.E.2d 328, 344 (Ill. 2010), cited by Syngenta, acknowledges that "the mere existence of a statute . . . does not foreclose the possibility of a common law negligence action based on an extra-statutory duty of care." Every other relevant state agrees. *See Stewart v. Hewlett-Packard Co.*, 2012 WL 6043642, at *5 (N.D. Ala. Nov. 29, 2012); *Little Rock Land Co. v. Raper*, 433 S.W.2d 836, 842 (Ark. 1968); *Bayer v. Crested Butte Mountain Resort, Inc.*, 960 P.2d 70, 79 (Colo. 1998), *as modified on denial of reh'g* (June 22, 1998); *N. Ind. Pub. Serv. Co. v. Sell*, 597 N.E.2d 329, 331-32 (Ind. App. 1992); *Schmitt v. Clayton Cnty.*, 284 N.W.2d 186, 190 (Iowa 1979); *Glynos v. Jagoda*, 819 P.2d 1202, 1210 (Kan. 1991); *Corley v. Gene Allen Air Servs., Inc.*, 425 So. 2d 781, 784 (La. App. 1982); *Burt v. Fumigation Serv. & Supply, Inc.*, 926 F. Supp. 624, 634 (W.D. Mich. 1996); *Blasing v. P. R. L. Hardenbergh Co.*, 226 N.W.2d 110, 115 (Minn. 1975); *Ill. Cent. R. Co. v. Brent*, 133 So. 3d 760, 772 (Miss. 2013); *Kersey v. Harbin*,

Finally, Syngenta seeks to avoid the universal rule that industry standards are relevant in determining whether Syngenta exercised reasonable care. (*See* Syn. Br. at 91-92.) The question here is not whether these standards created a duty (although they did under the voluntary undertaking doctrine, discussed below), but whether Syngenta's noncompliance is evidence of a breach, a point Syngenta concedes. (*Id.* at 91.)

B. Alternatively, Syngenta voluntarily undertook a duty.

It is well established that:

> One who undertakes, gratuitously or for consideration, to render services to another which he should recognize as necessary for the protection of the other's person or things, is subject to liability to the other for physical harm resulting from his failure to exercise reasonable care to perform his undertaking, if
>
> (a) his failure to exercise such care increases the risk of such harm, or
>
> (b) the harm is suffered because of the other's reliance upon the undertaking.

Restatement (Second) of Torts § 323; *see also id.* § 324A (applying same principle to third parties). Minnesota has specifically adopted this section of the Restatement. *Glorvigen*, 816 N.W.2d at 587. Additionally, relevant state law further recognizes these principles.[43]

Lawrence*, 230 S.W.2d 103, 105 (Ky. 1950); *Dornak v. Lafayette Gen. Hosp.*, 399 So. 2d 168, 170 (La. 1981); *Schanz v. New Hampshire Ins. Co.*, 418

Syngenta voluntarily undertook a duty to exercise due care as it repeatedly and expressly acknowledged the integrated nature of the commodity market and adopted policies assuring stakeholders that it would engage in responsible commercialization consistent with industry policies. (*See* CC ¶¶ 27-35, 226.) These included stewardship, channeling, and a commitment not to commercialize new GM traits without approval by key import markets. (*See* CC at 2-3; ¶¶ 27-35, 61-88.) Syngenta does not dispute that Plaintiffs have adequately pled these facts; instead, it argues Plaintiffs cannot satisfy the elements of a voluntary undertaking as a matter of law. Syngenta's argument fails.

First, Syngenta notes that courts generally "limit[] liability for injury in a voluntary undertaking to 'physical harm.'" (Syn. Br. at 87.) Syngenta's own cases, however, recognize that "physical harm" includes property damage.[44] All Plaintiffs allege physical harm to their own property. (*See e.g.*, CC ¶¶ 96-104 (contamination of crops); NCC ¶¶ 107-15.)

Second, Syngenta's suggestion that the statements in its Deregulation Petition cannot be considered under the *Noerr-Pennington* doctrine is misconceived. (Syn. Br. at 88.) In *Pennington*, the Supreme Court noted that conduct, which may otherwise be protected, is admissible to establish such facts as the defendants' purpose, character, a continuing course of concerted conduct, and the effect of such conduct:

> It would of course still be within the province of the trial judge to admit this evidence, if he deemed it probative and not unduly prejudicial, under the established judicial rule of evidence that testimony of prior or subsequent transactions, which for some reason are barred from forming the basis for a suit, may nevertheless be introduced if it tends reasonably to show the purpose and character of the particular transactions under scrutiny.[45]

United Mine Workers of Am. v. Pennington, 381 U.S. 657, 670 n.3 (1965) (citing *Standard Oil Co. of New Jersey v. United States*, 221 U.S. 1, 45 (1911) (allowing evidence regarding defendants' "purpose, of their continuing conduct, and of its effect") and *FTC v. Cement Inst.*, 333 U.S. 683, 704 (1948) (permitting evidence to show a continuous course of concerted effort")); *Telecor Commc'ns, Inc. v. Sw. Bell Tel. Co.*, 305 F.3d 1124, 1139 (10th Cir. 2002) (no error in admitting prior statements to agency in course of rulemaking proceedings).

Plaintiffs do not premise liability exclusively on Syngenta's statements in the Deregulation Petition. Rather, they point to Syngenta's misrepresentations there,[46] along with the

---

Katris, 939 N.E.2d at 347 (recognizing distinction between "physical" and "bodily" harm in discussing an improperly notarized mortgage loan).

[45] The one case cited by Syngenta does not alter this exception to the *Noerr-Pennington* doctrine. Instead, *TEC Cogeneration Inc. v. Florida Power & Light Co.*, 76 F.3d 1560, 1573 (11th Cir. 1996), considered whether the motive or intent was a proper consideration in deciding whether to apply any exception.

[46] Syngenta's statements that its stewardship agreements would "include a term requiring growers to divert this product away from export markets (*i.e.*, channeling) where the grain has not yet received regulatory approval for import" (CC ¶ 121; NCC ¶ 132), for example, may be

lawsuit Syngenta waged against Bunge to enjoin channeling safeguards and all of the affirmative steps Syngenta took, to show the character and purpose of Syngenta's concerted, continuing efforts to get Viptera on the market and, once there, abandon undertakings to Plaintiffs' detriment.

Third, Syngenta misreads its own cases when it argues that "a voluntary undertaking creates a duty only if the promise induces detrimental reliance." (Syn. Br. at 88.) Detrimental reliance is only one potential element. If a defendant's failure to exercise reasonable care increases the risk of harm, for example, then reliance is not required. *See Glorvigen*, 816 N.W.2d at 587 (recognizing that Restatement (Second) of Torts § 323 attaches liability if failure to exercise reasonable care increases risk of harm or defendant detrimentally relied on the undertaking); Restatement (Second) of Torts §§ 323 & 324A; *Am. Mut. Liab. Ins. Co.*, 179 N.W.2d at 868 ("neither the [common law] nor the Restatement section make 'reliance' . . . a necessary element for recovery . . . reliance on the act is merely an alternative basis for liability."); *Nelson*, 199 N.E.2d at 779 ("Defendant's contention that the element of reliance is essential to its liability . . . either overlooks or misapprehends that defendant was charged with misfeasance[.]").

Some jurisdictions draw a distinction between misfeasance and nonfeasance; only the latter requires detrimental reliance.[47] *See Daugherty v. Fuller Eng'g Serv. Corp.*, 615 N.E.2d 476, 480 (Ind. App. 1993) ("Where nonfeasance is involved . . . liability may arise only where

---

considered by this Court in considering the foreseeability that a stewardship program would help prevent the known risks. *Pennington*, 381 U.S. at 670; *Telecor*, 305 F.3d at 1139.

[47] *See also Kassis v. Perronne*, 209 So. 2d 444, 446 (Miss. 1968) (distinguishing between nonfeasance and misfeasance in holding that if a landlord "voluntarily repairs . . . he will be responsible for the want of due care in the execution of the work"); *Plan-Tec, Inc. v. Wiggins*, 443 N.E.2d 1212, 1221 (Ind. App. 1983) ("[R]eliance is not an issue in a case involving misfeasance").

the beneficiaries have actually relied on the performance."); *Chisolm v. Stephens*, 365 N.E.2d 80, 85 (Ill. 1977) ("The instant case involves non-feasance . . . rather than misfeasance[.]"). And as alleged, Syngenta committed misfeasance that not only increased the risk of harm, but actually harmed Plaintiffs and therefore a showing of detrimental reliance is not required. *Moorhead Econ. Dev. Auth. v. Anda*, 789 N.W.2d 860, 888 (Minn. 2010) ("If the injury is foreseeable, the duty owed to the plaintiff is one of ordinary care.").

C. Foreseeability and public policy support finding a duty.

1. Syngenta's cases are inapposite.

Likening farmers who purchased and planted Viptera to "gun-wielding killers," *Young v. Bryco Arms*, 821 N.E.2d 1078, 1089-90 (Ill. 2004), Syngenta urges the Court to release it from liability as some courts have done for firearm manufacturers. Syngenta's argument is premised on its assertion that foreseeability alone is "not sufficient to create a duty." (Syn. Br. at 70.) But in at least five relevant states (Minnesota, Alabama, Arkansas, North Dakota, and Wisconsin), foreseeability is indeed the ultimate test. *See, e.g.*, *Eischen v. Crystal Valley Coop.*, 835 N.W.2d 629, 634 (Minn. App. 2013).[48] In virtually all other states, while duty may be refused on public policy grounds, foreseeability remains the most important consideration.[49] Syngenta does not contest foreseeability, so dismissal of these claims is wholly improper.

---

[48] *See also Bush v. Alabama Power Co.*, 457 So. 2d 350, 353 (Ala. 1984) ("ultimate test of a duty" is "foreseeability that harm may result if care is not exercised"); *Shannon v. Wilson*, 947 S.W.2d 349, 352 (Ark. 1997) (same); *Dinger ex rel. Dinger v. Strata Corp.*, 607 N.W.2d 886, 891 (N.D. 2000) ("The risk reasonably to be perceived defines the duty to be obeyed . . . within the range of apprehension."); *Janis v. Nash Finch Co.*, 780 N.W.2d 497, 502 (S.D. 2010) ("The risk reasonably to be perceived defines the duty to be obeyed."); *Alvarado v. Sersch*, 662 N.W.2d 350, 353 (Wis. 2003) ("duty to use ordinary care is established whenever it is foreseeable that a person's act or failure to act might cause harm to some other person.").

[49] *See Perreira v. State*, 768 P.2d 1198, 1209 (Colo. 1989) (while not alone sufficient, foreseeability is "an important factor for consideration"); *Ward v. K Mart Corp.*, 554 N.E.2d

More than that, Plaintiffs allege that the harm was actually foreseen and the MDL Court agreed that at the pleadings stage it was foreseen harm. (MDL Order at 10; CC ¶ 228; NCC ¶ 239.) The Court therefore should begin from the premise that duty exists, asking whether circumstances warrant exception from normal tort principles. To be clear, Syngenta seeks immunity for itself and all GM seed manufacturers—a rule that would free the industry to act with impunity regardless of the risk of harm to others.

Syngenta relies on cases that consider misuse of a manufacturer's product.[50] (*See* Syn. Br. at 71 (using "misuse" to describe conduct justifying the no-duty rule); MDL Order at 12-13 ("[T]hose cases generally have involved the clear misuse of the product. Syngenta does not have a point in arguing that any results in harm to another could be described as "misuse . . . ").) Thus, while some courts are reluctant to hold firearm manufacturers liable for injuries or social

---

223, 226 (Ill. 1990) (foreseeability "is one important concern"); *Hooks SuperX, Inc. v. McLaughlin*, 642 N.E.2d 514, 517 (Ind. 1994) (duty imposed "where a reasonably foreseeable victim is injured by reasonably foreseeable harm."); *Shirley v. Glass*, 308 P.3d 1, 9 (Kan. 2013) ("duty of care is intertwined with the foreseeability of harm"); *Shelton*, 413 S.W.3d at 908 ("foreseeability . . . is the most important factor in determining whether a duty exists"); *Bonds v. SAPA Extrusions, LLC*, 135 So. 3d 799, 802-03 (La. App. 2014) (error to find no duty where harm foreseeable); *Lyle v. Mladinich*, 584 So. 2d 397, 399 (Miss. 1991) ("important component" of duty is that injury is "reasonably foreseeable"); *Lopez*, 26 S.W.3d at 156 ("foreseeability is paramount in determining whether a duty exists"); *Fussell v. N. Carolina Farm Bureau Mut. Ins. Co.*, 695 S.E.2d 437, 440 (N.C. 2010) (duty extends to injury "reasonably foreseeable and avoidable through the exercise of due care"); *Texler v. D.O. Summers Cleaners & Shirt Laundry Co.*, 693 N.E.2d 271, 274 (Ohio 1998) (duty "depends on the foreseeability of the injury"); *Wood v. Mercedes-Benz of Okla. City*, 336 P.3d 457, 459 (Okla. 2014) ("one of the most important considerations in establishing a duty is foreseeability"); *Giggers v. Memphis Hous. Auth.*, 277 S.W.3d 359, 365 (Tenn. 2009) (to determine duty, "courts must first establish that the risk is foreseeable"); *Golden Spread Council, Inc. No. 562 of Boy Scouts of Am. v. Akins*, 926 S.W.2d 287, 290 (Tex. 1996) ("[F]oreseeability weighs heavily in favor of imposing a duty").

[50] Syngenta's attempt to sway this Court that because this case deals with a "safe, non-defective product," no legal duty should be imposed has no legal support. (Syn. Br. at 71-72.) Indeed, none of the cases cited by Syngenta show that is even a consideration in determining whether a duty exists.

costs associated with policing illegal firearm use, those holdings are premised on the fact that most people use the firearms lawfully and safely.[51] *See City of Philadelphia v. Beretta U.S.A., Corp.*, 126 F. Supp. 2d 882, 899 (E.D. Pa. 2000) ("[M]ore than 99% of the gun maker's vendees transact their business lawfully" and distinguishing case where defendant "k[new] of illegal resales"). Additionally, as the MDL Court rightly determined, the cases relied on by Syngenta involved a user who was more culpable.[52] (MDL Order at 17.)

Finally, in other cases, the no-duty rule rested, in part, on a lack of foreseeability that the product would be misused.[53] *See Williams v. Cingular Wireless*, 809 N.E.2d 473, 478 (Ind. App. 2004) ("[C]ellular phone does not cause a driver to wreck a car . . . . Drivers frequently use cellular phones without causing accidents[.]"); *Kirk v. Michael Reese Hosp. & Med. Ctr.*, 513 N.E.2d 387, 394 (Ill. 1987) (drug manufacturers could not foresee that "drugs would be dispensed without warnings by physicians, . . . [and] patient would be discharged from the

---

[51] Most of Syngenta's cases address laws of states not relevant here. *See Hamilton v. Beretta, U.S.A. Corp.*, 750 N.E.2d 1055 (N.Y. 2001) (New York law); *People ex rel. Spitzer v. Sturm, Ruger & Co.*, 761 N.Y.S.2d 192, 194 (App. Div. 2003) (same); *Camden Cnty. Bd. of Chosen Freeholders v. Beretta, U.S.A. Corp.*, 273 F.3d 536, 538 (3d Cir. 2001) (New Jersey law). Courts in relevant states have held to the contrary. *See, e.g., City of Gary ex rel. King v. Smith & Wesson Corp.*, 801 N.E.2d 1222, 1235 (Ind. 2003) (plaintiff stated claim where gun manufacturers were alleged to have notice of illegal handgun sales and ability to control distribution).

[52] Syngenta argues this finding by the MDL Court was improper and also incorrect. This fails, however, as cell phones are not intended for use when driving. Indeed, it is not known to a cell phone manufacturer if any consumer would own a car or plan to use the phone while driving. In contrast, here Syngenta knew the exact purpose, use, and associated risks that existed by commercializing MIR162. And the end-users were not unknown but instead "participants in an inter-connected market." (MDL Order at 13.)

[53] The Nebraska case cited by Syngenta, *J.A.H. ex rel. R.M.H. v. Wadle & Assocs., P.C.*, 589 N.W.2d 256 (Iowa 1999), held on public policy grounds that a mental health professional owed no duty to the child of a patient who claimed that therapy caused estrangement between the patient and the child. In rejecting a duty to protect the child, the court relied on doctor-patient confidentiality as inconsistent with a duty to warn. *Id.* at 260-64. This case does not instruct the Court's decision here.

hospital, drink alcohol, drive a car, lose control of it, hit a tree, and injure the passenger"); *Bond v. E.I. DuPont De Nemours & Co.*, 868 P.2d 1114, 1119-20 (Colo. App. 1993) (finding no evidence that component supplier knew that final product was dangerous").

Unlike these cases, Syngenta foresaw the harm and Viptera seed was not misused. Indeed, it was used exactly as Syngenta intended. Moreover, misuse is no defense if the defendant knew of impending harm. *See City of Philadelphia*, 126 F. Supp. 2d at 901-02 (distinguishing cases on this ground). This Court should not abide Syngenta's request for judicial clemency, particularly at the motion-to-dismiss stage.

2. This is not an exceptional case warranting a no-duty determination.

As one of Syngenta's leading cases acknowledges, an analysis of public policy is required only "[i]n cases in which the existence of a duty is not previously established." *Williams*, 809 N.E.2d at 476. Such an analysis might be appropriate in cases attempting to hold firearm manufacturers liable for "gun-wielding killers," cold-medicine makers liable for meth-cooking criminals, or cell-phone makers liable for irresponsible drivers. But here, every American court has found that seed manufacturers owe a duty of care when their release of a GM trait results in harm to others, including the MDL considering the exact same wrongdoing alleged here.[54] (MDL Order at 17.) To paraphrase Judge Perry in the *Rice* litigation, Syngenta had a duty to introduce Viptera and Duracade "without negligence" and contamination of non-GM [corn] and a resulting disruption of the U.S. [corn] markets was "the known and foreseeable risks that [Syngenta] had a duty to prevent." *In re Genetically Modified Rice Litig.*, 2011 WL

[54] Syngenta attempts to distinguish *Rice* and *Starlink* because the USDA had not yet deregulated the traits at issue. But again, deregulation is not a license to commercialize negligently. In *Rice*, the court implicitly rejected this distinction when it held that plaintiffs could not pursue a negligence per se claim. *In re Genetically Modified Rice Litig.*, 666 F. Supp. 2d at 1022.

5024548, at *5-6 (E.D. Mo. Oct. 21, 2011) (granting plaintiffs' summary judgment on Bayer's intervening-cause defense); *accord In re StarLink*, 212 F. Supp. 2d at 843 (denying motion to dismiss founded on a purported lack of duty, holding that "Aventis had a duty to ensure that StarLink did not enter the human food supply, and their failure to do so caused plaintiffs' corn to be contaminated)"; *see also State ex rel. W. Seed Prod. Corp. v. Campbell*, 442 P.2d 215, 218-19 (Ore. 1968) (manufacturer had duty to avoid foreseeable harm and complaint alleged that defendant "negligently reproduced and sold seed which caused plaintiffs to lose the expected profit from their crop"); *Nakanishi v. Foster*, 393 P.2d 635, 640 (Wash. 1964) (seed distributor had duty on ground that manufacturer or processor who offers goods on the market "must use reasonable care where there is a foreseeable risk of harm to the consumer").

Duty is not foreign in this area, and there is no need to impose a policy-based limitation. Indeed, under Minnesota law, no policy argument would support precluding a duty here as the connection between Syngenta's conduct and the harm is not remote.[55] *See e.g.*, *Glorvigen*, 816 N.W.2d at 582. This is true as it is Syngenta's conduct that created the risks and later caused the harm to Plaintiffs. There was no unknown factor or misuse of its product that ultimately caused the harm as alleged in the complaint. Thus, as "the consequence is direct and is the type of occurrence that was [] reasonably foreseeable [this Court should] hold as a matter of law a duty exists." *Hegna v. E.I. du Pont de Nemours & Co.*, 806 F. Supp. 822, 825 (D. Minn. 1992) on

[55] Relevant policy factors vary by state. Indiana, for example, considers three factors: relationship between the parties, foreseeability, and "public policy concerns." *City of Gary ex rel. King v. Smith & Wesson Corp.*, 801 N.E.2d 1222, 1241 (Ind. 2003) (declining balancing test of factors "[w]here a duty is already recognized"). Syngenta has not identified what factors are relevant in which states. Its motion should be denied for this reason alone and attempts to cure this deficiency in a reply brief should likewise be denied.

reconsideration, 825 F. Supp. 880 (D. Minn. 1993), *aff'd sub nom*, *Abrams v. E.I. Du Pont De Nemours & Co.*, 27 F.3d 571 (8th Cir. 1994).

Desperate, Syngenta turns to a Canadian court applying Canadian law. That case considered whether seed manufacturers owed a duty to organic growers when contamination from GM canola seed contaminated their organic crops, depriving them of the premium that organic produce commands.[56] *Hoffman v. Monsanto Canada*, 2007 SKCA 47, 2007 SK.C. LEXIS 194, at *8 (Can. Sask. C.A. May 7, 2007) ("*Hoffman II*"). As Syngenta is well aware, specialty markets are far different than commodity markets. Among other things, they are "closed loop" systems where specialty producers have incentive to isolate because they get a premium. (*See* CC ¶ 105; NCC ¶ 116.) Commodity markets are not a "closed-loop" system, and Plaintiffs do not allege they are seeking premium over commodity price. Here, it was not just those exporting to China who were harmed, but everyone whose corn was priced at the commodity market. Syngenta is the intermeddler in this non-specialty system by destroying (or at least diminishing) its own stakeholders' market (the commodity market)—something Syngenta represented would not happen.[57]

Importantly, the *Hoffman* plaintiffs did not allege that defendant knew of a European standard prohibiting use of GMs and GM derivatives in products labeled or advertised as

---

[56] Also, plaintiffs in *Hoffman* did "not allege physical harm to themselves or their property." *Hoffman v. Monsanto Canada*, 2005 SK.C. LEXIS 330, at *59 (Can. Sask. Q.B. May 11, 2005) ("*Hoffman I*"). Neither did they allege they were "stakeholders" of the defendant. *Id.*

[57] Syngenta states that the MDL Court incorrectly distinguished *Hoffman*. First, the MDL Court correctly noted that it was non-binding authority with different facts. (MDL Order at 16.) Nevertheless, Syngenta asks this Court to give Canadian law precedential value. In doing so, Syngenta fails to address the fact that the MDL Court noted *Hoffman* did not include allegations that the defendant represented it would actively protect its stakeholders and that the duties at issue in the two cases differed. (*Id.*; MDL Order at 16-17.) This Court should, likewise, reject application of the *Hoffman* case.

organic. *Hoffman I*, at *59. In fact, the defendant could not have known of that standard because it did not exist when the trait was commercialized. *Hoffman II*, at *8-10. By contrast, Syngenta is alleged to have known that China was a key market and required its own approval of MIR162. (CC ¶¶ 35, 317; NCC ¶ 337.) The court also emphasized that "defendants are not alleged to have grown Roundup Ready and Liberty Link canola." *Hoffman II*, at *39. Here, Syngenta grew Viptera. Plaintiffs also allege (missing in *Hoffman*) "a close and direct relationship of such a nature that the defendants may be said to have been under an obligation to be mindful of the plaintiffs' legitimate interests." *Hoffman I*, at *61. Plaintiffs allege that Syngenta acknowledges them as stakeholders, and took affirmative, strategic steps that created, and increased, the very risk that befell them. *See id.* at *75 (distinguishing *Hoffman I* plaintiffs from other plaintiffs whose losses were "clearly foreseeable" and were in a class "vulnerable" to defendants' actions).

One axiom stands clear: "No better general statement can be made than that the courts will find a duty, where in general reasonable persons would recognize it and agree that it exists." Prosser, *supra*, § 53, at 359. Here, seed manufacturers have pledged to act "responsibly in introducing new genetically modified traits." (CC at 1; NCC at 2.) Syngenta acknowledges that this is reasonable, having obtained approval from export markets (except China) prior to commercializing Viptera. Syngenta's no-duty rule disregards what the industry—and Syngenta—recognizes as responsible practice against a known risk of harm. Now, Syngenta wants complete discretion to act with impunity. Rather than promoting responsible conduct, such immunity promotes a race to the bottom. Nothing would prevent manufacturers from introducing a new GM trait before any export market had approved it, a devastating proposition to the American agricultural industry, and wholly inappropriate for a motion to dismiss.

Moreover, the present system is working. In the last 15 years, there have been three other recorded lawsuits of this nature (*Rice*, *Wheat*, and *Starlink*). That hardly heralds a dysfunctional tort system in need of the radical protection demanded by Syngenta. The fact that some states have declined to pass legislation on this issue, proves, at most, that they believe the current tort system is adequately policing unreasonable commercialization of GM crops.[58] Good policy favors keeping the *status quo*, not upending it to allow GM developers impunity to alter their conduct to cause new, widespread harm. Thus, Syngenta's protests are empty since it offers nothing to demonstrate that the "magnitude of the burden" on seed manufacturers would, in fact, be "extraordinary" or that recognizing liability would create a flood of litigation. (Syn. Br. at 73.) *See CSX Transp., Inc. v. McBride*, 131 S. Ct. 2630, 2641 (2011) (rejecting argument that proximate cause instruction would open the door to unlimited liability when defendant could "not identify even *one* trial in which the instruction generated an absurd or untoward award").

Plaintiffs are not asking Syngenta "to reorganize the entire industry framework for growing and distributing corn" (Syn. Br. at 3), but simply to act reasonably. By contrast, and having disregarded its own commitment to "work closely" with stakeholders and manage introduction in a responsible way (CC ¶¶ 28, 31; NCC ¶¶ 39, 42), Syngenta wants to force the burden onto non-producers at huge and unreasonable individual cost. As one court to have considered these issues, *Syngenta Seeds, Inc. v. Bunge North America, Inc.*, 820 F. Supp. 2d 953

---

[58] *See, e.g.*, *Schneidewind v. ANR Pipeline Co.*, 485 U.S. 293, 306 (1988) ("[P]etitioners' reliance on Congress' subsequent failure to enact proposed legislation . . . deserves only passing mention. This Court generally is reluctant to draw inferences from Congress' failure to act."); *Al-Salehi v. I.N.S.*, 47 F.3d 390, 394-95 (10th Cir. 1995) ("Mere nonadoption" of legislation "is not probative of congressional intent . . . since several equally tenable inferences [] may be drawn from such inaction, including the inference that the existing legislation already incorporated the offered change.").

(N.D. Iowa 2011),[59] readily concluded, on a fulsome record that included fact and expert testimony, it was "not commercially reasonable or feasible for Bunge [an exporter] to make . . . modifications to its facilities" to ensure segregation of even a single GM trait "that would then service the Chinese market." *Id.* at 990. The cost to Bunge was "$6 million to $8 million *per facility*." *Id.* (further finding that it would cost "$4 million to $20 million" to "redirect[] a shipment of corn that China refused on delivery because of Viptera tainting"). "[N]o reasonable balance of equities would impose upon [non-producers] the prodigious additional expense of segregating Viptera corn (or segregating non-Viptera corn earmarked for Chinese export), where [they] did not create the situation in which Viptera corn has not been yet approved for import in China." *Id.* 990. The problem "arises entirely because Syngenta decided to commercialize Viptera corn knowing that it did not yet have Chinese and some other import approvals and would not have them for the 2011 crop year, and under circumstances in which Syngenta should have reasonably recognized that Chinese imports of United States corn for the 2011 crop year might well be very significant." *Id.* The court rejected Syngenta's request to shift the risk to Bunge. *Id.* at 988. Here, any such shift would be entirely premature at the motion-to-dismiss stage.

These findings are inapplicable to the "gun-wielding killer" cases Syngenta cites, where a fraction of customers misuse a product and the Court is asked to impose a duty on the manufacturer to prevent such misuse. In contrast, "public interest strongly favors allocating the risks of a decision to introduce a new transgenic grain into the commercial market on the company that decided to commercialize before obtaining all import approvals, not on the party

[59] Syngenta, who brought the lawsuit in *Bunge*, should be collaterally estopped from challenging these findings, an issue for resolution at a later date.

that is simply confronted with that decision and has reasonable countervailing business interests in not accepting the grain."[60] *Bunge*, 820 F. Supp. 2d at 992.

Moreover, beyond having a profit motive to commercialize before approval by major export markets, seed manufacturers are the only market participants with knowledge about the status of any export approval they have sought. Immunizing them from liability would make no sense given their ability to mislead the market about that approval, as Syngenta did here. (*See* CC ¶¶ 150-155, 176-180, 307.) Indeed, as internal communications reveal, Syngenta capitalized on farmers' lack of knowledge about the status of Chinese approval, celebrating that by the time growers learned of non-approval, it would be to their advantage as there would be a seed shortage. (CC ¶ 168; NCC ¶ 147.) A party with the ability to manipulate the flow of information should not be immunized from its negligence and push responsibility downstream.

Seed manufacturers are the only parties capable of shifting the cost of acting non-negligently to the users of those seeds. *See* Prosser, *supra*, § 98 at 692-93 ("Those . . . engaged in the manufacturing enterprise have the capacity to distribute the losses of the few among the many who purchase the products."). "This can be regarded as fairness and justice reason of policy." *Id.* at 693. Where the cost of negligence can be incorporated into the sale, the natural forces of an economic market disperse the harm caused by that seed to the beneficiaries of that seed.

And it is not outside Syngenta's control to exercise reasonable care. Manufacturers go to extensive lengths to control the use of GM seed when it serves their profit interests. *See Bowman*

---

[60] It is hypocritical for Syngenta to argue that seed manufacturers have no duty because non-producers (like Bunge) can police segregation given that when Bunge attempted to do so, Syngenta sued because it interfered with Syngenta's ability to sell Viptera seed. (CC ¶ 136; NCC ¶ 147.) That action alone exposes Syngenta's thinly veiled motive in seeking a no-duty rule.

v. Monsanto Co., 133 S. Ct. 1761, 1764 (2013) (GM seed manufacturers do not allow growers to save any seed to preserve their patent monopoly profits). Plaintiffs are not seeking to make seed manufacturers "insurers" (Syn. Br. at 33), but to hold them accountable when their unreasonable conduct upsets the *status quo* and expose others to risks that would not exist but for their (monopoly) profiteering.

Finally, a decision not to extinguish Syngenta's duty has no implications beyond this case. By contrast, a no-duty rule would have wide implications, freeing manufacturers to create market-wide harms.

3. Public policy should not be adjudicated absent a factual record.

Alternatively, it would be premature to extinguish Syngenta's liability on an incomplete factual record because Syngenta relies on assertions and inferences that are nowhere in the Complaints and are, in fact, contradicted by the allegations. In the context of duty, disputed facts are submitted to the jury.[61] *Bjerke v. Johnson*, 742 N.W.2d 660, 667 n.4 (Minn. 2007) (although

[61] *Ex parte BASF Constr. Chemicals, LLC*, 153 So. 3d 793, 804 (Ala. 2013) ("Where the facts upon which the existence of a duty depends, are disputed, the factual dispute is for resolution by the jury") (internal citations and quotation marks omitted); *Heigle v. Miller*, 965 S.W.2d 116, 121 (Ark. 1998) (reversing summary judgment because "there was an issue of disputed facts" regarding duty to warn); *Mile Hi Concrete, Inc. v. Matz*, 842 P.2d 198, 203-04 (Colo. 1992) ("Because of the evidentiary conflict, the district court's instruction on the duty owed . . . properly left the factual determination of [what the duty encompasses] . . . for the jury"); *DeVecchis v. City of Chicago*, 2013 WL 6002084, at *12 (Ill. App. 2013) ("where the duty depends on the existence of facts that are in dispute, the existence of the relevant facts presents a question for the jury to resolve" (internal quotations omitted)); *Nagel v. Northern Indiana Public Serv. Co.*, 26 N.E.3d 30, 44 (Ind. App 2015) ("whether a duty exists…may depend upon resolution of underlying facts by the trier of fact"); *Farwell*, 240 N.W.2d at 220 (disputed fact issues pertaining to duty "must be submitted to the jury, our traditional finders of fact, for ultimate resolution" (internal citations and quotation marks omitted)); *Mozingo by Thomas v. Pitt Cnty. Mem'l Hosp., Inc.*, 400 S.E.2d 747, 753 (N.C. App. 1991) ("when the facts are in dispute or when more than a single inference can be drawn from the evidence, the issue of whether a duty exists is a mixed question of law and fact. The issues of fact must first be resolved by the fact finder"); *Butz v. Werner*, 438 N.W.2d 509, 511 (N.D. 1989) ("if the existence of a duty depends upon factual determinations, their resolution is for the trier of fact"); *Peyer v. Ohio*

duty is generally a question of law, "this would not foreclose the possibility that there may be situations in which the facts necessary to establish a special relationship are in dispute and should be submitted to the jury."). The Court cannot simply accept Syngenta's contradictory assertions, such as when it claims that recognizing a duty would "run flatly counter to the policy determination that the USDA made in approving Viptera" (Syn. Br. at 33), while simultaneously arguing that the "USDA 'has no power to regulate the adverse economic effects that could follow [a GM trait's] deregulation'" (*id.* at 39). Moreover, the findings in *Syngenta Seeds, Inc.*, 820 F. Supp. 2d at 966-67, which were made on a more complete record, counsel against adopting a no-duty argument, as Syngenta requests.

V. FIFRA does not preempt Plaintiffs' claims.

As Syngenta acknowledges, FIFRA governs warnings provided on labels and packaging of certain agricultural products. But the Supreme Court has held that only claims for fraud or failure to warn that would impose a labeling or packaging obligation broader than or inconsistent with that provided under FIFRA are preempted. *Bates v. Dow Agrosciences LLC*, 544 U.S. 431, 453-54 (2005). The Court further noted that FIFRA does not preempt common-law claims for negligence where a verdict in a plaintiff's favor would not impose any requirement on the manufacturer's labels. *Id.* at 444 (common law rules such as negligence do not "require[] that manufacturers label or package their products in any particular way").

Plaintiffs do not assert a direct failure to warn claim asserting that the label on the bags of Viptera seed were inaccurate. Indeed, Plaintiffs' claims are not tied to Viptera labels. What Syngenta refers to as a "failure to warn" claim is actually just a sub-bullet point in a laundry list

---

Water Serv. Co., 720 N.E.2d 195, 201 (Ohio 1998) (sufficient evidence created fact issue on duty).

of ways Syngenta failed to act in a reasonable manner, which is not tied to any labeling. FIFRA has no application.

Nevertheless, to the extent the Complaints can be construed to include a claim that Syngenta failed to warn purchasers of its products, as the MDL Court found, Plaintiffs do not take issue with the MDL Court Order dismissing a claim for the sake of clarity that Plaintiffs never intended to plead in the first place. (MDL Order at 49.)

VI. Plaintiffs' have adequately pled their duty to warn claims.

Minnesota law places on manufactures a "duty to warn end users of a dangerous product if it is reasonably foreseeable that an injury could occur in its use." *Gray v. Badger Min. Corp*., 676 N.W.2d 268, 274 (Minn.2004); *see also Gardner v. Brillion Iron Works, Inc.*, No. CIV. 11-3528 (JRT/LIB), 2014 WL 639960, at *9 (D. Minn. Feb. 19, 2014); *Frey v. Montgomery Ward & Co*., 258 N.W.2d 782, 788 (Minn. 1977). To prevail under Minnesota law, a plaintiff must show that "(1) the defendant[ ] had reason to know of the dangers of using the product; (2) the warnings fell short of those reasonably required, breaching the duty of care; and (3) the lack of an adequate warning caused the plaintiff's injuries." *McRunnel v. Batco Mfg.*, 917 F. Supp. 2d 946, 957 (D. Minn. 2013) (citing *In re Levaquin Prods. Liab. Litig*., 700 F.3d 1161, 1166 (8th Cir. 2012)). To meet its obligation Syngenta was required to provide "adequate instructions for safe use" as well as to warn of the dangers of proper use of MIR162. *Id.* (quoting *Glorvigen v. Cirrus Design Corp*., 816 N.W.2d 572, 582 (Minn.2012)).

Under Minnesota notice pleading standards, Plaintiffs have met their pleading requirements. The Complaints allege that Syngenta knew of the dangers posed to the corn market by releasing MIR162; that Syngenta made no warnings of the dangers, and that failure caused Plaintiffs' damages. (CC ¶¶ 22, 65, 68, 83-87, 353-56; NCC ¶¶ 33, 76, 79, 354-57.) Nevertheless, Syngenta grasps at three arguments for why Plaintiffs' claims are barred:

(1) FIFRA preemption, (2) component-part doctrine, and (3) lack of a duty to Plaintiffs. Each of these arguments falls short.

First, Plaintiffs' claims are plainly not preempted by FIFRA for the reasons previously discussed.

Second, Syngenta misstates the scope and application of the component-parts exception. That exception applies where the defendant produces a part of the whole; here, the product in question is the end product. *See Gray v. Badger Min. Corp.*, 676 N.W.2d 268, 281 (Minn. 2004) ("According to the Restatement (Third), a supplier of a raw material should not be held liable when its product is integrated as a component into a finished product if the component itself is not dangerous."). Here there is but a single use for corn seeds, to grow corn. (*See* CC ¶¶ 11, 13; NCC ¶¶ 9, 24.) An argument by Syngenta that corn could be used for either livestock feed or human consumption creates a false difference, because the corn is the same whatever its intended market.

To bolster this argument, Syngenta cites *TMJ Implants*, which states: "Plaintiffs have cited no case involving multi-use materials that were not inherently dangerous in which the raw material supplier defense was rejected." *In re TMJ Implants Products Liab. Litig.*, 872 F. Supp. 1019, 1028 (D. Minn. 1995); *aff'd sub nom, In re Temporomandibular Joint (TMJ) Implants Products Liab. Litig.*, 97 F.3d 1050 (8th Cir. 1996). *TMJ Implants* involved "implants out of polytetrafluoroethylene (PTFE) powder and fiber, fluorinated ethylene propylene (FEP) film, and other raw materials." *Id.* at 1021. The parties at issue were DuPont, who manufactured the PTFE and FEP (collectively "Teflon"), and American Durafilm, who served as a middleman selling FEP to customers whose orders were below DuPont's minimum direct order requirements. *Id.* at 1022. The court held that there were myriad non-dangerous uses for Teflon, and that as a matter

of law DuPont and Durafilm could not be liable, because "[t]o impose liability upon [defendants] for the uses to which those products are put would force [defendants] to retain experts in a huge variety of areas in order to determine the possible risks associated with each potential use." *Id.* at 1025.

Syngenta's product is not multi-use, and it is not simply a part used in the construction of a larger product. The seed sold by Syngenta is put to a single use: growing a corn stalk. The purpose of the component-parts exception—to protect a manufacturer who produces a safe component from liability when used correctly in an otherwise dangerous product—is inapplicable because Syngenta seed was not an amalgamation of components from numerous manufactures. *See Thompson v. Hirano Tecseed Co.*, 456 F.3d 805, 810 (8th Cir. 2006). Viptera was a singular product, there were no other components and it was not sold to another manufacture to be combined with any other products prior to distribution; it was a single strain of corn seed produced by Syngenta. (CC ¶¶ 11, 13, 41-45; NCC ¶¶ 9, 24, 27, 52-56.)

Finally, Syngenta owed a duty to plaintiffs to warn them of the dangers of MIR162 entering the corn supply. "The duty to warn arises when a manufacturer knew or should have known about an alleged defect or danger, and should have reasonably foreseen that the defect or danger would cause injury." *Block v. Toyota Motor Corp.*, 5 F. Supp. 3d 1047, 1070 (D. Minn. 2014). Plaintiffs' Complaints make clear that Syngenta knew the risk premature commercialization posed. (*See, e.g.*, CC ¶¶ 35, 224; NCC ¶¶ 46, 235.)

Syngenta's argument regarding its lack of a duty to warn is primarily premised on the position of Plaintiffs in the market—that Plaintiffs were expected to know the risk. Syngenta bases this claim on its contention that Plaintiffs were experienced in the corn market and as such were knowledgeable about the dangers of MIR162 and the biological fact of cross-pollination.

(Syn. Br. at 98.) First, any such consideration is outside the scope of a motion to dismiss, which simply accepts the facts pled as true. Second, "[p]ast experience with a product . . . does not necessarily alert users to all of the dangers associated with the product." *Willmar Poultry Co. v. Carus Chem. Co.*, 378 N.W.2d 830, 835 (Minn. App. 1985). Third, even if Plaintiffs knew about the possibility of cross-pollination, Plaintiffs cannot reasonably be expected to have full knowledge of the international regulatory market. Instead, Syngenta had a duty to disseminate truthful information about that process, and the dangers of selling an unapproved product prematurely. *See Forster v. R.J. Reynolds Tobacco Co.*, 437 N.W.2d 655, 662 (Minn. 1989) ("the duty to warn assumes truthfulness and is concerned with how much of what is truthful must be disseminated").

Syngenta owed Plaintiffs a duty to warn them of the potential dangers, to provide "adequate instructions for safe use," and to warn of the dangers of proper use of MIR162. *McRunnel v. Batco Mfg.*, 917 F. Supp. 2d 946, 957 (D. Minn. 2013) (quoting *Glorvigen v. Cirrus Design Corp.*, 816 N.W.2d 572, 582 (Minn. 2012)). Plaintiffs allege that Syngenta utterly failed in all three respects, and such allegations must be accepted as true at the motion-to-dismiss stage.

VII. Plaintiffs sufficiently allege claims for tortious interference.

Producers in Alabama, Arkansas, Indiana, Minnesota, Missouri, North Dakota, Oklahoma, South Dakota, Tennessee, and Texas allege claims for tortious interference. Syngenta argues that Plaintiffs' allegations lack (1) specific business relationships; (2) adequate injury; (3) intentional conduct by Syngenta; and (4) improper means used by Syngenta. (Syn Br. at 105.) These arguments were rejected in the MDL Order, and should likewise be rejected by this Court. (*See* MDL Order at 67-72.)

A. Plaintiffs adequately allege business relationships that Syngenta harmed.

Any requirements regarding specific third parties for tortious interference claims apply at the summary judgment or trial stage. Despite Syngenta's twisted presentation of the law—that naming specific third parties in a complaint is somehow required—no such mandate exists in any of the states at issue. For example, in *Gieseke ex rel. Diversified Water Diversion, Inc. v. IDCA, Inc.*, 844 N.W.2d 210, 212 (Minn. 2014), the tortious-interference claim failed only after a trial during which no testimony or evidence was presented regarding a specific third party with whom plaintiff expected to do business but did not. Syngenta distorts *Gieseke*'s proof requirement into a pleading requirement.[62] This tortured construction ignores the court's holding: "We conclude that to prove [not successfully plead] the defendant tortiously interfered with plaintiff's prospective economic advantage, a plaintiff must specifically identify a third party with whom the plaintiff had a reasonable probability of a future relationship." *Id.* at 221; *see also id.* at 219 (specifying the elements a plaintiff must "prove," not plead, to succeed on a tortious interference claim); *id.* at 220 (analyzing whether plaintiff "present[ed] sufficient evidence" of a specific third party with whom he expected to do business, not whether he named a specific third party in his pleading); *id.* at 221 (explaining why plaintiffs must "demonstrate," not plead, the existence of specific third parties with whom they expect to do business).

[62] Syngenta also ignored the four-day trial in *Stonebridge Collection v. Carmichael*, 791 F.3d 811, 815, 819-20 (8th Cir. 2015) (holding the tortious interference failed due to lack of proof, not insufficient pleadings). Similarly, the tortious interference claim in *Playboy Enters., Inc. v. Editorial Caballero, S.A. de C.V.*, 202 S.W.3d 250, 265 (Tex. App. 2006), failed after plaintiff failed to present any potential contracts at trial.

Syngenta also misconstrues the law of Alabama,[63] Arkansas,[64] Indiana,[65] South Dakota, and Tennessee,[66] which requires interference not with a specific third party, but merely with an identifiable class of third parties.[67] For example, in *Baptist Health v. Murphy*, 373 S.W.3d 269, 282 (Ark. 2010), doctors alleged that a hospital's privileging policies interfered

---

[63] Alabama does not require naming a specific third party in a tortious interference claim to survive a motion to dismiss. Syngenta cites only one Alabama case to support this argument—*Walter Energy, Inc. v. Audley Capital Advisors, LLP*, No. 1131104, 2015 WL 731152 (Ala. Feb. 20, 2015). (Syn. Br. at 105 n.139.) *Walter Energy* simply concluded that a tortious interference claim requires interference by a stranger to the transaction, not that a specific third party must be named in the complaint.

[64] *Overturff v. Read*, 442 S.W.3d 862, 867-68 (Ark. App. 2014), cited by Syngenta, did not require naming a specific third party in a tortious interference claim to survive a motion to dismiss. Instead, summary judgment was affirmed when after over a year of discovery, no "sufficiently concrete" expectancy was identified to support the tortious interference claim. Likewise, in *Kidd v. Bass Hotels & Resorts, Inc.*, 136 F. Supp. 2d 965, 970 (E.D. Ark. 2000), the tortious interference claim was rejected on summary judgment due to "insufficient evidence."

[65] The only Indiana case cited by Syngenta listed the elements for tortious interference in a footnote, but did not even consider a tortious interference claim, let alone hold that a specific third party must be named in the complaint to survive a motion to dismiss. *See Felsher v. Univ. of Evansville*, 755 N.E.2d 589, 598 n.21 (Ind. 2001).

[66] Syngenta cites *Golf Sci. Consultants, Inc. v. Cheng*, 2009 U.S. Dist. LEXIS 37721, at *10 (E.D. Tenn. May 4, 2009), to argue that specific third parties must be named in the complaint to survive a motion to dismiss. *Cheng* involved a summary judgment motion decided after two years of discovery during which the plaintiff failed to show "a prospective relationship with an identifiable class of third persons." *Id.* at *6, *26-27. Syngenta's reliance on *Overnite Transp. Co. v. Teamsters Local Union No. 480*, 2004 Tenn. App. LEXIS 139, at *13 (Tenn. App. Feb. 27, 2004), is also improper. *Overnite* expressly did not consider tortious interference with prospective economic advantage, but instead considered interference with employees and security guards who had been hired for protection during a strike with picketing. *Id.*

[67] *White Sands Grp., L.L.C. v. PRS II, LLC*, 32 So. 3d 5, 15 (Ala. 2009) (ongoing business relationship sufficient); *Stewart Title Guar. Co. v. Am. Abstract & Title Co.*, 215 S.W.3d 596, 604 (Ark. 2005) (upholding a complaint that did not name a specific third party with whom interference occurred, and further noting that "whether a valid business expectancy exist[s is] a question of fact for the jury to determine"); *Trau-Med of Am., Inc. v. Allstate Ins. Co.*, 71 S.W.3d 691, 701 (Tenn. 2002) (identifiable class of third persons sufficient).

with their business expectancy in ongoing relationships with patients. The hospital argued, like Syngenta, that the doctors failed to identify in the complaint "a specific contract" that was affected. *Id. Murphy* held that showing that the hospital disrupted the doctors' reasonable expectations for ongoing relationships was sufficient.[68] *Id.* at 283-84. Similarly, the South Dakota Supreme Court made clear, after a lengthy analysis, that:

> If we were to require that prospective third parties be identified by name we would render [tortious interference] for the most part, a nullity and, in all actuality, never allow a plaintiff to proceed with its claim beyond summary judgment especially if the business enterprise is dependent upon a large pool of clientele. The parties must only be identifiable—not identified as to provide an individual name for each.

Hayes v. N. Hills Gen. Hosp., 590 N.W.2d 243, 250 (S.D. 1999) (citation omitted).

Missouri,[69] North Dakota, Oklahoma,[70] and Texas[71] require pleading interference with a reasonably expected economic advantage, not with a specific third party. For example, Texas has

---

[68] Syngenta's reliance on *Country Corner Food & Drug, Inc. v. First State Bank & Trust Co. of Conway, Ark.*, 966 S.W.2d 894, 898 (Ark. 1998), is misplaced. Any requirement by *Country Corner* to identify a specific party was abolished by *Stewart Title*, 215 S.W.3d at 604, and *Murphy*, 373 S.W.3d at 283-84. *Gruhlke v. Sioux Empire Fed. Credit Union, Inc.*, 756 N.W.2d 399, 404 (S.D. 2008), is inapposite. The claim considered was for intentional interference with an existing contract by a corporate officer in the employment context. *Forever Green Athletic Fields, Inc. v. Lasiter Constr., Inc.*, 384 S.W.3d 540, 552 (Ark. App. 2011), is unavailing because the plaintiff merely alleged damage to its reputation and a general desire to be able to do business within Arkansas.

[69] Syngenta cites only one Missouri case to argue that a specific third party must be pled in a tortious interference claim to survive a motion to dismiss: *Briner Elec. Co. v. Sachs Elec.*, 680 S.W.2d 737, 740 (Mo. App. 1984). *Briner* requires only "the existence of a valid business expectancy" and concludes that the jury verdict on the tortious interference claim was proper because plaintiff failed to prove an absence of justification. *Id.* at 740-41. Moreover, *Sloan v. Bankers Life & Cas. Co.*, 1 S.W.3d 555, 565 (Mo. App. 1999), makes clear that "a regular course of prior dealings suggests a valid business expectancy."

[70] Syngenta improperly cites *Tuffy's, Inc. v. City of Okla. City*, 212 P.3d 1158, 1165 (Okla. 2009), for the notion that specific third parties must be named in the complaint to withstand a

recognized that "[a]lthough plaintiffs do not specify the business relationships or actual or prospective contracts [at issue], such is not their burden to defeat a motion for summary judgment." *Winston v. Am. Med. Int'l*, 930 S.W.2d 945, 953 (Tex. App. 1996). *See also Bell v. May Dep't Stores Co.*, 6 S.W.3d 871, 876-88 (Mo. 1999) (holding plaintiff's expectation of obtaining credit was disrupted when a retailer reported false and negative information to credit agencies and that it was immaterial that plaintiff had not yet been denied credit by any particular company); *Trade 'N Post, L.L.C. v. World Duty Free Ams., Inc.*, 628 N.W.2d 707, 717 (N.D. 2001) (requiring the existence of a valid business expectancy); *Gonzalez v. Sessom*, 137 P.3d 1245, 1249 (Okla. Civ. App. 2006) (same).

Moreover, assuming Syngenta's interpretation of the applicable law was correct, which it is not, Plaintiffs have sufficiently pled their claim for tortious interference. Indeed, the Introduction and Paragraphs 27-46, 59-62, 70, 73-106, 112-205, 213-40, 290-91, 310-18, 368-74, 494-500, 885-91, 1077-84, 1336-42, 1391-97, 1575-82, 1611-17, 1640-46 of the Non-Class Complaint provide the factual and legal basis for Plaintiffs' tortious interference claim. Specifically, Plaintiffs alleged that they had business relationships and a reasonable expectancy of continued relationships with purchasers of corn and that Syngenta induced or caused a disruption of that expectancy. (NCC ¶¶ 310-18, 368-74, 494-500, 885-91, 1077-84, 1336-42, 1391-97, 1575-82, 1611-17, 1640-46.) The MDL Order concluded that such allegations were sufficient to meet heightened federal pleading standards. (MDL Order at 68-69 ("Here plaintiffs

---

motion to dismiss. *Tuffy's* held that a city had immunity against such a claim and did not analyze the sufficiency of the pleading. *Id.* at 1164-65.

[71] *Prudential Ins. Co. of Am. v. Fin. Review Servs., Inc.*, 29 S.W.3d 74 (Tex. 2000), is not informative. In *Prudential*, the court considered tortious interference with an existing contract and whether an agency relationship affected that claim. *Id.* at 78.

have alleged relationships and expectancies with an identifiable class of third parties, namely purchasers of corn from them. The Court concludes that such allegations are sufficient to state a claim for tortious interference that gives sufficient notice to Syngenta, particularly since the case involves a commodity that is sold in a defined market.").)

The information in Plaintiffs' Complaint provides "information sufficient to fairly notify [Syngenta] of the claim against it." *Walsh*, 851 N.W.2d at 605. The Minnesota Supreme Court has made clear that when Minnesota's "rules of civil procedure require more factual specificity—or 'particularity'—for a certain type of pleading, they say so clearly." *Id.* Nothing in the Minnesota Rules of Civil Procedure requires Plaintiffs to name specific third parties in their tortious interference claims, despite Syngenta's urging. Plaintiffs have sufficiently alleged their claims for tortious interference.

A. Plaintiffs adequately allege injury.

Syngenta contends that Plaintiffs have not pled that Syngenta induced or caused a breach or termination of Plaintiffs' economic expectancy. But this is not the law. The jurisdictions at issue allow for tortious interference if Syngenta (1) made a relationship with a third party more expensive or burdensome[72] or (2) interfered with an expected economic advantage.[73] Plaintiffs

---

[72] *White Sands Grp., L.L.C. v. PRS II, LLC*, 32 So. 3d 5, 17 (Ala. 2009) (plaintiff "need not 'establish that but for' the interference it would have been awarded a contract"); *Columbus Med. Servs. Org., LLC v. Liberty Healthcare Corp.*, 911 N.E.2d 85, 92 (Ind. App. 2009) (tortious interference where defendant caused "detrimental consequences" to plaintiff); *Wilspec Techs., Inc. v. Duncan Holding Grp. Co.*, 204 P.3d 69, 73 (Okla. 2009) (claim only requires showing that interference made "plaintiff's performance more oppressive"); *Niemeyer v. U.S. Fid. & Guar. Co.*, 789 P.2d 1318, 1321 (Okla. 1990) (plaintiff stated a claim for tortious interference "with business" when liability insurer gave false information to plaintiff's carrier, resulting in a lower settlement offer); *Stebbins v. Edwards*, 224 P. 714, 714-16 (Okla. 1924) (plaintiff stated claim for tortious interference where defendants made false statements that caused a disruption in plaintiffs' sales).

allege that Syngenta's conduct prevented the export of U.S. corn to China, thereby decreasing sales and depressing prices, and therefore have sufficiently pled the requisite injury. (*See, e.g.*, NCC ¶¶ 316-17, 373, 499-500, 890, 1083, 1341, 1581, 1616, 1645.)

The cases relied on by Syngenta to suggest the contrary are uninformative. *See McNeill v. Sec. Benefit Life Ins. Co.*, 28 F.3d 891, 894 (8th Cir. 1994) (concluding on summary judgment that the claimed interference was indirect and could not support a tortious interference claim); *Wilkey v. Hull*, 366 Fed. App'x 634 (6th Cir. 2010) (applying Ohio law, which is not at issue); *Erickson's Flooring & Supply Co. v. Tembec, Inc.*, 2006 U.S. Dist. LEXIS 1459 (E.D. Mich. Jan. 18, 2006) (applying Michigan law, which is not at issue); *Schoedinger v. United Healthcare of Midwest, Inc.*, 2011 U.S. Dist. LEXIS 2937, at *19-21 (E.D. Mo. Jan. 12, 2011) (determining plaintiff's claim of tortious interference was actually a claim for breach of contract); *Reali, Giampetro & Scott v. Soc'y Nat'l Bank*, 729 N.E.2d 1259 (Ohio App. 1999) (applying Ohio law, which is not at issue); *Brown v. CVS Pharm., L.L.C.*, 982 F. Supp. 2d 793, 805 (M.D. Tenn. 2013) (affirming summary judgment because during plaintiff's deposition, "she was unable to state whether she had in fact lost a single dollar of income because of the defendants' alleged actions"); *Golf Sci. Consultants, Inc. v. Cheng*, 2009 U.S. Dist. LEXIS 37721, at *28-29 (E.D.

---

[73] *Vowell v. Fairfield Bay Cmty. Club*, 58 S.W.3d 324, 329 (Ark. 2001) (holding that disruption of the plaintiff's expectancy in "a stream of dues" was sufficient to support tortious interference). Further, the Arkansas Model Jury Instruction on tortious interference provides that either "disruption or termination" of the expectancy will support liability. Ark. Model J. Instr. Civ. § 403 (2015). *See also Gieseke*, 844 N.W.2d at 219 (plaintiff must prove that defendant "interfered with plaintiff's reasonable expectation of economic advantage," not that a relationship must have terminated); *Kantel Commc'ns v. Casey*, 865 S.W.2d 685, 693 (Mo. App. 1993) ("A reasonable expectation of economic advantage . . . support[s] a claim for wrongful interference with a business expectancy"); *Carlson v. Roetzel & Andress*, 2008 U.S. Dist. LEXIS 27084, at *13 (D. N.D. Mar. 27, 2008) (holding "plaintiff must show he would have obtained the economic benefit in the absence of the interference"); *St. Onge Livestock Co. v. Curtis*, 650 N.W.2d 537 (S.D. 2002) (noting that the alleged injury of causing lost revenue is sufficient to withstand summary judgment).

Tenn. May 4, 2009) (affirming summary judgment decided after two years of discovery due to "insufficient evidence" regarding injury to plaintiff); *Tex. Disposal Sys. Landfill, Inc. v. Waste Mgmt. Holdings, Inc.*, 219 S.W.3d 563, 590 (Tex. App. 2007) (affirming summary judgment because plaintiff failed to "prove" tortious interference and noting that potential contracts were delayed, not prevented).

Syngenta has utterly failed to show that Plaintiffs' alleged injury is insufficient to survive a motion to dismiss. Indeed, as the MDL Order concluded:

> To some extent, Syngenta's argument raises only a matter of semantics. If there is an expectation of a particular business—a sale at a certain price—and then the sale at that price becomes impossible, then there has been an unrealized expectation that could support a tortious interference claim—even if the plaintiff mitigates its losses by making a deal at a lower price. Syngenta has not explained why interference could not be the prevention of a sale at a particular price.

(MDL Order at 72.)

B. Plaintiffs sufficiently allege improper means or wrongful conduct.

Syngenta argues that Plaintiffs have failed to adequately allege interference with their business expectancies through "improper means," asserting that such means must be "independently tortious or unlawful." (Syn. Br. at 111.) In so doing, Syngenta attempts to place an additional burden on Plaintiffs, arguing that Plaintiffs must *allege* that Syngenta's conduct "amounted to other, specific torts," to state a claim for tortious interference.

The majority of cases cited by Syngenta to support this purported pleading standard involved decisions rendered on a full record, where a jury weighed the evidence to determine whether independently tortious or otherwise wrongful conduct had occurred.[74] Further, of the

[74] *See Wal-Mart Stores, Inc. v. Sturges*, 52 S.W.3d 711, 726 (Tex. 2001) (reversing jury decision awarding damages for tortious interference with prospective advantage); *Trade'N Post, L.L.C. v. World Duty Free Ams., Inc.*, 628 N.W.2d 707, 721 (N.D. 2001) (determining on request for certification from federal court that a claim for unlawful interference with business is a

ten states at issue, three require a multifactor test to determine whether defendant's conduct was "improper," not "independently tortious," thereby negating Syngenta's contention that such a universal pleading standard should apply. *See Baptist Health v. Murphy*, 373 S.W.3d 269, 281-82 (Ark. 2009) (requiring analysis of the factors in the Restatement (Second) of Torts[75] for "guidance about what is improper"); *Selle v. Tozser*, 786 N.W.2d 748, 753 (S.D. 2010); *White Sands Grp., L.L.C. v. PRS II, LLC*, 32 So. 3d 5, 13 (Ala. 2009). Similarly, Tennessee has adopted a much more expansive definition of conduct that may constitute "improper interference." *Trau-Med of Am., Inc. v. Allstate Ins. Co.*, 71 S.W.3d 691, 701 n.5 (Tenn. 2002) (noting that improper means is "dependent on the particular facts and circumstances of a given case"). In the MDL Order, Judge Lungstrum also properly concluded that the interference need only be "improper," pointing out the "fact-intensive" nature of the inquiry in many of the at-issue states, and that Syngenta failed to show that the interference alleged by Plaintiffs could not be deemed improper.[76] (MDL Order at 70.) Syngenta similarly fails here.

---

recognized tort in North Dakota, but leaving it to the federal district court to "resolve the factual disputes and determine whether [defendant's] conduct provides a basis for tort liability"); *Community Title Co. v. Roosevelt Federal Sav. & Loan Ass'n*, 796 S.W.2d 369, 374 (Mo. 1990) (reversing grant of new trial and remanding for entry of judgment because plaintiffs failed, at trial, to establish the absence of justification for defendant's interferential conduct.)

[75] The factors are: (a) the nature of the actor's conduct; (b) the actor's motive; (c) the interests of the other with which the actor's conduct interferes; (d) the interests sought to be advanced by the actor; (e) the social interests in protecting the freedom of action of the actor and the contractual interests of the other; (f) the proximity or remoteness of the actor's conduct to the interference; and (g) the relations between the parties. *See* Restatement (Second) of Torts § 767 (1979).

[76] This aligns with the policy goal of limiting tortious interference to improper conduct to encourage healthy competition among business. *See Gieseke ex rel. Diversified Water Diversion, Inc.*, 844 N.W.2d at 218 (noting that "[t]he heart of our national economic policy long has been faith in the value of competition"). That policy concern is not implicated here, however, where Plaintiffs' allegations are that Syngenta deliberately, and for its own gain, interfered with the entire U.S. corn market.

Moreover, even if allegations of independent tortious conduct were required to survive a motion to dismiss, Plaintiffs' Complaint contains such allegations. Plaintiffs allege that Syngenta engaged in independently actionable conduct in that it made material misrepresentations and/or omissions of fact, trespassed upon the property rights of Plaintiffs, and otherwise breached its duty of care to Plaintiffs, all of which caused Plaintiffs harm. (NCC ¶¶ 300-86, 484-504, 875-91, 1065-84, 1326-67, 1381-97, 1557-1659.) Thus, Plaintiffs have sufficiently pled their claims for tortious interference.

Syngenta also argues that Plaintiffs must demonstrate that Syngenta's improper conduct was directed towards the particular business expectancy in question. (*See* Syn. Br. at 111.) As the MDL Order aptly observed, Syngenta's support for this contention is a single case from Illinois. (MDL Order at 71.) The law of Illinois is not at issue here, and Syngenta provides no other authority for the implementation of such a standard of proof, much less pleading. Thus, this argument should be flatly rejected.

Finally, Syngenta argues that because it had regulatory approval to sell Viptera in the United States, its pursuit of profit renders any action it took "lawful" and therefore not improper. Again, as noted in the MDL Order, regulatory approval does not equate with lawfulness or otherwise immunize Syngenta from liability for its wrongful conduct. (MDL Order at 71.) Plaintiffs' overarching contention is that the methods Syngenta employed in introducing Viptera into the marketplace were unlawful. Syngenta's response—that selling an approved product "rubber stamps" any conduct associated with selling that product—is entirely circular.[77]

---

[77] In support of its argument, Syngenta refers to two Iowa decisions (Iowa law is not at issue here) and an Alabama case, *Bridgeway Commc'ns, Inc. v. Trio Broad., Inc.*, 562 So. 2d 222 (Ala.

At the pleading stage, and under the standard articulated in *Walsh*, 851 N.W.2d at 605, Plaintiffs have sufficiently alleged improper means engaged in by Syngenta, and the tortious interference claims should not be dismissed.

C. Plaintiffs adequately allege intent.

Syngenta argues that Plaintiffs have failed to adequately allege that it acted with the requisite level of intent. (Syn. Br. at 112.) In the states at issue in this motion, intentional torts are routinely governed by the standard of the Restatement (Second) of Torts; *i.e.*, intent is present when the defendant either desired to bring about the harm suffered or knew that the harm was substantially certain to occur.[78] Plaintiffs repeatedly assert in the Complaint that Syngenta knew Plaintiffs had a reasonable expectancy of continued relationships with corn purchasers, and that by introducing Viptera into the interconnected marketplace, Syngenta intentionally caused a

---

1990), in which summary judgment was granted because plaintiff failed to produce any evidence regarding defendant's improper conduct. (*See* Syn. Br. at 112, n.146.)

[78] Restatement (Second) of Torts § 8A; *see also Stewart Title Guar. Co. v. Am. Abstract & Title Co.*, 363 Ark. 530, 547 (2005) (noting that the "tort of interference with contractual relations is similar to other intentional torts 'in the sense that the defendant must have either desired to bring about the harm to the plaintiff or have known that this result was substantially certain to be produced by his conduct'") (citation omitted); *Drake v. Dickey*, 2 N.E.3d 30, 39 (Ind. App. 2013) (finding that in the tortious interference context, "intent may be demonstrated by showing either that [defendant] specifically intended to interfere . . . or that it acted for another purpose but knew that the interference was certain or substantially certain to occur"); *Carnes v. St. Paul Union Stockyards Co.*, 205 N.W. 630, 632 (Minn. 1925) (finding malice non-essential in tortious interference context); *Bell v. May Dep't Stores Co.*, 6 S.W.3d 871, 879 (Mo. 1999) (finding that defendant had requisite intent to substantiate tortious interference claim "if it knew interference was certain or substantially certain to occur as a result of its actions, even if its express purpose was not to interfere"); *Peterson v. Zerr*, 477 N.W.2d 230, 234 (N.D. 1991) (asserting that the standard for intent in interference cases does not encompass only situations in which the defendant has "acted with this purpose or desire," but also when "the actor does not act for the purpose of interfering with the contract or desire it but knows that the interference is certain or substantially certain to occur as a result of his action"); *Parret v. UNICCO Serv. Co.*, 127 P.3d 572, 577 (Okla. 2005) (applying the "substantially certain" standard in the context of tortious interference).

disruption[79] of that expectancy without justification or privilege. Judge Lungstrum concluded in the MDL Order that:

> [o]ne could reasonably infer from the facts alleged in the complaints that defendants knew that Viptera had not been approved in a key export market, that contamination of plaintiffs' corn would occur after commercialization of Viptera without certain safeguards, and thus that interference with plaintiffs' sales would be substantially certain to occur.

(MDL Order at 73.) There is no reason to reach a different conclusion here.

Syngenta's assertions regarding the relative scope of the Chinese market in the global market are of no legal moment. Especially at the pleading stage, it is irrelevant whether China accounted for one-third of one percent, five percent, or thirty-five percent of the corn market—other than for purposes of establishing damages at the proof stage of this litigation. If Syngenta was substantially certain that their conduct could have a negative effect on the corn market, the resultant relationships and expectancies producers had with corn purchasers, or both, and engaged in interferential conduct armed with that knowledge, then their actions were sufficiently intentional to substantiate a claim for tortious interference. At a minimum, Plaintiffs have made sufficient allegations regarding Syngenta's intent, and Plaintiffs' claims for tortious interference should not be dismissed.

VIII. Plaintiffs have adequately pled their consumer-protection claims.

A. Minnesota Statutes sections 325D.13, 325D.44, and 325F.69 apply.

Plaintiffs assert violations of Minnesota's Unfair Trade Practices Act (MUTPA), Minn. Stat. § 325D.13, and Minnesota's Consumer Fraud Act (MCFA), Minn. Stat. § 325F.69. Class Plaintiffs additionally assert a claim under Minnesota's Deceptive Trade Practices Act

---

[79] Syngenta attempts to insert the purported requirement that interference is only cognizable when business expectancy is prevented. That assertion fails.

(MDTPA), Minn. Stat. § 325D.44. Minnesota has established a private remedy for violations of MUTPA and MCFA under its private attorneys-general statute. Minn. Stat. § 8.31. The MDTPA contains its own private enforcement mechanism. Minn. Stat. § 325D.45.

B. This Court may constitutionally hear Non-Class Plaintiffs' MUTPA and MCFA claims against Syngenta.

Syngenta argues that it is inappropriate for this Court to allow non-Minnesotans to assert Minnesota statutory claims. This position is incorrect for two reasons, and recent decisions bolster Plaintiffs' position that the MUTPA and MCFA should apply extraterritorially. First, recent decisions suggest a choice of law analysis is unnecessary. Second, Minnesota law has a policy of openness and access.

First, the conflict of law analysis is unnecessary. Syngenta claims that to determine whether this Court can apply the MUTPA and MCFA, it must determine if application of Minnesota law to non-Minnesotans is constitutionally permissible, as well as undergo a choice-of-law analysis. (Syn. Br. at 118-19.) Syngenta points to the MDL order, as the only court to address the issue of whether a non-Minnesotan may assert Minnesota statutory claims. (*Id.* at 119.) As Syngenta notes, the MDL Court held that the MUTPA and MCFA could not be applied extraterritorially. At the same time, however, a federal court in the District of Minnesota was considering the same issue. *In re Target Corp. Customer Data Sec. Breach Litig.*, citing pg. 18, 2015 WL 5432115. *In re Target* confronted statutory claims under Minn. Stat. § 325E.64. *Target* held: "To apply Minnesota law to a non-resident plaintiff's claims, the Constitution requires that Minnesota 'have a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair.'" 2015 WL 5432115, at *3 (quoting *Hague*, 449 U.S. at 312-13).

Target, however, unlike the MDL Court, did not see the need for choice-of-law analysis: "[T]he Court may presume there are substantive conflicts between the laws of Plaintiffs' home states and Minnesota law and still constitutionally apply Minnesota law." *Id.* This is not a novel legal theory. In *Mooney*, the Court stated plainly: "As a Minnesota corporation, Allianz can not [sic] claim surprise by the application of Minnesota law to conduct emanating from Minnesota, since Minnesota has a 'substantial interest in preventing the corporate form from becoming a shield for unfair business dealing.'" 244 F.R.D. at 535 (quoting *CTS Corp. v. Dynamics Corp. of Am.*, 481 U.S. 69, 93 (1987)).

Minnesota plays a crucial role in the present litigation. One of the six Syngenta entities identified in the Non-Class Complaint, Syngenta Seeds, is headquartered in Minnesota. (NCC ¶ 9.) Among the products that Syngenta markets and sells are the Viptera and Duracade varieties of corn seed at issue in this litigation. (*Id.*) Minnesota was the site of field tests for Viptera. (NCC ¶ 52.) As such, application of Minnesota law to Syngenta is fair and constitutionally permissible.

Syngenta attempts to argue around the significant contacts it has with Minnesota, by arguing that it has significant contacts with other jurisdictions as well. (Syn. Br. at 120-21 (noting corporate activity in Delaware and North Carolina).) "However, the Due Process Clause and Full Faith and Credit Clause are satisfied as long as Minnesota has significant contacts with an out-of-state class member's claims." *Mooney*, 244 F.R.D. at 535. Additionally, the question of constitutionally permissible application is not zero sum; multiple jurisdictions may be able to exercise jurisdiction without offending the U.S. Constitution. *Phillips Petroleum Co. v. Shutts*, 472 U.S. 797, 818 (1985) ("[A] particular set of facts giving rise to litigation could justify, constitutionally, the application of more than one jurisdiction's laws."). Moreover, the

expectations of the parties are a central feature of determining fairness and constitutionality. *Id.* at 822 ("When considering fairness in this context, an important element is the expectation of the parties."). Syngenta has chosen Minnesota as the corporate headquarters for its Seed business and used Minnesota farms and lands as sites of field tests; it would be fundamentally unfair to Plaintiffs to foreclose the application of Minnesota law to Syngenta under these facts, particularly at the motion-to-dismiss stage.[80] (NCC ¶¶ 9, 52.)

Finally, in rejecting the application of Minnesota statutes, the MDL Order relied on *St. Jude*, and its criticism of two cases cited by the MDL Plaintiffs: *In re Lutheran Bhd. Variable Ins. Products Co. Sales Practices Litig.*, 201 F.R.D. 456, 461 (D. Minn. 2001) and *Group Health Plan, Inc. v. Philip Morris, Inc.*, 621 N.W.2d 2 (Minn. 2001). *In re St. Jude* criticized these cases because they failed to conduct a search analysis of the constitutionality of applying Minnesota law to out-of-state plaintiffs, but indicated, that were such an analysis conducted it may well be proper to apply Minnesota law extraterritorially. *In re St. Jude Med., Inc.*, 425 F.3d 1116, 1120 (8th Cir. 2005) ("Application of Minnesota law to all plaintiffs' claims ultimately may be proper."). Moreover, the MUTPA does not define person in terms of citizenship, and so there is no question that Plaintiffs can assert claims under these statutes, so long as the application of Minnesota law is constitutionally permissible. *See* Minn. Stat. § 325D.10 (defining person to "include[] any individual, firm, partnership, corporation or other organization, whether organized for profit or not")

Second, Minnesota courts have a policy of openness and access to residents and non-residents alike. Minnesota courts may express a reluctance to apply their statutes

---

[80] To the extent the Court believes a choice-of-law analysis is necessary, Plaintiffs have shown that Minnesota law should apply.

extraterritorially, as argued by Syngenta, however, they also are open to both residents and non-residents who file permissible claims. *Compare Olson v. Push, Inc.*, No. CIV. 14-1163 (ADM/JJK), 2014 WL 4097040, at *2 (D. Minn. Aug. 19, 2014) (noting presumption against extraterritorial application), *with Schwartz v. Consol. Freightways Corp. of Delaware*, 221 N.W.2d 665, 669 (Minn. 1974) ("Suffice it to say that the courts of this state are open to those residents and nonresidents alike who properly invoke, within constitutional limitations, the jurisdiction of these courts."). The language in the statutes at issue reinforces this openness, as the private attorneys-general statute empowers "any person injured by a violation of any of the laws" to bring an action.

C. Syngenta cannot escape liability by mislabeling Plaintiffs as merchants.

Syngenta argues that Minnesota law has a prohibition against 'merchants' asserting MUTPA and MCFA claims, however, this overstates the nature of the law in Minnesota—as the MDL also recognized. *See Securian Fin. Grp., Inc. v. Wells Fargo Bank, N.A.*, No. CIV. 11-2957 (DWF/HB), 2014 WL 6911100, at *6 (D. Minn. Dec. 8, 2014) ("Plaintiffs assert that the controlling Minnesota Supreme Court case on this issue, *Church of the Nativity of Our Lord v. Watpro*, 491 N.W.2d 1 (Minn. 1991), does not include any prohibition against "merchants" for consumer fraud claims. The Court agrees."); *Pugh v. Westreich*, No. A04-657, 2005 WL 14922, at *3 (Minn. App. Jan. 4, 2005) ("The MCFA is broadly construed to protect consumer rights.").

Given the lack of a strict prohibition, "courts focus their analysis on whether a party can be considered a sophisticated merchant in the specific skills or goods at issue, and only those parties that are in fact deemed to be sophisticated merchants in the specific skills or goods at issue have been precluded from asserting Minnesota consumer claims." *Securian*, 2014 WL 6911100, at *6. Further, "to be a sophisticated merchant, a party must have knowledge or skill particular to the practices involved in the transaction at issue." *Id.* (citing Minn. Stat. § 336.2-

104(1)). Syngenta relies on *Solvay Pharmaceutical, Inc. v. Global Pharmaceuticals*, which involved claims by one drug manufacturer against another. 298 F. Supp. 2d 880, 881-82 (D. Minn. 2004). Likewise, the other case relied on by Syngenta, *Pugh v. Westreich*, involved insurance companies all of which were "heavily involved in the practice of providing IMEs." No. A04-657, 2005 WL 14922, at *4 (Minn. App. Jan. 4, 2005).

Plaintiffs are not sophisticated parties as Minnesota law requires to invoke the merchant exception simply because they are in the corn industry. *See Ly v. Nystrom*, 615 N.W.2d 302, 310 (Minn. 2000) (holding Ly to be a consumer in purchase of restaurant even though he had worked in restaurant industry); *see also Regents of the Univ. of Minn. v. Chief Indus., Inc.*, 106 F.3d 1409, 1412 (8th Cir. 1997) ("To be sure, not all large, sophisticated purchasers are necessarily merchants in goods of the kind they buy.").

At the very least, any such finding would be improper at this stage in the litigation. As the MDL Court recognized, this argument is inappropriate at this stage of the litigation, and therefore the court denied Syngenta's motion to dismiss on this basis. (MDL Order at 97 (quoting *Securian*, 2014 WL 6911100, at *7 ("[A] fact question remained for trial concerning whether the plaintiffs were sophisticated merchants, even though they would 'undoubtedly have an uphill battle convincing a jury of their lack of sophistication.'")).)

D. Plaintiffs have sufficiently pled a public benefit.

Syngenta challenges Plaintiffs' MUTPA and MCFA allegations on the basis that they lack a public benefit, because Plaintiffs seek compensatory damages and attorneys' fees and China's approval of MIR162 moots any injunctive relief. (Syn. Br. at 123-24.) This, however, overstates the public-benefit requirement. *Select Comfort Corp. v. Tempur Sealy Int'l, Inc.*, 11 F. Supp. 3d 933, 937-38 (D. Minn. 2014) ("[A] public benefit typically will be found when the plaintiff seeks relief primarily aimed at altering the defendant's conduct").

This action will, as Plaintiffs allege, serve a public benefit. (CC ¶ 325; NCC ¶ 343.) "Minnesota courts have not definitively delineated what factors are necessary to establish a public benefit. However, generally, courts examine the degree to which the defendants' alleged misrepresentations affected the public; the form of the alleged misrepresentation; the kind of relief sought; and whether the alleged misrepresentations are ongoing." *Select Comfort*, 11 F. Supp. 3d at 937-38. All Plaintiffs have pled specific benefits that would accrue to the public under this action. (CC ¶ 325; NCC ¶ 343.) Plaintiffs have made numerous allegations as to the breadth and effect Syngenta's behavior had on the U.S. Corn Market, the DDGS market, and the impact that these types of premature commercialization have on consumers. (*See, e.g.*, CC ¶¶ 230, 240-54, 269-80; NCC ¶¶ 241, 251-65, 280-91.) Plaintiffs have easily met their burden under Minnesota's pleading standards that a public benefit will be served.

Finally, this action is the very type of action contemplated by the drafters of Minnesota's private attorneys-general statute. "The Private AG Statute thus advances the legislature's intent to prevent fraudulent representations and deceptive practices with regard to consumer products by offering an incentive for defrauded consumers to bring claims in lieu of the attorney general." *Ly*, 615 N.W.2d at 311. In fact, Syngenta's behavior with subsequent product launches proves that intervention is necessary and will benefit the public. (CC ¶¶ 196-229; NCC ¶¶ 207-40.)

Minnesota

Class Plaintiffs have pled violations of the MDTPA. (CC ¶¶ 300-27.) Syngenta argues that because Class Plaintiffs have not made a specific injunctive request of this Court their claims are subject to dismissal. To prevail on a MDTPA claim, "[p]laintiffs must advance record evidence sufficient to support an inference of future harm to Plaintiffs." *Gardner v. First Am. Title Ins. Co.*, 296 F. Supp. 2d 1011, 1020 (D. Minn. 2003). The Class Complaint makes

numerous allegations about the behavior of Syngenta with respect to the commercialization of Viptera that allow this Court, under Minnesota's pleading standards, to draw an inference of future harm. (CC ¶¶ 196-221.) In the wake of the Viptera/MIR162 debacle, Syngenta engaged in similarly disruptive behavior by marketing Duracade, which contained both MIR162 (still unapproved in China) and a new unapproved trait, Event 5307. (CC ¶¶ 196-221.) To the extent the Court believes a specific prayer for injunctive relief is required, Plaintiffs should be granted leave to amend the complaint.

Illinois

Syngenta argues that Plaintiffs lack standing under the Illinois Consumer Fraud and Deceptive Business Practices Act (ICFA). This argument—pressed and failed in the Federal MDL—asserts that Plaintiffs have failed to show a "consumer nexus" that shows how Syngenta's actions involve consumer protection concerns, and how the requested relief would benefit consumers. (Syn. Br. at 125 (citing *Thrasher-Lyon v. Illinois Farmers Ins. Co.*, 861 F. Supp. 2d 898, 912 (N.D. Ill. 2012)).) The ICFA allows actions by non-consumers where it meets the consumer nexus test. (MDL Order at 105.) The consumer nexus test requires that:

> plaintiffs must plead and otherwise prove (1) that their actions were akin to a consumer's actions to establish a link between them and consumers; (2) how defendant's representations . . . concerned consumers other than themselves; (3) how defendant's particular breach . . . involved consumer protection concerns; and (4) how the requested relief would serve the interests of consumers.

Brody v. Finch Univ. of Health Scis./The Chicago Med. Sch., 698 N.E.2d 257, 269 (Ill. 1998). The consumer nexus test is required only when the plaintiff is a non-consumer and the action at issue does not "involve trade practices addressed to the market generally." (*See* MDL Order at 105-06 (citing *Banks One Milwaukee v. Sanchez*, 783 N.E.2d 217, 220 (Ill. App. 2003)).) The MDL Court rejected these very arguments and held that "growers that purchased Syngenta's

seeds were consumers of Syngenta's product under the ICFA . . . and Plaintiffs have alleged conduct addressed to Syngenta's purchasers." (MDL Order at 108.)

Syngenta argues that Plaintiffs are not consumers under the ambit of the ICFA because they are not end-users of corn. Syngenta argues that the ICFA allows only for "the ultimate buyer of the finished product" to bring claims. (Syn. Br. at 125 (citing *Williams Elecs. Games, Inc. v. Garrity*, 366 F.3d 569, 579 (7th Cir. 2004)).) As the MDL Order revealed, Syngenta has attempted to redefine the market at issue. Syngenta's argument requires the Court to analyze the corn market, rather than the corn seed market. (*See* MDL Order at 107 (citing *AGFA Corp. v. Wagner Printing Co.*, No. 02 C 2400, 2002 WL 1559663, at *2 (N.D. Ill. July 10, 2002)).) Relying on *Sluis v. Nudelman*, the MDL Court determined the applicable market was seeds, as "a seed becomes something different in producing a plant." (MDL Order at 107 (citing *Sluis v. Nudelman*, 34 N.E.2d 391 (Ill. 1941)).)

Syngenta argues that the MDL Court's reliance on *Sluis* is misplaced because a subsequent case came to a different conclusion. (Syn. Br. at 126 (citing *People ex rel. Spiegel v. Lyons*, 115 N.E.2d 895, 897 (Ill. 1953)).) *Spiegel* was based on the same issue as *Sluis*: the taxability of the sale of seeds. *Spiegel* turns not on the question of whether seeds and produce are distinct, however, but on statutory interpretation. *Spiegel* noted that in the wake of *Sluis* the Illinois legislature passed a law to overturn the decision. *People ex rel. Spiegel v. Lyons*, 115 N.E.2d 895, 898 (Ill. 1953). The Department of Finance then promulgated rules to distinguish between seeds sold for personal consumption (taxable) and seeds sold for commercial production (non-taxable). *Id.* The MDL Court relied on the fact that seeds become a crop, and *Spiegel* does not rely on abrogating that line of thought, rather it simply defers to the executive branch on rules that have been promulgated pursuant to statute. 115 N.E.2d at 898; *see Am. Oil Co. v.*

Mahin, 273 N.E.2d 818, 823 (Ill. 1971) (discussing *Siegel* and noting "[t]he statute did not especially exempt the seeds, but the Department had for more than ten years promulgated the rule"). In the end, *Spiegel* represents the Department of Finance's preference for not taxing seeds sold to farmers and vendors re-selling seeds.

Moreover, Syngenta reads *Spiegel* too broadly, as the very language at issue in *Spiegel*, demonstrates the distinction drawn by the MDL Court—that seeds produce something new:

> Sellers of seeds-When not liable for tax. Persons who sell seeds to purchasers who employ such seeds in raising vegetables, crops or other plants for sale are selling seeds to purchasers for purposes of resale and are not required to remit Retailer's Occupation Tax measured by their gross receipts from such sales.

115 N.E.2d at 896. Thus, the rule makers recognized that seeds turn into crops.[81]

Syngenta also argues that "Plaintiffs' theory that Syngenta's conduct lowered the overall price of corn falls outside the scope of the ICFA because it means that the 'ultimate buyers' (*i.e.* consumers of corn) paid less for corn than they would have absent Syngenta's actions." (Syn. Br. at 125.) Syngenta offers no evidence to suggest that grocery store consumers were paying less for corn and corn food products due to the sharp price decline cause by Syngenta, nor would the Court be able to examine such evidence on a motion to dismiss.[82] Moreover, to make such a determination would require the court to *infer* that market prices on the Chicago Board of Trade

---

[81] Syngenta's own materials, as alleged in the Complaints, indicate that it distinguishes between seed and what it becomes. (CC ¶ 127 (citing to the stewardship agreement that "grain produced from seed" should be appropriately channeled.").)

[82] While not relevant to present inquiry, and beyond the scope of the pleadings, in point of fact, it is likely that consumers of corn and corn based food (continued on next page) products have not seen any change in prices. *See* Randy Schnepf, *Farm-to-Food Price Dynamics* 21 (Congressional Research Service Sept. 27, 2013), *available at* https://www.fas.org/sgp/crs/misc/R40621.pdf ("The general perception (supported by considerable empirical evidence) is that retail food prices are "sticky"—that is, retail prices follow commodity prices upwards rapidly, but fall back only slowly and partially when commodity prices recede.").

were tied to the price grocery store consumers paid for corn and corn products. Any inferences drawn based on the facts pled should be drawn in favor, not against Plaintiffs. *Bahr*, 788 N.W.2d at 80. As discussed above, the consumers in question are the buyers of corn seed, who the Non-Class Complaint alleges were harmed by the actions of Syngenta. (NCC ¶¶ 236, 283, 292, 299.)

Nebraska

Syngenta's sole argument for dismissal of Plaintiffs' Nebraska Consumer Protection Act claims is that Nebraska exempts from its statutory scheme "actions or transactions otherwise permitted, prohibited, or regulated under laws administered by the Director of Insurance, the Public Service Commission, the Federal Energy Regulatory Commission, or any other regulatory body or officer acting under statutory authority of this state or the United States." Neb. Rev. Stat. § 59-1617. Syngenta reads the statute too broadly, it is not enough that the actor—Syngenta—is subject to regulation; the very act complained of must be as well. *See Hage v. Gen. Serv. Bureau*, 306 F. Supp. 2d 883, 890 (D. Neb. 2003) ("However, particular conduct is not immunized from the operation of the Consumer Protection Act merely because the actor comes within the jurisdiction of some regulatory body, the immunity arises if the conduct itself is also regulated."); *Wrede v. Exch. Bank of Gibbon*, 247 Neb. 907, 915, 531 N.W.2d 523, 529 (1995) ("The teaching of *Kuntzelman* is that while particular conduct is not immunized from the operation of the Consumer Protection Act merely because the actor comes within the jurisdiction of some regulatory body, immunity does arise if the conduct itself is also regulated.").

Thus the mere fact that Viptera is subject to USDA approval is not sufficient ground for immunity under the Nebraska Consumer Protection Act. Here the complained of actions, *inter alia*, releasing the seed prior to Chinese approval and failing to implement and effectively run a stewardship program address the manner in which Viptera was marketed and sold, are outside

the purview of any Nebraska state or Federal regulatory body. (*See* Syn. Br. at 9 (noting stewardship programs are not mandatory and are promoted by non-governmental industry groups).) As such, Syngenta is subject to the Nebraska Consumer Protection Act, and cannot claim immunity from it based on regulatory requirements not germane to the complained of action. The MDL Court likewise denied Syngenta's motions to dismiss on these grounds, noting that it could not "say as a matter of law that the specific manner in which Syngenta sold its products, as alleged here, was regulated by the agencies that authorized those products sale." (MDL Order at 110.)

North Carolina

Syngenta argues that Plaintiffs' claims under the North Carolina Unfair and Deceptive Trade Practices Act (NCUTPA), N.C. Gen. Stat. § 75-1.1, are barred because Syngenta and Plaintiffs are neither in competition nor in privity. This argument is unpersuasive, and for the same reasons the MDL Court rejected it, so too must this Court. (MDL Order at 111.) Syngenta relies on *Food Lion, Inc. v. Capital Cities/ABC, Inc.*, for the contention that the NCUTPA is limited in business to business cases to those where the two businesses are competitors or engaged in commercial dealings. 194 F.3d 505, 519-22 (4th Cir. 1999). The MDL Court noted that the cases *Food Lion* cites to draw those boundaries, are actually examples of cases where North Carolina courts expanded the reach of the NCUTPA, not restricted it. (MDL Order at 111, n.19.)

Syngenta argues this is a misreading of the law and cites to a recent case, once again, citing three ways a business may bring an NCUPTA claim. *Exclaim Mktg., LLC v. DirecTV, LLC*, No. 5:11-CV-684-FL, 2015 WL 5773586, at *5 (E.D.N.C. Sept. 30, 2015) (noting that claims are available where "1) the plaintiff-business is in the marketplace acting as a consumer

or is otherwise engaged in commercial dealing with defendant . . . [2]) the businesses are competitors, . . . or 3) the conduct giving rise to the cause of action has a negative effect on the consuming public" (citations omitted)). While *Exclaim* states that these are the only causes of action afforded to business to business transactions, it does not address the analysis of the MDL Court that these mechanisms were all, at the time the cases creating them were decided, expansions of the NCUTPA. Moreover, North Carolina law places the burden of proof on the party seeking exemption from NCUPTA. N.C. Gen. Stat. § 75-1.1.

Even if Syngenta's reading is correct that this is an exhaustive list of the manners in which Plaintiffs may bring a claim, Plaintiffs have met such definitions.[83] Plaintiffs have alleged that they were in the corn seed market place acting as consumers when they bought non-MIR162 seeds to grow corn, even if they did not directly engage Syngenta. (NCC ¶¶ 5-8.) North Carolina does not require that the two parties be in privity in order to maintain an action. *J.M. Westall & Co. v. Windswept View of Asheville, Inc.*, 387 S.E.2d 67, 69 (N.C. App. 1990). Additionally, it is clear that the third category applies, because Plaintiffs have alleged a widespread negative effect on the consuming public. (NCC ¶¶ 236, 283, 292, 299.)

Again, Syngenta argues, without providing any evidence, that the "ultimate buyers" of corn experienced lower prices, not higher, of corn, and as such there was no harm to consumers. As noted above, in the Illinois Consumer Protection section, such a determination would require the court to *infer* that market prices on the Chicago Board of Trade were tied to the price grocery store consumers paid for corn and corn products. Any such inference is not allowed under Minnesota law. *See, e.g., Bahr*, 788 N.W.2d at 80. Additionally, Syngenta does not articulate why Plaintiffs cannot bring this action as consumers in the corn seed market. *See* N.C. Gen. Stat.

---

[83] Plaintiffs do not claim that they compete with Syngenta.

§ 75-16 (allowing "any person [who] shall be injured" by violations of the NCUTPA to bring actions).

Finally, Syngenta argues that Plaintiffs have failed to plead reliance, and as such the claim is fatally flawed. Under the NCUTPA an act falls under its purview, where the acts in question "offend public policy and that are immoral, unethical, or substantially injurious to consumers, as well as acts that possess the tendency or capacity to mislead." *Old S. Home Co. v. Keystone Realty Grp., Inc.*, 233 F. Supp. 2d 734, 736 (M.D. N.C. 2002). "To establish a prima facie claim for unfair trade practices under the NCUTPA, a plaintiff must establish: (1) that the defendants committed an unfair or deceptive act or practice; (2) in or affecting commerce; and (3) that the plaintiff was injured thereby." *Id.*

The MDL Court relied on *Tucker v. Boulevard at Piper Glen LLC*, in dismissing Plaintiffs' North Carolina Unfair and Deceptive Trade Practices Act claims. (*See* MDL Order at 114-15 (citing 564 S.E.2d 248, 251 (N.C. App. 2002)).) *Tucker* held: "Where an unfair or deceptive practice claim is based upon an alleged misrepresentation by the defendant, the plaintiff must show 'actual reliance' on the alleged misrepresentation in order to establish that the alleged misrepresentation 'proximately caused' the injury of which plaintiff complains." *Id.* (quoting *Promenade v. Lechmere, Inc.*, 464 S.E.2d 47, 58 (N.C. App. 1995)). Plaintiffs' claims are based on more than misrepresentation. They include Syngenta's failure to administer an effective stewardship program, prematurely releasing Viptera, and failure to warn of potential risks. (NCC ¶ 1430.) These acts "offend public policy and [ ] are immoral, unethical, or substantially injurious to consumers." *Keystone*, 233 F. Supp. 2d at 736. To that end, under NCUTPA, Plaintiffs have adequately pled the requirements to state a claim.

North Dakota

Syngenta argues that Plaintiffs' North Dakota deceptive trade practices claim under N.D. Cent. Code § 51-15-02 should be dismissed because none of the alleged conduct was made in connection with the sale of MIR162. (Syn. Br. at 128-29.) Syngenta argues that because the complained of conduct was not made in connection with the sale of MIR163, it is beyond the reach of North Dakota's statutory scheme. This reads Plaintiffs' allegations too narrowly.

The misrepresentations that Plaintiffs allege were made in connection with the sale of MIR162. First, Plaintiffs allege that Syngenta used its website to make false and misleading statements. (NCC ¶ 38-44.) Second, Plaintiffs allege that Syngenta promulgated a "Plant with Confidence Fact Sheet" which was directed at encouraging farmers to plant Viptera. (NCC ¶ 190.) These are clearly marketing tools used to make sales of its product. *See DJ Coleman, Inc. v. Nufarm Americas, Inc*., 693 F. Supp. 2d 1055, 1077 (D. N.D. 2010) (finding that "The evidence clearly establishes that Nufarm advertised on its website that Assert® is safe for use on sunflowers in North Dakota" and those statements were found to be made in connection with the sale of Assert). Indeed the "Plant with Confidence" sheet cited in the complaint (NCC ¶ 190), is forward looking, encourages farmers to plant Viptera in order to increase yields, and is the very type of communication that falls under N.D. Cent. Code § 51-15-02.[84] (*See* MDL Order at 116 (denying dismissal of Plaintiffs' claims because the Fact Sheet "could plausibly be considered advertising intend to induce future sales of the same product").)

---

[84] "Given current commodity prices, it is critical that corn growers get the most out of their hybrids. Corn hybrids with the Agrisure Viptera trait offer in-seed defense against a collection of lepidopteran corn pests that costs U.S. corn growers 238 million bushels of corn and more than $1.65 billion in annual yield and grain quality losses." While the Fact Sheet is outside the pleadings, in Minnesota, a court is permitted to consider documents embraced by the complaint, which surely includes the Fact Sheet. *See, e.g., Ellis v. Hanson*, No. A11-101, 2011 WL 5829104, at *2 (Minn. App. Nov. 21, 2011).

Syngenta argues that the Fact Sheet is an update to growers who have already purchased Viptera. (Syn. Br. at 129 n.156.) As noted by the MDL Court, the document is plausibly directed at future sales, and indeed, under Minnesota pleading standards the Court must draw the reasonable inference that this is a communication made in connection with the sale or advertisement of Viptera. *See Walsh*, 851 N.W.2d at 603; *Bahr*, 788 N.W.2d at 80.

South Dakota

South Dakota's Deceptive trade Practices and Consumer Protection laws (SDCPA) make it illegal for "any person to (1) Knowingly act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise, regardless of whether any person has in fact been misled, deceived, or damaged thereby." S.D. Codified Laws § 37-24-6.

Syngenta, relying on *Nygaard v. Sioux Valley Hospitals & Health Systems*, argues that Plaintiffs' SDCPA claims must be dismissed because they fail to plead "reliance." (Syn. Br. at 129.) *Nygaard* does not require that a Plaintiff plead "reliance" but merely holds that "to state a claim under SDCL 37-24-31, [Plaintiffs] must have pleaded that their economic damages were proximately caused by one or more of the three alleged violations of the Act." 731 N.W.2d 184, 198 (S.D. 2007), *see also Rodriguez v. Siouxland Urology Assocs. P.C.*, No. CIV. 09-4051 (KES), 2013 WL 684243, at *5 (D. S.D. Feb. 22, 2013) ("Rodriguez must show that his damages "were proximately caused by" the alleged violations of the Consumer Protection Act." (quoting *Nygaard*)); *Rainbow Play Sys., Inc. v. Backyard Adventure, Inc.*, No. CIV.06-4166, 2009 WL 3150984, at *7 (D.S.D. Sept. 28, 2009) ("in a civil action a claim for damages pursuant to the South Dakota Deceptive Trade Practices Act [] specifically requires a causal connection between

the alleged deceptive practice and the damages suffered by a plaintiff"); *Sisney v. Best Inc*., 754 N.W.2d 804, 811 (S.D. 2008) ("Therefore, to state a claim under SDCL 37-24-31 and 37-24-6, Sisney must have pleaded that he was adversely affected as a *result of* a deceptive practice used by the Defendants in connection with their sale or advertising of the bread.").

Nygaard required a showing of reliance to prove causation: "In this case, Patients have only pleaded subjective characterizations of belief and legal conclusions of proximate cause that are untethered to any factual predicate that could constitute causation." *Nygaard*, 731 N.W.2d at 198. The present case is distinguishable in the breadth and depth of the allegations pled that show the statements made by Syngenta are directly tied to the damages suffered. (NCC ¶¶ 132, 161, 167, 188-92.) The Non-Class Complaint adequately alleges the causal mechanism between the false statements made and the harm done to the US market.

Texas

The Texas Deceptive Trade Practices-Consumer Protection Act (TDTPA), Tex. Bus. & Com. Code § 17.41, requires that Plaintiffs be consumers, that Syngenta acted in a manner that was false, deceptive or misleading, and that the act described caused the damage to the Texas Plaintiffs. *See Sparks v. Booth*, 232 S.W.3d 853, 864 (Tex. App. 2007) (citing *Doe v. Boys Clubs of Greater Dallas, Inc.*, 907 S.W.2d 472, 478 (Tex. 1995)). "To be a consumer, the plaintiff must have sought or acquired goods or services by purchase or lease, and those goods or services must form the basis of the complaint." *Ortiz v. Collins*, 203 S.W.3d 414, 424 (Tex. App. 2006).

Syngenta's primary argument for dismissal of the TDTPA claims is that the Non-Class Complaint fails to allege proper facts to establish that the Plaintiffs are 'consumers' under the TDTPA. Syngenta, mistakenly, claims that because the Non-Class Complaint does not allege

that Plaintiffs purchased Viptera these claims fail.[85] It is well established that Texas does not require that the plaintiff and defendant be in privity in order for the plaintiff to qualify as a consumer. *See, e.g.*, *Amstadt v. U.S. Brass Corp.*, 919 S.W.2d 644, 649 (Tex. 1996); *Home Sav. Ass'n v. Guerra*, 733 S.W.2d 134, 136 (Tex. 1987); *Kennedy v. Sale*, 689 S.W.2d 890, 892-93 (Tex. 1985); *Flenniken v. Longview Bank & Trust Co.*, 661 S.W.2d 705, 707 (Tex. 1983); *Cameron v. Terrell & Garrett, Inc.*, 618 S.W.2d 535, 540-41 (Tex. 1981); *Sparks v. Booth*, 232 S.W.3d 853, 864-65 (Tex. App. 2007). Rather all that is required is that "the plaintiff must show the defendant's deceptive conduct occurred in connection with a consumer transaction." *Sparks*, 232 S.W.3d at 864-65 (citing *Ortiz*, 203 S.W.3d at 424). Plaintiffs have amply alleged that they are consumers under the TDTPA. Plaintiffs bought goods—corn seeds—and those goods form the basis of the complained of injurious actions of Syngenta.

Syngenta's second line of attack, similar to its arguments against other state consumer protection claims, is that Texas requires reliance in order to prevail. "To establish the producing cause element, the plaintiff must show the defendant's action was a substantial factor in bringing about the plaintiff's injury, without which the injury would not have occurred." *Sparks*, 232 S.W.3d at 865 (citing *Doe v. Boys Clubs of Greater Dallas, Inc.*, 907 S.W.2d 472, 479 (Tex. 1995)). Again Plaintiffs' Complaint includes multiple factual allegations that Syngenta's unfair and misleading practices were false, misleading, and intended to reach Plaintiffs and other similarly situated farmers. (NCC ¶¶ 132, 161, 167, 188-92.); *see also In re Porsche Cars N. Am., Inc.*, 880 F. Supp. 2d 801, 877 (S.D. Ohio 2012) (analyzing requirements of TDTPA); *Church &*

[85] While the Class Complaint defines its class to exclude farmers who grew Viptera (CC ¶ 286), the Non-Class Complaint does not include a prohibition on claims by producers who purchased and grew Viptera. To the extent that the Court finds Syngenta's strained reading of Texas case law persuasive, this claim should survive for those individual farmers who in fact purchased Viptera.

Dwight Co. v. Huey, 961 S.W.2d 560, 565 (Tex. App. 1997) (finding the causation requirement met where marketing efforts and materials formed basis of complaint).

CONCLUSION

The Court should deny Syngenta's motion to dismiss. The motion is based largely on cases decided at a different procedural stage, and is dependent on this Court expanding the economic-loss doctrine beyond its bounds. Judge Lungstrum correctly allowed the Kansas plaintiffs to proceed with fact discovery. This Court should, too.

PLAINTIFFS' EXECUTIVE COMMITTEE

1508976.docx

EXHIBIT 60

** CONFIDENTIAL **

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:

Daniel Mensik (Orig. Case No. 27-CV-15-16826)

FILE NO. 27-CV-15-3785

ORDER REGARDING SUMMARY JUDGMENT MOTIONS

The above-entitled matter came on for hearing before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Defendants' motion for summary judgment and Plaintiff's motion for partial summary judgment.

Lewis A. Remele, Jr., Esq., appeared on behalf of Plaintiff Daniel Mensik.

Patrick F. Philbin, Esq., appeared on behalf of Defendants.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Defendants' motion for summary judgment is granted in part and denied in part. Defendants' motion is granted with respect to strict liability for failure to warn and any claims for damages other than a lower market price for corn and any such claims are dismissed with prejudice. The motion is otherwise denied.

2. Plaintiff's motion for partial summary judgment is granted in part and denied in part. Plaintiff's motion is granted with respect to the defenses of the disclaimer and limitation of warranties in the Stewardship Agreement, contractual economic loss doctrine, contributory

negligence, allocation of fault, superseding cause, assumption of the risk, and unjust enrichment. The motion is otherwise denied.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: 4-11-2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

Plaintiffs in this consolidated action assert claims relating to Defendants' (collectively "Syngenta") commercialization of genetically modified ("GM") corn seed products known as Agrisure Viptera ("Viptera") and Agrisure Duracade ("Duracade"). Viptera contains the GM trait called MIR162 and Duracade includes Event 5307. After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized Viptera prior to receiving regulatory approval of MIR162 for import from China. In November 2013, China began to enforce its zero tolerance policy regarding corn containing the non-approved GM trait in Viptera and rejected all shipments of U.S. corn. Plaintiffs are Producers and Non-Producers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that Plaintiffs were harmed by that market effect.

In an Order dated April 7, 2016, the Court granted in part and denied in part Syngenta's motion to dismiss finding Plaintiffs stated a legally cognizable claim for relief. The Court determined that Syngenta had a duty to use reasonable care in the timing, scope, and manner in the commercialization of Viptera and Duracade. This duty arises out of an inter-connected industry and market. In the Second Amended Master Complaint for Producers and Non-Producers (Non-Class) ("Master Complaint"), Plaintiffs assert claims for negligence, violations of consumer protections statutes, and strict liability duty to warn.

This matter consists of the consolidated individual claims of approximately 50,000 Producers and Non-Producers and a class of Minnesota farmers as certified by Order dated November 3, 2016. Of the group of individual claims, Plaintiff Daniel Mensik ("Plaintiff" or "Mensik") is the first bellwether case set for trial and this Order applies only to his case. Mensik is a corn producer who lives in Morse Bluff, Nebraska. His farm is located in Saunders County, Nebraska. He began farming full-time in the mid-1980's as an employee of Otte Enterprises. In 2013, Mensik began his own farming operation. In 2013, 2014, and 2015, Mensik purchased Viptera seed and planted, grew, harvested, and sold corn grown from Viptera seed. Each year he increased the number of bags of Viptera seed he purchased and grew from 16 bags in 2013 to 26 bags in 2015. In 2014, Mensik purchased Duracade seed and planted, grew, and harvested corn grown from Duracade seed. Mensik also purchased, planted, grew, harvested, and sold corn grown from seed from other manufacturers from 2013 to the present.

Mensik testified that he was unaware which foreign markets had approved corn grown from Viptera or Duracade for import. According to Mensik, he did not discuss with his Syngenta seed representatives which foreign markets had approved corn grown from Viptera for import and did not discuss any restrictions on the planting or grain-channeling procedures for his Viptera corn. From 2013 to the present, Mensik has not harvested his corn grown from Viptera separately from the non-Viptera corn that he grew. None of the parties that bought Mensik's corn asked him if he was delivering Viptera or any other types of corn. After Mensik delivered his harvested corn, he was unaware of what the buyer did with the corn. Mensik did not take any affirmative steps from 2013 to 2015 to sell any of his corn to the Chinese export market.

II. Legal Analysis

Mensik moves the Court for partial summary judgment on several of Syngenta's defenses and Syngenta moves the Court for summary judgment on all of Mensik's claims.[1] A party is entitled to summary judgment if there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. Minn. R. Civ. P. 56.03. An issue of fact is genuine if it can only be resolved by a finder of fact because it may reasonably be resolved in favor of either party. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 248 (1986). A material fact "is one of such a nature as will affect the result or outcome of the case depending on its resolution." *Zappa v. Fahey*, 245 N.W.2d 258, 259-60 (Minn. 1976). The Court must view all evidence in a light most favorable to the nonmoving party, and must resolve all factual inferences against the moving party. *Nord v. Herreid*, 305 N.W.2d 337, 339 (1981).

The moving party has the burden to show that no genuine issue of material fact exists and that it is entitled to judgment as a matter of law. *Thiele v. Stich*, 425 N.W.2d 580, 583 (Minn. 1988); *O'Malley v. Ulland Bros.*, 549 N.W.2d 889, 897 (Minn. 1996). No genuine issue of material fact exists if the record as a whole "could not lead a rational trier of fact to find for the non-moving party." *DLH, Inc. v. Russ,* 566 N.W.2d 60, 69 (Minn. 1997) (quoting *Matsushita Elec. Indus. Co., Ltd. V. Zenith Radio Corp.*, 475 U.S. 574, 587 (1986)). A defendant is entitled to summary judgment as a matter of law when the record reflects a complete lack of proof on an essential element of the plaintiff's claim. *See Nicollet Restoration, Inc. v. City of St. Paul,* 533 N.W.2d 845, 847-48 (Minn. 1995) (citing *Celotex Corp. v. Catrett,* 477 U.S. 317, 322, 325, 106 S.Ct. 2548, 2553-54, 91 L.Ed.2d 265 (1986)).

[1] The parties submitted comprehensive and voluminous undisputed and disputed fact sections for both motions. The Court reviewed all of the materials submitted. Although judgment will not be rendered upon the whole case, the Court finds that specifying the undisputed facts is not practicable. *See* Minn. R. Civ. P. 56.04.

The non-moving party must "present specific admissible facts showing a material fact issue." *Doe v. Archdiocese of St. Paul*, 817 N.W.2d 150, 163 (Minn. 2012). There is no genuine issue of material fact for trial when the evidence is not sufficiently probative with respect to an essential element of the nonmoving party's case to permit reasonable persons to draw different conclusions." *DLH, Inc. v. Russ,* 566 N.W.2d 60, 71 (Minn. 1997). The non-movant "may not establish genuine issues of material fact by relying upon unverified and conclusory allegations, or postulated evidence that might be developed at trial, or metaphysical doubt about the facts." *Dyrdal v. Golden Nuggets, Inc.*, 689 N.W.2d 779, 783 (Minn. 2004). "Speculation, general assertions, and promises to produce evidence at trial are not sufficient to create a genuine issue of material fact for trial." *Nicollet Restoration, Inc. v. City of St. Paul*, 533 N.W.2d 845, 848 (Minn. 1995).

A. Contractual Economic Loss Doctrine

Syngenta argues Mensik's claims are barred by the contractual economic loss doctrine ("ELD").[2] Mensik cross moves the Court for an order holding that Syngenta's Fifteenth Defense fails as a matter of law. The ELD is a "judicially created doctrine that sets forth the circumstances under which a tort action is prohibited if the only damages suffered are economic losses." *Lesiak v. Cent. Valley Ag Co-op, Inc.*, 808 N.W.2d 67, 80 (Neb. 2012) (quotation marks omitted). The doctrine is designed to "maintain the line of demarcation between tort law and contract law" and reflects the view that "if a party could simply avoid its contractual bargain by suing in tort, which often offers more generous terms of recovery, then the effectiveness of contract law would be reduced." *Id.* at 81. The doctrine "should not be interpreted so broadly as to undermine tort law and preclude tort remedies in situations which, historically, have presented viable tort cases." *Id.* at 81-82. The *Lesiak* court stated:

[2] The Court did not analyze contractual ELD with respect to individual producers in the April 7, 2016 Order on Syngenta's motion to dismiss.

> After reviewing our own case law, the case law from other jurisdictions, and the scholarly work done on the subject, we hold that the economic loss doctrine precludes tort remedies only where the damages caused were limited to economic losses and where either (1) a defective product caused the damage or (2) the duty which was allegedly breached arose solely from the contractual relationship between the parties. And economic losses are defined as commercial losses, unaccompanied by personal injury or other property damage.

Id. at 81. The Nebraska Court of Appeals subsequently explained the *Lesiak* court "clarified the [ELD] in Nebraska, however, limiting its application to the products liability context and to situations where the alleged breach is only of a contractual duty, and no independent tort duty exists." *Thurston v. Nelson*, 21 Neb. App. 740, 753 (Neb. Ct. App. 2014).

Plaintiff does not claim that Viptera or Duracade were defective. Although Mensik purchased Viptera and Duracade seed from Syngenta, none of claims are based on contractual duties arising from the sale of the seed products. Plaintiff's negligence claim is based on an independent tort duty; the duty to exercise reasonable care in the timing, manner, and scope of the commercialization of Viptera and Duracade. This case is not a products liability action and does not allege a breach of only a contractual duty. Syngenta's motion for summary judgment of all claims based on application of the contractual ELD is denied and Plaintiff's motion to dismiss Syngenta's Fifteenth Defense is granted.

B. Physical Injury

Syngenta moves the Court for summary judgment on any theory of liability or claim for damages based on physical injury. Beginning in 2013, Mensik planted and grew a mix of corn seeds, including Viptera and non-Syngenta seeds. Mensik testified that he planted, harvested, and stored his non-Viptera/Duracade corn with his Vipetra/Duracade corn. Plaintiff has affirmed that he does not claim that Viptera or Duracade were defective. Syngenta argues that: 1) Mensik has no evidence of damages from the alleged harm; 2) no evidence of the alleged harm; 3) Mensik's theory

of injury does not depend on physical harm; and 4) even if there is proof of cross-pollination or commingling, there is no evidence that Viptera and Duracade cause physical damage.

Syngenta argues Plaintiff cannot prove commingling or contamination because none of the non-Viptera/Duracade corn grown by Mensik was ever tested for the presence of Viptera or Duracade. Mensik testified that it nearly impossible to prevent cross-pollination. Dirk Maier ("Maier") opined that there will be commingling of corn seeds planted in a given row if seed tanks used while planting are not completely emptied or there is corn seed left in the hoppers between planting different corn brands varieties. He stated that combines are not typically cleaned between the harvests of different corn varieties, which leads to commingling. A reasonable juror could find physical harm to the non-Viptera/Duracade corn based on the testimony of Mensik and Maier. Viewing the evidence in the light most favorable to Mensik, and giving him the benefit of all reasonable inferences from the evidence, there is a genuine issue of material fact whether non-Viptera/Duracade corn mixed with or came into contact with Viptera or Duracade corn on Mensik's property and caused physical damage.

Plaintiff alleges his crops were damaged by Viptera and Duracade through cross-pollination and commingling, rendering it unfit for sale in China. Contamination of a farmer's corn supply, through cross-pollination or by commingling in storage and shipping, can constitute a physical injury. *In re StarLink Corn Prod. Liab. Litig.*, 212 F. Supp. 2d 828, 842-43 (N.D. Ill. 2002). A GM crop can damage a non-GM crop when pollen causes the non-GM crop to develop the GM trait and renders the crop unfit for its intended use. *Id.* at 841. Non-GM corn can also be damaged when it is commingled with GM corn. *Id.* Syngenta's attempt to limit *StarLink* to crops where contamination renders the crops unfit for human consumption is rejected. A broader reading finding that the contamination renders the crop unfit for its intended use addresses other types of crops and uses. In

this case, the intended use was unrestricted sale as a commodity corn crop. Plaintiff has presented sufficient evidence that contact with Viptera and Duracade corn rendered all of his corn unfit for sale to all markets.

Furthermore, Plaintiff's claims for damages for physical harm does not fail for lack of damages. The Court is not persuaded by Syngenta's argument that because Mensik's theory of injury is not dependent on harm to his property that the Court should declare no physical harm occurred. Syngenta cites to no case law that requires such action.

> Where a growing crop is injured but not rendered entirely worthless, the damage to it may be measured by the difference between the value at maturity of the probable crop, if there had been no injury, and the value of the actual crop, less the expense of fitting for market that portion of the probable crop which was prevented from maturing by the injury.

Lesiak, 808 N.W.2d at 76. Plaintiff is not under a duty to calculate a separate figure for the actual physical damage. The Rao King Report opines that contamination of corn with Viptera/Duracade caused Mensik to suffer damages in the amount of $140,925. This amount reflects the difference between the price at which Plaintiff would have sold his corn without the contamination and the price at which he was, is, and will be able to sell his corn after the contamination. Syngenta is not entitled to summary judgment on any theory of liability or claim for damages based on physical injury.

C. Duty to Conduct a Limited Launch

Syngenta moves to dismiss any portion of any of Mensik's claims that rely on the imposition of a duty to limit the sale of Viptera for lack of causation. Specifically, Syngenta argues that a reasonable jury could not conclude that limiting the sale of Viptera to farmers that agreed to use certain planting methods;[3] promised not to sell their crop in interstate commerce; or

[3] In an Order dated March 21, 2017, the Court held that claims regarding channeling or containment of grown corn is preempted by the Grain Standards Act ("GSA").

withdrawing Viptera would have avoided the alleged injuries because the GM trait still would have dispersed into the corn supply through cross-pollination and commingling during harvesting, storage, and shipping. In light of China's policy of zero tolerance, the presence of MIR162 would have resulted in the same trade disruption.[4]

Plaintiff has presented admissible evidence showing a material fact issue on the claim for negligence based on a limited launch. "In order to recover in a negligence action, a plaintiff must show a legal duty owed by the defendant to the plaintiff, a breach of such duty, causation, and damages." *Hall v. County. of Lancaster*, 846 N.W.2d 107, 118 (Neb. 2014) (footnote omitted). A proximate cause is a cause (1) that produces a result in a natural and continuous sequence, and (2) without which the result would not have occurred. *Id.* at 983-84 (citing *Stacy v. Great Lakes Agri Mktg.*, 276 Neb. 236, 753 N.W.2d 785 (Neb. 2008)). "To establish proximate cause, the plaintiff must meet three basic requirements: (1) Without the negligent action, the injury would not have occurred, commonly known as the 'but for' rule or 'cause in fact'; (2) the injury was a natural and probable result of the negligence; and (3) there was no efficient intervening cause." *Roskop Dairy, L.L.C. v. GEA Farm Techs., Inc.*, 871 N.W.2d 776, 794 (Neb. 2015) (footnote omitted). "Proximate causation is generally a question for the jury, and only where but one inference can be drawn is it proper for the court to decide the issue." *McKinney v. Okoye*, 842 N.W.2d 581, 594 (Neb. 2014).

1. Inevitable Cross-Pollination and Commingling

First, Syngenta argues Mensik failed to carry his burden by not submitting expert opinion on the issue of causation from cross-pollination and commingling. Expert testimony is necessary to show proximate cause where the issue of causation is "not within the common knowledge and usual

[4] The Court considered and rejected this argument based solely on the allegations in the pleadings in the March 21, 2017 Order.

experience of a factfinding jury." *McVaney v. Baird, Holm, McEachen, Pedersen, Hammann & Strasheim*, 466 N.W.2d 499, 508 (Neb. 1991). The issue of causation with respect to Plaintiff's claim regarding a limited launch duty is not a technical matter beyond the scope of ordinary knowledge. While jurors may not have actual experience growing corn, the concept of cross-pollination and trait dispersion does not require expertise under these circumstances. The issue can be determined from the evidence presented and the common knowledge of fact finders. *See, e.g., Canas v. Maryland Cas. Co.*, 459 N.W.2d 533, 539 (Neb. 1990).

Syngenta's expert, Dr. Alan McHughen, a geneticist and biotechnology specialist, opines that ensuring 100% genetic purity is scientifically impossible because corn naturally cross-pollinates and pollen can travel substantial distances. Plaintiff's experts Dirk Maier and Joseph Keaschall provide opinion regarding the distance that pollen can travel and that the launch of Viptera that occurred resulted in inevitable cross-pollination. Cargill employee, Randall Giroux ("Giroux") testified that he did not think that one could find anyone in the grain or seed industry who says they can contain pollen to 100 percent. In addition, the testimony of the deposed producers, including Mensik, is that most measures cannot completely eliminate cross-pollination.

There is also evidence that a zero tolerance standard for GM traits in commodity crops is difficulty to satisfy. The U.S. National Academy of Science has stated that a zero tolerance is not technically or economically feasible. The North American Export Grain Association ("NAEGA") stated in a 2014 letter to the United States Drug Administration ("USDA") that with respect to zero tolerance requirements, a limited launch is no different than product commercialization because of an inherent risk that the GM trait will be detected. Giroux testified that zero tolerance is impossible as a standard to meet and it was unlikely that Syngenta could have managed to zero tolerance under a limited launch.

However, the Court also notes that there is evidence that this interconnected corn market often operates under the belief that launches of GM traits can be limited so as to avoid trade disruptions. *See, e.g., In re StarLink Corn Prod. Liab. Litig.*, 212 F. Supp. 2d 828, 834 (N.D. Ill. 2002). For example, manufacturer signatories to the BIO Policy agree to manage launches of new products to avoid trade disruption in key export markets; Syngenta stated in its Deregulation Petition to the USDA for Viptera that it would require the diversion of MIR162 corn away from export markets where the trait was not yet approved and that such ability to channel corn was not merely hypothetical; Syngenta promoted that it could launch seed products such as Enogen in a "closed-loop system" to minimize dispersion; and Monsanto used a "managed" system to prevent corn contamination with the limited launch of Droughtguard. The Court notes, however, that these programs include some component of channeling, which is a duty preempted by the GSA.

In any event, the inevitability of cross-pollination is not fatal to a finding of causation. Even in light of China's zero tolerance policy, Plaintiff does not need to demonstrate that a more limited launch would have resulted in "100% genetic purity" or no kernel of corn with the MIR162 trait in shipments to China. Plaintiff can satisfy his burden by showing that it is more likely than not that no trade embargo would have occurred. *See, e.g., Doe v. Zedek*, 587 N.W.2d 885, 894 (Neb. 1999). Despite China's zero tolerance policy, there is evidence that a more limited launch would not have resulted in the rejection of all U.S. corn by China. When asked if Syngenta could have used a system similar to Monsanto's Droughtguard, Giroux responded, "If [Syngenta] had chosen to, they could have grown much fewer acres and in a much more controlled manner to help protect that export market, that's correct." He also stated that it is more likely than not that exporters could have serviced Chinese demand for U.S. corn if Syngenta had taken certain precautions in launching Viptera. In addition, Plaintiff provided evidence that China tested only a small percentage of

kernels, China accepted shipments of U.S. corn that likely contained some amount of MIR162, and some Cargill testing showed 50% of the shipments to China contained MIR162. All of this evidence, taken in a light most favorable to the Plaintiff, demonstrates that a limited launch may not have resulted in 0% of exported corn containing MIR162 but could support a finding that it is more probable than not that it would have avoided the embargo. The evidence is sufficient to create a question of fact on the issue of causation under Plaintiff's limited launch theory.

2. Non-Interstate Sales

One of the measures Plaintiff indicates Syngenta could have taken to limit the launch of Viptera in order to avoid a trade disruption was to only sell Viptera seed to farmers in counties where the corn is not sold into interstate or foreign commerce. Syngenta's expert Charles Finch provided testimony that farmers sell to local or county elevators, sub-terminal and terminal elevators, river elevators and port elevators, all of which sell to the export market. He also states that even in areas with ethanol plants, which absorb a significant amount of corn production, the plants produce DDGS as an output that may be sold locally, interstate, and in the export market. Finch opines that based on the many uses and demand for corn along with the modern transportation infrastructure, "there are few counties, if any, in the Corn Belt that consume all of the corn and DDGS produced within that county."

Syngenta's argument that this theory should be dismissed for lack of evidence is rejected. Plaintiff has presented evidence that Syngenta uses a "closed-loop" production system designed to ensure that all Enogen corn is sold and delivered to ethanol plants. Giroux's description of part of Monsanto's Droughtguard program includes, "Farmer signs a contract to surround Droughtguard with other corn (pollen scrubber) and all material fed on farm in feed application or volumes contracted to a feed operation locally[.] Not allowed to deliver to an elevator in this program, even

if its heading to feed ultimately[.]" The evidence of these programs demonstrates that it is possible to grow and manage corn not sold in interstate or foreign commerce. Questions of fact exist whether Syngenta could have used such measures in a limited launch of Viptera.

3. Duty to Recall

Syngenta also seeks summary judgment on any theory of liability based on a duty to recall seeds already sold. Plaintiff argues his theory of liability is that the exercise of reasonable care in launching Viptera required ceasing the sale of Viptera to prevent harm to the market. In a products liability case, the Eighth Circuit has determined that Nebraska would not impose either a post-sale duty to warn or a duty to retrofit. *Anderson v. Nissan Motor Co.*, 139 F.3d 599, 602 (8th Cir. 1998); *see also Vallejo v. Amgen, Inc.*, No. 8:14CV50, 2014 WL 4922901, at *4 (D. Neb. Sept. 29, 2014) ("In light of *Anderson,* Plaintiff's claims based on strict liability and negligent failure to warn are barred to the extent that they allege post-sale duties to warn). These cases relied upon by Syngenta are distinguishable and not persuasive. *Anderson* and *Vallejo* are applicable to products liability cases and bar claims alleging post-sale duties to warn or retrofit. This is not a products liability case and Plaintiff's claim is that the exercise of reasonable care include ceasing the sale of Viptera. Syngenta is not entitled to summary judgment on this theory of liability.

D. Negligence Based on Misrepresentations

In the March 21, 2017 Order on Syngenta's motion for judgment on the pleadings, the Court dismissed with prejudice Plaintiffs' claims in the Master Complaints for negligence based on misrepresentations.

E. Failure to Warn Claims

This Court previously dismissed any claim that Syngenta failed to include adequate warnings accompanying the Viptera and Duracade seeds it sold as preempted under the Federal

Insecticide, Fungicide, and Rodenticide Act ("FIFRA"). Syngenta now seeks summary judgment on any other failure to warn claims asserted by Mensik. Mensik does not oppose Syngenta's motion with respect to strict liability failure to warn and the motion is so granted.

Mensik argues that he may allege a failure to warn of the damages of MIR162 entering the corn supply as part of the totality of conduct by Syngenta that was negligent.[5] Plaintiff must show: (1) that Syngenta owed a duty to warn; (2) that Syngenta breached its duty to warn; and (3) that Syngenta's breach of its duty caused Mensik's injuries. *McRunnel v. Batco Mfg.*, 917 F. Supp. 2d 946, 957 (D. Minn. 2013) (citing *In re Levaquin Prods. Liab. Litig.*, 700 F.3d 1161, 1166 (8th Cir. 2012)). "[G]eneral negligence law imposes a general duty of reasonable care when the defendant's own conduct creates a foreseeable risk of injury to a foreseeable plaintiff." *Domagala v. Rolland*, 805 N.W.2d 14, 23 (Minn. 2011). "In other words, when a person acts in some manner that creates a foreseeable risk of injury to another, the actor is charged with an affirmative duty to exercise reasonable care to prevent his conduct from harming others." *Id.* at 26. A duty to use reasonable care can include a duty to warn of known dangers. *See, e.g., Tite v. Omaha Coliseum Corp.*, 12 N.W.2d 90, 93 (Neb. 1943).

First, Syngenta argues that the claim fails because it did not owe a duty to warn because the risks were obvious and well known in the industry. There is no duty to warn of a known danger. *Waegli v. Caterpillar Tractor Co.*, 251 N.W.2d 370, 372 (Neb. 1977). "This is especially true when the user is a professional who should be aware of the characteristics of the product." *Harmon Contract Glazing, Inc. v. Libby-Owens-Ford Co.*, 493 N.W.2d 146, 151 (Minn. Ct. App. 1992) (citing *Strong v. E.I. DuPont de Nemours Co.*, 667 F.2d 682, 687 (8th Cir. 1981). Syngenta claims

[5] Syngenta did not object to Plaintiff's inclusion of this duty in its general negligence claim. The Court also finds it is distinguishable from the assertion of misrepresentations as the basis for a negligence claim. Unlike a separate claim for negligent misrepresentation, there is no element of proof that Plaintiff would be circumventing.

that the Producers and grain handlers know about cross-pollination and contamination of the corn supply. The testimony of the Plaintiffs deposed, including Mensik, demonstrate that they are knowledgeable on these topics, characteristics regarding the seed, and their use of the seed. However, the depositions also show the farmers do not have specialized knowledge of seed manufacturers' commercialization programs, foreign processes for approval of GM traits, China's policies and process for approval of GM traits in particular, and international shipping and export of agricultural commodity crops. Mensik testified that he did not know what countries had approved MIR162. In addition, while other members of the interconnected market such as grain handlers have more knowledge regarding foreign approval processes, export procedures, and the possibility of trade disruptions, there is evidence that Syngenta failed to provide accurate information regarding its commercialization and foreign approval of MIR162. The commercialization of Viptera and process of obtaining approval of MIR162 in other foreign export markets was in the control and knowledge of Syngenta. The interconnected market was dependent on the information provided by Syngenta. The danger of a trade disruption was not a known danger that negated Syngenta's duty to warn.

Second, Syngenta claims it provided adequate warnings to Mensik and other industry participants regarding the risks of a trade disruption. Syngenta points to the Stewardship Agreement, Know Before You Grow website, and updates it provided to the grain trade associations. These warnings, however, did not discuss the potential for and the scope of a possible trade disruption. Questions of fact exist whether Syngenta satisfied its duty to warn.

Finally, Syngenta argues that Plaintiff cannot show that the failure to warn caused Plaintiff harm. Plaintiff has not asserted a separate failure to warn claim in a products liability action. As discussed in Section H *infra*, a proximate cause "is a cause (1) that produces a result in a natural and

continuous sequence and (2) without which the result would not have occurred." *Brandon v. County of Richardson*, 624 N.W.2d 604, 627 (Neb. 2001). Where there is conflicting evidence, causation is a question of fact. *Zeller v. County of Howard*, 419 N.W.2d 654, 658 (Neb. 1988). Plaintiff presented evidence that an additional warning could have prevented the injury. *See, e.g., Kapps v. Biosense Webster, Inc.*, 813 F. Supp. 2d 1128, 1157 (D. Minn. 2011). Mensik testified that producers "wouldn't have been in this problem if Syngenta would have been honest with us." He went on to explain that Syngenta should have "had one large document in front of us" stating, "if you're going to purchase this, we have no outlet for it at this time. And we are going to need to channel this, just like they brought up Duracade after the fact, and we would have all obeyed the rules like we do." In addition, when Giroux asked Bernens if China would approve Viptera by fall, Bernens told other Syngenta employees that the answer is "no," but, "I am trying to find a response that does not prompt them to put up signs right away." A reasonable inference from this evidence is that Syngenta knew that producers and grain handlers would have taken a different course of conduct to prevent the harm had Syngenta given adequate warning. Taking the evidence in a light most favorable to Plaintiff, questions of fact exist whether Syngenta's failure to warn caused Plaintiff harm. Syngenta is not entitled to summary judgment on a failure to warn duty as part of Plaintiff's negligence claim.

F. Voluntary Duty / Broken Promises

Syngenta moves the Court to dismiss any negligence claim based on any theory that it owed a duty to Plaintiffs based on a "voluntary undertaking." Nebraska follows the Restatement, which states:

> One who undertakes, gratuitously or for consideration, to render services to another which he should recognize as necessary for the protection of the other's person or things, is subject to liability to the other for physical harm resulting from his failure to exercise reasonable care to perform his undertaking, if

(a) his failure to exercise such care increases the risk of such harm, or

(b) the harm is suffered because of the other's reliance upon the undertaking.

Restatement (Second) of Torts §323; *see also id.* at § 324.

Syngenta argues that any theory of liability under this provision fails for lack of physical harm. Liability for voluntary undertakings is applicable only where the product causes physical harm. *National Crane Corp. v. Ohio Steel Tube Co.*, 332 N.W.2d 39, 43 (Neb. 1983). As discussed in section B *supra*, Mensik has sufficiently presented evidence of physical harm.

Plaintiff argues that Syngenta voluntarily undertook compliance with the Biotechnology Industry Organization's ("BIO") "Product Launch Stewardship Policy" ("BIO Policy") in the commercialization of Viptera and Duracade.[6] The BIO Policy establishes guidelines for launching GM products for those manufacturers that agree to abide by the recommendations.[7] Syngenta relies on an Eighth Circuit case that declined to extend the holding of the Arkansas Supreme Court under this section of the Restatement to a plaintiff that contended the defendant assumed a duty by publicly representing that they would pursue public health research about the dangers of cigarette smoking, and breached that duty by withholding information on the health ramifications and addictiveness of cigarettes. *Boerner v. Brown & Williamson Tobacco Corp.*, 260 F.3d 837, 849 (8th Cir. 2001). The Court found that the plaintiff failed to show either that the public health community owed him or his wife a legally enforceable duty through "unilateral public statements." *Id.* The BIO Policy is more than a typical internal corporate policy or "unilateral public statement." It is an

[6] To the extent Plaintiff relies on "numerous statements regarding its plans, progress, and projections for obtaining import approval from China and about its plans for a limited release with proper stewardship," the duty of a voluntary undertaking is rejected. Plaintiff has not identified any of these statements or the duty they give rise to with specificity.

[7] Syngenta's commercialization of Agrisure RW was the catalyst for development of the BIO Policy.

agreement among manufacturers in the industry to abide by certain conduct. It does not contain vague public statements but rather sets forth specific guidelines, standards, and requirements.

Seed manufacturers could decide whether they would execute the BIO Policy and agree to be bound by the standards and requirements in the agreement. An undertaking requires that the defendant "must have agreed to perform a certain act and have assumed the performance of that act." *Jordan v. NUCOR Corp.*, 295 F.3d 828, 838 (8th Cir. 2002). A fact finder could determine this was a voluntary undertaking necessary for the protection of others in the interconnected market. Questions of fact remain and Syngenta is not entitled to judgment as a matter of law on the duty based on a voluntary undertaking.

G. Petition Clause

Syngenta moves the Court to declare that statements made in Syngenta's Deregulation Petition to the USDA and Syngenta's litigation in *Syngenta Seeds, Inc. v. Bunge North America, Inc.*, 773 F.3d 58 (8th Cir. 2014) ("*Bunge* lawsuit") cannot be used as the basis for any liability because they enjoy immunity under the First Amendment's Petition Clause. *See, e.g., N.A.A.C.P. v. Claiborne Hardware Co.*, 458 U.S. 886 (1982). The Court agrees with Plaintiff that Syngenta has not asserted a proper basis for summary judgment on this issue in this case. Mensik does not assert a claim against Syngenta based on the Deregulation Petition or *Bunge* lawsuit. Plaintiff has asserted they are pieces of evidence relevant to his claims for negligent commercialization. Syngenta's motion is denied at this time.

H. Proximate Cause

Syngenta moves the Court to dismiss all of Mensik's claims for lack of proximate cause. A proximate cause is a cause (1) that produces a result in a natural and continuous sequence, and (2) without which the result would not have occurred. *Hall,* 846 N.W.2d at 983-84 (citing *Stacy v.*

Great Lakes Agri Mktg., 276 Neb. 236, 753 N.W.2d 785 (Neb. 2008)).

> To establish proximate cause, the plaintiff must meet three basic requirements: (1) Without the negligent action, the injury would not have occurred, commonly known as the 'but for' rule or 'cause in fact'; (2) the injury was a natural and probable result of the negligence; and (3) there was no efficient intervening cause.

Roskop Dairy, L.L.C. v. GEA Farm Techs., Inc., 871 N.W.2d 776, 794 (Neb. 2015) (footnote omitted). "Proximate causation is generally a question for the jury, and only where but one inference can be drawn is it proper for the court to decide the issue." *McKinney v. Okoye*, 842 N.W.2d 581, 594 (Neb. 2014).

Plaintiff has presented sufficient evidence upon which a reasonable jury could find proximate cause. A proximate cause need not be the sole cause; it need only be a proximate cause. *See, e.g., Maclovi-Sierra v. City of Omaha*, 860 N.W.2d 763, 774 (Neb. 2015). It also does not need to be the immediate cause; it may be enough that the act complained of set in motion a series of events through which it produced the damage. *See Meyer v. State*, 650 N.W.2d 459, 463 (Neb. 2002). It is not necessary, however, that the specific injury sued upon have been foreseeable; it suffices if what occurred was one of the kind of consequences reasonably foreseeable. *Erickson v. Monarch Indus.*, 347 N.W.2d 99, 105 (Neb. 1984). Here, Plaintiff has presented evidence that without Syngenta's act of launching Viptera in the absence of approval from China, the injury of trade disruption would not have occurred. The injury of a trade embargo is a natural and probable result of releasing a GM trait without approval from for import by a foreign market. And as discussed in Section I *infra*, there was no efficient intervening cause.

Syngenta's argument that it created a "condition" by which Mensik's injury was made possible is unpersuasive. Syngenta claims that its actions of launching Viptera merely created a condition under which the presence of Viptera in the corn supply permitted the actions of Cargill and ADM to cause the harm. Syngenta relies heavily on the fact that Cargill and ADM chose not to

ship corn to China in 2011 and thus no harm would have occurred if Cargill and ADM kept the status quo. Syngenta's argument, however, fails to account for the fact that its negligence altered Cargill and ADM's actions in the first place. If Syngenta's negligence had not occurred, the status quo would have been unrestricted shipments to China by Cargill and ADM. In addition, the distance in time between the negligence and the injury may be a factor in assessing proximate cause but it does not defeat causation. *See, e.g., Landmesser v. Ahlberg*, 166 N.W.2d 124, 128 (Neb. 1969). Simply because other participants in the interconnected market changed their behavior in response to Syngenta's alleged negligence which resulted in a delay before the harm occurred does not create an automatic break in the chain of causation.

I. Superseding Cause

Syngenta argues that summary judgment should be granted on the issue of causation because the grain exporters' act of shipping U.S. corn to China was an intervening cause that broke the chain of proximate causation. Conversely, Plaintiff moves to dismiss Syngenta's defense of intervening/superseding cause. Syngenta claims Cargill and ADM chose not to ship corn to China in 2011 because of Viptera. In 2012, Cargill and ADM chose to ship corn to China, knew shipments contained MIR162, and knew China had a zero tolerance for unapproved GM traits. Syngenta claims Cargill and ADM made these shipments in violation of Chinese law, contracts with Chinese buyers, and their own policies. Syngenta concludes that it was China's rejection of those shipments made by Cargill and ADM that caused Plaintiff's damages. Plaintiff argues that the grain exporters' acts do not constitute intervening causes because they were foreseeable, were not new and independent of Syngenta's conduct, were not sufficiently wrongful, and Cargill and ADM did not have full control of the situation.

"An efficient intervening cause is new and independent conduct of a third person, which

itself is a proximate cause of the injury in question and breaks the causal connection between the original conduct and the injury." *Willet v. County of Lancaster*, 713 N.W.2d 483, 488 (Neb. 2006).

> An efficient intervening cause is a new, independent force intervening between the defendant's negligent act and the plaintiff's injury by the negligence of a third person who had full control of the situation, whose negligence the defendant could not anticipate or contemplate, and whose negligence resulted directly in the plaintiff's injury. Thus, an intervening act that is reasonably foreseeable by the defendant does not preclude the defendant's liability.

Kozicki v. Dragon, 583 N.W.2d 336, 340 (Neb. 1998) (citations omitted); *see also Brandon v. County of Richardson*, 624 N.W.2d 604, 627 (Neb. 2001). "The causal connection is severed when (1) the negligent actions of a third party intervene, (2) the third party had full control of the situation, (3) the third party's negligence could not have been anticipated by the defendant, and (4) the third party's negligence directly resulted in injury to the plaintiff." *Malolepszy v. State*, 729 N.W.2d 669, 675 (Neb. 2007) (citing *Willet*). A superseding cause relieves the defendant of responsibility for the injury. *Id.* at 675-77. Ordinarily, the issue of whether an intervening force was a superseding cause is for the jury. *Kozicki*, 583 N.W.2d at 340. Where reasonable minds could not differ on the issue, however, the question is one for the court. *Egenberger v. National Alfalfa Dehydrating & Milling Co.*, 83 N.W.2d 523, 532 (Neb. 1957).

The act of Cargill and ADM in shipping corn to China does not constitute an efficient intervening cause. First, Cargill and ADM's shipments of corn to China were not new and independent acts unrelated to Syngenta's conduct. A "new and independent" act is one that is "not set in motion by him, and not connected with but independent of his acts and not flowing therefrom." *Hersh v. Miller*, 99 N.W.2d 878, 881 (Neb. 1959).

> If the original negligence is of a character which, according to the usual experience of mankind, is liable to invite or induce the intervention of some subsequent cause, the intervening cause will not excuse it, and the subsequent mischief will be held to be the result of the original negligence. A cause of an injury may be the proximate cause notwithstanding it acted through successive instruments or a series of events,

> if the instruments or events were combined in one continuous chain or train through which the force of the cause operated to produce the disaster.

Kroeger v. Safranek, 72 N.W.2d 831, 838 (Neb. 1955) (quotation omitted). Plaintiff has presented evidence that Syngenta negligently commercialized Viptera, causing MIR162 to contaminate the U.S. corn supply despite lack of approval in China. Shipment of corn to foreign markets is a regular occurrence in the agricultural commodities industry. Shipments by Cargill and ADM would not have triggered the rejection by China if Viptera had not been present. Syngenta set in motion the rejection of shipments of corn. The act of shipping corn containing MIR162 flowed from Syngenta's commercialization of Viptera. The conduct of ADM is therefore not new or independent from Syngenta's alleged negligence.

Second, ADM and Cargill did not have full control of the situation. Third parties have control over a situation where they could have avoided the harm through the exercise of reasonable care. *Latzel v. Bartek*, 846 N.W.2d 153, 167 (Neb. 2014). Syngenta was the party responsible for obtaining import approval of MIR162 from China. Cargill and ADM did not have knowledge of the application for approval and its status. No reasonable jury could find that the shipments of corn to China by Cargill and ADM were unrelated and independent acts of parties that had full control of the situation.

Furthermore, Cargill and ADM's conduct was reasonably foreseeable. Third-party conduct that is reasonably foreseeable is not an intervening cause, as a matter of law. *Zeller v. County of Howard*, 419 N.W.2d 654, 658 (Neb. 1988); *Brandon v. County of Richardson*, 624 N.W.2d 604, 627 (Neb. 2001). "Any action that was foreseeably within the scope of the risk occasioned by the defendant's negligence cannot be said to supersede that negligence." *Fuhrman v. State*, 655 N.W.2d 866, 875 (2003) (citation and internal quotation marks omitted). In the January 9, 2017 Order granting Plaintiff's motion to amend to add a claim for punitive damages, the Court reviewed

in length the evidence demonstrating Syngenta was aware that its conduct of commercializing Viptera without approval for import from a foreign market could result in a trade disruption. The evidence shows the knowledge came from prior releases of GM traits by Syngenta and other companies and foreseeability was shown in numerous discussions among Syngenta employees on how to react to the situation.

Syngenta argues that Cargill and ADM's conduct was not foreseeable because shipping corn with MIR162 to China was unlawful conduct. The Restatement provides:

> The act of a third person in committing an intentional tort or crime is a superseding cause of harm to another resulting therefrom, although the actor's negligent conduct created a situation which afforded the opportunity to the third person to commit such a tort or crime, unless the actor at the time of his negligent conduct realized or should have realized the likelihood that such a situation might be created, and that a third person might avail himself of the opportunity to commit such a tort or crime.

Restatement (Second) of Torts § 448; *Shelton v. Board of Regents*, 320 N.W.2d 748, 752-53 (Neb. 1982). This is a situation where at the time of Syngenta's commercialization of Viptera without approval from China, it realized or should have realized that it created a situation where Cargill, ADM, and other grain exporters may ship corn with MIR162 in violation of China's rules. Since the unlawful conduct by others was foreseeable, it cannot be an intervening cause. Unlike the cases relied upon by Syngenta involving motorists who failed to obey traffic laws, the reason Cargill and ADM's action was unlawful was because of Syngenta's negligence.

For all of these reasons, Syngenta failed to offer evidence to create a question of fact concerning whether Cargill and ADM's shipments to China constitutes an efficient intervening cause. Plaintiff is entitled to summary judgment on Syngenta's defense of superseding cause.

J. Contributory Negligence

Plaintiff seeks summary judgment of Syngenta's defense of Mensik's contributory negligence. Syngenta argues that as a grower of Viptera, Mensik was subject to a duty to prevent

contamination. "One is contributorily negligent if (1) he breaches the duty imposed upon him by the law to protect himself from injury; (2) his actions concur and cooperate with actionable negligence of the defendant; and (3) his actions contribute to the injuries as a proximate cause." *Steinauer v. Sarpy County*, 353 N.W.2d 715, 721 (Neb. 1984). A proximate cause is a cause that produces a result in a natural and continuous sequence and without which the result would not have occurred. *Meyer v. State*, 650 N.W.2d 459, 463 (Neb. 2002).

First, the Court notes that any duty imposed upon Mensik would be subject to the same GSA preemption analysis. Therefore, any requirement of inspection or description based on the presence of genetic traits in Viptera or Duracade as a condition of shipment or sale of grown corn in interstate or foreign commerce is preempted. In general, stewardship measures based on containment or channeling are preempted but isolation measures applying actions taken with regard to seed and not corn are not preempted.

Plaintiff argues that Syngenta's claim fails for lack of causation. China would have rejected shipments of corn containing MIR162 causing the trade disruption and drop in price even if Mensik had not grown Viptera. Plaintiff argues that when China began rejecting U.S. corn in November 2013, the corn supply was so contaminated with corn grown form Viptera that Mensik's very small amount of Viptera corn did not affect the presence of MIR162 in the corn supply. He claims that China would have rejected U.S. corn whether he planted Viptera or not and he was thus not a "but for" cause of the trade disruption. The Court agrees with Plaintiff. No reasonable jury could find that Mensik's conduct was a proximate cause of the injury.

K. Allocation of Fault

Plaintiff moves the Court to dismiss Syngenta's defense to allocate fault to grain handlers, China, and other non-producers. Nebraska law does not allow the allocation of fault to non-parties.

Neb. Rev. Stat. Sec. 25-21, 185.10 provides:

> the liability of each defendant for economic damages shall be joint and several and the liability of each defendant for noneconomic damages shall be several only and shall not be joint. Each defendant shall be liable only for the amount of noneconomic damages allocated to that defendant in direct proportion to that defendant's percentage of negligence, and a separate judgment shall be rendered against that defendant for that amount.

The Nebraska Supreme Court has made clear that this statute is only applicable to actions involving more than one defendant. *Tadros v. City of Omaha*, 735 N.W.2d 377, 380 (Neb. 2007).

> Because [the statute's] effect is on only the apportionment of damages between multiple defendants after liability has been established, the proper timeframe to consider in determining whether there are, in fact, multiple defendants in a case is when the case is submitted to the finder of fact. In other words, if there is only one defendant in a particular case at the point the case is submitted to a jury, the jury will not be allowed to allocate a percent of damages or negligence to 'phantom' defendants who have never been part or are no longer part of a proceeding. Again, only when there are multiple defendants in a case at the time the case is submitted to the finder of fact can there be the possibility of an allocation of damages between damages under [the statute.]

Maxwell v. Montey, 631 N.W.2d 455, 462 (Neb. 2001).

The law in Minnesota does not prohibit the allocation of fault to non-parties. "When apportioning negligence, a jury must have the opportunity to consider the negligence of all parties to the transaction, whether or not they be parties to the lawsuit and whether or not they can be liable to the plaintiff or to the other tortfeasors either by operation of law or because of a prior release." *Lines v. Ryan*, 272 N.W.2d 896, 903 (Minn. 1978); *see also Staab v. Diocese of St. Cloud*, 813 N.W.2d 68, 77 (Minn. 2012). Syngenta argues the Court should apply Minnesota law to the allocation of fault.

In an Order dated April 7, 2016 on Syngenta's motion to dismiss, the Court conducted a choice of law analysis and concluded that the law of each Plaintiff's state of residence would apply to their common law claims. In a separate Order issued on April 11, 2017, the Court performed a

choice of law analysis and held that Minnesota law applied to Mensik's claim for punitive damages. Syngenta's argument that allocation of fault is simply a rule applied to damages and not a substantive law is rejected. Allocation of fault is an issue of state substantive law. *See Ryan v. McDonough Power Equip., Inc.*, 734 F.2d 385, 389 (8th Cir. 1984). In order to allocate fault between parties, the fact finder must determine that each individual party is liable. Such a finding is thus a substantive law query and the Court's choice of law analysis regarding common law claims in the April 7, 2016 Order is applicable and is incorporated herein.

However, the Court will also conduct a choice of law analysis on the issue. Choice of law determinations are made on an issue-by-issue, and not a case-by-case, basis. *Zaretsky v. Molecular Biosystems, Inc.*, 464 N.W.2d 546, 548 (Minn. Ct. App. 1990) (citing Restatement (Second) of Conflict of Laws § 2 comment a(3) (1971)). The difference between Nebraska and Minnesota in allocating the potential fault of non-parties is outcome determinative because it affects who may be found liable. The Court also previously determined that Minnesota law may be constitutionally applied to Defendants in this matter in the April 4, 2016 Order. Consistent with the Court's two previous choice of law analyses, the distinguishing *Milkovich* factor is the advancement of each state's governmental interest. *See also H Enter. Int'l v. Gen. Elec. Capital Corp.*, 833 F. Supp. 1405, 1416 (D. Minn. 1993) (advancement of the forum's governmental interests and the application of the better rule of law are the only two factors relevant in torts). The competing interests involved in allocation of fault rules are ensuring victims are fully compensated and protecting defendants from paying for harm caused by others. In the context of compensatory damages, the Court finds ensuring full compensation to victims is the dominant interest. The Court finds that Nebraska's governmental interest is more significant on the issue of allocation of fault.[8]

[8] The Court does not find the better rule of law a relevant factor. The law on allocation of fault in Minnesota compared to Nebraska cannot be said to be the better law. As discussed above, the laws serve different purposes.

Here, Cargill, ADM, and China are not parties to this action. In Orders dated September 2, 2016 and September 14, 2016, this Court specifically denied Syngenta's motion to assert claims against Cargill and ADM. Accordingly, Syngenta's defense that fault should be allocated to Cargill, ADM, and China is dismissed as a matter of law.

Syngenta also argues that fault can be allocated to non-Viptera growers. The other Producer Plaintiffs are not technically parties to Mensik's case. Therefore, no portion of damages can be allocated to them. In addition, Syngenta has not provided any evidence that Plaintiffs who did not grow Viptera could have taken action on their own farm to prevent cross-pollination from Viptera growers' farms.

L. Assumption of the Risk

Syngenta claims Plaintiff's claims are barred by the doctrine of assumption of the risk. Plaintiff claims this defense fails as a matter of law. An affirmative defense of assumption of the risk requires that, "(1) the person knew of and understood the specific danger, (2) the person voluntarily exposed himself or herself to the danger, and (3) the person's injury or death or the harm to property occurred as a result of his or her exposure to the danger." Neb. Rev. Stat. § 25-21, 185.12; *see also Burke v. McKay*, 679 N.W.2d 418, 424 (Neb. 2004). Assumption of the risk applies a subjective standard, geared to the individual plaintiff and his actual comprehension and appreciation of the nature of the danger. *Burke*, 679 N.W.2d at 424. The defendant has the burden to establish the elements of assumption of risk as an affirmative defense. *Mandery v. Chronicle Broad Co.*, 423 N.W.2d 115, 120 (Neb. 1988).

The evidence regarding Mensik's knowledge of the risk of trade disruption is that he knew China rejected corn imports in 2013. This demonstrates knowledge after-the-fact and not an appreciation of the risk before it occurred. The Court finds that no reasonable jury could find

that Mensik knew the risk associated with purchasing Viptera seed, that he appreciated the risk of a trade disruption, or that he voluntarily chose to incur it. Syngenta's defense of assumption of the risk is dismissed as a matter of law.

M. Stewardship Agreement

Syngenta moves the Court for summary judgment enforcing the terms of the Stewardship Agreement by limiting Mensik's remedies to the purchase price of his seeds. Conversely, Mensik moves the Court for summary judgment on Syngenta's Eighteenth Defense, that Mensik's claims are barred by the disclaimer and limitation of warranties in the Stewardship Agreement. Each bag of Viptera and Duracade seed sold by Syngenta bore a tag stating, "By opening this package of seed, you affirm that you have signed and are obligated to follow the terms and conditions of the Syngenta Stewardship Agreement and will practice responsible Insect Resistance Management (IRM) on your farm."[9]

Syngenta's Stewardship Agreement states:

> This Stewardship Agreement ('Agreement') is entered into between You ('Grower') and Syngenta Seeds, Inc., 11055 Wayzata Blvd., Minnetonka, Minnesota 55305 ('Syngenta'). By signing and returning this Agreement the Grower received from Syngenta a limited license to use the following technologies as they are contained in any Syngenta seed product and/or in any seed product distributed by a third party Syngenta-licensee (such products collectively referred to as 'Seed Product'):
>
> (I) Agrisure® CB/LL corn, Agrisure GT corn, Agrisure RW corn, Agrisure Viptera™ corn (the 'Agrisure Technologies');
>
> (II) **** (the 'DAS Technologies'); and
>
> (III) **** (the 'Gennuity RR2Y Technology').
>
> The Agrisure Technologies, DAS Technologies and Gennuity RR2Y Technology shall collectively be referred to as the 'Licensed Technologies' throughout this Agreement.

The Stewardship Agreement includes the following provisions under the heading

[9] Plaintiff's argument that there is no affirmative evidence to prove that the bags of seed purchased by Mensik contained these tags creates nothing more than a "metaphysical doubt about the facts" and is rejected. *See, e.g., Dyrdal v. Golden Nuggets, Inc.*, 689 N.W.2d 779, 783 (Minn. 2004).

"LIMITATIONS OF WARRANTIES AND REMEDIES":

> Syngenta warrants that the Licensed Technologies licensed hereunder conform to the written description on the seed bag affixed to each unit of Seed Products containing the Licensed Technologies. This warranty applies only to the Licensed Technologies contained in the Seed Products that have been purchased from Syngenta seed companies licensed by Syngenta, or their authorized dealers or distributors and planted from the original sealed bag. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE WHICH ARE HEREBY EXPRESSLY DISCLAIMED. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE LABEL.
>
> No claim shall be asserted against Syngenta unless Grower reports to Syngenta promptly after discovery any condition that may lead to a complaint. All claims must be asserted within one year from the date of acceptance. GROWER'S EXCLUSIVE REMEDY FOR ANY CLAIM OR LOSS, INCLUDING WITHOUT LIMITATION, CLAIMS RESULTING FROM BREACH OF WARRANTY, BREACH OF CONTRACT, TORT, STRICT LIABILITY OR NEGLIGENCE, SHALL BE LIMITED TO REPAYMENT OF THE AMOUNT OF THE PURCHASE PRICE. IN NO EVENT SHALL SYNGENTA, ITS DISTRIBUTORS, OR DEALERS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES.

Syngenta argues that by opening the bags and using the seeds, Mensik accepted the terms of the Stewardship Agreement.[10] To form a contract under Nebraska law,[11] "there must be both an offer and an acceptance; there must also be a meeting of the minds or a binding mutual understanding between the parties to the contract." *Gibbons Ranches, L.L.C. v. Bailey*, 857 N.W.2d 808, 812 (Neb. 2015); *Houghton v. Big Red Keno,* 574 N.W.2d 494, 499 (Neb. 1998). A binding mutual understanding or meeting of the minds sufficient to establish a contract requires no precise formality or express utterance from the parties themselves as to all the details of the proposed

[10] There is a dispute whether Mensik ever signed the Stewardship Agreement. There is one copy of the Stewardship Agreement with a signature of Mensik but he denies it is his signature and the parties have retained handwriting experts to evaluate the signature. In addition, an electronic copy of the Stewardship Agreement was downloaded on a computer at the Mensik home. For purposes of this motion, Syngenta relies on a contract formed by opening the seed bags.

[11] The Stewardship Agreement states that Minnesota law shall govern. The Court finds no difference between the law of Minnesota and Nebraska on contract formation.

agreement; it may be implied from the parties' conduct and the surrounding circumstances. *Nebraska Nutrients, Inc. v. Shepherd*, 261 Neb. 723, 751–52, 626 N.W.2d 472, 498–99 (2001) (citing *Hoeft v. Five Points Bank,* 248 Neb. 772, 539 N.W.2d 637 (1995)). An agreement to make a future contract is not binding upon either party unless all terms and conditions are agreed upon and nothing is left to future negotiation. *Cimino v. FirsTier Bank,* 530 N.W.2d 606, 614 (Neb. 1995). A contract is not formed if the parties contemplate that something remains to be done to establish contractual arrangements or if elements are left for future arrangement. *Id.* To create a contract, there must be both an offer and an acceptance; there must also be a meeting of the minds or a binding mutual understanding between the parties to the contract. An agreement to agree is not enforceable in Nebraska. *Id.*

Syngenta argues that Mensik manifested assent to the terms of the contract by opening the bags and using the seeds. Mutual assent is measured under an objective standard. *Sorenson v. Dager*, 601 N.W.2d 564, 569 (Neb. 1999). Syngenta argues that the situation is the same as cases wherein courts have held that offers to license that are included with product packaging can be accepted by software end users and are enforceable agreements. *See, e.g., Siebert v. Amateur Athletic Union of U.S., Inc.*, 422 F. Supp. 2d 1033, 1039-40 (D. Minn. 2006) ("Most courts which have considered the issue have upheld arbitration and forum selection clauses in so-called "clickwrap" or "shrinkwrap" form contracts. These occur when the terms are provided online, or only after plaintiffs have manifested assent"). Unlike these primarily software cases, there was no affirmative "click" by the purchaser in this case to affirmatively demonstrate acceptance. This transaction involved the purchase of a product that did not require any involvement with accessing a computer, where you are unable to download software or continue with an application unless you signal assent by clicking a box.

In addition, all of the cited cases involved upholding arbitration and forum selection clauses in the contracts. *Id.* As the court noted in *Siebert*, "both state and federal governments have strong policies favoring arbitration." *Id.* at 1038. While parties to a commercial agreement may limit or alter the measure of damages, Minn. Stat. § 336.2-719(1)(a), there is no "strong policy" favoring such provisions. Here, the terms of the Stewardship Agreement were not known to Mensik until after he purchased the product and did not make an affirmative showing of assent to those post-sale terms. The parties did not enter into a binding contract.

Furthermore, the scope of the Stewardship Agreement terms is too narrow to govern the claims in this case. The scope of a contract is determined by the parties' intent. *See, e.g., Joe v. First Bank Sys., Inc.*, 202 F.3d 1067, 1070 (8th Cir. 2000). The Stewardship Agreement applies to the technology license, express and implied warranties. Mensik's claims do not relate to defective seed product, or a failure to perform, or Mensik's use of Syngenta technologies. Even if the parties entered into this contract, the evidence shows they did not intend the agreement to apply to claims for negligent commercialization. Mensik's tort claims are unrelated to his purchases and use of Viptera or Duracade corn seed, the Stewardship Agreement does not apply to his claims in this case.

The parties did not enter into binding contract with mutual assent to the terms in the Stewardship Agreement. In addition, the parties did not intend the agreement to govern Plaintiff's claim in this case. Therefore, the Stewardship Agreement will not be enforced as a matter of law. The Stewardship Agreement does not operate to limit the damages available for Mensik's claims in this case.

N. Restraint of Trade

Plaintiff moves the Court to dismiss Syngenta's affirmative antitrust defense. Syngenta argues that some of the duties Plaintiff seeks to impose on Syngenta would be a violation of

antitrust laws. "Federal antitrust laws pre-empt state laws authorizing or compelling private parties to engage in anticompetitive behavior." *324 Liquor Corp. v. Duffy*, 479 U.S. 335, 345 n. 8 (1987). For example, Syngenta argues it would be a violation of antitrust laws to agree with Cargill and ADM about which seed products could be sold in the U.S. or agree with other seed manufacturers on identifying key export markets. Similar to the discussion in Section G *supra* regarding Syngenta's motion on the Petition Clause, the Court finds this is not a proper basis for summary judgment. There does not appear to be a specific claim or affirmative defense at issue but rather concern over evidence. Plaintiff's motion is denied at this time.

O. Unjust Enrichment

Syngenta asserted an affirmative defense of unjust enrichment. Syngenta claims Mensik unjustly received an increased yield from planting Viptera. Plaintiff moves for summary judgment, arguing unjust enrichment cannot be used as an affirmative defense and there is no evidence to support a finding if unjust enrichment. The Court agrees.

Syngenta's argument that unjust enrichment may be used as an affirmative defense is not persuasive. Unjust enrichment is a quasi-contractual theory of recovery, having "its origin in the principle that a person shall not be allowed to enrich himself unjustly at the expense of another." *Bush v. Kramer*, 173 N.W.2d 367, 369 (Neb. 1969). "Generally, unjust enrichment is not argued as a defense to an action because a party cannot recover for unjust enrichment until the allegedly inequitable benefits have been received and retained." *Ag Servs. of Am., Inc. v. Empfield*, 587 N.W.2d 871, 874 (Neb. 1999) (citing *In re Estate of Krueger,* 235 Neb. 518, 455 N.W.2d 809 (1990); *Professional Recruiters v. Oliver,* 235 Neb. 508, 456 N.W.2d 103 (1990)). Syngenta's reliance on the case of *Bank of Beaver City v. Southwest Feeders, L.L.C.*, No. 4:10-CV-3209, 2011 WL 4632887, at *14 (D. Neb. Oct. 4, 2011) is misplaced. In the context of a Rule 12(f)

motion to strike, the court in *Bank of Beaver City* held that it would "not strike the 'unjust enrichment' theory solely on the ground that it may have been mistakenly designated as an affirmative defense." *Id.* at *13. The court did not sanction the use of unjust enrichment as an affirmative defense. The Court agrees with Plaintiff that unjust enrichment is not a valid affirmative defense.

Even if the Court recognized unjust enrichment as an affirmative defense, Plaintiff would still be entitled to summary judgment. Syngenta argues Mensik unjustly received an increased yield from planting Viptera. A reasonable jury could not find this "benefit" to be "unjust." "Where benefits have been received and retained under such circumstances that it would be inequitable and unconscionable to permit the party receiving them to avoid payment therefor, the law requires the party receiving and retaining the benefits to pay their reasonable value." *Hoffman v. Reinke Mfg. Co.,* 416 N.W.2d 216, 219 (Neb. 1987). Plaintiff paid for the Viptera and Duracade seed that he purchased. Presumably, the price reflected any additional increase in the value of the seed. A reasonable jury could not find the purchase of a GMO corn seed at the price set by the seller to be inequitable or unconscionable. In addition, there is no evidence to show what the yield of Mensik's crop would have been had he not planted Viptera seed. For all of these reasons, Plaintiff's motion is granted with respect to the affirmative defense of unjust enrichment.

P. Consumer Protection Act Claim

In the Master Complaint, Plaintiffs identify four alleged misrepresentations that violate the consumer protection act: 1) a statement made by Mack in the 2012 earnings call; 2) statements made in the Deregulation Petition; 3) statements made in the request for a biosafety certificate; and 4) the Plant with Confidence Sheet. The Nebraska Consumer Protection Act ("NCPA") requires

Mensik to prove causation by showing that he was "injured in his … business or property by" the allegedly false and deceptive representations, Neb. Rev. Stat. § 59-1609, and that the allegedly false and deceptive representations affected the public interest. *See Bruno v. Sunglass Hut Trading Corp.*, 2008 WL 2277550, at *3 (Neb. Ct. App. June 3, 2008).

The Nebraska Consumer Protection Act ("NCPA") prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce" that "affect the public interest." Neb. Rev. Stat. § 59-1602; *see also* Neb. Rev. Stat. § 59-1601; *Infogroup, Inc. v. DatabaseLLC*, 95 F. Supp. 3d 1170, 1184 n.11 (D. Neb. 2015) (citing *Eicher v. Mid America Fin. Inv. Corp.*, 748 N.W.2d 1, 12 (Neb. 2008); *Arthur v. Microsoft Corp.*, 676 N.W.2d 29, 36 (Neb. 2004)). "The terms 'unfair' and 'deceptive' are not defined in by the [NCPA]" leaving courts to "try to predict how the Nebraska Supreme Court would define and then apply those words ...." *Raad v. Wal-mart Stores, Inc.*, 13 F. Supp. 2d 1003, 1011 (D. Neb. 1998); *Reynolds v. Credit Mgmt. Servs., Inc.*, No. 8:14CV391, 2016 WL 756469, at *2 (D. Neb. Feb. 25, 2016).

> Any person who is injured in his or her business or property by a violation of sections 59-1602 to 59-1606, whether such injured person dealt directly or indirectly with the defendant, or any person so injured because he or she refuses to accede to a proposal for an arrangement which, if consummated, would be in violation of sections 59-1603 to 59-1606, may bring a civil action in the district court to enjoin further violations, to recover the actual damages sustained by him or her, or both, together with the costs of the suit, including a reasonable attorney's fee, and the court may in its discretion, increase the award of damages to an amount which bears a reasonable relation to the actual damages which have been sustained and which damages are not susceptible of measurement by ordinary pecuniary standards; except that such increased award for violation of section 59-1602 shall not exceed one thousand dollars. For the purpose of this section, person shall include the counties, the municipalities, and all political subdivisions of this state.

Neb. Rev. Stat. Ann. § 59-1609.

Syngenta moves for judgment of dismissal as a matter of law, arguing no one saw or acted

upon the four representations listed in the Master Complaint: 1) Mack's comment in the earnings call; 2) statements in the Deregulation Petition; 3) statements in the request for biosafety certificate; and 4) the Plant with Confidence Sheet. Syngenta notes that out of the more than 100 farmers deposed, 106 testified they had not seen Mack's earnings call statement, 107 had never seen the biosafety certificate request form, and 105 had not seen the Deregulation Petition. The statute does not specifically require reliance on a misrepresentation. Rather, the Act prohibits unfair and deceptive trade practices and allows any person who is injured in his business by the conduct to bring an action.

The Act requires that the person be injured "by" the violation. Syngenta argues Mensik failed to prove causation. Causation is generally a question of fact. *Brandon v. County of Richardson*, 624 N.W.2d 604 (Neb. 2001). Mensik has alleged that Syngenta used unfair and deceptive acts in the commercialization of Viptera and Duracade, which is more expansive than just misrepresentations. Mensik has presented facts upon which a jury could find Syngenta's acts caused him damages.

Syngenta also claims Mensik cannot prove that any of the statements were unfair or deceptive. "Reinbrecht next assigns that the trial court erred by using the wrong definitions of "unfair" and "deceptive" in analyzing his CPA claim. After noting that the terms "unfair" and "deceptive" are not defined in the NCPA and that no Nebraska case law defines the terms as used in the NCPA, the *Raad* court stated that an unfair trade practice is one that is immoral, unethical, oppressive, or unscrupulous. *Raad v. Wal–Mart Stores, Inc.*, 13 F.Supp.2d 1003 (D. Neb. 1998). It defined a deceptive practice as one which possesses the tendency or capacity to mislead, or creates the likelihood of deception, and that fraud, misrepresentation, and similar conduct are examples of what is prohibited. *Id.* The Nebraska Court of Appeals subsequently found no error with these

definitions. *Reinbrecht v. Walgreen Co.*, 742 N.W.2d 243, 249 (2007). Mensik has presented evidence of statements made by Syngenta to growers and grain handlers, members of the interconnected market, regarding the expected timing of approval from China that a jury could conclude were deceptive.

Finally, Syngenta argues the claim should be dismissed because a plaintiff cannot redress a private wrong where the public interest is unaffected. The NCPA only applies to unfair or deceptive practices which affect the "public interest." *Eicher v. Mid Am. Fin. Inv. Corp,* 748 N.W.2d 1, 12 (2008). "The purpose of the Act is to provide consumers with protection against unlawful practices in the conduct of any trade or commerce which directly or indirectly affects the people of Nebraska. *See Nelson v. Lusterstone Surfacing Co.,* 258 Neb. 678, 605 N.W.2d 136 (2000). Syngenta attempts to characterize the dispute as a private transaction between two merchants with a Stewardship Agreement limiting available remedies. There are five sets of related litigation surrounding Syngenta's commercialization of Viptera. This matter involves approximately 50,000 producers and Plaintiffs indicate there are over 7,000 farmers from Nebraska in the action. The federal MDL involves a nationwide class action and a Kansas class action and this matter includes a class action of Minnesota farmers. In *Arthur*, the court found that an alleged class of 4,000 consumers affected by the defendant's alleged violation of the Act was sufficient to show the public interest was affected. *Arthur v. Microsoft Corp.*, 676 N.W.2d 29, 38 (2004). Similarly, Mensik has made a sufficient showing that based on the large number of Nebraska farmers affected, the public interest was affected.

Q. Duracade

Syngenta seeks summary judgment to the extent Mensik's claims are based on the commercialization of Duracade. Mensik argues there is a question of fact whether Syngenta's

commercialization of Duracade increased or extended Plaintiff's damages. Mensik states that because Duracade is not approved for import into China, it has delayed full resumption of Chinese purchases of U.S. Corn.

Syngenta argues that Plaintiff lacks evidence that Duracade had any impact on U.S. corn prices. Plaintiff submitted the Rao/King Report which opines that Duracade extended the duration of the economic damage from the trade embargo. Rao/King calculated static damages of $.50 per bushel of corn from November 18, 2013 to December 7, 2014 and $0.15 per bushel from December 8, 2014 to August 26, 2016. Given the bushels of corn sold by Mr. Mensik in this period, Rao/King calculated his damages at $104,460.00. Although only calculating damages to August 2016, Rao/King opined that, "the fact that China has yet to resume any meaningful imports of US corn suggests that this price suppressive effect continues to this day." Based on the assumption that the $0.15 per bushel price suppression continues through the 2017 marketing year, Rao/King calculated Mensik's damages at $36,465.00 from August 2016 through the 2017 marketing year.

Syngenta attacks this evidence as speculative and lacking support. The Court has found there is sufficient foundational reliability for the Rao/King report. Syngenta will have ample opportunity to cross-examine the opinions of Dr. Rao and Anna King; allowing the jury to determine the credibility and weight to be given to their testimony. Plaintiff has presented sufficient evidence to raise a question of fact and the Court cannot conclude that no reasonable jury could award damages based on Syngenta's actions in commercializing Duracade. Syngenta's motion for summary judgment with respect to Duracade is denied.

R. Damages

Syngenta moves the Court for summary judgment of any claims brought by Plaintiff other than claims for damages due to the alleged lower market price of corn. Mensik confirmed that the

only damages he seeks are market-loss damages and does not oppose Syngenta's motion. The motion is therefore granted.

S. Collateral Source Offsets

Mensik moves for summary judgment on Syngenta's Thirty Ninth Defense, which states that Mensik's damages must be reduced by any payments and income received from other sources related to his corn farming operation. Under Nebraska law, "benefits received by the plaintiff from a source wholly independent of and collateral to the wrongdoer will not diminish the damages otherwise recoverable from the wrongdoer." *Hiway 20 Terminal, Inc. v. Tri-County Agri-Supply, Inc.*, 443 N.W.2d 872, 874-75 (Neb. 1989); *Tetherow v. Wolfe*, 392 N.W.2d 374, 380 (Neb. 1986). The theory underlying the adoption of this rule by a majority of jurisdictions is to prevent a tort-feasor from escaping liability because of the act of a third party, even if a possibility exists that the plaintiff may be compensated twice. *Id.* Syngenta does not dispute that insurance payments and government subsidies are collateral sources precluded from offsetting damages under Nebraska law.

Syngenta argues that Mensik's use of options contracts should reduce any damages. Mensik testified that he generally tries to sell half of his corn in the futures market by December of the prior year. Syngenta argues this use of pricing advantage does not constitute a benefit received and is not wholly independent of wrongdoing.

While Nebraska law governs the substantive provision of collateral source law, the Court finds that Minnesota procedure should govern the request for collateral source offsets. If the matter is one of procedural law, Minnesota follows the "almost universal rule that matters of procedure and remedies [are] governed by the law of the forum state." *Davis v. Furlong,* 328 N.W.2d 150, 153 (Minn. 1983) (citation omitted). In tort actions where a jury determines liability and issues an award providing compensation for past losses, a party may move the Court to reduce the amount of

the award by amounts received from collateral sources. Minn. Stat. § 548.251, subd. 2. Upon motion, the Court determines the "amounts of collateral sources that have been paid for the benefit of the plaintiff or are otherwise available to the plaintiff as a result of losses except those for which a subrogation right has been asserted." Minn. Stat. § 548.251, subd. 2(1). The Court must then reduce the award by the collateral source amount less any sums paid by the plaintiff to secure the collateral sources. Minn. Stat. § 548.251, subd. 3(a). Therefore, any request for collateral source offsets can be made by motion following a verdict.

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Plaintiffs' motion to exclude the expert testimony and opinions of Travis Milne.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion to exclude Travis Milne's expert testimony and opinions is granted. Travis Milne may testify as a fact witness regarding his personal experiences with Viptera to the extent that such testimony is relevant.

2. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 12, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera; and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Syngenta has designated Travis Milne as a non-retained expert. According to Syngenta, Mr. Milne will provide expert testimony regarding the benefits of Viptera to US corn growers, including its effectiveness in increasing yield and combating pests; the demand for Viptera among US corn farmers; and the impact on US corn farmers if new US-approved biotechnology traits are unavailable. Plaintiffs have made a motion to exclude this testimony.

II. Expert Opinions

Travis Milne obtained an undergraduate degree in Business Administration from Williams Jewell College in 2008 and became a seed dealer for Syngenta in 2010; selling Syngenta seed to between 80 and 120 customers in Oregeon, Missouri. Aside from Missouri, Mr. Milne has a few customers located in Nebraska, Kansas and maybe Iowa. Travis Milne is also a farmer who has planted Viptera. Mr. Milne is not an agronomist, geneticist, entomologist or economist. Aside from his first-hand knowledge in selling Viptera seed and growing Viptera corn, Mr. Milne's only knowledge about Viptera comes from talking to his customers, other seed dealers, and reading pamphlets and other information; most of which was supplied by Syngenta. He has never performed any independent investigation regarding the benefits or demands for

Viptera among US farmers.

Plaintiffs seek to exclude Mr. Milne's expert testimony. Plaintiffs contend that Mr. Milne lacks the necessary qualifications to provide expert opinions regarding the benefits, demand, or necessity of Viptera seed. Additionally, Plaintiffs assert that Mr. Milne's opinions lack foundational reliability, are irrelevant, and are not helpful to the jury.

III. Legal Analysis

To be admissible, testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). Mr. Milne's opinions do not involve a *Frye-Mack* analysis.

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985). A witness may qualify as an expert not only on the basis of knowledge which he has gained through formal education but also on the basis of knowledge gained through occupational experience. *Kastner v. Wermerskirschen*, 295 Minn. 391, 394, 205 N.W.2d 336, 338 (1973).

An analysis of foundational reliability "requires the court to: (1) analyze the proffered testimony in light of the purpose for which it is being offered, (2) consider the underlying reliability, consistency, and accuracy of the subject about which the expert is testifying, and (3) determine if the proffered evidence is reliable." *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 638 (Minn. Ct. App. 2014) (citing *Doe* at 167–68). Finally, expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.'" *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

Travis Milne's only experience with Viptera is derived from selling seed and growing corn in a limited geographical area. Any knowledge outside this geographical region is derived

from reading pamphlets or listening to stories from other farmers and seed sellers; assuming that the information they provide is correct. His opinions are not based on any independent investigation, analysis, or other research regarding Viptera's benefits or the demand for this seed by US farmers. Additionally, Mr. Milne's opinion regarding how farmers are impacted by a delayed release in US approved genetic modifications is not reliable as it is not based on any investigation or economic analysis. Finally, Mr. Milne's belief that there is a general benefit to farmers from genetically modified products is not helpful to the jury. A jury will hear testimony regarding Viptera, its uses, and the history of genetic modifications from other witnesses. After determining the credibility and weight to be given such testimony, a jury can decide whether farmers, in general, were or would be negatively impacted by a delay in releasing US approved genetic modifications. Although not allowed to testify as an expert, however, Mr. Milne may testify as a fact witness and provide evidence, to the extent relevant, regarding his first-hand experiences with Viptera.

IV. Conclusion

Plaintiff's motion to exclude the expert testimony and opinions of Travis Milne is granted. Mr. Milne is not qualified to provide expert opinions regarding the benefits, demand, or need for Viptera among US farmers. Mr. Milne, however can testify as a fact witness regarding his personal experiences with Viptera to the extent that such testimony is relevant.

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:
Daniel S. Mensik (Orig. Case No. 27-CV-15-16826)
Minnesota Class Action (Orig. Case No. 27-CV-15-12625)

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Syngenta's motion to exclude the expert testimony of Randal Giroux.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Syngenta's motion to exclude the export testimony of Randal Giroux is granted in part and denied in part.

2. The Court is excluding Randal Giroux's opinions: (1) that certain policies constitute an industry standard; (2) regarding his concept of risk responsibility; and (3) regarding the actions taken by other biotechnology companies to commercialize a genetically modified trait to the extent

they occurred after the commercialization of Viptera. In all other respects, Syngenta's motion to exclude the expert testimony of Randal Giroux is denied.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 14, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Plaintiffs have identified Dr. Randal Giroux ("Dr. Giroux"), an employee of Cargill, as a fact witness to discuss his interactions with Syngenta as well as other stakeholders relating to MIR 162 and other genetically modified seed varieties. Plaintiffs have also identified Dr. Giroux as an expert witness to testify regarding, among other things, risk assessment and the standards within the biotechnology and grain industry for commercialization of new biotechnology traits. Syngenta seeks to exclude the testimony and opinions of Randal Giroux.

II. Qualifications and Expected Testimony

Dr. Giroux graduated from the University of Toronto with an undergraduate degree in cell biology and genetics. He has a masters degree in genetics and is a doctor of philosophy in agriculture. Since 2000, Dr. Giroux has worked for Cargill Incorporated in various positions. From June 2005 to June 2010, he was the senior advisor and scientific and regulatory affairs leader with the key responsibility of managing biotechnology issues. Among his many professional activities, he served as Chairman of the Risk Management Committee from 2006 to 2012 and Co-Chair of the domestic working group for US biotechnology crops alliance from 2012 to 2016. Dr. Giroux has experience dealing with biotech firms regarding the commercialization of new genetic traits and is

knowledgeable about the interconnected corn market.

In addition to his fact testimony, Plaintiffs seek to elicit from Dr. Giroux expert opinions regarding: (1) the general practice in the industry for commercializing a biotechnology seed variety in the United States, and the risks of commercializing this seed variety prior to obtaining approval from key export markets; (2) in commercializing Viptera and Duracade, Syngenta's conduct was not consistent with the conduct of other biotechnology companies when they commercialize new biotechnology seed varieties, and created a known risk for a trade disruption involving China, an important export market for United States corn; (3) the risk management techniques available to prevent the unwanted spread of new biotechnology traits; (4) the effectiveness, cost, and viability of the known risk management techniques in preventing crops grown from certain biotechnology seed varieties from being exported to unapproved markets, including those with zero-tolerance policies; (5) the effectiveness of a limited commercialization of a biotechnology seed variety, including limiting sales and restricting planting to particular geographic regions, and the practices of other biotechnology companies such as Monsanto; (6) decisions by companies like Syngenta to commercialize biotechnology prior to regulatory approvals from significant markets can inflict substantial harm to downstream industry participants, as these downstream participants lack the ability to manage the risk, especially in a zero-tolerance environment; and (7) Syngenta's communications to him and to Cargill about the status of approval of MIR 162 and the "misrepresentations" and general lack of transparency associated therewith.

According to Syngenta, Dr. Giroux's expert testimony should be excluded because Dr. Giroux: (1) has no basis for his opinions regarding industry standards; (2) draws impermissible legal conclusions for his opinions regarding responsibility for damages under his three-legged stool construct; (3) is not qualified to offer opinions regarding the actions of biotechnology companies;

and (4) offers opinions which are unhelpful to the jury concerning what Syngenta knew or believed. The Court agrees in part.

III. Legal Analysis

To be admissible, testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401*. "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403*.

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). Dr. Giroux's expert opinions do not involve a *Frye-Mack* analysis.

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to

establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985). A witness may qualify as an expert not only on the basis of knowledge which he has gained through formal education but also on the basis of knowledge gained through occupational experience. *Kastner v. Wermerskirschen*, 295 Minn. 391, 394, 205 N.W.2d 336, 338 (1973).

Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.'" *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Generally, opinions involving a legal analysis "are deemed to be of no use to the jury." *State v. Saldana*, 324 N.W.2d 227, 230 (Minn. 1982). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

Given his education and experience in the industry, Dr. Giroux is qualified to testify regarding biotechnology companies and their interpretation of any association policies or documents. The jury will determine the credibility and weight to be given this testimony. In his testimony, however, Dr. Giroux offers legal conclusions regarding the existence or non-existence of industry standards. These opinions are excluded. Additionally, Dr. Giroux's testimony regarding the risk responsibility leg of his three-legged stool analysis is excluded. Dr. Giroux acknowledges that this risk responsibility has never been accepted or agreed upon in the biotech community and, as explained by Dr. Giroux, requires a biotech firm to be strictly liable for any

damage caused to the corn industry by commercialization of a genetic modification. This is an improper legal standard as the Court has dismissed the strict liability cause of action; and the testimony is unhelpful to the jury. Finally, the Court is excluding testimony regarding the conduct of other biotechnology companies as irrelevant to the extent their actions occurred after the commercialization of Viptera. Otherwise, Dr. Giroux's opinions are helpful to the jury and shall be allowed.

IV. Conclusion

Syngenta's motion to exclude the expert testimony of Dr. Giroux is granted in part and denied in part. Dr. Giroux is qualified to testify as an expert witness and his testimony, for the most part, is helpful to the jury. Any opinions, however, that certain policies constitute an industry standard are excluded. Additionally, Dr. Giroux's opinions regarding risk responsibility are excluded. Finally, opinions about the actions taken by other biotechnology companies to commercialize a genetically modified trait are irrelevant to the extent they occurred after the commercialization of Viptera.

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Syngenta's motion to exclude portions of the expert report and testimony of Joseph Keaschall.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Syngenta's motion to exclude portions of the export report and testimony of Dr. Joseph Keaschall is granted in part and denied in part.

2. Paragraphs 18, 21, 22 and 24 and 25 of Dr. Joseph Keaschall's expert report are excluded together with all but the first three sentences of paragraph 20 and the last sentence of paragraph 23. In all other respects, Syngenta's motion to exclude the report and testimony of Dr. Keaschall is denied.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 11, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera; and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect. Plaintiffs retained Joseph Keaschall to explain and offer opinions regarding agronomy, applied plant breeding, and applied plant genetics. Syngenta moves to exclude portions of the expert report and testimony of Dr. Keaschall.

II. Expert Report

Joseph Keaschall is a geneticist. He received an undergraduate degree in agronomy from the University of Nebraska and has a Ph.D. from Purdue University in plant breeding and genetics. Since August 2016, Dr. Keaschall has worked as a plant breeding professor at the University of Nebraska-Lincoln. Prior to teaching, he worked for DuPont Pioneer for over 30 years. At DuPont Pioneer, Dr. Keaschall was employed as a corn breeder, research director and product program director; teaching corn breeding to students, farmers and employees. As a product program director for DuPont Pioneer, Dr. Keaschall obtained direct experience in analyzing the value and limitations of MIR 162.[1] Dr. Keaschall is not an entomologist, but has knowledge and experience involving insects and the plant damage they cause.

In paragraphs 10 to 17 of his report, Dr. Keaschall generally discusses corn breeding and

[1] The Pioneer Leptra Brand products included MIR 162.

genetic modifications in the United States. Syngenta has no objection to this portion of Dr. Keaschall's report. Dr. Keaschall also provides opinions that: (1) in regulated testing, the presence of MIR 162 does not increase yields; (2) the presence of MIR 162 provides a benefit to farmers in warmer climates but little, if any, benefit to farmers in non-southern growing areas; and (3) that there were alternatives to MIR 162 which did not pose a risk to the Chinese export market. Syngenta objects to these opinions and seeks exclusion of paragraph 18 along with paragraphs 20-26 of Dr. Keaschall's report. The Court agrees in part.

III. Legal Analysis

To be admissible, expert testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must

satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). Analysis of Dr. Keaschall's report does not involve the *Frye-Mack* standard.

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985).

An analysis of foundational reliability "requires the court to: (1) analyze the proffered testimony in light of the purpose for which it is being offered, (2) consider the underlying reliability, consistency, and accuracy of the subject about which the expert is testifying, and (3) determine if the proffered evidence is reliable." *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 638 (Minn. Ct. App. 2014) (citing *Doe* at 167–68). Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.'" *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

Dr. Keaschall bases his opinion regarding the yield of MIR 162 on tests found in Syngenta's Deregulation Petition. These tests were designed to assess whether or not MIR 162 negatively affected yields in the absence of pest pressure and do not address yields in a "real world"

situation. Therefore, the yield information used in Dr. Keaschall's report is misleading and unreliable as used and shall be excluded. In opining that MIR 162 benefits farmers in warmer climates, Dr. Keaschall describes the types of insects controlled by MIR 162, their prevalence in certain regions, and their survivability in colder climates. Although Dr. Keaschall is qualified to describe the types of insects sought to be controlled by certain seed traits, he is not an entomologist and is not qualified to discuss the survivability of certain insects in certain weather conditions. Finally, Dr. Keaschall may testify that Syngenta had alternatives to commercializing Viptera; but the fact that other companies had alternatives to MIR 162 is not relevant. For the above reasons, paragraphs 18, 21, 22, 24 and 25 of Dr. Keaschall's report are excluded, along with all but the first three sentences of paragraph 20 and the last sentence of paragraph 23.

IV. Conclusion

Paragraphs 18, 21, 22, 24 and 25 of Dr. Keaschall's report, together with portions of paragraphs 20 and 23 are excluded. In all other respects, Syngenta's motion to exclude the report of Dr. Keaschall is denied.

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins
Hon. Laurie J. Miller

This Document Relates to:

Class Action

FILE NO. 27-CV-15-12625

ORDER

The above-entitled matter came before Thomas M. Sipkins and Laurie J. Miller, Judges of District Court, on June 29, 2017, pursuant to Plaintiffs' motions to exclude or limit the expert testimony of Barry K. Goodwin, Walter N. Thurman, and William Sheppard and Syngenta's motions to exclude the expert testimony and opinions of Bruce A. Babcock and Colin A. Carter.

Attorneys Daniel E. Gustafson, Amanda M. Williams, Rebecca A. Peterson, Lewis A. Remele, Jr., Eric S. Taubel, Aram V. Desteian, and Casey D. Marshall appeared on behalf of Class Plaintiffs.

Attorneys Patrick F. Philbin, Leslie M. Smith, Edwin J. U, Patrick Haney, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion to limit the testimony of Barry K. Goodwin is denied. Paragraph 11 and paragraphs 87 to 99 are excluded for the class action trial.

2. Plaintiffs' motion to limit the testimony of Walter N. Thurman is denied.

27-CV-15-12825
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

3. Plaintiffs' motion to exclude the testimony of William Sheppard is granted in part and denied in part. The motion is granted with respect to William Sheppard's expert testimony and opinions. The motion is denied with respect to William Sheppard's testimony as a fact witness regarding his personal experiences with Viptera to the extent that such testimony is relevant.

4. Syngenta's motion to exclude the report and testimony of Bruce A. Babcock is denied.

5. Syngenta's motion to exclude the report and testimony of Collin A. Carter is denied. Footnote 111 to Dr. Carter's report is excluded as irrelevant.

6. The attached Memorandum of Law is incorporated herein.

MEMORANDUM OF LAW

I. Introduction

Defendant Syngenta Seeds Inc. (n/k/a Syngenta Seeds LLC) ("Syngenta") developed genetically modified ("GM") corn seed products known as Agrisure Viptera ("Viptera") and Agrisure Duracade ("Duracade"). Viptera contains the GM trait MIR162 and Duracade also includes the trait Event 5307. After receiving approval from U.S. regulatory agencies, Syngenta commercialized Viptera and Duracade prior to obtaining regulatory approval from China to import corn with MIR162. In November 2013, China began to enforce its zero tolerance policy regarding corn containing MIR162 and rejected all shipments of U.S. corn. In general, corn producers and non-producer corn sellers allege that Syngenta's commercialization of Viptera caused corn containing MIR162 to be commingled throughout the U.S. corn supply; that China rejected imports of all U.S. corn because of the presence of MIR162; that such rejection caused corn prices to drop in the United States; and that Plaintiffs were harmed by that market effect. Plaintiffs make similar allegations with respect to Duracade.

Currently before the Court are the parties' motions to exclude or limit the testimony and report of several expert witnesses. On March 17, 2017, the Court heard motions applicable to both the initial bellwether case of *Mensik* and the class action regarding many experts. At that time, the parties agreed to reserve argument and ruling on experts only relevant to the class action. Final argument on the motions regarding the remaining experts was held on June 29, 2017.[1]

[1] The motions were submitted to and argued before Judge Sipkins. On July 7, 2017, the Minnesota Supreme Court appointed Judge Miller to hear and decide these consolidated matters. Judge Sipkins and Judge Miller are thus jointly issuing this Order.

II. Legal Standard

To be admissible, testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.* Unfair prejudice under Rule 403 "is evidence that persuades by illegitimate means, giving one party an unfair advantage." *State v. Schulz*, 691 N.W.2d 474, 478 (Minn. 2005).

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011).

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn.

Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985). A witness may qualify as an expert not only on the basis of knowledge which he has gained through formal education but also on the basis of knowledge gained through occupational experience. *Kastner v. Wermerskirschen*, 295 Minn. 391, 394, 205 N.W.2d 336, 338 (1973).

The Court may be required to consider foundational reliability in two contexts. *Doe*, 817 N.W.2d at 165. The Rule 702 analysis evaluates the reliability of an expert's opinion while the *Frye-Mack* analysis assesses the reliability of a scientific test. *Id.* The Court, however, conducts the same analysis in both circumstances. *Id.* at 168. An analysis of foundational reliability "requires the court to: (1) analyze the proffered testimony in light of the purpose for which it is being offered, (2) consider the underlying reliability, consistency, and accuracy of the subject about which the expert is testifying, and (3) determine if the proffered evidence is reliable." *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 638 (Minn. Ct. App. 2014) (citing *Doe*, 817 N.W.2d at 167–68).

Finally, expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.'" *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Generally, opinions involving a legal analysis "are deemed to be of no use to the jury." *State v. Saldana*, 324 N.W.2d 227, 230 (Minn. 1982). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

III. Plaintiffs' Motions to Exclude

A. Dr. Barry K. Goodwin

Dr. Barry K. Goodwin is an economist retained by Syngenta to evaluate the effect of China's ban on U.S. corn on corn prices in Minnesota. He also reviewed and assessed the reports of Plaintiffs' experts Dr. Colin A. Carter, Dr. Mohan Rao, and Anna King that address issues related to the price effect of the China ban on MIR162 corn. Dr. Goodwin received his Ph.D. in economics with a minor in statistics from North Carolina State University in 1988. He is a William Neal Reynolds Professor of Agricultural and Resource Economics at North Carolina State University. He has taught courses and published articles in the areas of applied econometrics and statistics, consumer demand, price analysis, agricultural policy, risk management, and international trade.

Dr. Goodwin used a vector error correction model ("VECM") to analyze the price effect of the Chinese ban on the import of U.S. corn. The VECM is a type of event study that analyzes past trends in commodity prices up until an event date and uses that information to forecast commodity prices after the event. In his report, Dr. Goodwin sets forth the two main equations he used to express changes in the price of corn and sorghum. He then used the equations to estimate "but-for" corn prices representing the prices that would have prevailed but for the ban on MIR162 corn. He then compared the projection of the "but-for" prices to actual prices to determine a price effect. If the "but-for" prices are significantly statistically different from actual prices, that difference represents the price impact of the event. Using the VECM, Dr. Goodwin found that there was a one to two week period of time during which prices in Minnesota were statistically different from actual prices and not statistically distinguishable thereafter. Dr. Goodwin opines that the effect on the market was transitory and dissipated quickly because

27-CV-15-12825
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

market participants responded to other market factors. He concludes that China's ban on U.S. corn did not have an appreciable price effect on Minnesota corn prices after November 18, 2013.

Plaintiffs move the Court to limit Dr. Goodwin's testimony by excluding paragraphs 5 through 8, 12 through 52, 101, and 102 from his report. Plaintiffs claim portions of Dr. Goodwin's report rely on novel scientific methods, which are not accepted in the economics community and lack foundational reliability.

First, Plaintiffs argue that Dr. Goodwin's VECM lacks foundational reliability because it uses a different model than the one disclosed in his report. Dr. Goodwin ran his VECM using a statistical program known as SAS (Statistical Analysis System). According to Dr. Carter[2], the SAS code shows the model actually used two different equations than the ones in Dr. Goodwin's report, stating price levels rather than price changes. Dr. Carter argues that this change in the dependent variable is contrary to the basic assumptions of a VECM. Dr. Carter also claims Dr. Goodwin reported the Adjusted R^2 statistic from the "alternative model," indicating a model with high explanatory power. When Dr. Carter re-calculated the R^2 based on the VECM as described in the report, he found a lower number showing a model with no explanatory power.

Syngenta responds that the equations in Dr. Goodwin's report are identical to the equations in the SAS code but terms are rearranged in order to isolate different terms on one side of the equations. Dr. Goodwin also states that the R^2 values differ because altering the way the equation is written changes which variable is treated as the dependent variable. Dr. Goodwin stated the relevant adjusted R^2 value is the one in his report.

The differences identified by Plaintiffs between Dr. Goodwin's report and the SAS code

[2] In an Order dated March 24, 2017, the Court denied Syngenta's motion to strike the supplemental expert declarations from Dr. Mohan Rao and Anna King and Dr. Colin Carter that evaluate and assess Dr. Goodwin's Vector Error Correction Model ("VECM") data, calculations, analysis, and findings. Plaintiffs use these declarations to support their argument that Dr. Goodwin's model is unreliable.

27-CV-15-12825
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

do not make Dr. Goodwin's VECM unreliable. Demonstrating foundational reliability requires "the proponent of the test to establish that the test itself is reliable and that its administration in the particular instance conformed to the procedure necessary to ensure reliability." *Goeb*, 615 N.W.2d at 814. The Court finds Dr. Goodwin adequately and accurately disclosed his equations and Adjusted R^2 results. Plaintiffs thoroughly examined Dr. Goodwin on how the equations were stated. Plaintiffs' experts had a chance to review and criticize Dr. Goodwin's model and how the equations were stated. Plaintiffs will have the opportunity to cross-examine him on these differences at trial.

Plaintiffs next argue Dr. Goodwin's report lacks foundational reliability because it fails to provide the t-statistic, which shows its reliability and predictive power, and fails a standard F-test, which determines whether regression coefficients are jointly significant. According to Plaintiffs, this is a deviation from standard economic protocol. Dr. Carter ran the t-test and found the VECM regression coefficients are not statistically significant. During his testimony, Dr. Goodwin gave reasons why the t-statistics results were not relevant to the reliability of his model. He also testified that he did not run a separate F-test because the R^2 values tested for the same concerns. Dr. Carter disputes Dr. Goodwin's claim, however, by opining that because Dr. Goodwin rearranged the equations, the coefficients jointly are not equivalent to zero as required by the F-test. Dr. Carter concludes that the R^2 tests and the F-test have lost their one-to-one correspondence, which means that Dr. Goodwin's R^2 results do not provide evidence that his model has explanatory power. The Court finds that Plaintiffs failed to demonstrate that the t-statistic and F-test are required in all economic analyses in order to be valid and accepted. While Dr. Carter's criticism is substantial, the Court concludes that Dr. Goodwin's reliance on the R^2 values to demonstrate reliability is sufficient.

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

Plaintiffs argue Dr. Goodwin's conclusion that the price change was temporary and only lasted 1 to 2 weeks ignores fundamental econometric and economic principles. Specifically, Plaintiffs point to academic articles stating that price shocks to commodity markets are permanently incorporated in the price and that price shocks to corn markets are long lasting and typically diminish over a 5 to 8 year period. This argument goes to the weight of the opinion but not the admissibility.

Plaintiffs' motion to exclude Dr. Goodwin's testimony is denied, with one exception. Dr. Goodwin's report criticizes the reports of Plaintiffs' experts Dr. Carter, Dr. Rao, and Anna King. It is the Court's understanding that Dr. Rao and Anna King provided expert opinions only with respect to individual claimant damages. In that event, Dr. Goodwin's reference to Mensik's damages or Plaintiffs' experts Dr. Rao and Anna King are not relevant to Class Plaintiffs' damages. Therefore, Paragraph 11 and paragraphs 87 to 99 shall be stricken as to the class action.

B. Dr. Walter N. Thurman

Syngenta named Dr. Walter N. Thurman as an expert to: (1) "evaluate Plaintiffs' claim that China's MIR162 import restriction caused a decline in demand for US corn; and (2) to evaluate Plaintiffs' claim that MIR162 events influenced corn future prices and, through that channel, influenced cash corn bids in local markets through the United States." Dr. Thurman is a William Neal Reynolds Distinguished Professor of Agricultural and Resource Economics at North Carolina State University. He received his Ph.D. in economics from the University of Chicago in 1984. He has lectured and published in the fields of agricultural, natural resource economics, and econometrics; studying, among other things, global transport of grain stocks and markets for feed grains. Dr. Thurman has not written any articles regarding China's agricultural policy or

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

China's grain markets and has never visited China's mainland. He testified that he is familiar with Chinese agricultural trade policy.

Dr. Thurman, opining that it was inappropriate to analyze China's MIR162 import restriction as a "purely bilateral phenomenon," outlined a four-region economic framework for analyzing this restriction.[3] Dr. Thurman created the framework to analyze supply and demand relationships to explain how imports and exports would adjust among four regions – the United States as exporter of corn, other exporting countries, China as importer, and other importing countries - after a decrease in exports from the U.S. to China. The model is based on the principle that trade disruptions between one export-import trade pair will induce adjustments in other trade flows. The framework indicates that there is little or no net damage from the U.S.-China trade restriction because U.S. corn would be redirected to other importing countries, while non-U.S. exporting countries would redirect their corn shipments to China until trade equilibrium is created. Dr. Thurman concludes that there is no evidence that demand for U.S. corn declined following China's ban on U.S. corn.

Plaintiffs move the Court to limit the testimony of Dr. Thurman. First, Plaintiffs seek to exclude paragraphs 42 through the first sentence of paragraph 59 on the basis that Dr. Thurman's analysis under the four-region framework does not meet the *Frye-Mack* standard. It is only when the proponent offers novel scientific evidence that the two-prong *Frye-Mack* standard applies. *Doe*, 817 N.W.2d at 164-65. Under the *Frye-Mack* standard, novel scientific evidence must (1) be generally accepted in the relevant scientific community and (2) have foundational reliability. *Goeb*, 615 N.W.2d at 814. The Court does not find that Dr. Thurman's four region framework is

[3] In an Order dated March 24, 2017, the Court denied Syngenta's motion to strike the supplemental declaration of Bruce Babcock. Dr. Babcock's declaration analyzes Dr. Thurman's four-region framework. Plaintiffs use this declaration in support of their argument that Dr. Thurman's four-region framework is novel and unreliable.

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

novel scientific evidence requiring analysis under the *Frye-Mack* standard. The framework analyzes international trade flows based on fundamental economic principles of supply and demand.

Plaintiffs argue Dr. Thurman's four region framework testimony should be excluded because it lacks foundational reliability. Specifically, Plaintiffs argue the four region framework is unreliable because Dr. Thurman did not affirmatively state that it is a reliable "method to calculate damages;" fails to use spatial equilibrium models; and fails to meet the *ceteris paribus* condition. The purpose of Dr. Thurman's analysis was to evaluate the trade disruption's impact on demand for corn and corn prices. The fact that Dr. Thurman did not use some other type or model of analysis, such as spatial equilibrium model, does not render his analysis unreliable. He uses the four region framework to demonstrate how a trade disruption would affect trade flows; he does not attempt to calculate the amount of the effect. He thus did not need to use an econometric model. Dr. Thurman also explained that he did not attempt to construct a model to which *ceteris paribus* might apply. Plaintiffs' criticism goes to the weight of Dr. Thurman's opinion.

Plaintiffs also claim Dr. Thurman did not apply his framework reliably because he selected the 2012/13 marketing year as the base year in his framework. Plaintiffs argue this was a non-typical year due to a drought and using a more typical year would create a different outcome. The 2012/13 year was the last full year preceding the China ban on U.S. corn. There was thus a reasonable basis to use that data. Dr. Thurman testified that he accounted for the drought by scaling his data. Dr. Thurman properly supported his use of the data. Plaintiffs' argument again goes to the weight of Dr. Thurman's opinion and not the admissibility.

Plaintiffs also seek to exclude portions of Dr. Thurman's report, paragraphs 142 through

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

155, in which he discusses "[e]conomic conditions in China," "China's agricultural trade policy," and "[u]ncertainty associated with Chinese demand." Plaintiffs argue that Dr. Thurman is not qualified to give an opinion on these issues because he lacks the requisite knowledge. The Court notes that this section of Dr. Thurman's report is his criticism of Dr. Babcock's analysis. Plaintiffs argue Dr. Thurman has never been to China, has not authored publications concerning issues particular to China, and his testimony showed a lack of knowledge regarding the economic liberalization in China. The Court finds that Dr. Thurman is sufficiently qualified as an agricultural economist and as someone familiar with Chinese agricultural trade policy to support his testimony. Plaintiffs will have the opportunity to cross-examine and challenge his knowledge. Plaintiffs' motion to limit Dr. Thurman's testimony is denied.

C. William Sheppard

Syngenta designated William Sheppard ("Sheppard") as a non-retained expert and fact witness. According to Syngenta, Sheppard will provide expert testimony regarding the benefits of Viptera to U.S. corn growers, including its effectiveness in increasing yield and combating pests; the demand for Viptera among U.S. corn farmers; and the impact on U.S. corn farmers if new US-approved biotechnology traits are unavailable.

Sheppard is a Missouri farmer who has grown Viptera. He has an undergraduate degree in economics. Sheppard does not have any special training in genetics, agronomy, agriculture, entomology, or statistics. He had an ownership stake in a grain elevator until 1981. Through about 2012, Sheppard was a seed dealer for Syngenta, along with a few other companies. His own farm was his primary customer. He sold seed to less than five individuals annually and made no profit. Sheppard's knowledge about Viptera comes from reading blogs and online articles along with his first-hand knowledge in growing Viptera and comparing the different

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

varieties of corn that he grows. He has never performed any independent investigation regarding the benefits or demands for Viptera among U.S. farmers.

Plaintiffs seek to exclude Sheppard's testimony. Plaintiffs contend that Sheppard lacks the necessary qualifications to provide expert opinions regarding the benefits of Viptera, U.S. farmers' demand for Viptera, and biotechnology in general. Additionally, Plaintiffs assert that Sheppard's opinions are inadmissible because they lack foundational reliability and are not helpful to the jury.

The Court agrees that Sheppard lacks sufficient knowledge through formal education, training, or occupational experience on the issues of biotechnology and economics. Sheppard's only occupational and practical experience with Viptera is derived from growing corn and selling seed to a handful of other farmers in a limited geographical area. Any knowledge outside this geographical region is derived from reading blogs and online articles. His opinions are not based on any independent investigation, analysis, or other research regarding Viptera's benefits or the demand for this seed by U.S. farmers. Sheppard cannot repeat hearsay that he learned from Syngenta as his own expert opinion. Sheppard's limited experience as a seed dealer with only a few customers to whom he sold seed at cost does not provide a reliable basis to offer an opinion on the demand for Viptera. Finally, Sheppard is not qualified to opine regarding the importance and impact of biotechnology on U.S. farmers and the industry in general. He has no training and has conducted no industry-wide research.

Plaintiff's motion to exclude the expert testimony and opinions of Sheppard is granted. Although not allowed to testify as an expert, however, Sheppard may testify as a fact witness and provide evidence, to the extent relevant, regarding his first-hand experiences with Viptera.

D. Dr. Bruce A. Babcock

Dr. Bruce A. Babcock is an agricultural economist. Plaintiffs retained Dr. Babcock to determine market-loss damages to the Minnesota class. Dr. Babcock is a Professor of Economics at Iowa State University's Biobased Industry Center who has studied commodity markets, particularly the corn market, for more than 25 years. He uses a competitive storage model to demonstrate the economic impact of the Chinese ban. Applying the model, Dr. Babcock creates a demand curve for each use of corn and then determines the magnitude of the shift in corn demand that the ban represents. He determines what the market price would have been but-for China's ban on U.S. corn. The difference between the but-for market price and the actual market price for corn is the per-bushel market loss. He then multiplies the per-bushel market loss by the number of bushels in the Minnesota class.

Using a regression analysis, Dr. Babcock found that 88% of daily variability in local prices "is explained by changes in futures prices." He concludes that, "a change in the demand for U.S. corn caused by China's ban on corn imports would be felt equally in all corn growing areas, because such a change in demand for U.S. corn would be reflected in futures prices and local corn prices are primarily determined by futures prices." Although the basis may vary based on local factors, a change in the futures price will result in a relatively uniform change in all markets.

Syngenta moves the Court to exclude Dr. Babcock's testimony and report. Syngenta argues Dr. Babcock's testimony should be excluded because it is based on unsupported assumptions that a decrease in Chinese demand for U.S. corn resulted in a global decrease as well; that the decrease in Chinese demand was entirely attributable to the presence of MIR162; and that the decrease in demand was of a certain amount and would last a certain number of

years. Dr. Thurman identifies over thirty additional assumptions underlying Dr. Babcock's opinion. Syngenta criticizes the sources of data Dr. Babcock used and cites evidence that Dr. Babcock did not use and that purportedly contradicts the assumptions. Syngenta questioned Dr. Babcock about his model and the data used and retained experts to review and Dr. Babcock's report. Dr. Babcock testified about the basis for the assumptions and alternatives that he considered. Syngenta conceded that some assumptions may be necessary and permissible for a methodology that estimates a price impact. The Court is not persuaded that these assumptions are so unfounded as to make his opinions impermissibly speculative. Syngenta's arguments bear on the weight to be given Dr. Babcock's opinion.

Syngenta argues Dr. Babcock's regression analysis fails because it does not test what it purports to analyze. Syngenta argues that because Dr. Babcock pooled the local price data for his regressions analysis, he is unable to determine whether the relationship between changes in CBOT prices and changes in local prices were different among localities or time periods. Plaintiffs indicate the regression analysis over the entire dataset was meant to show the relative importance of changes in basis in determining local prices compared to changes in futures. Dr. Babcock performed his analysis on a state-by-state basis. Syngenta's argument for smaller pools goes to the weight to be afforded the analysis. Dr. Babcock's testimony and report are sufficiently reliable and Syngenta's motion to exclude is denied.

E. Dr. Colin A. Carter

Plaintiffs retained Dr. Colin A. Carter, an agricultural economist, to provide an opinion regarding the effects of China's rejection of MIR162 corn on the U.S. corn market. Dr. Colin A. Carter is a Distinguished Professor of Agricultural and Resource Economics at the University of California, Davis. He has studied agricultural commodity markets and has expertise in China's

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

agricultural economy. Dr. Carter conducted an event study to measure the impact of China's ban on U.S. corn in November 2013 on U.S. corn. First, he identified a structural break in September 2013 in the relationship of corn and sorghum, which is a close feed substitute for corn but has a lower yield and no GM varieties. At this point, corn went from commanding a 10% premium over sorghum to an 8% price discount. He opines that the abrupt change in relative prices was a signal that changes were taking place in the global feed grain market and that it is not unusual for a well-functioning informationally efficient market (such as the U.S corn market) to anticipate a forthcoming shock to the market. He used September 2013 as his event date for the purposes of his analysis and damages computation.

Dr. Carter then performed a correlation analysis on ten separate locations to quantify the relationship between corn prices at different locations, relative to an index of futures prices for other commodities. He found that all of the markets have highly correlated prices, meaning that "the demand shock caused by the Chinese *de facto* embargo would have a common impact" on all local prices. Dr. Carter opines that "U.S. corn farmers who priced their corn after August 2013 have received a lower price for their corn than they would have received if China's imports of U.S. corn had not effectively stopped." He calculated the drop in price due to the contamination and determined that damages will continue for five years before dissipating. Dr. Carter calculates aggregate damages for the class using the total bushels marketed in the class.

Syngenta argues that Dr. Carter's event study is unreliable and a novel methodology. Syngenta argues that Dr. Carter improperly "cherry-picked" the September 2013 date without a sufficient basis. Dr. Carter, however, provided a sufficient basis and reasoning for his use of the September 2013 date. Dr. Carter tested for a structural break during the period between June 2013 when China rejected approval of MIR162 and November 2013 when China rejected

shipments of corn. The September 2013 date was based on the increase in milo exports to China and the historic break between corn and milo prices. Syngenta argues that there is no evidence that the market anticipated the later event of corn rejection in November 2013. This is a fact-based argument that is a dispute for the jury at trial. The use of September 2013 is not lacking in foundation. The Court also rejects Syngenta's argument that Dr. Carter's approach to identifying the structural break was so nonconforming that it made his event study a novel theory requiring application of the *Frye-Mack* standard.

Syngenta also argues that Dr. Carter failed to consider and disaggregate other possible causes of the drop in corn prices that occurred in September 2013, both in his structural break analysis and in his event study. Specifically, Syngenta argues that Dr. Carter failed to disaggregate China's Tariff Rate Quotas (TRQ) for public and private companies; failed to control for the USDA World Agricultural Supply and Demand Estimates (WASDE) report; and failed to consider China's move to diversify. Dr. Carter testified, however, that he did consider and reject the particular alternatives proffered by Syngenta. Syngenta also criticizes Dr. Carter's use of certain inputs relating to weekly or monthly data and market index containing wheat, crude oil, and hogs. Dr. Carter provided the reasoning underlying his decisions to use these inputs. Syngenta's challenges go to the weight of the credibility given to the opinion and not the admissibility.

Dr. Carter determined that damages will last until 2018. Syngenta argues that Dr. Carter's opinion that the effect on prices from the Chinese embargo on U.S. corn would last that long is speculative, as Dr. Carter did not perform a separate analysis to determine the duration of the damages period and his event study analyzes the effects in one month. Dr. Carter provided a sufficient basis for his use of a five year period. Dr. Carter's opinion is based on the principle

that the prices of commodities are non-stationary, meaning they do not revert back to their old levels after receiving a shock. The opinion is supported by Dr. Carter's decay figures, the rate of dissipation in other cases, and academic literature. Thus, the Court concludes that Dr. Carter's opinions are not impermissibly speculative, and Syngenta's criticisms regarding that support go to the weight of the opinions and not to their admissibility.

Syngenta argues that Dr. Carter has improperly assumed that global demand for U.S. corn decreased as a result of the Chinese embargo on such corn. Plaintiffs argue that Dr. Carter's analysis does not rely on the assumption but the information is included in his report as background information. As noted above in Section IV.D, this is a permissible assumption that an expert may rely upon.

Syngenta argues that Dr. Carter's opinion that damages increased between August 2014 and February 2015 due to China's ban on U.S. DDGs should be excluded because it is based on an unsupported assumption that the entirety of the U.S. DDGs supply that was not exported to China during this period was backed up to be used on U.S. farms, further decreasing demand for corn. Syngenta argues that Dr. Carter did not perform any investigation to support his opinion. Dr. Carter, however, testified that he looked for a surge in exports to other markets but found no evidence that U.S. DDGs were diverted to another market. Thus, Dr. Carter's opinion is not lacking in foundation on this issue.

Syngenta argues that Dr. Carter is not sufficiently qualified to offer certain opinions relating to China's regulatory approval system and Syngenta's decision to commercialize Viptera. Specifically, Syngenta challenges his opinions that China has a functioning, predictable, and science-based regulatory system for approving biotech events; that system is responsive to market demands; and that Syngenta's cultivation application delayed import

27-CV-15-12625
Filed in Fourth Judicial District Court
8/17/2017 2:11 PM
Hennepin County, MN

approval and violated a Chinese policy. Syngenta asserts these topics are outside of Dr. Carter's expertise in the field of the economics of agricultural commodity markets. Dr. Carter has traveled to China extensively concerning his work on the economics of Chinese agriculture and that he has authored works on China and its institutions. As the Court found in Section III.B with respect to Dr. Thurman, Dr. Carter is sufficiently qualified.

Dr. Carter is also qualified as an economist to render his opinion disputing Syngenta's position that the benefits of Viptera outweigh any costs. However, the Court agrees that Dr. Carter's reference to Syngenta's net worth found in footnote 111 to his report is not relevant to his opinion and should be excluded.

Finally, the Court rejects Syngenta's argument that Dr. Carter improperly opined on the state of mind of Syngenta or others. Upon review of disputed paragraphs, the Court finds that Dr. Carter was commenting on certain evidence. Any opinions included therein are sufficiently related to Dr. Carter's economic opinions and supported by the evidence.

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:
Daniel S. Mensik (Orig. Case No. 27-CV-15-16826)
Minnesota Class Action (Orig. Case No. 27-CV-15-12625)

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Syngenta's motion to exclude portions of the expert report and testimony of Dirk Maier.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Syngenta's motion to exclude portions of the export report and testimony of Dirk Maier is granted. Pages 17 through 30 of Dr. Maier's report are excluded.

2. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 11, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Plaintiffs retained Dirk Maier ("Dr. Maier") to provide information and opinions regarding the interconnected grain marketing chain. Syngenta does not oppose this testimony. Additionally, Dr. Maier's expert report contains a dispersion model demonstrating the presence of MIR 162 on a county and state level and an overall conclusion regarding the presence of MIR 162 throughout the entire marketing chain. Syngenta seeks to exclude these opinions.

II. Expert Report

Dirk Maier has a B.S., M.S. and Ph.D. in Agricultural Engineering from Michigan State University. There is no dispute that Dr. Maier is an expert in the grain-handling industry with respect to production through export; having taught, lectured, and consulted on issues regarding grain handling and the grain marketing chain. Dr. Maier's expert report contains information and opinions regarding the interconnected nature of the grain marketing chain, a dispersion model showing the presence of MIR 162 in certain states from the years 2011 through 2014, and, based on the wide-spread presence of MIR 162, the opinion that it was found on farms, and in country, terminal and export elevators across the United States.

Dr. Maier's dispersion model is based on the presence of MIR 162 from 2011 through 2014

on a county and state level in Iowa, Minnesota, Nebraska and Ohio. In making his calculations, Dr. Maier did not consider adventitious, or cross-pollination, of MIR 162 and assumed that: (1) every seed was planted in the county in which it was sold; and (2) all corn planted was harvested. Using these assumptions, Dr. Maier determined the estimated number of acres containing Syngenta MIR 162 corn simply by multiplying the number of seed bags containing MIR 162 which were sold[1] in each county by an estimated 80,000 seeds per bag and dividing the result by an estimated 35,000 seeds per acre. Using USDA values to determine the average county yields, Dr. Meier multiplied this figure by the number of estimated acres of Syngenta MIR 162. Dr. Meier used this figure as an estimate for the amount of Viptera which was harvested in certain counties from 2011 to 2014.[2] Dr. Meier then estimated the percentage of MIR 162 in various corn crops in certain counties between 2011 and 2014; using tables and graphs to illustrate his findings.

Given the levels of Syngenta MIR 162 and based on his knowledge of the grain marketing chain, Dr. Meier opined that MIR 162 was present on farms, and in country, terminal and export elevators across the nation; reaching the entire marketing chain including, including all elevators and exports to China. In providing this opinion, Dr. Meier performed no analysis or investigation of various farms or elevators. Instead, this opinion was based solely on his knowledge of the grain marketing chain and the movement of corn through this chain.

In moving to exclude pages 17 through 30 of Dr. Maier's expert report, along with the associated testimony, Syngenta contends that his opinions regarding the presence of MIR 162 in the corn supply are not relevant or helpful to the jury while his opinion that MIR 162 was present throughout all country, terminal and export elevators is both unreliable and unhelpful.

---

[1] This figure is available from Syngenta records.
[2] Daniel Mensik did not reside in any of these counties.

III. Legal Analysis

To be admissible, expert testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard[3]." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.' " *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). To determine if there is foundational reliability, the court

[3] Dr. Meier's dispersion model is based on estimates and simple calculations while his opinion regarding the presence of MIR 162 in all elevators throughout the country is based on his expertise regarding the grain marketing chain. Therefore, Dr. Maier's opinions do not warrant a *Frye-Mack* analysis.

must "(1) analyze the proffered testimony in light of the purpose for which it is being offered, (2) consider the underlying reliability, consistency, and accuracy of the subject about which the expert is testifying, and (3) determine if the proffered evidence is reliable." *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 638 (Minn. Ct. App. 2014) (citing *Doe* at 167–68).

From sources other than Dr. Meier, the jury will have information: (1) regarding the number of bags of Viptera seed which were sold between 2011 and 2014; (2) that Viptera was widely commercialized beginning in 2011; and (3) that MIR 162 was in the corn shipments sent to, and rejected by, China. Given this other information, which is readily available to the jury, Dr. Meier's dispersion model is marginally relevant, not helpful to the jury, and cumulative. Therefore, this model, and the opinions based thereon, shall be excluded. Dr. Maier's opinion that the widespread use of Viptera caused the MIR 162 trait to be present in every country, terminal and export elevator across the nation was not based on any analysis or review of the different elevators and is unreliable. Additionally, any opinion that the MIR 162 trait was present on a widespread basis throughout the grain marketing chain is not disputed. Therefore, this opinion is cumulative and not helpful to the jury.

IV. Conclusion

Dr. Maier's opinions regarding the dispersion of MIR 162 in a few states and its presence in the grain marketing chain from 2011 through 2014 is marginally relevant at best; lacks foundational reliability, is cumulative, and is unhelpful to the jury's decision in this case. For these reasons, Syngenta's motion to exclude pages 17-30 of Dr. Maier's report, and the related testimony, is granted.

EXHIBIT 66

** CONFIDENTIAL **

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:
Daniel S. Mensik (Orig. Case No. 27-CV-15-16826)
Minnesota Class Action (Orig. Case No. 27-CV-15-12625)

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Syngenta's motion to exclude the expert report and testimony of Kevin Latner.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Syngenta's motion to exclude the export report and testimony of Kevin Latner is granted in part and denied in part.

2. Paragraphs 23, 26, 49-56, 137-139, 293-295, 300, 332, 480, 493-496, 512, and 560 of his expert report are excluded together with everything but the first sentence of paragraph 42 and the last sentence of paragraph 343 . The admissibility of paragraphs 26, 512 and 560 may be revisited if there is a punitive damages phase. Syngenta's motion is otherwise denied.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 10, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera; and it rejected all shipments of US corn. Syngenta later commercialized Event 5307, "Duracade" prior to approval from China. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera, along with the release of Duracade, was premature, that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Plaintiffs retained Kevin Latner as an expert to provide opinions regarding China's regulatory approval system, whether it was functioning, and to determine whether Syngenta fully and transparently weighed the risks to its stakeholders of commercializing Viptera, and Duracade, prior to Chinese regulatory approval. Syngenta seeks to exclude portions of Mr. Latner's opinons.

II. Expert Report

Kevin Latner has a joint degree in law and agricultural economics from the University of California, Davis; focusing on international trade and policy. Mr. Latner has worked as a delegate for the United States Department of Agriculture ("USDA") to the World Trade Organization; in that capacity he has negotiated trade agreements on behalf of the USDA, and he has provided trade policy support and market analysis of grains and biotechnology. Since leaving the USDA, he has met on a regular basis with Chinese regulators to discuss China's agricultural policies, and he has provided market access support for a variety of clients.

Mr. Latner provided the opinions that: (1) China had a functioning regulatory system at the time Syngenta commercialized the genetic traits at issue in this litigation; (2) Chinese regulators are

clear about the application requirements and convene an independent panel of scientists to review applications and assess the risks of new technologies; (3) the process for seeking approval for biotechnology products in China is predictable, involving three stages for application approval; (4) the average timeline for approval of a genetically modified organism ("GMO") in China is approximately 28 months; (5) Syngenta has discussed the three-stage approval process and that the average time for approval of a GMO was approximately 28 months or longer; (6) China's review and analysis of Syngenta's Viptera application is further evidence of a functioning regulatory system; (7) Syngenta repeatedly made public representations as to the time for Chinese approval of MIR 162 that are inconsistent with the normal approval timelines for such products; (8) if Syngenta truly believed that China was not a predictable or functioning regulatory system, then any representation regarding an anticipated time for approval of new GMO would be unreasonable; (9) based on the application process followed by Syngenta, its public representations regarding China's expected import approval of MIR 162 were unreasonable; (10) Syngenta failed to perform a rigorous risk assessment that weighed the benefits of introducing Viptera and Duracade prior to Chinese approval; (11) by commercializing Viptera and Duracade prior to Chinese approval, Syngenta "knowingly and consciously disregarded" the interests of its stakeholders and the risks to these stakeholders from such commercialization and its failure to transparently disclose these risks.

Syngenta seeks to exclude portions of the report and testimony of Kevin Latner. Specifically, Syngenta seeks to exclude paragraphs 22-23, 25-26, 42, 47, 79-145, 226, 236, 242, 247-255, 272-273, 276-279, 282-284, 293-295, 298-301, 305, 308-310, 312, 323-324, 326-332, 337-338, 343-344, 349, 356, 358-366, 370-371, 375-379, 387-450, 470-480, 482-501, 508, and 512-560 of Mr. Latner's report and accompanying testimony. While conceding that Mr. Latner is qualified to testify regarding China's regulatory system, Syngenta contends that Mr. Latner has

insufficient qualifications to opine on issues concerning the BIO policy, Syngenta's internal approval processes, Syngenta's knowledge of certain events, and the views of the grain trade concerning MIR 162. Syngenta also contends that certain opinions expressed by Mr. Latner are irrelevant and not helpful to the jury. The Court agrees in part.

III. Legal Analysis

To be admissible, expert testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). The Court considers Mr. Latner's opinions under Minn. R. Evid. 702; not by the *Frye-Mack* standard.

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985). Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.' " *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011)(quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

Kevin Latner has experience with China's regulatory approval process and Chinese regulators and has experience working with the BIO policy. Therefore, Mr. Latner is qualified to provide the majority of the opinions contained in his report. Mr. Latner will be subject to cross-examination and the jury will determine the credibility and weight to be given his testimony. Mr. Latner's expert report, however, contains certain statements which should be excluded as irrelevant, not helpful to the jury, or only relevant to the issue of punitive damages, if this case gets to that bifurcated stage. After a thorough review of Mr. Latner's report, paragraphs 23, 26, 49-56, 137-139, 293-295, 300, 332, , 480, 493-496, 512, and 560 of his expert report are excluded together with everything but the first sentence of paragraph 42 and the last sentence of paragraph 343. Portions of 512 and 560 may be revisited if there is a punitive damages phase. References to

"prematurely" as "factual" statements in various paragraphs of the report are also stricken. This does not preclude Latner's ultimate opinion that Syngenta prematurely commercialized the Viptera and Duracade seeds.

IV. Conclusion

Syngenta's motion to exclude the testimony of Kevin Latner is granted in part and denied in part. Kevin Latner is sufficiently qualified to provide the opinions contained in his report. The jury will decide the credibility and weight to be given to his testimony. Paragraphs 23, 26, everything but the first sentence of 42, 49-56, 137-139, 293-295, 300, 332, the last sentence of 343, 480, 493-496, 512, and 560 of his expert report are excluded as irrelevant, or not helpful to the jury. Paragraphs 26, 512 and 560 may be revisited if there is a punitive damages phase.

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:
Daniel S. Mensik (Orig. Case No. 27-CV-15-16826)
Minnesota Class Action (Orig. Case No. 27-CV-15-12625)

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Plaintiffs' motion to exclude the expert report and testimony of Philip A. Shull.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion to exclude the export report and testimony of Philip A. Shull is granted in part and denied in part.

2. Paragraph 10(7) in the Summary of Opinions, together with paragraphs 42, 58, 76, 136 – 142, and 175-179 in the expert report of Philip A. Shull are excluded. Plaintiffs' motion is denied in all other respects.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 10, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera; and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Syngenta retained Philip A. Shull as an expert to analyze China's biotechnology regulatory system and determine whether: (1) China had a functioning regulatory system; and (2) China was a key importer of the corn when Syngenta commercialized Viptera. Mr. Shull was also asked to provide opinions regarding China's food security policy, its impact on China's trade policy, and whether this policy would lead China to become a consistent and reliable importer of corn. Plaintiffs have made a motion to exclude the expert report and testimony of Mr. Shull

II. Expert Report

Mr. Shull received an undergraduate degree in political science with an emphasis on foreign policy and international relations from Miami University. He also earned a masters' degree at the Food Research Institute at Stanford where he studied agricultural sustainability and food security in developing countries. Mr. Shull served as an official in the US Department of Agriculture ("USDA") for over 30 years. He had multiple USDA assignments both here and abroad during his long tenure in public service. In China, Mr. Shull worked as the Director of the Agricultural Trade office for the US Embassy in Beijing from 1987 to 1988; the Director of the Agricultural Trade Office for the US Consulate in Guangzhou from 1988 through 1992; the Director of the Regional

Agricultural Trade Office at the US Consulate in Hong Kong from 2006 to 2010; and the Minister Counselor for Agriculture at the US Embassy in Beijing from 2014 through 2016.

In his expert report, Mr. Shull opines that: (1) China did not have a functioning regulatory system at the time Syngenta commercialized Viptera; (2) China's food security policy impacts China's demand for US corn; (3) the 2012 political transition in China had a serious impact on the approval process for biotechnology traits; (4) Syngenta's application of the process of requiring cultivation approval of MIR 162 in China was not unique; (5) China was not a "key market" for US corn imports in the years leading up to 2010 when Syngenta commercialized Viptera, or in 2011 when Viptera was sold to farmers for planting; (6) the circumstances under which China rejected the corn shipments in November 2013 suggest that the rejection was pre-textual rather than based on scientific concerns; and (7) China should not be given control over advances in US corn seed technology; or, in other words, a veto on the commercialization of GMO corn seeds by its asynchronous approval process.

Plaintiffs' contend that Mr. Shull, lacking a science or economics degree, is not qualified to make opinions regarding either China's regulatory system or the BIO policy. The Court disagrees. Plaintiffs also contend that many of Mr. Shull's opinions are irrelevant, prejudicial, and not helpful to a jury. The Court agrees in part, and disagrees in part.

III. Legal Analysis

The Court considers this analysis under Minn R. Evid. 402 and 702; not as a *Frye-Mack* matter. To be admissible, expert testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency

to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). This is not an opinion involving *Frye-Mack.*

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985).

Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.' " *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting

State v. Helterbridle, 301 N.W.2d 545, 547 (Minn.1980)). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

Although Mr. Shull has substantial experience interacting with Chinese regulators and the Chinese regulatory system as a high-ranking official with the USDA, some of it pre-dated and some post-dated the events in this case. Nevertheless, he is clearly qualified to provide the majority of the opinions given in his report. Any questions regarding his education or experience may be raised in cross-examination. The jury will determine the credibility and weight to be given to Mr. Shull's opinions.

Although qualified to testify, Mr. Shull's opinion that China should not control advances in US corn seed technology, or have a "veto" on the timing of the release of GMOs approved for release by US regulatory agencies, is prejudicial and not relevant. Therefore, paragraph 10(7), along with paragraphs 175-179 are excluded. Additionally, Mr. Shull provides several examples of China using technical barriers to restrict imports other than corn. These examples are irrelevant and unhelpful. Therefore, paragraphs 76 and 136 through 141 are excluded. Finally, Mr. Shull provided examples concerning the application of China's regulatory policy that occurred well after China's acceptance of Viptera in 2014 or do not involve corn. These examples are irrelevant and unhelpful and paragraphs 42, 58, and 142 of Mr. Shull's expert report are also excluded by Minn. R. Evid. 702.

IV. Conclusion

Philip Shull's is qualified to provide the opinions contained in his report. Opinions that China should not be given control over advances in US corn seed technology shall be excluded as both prejudicial and irrelevant. Additionally, opinions regarding events occurring well after

China's acceptance of Viptera or involving products other than corn are irrelevant. Therefore, paragraphs 10(7), 42, 58, 76, 136-142, and 175-179 of Mr. Shull's report are excluded. Plaintiffs' motion to exclude the testimony of Philip Shull is otherwise denied.

STATE OF MINNESOTA

COUNTY OF HENNEPIN

DISTRICT COURT

FOURTH JUDICIAL DISTRICT

In re: Syngenta Litigation

Case Type: Civil Other
Hon. Thomas M. Sipkins

This Document Relates to:
Daniel S. Mensik (Orig. Case No. 27-CV-15-16826)
Minnesota Class Action (Orig. Case No. 27-CV-15-12625)

FILE NO. 27-CV-15-3785

ORDER

The above-entitled matter came before the Honorable Thomas M. Sipkins, Judge of District Court, on March 17, 2017, pursuant to Plaintiffs' motion to exclude the expert report and testimony of Alan McHughen.

Attorneys Lewis A. Remele, Jr., Daniel E. Gustafson, Richard M. Paul III, Francisco Guerra, IV, William R. Sieben, Robert K. Shelquist, Aram V. Desteian, and Rebecca A. Peterson appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Bridget K. O'Connor, Steven L. Schleicher, and D. Scott Aberson appeared on behalf of Syngenta.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion to exclude the export report and testimony of Dr. Alan McHughen is granted in part and denied in part.

2. The last four sentences of paragraph 18, the parenthetical statement found in paragraph 20, all but the last two sentences of paragraph 22, and the last sentence of paragraph 29 of Dr. McHughen's report are excluded along with paragraphs 23, 25, 27, 28, 99, 124, 129, 134-136 and 140-143.

3. The attached Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: April 11, 2017

Thomas M. Sipkins
Judge of District Court

** CONFIDENTIAL **

MEMORANDUM OF LAW

I. Introduction

After receiving approval from U.S. regulatory agencies, Syngenta broadly commercialized MIR 162, "Viptera," a genetically modified seed, prior to receiving regulatory approval from China. In November 2013, China began to enforce its "zero tolerance" policy regarding corn containing Viptera; and it rejected all shipments of US corn. Plaintiffs are corn farmers alleging that Syngenta's widespread release of Viptera was premature; that Syngenta knew that its decision could cause a trade disruption; that such rejection caused corn prices to drop in the United States; and that plaintiffs were harmed by that market effect.

Syngenta retained Alan McHughen to explain and offer opinions related to the US regulatory system for biotechnology, China's "zero tolerance" policy and the benefits of Viptera. Dr. McHughen was also asked to review and comment on the export reports of Dr. Joseph Keaschall and Dr. Dirk Maier. Plaintiffs have made a motion to exclude the expert report and testimony of Dr. McHughen.

II. Expert Report

Alan McHughen is a geneticist with a bachelor's degree in biology and biochemistry from Dalhousie University in Halifax Canada, and a Ph.D. in developmental botany from Oxford University. Dr. McHughen is currently working as a biotechnology specialist and geneticist at the University of California, Riverside. As a molecular geneticist with an interest in biosafety, crop improvement and environmental sustainability, Dr. McHughen helped develop regulations governing the safety testing and release of genetically engineered crops for the United States. Dr. McHughen has also served on US National Academy of Sciences panels investigating the environmental effects of transgenic plants and the safety of genetically modified foods.

In his report, Dr. McHughen describes genetic modification of crops, the safety of

genetically modified crops, the process for getting regulatory approval in the United States and specifically Syngenta's petition for MIR 162 approval; and the benefits of MIR 162. Plaintiffs seek to exclude the report and testimony of Dr. McHughen. Plaintiffs contend that Dr. McHughen is not qualified to testify regarding the Chinese regulatory system or other economic and social matters. Plaintiffs also contend that Dr. McHughen's testimony regarding the benefits of genetically modified foods other than MIR 162 lacks relevance. Finally, Plaintiffs contend that Dr. McHughen's report contains misleading, irrelevant or unsupported statements regarding the United States Department of Agriculture-Animal and Plant Inspection Service ("USDA-APHIS").

III. Legal Analysis

To be admissible, expert testimony must be relevant and helpful to the trier of fact. *Goeb v. Tharaldson,* 615 N.W.2d 800, 814 (Minn.2000) (citing *Minn. R. Evid. 402 and 702*). The proponent of expert evidence bears the burden of proving its admissibility. *Id.* Generally, all relevant evidence is admissible. *Minn. R. Evid. 402.* Evidence is relevant if it has "any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence." *Minn. R. Evid. 401.* "Expert testimony is inadmissible if it is irrelevant." *Doe v. Archdiocese of St. Paul and Minneapolis*, 817 N.W.2d 150, 164 (Minn. 2012). Even if relevant, evidence "may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." *Minn. R. Evid. 403.*

Expert testimony must also satisfy the requirements of Rule 702 of the Minnesota Rules of Evidence. Under a Rule 702 analysis, expert testimony is admissible if: "(1) the witness is qualified as an expert; (2) the expert's opinion has foundational reliability; (3) the expert

testimony is helpful to the jury; and (4) if the testimony involves a novel scientific theory, it must satisfy the *Frye-Mack* standard." *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011). The Court considers Mr. Latner's opinions under Minn. R. Evid. 702; not by the *Frye-Mack* standard.

To be qualified, an expert must have "both sufficient scientific knowledge and practical experience with respect to [the] subject matter of the offered testimony." *Broehm v. Mayo Clinic Rochester*, 690 N.W.2d 721, 726 (Minn. 2005). Theoretical expertise is not sufficient to establish the competency of an expert witness. *Fiedler v. Spoelhof*, 483 N.W.2d 486, 489 (Minn. Ct. App. 1992), *rev. denied* (Minn. Jun. 10, 1992) (citing *Lundgren v. Eustermann,* 370 N.W.2d 877, 880 (Minn. 1985)). "There must also be some practical knowledge or experience." *Lundgren v. Eustermann*, 370 N.W.2d 877, 880 (Minn. 1985).

An analysis of foundational reliability "requires the court to: (1) analyze the proffered testimony in light of the purpose for which it is being offered, (2) consider the underlying reliability, consistency, and accuracy of the subject about which the expert is testifying, and (3) determine if the proffered evidence is reliable." *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 638 (Minn. Ct. App. 2014) (citing *Doe* at 167–68). Expert testimony "is not helpful if the expert opinion 'is within the knowledge and experience of a lay jury and the testimony of the expert will not add precision or depth to the jury's ability to reach conclusions.'" *State v. Obeta*, 796 N.W.2d 282, 289 (Minn. 2011) (quoting *State v. Helterbridle,* 301 N.W.2d 545, 547 (Minn.1980)). Determinations regarding the weight and credibility to be given to a particular witness are decided by a finder-of-fact and not by the court. *Pfeiffer ex rel. Pfeiffer v. Allina Health Sys.*, 851 N.W.2d 626, 639 (Minn. Ct. App. 2014).

As a geneticist, Dr. McHughen is qualified to provide testimony regarding the process of creating a genetically modified organism, including the history of genetic modification and the

process of getting a genetically modified trait approved in the United States. Dr. McHughen, however, has no prior experience dealing with China's regulatory process. Additionally, Dr. McHughen is not qualified to testify about economic matters or the social costs involved in delaying commercialization of a genetically modified trait. Plaintiff also argues that certain portions of Dr. McHughen's report are lacking in foundation, irrelevant, or unhelpful to the jury. The Court agrees in part.

Following an extensive review of Dr. McHughen's report, and given Dr. McHughen's specific qualifications, the Court is excluding those portions of paragraphs 18, 20, 22, and 29 which contain references to China's regulatory systems or social costs, along with paragraphs 23, 27, and 28. Based on the lack of foundational reliability, relevance or helpfulness to the jury, the Court is excluding paragraphs 25, 99, 124, 129 and 134 of Dr. McHughen's report. Finally, given the partial exclusion of Dr. Maier's expert testimony, and the limitations placed on Dr. Keaschall's opinions, the Court is excluding paragraphs 135-136 and 140-143 of Dr. McHughen's expert report and testimony as irrelevant.

IV. Conclusion

Plaintiffs' motion to exclude the expert testimony of Dr. Alan McHughen is granted in part and denied in part. Given Dr. McHughen's qualifications and/or a lack of foundational reliability, relevance or helpfulness to the jury, the Court is excluding the last four sentences of paragraph 18, the parenthetical statement found in paragraph 20, all but the last two sentences of paragraph 22, the last sentence of paragraph 29 plus paragraphs 23, 25, 27, 28, 99, 124, 129, 134-136 and 140-143 in their entirety. In all other respects, Plaintiffs' motion is denied.

FILE NO. 27-CV-15-3785

ORDER

**** CONFIDENTIAL – FILED UNDER SEAL ****

The above-entitled matter came on for hearing before the Honorable Thomas M. Sipkins, Judge of District Court, on September 16, 2016, pursuant to Plaintiffs' motion for class certification of a Minnesota producer (farmer) class.

Attorneys Daniel E. Gustafson, William R. Sieben, Amanda M. Williams, and Karla M. Gluek appeared on behalf of Plaintiffs.

Attorneys Patrick F. Philbin, Patrick Haney, Edwin J. U, and Michael D. Jones appeared on behalf of Syngenta.

Attorney Michael K. Johnson appeared on behalf of four putative class members.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

1. Plaintiffs' motion for class certification is granted. The Court certifies the following class:

> All Minnesota producers that priced corn after September 2013. Excluded from the class are any corn producers that purchased or planted corn containing the MIR 162 trait (including Duracade); the Court, and its employees; Syngenta, and its parents, subsidiaries, affiliates, employees and directors during the relevant time period. A "producer" is a person or entity listed as a producer on an FSA-578 form filed with the United States Department of Agriculture.

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

2. Leroy Edlund, Roger Ward, Grant Annexstad, and Nathan Thompson are designated as class representatives.

3. Daniel E. Gustafson and William R. Sieben were previously appointed as Co-Lead Class Counsel on an interim basis, and will continue in their leadership roles as Co-Lead Class Counsel.

4. On or before November 18, 2016, Co-Lead Class Counsel shall submit a proposed class notice to the Court for approval along with a proposed plan for providing notice to class members.

5. The accompanying Memorandum of Law is incorporated herein.

BY THE COURT:

Dated: 11-3-2016

Thomas M. Sipkins
Judge of District Court

27-CV-15-13285

Hennepin County, MN

MEMORANDUM OF LAW

I. Factual and Procedural History[1]

Defendant Syngenta Seeds Inc. (n/k/a Syngenta Seeds LLC) ("Syngenta")[2] is a subsidiary of Syngenta Corporation with its principal place of business in Minnetonka, Minnesota. Syngenta develops, produces, and sells corn seed. In the years before 2007, Syngenta developed a new genetically modified ("GM") corn trait called MIR 162 designed to control above-ground corn pests. Syngenta commercialized corn seed with the MIR 162 trait under the brand name Agrisure Viptera ("Viptera") and later Agrisure Duracade ("Duracade") which added Event 5307.

On August 31, 2007, Syngenta applied to the United States Department of Agriculture ("USDA") to obtain approval for the sale of products containing MIR 162. The USDA deregulated MIR 162 in April 2010, which allowed Syngenta to sell Viptera to U.S. farmers. Syngenta applied for import approval of Viptera from China in March 2010. While Syngenta's application was pending, Viptera entered the U.S. corn supply and shipments were sent to China. Beginning in November 2013, China rejected shipments of corn that tested positive for the presence of MIR 162. China eventually approved the import of Viptera in December 2014. In 2014, Syngenta applied to China for import approval of Duracade. To date, China has not approved Duracade for import.

Farmers throughout the United States claim that Syngenta was negligent in its commercialization of Viptera and Duracade. They allege that in its USDA petition and other communications, Syngenta falsely represented: (1) that there should be no effects on the U.S.

---

[1] The recitation of factual findings is record evidence material to the Court's rigorous analysis of the class certification requirements but not conclusive findings of fact at this pretrial stage.

[2] There are six Syngenta-related companies identified as Defendants in this Litigation. Syngenta Seeds Inc. is the only Defendant named in the Second Amended Class Action Complaint.

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

maize export market; (2) regulatory filings were in process for China; and (3) it would enter into stewardship agreements with farmers that would require channeling MIR 162 away from markets where it was not yet approved for import. Plaintiffs allege Syngenta knew China was a key export country but misled Plaintiffs by misrepresenting and omitting facts about the importance of China and the timing of Viptera import approval in China.

According to the farmers, China's rejection of U.S. corn caused corn prices to drop in the United States. Producers use several different types of pricing contracts when selling corn, including: spot sales, hedge-to-arrive, basis contracts, forward contracts, average price contracts, participation in a cooperative, options to hedge risk, and consignment sale. Some farmers use more than one pricing mechanism to sell different portions of the same crop. Regardless of the type of pricing, producers assert they were harmed by lower prices for corn caused by the Chinese rejection of corn contaminated with MIR 162.

Thousands of producers, as well as grain handlers and exporters, filed lawsuits based on these allegations surrounding Syngenta's commercialization of Viptera and Duracade in various federal and state courts. The majority of individual producer claims are filed in this action and number approximately 50,000. Approximately 800 federal cases are pending in a multidistrict litigation proceeding in the United States District Court for the District of Kansas, captioned *In re Syngenta AG MIR162 Corn Litigation*, MDL Docket No. 2591, before U.S. District Judge John W. Lungstrum ("Federal MDL"). Three additional federal actions, involving more than 2,800 plaintiffs, are filed in the United States District Court for the Southern District of Illinois before U.S. District Judge David R. Herndon and about 200 cases are pending in the Illinois First Judicial Circuit Court before Judge Brad K. Bleyer. In addition, Cargill and Archer Daniels Midland have initiated related lawsuits against Syngenta in state courts in Louisiana.

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Lead Counsel in the Federal MDL and Lead Counsel in this litigation entered into an Amended and Restated Joint Prosecution Agreement dated June 18, 2015 ("JPA"). The JPA states, *inter alia*, that individual producers whose counsel executed the JPA will be excluded from any class proposed by plaintiffs in the Federal MDL and the individual producers agreed not to oppose class certification. Lead Counsel in this action executed and circulated a Minnesota Participation Agreement ("MPA"). The MPA provides that individual producers represented by counsel that execute the MPA will be excluded from any class proposed by Plaintiffs and such producers agree not to contest class certification. Counsel that sign the MPA must provide Lead Counsel a list of the applicable cases and a declaration stating, "We possess records identifying the names of such producers so that they can be excluded from any class in the above-captioned multidistrict litigation based on objective criteria."

Currently before the Court is a motion for class certification. In the Second Amended Minnesota Class Action Master Complaint for Producers ("SAC"), putative class action Plaintiffs ("Plaintiffs") assert claims for negligence, violation of the Minnesota Unfair Trade Practices Act ("MUPTA"), and strict liability duty to warn. Plaintiffs seek certification of a class of all Minnesota producers that priced corn after September 2013, excluding corn producers that purchased or planted Viptera or Duracade. The current motion is brought by four named class representatives, Leroy Edlund, Roger Ward, Grant Annexstad, and Nathan Thompson, on behalf of a class of all Minnesota producers. The USDA's 2012 Census of Agriculture indicates there are over 30,000 corn farms in Minnesota. From 2011 through 2013, Syngenta corn comprised between 2-3% of the total corn acreage in Minnesota. Of this amount, there were very few Minnesota farmers that purchased Syngenta products containing MIR 162. Class counsel have

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

submitted a list indicating approximately 9,081 Minnesota producers that will be excluded from the class pursuant to the MPA procedure for submitting a list and declaration.

In support of their motion, Plaintiffs retained two agricultural economists to study, measure, and explain the common impact of Syngenta's conduct on U.S. corn prices and determine a method to calculate class-wide damages. Dr. Bruce A. Babcock ("Babcock") is a Professor of Economics at Iowa State University's Biobased Industry Center who has studied commodity markets, particularly the corn market, for more than 25 years. Dr. Colin A. Carter ("Carter") is a Distinguished Professor of Agricultural and Resource Economics at the University of California, Davis who has studied commodity markets for 36 years.

Syngenta opposes certification of a class. In support of its opposition, Syngenta submitted the expert reports of Walter Thurman ("Thurman"), Charles Finch ("Finch"), and Daniel Fischel ("Fischel"). Syngenta did not challenge Drs. Carter and Babcock under Rule 702 of the Minnesota Rules of Evidence or the two-prong *Frye-Mack* test used in Minnesota state courts. Syngenta did not contest the experts' qualifications or methodology.

According to Dr. Carter, corn is an integrated market where demand and supply curves are relatively inelastic, meaning a relatively small shift in the demand or supply will result in a comparatively large change in price. Dr. Carter notes that when a foreign market closes, "The drop in price is relatively large even if the shrinkage in exports is a small share of production, because the price must fall to clear a market in which both supply and demand are inelastic." With respect to supply and demand, Dr. Babcock states, "[b]ut for the presence of MIR 162 in the U.S. corn supply, China would have imported far more U.S. corn than they did. Hence demand for U.S corn would have been higher and … a higher demand from China would have resulted in a higher price of corn to U.S. growers." Syngenta's expert, Thurman, however,

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

claims that China's actions did not change the overall export demand for U.S. corn and that other outlets absorbed the reduction in China exports. Fischel opines that despite the issues with MIR 162, U.S. exports to China would have declined due to other market factors.

According to Dr. Babcock, "Fundamental economic forces determine U.S. corn prices." The price for corn is equal to the Chicago Board of Trade ("CBOT") futures price plus a "basis," which is controlled by local supply and demand and shipping costs. Dr. Carter states that the CBOT futures market "is spatially integrated and informationally efficient, which means that prices tend to react quickly and rationally to changes in supply and demand information." Therefore, Dr. Carter opines that "Events like trade disruptions affect Chicago and export prices, and in turn the price that U.S. corn farmers receive for their corn."

Finch agrees that the price of corn is the CBOT futures price plus a "basis." Syngenta's experts, however, dispute aspects of the two components. Thurman states that, "local circumstances are important in determining local corn prices," and "local markets reflect distinct supply and demand signals resulting in prices that, in some locations, are only minimally affected, if at all, by events in specific sectors, such as export." Thurman admits that local corn prices and futures prices are correlated over long periods but says the relationship can vary over time and geography. Thurman concludes that because localized market forces can drive price changes, a change in the CBOT price can be reflected in widely varying degrees in local prices.

Dr. Babcock uses a competitive-storage model to calculate the per-bushel decline in corn prices as a result of the loss of Chinese demand. Applying the model, Dr. Babcock creates a demand curve for each use of corn and then determines the magnitude of the shift in corn demand that the ban represents. Dr. Babcock determined the difference between the corn China imported in the 2013-14 marketing year and the amount China expected to import and of the

27-CV-15-13285
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

private tariff-rate quota ("TRQ") set forth in China's agreement with the World Trade Organization. The aggregate amount of damage in each of the marketing years between 2013 and 2023 equals the number of bushels in the class in each year multiplied by the per-bushel price impacts.

To determine the number of bushels in the class, Dr. Babcock used data from the Census of Agriculture to determine the average farm size in acres for Minnesota and the yield per harvested acre in each county. He excluded bushels which were planted by farmers that purchased Viptera or Duracade, corn that was not marketed but was put into storage or fed on the farm, and bushels that were marketed before the price impacts of China's ban on U.S. corn imports showed up in the market. Using these figures, he determined the total Minnesota bushels in the class per year. The "total amount of damage to Minnesota corn producers caused by China's ban on U.S. corn imports is simply the number of bushels in the class multiplied by the per-bushel damages."

Using a regression analysis, Dr. Babcock found that 88% of daily variability in local prices "is explained by changes in futures prices." He concludes that, "a change in the demand for U.S. corn caused by China's ban on corn imports would be felt equally in all corn growing areas, because such a change in demand for U.S. corn would be reflected in futures prices and local corn prices are primarily determined by futures prices." Although the basis may vary based on local factors, a change in the futures price will result in a relatively uniform change in all markets.

Thurman asserts Babcock's analysis is flawed because it is based on a dataset that was constructed haphazardly. He also claims Babcock fails to test the sensitivity of liability results to different time periods and the inclusion of more delivery locations. Thurman performed a series of modifications to Babcock's regression analyses to test the relationship between changes in the

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

CBOT price and changes in the local cash price at delivery points in Minnesota and the MDL states. Thurman's analysis showed varying R-squared values. Based on these results, Thurman concludes that, "alleged changes in the CBOT price result in difference changes (and sometimes no change at all) at different locations at different times for different producers." In addition, he states there is a wide variability in the relationship between changes in the CBOT price and changes in local cash prices within a single state.

Dr. Carter used an event study, which measures the impact of a specific event on the value of a commodity or asset. First, he identified a structural break in September 2013 in the relationship of corn and sorghum, which is a close feed substitute for corn but has a lower yield and no GM varieties. At this point, corn went from commanding a 10% premium over sorghum to an 8% price discount. He opines that the abrupt change in relative prices was a signal that changes were taking place in the global feed grain market and that it is not unusual for a well-functioning informationally efficient market (such as the U.S corn market) to anticipate a forthcoming shock to the market.

Dr. Carter then performed a correlation analysis on ten separate locations to quantify the relationship between corn prices at different locations, relative to an index of futures prices for other commodities. He found that all of the markets have highly correlated prices, meaning that "the demand shock caused by the Chinese *de facto* embargo would have a common impact" on all local prices. Dr. Carter opines that "U.S. corn farmers who priced their corn after August 2013 have received a lower price for their corn than they would have received if China's imports of U.S. corn had not effectively stopped." He calculated the drop in price due to the contamination and determined that damages will continue for five years before dissipating. Dr. Carter calculates aggregate damages for the class using the total bushels marketed in the class.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Thurman makes the following criticisms of Carter's analysis: (1) correlation does not imply causation; and (2) the calculation should be between changes in corn prices rather than the prices themselves. Using the same methodology, Thurman re-calculated Carter's correlation analysis to show correlations in the changes in corn prices and found that damages in the CBOT price do not show uniformly high correlation to price changes in other markets.

The Court reviewed the voluminous submissions of the parties, including the expert reports. The Court attended a joint evidentiary hearing in U.S. District Court before Judge Lungstrum in Kansas City. At the hearing, the Court heard testimony from Plaintiffs' experts on cross-examination by Syngenta and re-direct examination by Plaintiffs. Plaintiffs chose not to cross-examine Syngenta's experts at the hearing. The parties also made separate oral arguments before this Court. The Court has reviewed and considered all of this material in its decision on the motion for class certification.

After consideration of substantially the same evidence and argument that is before this Court, the Federal MDL court granted class certification. *In re: Syngenta AG MIR 162 Corn Litig.*, No. 14-MD-2591-JWL, 2016 WL 5371856 (D. Kan. Sept. 26, 2016). In an Order dated September 26, 2016, Judge Lungstrum granted certification to a nationwide class to pursue Lanham Act claims and certification of eight statewide classes (consisting of producers in Arkansas, Illinois, Iowa, Kansas, Missouri, Nebraska, Ohio, and South Dakota) to pursue negligence claims, as well as tortious interference claims in the case of the Arkansas and Missouri classes, and statutory consumer protection claims in the case of the Illinois and Nebraska classes. Producers who filed suit in this action on or before June 15, 2016 and who are represented by attorneys who executed the JPA with the MDL Plaintiff's co-lead counsel are excluded from the class.

II. Legal Analysis

Plaintiffs move the Court for class certification under Rule 23 of the Minnesota Rules of Civil Procedure. Minnesota's Rule 23 is nearly identical to Rule 23 of the Federal Rules of Civil Procedure.[3] The Advisory Committee Notes to the Minnesota Rules explain that Federal Rule 23 was adopted in Minnesota "so that consistency between federal decisions and the Minnesota decisions are more likely." Minn. R. Civ. P. Ann. 23 *Advisory Committee Note* (West 1979). Therefore, cases applying Federal Rule 23 provide guidance in applying the parallel Minnesota rules. *See Whitaker v. 3M Co.*, 764 N.W.2d 631, 635 (Minn. Ct. App. 2009).

To certify a class, a class representative must establish the four prerequisites of Minn. R. Civ. P. 23.01 and at least one provision of Rule 23.02 by a preponderance of the evidence. *Id.* at 638; *Comcast Corp. v. Behrend*, 133 S. Ct. 1426, 1432 (2013). The Court must undertake a rigorous analysis to ensure that the requirements of Rule 23 are satisfied. *Bennett v. Nucor Corp.*, 656 F.3d 802, 814 (8th Cir. 2011). "Rule 23 does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule." *Wal-Mart Stores, Inc. v. Dukes,* 564 U.S. 338, 350, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011). "The preliminary inquiry at the class certification stage may require the court to resolve disputes going to the factual setting of the case, and such disputes may overlap the merits of the case." *Blades v. Monsanto Co.*, 400 F.3d 562, 567 (8th Cir. 2005). However, "Rule 23 grants courts no license to engage in free-ranging merits inquiries at the certification stage. Merits questions may be considered to the extent – but only to the extent – that they are relevant to determining whether the Rule 23 prerequisites for class certification are satisfied." *Amgen, Inc. v. Conn. Ret. Plans & Trust Funds*, 133 S. Ct. 1184, 1194-95 (2013). The Court must

[3] While the text of the two Rules is nearly identical, they are numbered differently. Minn. R. Civ. P. 23.01 corresponds to Fed. R. Civ. P. 23(a) and Minn. R Civ. P. 23.02 corresponds to Fed. R. Civ. P. 23(b). With respect to section II.C *infra*, Minn. R. Civ. P. 23.02(c) correlates with Fed. R. Civ. P. 23(b)(3).

27-CV-15-3765
Filed in Fourth Judicial District Court

Hennepin County, MN

address and resolve factual disputes relevant to class-certification requirements, including disputes among expert witnesses. *Whitaker*, 764 N.W.2d at 640. However, any factual findings at the class certification stage are not binding on the ultimate trier of fact. *Gariety v. Grant Thornton, LLP*, 368 F.3d 356, 366 (4th Cir. 2004).

A. Class Definition

Syngenta argues that membership in the class is not sufficiently ascertainable. Most federal circuit courts of appeals have recognized that Rule 23 contains an implicit threshold requirement that that classes be defined clearly and based on objective criteria. *See Mullins v. Direct Digital, LLC*, 795 F. 3d 654, 658 (7th Cir. 2015), cert. denied, 136 S. Ct. 1161 (2016); *Sandusky Wellness Ctr., LLC v. Medtox Sci., Inc.*, 821 F.3d 992, 998 (8th Cir. 2016). Some federal circuit courts use a two-prong ascertainability inquiry, requiring a plaintiff to show: (1) that the class is defined by reference to objective criteria; and (2) that class members may be determined in an economical and administratively feasible manner, such that "class members can be identified without extensive and individualized fact-finding or mini-trials." *See Carrera v. Bayer Corp.*, 727 F.3d 300, 307 (3d Cir. 2013); *see also Brecher v. Republic of Argentina*, 806 F.3d 22, 24 (2d Cir. 2015); *Karhu v. Vital Pharm., Inc.*, 621 F. App'x 945, 947 (11th Cir. 2015). However, the Eighth Circuit, along with the Sixth and Seventh Circuits, have declined to adopt this heightened standard. *Sandusky*, 821 F.3d at 996-98; *Mullins*, 795 F.3d at 658; *Rikos v. Procter & Gamble Co.*, 799 F.3d 97 (6th Cir. 2015). The *Sandusky* court held that ascertainability is not a separate and preliminary requirement. *Sandusky*, 821 F.3d at 998. "Rather, this court adheres to a rigorous analysis of the Rule 23 requirements, which includes that a class 'must be adequately defined and clearly ascertainable.'" *Id.* Pursuant to the governing and persuasive opinions in *Sandusky* and *Mullins*, the Court will not apply a heightened test for ascertainability.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Therefore, Plaintiffs must show the class is adequately defined using objective criteria. *See Sandusky*, 821 F.3d at 996-998; *Mullins*, 795 F.3d 654; *Rikos*, 799 F.3d at 660. Where a class definition identifies a particular group, harmed during a particular time frame, in a particular location, in a particular way, it is not overly vague. *Mullins*, 795 F.3d at 660. A class definition is objective when it is defined in terms of conduct rather than a state of mind. *Id.* Finally, a class definition is impermissible where it is a "fail-safe" class, that is, a class that cannot be defined until the case is resolved on its merits. *Id.*

Plaintiffs propose the following class:

> All Minnesota producers that priced corn (or who shared revenue from such corn sales under a crop-share agreement) after September 2013. Excluded from the class are any corn producers that purchased or planted corn containing the MIR 162 trait (including Duracade); the Court, and its employees; and Syngenta, and its parents, subsidiaries, affiliates, employees and directors during the relevant time period.

Plaintiffs' class definition is clearly defined and based on objective criteria. The definition is not impermissibly vague because it identifies a group (producers), harmed during a particular time frame (after September 2013), in a particular location (Minnesota), and in a particular way (priced corn).

Syngenta's argument that Plaintiffs waived any argument on ascertainability by addressing the issue in a footnote in their moving brief is unpersuasive. Where a party bears the burden of establishing a point as part of its affirmative case on a motion, failure to address and develop the issue in a moving brief may amount to waiver. *Freeman v. Gerber Prods. Co.*, 450 F. Supp. 2d 1248, 1259 (D. Kan. 2006). As noted above, the Eighth Circuit has held that ascertainability is not a separate and preliminary requirement for class certification but rather part and parcel of the rigorous analysis of Rule 23. *Sandusky*, 821 F.3d at 998. Plaintiffs thus addressed and developed the issue of ascertainability throughout their moving brief by defining and establishing the criteria for the

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

class as well as its compliance with the requirements of Rule 23. Plaintiffs addressed the issue, Syngenta fully briefed the issue, and Plaintiffs had an opportunity to respond. Plaintiffs did not waive any argument on the issue of ascertainability.

Syngenta argues that the term "priced" is ambiguous due to the various ways producers sell corn. It is reasonable and common to understand the term to refer to the date that the parties to a transaction agreed upon the price of the sale. "Priced" is the term that best captures the relevant date of the alleged harm to Plaintiffs. The date the producers planted, harvested, entered into contracts for the sale, sold, or stored their corn would not uniformly capture the date that the price for the corn was established and agreed upon. Pricing of the corn is the occurrence that Plaintiffs allege caused their injury. The term is an objective criteria to determine whether a Plaintiff was harmed during a particular time frame in a particular way.

The term "priced" also does not necessarily entail cumbersome individual inquiries in light of the various types of contracts and ways to sell corn. While an individual inquiry is necessary to determine if a producer is a member of the class, it is not burdensome. It is a matter of determining whether the potential class member satisfies the objective criteria. Dr. Babcock testified that it is a matter of discovering what type of contract was used and the date on which the contract priced the corn for sale. Syngenta's claim that individual inquiries will be difficult due to poor and incomplete documentation is unavailing. To show membership in the class, a producer will need to establish only one instance where corn was priced after September 2013. The Court is not persuaded that Syngenta has shown that all records of all sales and contracts are difficult to produce. The Court is also not persuaded that the objective criteria of showing the date corn was priced is particularly onerous.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Syngenta also argues that the term "producer" is vague and will require individual inquiries. Plaintiffs did not include a separate sentence defining "producer" but included "those who shared revenue from such corn sales under a crop-share agreement." The statutory definition used by the USDA provides:

> *Producer* means an owner, operator, landlord, tenant, or sharecropper, who shares in the risk of producing a crop and who is entitled to share in the crop available for marketing from the farm, or would have shared had the crop been produced. A producer includes a grower of hybrid seed.

7 C.F.R. § 718.2 (emphasis original). Plaintiffs in the Federal MDL tracked the USDA definition in defining the term for the proposed classes. At the Federal MDL motion hearing, the plaintiffs agreed that their proposed definition turned on the identification of producers on the USDA's Farm Service Agency 578 form ("FSA-578"). Judge Lungstrum modified the definition to reflect use of FSA-578 to identify producers and found the term sufficiently objective and definite. At this Court's hearing on this motion, Plaintiffs indicated they were amenable to a similar modification in the class definition.

Syngenta complains that FSA-578s reflect only what is self-reported to the USDA, contain inaccuracies, and are not required for all producers. Use of a government form, however, provides an objective criteria to identify a particular group – producers. Although the form reflects self-reported information, it is submitted to a government agency which should deter and limit fraudulent reporting and increase reliability. Any inaccuracies or misuse of the form found during discovery in these litigations does not prove that such issues are widespread or invalidate the form entirely. Syngenta's one example where not all farmed acreage was reported on a FSA-578 because the landowner was not participating in USDA programs does not evidence that non-participation is common. Throughout this litigation the FSA-578 has been cited as common proof of farming activity. Furthermore, the form is being used in this instance

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

to show qualification as a producer and not evidence of acreage. Form FSA-578 uses a standard definition of the term "producer" and provides a reasonably reliable and objective method of determining if a class member is a qualifying producer. The Court finds modification of the class to include the definition of a "producer" as a person or entity listed on a FSA-578 will clearly identify a particular group and will change the definition of the class accordingly.

The exclusion of producers that purchased or planted Viptera or Duracade is not an onerous undertaking. Plaintiffs indicate Syngenta produced records to show which farmers purchased Viptera and Duracade, and Plaintiffs' experts used those records in their analyses. Producers will also have evidence to determine if they purchased or planted Viptera or Duracade. Furthermore, the parties indicate this exclusion will apply to a maximum of approximately 2-3% of producers. This is an objective criteria based on conduct used to determine exclusion from the class.

Syngenta argues the definition is defective because it includes producers who suffered no injury. Proof that every class member will be able to recover is not required at the class certification stage. *Kleen Products LLC v. International Paper Co.*, 831 F.3d 919, 927 (7th Cir. 2016). A class is defined too broadly to permit certification if it is "defined so broadly as to include a great number of members who for some reason could not have been harmed by the defendant's allegedly unlawful conduct." *See Messner v. Northshore Univ. HealthSystem*, 669 F.3d 802, 824 (7th Cir. 2012). A critical distinction in considering if the definition is overly broad is whether it includes class members who *were not* harmed or those that *could not* have been harmed. *Id.* Because "if a proposed class consists largely (or entirely, for that matter) of members who are ultimately shown to have suffered no harm, that may not mean that the class was improperly certified but only that the class failed to meet its burden of proof on the merits." *Id.*

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Syngenta argues that some producers may not have been injured by a drop in the central market prices because of individualized pricing strategies, variations in local pricing, planting and sale of specialty corn, increased prices for other crops, or the use of corn to feed livestock. These are examples of merits-based defenses, which if proven, would show a class member *was not* harmed. All of these potential class members *could have* been harmed even if these circumstances occurred. There is no basis to conclude that a "great number" of members could not have been harmed as alleged by Plaintiffs. *See, e.g., Oshana v. Coca-Cola Co.*, 472 F.3d 506-514-15 (7th Cir. 2006). The Court is not persuaded that Plaintiffs' proposed class is so overly broad as to require denial of certification.

Accordingly, the class definition, as modified, is adequately defined using objective criteria and clearly ascertainable

B. Rule 23.01 Prerequisites

In order to justify a departure from the rule that litigation is conducted by the individual named parties only, "a class representative must be part of the class and 'possess the same interest and suffer the same injury' as the class members." *Wal-Mart*, 131 S. Ct. at 2550 (citations and internal quotations omitted). Pursuant to Minn. R. Civ. P. 23.01, a member of a class may sue on behalf of a class only if:

> (a) the class is so numerous that joinder of all members is impracticable;
> (b) there are questions of law or fact common to the class;
> (c) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and
> (d) the representative parties will fairly and adequately protect the interests of the class.

Minn. R. Civ. P. 23.01. These prerequisites are referred to as numerosity, commonality, typicality, and representivity. *Streich v. Am. Family Mut. Ins. Co.*, 399 N.W.2d 210, 213 (Minn. Ct. App. 1987). These four requirements ensure that the named plaintiffs are appropriate

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

representatives of the class whose claims they wish to litigate and limits the class claims to those fairly encompassed by the named plaintiffs' claims. *Wal-Mart*, 131 S. Ct. at 2550 (citations and internal quotations omitted). "Sometimes it may be necessary for the court to probe behind the pleadings before coming to rest on the certification question, and that certification is proper only if the trial court is satisfied, after a rigorous analysis, that the prerequisites of Rule 23(a) have been satisfied. Frequently, that rigorous analysis will entail some overlap with the merits of the plaintiff's underlying claim." *Id.* at 2541.

1. Numerosity

Rule 23.01(a) does not include a specific numeric value for the size of a class. The impracticability of joining all members is a fact-specific determination. *Lewy 1990 Trust ex rel. Lewy v. Investment Advisors, Inc.*, 650 N.W.2d 445, 452 (Minn. Ct. App. 2002). The factors the Court considers in determining impracticability include the size of the proposed class, the size of the class member's individual claim, the inconvenience of trying individual suits, the nature of the action itself, and other factors relevant to the practicability of joining all putative class members. *See Krueger v. Ameriprise Fin., Inc.*, 304 F.R.D. 559, 569 (D. Minn. 2014); *Lewy*, 650 N.W.2d at 452. While mere speculation as to the size of the class is insufficient to satisfy the numerosity requirement, it is also not necessary to prove a number of the class members with specificity. *Id.* Here, the proposed class consists of approximately 30,000 Minnesota farmers. It is estimated that the number of those producers that purchased or grew Syngenta products is 2-3% of the class. And 9,081 Minnesota farmers that have filed individual claims have indicated they will choose to opt-out pursuant to the declaration procedure in the MPA. Even excluding those farmers that grew Viptera or Duracade or have filed an individual case, the proposed class will still include approximately 20,000 Minnesota farmers. The proposed class satisfies the numerosity requirement.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

2. Commonality

A class must have common questions of law or fact. Minn. R. Civ. P. 23.01(b). The threshold to demonstrate commonality is not high and only requires that "the resolution of the common questions affect all or a substantial number of class members." *Streich v. American Family Mut. Ins. Co.*, 399 N.W.2d 210, 214 (Minn. Ct. App. 1987) (citing *Jenkins v. Raymark Industries, Inc.*, 782 F.2d 468, 472 (5th Cir. 1986)). The existence of just one common issue is enough to satisfy this requirement. *Wal-Mart*, 564 U.S. at 359; *Lockwood Motors, Inc. v. Gen. Motors Corp.*, 162 F.R.D. 569, 575 (D. Minn. 1995). The "common contention" in Rule 23(a)(2) "must be of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal–Mart,* 564 U.S. at 338. A key consideration in assessing commonality is whether class treatment can "generate common *answers* apt to drive the resolution of the litigation." *Id.* at 338 (citation and internal quotation marks omitted; emphasis original); *see also Ario v. Metropolitan Airports Comm'n*, 367 N.W.2d 509, 515 (Minn. 1985) (noting a class action judgment finding an invasion of privacy would do little to advance an end to the litigation because class members would still have to establish a right to inverse condemnation). Individual class members need not be identically situated so long as the questions linking the class members are substantially related to the resolution of the litigation. *In re Workers' Comp.*, 130 F.R.D. 99, 104 (D. Minn. 1990).

Questions of fact common to all class members include: (1) Syngenta's acts and knowledge in the commercialization of MIR 162; (2) representations made by Syngenta regarding Chinese import approval of MIR 162; (3) Syngenta's warnings regarding use of MIR 162; and (3) the impact of China's ban on the CBOT futures price for corn. Common issues of law include: (1) Syngenta's

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

duty to exercise reasonable care in the commercialization of MIR 162; (2) the scope of Syngenta's duty to Minnesota farmers; (3) whether Syngenta breached its duty of care; (4) whether Syngenta knowingly misrepresented the quality, ingredients, or origin of MIR 162; (5) whether Syngenta's warnings regarding use of MIR 162 were insufficient; (6) causation; and (7) whether Plaintiffs are entitled to damages. These are questions common to all members of the proposed class that can be addressed by common proof. The answers to these common questions will resolve issues central to Plaintiffs' claims. The Rule 23.01(b) prerequisite of commonality is satisfied.

3. Typicality

The typicality requirement of Rule 23.01(c) is met when the claims of the named Plaintiffs arise from the same event or are based on the same legal theory as the claims of the class members. *See Alpern v. UtiliCorp United, Inc.*, 84 F.3d 1525, 1540 (8th Cir. 1996). A "strong similarity of legal theories" satisfies the typicality requirement even if substantial factual differences exist. *Lewy*, 650 N.W.2d at 453. Typicality requires that the class representatives "have an interest compatible with that of the class sought to be represented." *Id.* Here, the claims of all members of the proposed class arise from the same conduct by Syngenta and all Plaintiffs assert the same legal claims on behalf of the class that they seek to represent. Like members of the proposed class, the named Plaintiffs farm corn in Minnesota, did not purchase or grow Viptera or Duracade, priced corn after September 2013, and claim they were harmed by Syngenta's alleged breach of its duty to responsibly commercialize MIR 162 and by the alleged misrepresentations made by Syngenta during the commercialization. The claims of the representative parties are typical of the claims of the class.

Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

4. Adequacy of Representation

Rule 23.01(d) requires Plaintiffs to show that "the representative parties will fairly and adequately protect the interests of the class." Minn. R. Civ. P. 23.01(d). "A class representative must be part of the class and 'possess the same interest and suffer the same injury' as the class members." *East Texas Motor Freight Sys. Inc. v. Rodriguez,* 431 U.S. 395, 403, 97 S.Ct. 1891, 52 L.Ed.2d 453 (1977) (quoting *Schlesinger v. Reservists Comm. to Stop the War,* 418 U.S. 208, 216, 94 S.Ct. 2925, 41 L.Ed.2d 706 (1974)). To satisfy the adequate representation requirement, the interests of the class must coincide with the interests of the representative parties, and the parties and their counsel must competently and vigorously prosecute the lawsuit. *Lewy*, 650 N.W.2d at 454.

> Factors used to determine if representivity is satisfied include: 1) whether the representatives' interests are sufficiently identical to those of absent class members so that the representatives will vigorously prosecute the suit on their behalf; 2) whether the attorneys are qualified, experienced, and capable of conducting the litigation; and 3) whether the representatives have any interests that conflict with the objection of the class they represent.

Id. The named Plaintiffs, Leroy Edlund, Roger Ward, Grant Annexstad, and Nathan Thompson, are all adequate individuals to represent the interests of the class. Plaintiffs and class members allege to have been injured by the same conduct by Syngenta, and they assert the same legal claims. Plaintiffs have shown that they will vigorously pursue the claims on behalf of the class by answering written discovery, participating in motion practice, and submitting to depositions. The Plaintiffs' interests are sufficiently identical to those of the class and have shown they will vigorously prosecute the claims.

Rule 23.01(d) requires that counsel be "qualified, experienced, and capable of conducting the litigation." *Lewy*, 650 N.W.2d at 454-55. The biographies of Co-Lead Interim Class Counsel indicate they are qualified to prosecute a class action. As the Court previously found when appointing them on an interim basis in its August 5, 2015 Order, Class Counsel are excellent trial

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

lawyers and possess extensive class action experience. Counsel have shown they are capable by drafting pleadings and actively participating in discovery and motion practice in the fourteen months since they were appointed in this matter. Attorneys for Plaintiffs are qualified, experienced, and capable of conducting the litigation.

The four putative Plaintiffs, represented separately by Michael Johnson, contend there is a conflict of interest and due process violation as a result of the JPA and MPA and so oppose class certification. A conflict of interest must be fundamental to defeat the adequacy requirement. *Ward v. Dixie Nat. Life Ins. Co.*, 595 F.3d 164, 180 (4th Cir. 2010) (citing *Gunnells v. Healthplan Servs., Inc.*, 348 F.3d 417, 430 (4th Cir. 2003)). A conflict is not fundamental when all class members share common objectives, the same factual and legal positions, and have the same interest in establishing the liability of defendants. *Id.* The Court is not convinced that Minnesota producers whose counsel do not sign the MPA do not share the same factual and legal positions as those producers whose counsel executed the MPA. All putative class members will have the ability to opt-out of the class action and proceed with individual claims. There is no due process violation for absent class members when they are provided an opportunity to opt-out, which occurs after the class is certified. *See Phillips Petroleum Co. v. Shutts*, 472 U.S. 797, 812 (1985). The only difference is the form used to opt-out. The difference between submitting the declaration or an opt-out notice does not affect the producers' ultimate factual or legal position regarding their claims against Syngenta.

The four putative members' reliance on *Broussard v. Meineke Discount Muffler Shops, Inc.*, 155 F. 3d 331 (4th Cir. 1998) is misplaced. In *Broussard*, the class members were franchisees that had three different types of agreements with the defendant. *Id.* at 335. The different types of agreements gave rise to a conflict among the class because the plaintiffs were entitled to different

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

relief as a remedy for their claim against the defendant. *Id.* The court found that the difference in types of remedies available to the subgroups of plaintiffs created a conflict of interest among the class. *Id.* Here, there is no difference among the Plaintiffs in their relation to Syngenta or the type of remedy available. All proposed class members have a shared common objective and interest in establishing Syngenta's liability and damages.

C. Rule 23.02 Maintenance Requirements

Plaintiffs move for certification under Rule 23.02(c), which requires a showing that questions of law and fact common to the members of the class predominate over any questions affecting only individual members, and because a class action is superior to other available methods for the fair and efficient adjudication of the controversy. *See* Minn. R. Civ. P. 23.02(c); *Lewy*, 650 N.W.2d at 455-58.

1. Predominance and Commonality

The "predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 l.Ed.2d 689 (1997). The "fundamental question is whether the group aspiring to class status is seeking to remedy a common legal grievance." *Lockwood*, 162 F.R.D. at 580 (quoting Moore's Federal Practice ¶ 23.45[2] at 23-306 to 23-307 (2nd ed. 1995)).

> An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide proof. The predominance inquiry asks whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues. When one or more of the central issues in the action are common to the class and can be said to predominate, the action may be considered proper under Rule 23(b)(3) even though other important matters will have to be tried separately, such as damages or some affirmative defenses peculiar to some individual class members.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045 (2016) (citations and internal quotations omitted).

"At the core of Rule 23(b)(3)'s predominance requirement is the issue of whether the defendant's liability to all plaintiffs may be established with common evidence." *Avritt v. Reliastar Life Ins. Co.*, 615 F.3d 1023, 1029 (8th Cir. 2010) (citing *Blades v. Monsanto Co.*, 400 F.3d 562, 566 (8th Cir. 2005)). If the same evidence will suffice for each member to make a prima facie showing, it is a common question. *Id.* Predominance is established where "generalized evidence may prove or disprove" the claims, even if individual facts exist that are unique to particular class members. *Lewy,* 650 N.W.2d at 455. Where common evidence can make out a prima facie case for the class, common issues predominate. *See In re Zurn Pex Plumbing Prods.*, 267 F.R.D. 549, 560 (D. Minn. 2010), *aff'd*, 644 F.3d 604 (8th Cir. 2011).

Plaintiffs' common law and statutory claims are appropriate for class adjudication because the elements can be shown with common proof. Evaluating predominance begins with the elements of the underlying causes of action. *Erica P. John Fund, Inc. v. Halliburton Co.*, 563 U.S. 804, 809 131 S. Ct. 2179, 2184 (2011). All of the class action claims involve common factual and legal issues. Common evidence can make out a prima facie case for the class on the elements of the claims. Syngenta's defenses relating to its own conduct or to causation also will be the subject of class-wide proof and thus present common issues. The common issues in the case are more prevalent and important than any remaining potential individual issues. Therefore, the Court finds that common questions predominate over individual questions for purposes of certification under Minn. R. Civ. P. 23.02(c).

The elements of a negligence claim are: (1) the existence of a duty of care; (2) a breach of that duty; (3) an injury; and (4) the breach of that duty was the proximate cause of the injury.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Engler v. Illinois Farmers Ins. Co., 706 N.W.2d 764, 767 (Minn. 2005). Plaintiffs allege that Syngenta had a duty to all Minnesota farmers to use reasonable care in the commercialization of MIR 162 and breached that duty by commercializing MIR 162 before Chinese import approval and without channeling measures. The central factual issues for this claim are Syngenta's knowledge and actions surrounding its commercialization of MIR 162. The claim presents common legal issues regarding Syngenta's duty to all Minnesota producers, the scope of that duty, whether Syngenta breached that duty, injury, and causation. The evidence on liability will focus on Syngenta's conduct such as the timing and content of Syngenta's submissions for import approval to China, Syngenta's knowledge of the status of China's approval, Syngenta's actions and efforts regarding stewardship and channeling, and Syngenta's representations. The negligence claim will involve common proof of Syngenta's actions and its effect on the market.

Plaintiffs assert violations of Minnesota's Unfair Trade Practices Act (MUTPA), Minn. Stat. § 325D.13. The statute provides that, "No person shall, in connection with the sale of merchandise, knowingly misrepresent, directly or indirectly, the true quality, ingredients or origin of such merchandise." Minn. Stat. § 325D.13. Plaintiffs must show that "the defendant engaged in conduct prohibited by the statutes and that the plaintiff was damaged thereby." *See Group Health Plan, Inc. v. Philip Morris, Inc.*, 621 N.W.2d 2, 12 (Minn. 2001). Plaintiffs have made allegations and submitted evidence regarding Syngenta's representations to Plaintiffs regarding China's approval of MIR 162. Plaintiffs and the class members allege they were harmed by Syngenta's public misrepresentations and omissions regarding China's import approval of MIR 162 as well as its ability to channel MIR 162 corn away from China. Proof of this claim will involve common evidence of Syngenta's representations and knowledge.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Plaintiffs assert a strict liability duty to warn claim. The elements of such a claim are: (1) defendant's knowledge of the dangers of using the product; (2) defendant's warnings were insufficient and thus breached the duty of care; and (3) the lack of adequate warning caused plaintiff's injury. *McRunnel v. Batco Mfg.*, 917 F. Supp. 2d 946, 957 (D. Minn. 2013) (citing *In re Levaquin Prods. Liab. Litig.*, 700 F.3d 1161, 1166 (8th Cir. 2012)). This claim will involve common proof of Syngenta's knowledge, duty of care, sufficiency of warnings, and the effect on the market.

All three of Plaintiffs' claims require a showing of injury and causation. Plaintiffs claim each class member was injured by a lower price for corn priced after September 2013. Plaintiffs intend to prove the fact and amount of damage through expert testimony in a class-wide manner. The reports and testimony of Drs. Carter and Babcock demonstrate on a prima facie basis that Syngenta's actions caused a drop in the CBOT futures price of corn beginning in September 2013. Their analyses show that a change in the CBOT futures price resulted in a uniform change on all local Minnesota corn prices. They then calculate damages based on a cents per bushel mathematical or formulaic calculation that is applicable to each member of the class. While each class member will have a different amount of damages based on how much corn they priced, it is a matter of taking a member-specific factor and inserting it into the class-wide formula.

The parties dispute the extent of the Court's review of the expert evidence. The Eighth Circuit has held that "[e]xpert disputes concerning the factual setting of the case should be resolved at the class certification stage only to the extent necessary to determine the nature of the evidence that would be sufficient, if the plaintiff's general allegations were true to make out a prima facie case for the class." *In re Zurn Pex Plumbing Prods. Liab. Litig.*, 644 F.3d 604, 611 (8th Cir. 2011) (quoting *Blades v. Monsanto Co.*, 562, 567 (8th Cir. 2005) (internal quotation marks omitted). "Rule 23 grants courts no license to engage in free-ranging merits inquiries at the certification

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

stage," and that "[m]erits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the Rule 23 prerequisites for class certification are satisfied." *Amgen Inc. v. Connecticut Retirement Plans and Trust Funds*, 133 S. Ct. 1184, 1195-96 (2013).

The U.S. Supreme Court recently discussed the review for expert evidence at the class certification stage in an FLSA case where plaintiff employees alleged they were improperly denied pay for time spent donning and doffing their equipment at work. *See Tyson Foods*, 136 S. Ct. at 1042-43. The plaintiffs relied on an expert who averaged and estimated donning and doffing times on a class-wide basis. *See id.* at 1043. The Supreme Court refused to adopt a rule prohibiting the use of such representative evidence in class action cases. *See id.* at 1046. The Court noted that if each class member could have relied on the representative evidence to establish liability in an individual action, then use of that evidence is permissible to establish the number of hours to show class-wide liability in a class action. *See id.* at 1046-47. The Court then addressed a district court's proper consideration of such evidence:

> This is not to say that all inferences drawn from representative evidence in an FLSA case are just and reasonable. Representative evidence that is statistically inadequate or based on implausible assumptions could not lead to a fair or accurate estimate of the uncompensated hours an employee has worked. Petitioner, however, did not raise a challenge to respondents' experts' methodology under *Daubert*; and, as a result, there is no basis in the record to conclude it was legal error to admit that evidence.
>
> Once a district court finds evidence to be admissible, its persuasiveness is, in general, a matter for the jury. Reasonable minds may differ as to whether the average time [the expert] calculated is probative as to the time actually worked by each employee. Resolving that question, however, is the near-exclusive province of the jury. The District Court could have denied class certification on this ground only if it concluded that no reasonable juror could have believed that the employees spent roughly equally time donning and doffing.

See id. at 1048-49 (citations omitted). As noted above, Syngenta did not challenge Plaintiffs'

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

expert's qualifications or their methodologies under *Frye-Mack*.[4] After reviewing all of Plaintiffs' and Syngenta's expert opinions, the Court finds Plaintiffs presented representative evidence that is statistically adequate and based on plausible assumptions. Such evidence could lead the trier of fact to a fair and accurate calculation of the per-bushel drop in corn price. In this action, Plaintiffs could rely on those expert opinions to show liability and damages in an individual class member's suit; thus under *Tyson Foods*, the class may rely on those opinions to show class-wide injury.

Syngenta argues that the representative evidence is deficient because the CBOT price is not sufficiently tied to local corn prices. Plaintiffs' experts relied on standard economic studies to show CBOT price changes are reflected in local prices. Syngenta's experts conceded that local contract prices are customarily expressed in terms of the CBOT price. The data concerning the prices at which corn sales have historically taken place in the United States, the GeoGrains data which both sides have cited, includes reference to the CBOT prices on the data of those sales. As Plaintiffs' experts explained, the fact that local prices may not decrease as much as the CBOT prices, or may even increase despite a CBOT decrease, does not mean that the CBOT change was not locally felt, as the local factors may have added to or offset that CBOT decrease. Syngenta failed to show that the expert evidence is based on inadequate data or statistical analyses. Ultimately, this may be an issue for a jury.

Syngenta's experts made extensive criticisms of Plaintiffs' experts' analyses and opinions. For instance, Syngenta's experts criticize the composition of data sets, the comparable products chosen, the rate of decay of the price effects, and the failure to confirm results against particular

[4] Minnesota uses a two-prong *Frye-Mack* test. *Goeb v. Tharaldson*, 615 N.W.2d 800, 809-10 (Minn. 2000). Under this standard, scientific evidence is admissible when (1) the scientific theory, technique or methodology is generally accepted in the relevant scientific community and (2) the evidence has a scientifically reliable foundation. *Id.* at 810. The Minnesota Supreme Court explicitly rejected *Daubert*, criticizing it for requiring judges to be "amateur scientists," whereas *Frye-Mack* ensures that those most qualified to assess the scientific validity of a technique – i.e., the scientists – have the "determinative voice." *Id.* at 812-13. The court also voiced concern that *Daubert* could lead to non-uniformity, since cases with similar expert testimony could lead to varying decisions on admissibility. *Id.*

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

time periods and locations. "As other courts have recognized, the issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of [impact] through generalized proof." *In re TFT-LCD (Flat Panel) Antitrust Litig.*, 267 F.R.D. 583, 604 (N.D. Cal. 2010), *amended in part*, No. M 07-1827 SI, 2011 WL 3268649 (N.D. Cal. July 28, 2011) (citations and internal quotation marks omitted). Syngenta's criticisms go to the manipulation of the data but do not challenge the foundation of the type of analyses performed. The majority of Syngenta's arguments and competing expert opinions go to the persuasiveness of the evidence and not the admissibility. The Court cannot conclude that the experts' methodologies are so statistically inadequate or unreliable as to preclude certification. Plaintiffs' experts sufficiently demonstrated that there is a way to prove a class-wide measure of damages using generalized proof.

Syngenta attacks the experts' use of September 2013 to show anticipation of Chinese rejection as implausible. Syngenta argues that the use of September 2013 means that market participants anticipated the November 2013 rejections by China, even though according to Syngenta Plaintiffs' experts were not able to identify a public prediction of the rejection. Dr. Carter, however, based the use of that date on the structural break in export and prices between corn and sorghum that signaled a change in the market. The use of September 2013 is thus a plausible and supported assumption, and the expert opinions are not lacking in foundation.

Syngenta argues that individual inquiries are needed to: 1) determine whether each producer suffered any injury; (2) determine a methodology for determining damages; and (3) evaluate Syngenta's affirmative defenses. The presence of individualized questions regarding damages does not prevent certification under Rule 23(b)(3). *Tyson Foods*, 136 S. Ct. at 1045; *Wal-Mart*, 564 U.S. at 362. "Courts frequently grant class certification despite individual differences in class members'

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

damages." *Lewy,* 650 N.W.2d. at 456-57. "When injury and damage is capable of mathematical or formulaic calculation, individualized claims are not a barrier to managing the case as a class action." *Id.* at 456.

Syngenta argues that individual inquiries of all class members are required because some producers may have benefitted from the Chinese import ban on U.S. corn. The Court disagrees. "A class will often include persons who have not been injured by the defendant's conduct; indeed this is almost inevitable because at the outset of the case many of the members of the class may be unknown, or if they are known still the facts bearing on their claims may be unknown. Such a possibility or indeed inevitability does not preclude class certification." *Kohen v. Pac. Inv. Mgmt. Co. LLC*, 571 F.3d 672, 677 (7th Cir. 2009). The Court incorporates the discussion in section II.A, *supra*, finding the class definition not overly broad even if it includes producers who suffered no harm.

Syngenta opines that benefits could occur arising from local market factors, a corresponding increase in other crop prices, or lower price for feed for livestock. Plaintiffs respond that any such gains would not fall within the offsetting benefits rules, and that it would violate the collateral source doctrine to reduce damages for such gains. Even if offsets for higher prices of other grain were permitted, Plaintiffs' expert testified that he could conduct a similar analysis involving other grains to determine an aggregate offset on a class-wide basis. In addition, Syngenta has not identified any class member whose benefits from sales of other grains and livestock purchases would completely offset the damages from lower corn prices under Plaintiffs' damage models, and thus it is speculative whether any class members had no injury for these reasons. This Court finds that even if individual inquiries are needed in some instances, they would not be so overwhelming as to defeat predominance. Syngenta also argues that lower overall demand could impact local

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

factors, which impact would skew any direct correlation between CBOT and local price changes. Plaintiffs' expert testified persuasively, however, that decreased exports generally do not affect local factors. Furthermore, the determination of the fact and amount of damage does not pose a risk that individual inquiries will predominate because if the jury rejects Plaintiffs' theory that CBOT price changes are reflected in local prices, the case will effectively be lost, as Plaintiffs will be unable to prove the fact of injury.

Syngenta next argues that individual inquiries are necessary to determine a methodology for calculating damages. Plaintiffs must be able to show that their damages stemmed from the defendant's actions that created the legal liability. *Comcast Corp. v. Behrend*, 133 S. Ct. 1426, 1433 (2013). Plaintiffs have identified the existence of an integrated market in which events, such as China's rejection of U.S. corn, are felt uniformly throughout the market. Such common impact supports use of a common damages model and formula on a class-wide basis. Dr. Babcock opines that the aggregate amount of damages for all class members "equals the number of bushels in the class multiplied by the … per-bushel price impact." This formula is common to each and every class member and relies on total corn production in Minnesota. The expert testimony establishes a methodology that would permit the jury to determine class-wide aggregate damages as well as per-bushel losses for each class member.

Syngenta challenges Plaintiffs' "aggregate damages model" as inappropriate because it would inflate Syngenta's liability and limit their rights to challenge individual issues. Syngenta's reliance on *McLaughlin v. American Tobacco Co.*, 522 F.3d 215 (2d. Cir. 2008) for the proposition that an aggregated damages model is impermissible where it relies on unsupported assumptions and would mask the prevalence of individual issues is misplaced. The *McLaughlin* court discussed fluid recovery, which is different from aggregate damages. *See In re Scrap Metal Antitrust Litig.*, 527

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

F.3d 517, 534 (6th Cir. 2008). The case is further distinguishable because plaintiffs in *McLaughlin* provided only a rough estimate of gross damages for the class. *McLaughlin*, 522 F.3d at 231. Here, Plaintiffs have presented expert testimony creating models to determine the per-unit effect on class members' sales of corn.

Syngenta urges the Court to follow *In re Genetically Modified Rice Litig.*, 251 F.R.D. 392 (E.D. Mo. 2008), pet. for permission to appeal denied, No. 08-8010 (8th Cir. Oct. 6, 2008), in which the court denied class certification in an action alleging the defendants contaminated the U.S. rice supply with non-approved GM strains of rice and seeking market-loss damages. The court found some producers used various types of contracts based on the CBOT price, some sold rice at a price based on the World Market Price, and others sold at a flat price set by the buyer. *Id.* at 394-95. The plaintiffs proposed to show the total amount of economic harm and quantity of rice affected to calculate each producer's individual damages based on the amount of rice sold. *Id.* While the court found a number of common issues, it decided the calculation of damages was an individual issue, involving a unique inquiry into the time, place, and manner in which each plaintiff priced and sold his rice. *Id.* at 398. The court noted that variation in individual damage amounts does not bar certification. *Id.* But concluded that the claims of the rice producers did not lend themselves to an easy "mathematical or formulaic calculation." *Id.* at 399. In *Rice*, Plaintiffs failed to demonstrate the predominance of common questions respecting the plaintiffs' claims for market-loss damages. In this case, there is no separate price index for corn; and all experts agree that the CBOT price is a component used in the sale of corn. Furthermore, here Plaintiffs have presented persuasive evidence that damages can be determined by an adequate mathematical calculation.

The Court finds that the *Urethane* and *Kleen* cases from the Tenth and Seventh Circuits are more instructive than *Rice*. *See In re Urethane Antitrust Litigation*, 768 F.3d 1245 (10th Cir. 2014);

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Kleen Products LLC v. International Paper Co., 831 F.3d 919 (7th Cir. 2016). *Urethane* involved allegations of a price-fixing conspiracy in violation of antitrust law. The Tenth Circuit affirmed class certification based on evidence that the alleged price-fixing would have affected the entire market and thus raised baseline prices for all buyers, even if prices were individually negotiated. *See id.* at 1254-55. The court noted that antitrust law permits an inference of class-wide impact from price-fixing. *See id.* at 1254. The court concluded that impact could be treated as a common question capable of class-wide proof for purposes of class certification. *See id.* at 1255. The Tenth Circuit further noted that, "[t]he presence of individualized damages issues would not change this result," as "[c]lass-wide proof is not required for all issues" for predominance under Rule 23(b)(3). *See id.* (citing *Amgen*, 133 S. Ct. at 1196). Finally, the court upheld the use of class-wide aggregate damages as proper and not in violation of *Comcast*. *See id.* at 1268-69. While this is not an antitrust case with an inference of class-wide impact, Plaintiffs here use CBOT, a more centralized commodities exchange, as a benchmark to show the entire market was affected. Class certification is similarly appropriate in this case because there are common factual and legal issues that allow market impact and damages to be treated as a common question capable of class-wide proof.

In *Kleen*, the Seventh Circuit affirmed class certification in a case involving evidence of coordinated price fixing. *Kleen*, 831 F.3d at 931. The court found that containerboard was a commodity whose price is tied to a benchmark price published in an industry periodical. *Id.* at 923. Using this benchmark, plaintiffs presented expert testimony performing regression analyses to calculate aggregate damages for the class. *Id.* at 928-29. When addressing the defendants' claims that the plaintiffs' experts used incorrect models, the Seventh Circuit noted that the plaintiffs "have shown actual price increases, a mechanism for those increases, the communication channels the conspirators used, and factors suggesting that cartel discipline can be maintained. We are not

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

saying that any of these points have been proven, of course, but we are saying that this evidence is enough to support class treatment of the merits." *Id.* at 928. Similarly, Plaintiffs use the CBOT as a benchmark. Plaintiffs' experts show that all putative class members' claims can be determined using a common methodology. All that Plaintiffs must demonstrate is that injury can be shown on a class-wide basis using common proof. Common proof of injury is shown through Plaintiffs' expert testimony that Syngenta's conduct depressed CBOT futures price for corn, which caused a decrease in all local Minnesota corn prices. Both Plaintiffs' experts, Drs. Babcock and Carter, presented methodologies for showing class-wide impact of Syngenta's conduct and concluded that corn prices for all Minnesota class members were affected by Syngenta's actions. Dr. Babcock asserts that he would use the same methodology for each individual class member and the only thing that would differ would be the amount of corn production that is damaged. Plaintiffs have presented an acceptable model for the determination of injury and damages. Whether that model is persuasive is an issue for trial rather than class certification. *See Gordon v. Microsoft Corp.*, No. 00-5994, 2001 WL 366432, at *8 (Minn. Dist. Ct. Mar. 30, 2001).

In addition, the plaintiffs in *Kleen*, used different pricing mechanisms. The *Kleen* court found that "[e]ven for transactions where prices were negotiated individually or a longer term contract existed … the starting point for those negotiations would be higher if the market price for the product was artificially inflated." *Id.* at 928-29. Similarly, whether any class members sold other crops whose sale price increased, raised livestock that consumed the corn when prices were adversely affected, local differences in transportation costs, and the identity of the corn buyer would have no effect on the futures price decrease caused by the China rejection and identified by Plaintiffs' experts. This is analogous to what Plaintiffs allege here; regardless of individual contracts or local factors affecting basis, the price for corn was uniformly affected by Syngenta's

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

conduct. Plaintiffs have sufficiently presented evidence of a methodology to determine damages on a class-wide basis.

Syngenta also argues that individual inquiries are needed to evaluate its affirmative defenses of failure to mitigate damages and comparative negligence as well as issues such as hedging and crop insurance. Syngenta argues that these defenses are "highly producer-specific" and thus do not present common issues. Plaintiffs argue that the collateral source offset rules prevent such evidence from diminishing a plaintiff's recovery. Mitigation of damages, like other damage-related affirmative defenses, is not a barrier to class certification. *In re Checking Account Overdraft Litig.*, 307 F.R.D. 630, 651 (S.D. Fla. 2015). "Rule 23 does not demand that *every* issue be common; classes are routinely certified under Rule 23(b)(3) where common questions exist and predominate, even though other individual issues will remain after the class phase." *Kleen*, 831 F.3d at 922. These affirmative defenses go to the issue of damages and not liability. Whether the class members had a duty to undertake any such efforts and whether the collateral source offset rules prevent such evidence from diminishing a plaintiff's recovery present a common threshold issue that does not need to be decided at the class certification stage. Even if some of these defenses are available with respect to some class members, such individual issues are not so overwhelming as to defeat predominance. Common questions predominate here despite any possible individual questions relating to Syngenta's defenses.

Accordingly, the Court finds, pursuant to Rule 23.02(c), that common questions predominate with respect to the proposed class.

2. Superiority

Plaintiffs must also show under Rule 23.02(c) that a class action is superior to other available methods of adjudication.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

> The matters pertinent to the findings include: (1) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (3) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (4) the difficulties likely to be encountered in the management of a class action.

Minn. R. Civ. P. 23.02(c). Factors to consider in superiority analysis include "manageability, fairness, efficiency, and available alternatives." *Streich v. American Fam. Mut. Ins. Co.*, 399 N.W.2d 210, 218 (Minn. Ct. App. 1987) *review denied* (Minn. Mar. 25, 1987). When collective adjudication promotes efficiency benefits and makes it possible for class members with small claims to bring suit and enforce substantive law, a class action is superior to other available methods for the fair adjudication of the controversy. *Lewy*, 650 N.W.2d at 457.

Syngenta and the four putative plaintiffs note that over 50,000 plaintiffs have filed individual suits against Syngenta. They argue the substantial number of cases demonstrates a desire by class members to control the individual litigation of their claims. Syngenta also highlights the facts that some Plaintiffs have named additional Defendants and that some Individual Plaintiffs have opposed certification.

> [T]he mere existence of individual actions brought by putative class members does not necessarily defeat a claim for superiority. It is enough that class treatment is superior because it will achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.

CGC Holding Co. v. Broad and Cassel, 773 F.3d 1076, 1096 (10th Cir. 2014) (citations and internal quotation omitted). Although there is a large number of Minnesota farmers who have brought individual cases in this Court, there are still twenty thousand Minnesota corn farmers who have not filed individual cases. Given the length this matter has been pending and the publicity received, it is unlikely that individuals that have not yet filed a case will, in the future, file an individual case or opt out of the proposed class because, if there was an interest in pursuing individual claims, they

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

would have likely already done so. Without a class action vehicle, many individual farmers may never pursue their claims. In addition, Plaintiffs request purely economic damages, and thus there is no emotional factor or physical injury that might otherwise provide a reason for class members to wish to control their own cases.

Moreover, the amounts at stake per farm are small enough that separate suits may be impracticable for many class members. The vehicle of a class action is meant to permit plaintiffs with small claims and little money to pursue a claim otherwise unavailable. *In re Workers' Comp.*, 130 F.R.D. 99, 110 (D. Minn. 1990). For class members with a relatively small pecuniary interest, the potentially significant cost of individual litigation is prohibitive of an individual claim. The Federal MDL and this action and the coordinated proceedings have allowed Plaintiffs to pursue individual suits with little investment of time or money. "This prong of the superiority requirement directs courts to determine whether individuals really would want to control their own litigation in the given situation or whether the ideal is more fiction than reality." 2 William B. Rubenstein, *Newberg on Class Actions* § 4:69 (5th ed. 2012). The court notes that several Plaintiffs opted not to pursue their claims when chosen as bellwether cases and faced with discovery. This may indicate that other Plaintiffs would do the same once more involvement was required and trial arrives. In addition, any class member who does desire to control the litigation of its own claims may opt out of the class action and pursue its own claim.

Syngenta's argument that concentrating the litigation in a particular forum would have no benefit beyond pretrial coordination is ineffective. This matter has been pending in this forum for approximately 18 months, and this Court is very familiar with the factual and legal issues. The proposed claims on behalf of the class do not present any difficulties such as state law variations or choice of law determinations. This weighs in favor of class treatment.

27-CV-15-3765
Filed in Fourth Judicial District Court
11/3/2016 4:17:40 PM
Hennepin County, MN

Finally, Syngenta argues that a class action would be unmanageable in light of the individual issues that must be litigated. "[C]ourts generally hold that if the predominance inquiry is met, then the manageability requirement is met as well." 2 William B. Rubenstein, *Newberg on Class Actions* § 4:72 (5th ed. 2012). As noted above, common questions surrounding liability will predominate the trial. In light of those common issues, the litigation of individual suits "would be grossly inefficient, costly, and time consuming because the parties, witnesses, and courts would be forced to endure unnecessarily duplicative litigation." *Urethane*, 237 F.R.D. at 453. It would be a huge burden on the Court to engage in twenty thousand individual trials presenting the same evidence and claims. Conducting one trial on behalf of twenty thousand farmers that would resolve the common questions is superior to thousands of individual trials. Due to the complexity of the issues involved and class-wide issues that can be resolved with common proof, class certification is the superior method for litigating the claims of those Minnesota farmers who have not filed an individual action. Any remaining individual issues do not make class actions any more unmanageable than individual actions would be. The Court does not foresee any particular difficulties in the management of a class action and ascertaining the class members does not require difficult individual inquiries. Accordingly, a class action would be superior to other methods of adjudication of these claims.

For all of these reasons, the Court finds that the requirements of Rule 23.01 and Rule 23.02(c) are satisfied in this case.

ORDER

The above-entitled matter came on for hearing before the Honorable Thomas M. Sipkins, Judge of District Court, on August 11, 2016, pursuant to Defendants' motion for leave to file a Third-Party Complaint and to file under seal.

Attorney Lewis A. Remele, Jr., appeared on behalf of Plaintiffs.

Attorneys Patrick Philbin, Patrick Haney, and D. Scott Aberson appeared on behalf of Defendants.

Attorneys John W. Ursu and Kathryn Hibbard appeared on behalf of proposed Third-Party Defendants Cargill, Inc. and Cargill International SA.

Attorney David H. Hoffman appeared on behalf of proposed Third-Party Defendant Archer Daniels Midland.

Based on all the files, records and proceedings herein, together with the arguments of counsel, the Court makes the following:

ORDER

IT IS HEREBY ORDERED THAT:

Defendants' motion for leave to file a Third-Party Complaint and to file under seal is denied. Opinion to follow.

Consolidated Case

FILED
JUL 14 2014
MICHAEL E. KUNZ, Clerk
By ____ Dep. Clerk

ORDER FOR AN AWARD OF ATTORNEYS' FEES, REIMBURSEMENT OF EXPENSES, AND PAYMENT OF SERVICE AWARDS TO THE CLASS REPRESENTATIVES

WHEREAS, the Court, having considered: (a) Plaintiffs' Motion for Final Settlement Approval and supporting documents; (b) the Plan of Allocation and Distribution; (c) the Definitive Master Settlement Agreement, dated March 3, 2014, between and among the Plaintiffs, Plaintiffs' Class Counsel, and all Defendants (the "Settlement Agreement"); (d) the Court's March 17, 2014 Preliminary Approval Order (Dkt. No. 705); (e) Plaintiffs' Unopposed Motion for an Award of Attorneys' Fees, Reimbursement of Expenses, and Payment of Service Awards to the Class Representatives and supporting memorandum and exhibits; and, (f) any supplemental submissions in support thereof, having held a Fairness Hearing on July 14, 2014, and having considered all of the submissions and arguments with respect to the Settlement,[1] and otherwise being fully informed, and good cause appearing therefore;

7-14-14 mailed + e-mailed

[1] Certain capitalized terms used in this Order are defined in Section I of the Settlement Agreement.

IT IS HEREBY ORDERED AS FOLLOWS:

1. The Court has entered a separate order finally approving the Settlement Agreement, finding, among other things, that the Settlement Agreement was the result of extensive *bona fide* arm's-length good faith negotiations, is in all respects fair, reasonable, and adequate, is in the best interest of the Settlement Class, is within a range that responsible and experienced attorneys could accept considering all relevant risks and factors, and is in full compliance with all applicable requirements of the Federal Rules of Civil Procedure, the United States Constitution (including the Due Process Clause), the Class Action Fairness Act, and in light of the factors set forth in *Girsh v. Jepson*, 521 F.2d 153 (3d Cir. 1975).

2. Class Counsel have moved for an award of attorneys' fees and reimbursement of expenses from the Aggregate Settlement Fund. Pursuant to Rules 23(h)(3) and 54(d) of the Federal Rules of Civil Procedure, and pursuant to the factors for assessing the reasonableness of a class action fee request as set forth in *Gunter v. Ridgewood Energy Corp.*, 223 F.3d 190, 195 n.1 (3d Cir. 2000), and *In re Prudential Ins. Co. of American Sales Practices Litig.*, 148 F.3d 283, 340 (3d Cir. 1998), this Court makes the following findings of fact and conclusions of law:

(a) the Settlement confers an immediate monetary benefit to the Settlement Class of $130 million that is substantial, both in absolute terms, and when assessed in light of the risks of establishing liability and damages in this case;

(b) the Settlement also contains valuable prospective relief in the form of, among other things, (i) meaningful and enforceable commitments by Comdata to modify or not to enforce portions of Comdata's merchant services agreements with Settlement Class Members and the Major Chains that Plaintiffs had challenged in this case as being anticompetitive, and (ii) an agreement by Comdata to engage in a good faith negotiations relating to, *inter alia*, merchant

transaction fees with certain truck stop Buying Groups that are, collectively, composed of hundreds of members of the Settlement Class;

(c) Settlement Class Members were advised of Class Counsel's intention to seek attorneys' fees of one-third of only the cash value of the Settlement Fund, litigation costs of up to $7.5 million and service awards totaling $315,000 ($150,000 for Marchbanks Truck Service, Inc. d/b/a Bear Mountain Travel Stop ("Marchbanks Truck Service"), $75,000 for Gerald F. Krachey d/b/a Krachey's BP South ("Krachey"), $75,000 for Walt Whitman Truck Stop, Inc. ("Walt Whitman"), and $15,000 for Mahwah Fuel Stop ("Mahwah")) in the Long Form Notice, approved by this Court and mailed by the Settlement Administrator to Settlement Class members by the April 14, 2014 deadline established by the Court. Additionally, Settlement Class Members were informed about the fee, costs and service award requests through the Court approved Publication Notice, which was published in the May 2014 issue of NACS (National Association for Convenience and Fuel Retailing) Magazine and NATSO's e-newsletters for the weeks of April 14 through May 5, 2014, and which publications directed Settlement Class Members to the settlement website (www.truckstopantitrustsettlement.com) established by the Settlement Administrator that was launched on April 14, 2014. The settlement website contains copies of, *inter alia*, the Settlement Agreement and the Long Form Notice, both of which notify Settlement Class Members of the fee, costs, and service award requests.

(d) Class Counsel filed a motion for an award of attorneys' fees in the amount of one third of the Aggregate Settlement Fund ($43,333,333) plus interest earned on that amount since the Aggregate Settlement Fund was created, as well as reimbursement of reasonable costs and expenses incurred in the prosecution of this action of $6,696,856.98. Plaintiffs' motion papers have been publicly available since May 5, 2014, on the docket of this

action and on the settlement website;

(e) Representatives of four major Independent Truck Stop Buying Groups, collectively representing hundreds of Settlement Class Members, submitted declarations expressing affirmative support for the fee request, the request for reimbursement of expenses, and the requested service awards;

(f) Class Counsel have effectively and efficiently prosecuted this difficult and complex action on behalf of the members of the Settlement Class for seven years, with no guarantee they would be compensated for their time or reimbursed for their out-of-pocket costs;

(g) Class Counsel undertook numerous and significant risks of nonpayment in connection with the prosecution of this action;

(h) Class Counsel have reasonably expended 85,907.47 hours prosecuting this complex, contingent litigation over the past seven years, resulting in a total lodestar of $49,785.073.74, and reasonably incurred $6,696,856.98 in out-of-pocket expenses, in prosecuting this action, with no guarantee of recovery;

(i) the Settlement achieved for the benefit of the Settlement Class was obtained as a direct result of Class Counsel's skillful advocacy;

(j) the Settlement was reached following negotiations held in good-faith and in the absence of collusion;

(k) the "percentage-of-the-fund" method is the proper method for calculating attorneys' fees in common fund class actions in this Circuit (*see, e.g., In re Rite Aid Sec. Litig.*, 396 F.3d 294, 305 (3d Cir. 2005));

(l) fee awards of one-third of the settlement amount are commonly awarded in this Circuit, while here Class Counsel seek only a fee of one-third of the cash value of the

Settlement, even though the Settlement has valuable prospective relief;

(m) as detailed in Class Counsel's declarations, a fee of one-third of the cash competent of the Settlement would equate to less than Class Counsel's total lodestar and thus result in a multiplier below 1, and therefore no risk premium whatsoever;

(n) Plaintiffs' expert economist, Dr. Hal J. Singer, submitted a Declaration to this Court dated March 4, 2014, detailing an economic analysis of the portion of the prospective relief relating to the enforceable changes in Comdata's merchant services agreements, and valuing that relief at between $260 million and $491 million. Plaintiffs' expert economist has, therefore, opined that the total value of the Settlement to the Settlement Class is between $390 million and $621 million. Thus, if Dr. Singer is correct, the fee Class Counsel is seeking is, at most, slightly more than 11% of the total value of the Settlement;

(o) in light of the factors and findings described above, the requested fee award is within the applicable range of reasonable percentage of the fund awards.

3. Accordingly, Class Counsel are hereby awarded attorneys' fees to be paid from the Aggregate Settlement Fund in the amount of $43,333,333 plus interest in the amount of $19,674, which represents the interest earned on that amount since the Aggregate Settlement Fund was created. The Court finds this award to be fair and reasonable.

4. Further Class Counsel are hereby awarded $6,696,856.98 out of the Aggregate Settlement Fund to reimburse them for the expenses they incurred in the prosecution of this lawsuit, which expenses the Court finds to be fair and reasonably incurred to achieve the benefits to the Settlement Class obtained in the Settlement. The awarded fees and expenses shall be paid to Class Counsel from the Aggregate Settlement Fund in accordance with the terms of the Settlement Agreement.

5. Plaintiffs' Co-Lead Class Counsel[2] shall allocate the fees and expenses among all of Class Counsel in a manner that Plaintiffs' Co-Lead Class Counsel in good faith believes reflects the contributions of each firm working for Plaintiffs and the Settlement Class in the prosecution and settlement of the claims against Defendants in this action.

6. Plaintiffs have requested that the Court approve Class Representatives receiving service awards from the Aggregate Settlement Fund of $150,000 for Marchbanks Truck Service, $75,000 Krachey, $75,000 for Walt Whitman, and $15,000 for Mahwah. In the Third Circuit, service awards may be paid to class representatives to reward efforts that benefit the class. This Court makes the following findings of fact and conclusions of law regarding each of the Class Representatives' service to the Settlement Class in this litigation:

a. Marchbanks Truck Service: (a) through its owner, William Patrick "Pat" Marchbanks, was one of the driving forces behind this lawsuit being filed and prosecuted; (b) submitted its employees, including Mr. Marchbanks twice, to three depositions, requiring many hours of preparation and travel time; (c) dedicated hundreds of hours, mostly by Mr. Marchbanks (i) assisting Class Counsel in the investigation and development of an initial complaint, (ii) overseeing Class Counsel's prosecution of this litigation and settlement negotiations, (iii) traveling to and attending multiple Court hearings, settlement conferences, and mediations, (iv) responding to numerous document requests and interrogatories, (v) producing documents, and (vi) interfacing with Settlement Class members and representatives of the Buying Groups.

b. Krachey: (a) submitted its employee, Douglas Krachey, to two depositions, requiring several hours of preparation and travel time; (b) dedicated numerous hours (i) assisting Class Counsel in the investigation and development of an initial complaint, (ii)

[2] Plaintiffs' Co-Lead Class Counsel are Berger & Montague, P.C., Lieff, Cabraser, Heimann & Bernstein, LLP and Quinn Emanuel Urquhart & Sullivan, LLP. *See* Preliminary Approval Order at ¶ 7 (Dkt. 705).

overseeing Class Counsel's prosecution of this litigation and settlement negotiations, (iii) responding to numerous document requests and interrogatories, and (iv) producing documents.

c. Walt Whitman: (a) diligently represented the interest of the Settlement Class despite having been out of business since before the first complaint was filed and thus having its damages capped at pre-complaint overcharges; (b) submitted David Silverman to two depositions—requiring several hours of preparation and travel time—even though Walt Whitman did not operate as a truck stop between the two depositions; (c) dedicated time (i) assisting Class Counsel in the investigation and development of an initial complaint, (ii) overseeing Class Counsel's prosecution of this litigation and settlement negotiations, (iii) responding to numerous document requests and interrogatories, and (iv) producing documents.

d. Mahwah: (a) submitted an employee for a deposition, requiring several hours of preparation and travel time; (b) dedicated numerous hours (i) assisting Class Counsel in the investigation and development of an initial complaint, (ii) overseeing Class Counsel's prosecution of this litigation and settlement negotiations, (iii) responding to numerous document requests and interrogatories, and (iv) producing documents.

7. In recognition of the above facts regarding the service of the Class Representatives to the Settlement Class, the Class Representatives are hereby awarded service awards in the following amounts as requested by Class Counsel: $150,000 for Marchbanks Truck Service, Inc. d/b/a Bear Mountain Travel Stop, $75,000 for Gerald F. Krachey d/b/a Krachey's BP South, $75,000 for Walt Whitman Truck Stop, Inc., and $15,000 for Mahwah Fuel Stop out of the Aggregate Settlement Fund. The Court finds these awards to be fair and reasonable. These awards are in addition to whatever monetary amounts the Class Representatives may be receiving from the Aggregate Settlement Fund pursuant to the Plan of Distribution.

SO ORDERED this the 14th day of July, 2014.

Hon. James Knoll Gardner

FOR THE DISTRICT OF NEW JERSEY

In re Neurontin Antitrust Litigation	
THIS DOCUMENT RELATES TO:	
LOUISIANA WHOLESALE DRUG COMPANY, INC., MEIJER, INC. and MEIJER DISTRIBUTION, INC., on behalf of themselves and all others similarly situated,	**Civil Action No. 02-1830** **Civil Action No. 02-2731**
Plaintiffs,	
v.	
PFIZER, INC. and WARNER-LAMBERT CO.,	
Defendants.	

FINAL JUDGMENT AND ORDER OF DISMISSAL APPROVING PROPOSED CLASS SETTLEMENT AND DISMISSING ACTIONS

Pursuant to Rule 23(e) of the Federal Rules of Civil Procedure, and in accordance with the terms of the Settlement Agreement dated April 17, 2014, it is hereby ORDERED as follows:

1. This Final Judgment and Order of Dismissal hereby incorporates by reference the definitions in the Settlement Agreement among the parties to these actions on file with this Court, and all capitalized terms used and not otherwise defined herein shall have the meanings set forth in the Settlement Agreement.

2. The Court has jurisdiction over these actions and over each of the parties and over

all members of the Class.

3. The notice of settlement (in the forms presented to this Court as Exhibits B-1 and B-2 to the Settlement Agreement) (the "Notice") directed to the members of the Class, constituted the best notice practicable under the circumstances. In making this determination, the Court finds that the Notice provided for individual notice to all Class members who were identified through reasonable efforts. Pursuant to, and in accordance with, Rule 23 of the Federal Rules of Civil Procedure, the Court hereby finds that the Notice provided Class members due and adequate notice of the Settlement, the Settlement Agreement, these proceedings and the rights of Class members to object to the Settlement.

4. The Court held a preliminary fairness hearing on May 1, 2014 and a final fairness hearing on July 31, 2014, regarding the reasonableness of the parties' settlement. Pursuant to Rule 23 of the Federal Rules of Civil Procedure, this Court hereby approves the Settlement, and finds that the Settlement is, in all respects, fair, reasonable and adequate to Class members. Accordingly, the Settlement shall be consummated in accordance with the terms and provisions of the Settlement Agreement.[1]

---

[1] The Court has fully considered the *Girsh* factors and finds that, considered together, the factors overwhelming favor approval of the Class settlement. *Girsh v. Jepson*, 521 F.2d 153, 157 (3d Cir. 1975); *see also In re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions*, 148 F.3d 283, 323 (3d Cir. 1998). As the Court indicated at the fairness hearing, every issue in this complex antitrust case has been vigorously litigated by both sides for over twelve years. Class Plaintiffs faced significant risks in taking the case to trial, which this Court has discussed in its opinions on dispositive motions and recent status conferences. This Court agrees with counsel's position, as discussed in the extensive briefing and supporting affidavits, that the Settlement Agreement is fair and reasonable for all Class members. The value of the settlement to the Class is confirmed by the fact that no members of the Class of identifiable, sophisticated business

5. The Court hereby approves the Plan of Allocation of the Settlement Fund as proposed by Class Counsel (the "Plan"), which was summarized in the Notice of Proposed Settlement. The Claims Administrator is directed to distribute the net Settlement Fund as provided in the Plan.

6. The Court has certified a Class consisting of "[a]ll persons or entities in the United States that purchased Neurontin from Pfizer at any time during the period of December 11, 2002 through August 31, 2008 and who have purchased generic gabapentin. Excluded from the Class are Defendants and each of their respective parents, employees, subsidiaries, affiliates, and franchisees, and all government entities."

7. Also excluded from the Class are CVS Pharmacy Inc., Caremark, L.L.C., Rite Aid Corporation, Rite Aid HDQTRS Corp., Walgreen Co., American Sales Co, Inc., HEB Grocery Co. LP, Safeway Inc., SuperValu Inc., and The Kroger Co., in their own right as direct purchasers of Neurontin from Pfizer and as assignees limited to their purchases of Neurontin from Class members.

8. The Court has found that the Class meets all the requirements of Fed. R. Civ. P. 23. The Class, made up of sophisticated business entities, had a full and fair opportunity to request exclusion at the time of class certification and, therefore, there is no reason for the Court to afford a new opportunity to individual Class members to request exclusion who had an earlier opportunity to request exclusion but did not do so.

---

entities have objected, rather many have explicitly approved of the Settlement.

9. The Court has appointed Louisiana Wholesale Drug company, Inc., Meijer, Inc., and Meijer Distribution, Inc. as class representatives (the "Class Representatives").

10. The Court has found that Co-Lead Counsel, listed below, along with other Class Counsel, have fairly and adequately represented the interests of the Class and satisfied the requirements of Fed. R. Civ. P. 23(g):

Bruce E. Gerstein, Esq.
GARWIN GERSTEIN & FISHER LLP
88 Pine Street, 10th Floor
New York, NY 10005

Richard J. Kilsheimer, Esq.
KAPLAN FOX & KILSHEIMER LLP
850 Third Avenue, 14th Floor
New York, NY 10022

11. The following actions are hereby dismissed with prejudice, as provided in the Settlement Agreement, and without costs, except as provided for herein and in the Settlement Agreement:

- *Louisiana Wholesale Drug Company, Inc., et al. v. Pfizer, Inc. and Warner-Lambert,* No. 2:02-cv-01830-FSH (D.N.J.)
- *Meijer, Inc., et al. v. Pfizer, Inc. and Warner-Lambert*, No. 2:02-cv-02731 (D.N.J.)

12. Each of the foregoing dismissals shall become effective upon the date the Settlement becomes final in accordance with paragraph 4 of the Settlement Agreement.

13. Upon this Settlement becoming final in accordance with paragraph 4 of the Settlement Agreement, Defendants and their past, present and future parents, subsidiaries, divisions, affiliates, joint ventures, stockholders, officers, directors, management, supervisory

boards, insurers, general or limited partners, employees, agents, trustees, associates, attorneys and any of their legal representatives (and the predecessors, heirs, executors, administrators, successors and assigns of each of the foregoing) (the "Released Parties") are and shall be unconditionally, fully and finally released and forever discharged from all manner of claims, debts, obligations, demands, actions, suits, causes of action, damages whenever incurred, liabilities of any nature whatsoever, including costs, expenses, penalties and attorneys' fees, known or unknown, suspected or unsuspected, accrued in whole or in part, in law or equity, that Plaintiffs or any member or members of the Class (including any of their past, present or future officers, directors, insurers, general or limited partners, divisions, stockholders, agents, attorneys, employees, legal representatives, trustees, parents, associates, affiliates, joint ventures, subsidiaries, heirs, executors, administrators, predecessors, successors and assigns, acting in their capacity as such) (the "Releasors"), whether or not they object to the Settlement and whether or not they make a claim upon or participate in the Settlement Fund, ever had, now has, or hereafter can, shall or may have, directly, representatively, derivatively or in any other capacity, arising out of or relating in any way to any conduct alleged or asserted in any of Plaintiffs' complaints filed in this Class Action, relating to any alleged delay in the marketing, sale, manufacture, pricing, or purchase of, or the enforcement of intellectual property related to Neurontin or its generic equivalents, prior to the date hereof, except the Settlement does not release any claims between Plaintiffs, members of the Class and the Released Parties concerning product liability, breach of contract, breach of warranty or personal injury (the "Released Claims").

14. In addition, Plaintiffs and each Class member, on behalf of themselves and all

other Releasors, hereby expressly waive, release and forever discharge, upon the Settlement becoming final, any and all provisions, rights and benefits conferred by § 1542 of the California Civil Code, which reads:

> Section 1542. General Release; extent. A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor;

or by any law of any state or territory of the United States or other jurisdiction, or principle of common law, which is similar, comparable or equivalent to § 1542 of the California Civil Code. Each Class member may hereafter discover facts other than or different from those which he, she or it knows or believes to be true with respect to the claims which are the subject matter of this paragraph 13, but each Class member hereby expressly waives and fully, finally and forever settles, releases and discharges, upon this Settlement becoming final, any known or unknown, suspected or unsuspected, asserted or un-asserted, contingent or non-contingent claim that would otherwise fall within the definition of Released Claims, whether or not concealed or hidden, without regard to the subsequent discovery or existence of such different or additional facts. Each Class member also hereby expressly waives and fully, finally and forever settles, releases and discharges any and all claims it may have against any Released Party under § 17200, *et seq*, of the California Business and Professions Code or any similar, comparable or equivalent provision of the law of any other state or territory of the United States or other jurisdiction, which claims are expressly incorporated into the definition of Released Claims.

15. The releases set forth in paragraphs 13 and 14 of this Order shall not release any claims between Plaintiffs, Class members and the Released Parties concerning product liability,

breach of contract, breach of warranty, or personal injury.

16. Upon consideration of Class Counsel's petition for fees, costs and expenses, Co-Lead Counsel, on behalf of all counsel for the Class, are hereby awarded attorneys' fees in the amount of 33⅓% of the Settlement Fund and costs and expenses totaling $2,213,537.35, together with a proportionate share of the interest thereon from the date the funds are deposited in the Escrow Account until payment of such attorneys' fees, costs and expenses, at the rate earned by the Settlement Fund, to be paid solely from the Settlement Fund and only if and after the Settlement becomes final in accordance with paragraph 4 of the Settlement Agreement. Upon consideration of Class Counsel's petition for incentive payments for Plaintiffs in these actions, LWD and Meijer are each hereby awarded an incentive award in the amount of $100,000.00, to be paid solely from the Settlement Fund, and only if and after the Settlement becomes final in accordance with paragraph 4 of the Settlement Agreement. Co-Lead Counsel shall allocate and distribute such attorneys' fees, costs and expenses among the various Class Counsel that have participated in this litigation. Co-Lead Counsel shall distribute such incentive awards to the Plaintiffs as provided herein. The Released Parties (as defined in paragraph 10 of the Settlement Agreement) shall have no responsibility for, and no liability whatsoever with respect to, any payment or disbursement of attorneys' fees, expenses, costs or incentive awards among Class Counsel and/or Plaintiffs, or with respect to any allocation of attorneys' fees, expenses, costs or incentive awards to any other person or entity who may assert any claim thereto. The attorneys' fees, costs and expenses, and incentive award authorized and approved by this Final Judgment and Order shall be paid to Co-Lead Counsel within five (5) business days after this

Settlement becomes final pursuant to paragraph 4 of the Settlement Agreement and in accordance with the terms of the Settlement Agreement and the Escrow Agreement. The attorneys' fees, costs and expenses, and incentive awards authorized and approved by this Final Judgment and Order shall constitute full and final satisfaction of any and all claims that Plaintiffs and any Class member, and their respective counsel, may have or assert for reimbursement of fees, costs, and expenses, and incentive awards, and Plaintiffs and members of the Class, and their respective counsel, shall not seek or demand payment of any fees and/or costs and/or expenses and/or incentive awards from any source other than the Settlement Fund. The Court retains exclusive jurisdiction over the Settlement and the Settlement Agreement as described therein, including the award of attorneys' fees to Plaintiffs' Counsel, the reimbursement of expenses, the award of incentive payments to Plaintiffs, and the administration and consummation of the Settlement, and over this Final Judgment and Order.

17. The Court finds that this Final Judgment and order adjudicates all of the claims, rights and liabilities of the parties to the Settlement Agreement (including the members of the Class), and is final and shall be immediately appealable. Neither this Order nor the Settlement Agreement nor any other Settlement-related document shall constitute any evidence or admission of liability by Defendants or any other Released Party, nor shall either the Settlement Agreement or this Order or any other Settlement-related document be offered in evidence or used for any other purpose in this or any other matter or proceeding except as may be necessary to consummate or enforce the Settlement Agreement of the terms of this Order or if offered by any Released Party in responding to any action purporting to assert Released Claims.

18. Class Counsel for the Direct Purchaser Class Plaintiffs have moved for an award of attorneys' fees, reimbursement of expenses, and incentive awards for class representatives. (Doc. No. 749). Pursuant to Rule 23(h) of the Federal Rules of Civil Procedure, and pursuant to the factors for assessing the reasonableness of a class action fee request as set forth in *Gunter v. Ridgewood Energy Corp.*, 223 F.3d 190, 195 n.1 (3d Cir. 2000), this Court makes the following findings of fact and conclusions of law with respect to Class Counsel's request for an award of attorneys' fees, reimbursement of expenses, and incentive awards for Class Representatives:

19. The Settlement of $190,416,438.36 million (the "Settlement Fund"), representing the agreed-upon $190 million plus 1% per annum interest that had accrued from March 14, 2014 (the date that the parties first orally agreed to the Settlement's terms) to June 2, 2014 (the date that defendants deposited such amount into an escrow account held in trust by UBS AG that is earning interest for the benefit of the Class), plus interest on the Settlement Fund from June 2, 2014, confers a monetary benefit on the Direct Purchaser Class that is substantial, both in absolute terms and when assessed in light of the risks of establishing liability and damages in this case. The Settlement was reached following negotiations held in good-faith and in the absence of collusion, with the aid of a highly-renowned mediator, over the course of three mediation sessions, covering six days.

20. The Court-approved Notice of Proposed Settlement of Class Action (Doc. No. 727) advised Class Members that Class Counsel intended to move for an award of attorneys' fees in an amount up to 33-1/3% of the gross Settlement Fund (including the interest accrued thereon), plus reimbursement of reasonable costs and expenses incurred in the prosecution of this action.

21. Class Counsel have moved for an award of attorneys' fees in the amount of 33-1/3% of the gross Settlement Fund (including the interest accrued thereon), plus reimbursement of reasonable costs and expenses incurred in the prosecution of this action, which such motion has been on the docket and publicly available since July 1, 2014.

22. In prosecuting this action, Class Counsel expended over 60,570 hours of uncompensated time, and incurred substantial out of pocket expenses, with no guarantee of recovery. Class Counsel's hours were reasonably expended in this complex case that was vigorously litigated for over twelve years, and their time was expended at significant risk of nonpayment.

23. No Class Members objected to Class Counsel's fee request. In fact, as described below, the reaction of the Class has been entirely positive and supportive of the Settlement generally and Class Counsel's requested fee award specifically.

24. The Settlement achieved for the benefit of the Direct Purchaser Class was obtained as a direct result of Class Counsel's skillful advocacy. This is confirmed by the entirely positive reaction of the Class Members to the Settlement and Class Counsel's request for a fee award of 33-1/3% of the Settlement. Outside antitrust counsel for the country's three largest pharmaceutical distributors, who made in excess of 70% of the branded and generic Neurontin purchases at issue in this case, wrote to the Court on behalf of their clients to express their clients' support for the Settlement and Class Counsel's request for an award of one-third of the Settlement amount. *See* Exhibits 2-4 to the Joint Declaration of Bruce E. Gerstein and Richard J. Kilsheimer in Support of Direct Purchaser Class Plaintiffs' Motions for Final Approval of Settlement and for

an Award of Attorneys' Fees, Reimbursement of Expenses and Incentive Awards to Class Representatives (the "Joint Declaration" or "Joint Decl.," Doc. No. 748-5) (Doc. Nos. 748-7 – 748-9) (letters to the Court from outside counsel to AmerisourceBergen Corporation, Cardinal Health, Inc., and McKesson Corporation). In addition, a number of other Class Members wrote directly to the Court stating their belief that Class Counsel's requested fees are justified in light of the time and expense that Class Counsel expended prosecuting and favorably resolving this complex litigation. *See* Exhibits 5-12 to the Joint Declaration (Doc. Nos. 748-9 – 748-17) (letters from Class Members Burlington Drug Company, Inc., Dakota Drug, Inc., Drogueria Betances, Inc., King Drug Company of Florence, Inc., Miami-Luken, Inc., Prescription Supply, Inc., J M Smith Corporation d/b/a Smith Drug Co., and Value Drug Co.). All of the above-mentioned Class Members who have written to the Court to express their support for the Settlement and Class Counsel's fee request account for approximately 93% of the purchases at issue in this litigation.

25. The "percentage-of-the-fund" method is the proper method for calculating attorneys' fees in common fund class actions in this Circuit. *See, e.g., In re Rite Aid Sec. Litig.*, 396 F.3d 294, 305 (3d Cir. 2005). The Court concludes that that the fees requested by Class Counsel are comparable to recent awards in similar cases in the Third Circuit and elsewhere, including direct purchaser class actions similarly alleging anticompetitive practices in the pharmaceutical industry.

26. The Court finds that Class Counsel's request for a 33-1/3% fee is consistent with what would have been negotiated for a contingent-fee case of this complexity. For example, the current and former presidents of class representative Louisiana Wholesale Drug Co., Inc. ("LWD")

attested that "had LWD retained the law firms and/or attorneys . . . to represent it in an individual action in this complex litigation, LWD would have retained these same attorneys based on a 33 1/3% contingency fee in the event of settlement or compromise without trial and/or based on a 40% contingency fee in the event of trial, with any applicable contingency fee percentage computed in addition to out-of-pocket expenses." Exhibit 13 to the Joint Decl., Declaration of Chad Gielen, President/Chief Executive Office of LWD, at ¶ 6, and Exhibit 14 to the Joint Decl., Declaration of Gayle White, former President and General Manager of LWD, at ¶ 3. Furthermore, the letters from the Class Members supporting Class Counsel's fee award is further evidence that the 33-1/3% fee award is consistent with what those entities would have assented to had they retained Class Counsel in private litigation.

27. As detailed in Class Counsel's affidavits, a one-third fee award would equate to a lodestar multiplier of approximately 1.99. The Court concludes that, based on recently-approved multipliers in other Third Circuit antitrust class actions alleging similar anticompetitive practices in the pharmaceutical market, the multiplier requested here is well within the acceptable range. *See, e.g., In re Flonase Antitrust Litigation*, 951 F. Supp. 2d 739, 750 (E.D. Pa. 2013) (approving 33 1/3% fee award of $150 million settlement that amounted to multiplier of 2.99).

28. In light of the factors and findings described above, the Court finds that the requested 33-1/3% fee award is within the applicable range of reasonable percentage fund awards.

29. The Court finds this fee award is reasonable pursuant to Federal Rule of Civil Procedure 23(h). The Court orders that Class Counsel request for attorneys' fees of 33-1/3% of the Settlement Fund, which equates to $63,472,146.12, plus one-third of the interest earned on the

Settlement Fund from June 2, 2014 (the date of funding of the Settlement Fund) to the date of payment, at the same net interest rate earned by the Settlement Fund, is granted.

30. Further, the Court orders that Class Counsel is awarded $2,213,537.35 out of the Settlement Fund to reimburse them for the expenses incurred in prosecution of this case, which such expenses the Court finds to be fair and reasonably incurred to achieve the benefits to the Direct Purchaser Class obtained by the Settlement.

31. Further, the Court orders payment of two incentive awards of $100,000 each for each of the Class Representatives – one incentive award of $100,000 to LWD and one incentive award to "Meijer", which consists of Meijer, Inc. and Meijer Distribution, Inc. (together, "Meijer") – for their active participation and assistance in the prosecution of this case, including responding to document requests and interrogatories, appearing for deposition and keeping apprised of the progress of the case, including settlement efforts. The Class Representatives' efforts contributed to the benefits conferred upon the Class through the Settlement. In addition, no Class Member has objected to the awarding of these incentive awards. Moreover, the three largest pharmaceutical distributors have specifically supported granting incentive awards in the requested amounts. *See* Exhibits 2-4 to the Joint Decl. (Doc. Nos. 748-7 – 748-9) (letters to the Court from outside counsel to AmerisourceBergen Corporation, Cardinal Health, Inc., and McKesson Corporation).

IT IS SO ORDERED.

Dated: 8-6-14

ORDER

Upon review of Class Plaintiffs' Motion for Award of Attorneys' Fees, Reimbursement of Expenses and Incentive Award to the Named Plaintiffs, it is hereby ordered:

Class Plaintiffs' motion is GRANTED. The Court finds that the requested award of attorneys' fees, amounting to (i) 25% plus accrued interest of the Degussa Settlement Fund, and (ii) 25% plus accrued interest of the Atofina Settlement Fund, to be fair and reasonable and that notice to potential members of the Settlement Class has been given in an adequate and sufficient manner complying in all respects with the requirements of Federal Rule of Civil Procedure 23(e). The notice properly informed Class members that the Degussa and Atofina Settlement Agreements provide that, after Court approval, the payment of attorneys' fees and unreimbursed costs and expenses may be paid out of the Settlement Fund. No Settlement Class member objected to Class Counsel being paid such amounts out of the Settlement Fund. Moreover, neither Degussa nor Atofina have opposed Class Counsel's request for attorneys' fees. Accordingly, the Court awards Class Counsel attorneys' fees in the amount of $5,250,000 plus accrued interest.

The Court further awards Class Counsel $942,776.50 in unreimbursed costs and expenses, and $100,000 as in incentive award to the named plaintiff Ivax Corporation, and $100,000 as an incentive award to the named plaintiff Polyvel, Inc. for their respective roles in bringing about the recovery on behalf of the Class. The notice properly informed Class members that these incentive awards and unreimbursed expenses may be paid out of the Settlement Fund and no Class member objected to Class Counsel being paid such amounts out of the Settlement Fund.

So ORDERED this _24th__ day of August, 2005.

MEMORANDUM OPINION AND ORDER

On February 21, 2017, the Erica P. John Fund, Inc. ("EPJF"), Lead Plaintiff in this securities class action case, filed a Stipulation of Settlement, (ECF No. 794), and a Motion for Preliminary Approval of Class Action Settlement, (ECF No. 795). The Court granted preliminary approval. (ECF No. 805).

EPJF then filed the Motion for Final Approval of Class Action Settlement and Plan of Allocation. (ECF No. 818). Class Counsel—Boies Schiller Flexner LLP ("BSF"), Kahn Swick & Foti, LLC ("KSF"), and Lawrence "Larry" Vincent—filed the Motion for Award of Attorneys' Fees and Reimbursement of Litigation Expenses. (ECF No. 820). Several other firms have also moved for fees and expenses, namely Federman & Sherwood, (ECF No. 812), Kilgore & Kilgore, PLLC (ECF No. 815), and Robbins Geller Rudman & Dowd LLP, (ECF No. 817). Robbins Geller Rudman & Dowd has since withdrawn its request for fees and instead seeks only expenses. (ECF No. 823).

On July 31, 2017, the Court held a final fairness hearing regarding the Motion for Final Approval and heard argument on the fee and expense motions. For the reasons stated below and

on the record, the Motion for Final Approval of Class Action Settlement and Plan of Allocation is **GRANTED**; Class Counsel's Motion for Award of Attorneys' Fees and Reimbursement of Litigation Expenses is **GRANTED**; Federman & Sherwood's Motion for Attorney Fees and Reimbursement of Expenses is **GRANTED IN PART** and **DENIED IN PART**; Kilgore & Kilgore's Motion for Award of Attorneys' Fees and Expenses is **GRANTED IN PART** and **DENIED IN PART**; and Robbins Geller Rudman & Dowd's Motion for Award of Expenses is **GRANTED**.

I. Factual and Procedural Background

a. Background of the Case

> Erica P. John Fund, Inc. (EPJ Fund), is the lead plaintiff in a putative class action against Halliburton and one of its executives (collectively Halliburton) alleging violations of section 10(b) of the Securities Exchange Act of 1934, and Securities and Exchange Commission Rule 10b–5. According to EPJ Fund, between June 3, 1999, and December 7, 2001, Halliburton made a series of misrepresentations regarding its potential liability in asbestos litigation, its expected revenue from certain construction contracts, and the anticipated benefits of its merger with another company—all in an attempt to inflate the price of its stock. Halliburton subsequently made a number of corrective disclosures, which, EPJ Fund contends, caused the company's stock price to drop and investors to lose money.

Halliburton Co. v. Erica P. John Fund, Inc., 134 S. Ct. 2398, 2405–08 (2014) (*Halliburton I*). Numerous complaints alleging misrepresentations by Halliburton were filed in 2002 and consolidated into this action. (ECF No. 22). Four lead plaintiffs were appointed, including the Archdiocese of Milwaukee Supporting Fund, Inc. ("AMSF"), the precursor in name to EPJF. (*Id.* at 22). Schiffrin & Barroway, LLP ("S&B") was appointed as lead counsel, and Federman & Sherwood ("F&S") and The Emerson Firm were appointed co-liaison counsel. (*Id.*)

On May 10, 2004, all lead plaintiffs except for AMSF moved for preliminary approval of settlement, asserting that all claims had been settled for $6 million. (ECF No. 94). AMSF opposed the settlement, arguing that it had not been included in settlement discussions and that

the proposed figure was insufficient. AMSF further moved to have S&B removed as lead counsel. Following a final fairness hearing, the Court denied approval and held that there was insufficient proof that the proposed settlement was fair, reasonable, and adequate. (ECF No. 133 at 16). On October 7, 2004, Kilgore & Kilgore, PLLC ("K&K") was appointed local counsel for AMSF. (ECF No. 149). On May 3, 2005, S&B was removed as lead counsel. (ECF No. 195). AMSF became the sole remaining lead plaintiff in the action, and at its request and with the Court's approval, Scott+Scott, LLP and Lerach Coughlin Stoia Geller Rudman & Robbins LLP were appointed co-lead counsel. (*Id.*)

In February of 2007, Scott+Scott and Lerach Coughlin Stoia Geller Rudman & Robbins were relieved of their duties as lead counsel and were replaced by BSF. (ECF No. 308). AMSF subsequently changed its name to the "Erica P. John Fund, Inc." (ECF No. 472). At the class certification stage, the case was subject to multiple appeals, and the Supreme Court granted certiorari twice to resolve various issues. *See Halliburton I*, 563 U.S. 804 (2011); *Halliburton Co. v. Erica P. John Fund, Inc.*, 134 S. Ct. 2398 (2014) (*Halliburton II*). The following excerpt from *Halliburton II* provides a concise summary of the procedural history and legal issues raised during this stage:

> EPJ Fund moved to certify a class comprising all investors who purchased Halliburton common stock during the class period. . . . [E]xcept for one difficulty, the court would have also concluded that the class satisfied the requirement of Rule 23(b)(3) that "the questions of law or fact common to class members predominate over any questions affecting only individual members." The difficulty was that Circuit precedent required securities fraud plaintiffs to prove "loss causation"—a causal connection between the defendants' alleged misrepresentations and the plaintiffs' economic losses—in order to invoke Basic's presumption of reliance and obtain class certification. Because EPJ Fund had not demonstrated such a connection for any of Halliburton's alleged misrepresentations, the District Court refused to certify the proposed class. The United States Court of Appeals for the Fifth Circuit affirmed the denial of class certification on the same ground. *Archdiocese of Milwaukee Supporting Fund, Inc. v. Halliburton Co.*, 597 F.3d 330 (2010).

> We granted certiorari and vacated the judgment, finding nothing in "Basic or its logic" to justify the Fifth Circuit's requirement that securities fraud plaintiffs prove loss causation at the class certification stage in order to invoke Basic's presumption of reliance. *Erica P. John Fund, Inc. v. Halliburton Co.*, 563 U.S. ——, ——, 131 S.Ct. 2179, 2185–2186, 180 L.Ed.2d 24 (2011) (*Halliburton I*). "Loss causation," we explained, "addresses a matter different from whether an investor relied on a misrepresentation, presumptively or otherwise, when buying or selling a stock." We remanded the case for the lower courts to consider "any further arguments against class certification" that Halliburton had preserved.
>
> On remand, Halliburton argued that class certification was inappropriate because the evidence it had earlier introduced to disprove loss causation also showed that none of its alleged misrepresentations had actually affected its stock price. . . . The District Court declined to consider Halliburton's argument, holding that the Basic presumption applied and certifying the class under Rule 23(b)(3).
>
> The Fifth Circuit affirmed. 718 F.3d 423 (2013). The court found that Halliburton had preserved its price impact argument, but to no avail. *Id.*, at 435–436. While acknowledging that "Halliburton's price impact evidence could be used at the trial on the merits to refute the presumption of reliance," *id.*, at 433, the court held that Halliburton could not use such evidence for that purpose at the class certification *2407 stage, *id.*, at 435. "[P]rice impact evidence," the court explained, "does not bear on the question of common question predominance [under Rule 23(b)(3)], and is thus appropriately considered only on the merits after the class has been certified." *Ibid.* We once again granted certiorari, this time to resolve a conflict among the Circuits over whether securities fraud defendants may attempt to rebut the Basic presumption at the class certification stage with evidence of a lack of price impact.

Halliburton II, 134 S. Ct. at 2405–08. In *Halliburton II*, the Supreme Court held that Halliburton could introduce evidence of a lack of price impact at the class certification stage to show the absence of predominance. *Id.* at 2414–17. The Supreme Court again vacated the judgment of the Fifth Circuit and remanded the case to this Court for further proceedings. *Id.* at 2417. After briefing and oral argument addressing *Halliburton II*, this Court certified the class. (ECF No. 601). After Defendants took another appeal to the Fifth Circuit, EPJF filed the Stipulation of Settlement. (ECF No. 794).

b. Summary of the Settlement

The Stipulation of Settlement is between EPJF, on behalf of itself and each of the class members, and Defendants Halliburton Company and David Lesar. (ECF No. 794). Plaintiffs are

agreeing to release all claims based on the purchase or acquisition of common stock during the Class Period, which is defined as between August 16, 1999, and December 7, 2001, inclusive. The Parties agreed to settle the case for $100,000,000.00 subject to the Court's approval. The Stipulation of Settlement does not include claims stemming from purchases of stock between December 8, 2001, and July 22, 2002, which are part of the *Magruder* putative class action. *See Magruder v. Halliburton Co.*, No. 3:05-cv-1156-M (N.D. Tex.). These claims are expressly not released.

II. Motion for Final Approval of Class Action Settlement

Under Rule 23(e), a court must review any "settlement, voluntary dismissal, or compromise" of the "claims, issues, or defenses of a certified class." FED. R. CIV. P. 23(e). Rule 23(e) establishes certain procedures in considering a proposed settlement, each of which will be considered in turn:

> (1) The court must direct notice in a reasonable manner to all class members who would be bound by the proposal.
>
> (2) If the proposal would bind class members, the court may approve it only after a hearing and on finding that it is fair, reasonable, and adequate.
>
> (3) The parties seeking approval must file a statement identifying any agreement made in connection with the proposal.
>
> (4) If the class action was previously certified under Rule 23(b)(3), the court may refuse to approve a settlement unless it affords a new opportunity to request exclusion to individual class members who had an earlier opportunity to request exclusion but did not do so.
>
> (5) Any class member may object to the proposal if it requires court approval under this subdivision (e); the objection may be withdrawn only with the court's approval.

Id.

a. Notice Must Be Directed in a Reasonable Manner to All Class Members

Notice of the settlement was reasonable, provided ample due process,[1] and satisfied the requirements for settlement notices set out in the Private Securities Litigation Act ("PSLA").[2] Notice was disseminated through the procedures provided in the Court's Preliminary Approval Order. (ECF No. 805). In the Motion for Final Approval, Class Counsel stated that by April 14, 2017, 42,194 copies of the notice had been mailed to potential class members identified through Halliburton's transfer agent records and their nominees, and as of June 28, 2017, an additional 67,008 copies had been sent. (ECF No. 818 at 21). Notice was published in *Investor's Business Daily* and disseminated on PR Newswire. (*Id.*) The Claims Administrator maintained a toll-free phone number and a website providing additional information; as of April 27, 2017, the Claims Administrator had received 56 calls and 174 hits on the website. (*Id.*) In terms of timing, the

[1] "There are no rigid rules to determine whether a settlement notice satisfies constitutional or Rule 23(e) requirements[.]" *Wal–Mart Stores, Inc. v. Visa U.S.A., Inc*., 396 F.3d 96, 114 (2d Cir. 2005). Instead, "a settlement notice need only satisfy the broad reasonableness standards imposed by due process." *In re Katrina Canal Breaches Litig*., 628 F.3d 185, 197 (5th Cir. 2010) (internal quotation marks omitted). Due process is satisfied if the notice provides class members with the "information reasonably necessary for them to make a decision whether to object to the settlement." *Id.*; *see also Wal–Mart Stores*, 396 F.3d at 114 (explaining that "the settlement notice must fairly apprise the prospective members of the class of the terms of the proposed settlement and of the options that are open to them in connection with the proceedings"). However, due process does not require actual notice to each party intended to be bound by the adjudication of a representative action. *Mullane v. Cent. Hanover Bank & Trust. Co.*, 339 U.S. 306, 313–14 (1950) ("A construction of the Due Process Clause which would place impossible or impracticable obstacles in the way could not be justified."); *In re Integra Realty Res., Inc*., 262 F.3d 1089, 1110–11 (10th Cir. 2001) (holding Rule 23 and due process requisites satisfied where the record indicated that only seventy-seven percent of class members actually received notice of the settlement).

[2] The PSLA requires that notices of settlement must state: (A) the amount of the settlement proposed to be distributed to the parties to the action, determined in the aggregate and on an average per share basis; (B) if the parties do not agree on the average amount of damages per share that would be recoverable if the plaintiff prevailed on each claim alleged under this chapter (as is the case here), a statement from each settling party concerning the issue or issues on which the parties disagree; (C) if any of the settling parties or their counsel intend to apply to the court for an award of attorneys' fees or costs from any fund established as part of the settlement, a statement indicating which parties or counsel intend to make such an application, the amount of fees and costs that will be sought (including the amount of such fees and costs determined on an average per share basis), and a brief explanation supporting the fees and costs sought; (D) the name, telephone number, and address of one or more representatives of counsel for the plaintiff class who will be reasonably available to answer questions from class members concerning any matter contained in any notice of settlement published or otherwise disseminated to the class; (E) a brief statement explaining the reasons why the parties are proposing the settlement; (F) such other information as may be required by the court. 15 U.S.C. § 78u-4(a)(7)(A)–(F).

class members had 87 days between the initial mailing of the notice on April 14, 2017, and the deadline to request exclusion from the class, which was on July 16, 2017. *See DeJulius v. New Eng. Health Care Emps. Pension Fund*, 429 F.3d 935, 946 (10th Cir. 2005) (notice program upheld as providing sufficient due process even though 70.7% of the class members received fewer than thirty-two days' notice); *Silber v. Mabon*, 18 F.3d 1449, 1452, 1454 (9th Cir. 1994) (due process requirement and Rule 23 satisfied when settlement notices were sent out forty days before the opt-out deadline). Furthermore, the fairness hearing was scheduled more than 75 days after the notice date. *See Schwartz v. TXU Corp.*, 2005 WL 3148350, at *11 (N.D. Tex. Nov. 8, 2005) (stating that a gap of 62 days between when notice was first sent out and the fairness hearing was adequate). Except for the lead plaintiff in *Magruder*, the Court received no objections to the settlement, and only one objection to the fees sought.

b. The Proposed Settlement Must be Fair, Reasonable, and Adequate

Courts evaluate the *Reed* factors to determine whether a proposed class action settlement is fair, reasonable, and adequate. *See Reed v. General Motors Corp.*, 703 F.2d 170 (5th Cir. 1983). The *Reed* factors are: (1) evidence that the settlement was obtained by fraud or collusion; (2) the complexity, expense, and likely duration of the litigation; (3) the stage of the litigation and available discovery; (4) the probability of plaintiffs prevailing on the merits; (5) the range of possible recovery and certainty of damages; and (6) the opinions of class counsel, class representatives, and absent class members. *Newby v. Enron Corp.*, 394 F.3d 296, 301 (5th Cir. 2004). In light of the *Reed* factors, the proposed settlement is fair, reasonable, and adequate.

i. Evidence that the Settlement Was Obtained by Fraud or Collusion

Nothing in the record indicates that the current settlement was the result of secret negotiations or improper collusion. No parties (other than the lead plaintiff in *Magruder*) have

objected, and those objections do not assert any fraud or collusion. Furthermore, the settlement was obtained through formal mediation before former U.S. District Judge Layn R. Phillips, which strongly suggests that the settlement was not the result of improper dealings. *See In re Bluetooth Headset Products Liability Litig.*, 654 F.3d 935, 948 (9th Cir. 2011) (noting that the "presence of a neutral mediator" is a factor "weighing in favor of a finding of non-collusiveness").

ii. The Complexity, Expense, and Likely Duration of the Litigation

Having been heard twice by the Supreme Court and multiple times by the Fifth Circuit, and having lasted more than fifteen years, this case is indisputably complex and of lengthy duration.

iii. Stage of the Litigation and Available Discovery

The litigation was set for trial, subject to the last appeal. The parties have produced over 1.3 million documents and have taken 28 fact depositions. The appendices to the cross-motions for summary judgment exceeded 9,400 pages.

"A presumption of fairness, adequacy, and reasonableness may attach to a class settlement reached in arm's-length negotiations between experienced, capable counsel after meaningful discovery." *In re Heartland Payment Sys., Inc.*, 851 F. Supp. 2d 1040, 1063 (S.D. Tex. 2012) (internal quotation marks omitted). Here, the parties have engaged in substantial and meaningful discovery, and thus the parties were fully aware of the complete facts and the strengths and weaknesses of their respective positions.

iv. The Probability of Plaintiffs Prevailing on the Merits

EPJF succeeded in certifying the class on the December 7, 2001, disclosure and had a not insignificant probability of prevailing on the merits. However, there remained a substantial risk for all parties in proceeding to trial.

v. Range of Possible Recovery and Certainty of Damages

In the Motion for Final Approval, EPJF states that the "$100,000,000 all cash recovery constitutes approximately 11.8% of the maximum recoverable damages for the Class (approximately $848 million, as determined in consultation with Lead Plaintiff's damages expert)." (ECF No. 818 at 14). However, EPJF also points out that Defendants had strong arguments that the alleged misrepresentations were not wholly actionable, which would have limited "the maximum recoverable damages to as low as $233 million according to Lead Plaintiff's damages expert."[3] (*Id.* at 14-15). Under this lower recovery, the $100 million settlement would constitute 42.9% of the maximum recoverable damages for the class.

The focus of this factor is whether the settlement falls within the range of reasonableness. The Court is not to try the case via the fairness hearing because "the very purpose of the compromise is to avoid the delay and expense of such a trial." *Reed*, 703 F.2d at 172. In ascertaining whether a settlement falls "within the range of possible approval," courts will compare the settlement amount to the relief the class could expect to recover at trial, i.e., the strength of the plaintiff's case. *See, e.g., In re Nat'l Football League Platers' Concussion Injury Litig.*, 961 F. Supp. 2d 708, 714 (E.D. Pa. 2014) ("To determine whether a settlement falls 'within the range of possible approval,' a court must 'consider plaintiffs' expected recovery balanced against the value of the settlement offer.'"). "The fact that a proposed settlement may

[3] At the final settlement hearing, Lead Plaintiff's damages expert provided testimony on how these estimated recoveries were calculated.

only amount to a fraction of the potential recovery does not, in and of itself, mean that the proposed settlement is grossly inadequate and should be disapproved." *Parker v. Anderson*, 667 F.2d 1204, 1210 n.6 (5th Cir. 1982) (citing *City of Detroit v. Grinnell Corp.*, 495 F.2d 448, 455 (2d Cir. 1974)).

Here, the recovery is 11.8% to 42.9% of the maximum possible recovery, depending on the conservativeness of the figures set forth by EPJF. As final approval is frequently given to settlements even when "the settlement amount is a very small fraction of the damages amount projected by the Plaintiffs," this recovery is reasonable in light of the possible damages. *See In re Enron Corp. Sec., Derivative, & ERISA Litig.*, 228 F.R.D. 451, 566 (S.D. Tex. 2005). Even the "low" estimate, 11.8%, is a fairly sizeable recovery compared to other approved securities class action settlements. *See, e.g., In re Initial Public Offering Sec. Litig.*, 671 F. Supp. 2d 467, 483 (S.D.N.Y. 2009) (approving a settlement representing two percent of aggregated expected recovery). Furthermore, the amount to be recovered is more than fifteen times what the Court rejected in 2004, when it found a $6 million settlement not fair, reasonable, or adequate.

vi. Opinions of Class Counsel, Class Representatives, and Absent Class Members

Class Counsel and Lead Plaintiff all agree to the settlement. *See also Cotton v. Hinton*, 559 F.2d 1326, 1330 (5th Cir. 1977) ("[T]he trial judge, absent fraud, collusion, or the like, should be hesitant to substitute its own judgment for that of counsel."). After notice to the class was given, the only person objecting to the Settlement is Magruder, who is not a member of the class. "Receipt of few or no objections can be viewed as indicative of the adequacy of the settlement." *In re Enron Corp.*, 228 F.R.D. at 567 (internal quotation marks omitted).

c. The Parties Seeking Approval Must File a Statement Identifying Any Agreement Made in Connection with the Proposal

Rule 23(e) requires "[t]he parties seeking approval [to] file a statement identifying any agreement made in connection with the proposal." FED. R. CIV. P. 23(e)(3). This requirement does not only concern disclosure of the basic settlement terms; "[i]t aims instead at related undertakings that, although seemingly separate, may have influenced the terms of the settlement by trading away possible advantages for the class in return for advantages for others." *Id.* Committee Notes (2003). "The spirit of [Rule 23(e)(3)] is to compel identification of any agreement or understanding," written or oral, "that might have affected the interests of class members by altering what they may be receiving or foregoing." *Slipchenko v. Brunel Energy, Inc.*, 2015 WL 338358, at *6 (S.D. Tex. Jan. 23, 2015) (quoting MANUAL FOR COMPLEX LITIGATION (FOURTH) § 21.631 (2004)).

The parties have satisfied this requirement by filing the Stipulation of Settlement, which publicly discloses the terms of the agreement between EPJF and Defendants made in connection with the settlement. The Stipulation also describes a "supplemental confidential agreement" between the parties, which "gives Halliburton the right, but not the obligation, to terminate the settlement in the event that a certain portion of the Class delivers timely and valid requests for exclusion from the Class." (ECF No. 794 at 36-37).

d. An Additional Opt-Out Opportunity

Rule 23(e)(4) provides that "[i]f the class action was previously certified under Rule 23(b)(3), the court may refuse to approve a settlement unless it affords a new opportunity to request exclusion to individual class members who had an earlier opportunity to request exclusion but did not do so." Rule 23(e)(4) "comes into play when the opt-out opportunity expired before the members received notice of a proposed settlement." *Slipchenko*, 2015 WL

338358, at *7. This factor is inapplicable here. The members of the class received notice of the Settlement well before the opt-out opportunity expired.[4]

e. Class Member Objections

Class members must be provided an opportunity to object to the proposed settlement. FED. R. CIV. P. 23(e). The notice sent to the class here informed them of their right to object and outlined the process for doing so. To date, there have been a total of two objections filed to any aspect of the settlement: one by Patricia Magruder, the lead plaintiff in the *Magruder* class action, to the settlement itself, (ECF No. 810), and one by Channa Weeratunge in a one-page objection to Class Counsel's Motion for Award, (ECF No. 808). As discussed later below, the Court holds that the fee award sought by Class Counsel is reasonable.

Magruder objects to the proposed settlement as being (1) unfair to the shareholders, and (b) an "unlawful infringement on the right of the Magruder Class Claims." (ECF No. 810 at 1). Magruder argues that the release provided for in the Stipulation of Settlement is too broad, arguing that EPJF has "abandoned all other claims, and those [abandoned] claims are the subject of the Magruder Action." (*Id.* at 4).

Magruder's objection is **OVERRULED**. Because she is not a member of the class in this case, she lacks standing to object to the settlement. An objector who does not prove her membership in the class lacks standing to object to a settlement reached in a securities class action. *See Feder v. Electronic Data Systems Corp.*, 248 F. App'x 579, 580 (5th Cir. 2007) ("[O]nly class members have an interest in the settlement funds, and therefore only class members have standing to object to a settlement."); *see also In re Deepwater Horizon*, 739 F.3d 790, 809 (5th Cir. 2014) (holding that the district court did not abuse its discretion in deeming

[4] The deadline to submit requests for exclusion from the class was July 10, 2017. (ECF No. 805 at 7).

objectors who did not substantiate their membership in the class to have waived and forfeited their objections to settlement); *Shaw v. Toshiba Am. Info. Sys.*, 91 F. Supp. 2d 942, 974–75 (E.D. Tex. 2000) (noting that an objector who failed to substantiate his membership in the class did not have "proper standing" to object to class action settlement).

Magruder, as the party seeking to establish jurisdiction, bears the burden of proving standing. *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 561 (1992). The Stipulation of Settlement defines the class as "all Persons (including, as to all such Persons, their beneficiaries) who purchased or otherwise acquired common stock of Halliburton Company between August 16, 1999 and December 7, 2001."[5] (ECF No. 794 at 3). Magruder purchased her shares on December 10, 2001.[6] (ECF No. 810 at 2). Magruder provides no other evidence showing that she is a member of the Class and cites to no other authority to suggest that non-class members have standing to object to a proposed settlement.

Instead, Magruder states that she "derives her status to object to this current settlement from (1) being an original objector to the *[earlier]* settlement and (2) as an intervenor who is now Lead Class Plaintiff in the Magruder Class Action." (ECF No. 810 at 3). The fact that Magruder is the lead plaintiff in another class action is irrelevant for determining standing to object to the proposed settlement in this class action. Furthermore, Magruder cites to no authority that being an objector in the earlier $6 million settlement gives standing for her to object now, after her case was severed from this action by the Court's June 3, 2005, Order. (ECF No. 207). Magruder's case became a distinct, independent action upon severance, and she did

[5] In response to the Court's March 21, 2017, Order, (ECF No. 802), EPJF and Halliburton updated the definition of "Released Claim" to remove any ambiguity about whether the release covered Magruder's claims. (*See* ECF No 804).

[6] "Patricia A. Magruder purchased 200 shares of Halliburton stock on December 10, 2001 at a price of $13.97 per share through her online account at CSFB Direct. December 10, 2001 (a Monday) was the first trading day after December 7, 2001 (a Friday). She continues to hold those shares to this date." (ECF No. 810 at 2).

not retain membership in this class. *See also Allied Elevator, Inc. v. E. Tex. State Bank of Buna*, 965 F.2d 34, 36 (5th Cir. 1992) ("Severance under Rule 21 creates two separate actions or suits where previously there was but one. Where a single claim is severed out of a suit, it proceeds as a discrete, independent action, and a court may render a final, appealable judgment in either one of the resulting two actions notwithstanding the continued existence of unresolved claims in the other.").

III. Class Counsel's Motion for Award of Attorneys' Fees and Reimbursement of Litigation Expenses

Class Counsel applies for attorney's fees in the total combined amount of $33,333,333.33, or one-third of the Settlement Fund, plus interest. The request for one-third of the Fund is intended as an award to BSF, KSF, and Lawrence "Larry" Vincent, who "served as local counsel to BSF and later KSF in this action." (ECF No. 820 at 4). Class Counsel indicates that the award will be divided among Class Counsel as follows:

> BSF and KSF have agreed, after paying Mr. Vincent at his lodestar, with the same negative multiplier as Class counsel is seeking, to share remaining fees on a 65/35% basis with BSF receiving 65% of the fees and KSF 35%.

(*Id.* at 4 n.1). In addition, Class Counsel seeks reimbursement for $5,969,540.84 in expenses, plus interest. (*Id.* at 3). Class Counsel also asks for a $100,000 compensation award, plus interest, to Lead Plaintiff. (*Id.*)

Class Counsel argues that the requested fees are reasonable under either the "percentage of the fund" method or the "lodestar" method for calculating fees. In their Reply to the Motion for Award, Class Counsel advocates using a "scaled back lodestar analysis" as a "cross-check" to the percentage method as "a rough gauge of the reasonableness of the proposed fees." (ECF No. 831 at 5–6). Class Counsel points to other district courts in the Fifth Circuit that have accepted fee awards calculated under the percentage method in light of the *Johnson* factors and have then

used the lodestar method as a rough means of checking their work. (*Id.* at 5). Class Counsel states that the requested award equates to a "negative multiplier of 0.77 of Class Counsel's lodestar," and thus argues that the requested award is also reasonable under the lodestar method. (ECF No. 820 at 3).

Broadly, Class Counsel argues that they are entitled to this fee for several reasons, including: overcoming the initial denial of class certification in *Halliburton I*, successfully overcoming efforts to eliminate the fraud-on-the-market presumption in *Halliburton II*, serving more than 60 third-party subpoenas, filing eight motions to compel, reviewing more than 1.3 million pages of documents, taking or defending 40 fact depositions, and taking or defending 11 expert depositions. (ECF No. 820 at 2). Class Counsel also describes the settlement as an "exceptional result," which was the result of many years of hard work. (*Id.*)

a. Legal Standard

The use of a common fund to pay attorney's fees in class action settlements is well established. *See Boeing Co. v. Van Gemert*, 444 U.S. 472, 478 (1980) ("[T]his Court has recognized consistently that a litigant or a lawyer who recovers a common fund for the benefit of persons other than himself or his client is entitled to a reasonable attorney's fee from the fund as a whole."). Courts typically use one of two methods for calculating attorney's fees in common fund cases: (1) the percentage method, in which the court awards fees as a reasonable percentage of the common fund, or (2) the lodestar method, in which the court computes fees by multiplying the number of hours reasonably expended on the litigation by a reasonable hourly rate and, in its discretion, applying an upward or downward multiplier. *Union Asset Mgmt. Holding A.G. v. Dell, Inc.*, 669 F.3d 632, 642–435 (5th Cir. 2012).

Regardless of whether the court uses the percentage method or the lodestar method, it must consider the *Johnson* factors in calculating attorney's fees. The *Johnson* factors are (1) the time and labor required; (2) the novelty and difficulty of the legal issues; (3) the skill required to perform the legal service properly; (4) the preclusion of other employment by the attorney as a result of taking the case; (5) the customary fee; (6) whether the fee is fixed or contingent; (7) time limitations imposed by the client or other circumstances; (8) the monetary amount involved and the results obtained; (9) the experience, reputation, and ability of the attorneys; (10) whether the case is undesirable; (11) the nature and duration of the professional relationship with the client; and (12) awards in similar cases. *Johnson v. Ga. Highway Exp., Inc.*, 488 F.2d 714, 718 (5th Cir. 1974), *overruled on other grounds by Blanchard v. Bergeron*, 489 U.S. 87, 90 (1989).

The PSLA expressly contemplates the percentage method, providing that "[t]otal attorneys' fees and expenses awarded by the court to counsel for the plaintiff class shall not exceed a reasonable percentage of the amount of any damages and prejudgment interest actually paid to the class." 15 U.S.C. § 78u–4(a)(6); *see also Union Asset Mgmt.*, 669 F.3d at 644–45 (affirming an 18% fee award in a PSLA case, so long as the *Johnson* framework for assessing the reasonableness of a fee award is used). The statute does not define "reasonable percentage," but the Motion for Final Approval cites to numerous courts in the Fifth Circuit that have approved applications for fee awards of 33⅓% in class actions. *See, e.g.*, *In re Olicom Sec. Litig.*, No. 94-0511 (N.D. Tex. Aug. 30, 1996); *Sims v. Shearson Lehman Bros., Inc.*, Fed. Sec. L. Rep. (CCH) ¶ 98, 134, at 98,976 (N.D. Tex. Nov. 29, 1993).

If the lodestar method is used, the lodestar is calculated by multiplying the number of hours that an attorney reasonably spent on the case by an appropriate hourly rate, which is the market rate in the community for this work. *See Smith & Fuller, P.A. v. Cooper Tire & Rubber*

Co., 685 F.3d 486, 490 (5th Cir. 2012). The party seeking reimbursement of attorney's fees bears the burden of establishing the number of hours expended by presenting adequate time records as evidence. *See Watkins v. Fordice*, 7 F.3d 453, 457 (5th Cir. 1993). The court should use this time as a benchmark and then exclude any time that is excessive, duplicative, unnecessary, or inadequately documented. *See id.* The hours remaining are those reasonably expended, and there is a strong presumption of the reasonableness of the lodestar amount. *See Perdue v. Kenny A.*, 559 U.S. 542, 552 (2010); *Saizan v. Delta Concrete Prods. Co.*, 448 F.3d 795, 800 (5th Cir. 2006).

"A reasonable hourly rate is the prevailing market rate in the relevant legal community for similar services by lawyers of reasonably comparable skills, experience, and reputation." *Norman v. Hous. Auth. of City of Montgomery*, 836 F.2d 1292, 1299 (11th Cir. 1988) (citing *Blum v. Stenson*, 465 U.S. 886, 895–96 n.11 (1984)). The relevant legal community is the community in which the district court sits. *See Tollett v. City of Kemah*, 285 F.3d 357, 368 (5th Cir. 2002). The burden is on the movant to "produce satisfactory evidence—in addition to the attorney's own affidavits—that the requested rates are in line with those prevailing in the community for similar services by lawyers of reasonably comparable skill, experience and reputation." *Blum*, 465 U.S. at 896 n.11. After calculating the lodestar, the Court may either (1) accept the lodestar figure or (2) decrease or enhance it based on the circumstances of the case, taking into account the *Johnson* factors.

"[D]istrict courts in [the Fifth Circuit] regularly use the percentage method blended with a *Johnson* reasonableness check." *Union Asset Mgmt.*, 669 F.3d at 643 (endorsing the use of the percentage method, so long as it is cross-checked with "a meticulous *Johnson* analysis");[7] *see*

[7] "To be clear, we endorse the district courts' continued use of the percentage method cross-checked with the *Johnson* factors. We join the majority of circuits in allowing our district courts the flexibility to choose between the

also In Re: Oil Spill, 2016 WL 6215974, at *19 (E.D. La. Oct. 25, 2016) ("[T]he loadstar [sic] cross-check is a streamlined process, avoiding the detailed analysis that goes into a traditional lodestar examination."). Courts often then apply a lodestar calculation as a cross-check of the percentage method. *See City of Omaha Police & Fire Ret. Sys. v. LHC Grp.*, 2015 WL 965696, at *4 (W.D. La. Mar. 3, 2015) (conducting "a rough lodestar analysis to cross-check the reasonableness of the percentage fee award"); *In re Vioxx Prod. Liab. Litig.*, 2013 WL 5295707, at *3 (E.D. La. Sept. 18, 2013) ("The lodestar analysis is not undertaken to calculate a specific fee, but only to provide a broad cross check on the reasonableness of the fee arrived at by the percentage method"). The lodestar cross-check is usually applied "to avoid windfall fees, i.e., to ensure that the percentage approach does not lead to a fee that represents an extraordinary lodestar multiple." *Payment Sys., Inc. Customer Data Sec. Breach Litig.*, 851 F. Supp. 2d 1040, 1086 (S.D. Tex. 2012).

Furthermore, courts using a lodestar as a cross-check to the percentage method have relaxed the degree of scrutiny applied to counsel's billing records. *See, e.g., In re Heartland Payment Sys.*, 851 F. Supp. 2d at 1086–87 ("Those circuits approving the lodestar cross-check have made it clear that district courts need not scrutinize counsel's billing records with the thoroughness required were the lodestar method applied by itself . . . . In this case, the court has reviewed the fees-and-costs reports that counsel submitted and has examined many of the pages thoroughly. It has not taken the extraordinary amount of time needed, however, for a thorough examination of all the time and billing records that counsel generated for purposes of a standalone lodestar analysis.").

---

percentage and lodestar methods in common fund cases, with their analyses under either approach informed by the *Johnson* considerations." *Union Asset Mgmt.*, 669 F.3d at 644.

Class Counsel argues that the proposed settlement is reasonable under both the percentage method and the lodestar method. Based on the Fifth Circuit's precedent, the Court believes that proceeding with the percentage method analyzed under the *Johnson* factors will be sufficient for analyzing fees. The Court will also perform a simplified lodestar analysis as a cross-check.

a. Percentage Method

Class Counsel argues that the percentage of the fund that they request for their award of attorney's fees—one-third of the fund, or 33⅓%—is within the range of percentage fees awarded in the Fifth Circuit in other complex cases.

"The Manual for Complex Litigation states that '[a]ttorney fees awarded under the percentage method are often between 25% and 30% of the fund.'" *Klein v. O'Neal, Inc.*, 705 F. Supp. 2d 632, 675 (N.D. Tex. 2010) (quoting MANUAL FOR COMPLEX LITIGATION (FOURTH) § 14.121 (2010)); *Schwartz*, 2005 WL 3148350, at *27 ("The requested fee award of 22.2% of the Settlement Fund is consistent with and, in fact, significantly less than awards made in similar cases."). However, numerous courts in this Circuit have awarded fees in the 30% to 36% range.[8]

[8] *See Hoeck v. Compusa, Inc. et al.*, No. 3:98–CV–0998–M (N.D. Tex. Oct. 14, 2003) (Lynn, C.J.) (approving 30% fee); *In re Firstplus Fin. Group, Inc. Sec. (approving 30% fee in securities class action); *In re Intellicall Sec. Litig.*, No. 3:91–CV–0730–P (N.D. Tex. Sept. 22, 1993) (Solis, J.) (approving 30% fee in a securities class action); *Robertson, et al. v. Strassner, et al.*, No. H–98–0364 (S.D. Tex. Jan. 5, 2000) (Atlas, J.) (approving 30% fee in a securities class action); *In re Combustion, Inc.*, 968 F. Supp. 1116, 1156 (W.D. La. 1997) (Haik, J.) (approving fee of 36% of $127 million settlement); *Neibert, et al. v. Monarch Dental Corp., et al.*, No. 3:99–CV–762–X (N.D. Tex. Jun. 19, 2000) (Kendall, J.) (approving 30% fee); *In re Olicom Sec. Litig.*, No. 3:94–CV–0511–D (N.D. Tex. Aug. 30, 1996) (Fitzwater, J.) (approving 33–1/3% fee); *Belman, et al. v. Warrington, et al.*, No. H–91–3767 (S.D. Tex. Nov. 16, 1993) (Hoyt, J.) (approving 33% fee); *Sims v. Shearson Lehman Bros., Inc.*, Fed. Sec. L. Rep. (CCH) ¶ 98, 134, at

"If the request is relatively close to the average awards in cases with similar characteristics, the court may feel a degree of confidence in approving the award." *Klein*, 705 F. Supp. 2d at 675.

Here, the 33⅓% requested is slightly above the fee range suggested by the Manual for Complex Litigation, but it is not necessarily excessive for that reason alone. The fee request is further analyzed in the context of the *Johnson* factors to see whether it is fair, reasonable, and adequate.

b. *Johnson* Factors

"The court must scrutinize the agreed-to fees under the standards set forth in [*Johnson*], and not merely ratify a pre-arranged compact." *Strong v. BellSouth Telecomm., Inc.*, 137 F.3d 844, 849 (5th Cir. 1988). The court's analysis under *Johnson* must not be merely conclusory, but must establish grounds for the court's decision on each of the relevant factors. *Klein*, 705 F. Supp. 2d at 676; *but see In re High Sulfur*, 517 F.3d 220, 228–29 (5th Cir. 2008) ("If the district court has articulated and clearly applied the correct criteria, we will not require the trial court's findings to be so excruciatingly explicit in this area of minutiae that decisions of fee awards consume more paper than did the cases from which they arose."). However, "[e]ven though it is apparent that the Johnson factors must be addressed to ensure that the resulting fee is reasonable, not every factor need be necessarily considered." *In re Combustion, Inc.*, 968 F. Supp. 1116, 1135 (W.D. La. 1997).

98,976 (N.D. Tex. Nov. 29, 1993) (Kendall, J.) (approving fee of 33–1/3% of $30 million settlement in securities case); *In re ProNet, Inc.1933 Act Sec. Litig.*, No. 3:96–CV–1795–P (N.D. Tex. Nov. 19, 1997) (Solis, J.) (awarding 30% fee); *In re Granada P'ships Sec. Litig.*, No. H–90–0214 (S.D. Tex. Oct. 19, 1992) (Harmon, J.) (approving 30% fee); *Orzel v. Gilliam, et al.*, No. 3:90–CV–0044–G (N.D. Tex. May 16, 1995) (Fish, J.) (approving 30% fee in securities case); *Courtney, et al. v. Am. Airlines, Inc., et al.*, No. 4:97–CV–668–A (N.D. Tex. Sept.3, 1999) (McBryde, J.) (approving 30% fee); *Transamerican Ref. Corp. v. Dravo Corp.*, No. H–88–789 (S.D. Tex. Nov. 16, 1992) (Black, J.) (approving 30% fee); *Plains*, 2001 U.S. Dist. LEXIS 25532 (Rosenthal, J.) (approving 30% fee in securities class action). These cases were compiled by Judge Kinkeade in *Schwartz*, 2005 WL 3148350, at *27.

i. Factor 1: The Time and Labor Required

This case is over fifteen years old. There are over 800 filings on the docket. The docket indicates that there have been at least 17 hearings. There were three appeals to the Fifth Circuit, and two to the Supreme Court. The Court concludes that this case has required an enormous amount of time and labor.

BSF was appointed Class Counsel on February 23, 2007. (ECF No. 308). In the joint declaration of Carl Goldfarb and Kim Miller, Class Counsel describes the efforts put forth to prosecute Lead Plaintiff's claims over the many years that this case has been pending. (ECF No. 819 at App.01–131). Class Counsel states that it has dedicated over 67,399.7 hours to the prosecution and resolution of the claims against Defendants. (*Id.* at App.64). The joint declaration also describes how Class Counsel "overcame various legal and factual hurdles, including two trips to the U.S. Supreme Court related to class certification, the completion of extensive fact and expert discovery, including at least 40 fact depositions (4 of which were two-day depositions), 11 expert depositions, the review of over 1.3 million pages of documents, and summary judgment and *Daubert* briefing." (*Id.* at App.63).

ii. Factor 2: The Novelty and Difficulty of the Legal Issues

Class Counsel is correct that the multiple trips to the Supreme Court, and in particular the Supreme Court's reversal of Fifth Circuit precedent in *Halliburton I*, demonstrate the novelty and difficulty of the legal issues in this case:

> Class Counsel had to challenge and ultimately reverse the Fifth Circuit's now discredited precedent holding that plaintiffs had to establish loss causation by a preponderance of the evidence at class certification in order to invoke the fraud-on-the-market presumption. Even after doing so, because of the evolving case law, Class Counsel had to face novel legal questions regarding when and how the fraud-on-the-market presumption could be rebutted, what type of evidence or argument could be used to rebut the presumption at class certification, the quantum of evidence necessary to do so, and even what weight to accord the presumption

> during the analysis. The fact that the Supreme Court agreed to hear this case twice, and the Fifth Circuit agreed to hear it three times is one indication of the novelty and difficulty of the issues presented, and weighs in favor of granting Class Counsel's fee request.

(ECF No. 820 at 13–14).

iii. Factors 3 and 9: The Skill Required to Perform the Legal Service Properly and the Experience, Reputation, and Ability of the Attorneys

In its briefing, Class Counsel lumps in Factor 3, "the skill required to perform the legal service properly," with Factor 9, the "experience, reputation, and ability of the attorneys." (ECF No. 820 at 15). Class Counsel argues that this case required expertise at the trial, appellate, and Supreme Court levels. Furthermore, Class Counsel describes how much of the trial preparation—in particular, discovery and the dispositive motion preparation—occurred at the same time as the issues being heard on appeal. Class Counsel points to David Boies's "decades of experience in complex litigation" and KSF's specialized skills as securities class action litigators. (*Id.* at 16 ("Currently KSF is lead or co-counsel in ten securities putative class action litigations, including a number of high profile actions.")).

Class Counsel also points to the "quality of the opposition faced by Class Counsel" as a relevant factor in assessing their performance. *See Schwartz*, 2005 WL 3148350, at *30 ("The ability of Plaintiff's Counsel to obtain such a favorable settlement for the Class in the face of such formidable legal opposition confirms the superior quality of their representation."). The Court agrees that, in this case, that was a substantial factor due to the very high quality of defense counsel's work.

iv. Factor 4: The Preclusion of Other Employment by the Attorney as a Result of Taking the Case

Class Counsel "spent over 67,399 hours prosecuting the Action, with the bulk of that work taking place between February of 2007 and December 2016. Those hours were time that Class Counsel's attorneys could not devote to other matters." (ECF No. 820 at 17). The Court agrees that such a level of work would inevitably preclude other representations.

v. Factor 5: The Customary Fee

Class Counsel points to similar fees awarded in prior, comparable cases. The Court believes that this is one of the *Johnson* factors that does not necessarily need to be considered in this case, because cases like these do not have "customary fees." *See In re Combustion, Inc*., 968 F. Supp. at 1135 ("Even though it is apparent that the Johnson factors must be addressed to ensure that the resulting fee is reasonable, not every factor need be necessarily considered.").

vi. Factor 6: Whether the Fee Is Fixed or Contingent

Class Counsel prosecuted this case on a fully contingent basis, and accordingly, this factor supports the requested fee. The contingent nature of Class Counsel's fee is also significant considering that at numerous points this case stood on shaky ground, such as when the Court denied class certification and was affirmed in doing so by the Fifth Circuit.

vii. Factor 7: Time Limitations Imposed by the Client or Other Circumstances

This factor does not apply in this case because there is no indication that Lead Plaintiff imposed any time limits in the prosecution of this case.

viii. Factor 8: The Monetary Amount Involved and the Results Obtained

The Fifth Circuit has called this factor the "most critical" factor. *See Migis v. Pearle Vision, Inc*., 135 F.3d 1041, 1047 (5th Cir. 1998) (degree of success is "most critical [*Johnson*] factor") (quoting *Farrar v. Hobby*, 506 U.S. 103, 114 (1992)).

According to Lead Plaintiff's damages expert, if Plaintiffs prevailed at trial, the maximum amount of damages estimated was $848 million, and the minimum was $233 million. A settlement of $100 million reflects a reasonable recovery based on the estimated damages figures that the class could have hoped to recover at trial, and as discussed above, the current settlement is more than fifteen times larger than the earlier settlement that the Court rejected.

ix. Factor 10: Whether the Case Is Undesirable

Class Counsel points to BSF being the third lead counsel in this case as evidence of the undesirability of the case, as well as the uphill battle Class Counsel and Lead Plaintiff faced in continuing to prosecute this case after the Court denied class certification in 2008. Additionally, the "risk of non-recovery" and "undertaking expensive litigation against . . . well-financed corporate defendants on a contingent fee" has been held to make a case undesirable, warranting a higher fee. *Braud v. Transport Serv. Co*., 2010 WL 3283398, at *13 (E.D. La. Aug. 17, 2010).

x. Factor 11: The Nature and Duration of the Professional Relationship with the Client

BSF was appointed counsel for Lead Plaintiff on February 23, 2007, and thus has been Class Counsel for more than a decade. Considering that Class Counsel was replaced twice before BSF was appointed, the longevity of BSF's appointment indicates that the professional relationship with Lead Plaintiff was positive.

xi. Factor 12: Awards in Similar Cases

The 33⅓% requested by Class Counsel is within the range of typical awards, and is not the highest fee awarded in securities class action cases. *See In re Combustion*, Inc., 968 F. Supp. at 1156 (approving fee of 36% of $127 million settlement)*; see also In re Olicom Sec. Litig*., No. 3:94–CV–0511–D (N.D. Tex. Aug. 30, 1996) (approving 33⅓% fee); *Belman, et al. v. Warrington, et al.*, No. H–91–3767 (S.D. Tex. Nov. 16, 1993) (approving fees representing 33% of the settlement fund in securities case); *Sims v. Shearson Lehman Bros., Inc*., Fed. Sec. L. Rep. (CCH) ¶ 98, 134, at 98,976 (N.D. Tex. Nov. 29, 1993) (approving fee of 33⅓% of $30 million settlement in securities case).

xii. Conclusion

After considering all of the *Johnson* factors, the Court concludes that the percentage requested by Class Counsel is reasonable and fair. Compared to other common fund cases in this Circuit, Class Counsel is not asking for an unusually large or high fee. Furthermore, there are significant considerations that further justify the fee, such as the dogged perseverance Class Counsel showed in this case, such as eventually convincing the Supreme Court to overturn adverse Fifth Circuit precedent. Other than Channa Weeratunge's objection, which is **OVERRULED**, there were no objections from class members to the fee award. Although the lack of objections is not a *Johnson* factor, the Court finds it relevant in considering the reasonableness and fairness of the award.

c. Lodestar Method

A court is to apply a lodestar calculation as a cross-check of the percentage method. Under this method, the court takes the recorded hours worked by the attorneys and multiplies them by a reasonable hourly rate. *See, e.g.*, *Forbush v. J.C. Penney Co.*, 98 F.3d 817, 821 (5th

Cir. 1996). The resulting lodestar amount may then be adjusted upward or downward depending on the court's application of the *Johnson* factors. *See id.*

BSF presents evidence that it has spent 42,489.70 hours of attorney and other professional time prosecuting this action since February 23, 2007. (ECF No. 819 at App.133-34). Based on current rates,[9] BSF assert that its lodestar is equal to $26,738,490.50. (*Id.*) KSF asserts that it has been involved as "Special Counsel to Lead Plaintiff" since 2009. (*Id.* at App.137). KSF asserts that the firm has spent 24,910 hours prosecuting this action, resulting in a total lodestar amount of $16,385,469.50. (*Id.* at App.137-38)

Lawrence Vincent states that he began working with Lead Plaintiff in 2006, specifically to investigate the removal of then-lead class counsel William Lerach. (ECF No. 819 at App.142). After BSF was appointed lead counsel, Vincent states that he assisted primarily in appellate briefing and serving as local counsel. Vincent asserts that he has performed 321.8 hours of work in connection with the prosecution of the case and that the hourly rate he charges in comparable and non-contingent matters is $600, which results in his lodestar of $193,080. (*Id.* at App.140).

The total lodestar for Class Counsel (BSF, KSF, and Vincent) is $43,317,040.00, representing 67,721.5 hours of work.[10] The Court has examined the contemporaneous billing records submitted by Class Counsel and find them reasonable. The requested fee of $33,333,333.33 is less than the lodestar; specifically, Class Counsel is asking for 77% of their

[9] Both BSF and KSF state that each firm's lodestar was compiled using 2017 hourly rates for individuals still at each respective firm, and for individuals no longer at the firm, by using their last hourly rates. (ECF No. 819 at App.133).

[10] The Motion for Award states that Class Counsel "spent a total of more than 67,399" hours, which is the total number of hours worked by BSF and KSF, excluding Vincent's hours. (ECF No. 820 at 8). Similarly, the Motion for Award states that Class Counsel's total lodestar is $43,123,960.00, which is the total lodestar of BSF and KSF, excluding Vincent's individual lodestar. (*Id.*)

lodestar.[11] Because there is a strong presumption that the lodestar represents a reasonable fee, *City of Burlington v. Dague*, 505 U.S. 557, 562 (1992), the fact that Class Counsel seeks an award less than the lodestar supports finding that the fee award is reasonable.

d. Expenses

Class Counsel also seeks reimbursement of its reasonable expenses in the amount of $5,969,540.84, plus interest. (ECF No. 820 at 24). In the Motion for Preliminary Approval and in the Notice, Class Counsel indicated that it would seek a maximum of $7,500,000.00 in expenses, and thus the requested reimbursement is below the noticed expenses cap. (ECF No. 795 at 16). Class Counsel has provided a 472-page appendix detailing the expenses for which it seeks reimbursement. (ECF No. 834).

"Expenses and administrative costs expended by class counsel are recoverable from a common fund in a class action settlement." *Billitteri v. Sec. Am., Inc.*, 2011 WL 3585983, at *10 (N.D. Tex. Aug. 4, 2011). In *Schwartz*, Judge Kinkeade reimbursed expenses that were "reasonably and necessarily incurred in prosecuting this action and achieving the proposed Settlement." 2005 WL 3148350, at *34. These expenses included consulting expert fees, transportation, meals and lodging, in-house and outsourced photocopying, research, court reporting fees and deposition transcripts, overnight courier services, postage, and other services. *Id.*

The joint declaration of Carl Goldfarb and Kim Miller, of BSF and KSF, respectively, describes why, and for what, the expenses were incurred. (ECF No. 819 at App.070–72). A significant amount—64% of the requested expenses, or $3,818,406.07—was spent on experts

[11] The inclusion or exclusion of Vincent's hours in the total lodestar does not dramatically change the 0.77 multiplier. If Vincent's time is included in the lodestar, the requested fee is 0.7695 of the lodestar (i.e., $33,333,333.33 / $43,317,040). If Vincent's time is excluded from the lodestar, the requested fee is 0.7729 (i.e., $33,333,333.33 / $43,123,960).

and consultants, which Class Counsel claims were necessary to establish the basic elements of Lead Plaintiff's claims, and thus were necessary in the prosecution of this case. Other large expenditures include document maintenance necessary to process and maintain the 1.3 million documents in this case (11% of total); legal research (7% of total); and mediation fees, which were shared with Defendants (0.6% of total). Overall, the expenses were reasonable and necessary for successful prosecution of this case, and there have been no objections to the amount requested. Accordingly, the expenses are reimbursed.

e. $100,000 Award for Lead Plaintiff

Class Counsel seeks a $100,000 award for Lead Plaintiff as compensation for the time it dedicated in supervising this action. (ECF No. 820 at 3). Lead Plaintiff provides a declaration from the CEO of EPJF, Paula John, detailing the involvement of the Lead Plaintiff in this action, including discussing strategy, reviewing pleadings, participating in discovery, being deposed, and attending mediation. (ECF No. 819 at App.150–57). Paula John and EPJF's CFO, Patrick Byrne, argue that the time spent on this case precluded them from working on other matters. (*Id.* at App.155).

Representative parties may be awarded "reasonable costs and expenses (including lost wages)" relating to the representation of the class:

> The share of any final judgment or of any settlement that is awarded to a representative party serving on behalf of a class shall be equal, on a per share basis, to the portion of the final judgment or settlement awarded to all other members of the class. *Nothing in this paragraph shall be construed to limit the award of reasonable costs and expenses (including lost wages) directly relating to the representation of the class to any representative party serving on behalf of the class*.

15 U.S.C. § 77z-1(4) (emphasis added).

As stated at the July 31, 2017, hearing, the request for the $100,000 award for Lead Plaintiff is granted**.** Without the hard and diligent work of Lead Plaintiff over fifteen years, this recovery would not have been possible. The requested fee is reasonable based on the value of the time of Lead Plaintiff, and no one has objected to this award.

f. Scott+Scott Expenses

Scott+Scott does not file a separate motion for its expenses. However, Class Counsel "has included in its application the request by [Scott+Scott] for reimbursement of $300,652.90." (ECF No. 820 at 25). In support, Class Counsel attaches Scott+Scott's expense report, (ECF No. 834), and the declaration of Geoffery Johnson, (ECF No. 819 at App.178-82).

The expenses requested by Scott+Scott are reasonable, and there have been no objections to the amount requested. A significant amount—55% of the requested expenses, or $163,933.33—was spent on experts, consultants, and investigators—which Mr. Johnson claims was necessary to contact confidential witnesses and to prepare confidential witness memoranda used to support allegations in the complaint—and thus was reasonably necessary in the successful prosecution of this case. *See also Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, 551 U.S. 308, 308 (2007) (allowing scienter to be inferred from confidential sources). Accordingly, the expenses are reimbursed.

IV. F&S's Motion for Award of Attorney Fees and Reimbursement of Expenses

a. Fees

For their work as original co-liaison counsel on behalf of the class, F&S seeks an award of attorney's fees in the amount of its actual lodestar, without a multiplier or interest, of $200,703.75. (ECF No. 812 at 1). F&S began serving as local counsel to original lead counsel, S&B, on December 6, 2002. (ECF No. 22). On February 10, 2005, following the failed $6 million settlement, S&B moved to withdraw as lead counsel. (ECF No. 160). On May 3, 2005,

the Court appointed EPJF as the sole Lead Plaintiff and appointed Scott+Scott and Lerach Coughlin Stoia Geller Rudman & Robbins as lead counsel. (ECF No. 195). F&S's involvement as counsel ceased at this time.

Lead Plaintiff opposes F&S's request for fees. (ECF No. 825). As a preliminary matter, deference is given to Lead Plaintiff's determination that non-lead counsel is not entitled to fees. The Third Circuit recognizes "that a presumption of correctness should . . . be accorded to the lead plaintiff's decision that a non-lead counsel's work, not made pursuant to an agreement between lead counsel and lead plaintiff, is not entitled to fees to be paid out of the common fund." *In re Cendant Corp. Litig.*, 404 F.3d 173, 199 (3d Cir. 2005). In *In re Enron*, Judge Harmon noted that she "does not believe that the Fifth Circuit would go so far as to accord a presumption of correctness, but would certainly give the Lead Plaintiff's determination considerable weight" in assessing whether fees should be denied to non-lead counsel.[12] 586 F. Supp. 2d at 765. The Fifth Circuit does not appear to have commented on the amount of deference to be accorded.

The Court finds persuasive Lead Plaintiff's opposition to F&S receiving fees and note additionally that F&S has not articulated any substantial or independent benefit conferred to the Class. *In re Enron Corp.*, 2008 WL 2566929, at *3 ("If an attorney creates a substantial benefit for the class in this period . . . then he or she will be entitled to compensation."). If anything, F&S's efforts in supporting the failed settlement delayed the progression of the case and

[12] In an earlier opinion, Judge Harmon adopted the Third Circuit's test for identifying when the presumption of correctness, or "the weight that might be accorded the decision of a properly selected and effective Lead Plaintiff by the Fifth Circuit," can be overcome. 2008 WL 2566929, at *5 (S.D. Tex. June 24, 2008). Specifically, Judge Harmon stated that a lead plaintiff's opposition to non-lead counsel receiving fees could be overcome if non-lead counsel could show (1) that the lead plaintiff had failed in its fiduciary representation of the class, or (2) that the denial of fees was erroneous because non-lead counsel "can and do specifically identify the benefits they independently provided to the class that would not have been provided by the services of lead counsel." *Id.* (citing *Cendant*, 404 F.3d at 199–200).

threatened potential recovery. A significant portion of F&S's requested fees are related to the proffered $6 million settlement, which was rejected, in part, because counsel failed to include all of the lead plaintiffs in settlement negotiations and failed to disclose material details to them. (ECF No. 133 at 12-13). Further, F&S requests fees attending a hearing on August 25, 2003, on EPJF's Motion to Show Cause as to whether S&B violated its fiduciary duties to the class. If F&S was there in a supportive capacity to S&B, it was in support of arguments made against EPJF's Motion and, therefore, arguments made against the Class. *Cf. In re Enron*, 2008 WL 2566929, at *3 ("[An attorney] whose efforts create, discover, increase or preserve a fund to which others also have a claim, is entitled to recover from the fund the costs of his litigation including [fees]."). F&S also improperly requests fees in preparing a fee application in connection with the rejected $6 million settlement.[13] *See Hadden v. Standard Supply & Hardware Co.*, 1997 WL 403239, at *3 (E.D. La. July 17, 1997) ("[W]ork relating to attorneys' fees applications is not compensable from a common fund and that the time spent working on attorneys' fees applications and research regarding attorneys' fees should not be included in the lodestar amount."). The record overall indicates that F&S performed administrative services that did not benefit the class. *See also In re Adelphia Communs. Corp. Sec. & Derivative Litig.*, 2008 U.S. Dist. LEXIS 67220 at *15-16 (S.D.N.Y. Sep. 3, 2008) ("[T]he filing of a complaint, without more, is not fee-worthy" unless the filing attorneys "alone discover grounds for a suit, based on their own investigation rather than on public reports" or lay out "factual research or legal theories that lead counsel did not discover, and upon which lead counsel later rely.").

[13] For example, 3.25 hours on August 11, 2004, for "Work for motion for approval of fees." (ECF No. 814-1 at 21).

Because F&S did not provide a substantial or independent benefit to the Class and acted contrary to the wishes of at least the current Lead Plaintiff, who opposes its fee application, its requested fee award is denied.

b. Expenses

F&S seeks reimbursement of out of pocket expenses in the amount of $10,922.05, without interest. (ECF No. 812 at 1). "Lead Plaintiff does not oppose reimbursement of [F&S's] expenses reasonably incurred in connection with the prosecution of the litigation." (ECF No 825 at 5).

F&S provides detailed expense sheets in support of its request. (ECF No. 814-1 at 39). However, some of the expenses appear to have been expended in support of the failed $6 million settlement. One entry for May 29, 2004, describes a $1,772.80 expense labeled "Copies-stipulation and settlement." (*Id.* at 37). Based on the docket sheet, the stipulation to the failed $6 million settlement was filed on May 10, 2004, and thus it appears that F&S seeks to be reimbursed for making copies of the earlier settlement which, if it had succeeded, would have dramatically reduced the class's recovery. F&S also requests reimbursement for expenses related to attending a hearing on August 25, 2003, on EPJF's Motion to Show Cause as to whether S&B violated its fiduciary duties to the class, which, as discussed, was detrimental to the class. Accordingly, the Court determines that the following expenses were not reasonably and necessarily incurred in prosecuting this action and in achieving the proposed settlement:

Date	**Expense**	**Amount**
August 25, 2003	Car Rental	$47.84
August 25, 2003	Meals	$36.50
August 25, 2003	Parking	$6.50
May 29, 2004	Copies-stipulation and settlement	$1,772.90
May 29, 2004	Postage-stipulation and settlement	$64.80
	Total:	$1,928.54

The remainder of the claimed expenses of $8,993.51 is reimbursed.

V. K&K's Motion for Award of Attorneys' Fees and Expenses

a. Fees

K&K seeks $132,600.20 in fees for its work performed as local counsel for AMSF. (ECF No. 815). K&K's involvement as counsel ceased when Scott+Scott and Lerach Coughlin Stoia Geller Rudman & Robbins were relieved of their duties as lead counsel, and were replaced by BSF. (ECF No. 308). Lead Plaintiff opposes K&K's request for fees. (ECF No. 825).

Unlike F&S, K&K was more actively involved in the litigation of this case, particularly in its opposition to the failed settlement. K&K participated in "strategy regarding opposition to the Settlement, briefing on the opposition, and the preparation for . . . the hearing on the opposition." (ECF No. 815 at 3). Its work benefited the class by ultimately contributing to the current settlement. K&K also assisted in drafting the third and fourth consolidated class action complaints, briefs on the motions to dismiss, traveling to California for strategy and discovery meetings, and traveling to Houston for mediation. *Id.* Notably, Defendants' Motion to Dismiss the third consolidated class action complaint was denied, in part, based on the relation-back doctrine, the arguments for which were "developed and briefed by K&K." (Anderson Aff. ¶ 9, ECF No. 815-1). Despite Lead Plaintiff's opposition, the Court finds that K&K has provided substantial or independent benefit to the class. Moreover, the Court has examined the contemporaneous billing records and find them reasonable. Accordingly, and for the reasons similar to the ones discussed in awarding fees to Class Counsel, the Court awards attorney's fees to K&K.

However, the Court makes two modifications to the fee award. The total lodestar requested by K&K is $132,600.20, representing 305 hours of work. The lodestar is based on

current billing rates. (ECF No. 815 at 6 & n.4). The lodestar must be calculated using historical rates, as opposed to current rates. It is true that "[t]he prevailing rate, unless other factors dictate, is the current rate that is paid to attorneys even though the litigation spans a number of years." *See Pruett v. Harris Cty. Bail Bond Bd.*, 593 F. Supp. 2d 944, 946 (S.D. Tex. 2008). One such factor that militates against using the current rate is when counsel seeks fees based mostly on work performed during the early stages of litigation. *See Rodriguez v. Barrita, Inc.*, 53 F. Supp. 3d 1268, 1280 (N.D. Cal. 2014) (reducing fee award from current (2014) rate because "overwhelming majority of [counsel's] time spent in this case (approximately 93%) occurred in 2013 and earlier"). K&K stopped all work on this case on February 23, 2007, more than 10 years before it submitted its request for fees. While the rate provided by K&K may reasonably reflects the value of its services today, using that rate causes an unwarranted increase in the overall fee award. Based on the record, the fee request, adjusted for historical rates, is $118,391.88. (*See* ECF No. 826 at ¶ 3c). Second, circumstances warrant an additional downward adjustment of K&K's lodestar. K&K should not be entitled to receive proportionally more attorney's fees than Class Counsel; the Court thus applies a 0.77 multiplier, the same multiplier applied to Class Counsel's lodestar. Accordingly, K&K is awarded $91,161.75 in attorney's fees.

b. Expenses

K&K asks for $7,380.87 in expenses, plus interest, and provides a detailed expense report. (ECF No. 815 at 12). As with F&S, "Lead Plaintiff does not oppose reimbursement of [K&K's] expenses reasonably incurred in connection with the prosecution of the litigation." (ECF No. 820 at 5). After reviewing the expense report provided by K&K, the Court finds that

the expenses were reasonable and necessary for successful prosecution of this case. Accordingly, the expenses are reimbursed.

VI. RGRD's Motion for Award of Expenses

RGRD served as co-lead counsel from May 3, 2005, through February 23, 2007. RGRD initially moved for fees and expenses; however, RGRD has since withdrawn its request for an award of attorney's fees, and instead seeks only reimbursement of expenses. (ECF No. 823).

RGRD seeks reimbursement for $112,513.85 in expenses. (ECF No. 817 at 6). RGRD submits exhibits detailing its expenses, separated by category. (ECF No. 817-1 at 6-7). There are no objections to RGRD's request for expenses. After reviewing the evidence provided by RGRD, the Court finds that the expenses were reasonable and necessary for successful prosecution of this case. Accordingly, the expenses are reimbursed.

VII. Conclusion

For the reasons stated below and on the record, the Motion for Final Approval of Class Action Settlement is **GRANTED**. Class Counsel's Motion for Award of Attorneys' Fees and Reimbursement of Litigation Expenses is **GRANTED**. Class Counsel is awarded $33,333,333.33 in attorney's fees, plus interest accrued thereon.[14] Class Counsel is reimbursed $5,969,540.84 for expenses, plus interest accrued thereon. Lead Plaintiff is awarded $100,000, plus interest accrued thereon. Scott+Scott is reimbursed $300,652.90 for expenses, plus interest accrued thereon.

Federman & Sherwood's Motion for Attorney Fees and Reimbursement of Expenses is **GRANTED IN PART** and **DENIED IN PART**. F&S's is reimbursed $8,993.51 for expenses. Kilgore & Kilgore's Motion for Award of Attorneys' Fees and Expenses is **GRANTED IN**

[14] Interest here refers only to the proportionate share of interest accrued by the Settlement Fund while held in escrow. (ECF No. 794 at 32).

PART and **DENIED IN PART**. K&K is awarded $91,161.75 in attorney's fees, plus interest accrued thereon. K&K is reimbursed $7,380.87 for expenses, plus interest accrued thereon. Robbins Geller Rudman & Dowd's Motion for Award of Expenses is **GRANTED**. RGRD is reimbursed $112,513.85 for expenses, plus interest accrued thereon.

SO ORDERED.

April 25, 2018.

BARBARA M. G. LYNN
CHIEF JUDGE
